3. Another essential point to remember is that the word "citta" is used loosely, even in Buddha Dhamma. It often gives the same impression as the word "thought." We just say, "a citta comes to the mind."

- The word "citta" has that "conventional" meaning, but it is the initial stage of a "thought" that is also called a citta. That citta has only the seven UNIVERSAL cetasika. That means those seven cetasika are in ANY citta, including a that of a Buddha or an Arahant. That means it is a "pure citta" (pabhassara citta in Pāli.)
- See "Amazingly Fast Time Evolution of a Thought (Citta)."

## A Pure Citta Has Only Seven Universal Cetasika

4. A pure citta is analogous to a glass of purified water without any contaminant. It has only seven cetasika (mental factors): Phassa (contact); vedanā (feeling); sañ̃̄̄̄ (perception); cetanā (volition); ekaggatā (One-pointedness) can become Sammā Samādhi; jīvitindriya (life faculty); manasikāra (memory).

- If we add a bit of sugar to that glass of water, the water becomes sweet. That is like adding "good" (sobhana) cetasika, like compassion, to a citta.
- But if we add a bit of dirt to that pure water, it becomes dirty. That is like adding "bad" (asobhana) cetasika, like anger, to a citta.
- Yet, we may still call either glass of water a "glass of water."
- In the same way, we commonly refer to any thought as a citta. However, technically, only the first stage can be called a citta, Thus, "any thought" is a viññanna (a contaminated citta.)

## The Nine Stages of the Evolution of a Citta

5. The initial, pure stage of citta becomes contaminated within an unbelievable short time. It evolves through nine steps in the following sequence: citta, mano, mānasain, hadayaì, paṇ̂araí, mano manāyatanaỉ, māna indriyain, viññāna, viññākkhando. [Yaï cittaì mano mānasaí hadayaì paṇ̣araì mano manāyatanaì manindriyà̀ viññāṇaì viññānakkhandho...]

- By the time it gets to the viññanna stage, it is a contaminated citta. As we will discuss below, how contaminated it gets, depends on the thought object and one's gati.
- What we experience is that last stage.

6. Before we proceed with the discussion, let me provide a reference to the above verse, which is in the "WebLink: suttacentral: Paticcasamuppāda Vibhangga," in Section WebLink: suttacentral: 2.5.1. Akusalacitta
: "Tattha katamaì sañkhāra paccayā viñn̄ānaì? Yaì cittaì mano mānasaì hadayà் paṇ̣̂araìn mano manāyatanai் manindriyai் viññānaì viñāānakkhandho tajjāmanoviññānadhātu-idaì vuccati "sañkhārapaccayā viñn̄ānam̀."

- Note that "sañkhāra paccayā viñ̃̃ānaí" happens in different ways depending on whether it is a "good thought" or "bad thought."

## The "Nine Stages of Evolution" Can Only be Seen by a Buddha

7. That fast process can be seen only by a Buddha. It is perceptible discernible (gocara) only to the highest purified mind.

- The Buddha explained that first to Ven. Sāriputta, when he first explained the key ideas of Abhidhamma to Ven. Sāriputta and it took several hundred years of effort by "the bhikkhus of the Sāriputta lineage" to do a systematic compilation of all mental phenomena.
- That is why the Abhidhamma Piṭaka was finalized only at the third Sangāyanā (Buddhist Council.) See "Abhidhamma - Introduction."

8. It is best to describe the actual process to understand these steps. Let us go back to the evolution of a single citta in nine steps.

- It starts with the citta stage, the purest stage (it has only the seven universal cetasika or mental factors). One is aware that one is alive.
- These deeper aspects are discussed in "Pabhassara Citta, Radiant Mind, and Bhavangga."

9. Now that we have stated that technical point (which is not critical for this discussion), we can proceed to the next stages.

- At the first stage of citta, the mind just knows that the world exists. That there is a sense impression coming through either of the five physical senses (cakkhu, sota, jivhā, ghāna, or kāya indriya) or the māna indriya.

## The Nine Stages of Evolution

10. Let us take a specific event: Suppose it is seeing a woman.

As we said above, at the first citta stage, one is only aware that a thought object came to the mind via the eyes (cakkhu indirya).

- Then in the mano stage, the mind "measures" or "compares" (that is why it is called the "mano" stage) with past experiences to decide whether the object is a tree, a car, a man, a woman, etc. In this case it determines that it is a woman.
- The next "mānasaì" stage is to decide a specific connection to him/herself. In this case, it turns out that it is a woman.

11. Now, those steps occur for any human, including an Arahant or even the Buddha. One cannot live without getting to this stage. The Buddha was able to differentiate between Ven. Ānanda, Ven. Sāriputta, Visaka, or King Kosala, and addressed them accordingly.

- In fact, in the Karaniyamatta Sutta, "mānasambhāva ye aparimānaì.." means to cultivate "mānasaì" to the optimum level. That way, one can quickly figure out how to deal with a given situation.

12. At the next step, an average human will generate the "sañ̃̃̄ about the person seen" and may make a definite identification of that woman and generate some affection. See "Sañ̃ña - What It Really Means." That is called the "hadayam" stage. Remember that all nine steps happen in a short time and do not involve conscious thinking.

- For example, it might reach the "hadayam"" stage if it was a distant relative.

13. Proceeding to the next stage of "pandaramं," that feeling established at the "hadayam" stage strengthens in the case of a close person like one's mother. It is like allocating more "energy" to a closer person.

- It is also important to note that it may go the totally opposite way for an arch-enemy. Here, one will have strong bad feelings about such a person.

14. Now comes the next stage of "mano manāyatanam." Here one's mind becomes an "āyatana" or "be receptive" (or hatefil) to that person depending on the level of attachment (revulsion) formed at the hadayami and paṇdaraín stages.

- That is strengthened (to a level based on the feelings generated in the previous steps) at the "mana indriyam" stage.
- Note that this "mana indriyam" stage is different from the mana indriya involved in "manañca paṭicca dhamme ca uppajjati manoviññānaim."

15. At the viññ̄āna stage, one's mind is removed from "ñāna" or wisdom or "the reality of nature." As long as one has worldly desires (i.e., cravings), one has not stopped the viññāna stage (i.e., until one becomes an Arahant).

- Then at the last stage of viñ̃̃̄̄nakkhandha, the mind strengthens attachments cultivated in the past, evaluates the current situation, and makes new hopes and plans for the future. That is the last stage.
- That last stage is what we experience. We do not experience one such "citta" or "viñ̃nāṇa." Thousands of citta vith $h$ may flow within a fraction of second before we become aware of it.

16. However, in the case of an Arahant, the process stops at the mānasain stage and thus does not evolve further. The mind makes decisions based on recognizing a person, regardless of the connection between oneself and that person.

- Even under the threat of being killed, feelings towards that person will be no different from feelings towards one's mother. That is why I say that we cannot even imagine the mind of an Arahant.

## The Initial Citta Stage is a Pabhassara Citta

17. Anguttara Nikāya 1; Accharāsañghātavagga; Sutta \#51 is a very short sutta. Here is the complete sutta: "Pabhassaramidaì, bhikkhave, cittaì. Tañca kho āgantukehi upakkilesehi upakkilitṭhain. Taì assutavā puthujjano yathābhūtaì nappajānāti. Tasmā 'assutavato puthujjanassa cittabhāvanā natthī'ti vadāmī"ti.
Translated: "Bhikkhus, a (pure) citta has pabhassara nature. That citta is contaminated by defilements (keles or kielesa). A normal human who has not heard my Dhamma (assutavā puthujjano) is unaware of this true nature. I do not recommend citta bhāvanā to them."

- This sutta clearly states the importance of knowing that a pure citta becomes contaminated to the level of viññāna.

18. Once we have those basics, we can now build on that and try to make the picture clearer.

- For example, when seeing an attractive object, the mind may become greedy by incorporating lobha, issa, etc. (asobhana cetasika) that bends the mind immorally.
- Upon seeing a helpless person, one may generate compassionate thoughts by incorporating metta, karuna, etc. (some sobhana cetasika).

## Contamination of a Thought Depends on Gati and ATrammana

19. Therefore, we can now see why two factors play important roles in how the thought process would evolve. One is one's gati, and the other is how strong the thought object (ärammana) is.

- Someone with "lobha gati" can be easily influenced by a slightly attractive object or ārammaña. On the other hand, someone with less 'lobha gati' may not be perturbed by it. Possible situations are endless, depending on the sense -object and one's gati. That is a good vipassana $\bar{a}$ subject to contemplate.

## Sañkhāra Paccayā Viññāna

20. Another important thing is that when one repeatedly thinks about a given sense object, then one's viññāna (expectations) for that objects will be cultivated. That, in turn will cultivate one's gati in that direction, thus becoming a self-feeding cyclic process. A good example is an innocent teenager who gets addicted to alcohol or drugs.

- If we thought a bit more about the above case, we could see the involvement of "sañkhāra paccayā viññāna." When one starts thinking consciously (generating vacī sañkhāra) about drinking and then also do it frequently (kāya sañkhāra), then one's "drinking viññāna" will grow in strength.
- That is why we must be carefil about letting our thoughts "go wild" or "daydreaming." See "Correct Meaning of Vacī Sañkhāra."
- One should think about one's bad habits or "bad viñ̃āạa" that keep popping up in mind regularly. By being mindfiul, we can suppress such thoughts (by thinking about their adverse consequences or ādīnava) and reduce such bad gati. Similarly, one can strengthen one's "good gati" by engaging more in similar activities.
- That is the basis of $\bar{A} n \bar{a} p \bar{a} n a$ and Satipatt $h \bar{a} n a$.

### 4.4 Living Dhamma - Fundamentals

October 27, 2016

- What Are Kilesa (Mental Impurities)? - Connection to Cetasika
- Suffering in This Life - Role of Mental Impurities (with Desanā 2)
- Satipatthāna Sutta - Relevance to Suffering in This Life (with Desanā 3)
- How Are Gati and Kilesa Incorporated into Thoughts? (with Desanā 4; in two parts)
- Noble Eightfold Path - Role of Sobhana Cetasika
- Getting to Samādhi (with Desanā 5)
- Sexual Orientation - Effects of Kamma and Gati (Sañkhāra)

## 4.4 .1 <br> What Are Kilesa (Mental Impurities)? - Connection to Cetasika

August 26, 2016; revised June 7, 2020; February 18, 2021; August 24, 2022; re-written August 26, 2022; re-written August 27, 2022

We discuss kilesa (defilements) in terms of impure mental factors (asobhana cetasika.)

## Kilesā̈ Make a Mind Corrupt

 impure") are related to gati and $\bar{a} s a v a$ (in both Pāli and Sinhala.) They are the main reasons we do things (sañkhāra) to perpetuate the sansäric journey. The closest English translation for kilesa is "impurities accumulated in mind."

- Kilesā gives rise to immoral thoughts or akusala citta via asobhana cetasika, as discussed below. Asobhana cetasika is listed in "Cetasika (Mental Factors)."
- Sobhana or asobhana cetasika (moral or immoral mental factors) are what makes a given citta a moral (kusala) or corrupt (akusala); for details, see "Citta and Cetasika."
- As you can guess, sobhana and asobhana mean "beautiful" and "non-beautiful," respectively.

## Kilesā Are Related to "San"

2. There are several posts on related critical concepts of san, sañkhāra, saimsāra, etc. See, "What is "San"? Meaning of Sansāra (or Samisāra)."

- Also, repeated bad habits cultivate gati and anusaya (hidden cravings/defilements.) All these are related to kilesa and lead to a set of unique kilesa for each living being. Of course, they keep changing.
- When one removes all these mental impurities or kilesa (or keles), one attains kilesa parinibbāna or saupadisesa Nibbāna. That person is still "in this world of 31 realms." That is the state of a living Arahant; they have removed all mental impurities from the mind.
- When that Arahant dies, there is no rebirth, and Nibbāna is "complete." That is Parinibbāna or anupadisesa Nibbāna.

## Kilesā And Upakkilesā

3. Kilesa are of different types:

- Lobha (excess greed), dosa (ill will), and moha (delusion) are, of course, the primary mental impurities or kilesa.
- The others arise because of the primary three and are called upakkilesa ("upa" means "close to"). There are several Upakkilesa Suttas describing them variously. "WebLink: suttacentral: Upakkilesa Sutta (AN 5.23)" provides an analogy. Just as gold becomes dull and hard to work if other metals are mixed in, pañcan̄̄varaṇain makes a citta dull.
- "WebLink: suttacentral: Upakkilesa Sutta (MN 128)" has a more detailed description. I have linked it to the start of that discussion.

## Cetasika Analysis in Abhidhamma

4. Abhidhamma provides a more detailed description of kilesa and upakkilesa in terms of cetasika.

- Kilesā and upakkilesā are all asobhana cetasika. The three main asobhana cetasika (lobha, dosa, moha) are kilesa. The rest are upakkilesa. That observation will help us better identify kilesa and upakkilesa.
- The other 11 asobhana cetasika belonging to upakkilesa are the following: Ditṭhi (wrong views), vicikicchā (inability to sort out moral from immoral), thīna (dullness of mind), middha (trapping of the mind somewhere and losing focus), issa (jealousy), macchariya (tendency to hide wealth), kukkucca (do lowly acts), ahirika (shamelessness in doing immoral), anatoppa (fearlessness in doing immoral), uddhacca (tendency to become offended), and māna (self-importance).

## Kilesā And Upakilesā Are Asobhana Cetasika

5. Identifying kilesa as asobhana cetasika makes it easier to see how kilesa (mental impurities) are systematically reduced and removed at each stage of Nibbāna.

- The Abhidhamma Piṭaka of the Tipiṭaka was finalized after the Parinibbāna of the Buddha. So, in the Sutta Piṭaka, mostly the term kilesa was used.
- The Buddha briefly described Abhidhamma to Ven. Sāriputta. It took several generations of Bhikkhus of the "Sāriputta lineage" to fully assemble the Abhidhamma structure. It was finalized only at the third Buddhist Council; see "Abhidhamma - Introduction."
- Some say that the citta/cetasika analysis was "invented" by bhikkhus when compiling Abhidhamma after the Parinibbāna of the Buddha. But they are sadly uninformed. Various types of cetasika that can arise in cittas are discussed in suttas. See, for example, "Kāya Sutta (AN 10.23)" and "Mahācunda Sutta (AN 10.24)."

## Removal (Non-appearance) of Asobhana Cetasika with Magga Phala

6. There are four universal asobhana cetasika that are in ALL akusala citta. They are moha (delusion), uddhacca (restlessness), ahirika (shameless of wrongdoings), and anottappa (fearlessness of misdeeds). See "Cetasika (Mental Factors)." It is easy to see that these four asobhana cetasikā or mental impurities are completely removed only at the Arahant stage. However, all akusala cetasik $\bar{a}$ reduce in strength at each stage of magga phala.

- The following asobhana cetasika stop arising after the Sotāpanna stage: ditṭhi, vicikicchā, thīna, middha, issā, macchariya, kukkucca. Furthermore, lobha, dosa, and moha reduce the strength to become rāga, paṭigha, and avijjā.
- The above clarification could help one decide whether one has attained the Sotāpanna stage. (See the meanings of those Pāli terms in \#4 above): for example, one should have lost jealousy, a tendency to hide wealth from others, etc.). This means that one has realized the worthlessness of material things to a significant extent; that comes with comprehending the anicca nature to some extent.
- At the Sakadāgāmi stage, kāma rāga (which is a part of rāga) and patigha reduce in strength (they still keep the same names). At the Anāgāmi stage, both kāma rāga and patigha stop arising.
- The remaining asobhana cetasika (avijja, ahirika, anatoppa, uddhacca, mana) stop arising at the Arahant stage.

## Many Mental Impurities Removed at Sotāpanna Stage

7. Thus, we can see that many "mental impurities" or kilesa or asobhana cetasika stop arising after the Sotāpanna stage. Still, a Sotāpanna abstains entirely from only one akusala kamma, as discussed in "What is the only Akusala Removed by a Sotāpanna?."

- The Buddha said that the kilesa leftover for a Sotāpanna is equivalent to a thumb-full of sand compared to sand on Earth for an average human. Now we can see why. Many asobhana cetasika stop arising, and all others are reduced in strength at the Sotāpanna stage.
- Note that akusala kamma (immoral deeds) are different from akusala citta (immoral thoughts). There are ten akusala kamma and 12 akusala citta. See "Ten Immoral Actions (Dasa Akusala)" and "Akusala Citta and Akusala Vipāka Citta." The mind is a very complex entity, and all these parameters are needed to describe what happens in mind. But they are all inter-consistent. With time, one can grasp various aspects of the mind with these parameters.
- All different types of defilements removed or reduced at each stage of Nibbāna are listed in "Conditions for the Four Stages of Nibbāna." That table provides a complete summary in one place.

## Kilesa in Twelve Types of Akusala Citta

8. Let us discuss some practical things when figuring out how different types of cetasika influence our thoughts (citta.)

- As shown from \#6, moha (or its reduced form avijjā) is in all akusala citta. There are only 12 types of akusala citta, and 8 of them have lobha (or its reduced forms of kāma rāga, rūpa rāga, or arūpa $r a \bar{g} a$ ). When one is attracted to a sensory object, one of these eight akusala citta arises.
- Lobha and dosa do not arise together. There are only two akusala citta with the dosa cetasika. When repulsed by a sensory object, one of these two akusala cittā arise.
- The other two akusala citta do not have either lobha or dosa, but only the moha as a root. These two cittā arise not due to greed or hate but purely due to moha (or avijjā, its reduced form).
- More details can be found in the post, "Akusala Citta and Akusala Vipāka Citta."

## Kilesā, Asobhana Cetasika, and Immoral Gati

9. Each person's kilesā are thus a combination of the 14 asobhana cetasika but keep changing/evolving. The goal is to stop them from arising. In practice, this happens by changing one's gati (habits) and anusaya (hidden cravings); see "9. Key to Ānāpānasati - How to Change Habits and Character (Gati)."

- Until the Sotāpanna stage, any of the asobhana cetasika can arise in a person. They may temporarily be subdued or lessened in strength but never removed.
- Therefore, these kilesā (or asobhana cetasika) do not always appear; they can stay hidden as anusaya. They can come to the surface when triggered by an external stimulus (like seeing an attractive person or an enemy). This "bubbling up to the surface" is called āsava. See, "Āsava, Anusaya, and Gati (Gathi)."
- When in a comprehensive anāriya meditation program (like a meditation retreat), these kilesā (or asobhana cetasika) do not get a chance to come to the surface; they stay hidden as anusaya. The environment at a retreat is such that "temptations" would be minimal. Thus one could be enjoying nirāmisa sukha at such a retreat.
- However, when one returns from the retreat, one is exposed to various sensory inputs. That WILL reawaken the same old akusala citta burdened with asobhana cetasika.

## Once Removed at a Magga Phala, Kilesa Cannot Return

10. However, when one removes a part of kilesa (asobhana cetasika) at each stage of magga phala, they are PERMANENTLY removed or reduced per \#6 above. No external stimulus can trigger asobhana cetasik $\bar{a}$ that have been permanently removed.

- That is the difference between the temporary relief many have experienced at meditation retreats and the permanent relief upon becoming a Sotāpanna, i.e., between the anāriya and Ariya Paths.
- See "Akusala Citta - How a Sotāpanna Avoids Apāyagāmi Citta."

## An Analogy

11. Since all these Pāli words could confuse you at the first read, let us use an analogy to clarify what kiles $\bar{a}$ (asobhana cetasik $\bar{a}$ ) do to our thoughts. Here we compare citta (or thoughts) to a glass of pure water. Most of our thoughts are like clear water. They are not immoral or moral, just neutral. We see, hear, etc., millions of things daily but generate moral or immoral thoughts in relatively few cases.

- In this analogy, immoral thoughts are like dirty water. Just like added dirt makes the water cloudy, asobhana cetasik $\bar{a}$ contaminate a citta. But how do these asobhana cetasik $\bar{a}$ get incorporated into a citta?
- Since a citta arises in a billionth of a second, there is no way to control what kinds of cetasik $\bar{a}$ get into a citta. It happens automatically, according to our gati/anusaya!

## Anusaya Can Be Compared to Mud at the Bottom of the Glass

12. Even though a glass of water has dirt, most of it settles at the bottom. Thus, the water appears relatively clean. Our minds are like that too. Most of the dirt (mental impurities, kilesa, or asobhana cetasika) remain hidden most of the time. They stay as anusaya; see "Āsava, Anusaya, and Gati (Gathi)." Thus anusaya can be thought of as "the dirt accumulated" at the bottom of the water glass.

- However, if stirred with a straw, the dirt will make the water dirty.
- In the mind's case, the stirrer is a desired (attractive) or an undesired (repulsive) sense event. Mainly the asobhana cetasika of greed and hate come to the surface (always accompanied by the four universal cetasika mentioned in \#4, but could be accompanied by a few more of the other 11 asobhana cetasika, depending on the situation.
- The other two related parameters of gati and anusaya contribute to setting up the exact asobhana cetasika that will arise for a given sensory input. For example, an alcoholic only has to see a whiskey bottle to get the urge for a drink. Only a person with ingrained habits (gati) of a thief will steal on impulse, i.e., anusaya will be triggered automatically.

## Connection to Pañcañ̄varaṇa

13. Another related point is that glass with dirt ALWAYS has some of it mixed in with water, even though most of the "heavy stuff" goes to the bottom. We can compare that "ever-present" muddy color to the pañca nīvarana (five hindrances), which makes our minds "covered" almost at all times.

- Just like the dirty water prevents us from seeing what is in the water, a mind covered with pañca n̄̀varaña cannot "see-through."
- These "ever-present" pañca nīvaraṇa are responsible for the "sense of agitation" or "sense of unfulfillment" that is there with us most of the time.
- When engaged in a meditation program, the mind can become relatively pure for a considerable time. That is called vikkhambhana pahāna (or pahāna.) That is in contrast to tadañga pahāna (suppressing only for a short time) and uccheda pahāna (permanent removal). See "Suffering in This Life - Role of Mental Impurities."
- By the way, while listening to a discourse or reading a Dhamma post, one could get into tadañga pahāna. Then the content may become easily understood, and one could momentarily feel the nirāmisa sukha too. That is why one should read these posts when the mind is relatively calm. That makes conditions for tadañga pahāna optimum and even extends to vikkhambhana pahāna, i.e., for a day or longer.

## Nirāmisa Sukha Appears With Removal/Suppression of Kilesa

14. Now we can see how nirāmisa sukha comes during meditation sessions per the question raised in a previous post, i.e., "Nirāmisa sukha is felt by which citta?".

- Nirāmisa sukha appears when the asobhana cetasika (or kilesa) and pañca nīvaraña are SUPPRESSED.
- The post "Noble Eightfold Path - Role of Sobhana Cetasika" addresses how a Sotāpanna's mind automatically blocks certain types of asobhana cetasika.

## Why Is It Necessary to Use Pāli Words?

15. I hope everyone will understand my reasons for emphasizing Pāli words. In many cases, it is difficult or even impossible to find a single English word to convey the meaning of a Pāli word (e.g., anicca); these are powerful words that pack a lot of content. Here, there is no equivalent word in English for kilesa.

- It is best to use Pāli words (and some Sinhala words like "niveema" or "suva"), but with an understanding of what they mean. See "Why is it Necessary to Learn Key Pāli Words?." So, don't be discouraged by these Pāli terms; keep reading to the end, and you will see it start making sense. You can "fill in the gaps" by reading relevant posts afterward.

### 4.4.2 Suffering in This Life - Role of Mental Impurities

## September 2, 2016

1. In the post, "Starting on the Path Even without Belief in Rebirth" in this series ("Living Dhamma"), we introduced two types of hidden suffering revealed to the world by the Buddha, and discussed the first type of suffering that we experience in this life.

- Here we continue that discussion, and figure out ways to relieve that suffering.

2. In the previous post, "What Are Kilesa (Mental Impurities)? - Connection to Cetasika," we discussed how asobhana cetasika represent the mental impurities or kilesas.

- In this and a few more desanās, we will discuss that highly condensed post, in order to simplify and clarify the main ideas relevant to practice.

3. Here is the desana $\bar{a}$ (You may need to adjust volume control on your computer):

### 4.4.3 Satipaṭ̣̣āna Sutta - Relevance to Suffering in This Life

## September 10, 2016

1. This is the sixth post in this series. It is important to follow the series from the beginning. All posts are at: "Living Dhamma."

- Here I want show that what we have been discussing in this section is exactly what is recommended in the beginning of the Mahā Satipatṭhāna Sutta.
- Here we will discuss the key verse, "ātāpī sampajāno, satimā vineyya loke abhijjhā domanassam" that appears in the sutta numerous times. It is also the basis of the Ānāpāanasati bhāvanā.

2. Many people believe that the Sutta is basically a kammattana that one recites or "meditate on." But it is much more than a kammattana. I will provide more evidence in future posts, but here is the audio on the basics of the Mahā Satipatṭhāna Sutta (you may need to control the volume in your computer):

Prerequisites for the Satipatthāna Bhāvanā

Next post in the series, "How Are Gati and Kilesa Incorporated into Thoughts?."

### 4.4.4 How Are Gati and Kilesa Incorporated into Thoughts?

September 22, 2016
In this post, we will discuss why mano sañkhāra are different from kaya and vacī sañkhāra. Understanding this will help one to realize how our gathi can AUTOMATICALLY give rise to immoral thoughts.

- It will also help one understand how such initial immoral thoughts can be overcome by purposefully generating moral thoughts. This is actually the basis of the Satipatṭhāna and Ānāpānasati bhāvanā.
- Furthermore, we will discuss the issue of where our gathi, kilesa, or cetasika are "stored."

This is the seventh post in this section: "Living Dhamma." To get full benefits, one should start from the first post. I am using a combination of text and audio files to convey a lot of information in this section.

Here are the audio files :
WebLink: Audio Desanā: Episode 4 - How Are Gati and Kilesa Incorporated into Thoughts?
WebLink: Audio Desanā: Episode 4 - How Are Gati and Kilesa Incorporated into Thoughts? (Original Larger file size)

October 22, 2017: I just listened to the above audio after one year. They are good and provide solid basis for understanding gati and how they can be changed by controlling vacī and kāya sañkhāra that we have control over.

- It is important to realize that many citta vīthi flow in a second. But each subsequent citta vīthi is influenced by the previous one. So, they can take one on a downward path very quickly unless we intervene by being mindful.
- It is very important to realize that: mano sañkhāra are generated AUTOMATICALLY based on our gati. Vacī sañkhāra are generated when we "talk to ourselves, without getting the words out." Both such "internal speech" and actual speech are associated with vacī sañkhāra; bodily actions are kāya sañkhāra.
- July 26, 2019: Reader Siebe just pointed out that at 14.30 mins I had defined speech as 'kāya sañkhāra. That is not correct, as explained in more detail in "Correct Meaning of Vacī sañkhāra."
- We become CONSCIOUS about both vacī and kāya sañkhāra quickly and thus have control over them; see, "Correct Meaning of Vacī sañkhāra."

## Posts mentioned in the desana $\bar{a}$

1. Suicide statistics: WebLink: Suicide and Depression

- I know that most readers of this site do not have suicidal tendencies. But the point is that we underestimate the severity of mental suffering compared to our physical suffering.

2. If one has a hard time comprehending the Tilakkhana, starting with anicca, one needs to first follow the mundane Eightfold Path, remove the first type of suffering, and experience the nirämisa sukha as explained in the previous posts in this section.

- This is also pointed out in the "Mahā Cattārīsaka Sutta (Discourse on the Great Forty)" and "Buddha Dhamma - In a Chart."

3. More details on how our minds control our physical bodies are in the sections: "Citta and Cetasika" and "Gandhabba (Manomaya Kāya)."

- In particular, the following post illustrates how we perceive our external world: "Citta and Cetasika How Viññ̄āna (Consciousness) Arises."
- Citta Vīthi are discussed in "Citta Vithi - Processing of Sense Inputs."

4. How thoughts can affect other people: "Transfer of Merits (Pattidana) - How Does it Happen?."
5. The brain architecture of humans and animals: "Truine Brain: How the Mind Rewires the Brain via Meditation/Habits."
6. The post mentioned in the discussion on the question "Where are these gati or kilesa or cetasika are maintained or stored?": "Our Two Worlds: Material and Immaterial."
Next in the series, "Noble Eightfold Path - Role of Sobhana Cetasika."

### 4.4.5 Noble Eightfold Path - Role of Sobhana Cetasika

September 30, 2016; revised December 5, 2017 (\#5); July 11, 2021; August 26, 2022

1. In previous posts in this section, we have discussed how nirämisa sukha or "peace of mind" arises due to both removal of asobhana cetasika (non-beautiful mental factors) or kilesa AND the cultivation of sobhana cetasika (beautiful mental factors).

- In this post, I will point out that 7 of the 8 factors in the Noble Eightfold Path are in the set of sobhana cetasika.

2. The most important fact that one needs to comprehend from the posts in this series up to this point, is that our minds are heated/agitated by the presence of asobhana cetasika or kilesa or defilements.

- On the other hand, our minds are soothed and comforted, and made joyful by the presence of sobhana cetasika.
- One may not realize this until one comprehends this fact and practices cultivating sobhana cetasika while suppressing/removing asobhana cetasika.

3. As explained elsewhere at the site, Abhidhamma, with its methodical analysis of citta and cetasika, was not finalized for a few hundred years after the Parinibbāna of the Buddha at the Third Buddhist Council. This enlarged Canon completed at the Third Council was committed to writing in Sri Lanka in the first century BCE ( 29 BCE) at the Aluvihara Monastery at the Fourth Buddhist Council. This was the last Buddhist Council attended by Arahants.

- Soon after that, the decline of the pure Dhamma of the Buddha started its decline with the simultaneous rise of the Mahāyāna; see the section "Historical Background."
- When Buddhaghosa wrote the Visuddhimagga, presumed to be a summary of the Tipitaka, even Theravadins stopped using the Tipitaka for convenience.
- Therefore, no one seemed to have realized some important possible usages of cetasika: First, kilesa are the same as asobhana cetasika. Second, components of the Noble Eightfold Path are in the set of sobhana cetasika. This makes it easier to comprehend how one could systematically follow the Path, which is the post's focus.
- I will discuss the details in the upcoming desanās, but here I would like to provide a summary that we can use for that discussion. Another summary post that will be used in these desanās is a summary given in one of the previous posts: "What Are Kilesa (Mental Impurities)? - Connection to Cetasika."

4. Let us start by continuing from the last desana $\bar{a}$, where we discussed how INITIAL thoughts in response to a sensory event arise without us even being conscious about it. These initial thoughts arise AUTOMATICALLY due to our gati or set of sobhana/asobhana cetasika. Any akusala thoughts arise due to our kilesa, which are the same as asobhana cetasika.

- However, because our speech and bodily actions are much slower than the rising of those initial thoughts, we can keep vigilant and reverse any reactive akusala thoughts that are AUTOMATICALLY generated.
- This is the basis of both Satipațthāna and Ānāpānasati Bhāvanā. Please listen to that previous desanā on "How Are Gati and Kilesa Incorporated into Thoughts?" and fully comprehend this important concept. Here is the link to that desanā in two parts (there is volume control on the right, but for the second desan $\bar{a}$, you may need to turn up the volume on your computer):
WebLink: Audio Desanā: Episode 4 - How Are Gati and Kilesa Incorporated into Thoughts?
WebLink: Audio Desanā: Episode 4 - How Are Gati and Kilesa Incorporated into Thoughts? (Original Larger file size)
- We also discussed the evidence for such gati to be associated with any given person and addressed the question of where they are "stored."

5. We also saw in the above desanās that those initial thoughts that arise in response to a sense event are called mano sañkhāra. Therefore, we do not have conscious control over mano sañkhāra, AND they arise within a fraction of a second DUE TO our gati (set of sobhana/asobhana cetasika).

- December 5, 2017: Such akusala mano sañkhāra CAN then lead to the generation of vacī sañkhāra (silent speech in our heads and speech) and kāya sañkhāra (bodily actions). This differs from the desanā, and I have discussed the reasons for this revision in "Correct Meaning of Vacī Sañkhāra."
- But, if we are mindful (sati), we can catch any such akusala mano sañkhāra and make sure they do not lead to akusala vacī and kāya sañkhāra.
- In the Eightfold Path, such deliberately generated vacī sañkhāra are called sammā sañkappa or sammā sankalpa.
- And those sammā sañkappa were generated because one acted with sammā sati.

6. In the above desanās, we discussed an example of a person X finding a lost ring. If X had strong greedy gati, The initial thoughts (mano sañkhāra) could be to keep the ring for himself. However, if X knows about being mindful, X has time to evaluate the situation with vacī sañkhāra (in his head) and conclude that keeping the ring for himself is immoral.

- If he made that correct decision, even after thinking about it, he could prevent an akusala kamma of stealing. Not only that, he can do a kusala kamma by ensuring that the ring is returned to the rightful owner.
- So, now we can see the critical roles of sammā sati and sammā sañkappa in the Eightfold Path. We have the opportunity (unlike animals) to rationally think about our initial REACTIVE decisions and to reverse them if they are immoral.

7. If X acted with samma sati and realized the problem with the initial reaction and made the right decision with samma sañkappa, then he can take the next steps to samm $\bar{a} v \bar{a} c \bar{a} \bar{a}$ (moral speech) and samm $\bar{a}$ kammanta (moral actions) to implement that decision. He can walk over to the counter, hand over the ring, and tell the office personnel to return the ring to the owner.

- This is just one possible example. We come across many such instances during the day. In another example, one may get annoyed by someone accidentally stepping on one's foot in a crowded place and start yelling at that person without thinking about the consequences. That person did not intentionally do that, especially since it was likely to be a stranger.
- Even if one started getting the words out, one could quickly stop and smile at the person indicating that it is no big deal. That would make that person be relieved because, most likely, he/she felt bad about it.
- This simple act of kindness would lead to a "cooling down" on both sides. The other person will feel relief and will thank for the kindness. Furthermore, it could have escalated into a shouting match and led to "heated minds" on both sides.

8. When one sees the benefits of such mindful behavior, one will start doing more. One will start living a moral life. This is sammā $\bar{a} j \bar{i} v a$ or moral livelihood.

- Not only that, one will make an extra effort to be mindful and catch any reactive thoughts that could lead to such akusala kamma. This is sammā vāyāma or moral effort.
- In a few weeks or months, this will start changing one's ingrained gati. When one stops using asobhana cetasika, their power will diminish with time. At the same time, one is cultivating sobhana cetasik $\bar{a}$ (i.e., sammā sati, sammā sañkappa, sammā vācā, sammā kammanta, sammā ajjīva, sammā vāyāma). Thus bad gati will diminish, and good gati will grow.

9. Now, X was able to think rationally about the bad consequences of his initial decision (mano sañkhāra) to keep the ring because he had samma ditthi or moral vision, to some extent. Deep down, he knew that such an act of stealing was immoral and was able to fight off the tendency to keep it.

- Sammā dittthi is related to the sobhana cetasika of pañña, which is loosely translated as "wisdom." This "wisdom" cannot be cultivated by reading books, even by reading Dhamma. The pañ̃̄ā cetasika is cultivated by learning Dhamma and living it (i.e., by following the Eightfold Path), thereby getting rid of moha.

10. Now, let us examine the connection between the other factors in the Eightfold Path (here, the mundane version) and some of the sobhana cetasika.

- First, three factors in the Eightfold Path have the same names in the list of sobhana cetasika: samm $\bar{a}$ vācā, sammā kammanta, sammā ājīva; see "Cetasika (Mental Factors)."

11. Sammā sañkappa are the vacī sañkhāra that we deliberately generate even if we have akusala mano sañkhāra arising due to sense inputs. Vacī sañkhāra are described in the suttā as vitakka (pronounced "vithakka")and vicāra (pronounced "vichaara"). Vitakka is turning the mind towards a thought object, and vicāra is keeping the mind around that thought object.

- Those who are familiar with jhānā know that vitakka and vicāra are two jhāna factors in anāriya $j h a ̄ n \bar{a}$. In the first anāriya jhāna, one can, for example, turn the mind into a kasiña object (vitakka) and keep it there (vicāra). In Ariya jhānā, they are called savitakka and savicāra because one is focused on Nibbāna.
- So, you can see that maintaining sammā sañkappa is the same as generating "moral" vitakka and vicāra or kusala vacī sañkhāra. Remember that these are generated in the head, not speaking out. They are called "sankalpana" in Sinhala.
- Also, we note that vitakka and vicāra could be used in immoral paths. A master thief planning a robbery will focus on that task and spend many hours thinking about the plan. So, those two cetasika fall under the category called particulars or pakiṇnaka; they can appear in kusala or akusala thoughts as needed.

12. Now, sammā vāyāma arises from another of these particulars, or pakinṇaka cetasika, the viriya cetasika.

- When one is making an effort to live a moral life, that sammā vāyāma. If one is making an effort towards an immoral life, like that master thief, he is making micchā vāyāma.
- Of course the sati cetasika, which is a sobhana cetasika, is sammā sati.

13. Now, we are left with sammā samādhi. This is the only factor that is not related to a cetasika directly. Most people have the idea that samādhi is jhāna or at least is attained only in formal meditation. But it is much deeper. In the next desan $\bar{a}$, I will discuss samādhi and the implications of what is summarized in this post.

- We are trying to comprehend and reinforce the FOUNDATION of Buddha Dhamma: How one can remove the "thaapa" or "heat" from the mind by getting rid of asobhana cetasika (kilesa) and SIMULTANEOUSLY "cool down" the mind and bring joy to it, by cultivating sobhana cetasika.

This was discussed in the first desana $\bar{a}$ in this series:
"The Hidden Suffering that We All Can Understand"

## WebLink: Audio Desanā: Episode 1 - The Hidden Suffering That We All Can Understand

WebLink: Audio Desanā: Episode 1 - The Hidden Suffering That We All Can Understand (Original Larger file size)

- More details were given in the following two desanās:
"Suffering in This Life - Role of Mental Impurities"
WebLink: Audio Desanā: Episode 2 - Suffering in This Life - Role of Mental Impurities

WebLink: Audio Desanā: Episode 2 - Suffering in This Life - Role of Mental Impurities (Original Larger file size)
"Satipattana Sutta - Relevance to Suffering in This Life"
WebLink: Audio Desanā: Episode 3 - Satipatthāna Sutta - Relevance to Suffering in This Life
WebLink: Audio Desanā: Episode 3 - Satipatthāna Sutta - Relevance to Suffering in This Life (Original Larger file size)
14. As discussed in the above desanās, akusala thoughts that arise with asobhana cetasika cloud our minds and keep us in the dark. Moha is darkness; it leads to lobha and dosa. That darkness can be temporarily lifted (tadañga pahāna) during listening or reading Dhamma.

- The next step is to keep that "light on" for days and weeks by being mindful and stopping akusala thoughts that lead to akusala kamma for an extended time. This is vikkhambhana pahāna, which is what we are trying to achieve now. It is done by being mindful, i.e., with samm $\bar{a}$ sati.
- The ultimate goal is to permanently remove such asobhana cetasika and to make that "cooling down" permanent (uccheda pahāna), even for future lives. We will get to that in future posts. But we need to establish a good foundation and experience the nirāmisa sukha for extended periods (vikkhambhana pahāna) first.

15. To get rid of darkness (moha), one has to bring light in. Light is pañña or "wisdom", a sobhana cetasika. The Noble Eightfold Path is designed to optimize the pañ̃̄ā cetasika - via sammā samādhi and to eliminate the moha cetasika.

- Other sobhana cetasika, like karuṇa and mudita (or mudutā) also help with this process.
- Ultimately, one will see how different pieces of the puzzle (including Paṭicca Samuppāda) all fit together to make an easy-to-see picture of the whole process. That will make it easier to grasp the Tilakkhaña and advance to the next stage.
- All of these can be shown to be consistent with the scheme of sīla, samādhi, and pañña. In the WebLink: suttacentral: Cetanā Karanīva Sutta (AN 11.2), the Buddha has detailed how sīla (moral conduct) leads to nirāmisa sukha, and nirāmisa sukha leads to samādhi, and samādhi, in turn, leads to pañn̄̄a. We will discuss all these in the upcoming desanās.
Next in the series, "Getting to Samādhi."

### 4.4.6 Getting to Samadhi

## October 7, 2016

1. In the post "Noble Eightfold Path - Role of Sobhana Cetasika," it was discussed how 7 of the 8 factors in the Noble Eightfold Path are related to some of the sobhana cetasika or moral mental factors.
2. In the following desana $\bar{a}$, we discuss how the cultivation of those 7 factors lead to the 8th factor in the Noble Path, Sammā Samādhi, or at least the mundane version of it first (volume control will appear on right when you start playing):
"Getting to Samādhi"
WebLink: Audio Desana: Episode 5 - Getting to Samādhi
WebLink: Audio Desana: Episode 5-Getting to Samādhi (Original - Larger file size)

## Links mentioned in the desanā:

3. Before one can comprehend the Tilakkhana (anicca, dukkha, anatta), one needs to get to mundane Sammā Samādhi. There are two kinds of Sammā Samādhi and also a micchā samādhi:

- What is Samādhi? - Three Kinds of Mindfulness
- Three Kinds of Ditthi, Eightfold Paths, and Samādhi

4. The role of the brain in changing one's gathi:

- Brain - Interface between Mind and Body

5. Two types of suffering discussed in:

- Starting on the Path Even without Belief in Rebirth

6. Suppressing and eliminating the pancanivarana in stages:

- Suffering in This Life - Role of Mental Impurities

Next in the series, "Micchā Ditthi - Connection to Hethu Phala (Cause and Effect)", ...

### 4.4.7 Sexual Orientation - Effects of Kamma and Gati (Sañkhāra)

## January 14, 2017

This post will be helpful in not only clarifying Buddha's teachings on sexual orientation, but also that there can be many varieties of sañkhāra, viññāna, and corresponding bhava and jathi arising according to paṭicca samuppāda.

1. In this beginning-less rebirth process, it is likely that we all had switched between male or female many times, just as we are likely to have been born in most of the 31 realms in the past.

- It is said that the Bodhisattva - before becoming Buddha Gotama - was a female when the paramita process to become a Buddha was initiated.
- However, once the paramita process progressed, and the Bodhisattva became a male, it never switched back to female.
- Only a male can actually be a Buddha.

2. Whether one is male or female is predominantly determined by one's sañkhāra, and not due to a past kamma.

- But in some cases, kamma could be the direct cause. For example, if one intentionally severed or mutilated another's sexual organs, it is possible that one may be born without a sexual organ. Such a person is called a "napunsaka" in Sinhala (pandaka in Pāli), but I am not aware of a corresponding English word.
- An eunuch is a person who is castrated, so that also could be due to a kamma vipāka of a past kamma.

3. Male/female distinction is there only in the kāma loka. In the brahma realms (higher 20 realms), there is no such distinction. Brahmā do not have dense physical bodies or sexual organs.

- One is born in either the 16 rūpa loka realms or the 4 arūpa loka realms (brahma realms) because one has given up all desires for bodily pleasures, including sex, because one has seen the value of nirāmisa sukha (and jhānic pleasures) that can be achieved by giving up bodily pleasures.

4. One is born in kāma loka because one likes bodily pleasures, especially those associated with taste, smell, and sex. Of course, vision and sound that help satisfy those three bodily pleasures also come into play here.

- One is born in human or deva realms in the kāma loka because one has done meritorious deeds ( puñ̃̃a kamma). There are female devas, who have attained those births because of their puñña kamma just like male devas. One is born a female deva, because one has cultivated "iththi sañkhāra"; see \#5 below.
- One is born in the four apāya realms in the kāma loka because one has done immoral deeds (pāpa kamma). Here the corresponding sañkhāra are apuññabhi sañkhāra.

5. One is born male or female due to whether one cultivates "purisa sañkhāra" or "iththi sañkhāra" by thinking, speaking, and doing things accordingly. One does not do either puñña abhisañkhāra or apuñña abhisañkhāra here.

- Such sañkhāra (kaya, vacī, and mano) are not necessarily meritorious (puññabhi sañkhāra) or immoral (apuññabhi sañkhāra). Those are in line with pure habits based on "purisa gathi" and "iththi gathi."
- This can be compared to cultivating habits for playing a certain musical instrument. They are called "vāsana keles," keles that do not have good or bad kamma vipāka, but more like ingrained habits.

6. Purisa is the Pāli or Sinhala word for a male and the word comes from "piri" or "full." A male is likely to give more (especially to the wife) than to take from the wife. Iththi is the Pāli (and old Sinhala) word for female, and means "ithiri" or "left over space to be filled." For example, if a cup is full that is "piri"; if it is not full, it needs more to become full, it has "ithiri."

- So, a male is likely to willingly buy things for the wife, but does not care much about his appearance. Most wives expect gifts and sustenance.
- However, these "purisa gathi" and "iththi gathi" can have large variations. A male has more "purisa gathi" than "iththi gathi." But we do see "alpha males" with close to $100 \%$ "purisa gathi" as well as females with very high "iththi gathi."
- On the other hand, we also see females who like to act and dress more like males, and also males who like to act and dress more feminine. If they cultivate those gathi more, a sex change is possible in future lives (in rare cases even in this life).

7. In most families, if one examines the wardrobes of the husband and wife, one is likely to find many more items in the wife's wardrobe (in particular, the man may have a couple of pairs of shoes but the wife will have many!). Females wear much more jewellery too.

- Furthermore, a female is more concerned about the appearance of her (and her husband). A guy usually grabs something to wear, but a woman is likely to pay much more attention. I know by experience that I have been "instructed politely" to change into something better many times when going out.
- Thus females constantly think about theirs (and their spouses and children's) appearance. This is not necessarily due to greed, but mainly due to sansāric habits.

8. Therefore, as far as attaining Nibbāna, it does not matter whether one is a male, female, or somewhere in between (with mixed gathi).

- One is born in the deva realms due to good kamma vipāka, and there are male and female devas, just like in the human and animal realms. The type of sex is not determined by kamma vipāka.
- All brahma realms are "unisex." They do not have bhava dasaka, which determine the sex type. Brahmā do not have dense bodies to experience touch, taste of foods, or smells. They have very fine bodies with just the hadaya vatthu, kaya dasaka, cakkhu dasaka, and sota dasaka.
- Therefore, a brahma "body" has only a few suddhatthaka, and is much much smaller than an atom in modern science. So, it is clear why sense pleasures are absent in brahma loka.

9. It is important to realize that there are moral gathi due to puñ̃̄̄̄bhisañkhāra (puñña abhisañkhāra), immoral gathi due to apuñ̃̄̄̄bhisañkhāra (apuñña abhisañkhāra), and "kammically neutral" gathi due to sañkhāra that are not abhisañkhāra.

- While one is born in the human bhava, one would also have a "iththi bhava" (as a female) or "purisa bhava" (as a male).
- Not only that, one could be born in an "angry bhava" for a given period of time that would be triggered by a sense event such as seeing an enemy - if one has cultivated angry gathi by thinking, speaking, and acting with an angry mindset.
- One could be born in a "greedy bhava" the same way. If we start acting mindfully to think, speak, and act with less greed, those greedy gathi will reduce over time.
- The more one thinks, speaks, and acts in a "female way", one will be cultivating "female gathi"; but these are not moral or immoral sañkhāra as we discussed above.

10. In any of these cases, the more sañkhāra one makes, one builds up the corresponding viñ $\bar{n} a ̄ n a$ (sañkhāra paccayā viññāna) and so on until it gets to strengthening upādāna and thus strengthening bhava (upādāna paccayā bhava).

- Therefore, paticca samuppāda explains not only how bhava in the rebirth process, but also in bhava that last only for short periods of time, like getting into an "angry state of mind" or "angry bhava."

11. Another possibility that may come into play in a transgender person (a person whose sex is changed during the lifetime) can be understood of one understands the role of the gandhabba (mental body) that dictates the functioning of the physical body. Gandhabba is not a Mahāyāna concept: "Gandhabba State Evidence from Tipitaka."

- When a gandhabba goes into a womb, it is not firmly attached to the zygote (the cell formed by the union of the father and the mother) during the first several weeks.
- Sometimes, the gandhabba just leaves the womb if it turns out to be not a good match with the parents. This is the reason for a miscarriage.
- If a gandhabba leaves the womb within such a short time period, in some cases another gandhabba can enter the womb and take possession of the partially formed physical body that was abandoned by the previous gandhabba. Now, it may happen that the second gandhabba is of opposite sex.
- For example, suppose the first gandhabba was a male and the second a female. So, this female is thus taking hold of a physical body that was taking shape to be a male and thus continue to form a male body. Once born as a male baby, and while growing the female character may start to convert the physical body to that of a female. This is what happens to a transgender person.

12. One is bound to the kāma loka because one has craving for bodily pleasures, whether it is tasting good food, watching movies, listening to music, smelling nice fragrances, or in engaging in sexual activities. If one does those activities without engaging in immoral activities, then the only harm done is to be eligible to be born in the kāma loka.

- One cannot be freed from even the higher realms in the kāma loka (human and deva realms), if one has desires for such bodily pleasures. However, it becomes relevant only at the Anāgām $\bar{\imath}$ stage. A Sotāpanna or a Sakadāgāmī has not given up desires for sensual pleasures.
- I have not seen anything in the Tipitaka that distinguishes between sexual activities based on who the partners are. So, it seems to me that homosexual or bisexual activities are not that different from heterosexual activities as far as kammic consequences are concerned. They are all done to achieve bodily pleasures.
- However, if one engages in any immoral activities - in particular breaking the five precepts - then one would be eligible to be born in the lowest four realms of the ka$m a ~ l o k a$, the $a p \bar{a} y \bar{a}$.
- I specifically made the comment on the homosexuality in answering a specific question by a reader. The main point is to make sure that any pleasurable activity at the expense of hurting someone will have bad consequences, and depending on the nature, could make one eligible to be born in the apayy $\bar{a}$.

13. One way to understand the anicca nature is to take a good look at the transient nature of our physical body and that it can provide only temporary bodily pleasures, even though they are enjoyable.

- The gandhabba is the more long-lasting entity; a human bhava can last many hundreds to many thousands of years; a physical body is a temporary shell used by the gandhabba for about 100 years.
- The bodily pleasures that one experiences with this "physical shell" can last only part of that maximum 100 years. As one gets old, those pleasures go away, and there is no way to keep them the same.
- On the other hand, the jhānic pleasures - or at least nirāmisa sukha - can be enjoyed even at old age, as long as one keeps steps to maintain the brain in good condition. The gandhabba - since it is trapped inside the physical body - needs the brain to in order to be mindful and to cultivate good vaci and mano sankh $\overline{a r a}$; this is what is emphasized in the earlier posts in this section, and analyzed in detail (for those who need to go deeper) in the Abhidhamma section.

14. Finally, it is important to emphasize the point that it will take a concerted effort to understand these concepts fully. The more one reads, the more one will understand. It is not possible to gain insight by reading a few posts. One has to spend time and read relevant posts in order to "fill in the gaps."

- A simple introduction to the concept of gadhabbaya is given in this section: "Our Mental Body Gandhabba."
- A section is the Abhidhamma is devoted to the concept of gadhabbaya: "Gandhabba (Manomaya Kāya)." There are posts in other sections too, in relation to the material in those sections.

## 4.5 <br> Mundane Sammā Samādhi

October 27, 2016

- Micchā Ditthi - Connection to Hethu Phala (Cause and Effect) (with Desana 6)
- Suffering in This Life and Paticca Samuppāda (with Desana 7)
- Suffering in This Life and Paticca Samuppāda II (with Desana 8)

### 4.5.1 Micca Ditṭhi - Connection to Hethu Phala (Cause and Effect)

## October 18, 2016

1. The main reason for many people having various types of micch $\bar{a}$ ditthi (or wrong views) can be traced back to the fact that the workings of cause and effect involving living beings - and in particular the mind of the sentient beings - is complex.

- Science has been able to have much success in the material realm, simply because it is easier to see how cause and effect work in the material realm.

2. In the discourse (desanā) below, we will talk about cause and effect (hethu-pala) in Buddha Dhamma, and how conditions (paccaya) play a critical role in mental phenomena. The complex relationship between causes and effects in relation to the mind is the reason why it is hard for many to comprehend how and why kamma lead to kamma vipāka. As we discuss in the desanā:

- Nothing in this world can come to existence without suitable causes AND conditions,
- Rebirth process must be valid, in order to fully implement the principle of causality (cause and effect).

3. The critical link between hethu-pala and paticca samuppāda is patthāna dhamm $\bar{a}$, which describe the conditions under which causes (hethu) bring about effects or results (phala).

- In the near future, I will start a new section on patṭhāna dhammā. It is a deep subject, but it can be simplified to easily understand the relationship between hethu-pala and paṭicca samuppāda.

4. Here is the desan $\bar{a}$ (volume control on the right):

### 4.5.2 Suffering in This Life and Paṭicca Samuppāda

## October 28, 2016

In a previous desan $\bar{a}$ in this section, we discussed how suffering in this life is described in the beginning of the Mahā Satipaṭthāna Sutta. In this desanā, we will discuss how it is described by Paṭicca Samuppāda.
"Suffering in This Life - According to Pațicca Samuppada"

## 2. Taṇhā: Tanhā - How We Attach Via Greed, Hate, and Ignorance

3. Mano sañkhāra arise automatically, without conscious thoughts. And conscious thoughts - even without speech - are vacī sañkhāra:

## How Are Gati and Kilesa Incorporated into Thoughts?

- In this desana $\bar{a}$, incorrectly said that speech is vacī sañkhāra because the mouth and the tongue are moved during speech. However, whether one talks to oneself or actually get the words out loud, both are $v a c \bar{i}$ sañkhāra. There is a difference between moving body parts in general (as in walking) and moving the lips and tongues during speech: They are done with two types of rupa: kāya viñnatti and vaci viññatti respectively. I will discuss this in detail later.
- My thanks to the reader who pointed out my mistake in categorizing speech as kaya sañkhāra. I had to dig deeper in Abhidhamma to find the explanation. I can and do make mistakes, and that is why I welcome your input. My goal is to have this website to be fully self-consistent.

### 4.5.3 Suffering in This Life and Paṭicca Samuppāda II

## December 7, 2016

1. In the previous desanā, "Suffering in This Life and Paticca Samuppāda," we discussed one application of Paticca Samuppāda (PS).

- Here, we will continue that discussion to gain more insights and discuss the importance in controlling vaci sañkhāra during Satipaṭthāna and Ānāpānasati bhāvanā.

2. I have posted three new essays in other sections at the website since that time.

- Correct Meaning of Vacī Sañkhāra
- Asevana and Annamanna Paccaya
- Sutta Learning Sequence for the Present Day

They are relevant to the discussions in this section.
3. Here are the PS sequences for reference, as you go though the discussion. You may want to make a printout of this post or have this post open while listening.

- Avijjā paccayā sañkhāra, sañkhāra paccayā viñnāṇa, viññāna paccayā nāmarūpa, nāmarūpa paccayā salāyatana, salāyatana paccayā phassa, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhava, bhava paccayā jāti, jāti paccayā jara, marana, soka, parideva, dukkha, domanassa, upasaya sambhavan ti."

The cycle ends with marana or death and describes the time evolution of how a sankhata (sankata in Sinhala) (whether it is a thought process or a living being or an inert entity) arises and eventually dies.

New desanā: "Suffering in This Life and Pațicca Samuppāda II"
WebLink: Audio Desana: Episode 8 - Suffering in This Life and Paticca Samuppāda II

## 4.6 <br> Transition to Noble Eightfold Path

September 2, 2017

- Is It Necessary for a Buddhist to Eliminate Sensual Desires?
- Sīla, Samādhi, Pañ̃̃ā to Paññā, Silla, Samādhi
- Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammam.

### 4.6.1 Is It Necessary for a Buddhist to Eliminate Sensual Desires?

September 28, 2018; revised June 1, 2021; December 13, 2021

## Introduction

1. I saw the above question raised in a discussion forum recently (with a different title). The questioner stated: "Eliminating sensual desire as a lay follower doesn't seem possible, or reasonable, especially if one plans on being in a relationship, or having motivation at work. .."

- I think this is a critical question. Most people have not understood the fact that one MUST follow the Noble Path of the Buddha sequentially.
- Getting rid of sense desires (including sex, craving for food, etc.) is unnecessary in the beginning and even up to the Sotāpanna stage.
- Getting to the final stage of Nibbāna (Arahanthood) is a step-by-step process.

## Following the Path Is a Step-by-Step Process

## 2. The necessary INITIAL steps involved are:

(i). Be a moral person and hold the mundane five precepts (abstain from killing, stealing, sexual misconduct, outright lying, and getting intoxicated) and also gossiping, slandering, and harsh speech; see, " 2 . The Basics in Meditation."
(ii). Understand the correct "wider world view" of the Buddha, and get rid of the ten types of micch $\bar{a}$ ditṭhi; see, "Mahā Cattārisaka Sutta (Discourse on the Great Forty)."
(iii). Learn about the "deeper world view of the Buddha," stated by Tilakkhaṇa (anicca, dukkha, anatta nature); see, "Anicca, Dukkha, Anatta."
3. When one starts to understand the "anicca nature" (anicca means much more than just impermanence) of this world, one becomes a Sotāpanna Anugāmi. When that "correct vision" about "this wider world of 31 realms" sinks into the mind permanently, one becomes a Sotāpanna.

- One does not need to even think about removing the desire for sex or any other sensory pleasure until one gets to the Sotāpanna stage. That is a critical point that most people do not understand.

## The futility of Starting at the End

4. Therefore, many people waste precious time by either first trying to suppress sense desires, and even in some cases, try to eliminate the innate sense of "me" or "a self."

- But like one cannot learn algebra or advanced calculus without learning how to do addition, those people will not make any significant progress. It is impossible to do so.
- Furthermore, while one may get temporary relief from "stresses of day-to-day activities" by doing breath meditation, that will not provide the long-term release from suffering that the Buddha explained.
- Until one begins to understand Tilakkhaṇa, one will never get to the Sotāpanna stage.

## Even a Sotāpanna Has Not Given Up Sensual Pleasures

5. Even during the time of the Buddha, many lay followers attained the Sotāpanna stage and continued to live "householder lives," too. They were married and had regular jobs. There was no need to avoid sense pleasures, including sex, at all.

- For example, Vishākā (or Visākā), who was the leading female lay disciple at the time, attained the Sotāpanna stage at age seven and went on to get married and have twenty plus children.
- Many others were regular lay people with families who attained the Sotāpanna stage and continued to live that way.
- Of course, those who desired to attain higher stages of Nibbāna made an effort to eliminate the craving for sense pleasures. Most of them became bhikkhus who abstain from sex and other sense pleasures.

## Only at Anāgāmī Stage One Will Lose Craving for Sensory Pleasures

6. One needs to completely abstain from sense pleasures entirely only to become an $A n \bar{a} g \bar{a} m \bar{u} \overline{\text {. Even a }}$ Sakadāgāmī still enjoys sense pleasures, even though he/she would not have the desire to "own" things that provide sense pleasures.

- For example, a Sakadāgāmī would still enjoy some sense pleasures, but there would be no desire to own "things that provide sense pleasure" (houses, cars, etc.).

## Losing Craving for Sensory Pleasures Comes After a Deeper Understanding of Tilakkhana

7. One CANNOT just give up sense pleasures by sheer will power and become an $\boldsymbol{A n} \bar{a} g \bar{a} m \overline{\mathrm{l}}$. One has to comprehend the "anicca nature" at a higher level than a Sotāpanna, and then those desires will NATURALLY go away.

- That maybe hard for most people to understand: how the desire for sense pleasures will naturally go away. That is why one should follow the Path SEQUENTIALLY, one step at a time.
- By the way, the sense of "me" or " a self" will go away only at the Arahant stage!

## It is Necessary to See Harmful Consequences of Sensory Indulgences (Kāmasukhallikānuyoga)

8. However, it is also important to realize that one needs to stay away from both excessive sensory pleasures (kāmasukhallikānuyoga) and extreme ascetic practices of completely staying away from any comfort (Attakilamathānuyoga.) The Buddha recommended the "middle path," where one would live a simple, comfortable life without going to either extreme.

- Therefore, one cannot become a Sotāpanna by enjoying sense pleasures to the full, i.e., maintaining a "playboy type" lifestyle.
- When one starts comprehending the anicca nature, one's life WILL become simple.
- Even before one gets to the Sotāpanna stage, one will start feeling nirämisa sukha due to lessened stress on the mind due to this simple lifestyle.

9. Of course, one can speed up the process of the Sotāpanna stage by giving up sense pleasures. Those who take this path become bhikkhus. They voluntarily give up most sense pleasures, including sex.

- If one is to attain jhāna, one must at least SUPPRESS all sense desires. For example, in "WebLink: suttacentral: Tapussa Sutta (AN 9.41)," "..So kho ahamं, ānanda, vivicceva kāmehi vivicca
akusalehi dhammehisavitakkaì savicāraì vivekajaì pūtisukhaìm paṭhamaì jhānaì upasampajja viharāmi."
- That means one needs to have all thoughts of sense pleasures and akusala kamma removed from one's mind at the time of getting to the jhāna.
- That statement appears in every sutta describing jhāna.

## The Wider World View

10. According to the "wider world view" of the Buddha, there are 31 realms in this world. Suffering in those realms decreases as one goes from the lowest four realms (ap $\bar{a} y \bar{a}$,) where the suffering is intense, to the human realm (where there is both suffering and happiness). In deva realms and 20 Brahma realms, there is increasingly more happiness.

- The peaceful feeling one experiences in a jhāna are the same sense experience of Brahmā in the corresponding realms. But getting to jhāna has nothing to do with getting to magga phala, even though $j h a \overline{n a}$ can provide a better mindset to do insight meditation.
- None of those realms can provide permanent happiness because a lifetime in any realm is finite. Even though the Brahma realms have very long lifetimes, one would eventually die and be reborn in any realm.
- If one's goal is permanent happiness, one must eventually get to the Arahant stage of Nibbāna. However, if one can get to the Sotāpanna stage, one is guaranteed to get to the Arahant stage within a relatively few subsequent births.

## Difference With Other World Religions

11. That is the main difference between Buddha Dhamma and other religions. Christianity and Islam promise permanent happiness in deva realms, and Hinduism promises lasting happiness in a Brahma realm.

- But the Buddha taught that nothing in this world is permanent. That holds for living beings and inert things in the whole universe.
- Scientists (including Einstein) believed as recently as 100 years ago that the universe is in a "steady state." Now science has accepted that everything in our world is in constant flux.
- Therefore, one born in any realm will die from there and be reborn in another realm.

## There Is Nowhere in This World Where Suffering Ends (Anicca Nature)

12. The above sub-title summarizes the anicca nature of this world. One gets to the Sotāpanna stage by "seeing that." When one first realizes the anicca nature of this world, one can immediately see the dangers in doing the strongest of dasa akusala. That realization will make one's mind resistant to doing "apāyagāmi actions," i.e., those that make one eligible to be born in the four lowest realms (apāy $\bar{a}$.)

- That understanding registers permanently in the mind of a Sotāpanna and is unbreakable. That is why he/she will never do any such immoral deed, no matter how tempting.
- At that time, one will have unbreakable faith in Buddha, Dhamma, and Sañgha. One can see at that time how valuable Dhamma is. Of course, the Buddha discovered that Dhamma. It can be conveyed accurately only by a Noble Person.
- That is the reason for "unbreakable faith," or "aveccappasāda" (avecca pasāda) in Buddha, Dhamma, and Sañgha; see \#4 of "Sotapatti Anga - The Four Qualities of a Sotāpanna."
- One is also said to have "Ariyakānta sīla" or "unbreakable moral conduct" as a Sotāpanna. That does not mean one will not do any of the dasa akusala. But one will never again do a dasa akusala with strong kamma vipāka bringing rebirth in the apāy $\bar{a}$. A Sotāpanna has permanently removed such a mindset.

## Higher Stages of Nibbāna Come With Deeper Comprehension of Anicca Nature

13. A Sotāpanna would then get to the Sakad $\bar{a} g \bar{a} m \bar{\imath}$ and $A n \bar{a} g \bar{a} m \bar{\imath}$ stages by getting rid of the desire for sense pleasures in two phases.

- Avijja, or the ignorance of the Four Noble Truths, is removed only at the Arahant stage. That is the time when one removes the "sense of me" or the "sense of a self."
- It is a systematic, long process.
- As I said initially, one cannot expect to do advanced mathematics unless one first knows how to add/subtract, then how to do algebra, etc.
- Thus, moral conduct and getting rid of the ten types of micchā ditt hi are REQUIREMENTS for any stage of magga phala. Getting rid of the cravings for sense pleasures comes after that.

## There Are Dangers in Craving for Sensory Pleasures

14. Finally, one may think that all one needs to do is get to the Sotāpanna stage. Because then one would be free from the ap $\bar{a} y \bar{a}$. That is true. However, when one gets to the Sotāpanna stage, one will see the sufferings in the kāma loka, including the deva realms. In a way, it is good to focus on getting to the Sotāpanna stage, and not worry about the higher stages.

Still one needs to at least start seeing the dangers of excessive sensory pleasures, even before the Sotāpanna stage. That is necessary to get to Sammā Ditthi. One would then remove the wrong perceptions (saññ̄a) about the value in sensual pleasures at the Anāgami stage. See, "Vipallāsa (Ditthi, Saññā, Citta) Affect Sañkhāra."

As stated in the WebLink: suttacentral: Dhammika sutta (Snp 2.14):

- Abrahmacariyam parivajjayeyya,

Añgārakāsum் jalitaìva viññ̄u;
Asambhuṇanto pana brahmacariyam,
Parassa dāraì na atikkameyya.

## Translated:

- A wise person would live a celibate life (avoiding sex), as one would avoid falling into a pit of fire. But if one is not yet at the stage of abstaining from sensory pleasures, one should not engage in sexual misconduct.
- Furthermore, sensual pleasures are not restricted to sex. Excessive attachment to ALL sensory pleasures comes under kāmasukhallikānuyoga in \#8 above. Also, see "What is "Kāma"? It is not Just Sex" and "Craving for Pornography - How to Reduce the Tendency."

### 4.6.2 Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi

September 2, 2017; revised September 14, 2019; May 5, 2022; July 4, 2022; September 10, 2022

1. These days, it is customary to state that the Noble Eightfold Path consists of three steps: sīla (moral conduct), samādhi (Concentration), and pañ̃̄̄̄ (wisdom). However, that sequence holds only for the mundane Eightfold Path. It does not lead to Nibbāna but only sets up the conditions to get into the Noble Eightfold Path.

- In this initial stage, one cultivates sīla by living a moral life by making a determined effort not to violate the five precepts; see " 2 . The Basics in Meditation."
- Samādhi is much more than concentration; see, "What is samādhi? - Three Kinds of Mindfulness." When one lives a moral life, one's mindset will gradually change to a calm state ("sama" + "adhi"), as explained in that post.
- With this calm mindset, one will be able to get rid of the ten types of micchā ditthi ("Micchā Ditthi, Gandhabba, and Sotāpanna Stage." Then one reaches mundane Sammā Ditṭhi or the first level of wisdom.

2. One must follow the mundane Path before understanding anicca, dukkha, and anatta, and get into the Noble Path; see "Buddha Dhamma - In a Chart" and "What is Unique in Buddha Dhamma?." Thus, there are three necessary steps to Nibbāna:

- Follow the mundane Eightfold Path by living a moral life (sīla) to remove the ten types of micchā diṭthi. Those include not believing in kamma vipāka, rebirth, etc. Then one can get to mundane samādhi and gain the first level of wisdom (paññ̄a): sīla, samādhi, paññā.
- Then start removing a DEEPER layer of micchā ditt hi (that this world can offer lasting happiness) by learning the CORRECT versions of anicca, dukkha, and anatta (Tilakkhana).
- Once one grasps the basics of Tilakkhaṇa, one becomes a Sotāpanna Anugāmi. One then starts living with an unbreakable sīla to attain Sammā samādhi and the four stages of Nibbāna by following pañ̃̃̄̄, silla, samādhi.

3. The first level of wisdom, achieved in the mundane path, is called kammassakata Samma ditṭhi: understanding that one's actions, speech, and thoughts ( $k \bar{a} y a$, vacī, and mano sañkhāra) - one's kamma - WILL have consequences in the future, both in this life and in future lives.

- With kammassakata sammā ditthi, one understands and accepts the fact that what we experience (kamma vipāka, good and bad) is due to our past kamma.
- One understands that to encounter good kamma vipāka in the future (including future lives), one needs to cultivate GOOD kamma (i.e., good mano, vacī, and kāya sañkhāra).
- Even more importantly, one starts avoiding strong BAD kamma. Thus one starts getting rid of the coarse levels of lobha, dosa, and moha, which is the same as preventing dasa akusala.
- When one follows this "sīla step," one will start experiencing the early stages of Nibbāna of "cooling down"; see "Nirāmisa Sukha" and "How to Taste Nibbāna."

4. Some people think that if one kills animals without knowing that will have consequences, that will lead to kamma vipāka. That is not correct. "Intention to kill" must be there to bring kamma vipāka.

- There is no superhuman being that keeps track of what one is doing. But when one intentionally kills an animal, one's mind knows that, and one's viññāna will adjust accordingly. See "Viññāna What It Really Means."
- The more one kills animals that viñnāna capable of killing will only grow. That will lead to a corresponding bhava in the niraya realm (hell), where similar suffering exists.
- Therefore, being ignorant of nature's laws is not an excuse. Not knowing it was unlawful will not be an excuse when one gets caught doing an illegal act.
- There is another type of action where one kills animals unintentionally. For example, we kill many insects every time we take a walk. That does not lead to any kamma vipāka.
- So, only those sañkhāra (or more correctly abhisañkhāra) done with intention lead to viññāṇa (via "sañkhāra paccayā viññāna"), and subsequently lead to births in different realms via "viññāṇa paccayā nāmarūpa," etc. to ..."bhava paccayā jāti."

5. Most people also think that kamma vipāka arises only due to bodily actions (via kāya sañkhāra.) But physical movements, speech, and thoughts all contribute to kamma. It is the cetana (intention) involved in
thoughts, speech, and actions (i.e., mano , vacī, and kāya sañkhāra) that is kamma. That is explained in the subsection, "Living Dhamma - Fundamentals."

- When one starts comprehending the laws of kamma (that causes lead to similar effects IF suitable conditions are present), one will gradually get to mundane sammā samādhi. Then one's ability to grasp more profound Dhamma concepts (paññ̄a) will grow; see "Mundane Sammā Samādhi."
- One can stop future suffering only by eliminating the corresponding abhisañkhāra, i.e., "sañkhāra nirodho bhava (and jāti) nirodho."
- But sañkhāra can only be stopped by the corresponding abhisañkhāra, i.e., "sañkhāra nirodho bhava (and jāti) nirodho."
- But sañkhāra can be only stopped by removing avijjā since sañkhāra are unavoidable as long as avijjā is there. "Avijjā paccayā sañkhārā." That is why Sammā Diṭthi (understanding Tilakkhana) is so important.
- One will have a good idea of how births in different realms are associated with different types of suffering. Furthermore, one would see how one's actions (sañkhāra) lead to such births. I have summarized them in the table below.

| Realm(s) | Level of Suffering | Causes | Generation/Stopping of Sañkhāra |
| :---: | :---: | :---: | :---: |
| Niraya (Hell) | Incessant suffering | Dosa: Killing (especially humans), torture, rapes, etc |  |
| Peta (Hungry Ghosts) | Starvation | Lobha or Excess greed (may I get all, not others) |  |
| Vinipatha Asura ['demons', titans, evil ghosts] | Spend time aimlessly; mostly heavy bodies not movable | Moha: Tina middha, vicikicchā (lazy, lacking wisdom). |  |
| Animal (Tirisan: "tiri" + <br> "san" or with all 3 causes) | Combinations of above three types | Combinations of lobha, dosa, moha |  |
| Human (Manussa: <br> "mana" + "ussa" or with advanced mind) | In between lower and higher realms | In between lower and higher realms | Almost all sañkhāra responsible births in all realms occur here. |
| Deva (similar to human bodies, but much less dense) | Mostly no physical suffering and abundant sense pleasures (kāma). But there is mental stress. | Good kamma vipāka (done with alobha, adosa, amoha). Mental stress arises due to kāma rāga. |  |
| R̄̄̄̄̄̄vacara Brahma (only manomaya kāya; cannot be even seen with a microscope) | Mental stress is much reduced. Mainly jhānic pleasures. Vipariñāma $d u k h a$ when close death. | Suppression of kāma rāga and cultivation of rūpāvacara jhāna (while in the human realm) |  |
| Arūpāvacara Brahma (only hadaya vatthu and mind) | Only arūpāvacara jhānic pleasures. <br> Viparināma dukha when close death. | Cultivation of arūpāvacara jhāna (while in the human realm) |  |
| Nibbāna | Permanent release from all suffering. | Elimination of all causes for existence, i.e., | Mostly attained in the human realm, but |

| Realm(s) | Level of Suffering | Causes | Generation/Stopping of <br> Sañkhāra |
| :--- | :--- | :--- | :--- |
|  |  | rāgakkhaya, <br> dosakkhaya, <br> mohakkhaya. | possible in higher <br> realms, especially after <br> the Sotāpanna stage. |

6. Now, it is clear how future suffering arises via one's actions, speech, and thoughts (sañkhāra). It is also clear that suffering decreases, and "nirāmisa sukha" grows at successively higher realms.

- When one lives a sinful life and engages in dasa akusala like killing, raping, etc., one is likely to be reborn in the lowest four realms ( $a p \bar{a} y \bar{a}$ ) and face much suffering. Such actions involve $k \bar{a} y a, v a c \bar{c}$, and mano sañkhāra with lobha, dosa, moha.
- One is likely to be born in rūpa or arūpa Brahma loka when one cultivates jhānā by even abandoning $k a \overline{m a}$ rāga (at least temporarily).
- When one has reduced lobha, dosa, moha to rāga, paṭigha, avijjā (see, "Lobha, Dosa, Moha versus Rāga, Patigha, Avijiā̃") by following the mundane eightfold path, one is likely to be reborn in the human or deva realms. In these realms ,suffering is much less, and most remaining suffering is mental, especially in the deva realms.

7. However, there is much suffering that we tend to ignore. Sañkhāra dukha and vipariṇāma dukha belong to that category; see "Introduction - What is Suffering?" and the follow-up post.

- That suffering arises due to kāma rāga, i.e., craving (upādāna) for sense pleasures. Thus even if one is not engaged in dasa akusala, one would not be released from kāma loka as long as one has kāma rāga.
- At the next higher level in the rūpa and arūpa realms, kāma rāga is absent, and thus one enjoys jhānic pleasures.
- Unlike sense pleasures, jhānic pleasures can be sustained for longer times and are much-refined. However, that is still not permanent as the Nibbānic bliss arrived by eliminating all suffering.

8. As humans, we can overcome suffering in the kāma loka during this life itself, by cultivating jhānā. That means being able to "temporarily live" in rūpāvacara or arupāvacara realms.

- One gets to $r \bar{u} p \bar{a} v a c a r a$ and arūpāvacara jhāna via either REMOVAL or SUPPRESSION of $k \bar{a} m a$ rāga and paṭigha. Of course, that is not possible if one engages in dasa akusala.
- There are Buddhist and non-Buddhist meditation techniques to achieve this. See, "Elephant in the Room 2 - Jhāna and Kasina."
- If one develops $j h \bar{a} n \bar{a}$, one will be born in $r \bar{u} p a$ or arūpa realms in the next birth. However, as we can see from the above table, any future births in those rūpa and arūpa realms are temporary. One could later be reborn in the apayy $\bar{a}$.
- The only permanent solution to end all future suffering is to attain Nibbāna, as shown in the above table.

9. When one gets into mundane sammā samādhi by cultivating sīla, one can see the truth of the overall picture shown in the table above. At this stage - with this broader world picture - one can take the second important step towards Nibbāna by comprehending the Tilakkhana. However, one needs to know the correct versions of Tilakkhaṇa; see "Anicca, Dukkha, Anatta."

- That is the pañña (wisdom) associated with the first path factor (Sammā Dittthi) in the Noble Eightfold Path.
- One will then be able to comprehend the First Noble Truth about the suffering in this world, the Dukkha Sacca.

10. The Buddha's key message is that one cannot find permanent happiness anywhere among the 31 realms in this world. Any such temporary happiness would be minuscule compared to suffering in the ap $\bar{a} y \bar{a}$ and kāma loka. That is very hard to comprehend (no matter how well-educated one may be).

- This fundamental fact of nature is called anicca nature. It means that NOTHING in this world can bring a permanent state of happiness (and WILL only bring suffering). The only permanent state of happiness is Nibbāna.
- When one has the opposite perception of nicca and focuses on seeking long-term happiness in this world, one WILL face suffering ( $d u k h a$ ) in the long run.
- Thus, eventually, one will become helpless in this rebirth process, which is the anatta nature.
- Those are the Three Characteristics of nature. See, "Anicca, Dukkha, Anatta." Therefore, the crucial second step toward Nibbāna (permanent happiness) is to learn these critical characteristics of Nature from a true disciple of the Buddha.

11. When one starts comprehending the Tilakkhaṇa to some extent, one becomes a Sotāpanna Anugāmi and enters the Noble Path; see, "Sotāpanna Anugāmi and a Sotāpanna."

- In this third and last step towards Nibbāna, one starts with a NEW mindset about this world's real nature. One can see that unimaginable suffering in the future if one does immoral things to get sensual pleasure.
- Thus one starts to understand the First Noble Truth or the Dukkha Sacca: There is unimaginable suffering in this world of 31 realms. At this initial stage, it is hard to see the dangers/suffering in the human and deva realms. But if one has comprehended the fact that apāy $\bar{a}$ (four lower realms) must exist for the laws of kamma to work, then one can see the unimaginable suffering in the ap $\bar{a} y \bar{a}$.
- The Buddha said one would simultaneously understand the other three Noble Truths when one understands the First Noble Truth. One will see that lobha, dosa, and moha are the origins of that suffering (Samudaya Sacca). That one needs to remove those causes (Nirodha Sacca). And, the way to accomplish that is to follow the Noble Eightfold Path (Magga Sacca).

12. This understanding becomes permanent forever (through future lives) when one attains the Sotāpanna stage. From that point onward, one will NOT be CAPABLE of doing a kamma that could make one eligible for rebirth in the apa $\bar{a} \bar{a}$. Thus, one will be free from the worst suffering in the future.

- The post, "Akusala Citta - How a Sotāpanna Avoids Apāyagāmī Citta," explains how Nature enforces laws of kamma.
- One's mind will automatically reject any apāyagāmī action, even on an sudden impulse.

13. Understanding Paṭicca Samuppāda is critical. It explains how future bhava (existences) arise due to how one thinks, speaks, and acts (with vacī and kāya sañkhāra). See "Sañkhāra - What It Really Means" and "Correct Meaning of Vacī Sañkhāra."

- If one can hurt and kill others, one is making conditions to face similar situations in the niraya.
- If one has excessive greed and is willing to hurt others for pleasure, one could be born a peta (hungry ghost).
- Those who are lazy and depend on others cultivate asura sañkhāra. That leads to asura viñ̃āạna and thus gives rise to an asura existence.
- If one can think, speak, and act like an animal, one is cultivating animal sañkhāra. Thus one could be born into an animal existence.

14. At this stage, one starts living by the ariyakanta silla. This sila is different from the sīla in the first step. [ariyakanta :[adj.] agreeable to the Ariyas. kanta : [adj.] pleasant; lovely; agreeable. (m.), the beloved one; husband. (pp. of kamati), gone; entered into.]

- In the first type of sīla, one forcefully avoided doing pāpa kamma or immoral acts. But there could have been occasions where one "could not help breaking the silla" because the temptations were too strong.
- However, this new ariyakanta sīla is unbreakable, no matter how intense the temptation is. One's mind has grasped that it is NOT WORTH to commit apāyagāmī actions. That is regardless of how much wealth or pleasures they could bring. [ap $\bar{a} y a g \bar{a} m \overline{\boldsymbol{\imath}}$ : [adj.] going or conveying to the state of misery.]
- For example, it is not worthwhile to make a lot of money by killing animals or fish, selling drugs that can harm others, lying, bribing, etc.
- At this stage, one could still have cravings for sensual pleasures. Thus one could live everyday married life, i.e., "moral living."

15. It is unnecessary to attain any jhāna to get to the Sotāpanna stage. These days there is too much emphasis on jhāna.

- One must realize that rūpāvacara and arūpāvacara jhāna are sensory experiences in the rūpa and arūpa realms. Therefore, such experiences belong to "this world" of 31 realms.
- The Buddha stated that any of his lay disciples with the Sotāpanna stage is million times well-off than a $y o g i$ who had attained all $j h \bar{a} n \bar{a}$ and all abhiññ $\bar{a}$ powers.
- While those $j h \bar{a} n \bar{a}$ and $a b h i n ̃ n ̃ \bar{a}$ powers last only during this life, a Sotāpanna is freed from the apāyā FOREVER.
- However, understanding $j h \bar{a} n \bar{a}$ is important since it confirms the Buddha's broader worldview in the above table. There are many in the world today who can experience $j h \bar{a} n \bar{a}$.
- But some people mistakenly believe that $j h \bar{a} n \bar{a}$ are necessary to attain magga phala. But as the above table shows, $j h \bar{a} n \bar{a}$ are still part of "this world" and can be achieved even by following "non-Buddhist meditations." More details in "Elephants in the Room."

### 4.6.3 Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammam..

August 16, 2018; Revised January 20, 2020
This post will analyze two famous key verses to show the interconnections among the Four Noble Truths, Tilakkhaṇa, Paticca Samuppäda, and the Noble Eightfold Path. These are the main concepts that must be comprehended to benefit from Buddha's Dhamma.

Ye Dhammā Hetuppabhavā..

## Background

"Ye dhammā hetuppabhavā,
Tesaì hetum tathāgato āha;
Tesañca yo nirodho,
Evainvādī mahāsamano"

- From just hearing this verse uttered by Ven. Assaji, Upatissa (later Ven. Sariputta) became a Sotāpanna. That is the fundamental concept of Buddha Dhamma and explained in detail in the Patticca Samuppāda.
- The correct translation is the following. "Whatever dhamm $\bar{a}$ (which are kamma bīja) that give rise to the rebirth process, causes for those to arise have been declared by the Buddha; he has also explained how those causes can be stopped from arising (and thus end the rebirth process)."
- First, let us briefly discuss how we arrive at this translation.

## What Does "Hetuppabhavä" Mean?

1. "Ye dhamm $\bar{a}$ " means "those dhamma $\bar{a}$." The compound word in the verse is hetuppabhava $\bar{a}$ : It is the combination of "hetu," "pa," and "bhava," which respectively mean causes, repeated, and existence. The combination rhymes as hetuppabhav $\bar{a}$, just as dhamma cakka pavattana rhymes as "dhammacakkappavattana."

- Note that " $p a$ " (meaning repeated) and "bhava" combine to rhyme as "pabbhava" with an additional 'b."
- So, hetuppabhavā means "causes leading to repeated birth or causes to sustain the rebirth process."
- Note that both words hetuppabhavā and pabhassara have the words "pa" and "bha" embedded in them; see, "Pabhassara Citta, Radiant Mind, and Bhavangga."
- So, "ye dhammā hetuppabhavā" means "those dhammā that sustain the rebirth process or samisāra."

## Tesain and Tesañca Both Have "Say"

2. Tesam is "te" + "saŋ" or three "say" of lobha, dosa, moha. These are those hetu or causes.

- Even though there are six root causes, they all can be eliminated by eliminating just three (lobha, dosa, moha); see, "Six Root Causes - Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna)."
- Of course "say" are the defilements responsible for the rebirth process for anyone, which are dasa akusala; see, "San."
- Again, "te" and "say" combine to rhyme as "tesay."
- So, "Tesaí hetum tathāgato āha" means "The Buddha has declared what those three causes are."

3. The next part, "Tesañca yo nirodho" or "Te say ca yo nirodho" has the second complex keyword of nirodha, which comes from "nir"+"udaya," where "nir" means stop and "udaya" means "arise." $[t e+$ san $+c a=$ tesañca]

- Thus nirodha means to stop something from arising; see, "Nirodha and Vaya - Two Different Concepts."
- The easiest way to understand nirodha is to see that a plant can be stopped from arising (i.e., coming into being) by destroying the seed. Put in the real context of the word nirodha, a plant's coming into being can be stopped by stopping the creation of that seed.
- In the same way, a future existence (bhava) can be stopped by stopping the formation of the corresponding viññāna (kamma bïja), i.e., bhava nirodha is achieved by viññāna nirodha.

## How Is Viññāṇa Nirodha Realized?

4. By going backward further in PS, viññāna nirodha in turn is done by (abhi)sañkhāra nirodha; see below too. Of course, abhisañkhāra nirodha cannot be done by sheer will power. One must cultivate pañña (wisdom) and get rid of avijj $\bar{a}$. That requires comprehending of Tilakkhana or the futility of clinging to this suffering-filled world of 31 realms that will make one helpless in the end (especially when born in the four lowest realms or $a p \bar{a} y \bar{a})$.

- We can thus see that viññāna nirodha leads to the stopping of initiation of akusala-mūla Paticca Samuppāda (PS) cycles starting at the "avijjā paccayā sañkhāra" step.

5. Now it is clear what is meant by "tesañca (te say ca) yo nirodho, evainvād̄̄ mahāsamaṇo." The Buddha (mahāsamaṇo) has explained how those defilements can be stopped from arising."

- Viññāṇa nirodha is achieved via stopping abhisañkhāra or - to put in a practical statement - by abstaining from all dasa akusala. That involves the three akusala done by the body (via kāya sañkhāra), four akusala by the speech and defiled conscious thoughts (via vacī sañkhāra), and three akusala by the mind (via mano sañkhāra).
- It is essential to understand what is meant by keywords like sañkhāra and viññāna; see, "Mental Aggregates."
- It is essential to realize that conscious thoughts are also vacī sañkhāra; see, "Correct Meaning of Vacī Sañkhāra." It is not just immoral speech and deeds that matter, but immoral "daydreaming" counts too.

6. The way to achieve viññāna nirodha is, of course, the Noble Eightfold Path. When one follows the Noble Path, one's avijjā will be removed and thus no more initiations of PS cycles, i.e., no more suffering (there will not be " $j \bar{a} t i p ~ p a c c a y a ̄ ~ j a r a ̄, ~ m a r a n a, ~ s o k a, ..) . ~$

- In the WebLink: suttacentral: Petakopadesa, this verse expresses the four Noble Truths (cattāri ariyasaccāni), and we can now see why.

## Yaì Kiñci Samudaya Dhammaì..

## Introduction

7. The second related verse "yaim kiñci samudaya dhammain sabbaim taim nirodha dhammaim" is in the Dhammacakkappavattana Sutta (SN 56.11); see, "WebLink: suttacentral: Dhammacakkappavattana Sutta (SN56.11)." [kiy + ci=kiñci; kim or kiy :[rel. or inter. pron.] what? ci:cid, indecl. an indefinite interrogative particle. koci [whoever], kiñci [whatever], kadāci [whenever], kuhiñci [wherever] . cf. ca, cana, ce.]

- Translated: "If there are dhammā that give rise to suffering (i.e., any samudaya dhamm $\bar{a}$ ), all such $d h a m m \bar{a}$ can be stopped from arising (via the Noble Eightfold Path)." $[s a m u d a y a=s a n+u d a y a=$ rise of san (that leads to suffering)]
- "yaim kiñci samudaya dhammaim" means "any dhammā that eventually lead to suffering. And, "sabbaín taí nirodha dhammaí" means "all such dhammā" are nirodha dhammā, i.e., they can be stopped from arising.

## Here Viññāṇa Is "Defiled Consciousness"

8. But we need to get the idea embedded in this verse, instead of just translating word-by-word.

- From what we have learned so far, we know that samudaya dhamma (or kamma bïja) are created by viññāna, for which the best translation is "defiled consciousness."
- Viññāna, in turn, arise due to our own (abhi) sañkhāra. And the reason that we do abhisañkhāra is that we are ignorant of the anicca nature, i.e., we have avijjā.
- That is what the paṭicca samuppāda states: "avijjā paccayā sañkhāra, sañkhāra paccayā viññāna, viññāna paccayā nāmarūpa," leading to "upādāna paccayā bhava, bhava paccayā $j a \bar{a} t i$," which ends up in the whole mass of suffering: "jāti paccayā jarā, marana,..."

9. So, again we can see that samudaya dhamma arises with defiled viññạna that occur due to abhisañkhāra done with avijjā!

- If we do not cultivate such defiled viññāṇa via abhisañkhāra (i.e., if we stop doing dasa akusala), then we will not end up with births leading to all types of suffering. Those are jarā (old age), maraṇa (death), soka (unhappiness), parideva (long lasting state of unhappiness where soka keeps bubbling up), $d u k k h a$ (physical injuries, diseases, etc), domanassa (long bouts of depression), upāsāya (extreme distress where can faint or generates suicidal thoughts)."
- Those sufferings described above are mainly for the human realm. If one is born in the four lowest realms, it will be much worse, mostly physical suffering or dukkha.

## Kamma Vipāka Are Not Deterministic

> In the above, we have discussed how to stop the formation of kamma bija. But what about that kamma $b \overline{i j} a$ that we have already piled up during this life and from previous lives? Will not they bring vipāka and initiate new bhava and $j a \bar{a} i t$ filled with suffering?
10. The key is to understand that one gets a "second chance." Kamma vipāka are not deterministic, i.e., kamma bīja cannot automatically bring vipāka.

- In a upapatti [rebirth] PS cycle, we saw that kamma bïja form with the first two steps in the PS cycle: "avijjā paccayā sañkhāra" and "sañkhāra paccayā viñ̃n̄ạna." This viññāṇa is called a kamma viññāna.
- But when kamma bīja try to bring back corresponding vipāka at a FUTURE time, they are brought back as vipāka viññanna. That means the mind is exposed to a "sign" called a "nimitta" that corresponds to the same kamma done to make that kamma bïja.

11. So, it is essential to realize that in a upapatti PS cycle, the "viññāna paccayā nāmarūpa" step starts much later, may be even in future life.

## An Example

12. We can explain that with an example. Suppose person $X$ kills another human being in this life. That involves a lot of mano, vacī, and kāya abhisañkhāra and all those contribute to a defiled mindset (viñ̃n̄ạa) that led to a kamma bīja which got the most contribution at the moment of killing via a kāya abhisañkhāra.

- Now, that kamma bīja will be there waiting to bring its $v i p a \bar{k} a$ at a later time.
- Suppose X dies a few years later, but he has more kammic energy for this human bhava left. In that case, that kamma bīja cannot bring vipāka. He will leave a dead body as a gandhabba and wait for a suitable womb.
- However, if X had killed one of his parents, for example, that would be a ānantariya kamma, that kamma bīja will bring its vipāka at the end of this life.

13. In either case, the "viññāna paccayā nāmarūpa" step will start the rest of the PS cycle leading to a new bhava (let us say in the niraya) with the following way.

- So, X is now on the deathbed, whether in this life or a future life as a human. Just before the dying moment, that kamma bïja will bring a sign (called nimitta) of that kamma to X's mind. It could be a scene from that killing event or a scene from the niraya that he is about to be born.
- Since he had done this act with intention, that mindset will come back, and he will have that defiled mindset (viññanna) responsible for the killing. Then he will have that nimitta come in, and this is the "nāmarūpa" that comes to his mind at that time: "viññāṇa paccayā nāmarūpa."

14. All his six sense faculties will transform according to that sign or nimitta: "nāmarūpa paccay $\bar{a}$ salāyatana." Of course, the nimitta will come through only one, let us say like a picture from that killing event or a sound.

- His mind will now make contact (saḷāyatana paccayā phassa) just as in any sense event, and that leads to "phassa paccay $\bar{a}$ vedana $\overline{\text { a " }}$ i.e., now he is about to re-enact the crime in his mind, starting at the "vedanā paccayā tanhā" step.

## The Difference for a Sotāpanna

15. But a critical point in these steps occur at the "vedanā paccayā taṇhā," "taṇhā paccayā upādāna" steps. When one gets that nimitta of birth in the niraya appears at the moment of death, one WILL NOT grasp it if one has attained the Sotāpanna stage.

- A Sotāpanna's mind has grasped the truth of the "anicca nature" and has a higher level of paññ̄a (wisdom), so it WILL NOT grasp that nimitta. That is why Angulimāla was able to attain Arahanthood, even after killing almost 1000 people. That past kamma bïja did not get to germinate.

16. Therefore, that nimitta will be ineffective if X had become a Sotāpanna in the intervening time, and a different (good or bad) next in line will appear. The process will continue until a suitable new bhava grasped at the "upādāna paccayà bhava" step.

- That is how a Sotāpanna avoids "apāyagāmi kamma bīja" from bringing their vipāka.
- Of course, if X had not attained the Sotāpanna stage, he would be born in niraya.

## Further Reading

17. Please do not hesitate to ask questions at the forum if this is not clear. Kamma viññaña are discussed in detail at: "Kamma Viññāna - Link Between Mind and Matter."

- The process of how past kamma try to bring vipāka with vipāka viññanna discussed in detail at, "Avyākata Paticca Samuppāda for Vipāka Viññāna."
- Of course, one needs to understand what is meant by all these terms (vedanā, taṇhā, upādāna, etc.) to understand these processes; see, "Mental Aggregates."
- If one can truly comprehend this post, one could get to the Sotāpanna stage, because this is seeing the "way to Nibbāna," i.e., stopping the future suffering permanently. That is about getting to lokuttara Sammā Ditthi. [lokuttara : [adj.] super-mundane; transcendental.]

### 4.7.1 Samādhi, Jhāna, Magga Phala - Introduction

October 12, 2017; revised April 28, 2018; September 13, 2018; February 11. 2020; June 26, 2022

## Introduction

1. Apparently, there are a considerable number of people who have attained magga phala (with or without $j h a \overline{n a}$ ) recently all over the world. We are indebted to the late Waharaka Thero for this great awakening with his correct interpretations of Buddha's teachings. Now many are working tirelessly to make those interpretations available to others; see, "Parinibbāna of Waharaka Thero."

- Over the years, I have seen some key issues related to jhāna and magga phala discussed at many online forums, without reaching a definitive conclusion. I hope this series of posts will be of use to bring more clarity.
- I will try to put together a consistent picture solely based on material from the Tipiṭaka. One common problem that I see in online forums is that many people put Tipitaka on the same footing as commentaries (such as Visuddhimagga) written much later by people (non-Ariyā) like Buddhaghosa or Nagarjuna. That leads to confusion because those accounts have many contradictions with the Tipitaka.
- These posts are supposed to be read in the given sequence. Please read carefully at a quiet time.

## What Is Samādhi?

2. Samādhi ("sama"+"adhi" where "sama" means "equilibrium" and "adhi" means "dominance") means keeping the mind focused on a single arrammaṇa or a nimitta.

- The opposite of the Pāli word "sama" is "visama." When either the body or the mind gets "away from equilibrium," that is "visama" and we become uncomfortable.
- A good analogy is the following. We become restless if our environment becomes too hot. Then we try to find a way to cool ourselves. We get very uncomfortable if we are in a "too cold" environment also. Then we try to be warm by turning on a heater or wrapping ourselves with blankets.
- However, if the room temperature is moderate and away from both those extremes, then we feel comfortable. We feel contended.
- A similar effect takes place when the mind stops going to the extremes. A greedy or angry mind is in a "visama" state and is away from samādhi.
- However, if the focus is a dhamma concept, then the mind moves toward "equilibrium."
- Samādhi is essential to attain Magga phala. Jhāna is a special category of samādhi and are not essential to attain magga phala.

## Sammā Samādhi Are Two Types

3. Samādhi can be of many types. What is essential to attain magga phala is Sammā Samādhi. As we have discussed before, there is mundane samm $\bar{a}$ samādhi that is reached by getting rid of the 10 types of micch $\bar{a}$ ditṭhi. Then there is lokuttara Sammā Samādhi that is reached by comprehending Tilakkhaṇa to some extent; see, "Buddha Dhamma - In a Chart."

- As discussed in the previous post, "Sila, Samādhi, Paññā to Paññā, Sīla, Samādhi," one gets to mundane Sammā Samādhi via "Silla, Samādhi, Paññā." Then one can comprehend the Tilakkhaṇa and follow the Noble Path via "Paññā, Sīla, Samādhi," with Sammā Diṭthi taking the lead.
- There is nowhere in the Tipiṭaka that says one needs jhāna to attain magga phala or Nibbāna.
- Magga phala means one is starting to break the bonds (dasa samyojana) to this world; see, "Dasa Samyojana - Bonds in Rebirth Process." One attains magga phala by getting into lokuttara Sammā Samādhi (samādhi to remove "san": "san" + "mā"; see, "What is "San"? Meaning of Sansāra (or Samisāra)."

## Jhāna Are Not Necessary to Attain Magga Phala

4. April 28, 2018: I found a desanā by Waharaka Thero where he presents clear evidence that jhāna are not necessary to attain magga phala (It is of course in the Sinhala language):

## WebLink: Download "Are Jhāna Required for Magga-Phala"

- The main point the Thero makes is that we know that there are jāti Sotāpannas born in the human realm. But if a jhāna was REQUIRED to attain the Sotāpanna stage, then that person WOULD NOT be born in the human realm, but in a brahma realm corresponding that $j h a \overline{n a}$.
- However, the Tipitaka asserts that King Bimbisara (a Sotāpanna) was reborn in a lower Deva realm. Another is that Sakka, the king of the Tāvatimsā Devas, became a Sotāpanna while listening to a discourse by the Buddha and was reborn as Sakka (i.e., he died and was reborn a moment later; he did not even realize that until the Buddha told him.)

## Attaining Jhāna Has Nothing to Do With Nibbāna

5. In simple terms, jhāna are mental states existing in the 16 rūpa realms and the four arūpa realms. Thus by definition, attaining jhāna has nothing to do with Nibbāna. This can be easily seen in "The 89 (121) Types of Citta."

Jhāna falls into two categories (Ariya and anāriya) and - depending on the category - could be an asset or hindrance, as we will discuss in this section.

- As discussed in " 31 Realms Associated with the Earth" those 20 realms lie above the realms of $k \bar{a} m a$ loka. Those $r \bar{u} p i$ and arūpi Brahmā enjoy only jhānic pleasures, which are better than sensual pleasures.
- We all have been born in most of the 31 realms (except for the realms reserved for the Anāgāmis) uncountable times, and thus had attained those jhänic states uncountable times in previous lives.
- As we know, sensual pleasures are present only in kāma loka (human realm, six deva realms, and the animal realm). The jhānic experience is discussed in, "Jhānic Experience in Detail - Sāmaññaphala Sutta (DN 2)."
- Humans can cultivate jhāna by suppressing (anāriya) or removing (Ariya) the craving for sensual pleasures (kāma rāga).
- One could approach Nibbāna via Ariya or anāriya jhāna; see, "Ascendance to Nibbāna via Jhāna (Dhyāna)."

## Difference Between Ariya and Anāriya Jhāna

6. If those Brahmā are born there via cultivating mundane jhāna, then kāma rāga remain with them as anusaya (which means deeply hidden). So, when they die and are reborn in the lower realms, kāma rāga re-surface. The suppression is only during the time they live as Brahma $\bar{a}$ in those higher realms.

- In the same way, those humans who get into jhānā SUPPRESSING kāma rāga can lose the ability to get into $j h \bar{a} n \bar{a}$ even in this life. The best example from the Tipitaka is Devadatta, who developed not only anāriya (mundane) jhānā but also abhiñ̃̃̄ $\bar{a}$ powers, and then lost all that and ended up in an apāya. Even though Devadatta was obviously exposed to correct Tilakkhaṇa (he was ordained by the Buddha himself), he apparently did not comprehend.
- The ability to get into $j h a \bar{n} a$ is also related to our gati (pronounced "gathi"; our habits from past lives). Those who have cultivated mundane $j h \bar{a} n \bar{a}$ in relatively recent past lives can easily get into mundane jhāna.
- However, if one gets into even the first Ariya (supramundane) jhāna, one has essentially attained the $A n \bar{a} g \bar{a} m \bar{\imath}$ stage by removing kāma rāga; see, "Mundane versus Supramundane Jhāna."

## Magga Phala Require Sammā Samādhi

7. Magga phala (including the Arahant stage) can be reached via going through any of the jhānic states or without going through any jhānic state; see, "The 89 (121) Types of Citta."

- This is also discussed in "WebLink: suttacentral: Paññāvimutta Sutta (AN 9.44)" and "WebLink: suttacentral: Susimaparibbājaka Sutta (SN 12.70)."
- Furthermore, a Sotāpanna may attain anāriya jhāna and be born in brahma realms lying below the Suddhāvāsa realms reserved for the Anāgāmis. But they also do not come back to kāma loka; see, "Pathama Metta Sutta." Of course, those who attain anāriya jhāna without magga phala, will come back to kāma loka and could be born in the apāy $\bar{a}$ subsequently.

8. More detailed information with references to suttā at, "Ascendance to Nibbāna via Jhāna (dhyāna)," "Mundane versus Supramundane Jhāna," "Nirodha Samāpatti, Phala Samāpatti, Jhāna, and Jhāna Samāpatti."

- There are a series of posts on jhāna (in simpler terms, without too many Pāli words) in an older section: "Power of the Human Mind." A new series with more details at "Elephant in the Room 2 - Jhāna and Kasina."
4.7.2 Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra

March 7, 2019; revised December 3, 2019; July 27, 2022; August 29, 2022 (sutta refs. updated)

## Introduction

1. It is important to understand the meanings of vitakka/vicāra, savitakka/savicāra, and avitakka/avicāra. I see many discussions on discussion forums without reaching a satisfactory conclusion, and most sutta translations are incorrect. In particular, savitakka and savicāra are incorrectly translated as "with vitakka and vicāra."

- As always, one MUST start with the basics. Trying to extract the meanings of such keywords from deep suttā is counter-productive.
- We need to start with the basic definitions. Then the meanings of verses in deeper suttā CAN BE figured out using those basic definitions. I have seen that this method ALWAYS works within the Tipitaka.
- Please comment on the discussion forum if someone can point out a sutta in the Tipitaka that is inconsistent with this post.
- Possible inconsistencies MAY arise if one tries to make them compatible with late commentaries like the Visuddhimagga.

## What Are Vitakka and Vicāra?

 be "think one way," further/counter analysis, investigate in depth. They are the same as vacī sañkhāra.

- All those words describe conscious thinking about a thought object (ārammaña). One either silently 'talks to oneself' or speaks out while analyzing the situation. [takka:[m.] thought; reasoning; logic. (nt.), butter-milk. vitakka :[m.] reflection; thought. vicāra: :m.] investigation; management; planning; discursive thinking.]

A clear explanation is given in Abhidhamma, in the discussion on kāma dhātu, byāpāda dhātu, vihims $\bar{a}$ dhātu, nekkhamma dhātu, abyāpāda dhātu, avihimsā dhātu, in the following section: "WebLink: suttacentral: Dhātuvibhañg.." [avihimsa : (Avihesa) (f.) $[a+$ vihimsā] absence of cruelty, mercy, humanity, friendliness, love.]

- For example, "Tattha katamā kāmadhātu? Kāmapatisaminyutto takko vitakko sà̇kappo appanā byappanā cetaso abhiniropanā micchāsañkappo-ayaì vuccati kāmadhātu."

Translated: "What is the element of kāma (indulgence)? takka, vitakka, sañkappa, appanā, byappan $\bar{a}$ (remaining there, which is related to vicāra), which lead to establishing wrong views. That is the element of desire/indulgence." In other words, when one constantly generates such thoughts, kāma rāga builds up.
3. The opposite, element of nekkhamma is defined as: "Tattha katama nekkhammadhātu? Nekkhammapatisamiyutto takko vitakko, sañkappa, ... pe ... sammā sañkappo-ayaì vuccati "nekkhamma dhātu."

- Translated: "what is the element of renunciation? takka, vitakka, sañkappa, appanā, byappan $\bar{a}$ (remaining there, which is related to vicāra), which lead to establishing correct views (leading to the removal of defilements). This is called the element of renunciation." In other words, when one constantly generates such thoughts, kāma rāga is diminished.
- Similarly for byāpāda dhātu, vihimisā dhātu, and the opposites abyāpāda dhātu, avihimisā dhātu. [vihims $\bar{a}:[\mathrm{f}$.$] (\& adj. { }^{\circ}$ a) [abstr. fr. vi+hims, to injure] hurting, injuring, cruelty, injury. hims $\bar{a}:[\mathrm{f}$. [Vedic himsā] injury, killing.]

## Vacī Sañkhāra Are Sañkappa (Conscious Thoughts)

It is important to see the connection between vacī sañkhāra and sañkappa (as in Sammā Sañkappa.)
4. We can now see that kāma (abhijjhā) sañkappa, byāpāda (or vyāpāda) sañkappa, vihimisā sañkappa are all "bad" vacī sañkhāra. They associate with greed, hate, and ignorance.

- Their opposites are associated with Sammā Sañkappa: nekkhamma, abyāpāda, and avihimsā sañkappa. [nekkhamma: [nt.] giving up the world; renunciation.]
- Note that Sammā Sañkappa comes next to Sammā Diṭthi in the Noble Eightfold Path. Therefore, we can see the importance of vacī sañkhāra.

5. Now we can also see the connection to vacī sañkhāra as defined clearly in the "WebLink: suttacentral: Cūlavedalla Sutta (MN 44)": .." vitakka vicārā vacī sañkhāro" OR "vacī sañkhāra are vitakka vicārā."

- Vacī sañkhāra are "conscious thoughts that we silently generate" and also those thoughts that lead to the speech by moving the lips, tongue, etc. Hate speech is due to apuññābhi vacī sañkhāra. Thinking about a Dhamma concept is a puñ̃n̄abhi vacī sañkhāra; see "Correct Meaning of Vacī Sañkhāra."

## Vacī Sañkhāra (Vitakka Vicārā̆) Are Sañkappa

6. Another important sutta where this is discussed is "WebLink: suttacentral: Mahācattārīsaka Sutta (MN 117)":
"Katamo ca, bhikkhave, sammāsañkappo ariyo anāsavo lokuttaro maggañgo? Yo kho, bhikkhave, ariyacittassa anāsavacittassa ariyamaggasamañgino ariyamaggaì bhāvayato takko vitakko sañkappo appanā byappanā cetaso abhiniropanā vacīsañkhāro-ayaṁ, bhikkhave, sammāsañkappo ariyo anāsavo lokuttaro maggañgo.."

- Translated: "And what, bhikkhus, is Sammā Sañkappa that is Noble, without āsava, supramundane, a factor of the Noble Path? Those are Noble thoughts (ariyacittassa) that are devoid of cravings (anāsavacittassa), belong to the Noble Path (ariyamaggasamañgino ariyamaggaì bhāvayato) with takko vitakko sañkappo appana byappanā cetaso abhiniropanā vacī sañkhāro: that is Sammā Sañkappa that is Noble, a factor of the Noble Path."

## Vitakka is Usually Reserved for "Bad Saṅkappa"

7. "WebLink: suttacentral: Akusala Vitakka Sutta (SN 9.11)" provides one example: "Tena kho pana samayena so bhikkhu divāvihāragato pāpake akusale vitakke vitakketi, seyyathidaí-kāma vitakkaì, byāpāda vitakkaì, vihimsā vitakkaì."

- Meaning: "That bhikkhu engaged in generating highly immoral (pāpa) and akusala vitakka during his resting time - they were sensual, ill-will, and cruel thoughts. (pāpake akusale vitakke vitakkeyyātha, seyyathidain- kāma vitakkain, byāpāda vitakkain, vihimisā vitakkain).
- Another verse in the same sutta: "Ayoniso manasikārā, so vitakkehi khajjasi.." or "with the wrong mindset (ayoniso manasikāra), he is burdened with such defiled thoughts."

8. Succinct explanations can also be found in the "WebLink: suttacentral: Vitakka Sutta (SN 56.7)."

Following is the basic idea of the whole sutta:

- "Bhikkhus, do not engage in evil unwholesome thoughts, which are: sensual thoughts, thoughts of ill will, thoughts of harming others (pāpake akusale vitakke vitakkeyyātha, seyyathidain-kāma vitakkain, byāpāda vitakkain, vihimsā vitakkain).
- For what reason? These thoughts, bhikkhus, are without real substance (Nete, bhikkhave, vitakk $\bar{a}$ atthasaimhit $\bar{a}$ ), irrelevant to the fundamentals of the holy life, and do not lead to escape from the sense world, to dispassion, to cessation, to peace, to direct knowledge, to enlightenment, to Nibbāna. When your mind starts such thoughts, bhikkhus, you should think: 'This will lead to suffering.'
- Instead, you should think: ‘These are the causes of suffering'; you should think: ‘The way to the cessation of suffering by cultivating thoughts of renunciation and compassion." Such thoughts will lead to escape from the sense world, to dispassion, to cessation, to peace, to direct knowledge, to enlightenment, to Nibbāna."

## Vitakka/Vicāra and Savitakka and Savicāra

9. In many instances, the words vitakka and vicāra indicate "bad thoughts" or defiled thoughts.

- However, in some cases, they indicate "all kinds of thoughts, good or bad."
- Therefore, one must identify which meaning to use in the words' context. The above examples illustrate that point.

10. When one generates thoughts that specifically do not involve kāma rāga or other akusala - but the opposites (nekkhamma/kusala) - those are called savitakka and savicāra.

- That is how one gets into jhāna: Eliminating (or suppressing) vitakka/vicāra and cultivating savitakka/savicāra.

11. You can see that in any sutta that describes jhāna. For example, in "WebLink: suttacentral: Tapussa Sutta (AN 9.41)": "..So kho ahaì, ānanda, vivicceva kāmehi vivicca akusalehi dhammehi savitakkain savicāramं vivekajam̀ pūtisukhamं paṭhamaì jhānà் upasampajja viharāmi."

- Translated: "Ānanda, when one stays away from vitakka/vicāra with kāma rāga and akusala and cultivates savitakka/savicāra, one will get into the first jhāna."
- However, occasionally, vitakka/vicāra with kāma rāga and/or akusala may come to mind.
- Also see "Tapussa Sutta (AN 9.41)- Akuppā Cētōvimutti."

## Avitakka and Avicāra

12. The absence of any "bad thoughts" is indicated by avitakka, avicāra. In this case, one would only have savitakka and savicāra (good thoughts).

- This happens in the second jhāna, where only savitakka/savicāra remains.
- Therefore, it is important to realize that avitakka/avicāra DOES NOT mean "without thoughts"; it just means the absence of bad thoughts.

13. This is very clear at the end of the "WebLink: suttacentral: Upakkilesa Sutta (MN 128)": " ..So kho ahaì, anuruddhā, savitakkampi savicāraì samādhim bhāvesim, avitakkampi vicāramattaì samādhimं bhāvesim, avitakkampi avicāraì samādhim bhāvesim, sappītikampi samādhim bhāvesimं, nippītikampi samādhim bhāvesim, sātasahagatampi samādhim bhāvesim, upekkhāsahagatampi samādhim bhāvesim..."

- Translated: "Anuruddha, I systematically cultivated the following samādhi in this order. Savitakka savicāra samādhi, avitakka vicāramattaì samādhi (absence of vitakka with a trace of vicāra left), avitakka avicāra samādhi (absence of vitakka and vicāra), sappītikampi samādhi (with pīti or joy), nippītikampi samādhi (absence of pīti or joy), sātasahagatampi samādhi (with only sukha left), and upekkhāsahagata samādhi (sukha also removed to be in the upekkhā state)."
- What the Buddha described above is getting to the first jhāna with savitakka savicāra, and then to the second jhāna with the absence of vitakka and vicāra (with pīti and sukha), the third jhāna with just sukha (joy removed), and the fourth jhāna with sukha also removed and with just upekkhā).
- For a description of Ariya jhāna with jhānañga removed at each successive stage, see "WebLink: suttacentral: Rahogata Sutta (SN 36.11)," for example. [jhānañga : 'constituents (or factors) of absorption'. anga : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

## Summary

14. Sañkhāra is different types, so it is necessary to get an idea of how to use these basic definitions of vitakka/vicāra, savitakka/savicāra, and avitakka/avicāra in terms of different types of sañkhāra: puññābhisañkhāra, apuññābhisañkhāra, āneñjābhisañkhāra; see, "Correct Meaning of Vacī Sañkhāra" and "Sañkhāra - What It Really Means."

- Further details in the post, "Vacī Sañkhāra - Sañkappa (Conscious Thoughts) and Vācā (Speech)."

15. Finally, the "WebLink: suttacentral: Savitakkasavicara Sutta (SN 43.3)" clearly states that Nibbāna is reached (asañkhatagāmi maggo) via the following sequence. Savitakka savicāra samādhi, avitakka vicāramatta samādhi, avitakka avicāra samādhi.
"Katamo ca, bhikkhave, asañkhatagāmimaggo? Savitakkasavicāro samādhi, avitakkavicāramatto samādhi, avitakkaavicāro samādhi-ayaì vuccati, bhikkhave, asañkhatagāmimaggo."

### 4.7.3 <br> Jhānic Experience in Detail - Sāmaññaphala Sutta (DN 2)

March 2, 2019; revised January 3, 2021; revised \#4 on February 14, 2022

## Introduction

1. The $j h \bar{a} n i c$ experiences in the first four $j h \bar{a} n a$ are clearly described by the Buddha in the "WebLink: suttacentral: Sāmañ̃̃aphala Sutta (DN 2)."

- There are many conceptions about what it feels like to be in different jhānic states. Therefore, it is good to have a description by the Buddha to get a good idea about the experience.
- It is a long sutta, and I will provide the English translation for the sutta's relevant sections. The Pāli version can be found in the link above.

2. Jhānic experiences in Ariya and anāriya jhānā may have some common features since these jhān $\bar{a}$ correspond to mental states of rūpāvacara brahma realms. However, the Buddha clearly stated that anāriya jhāna are "burdened" and not as peaceful as Ariya jhānā; see, "Tapussa Sutta (AN 9.41)Akuppā Cetovimutti."

- To get into jhāna, one must transcend (elevate one's mindset above) the sensual realms (kāma loka).
- This means one's mind needs to be devoid of any sensual thoughts (kāma rāga) and dasa akusala AND focused on thoughts of renunciation and compassion (savitakkalsavicāra). In any sutta describing the jhānic experience, there is this phrase: "So vivicceva kāmehi, vivicca akusalehi
 viharati..."
- Translated: "Withdrawn from sensuality, withdrawn from akusala thoughts, and engaged in thoughts of renunciation and compassion, he enters and remains in the first jhāna..."

## Experience in the First Jhäna

3. 'Withdrawn from sense pleasures, withdrawn from akusala thoughts, he enters and dwells in the first jhāna, which is accompanied by savitakka and savicāra (applied and sustained moral thoughts). His mind is filled with joy ( $p \bar{t} t$ ) and the whole body is suffused and filled with bodily happiness (sukha) born from withdrawal from sense pleasures ( $\boldsymbol{k} \overline{\boldsymbol{a} m a}$ ) and akusala thoughts. This rapture and happiness suffuse his entire body. (It should be noted that vitakka/vicāra or kāma and akusala thoughts are not completely removed in the first $j h \bar{a} n a$ ).

- "Great king, suppose a skilled bath attendant or his apprentice were to pour soap powder into a metal basin, sprinkle it with water, and knead it into a ball so that the ball of soap-powder be pervaded by moisture, encompassed by moisture, suffused with moisture inside and out, yet would not trickle. Similarly, the great king, the bhikkhu, drenches, steeps, saturates, and suffuses his entire body with the rapture and happiness born of seclusion. This, great king, is a visible fruit of a life abstaining from $k a ̄ m a$ and akusala.

## Experience in the Second Jhāna

4. "Further, great king, with the removal of vitakka/vicāra (but savitakka/savicāra remain), the bhikkhu enters and dwells in the second jhāna, which is accompanied by internal confidence and unification of mind, is without sensual ( $k \bar{a} m a$ ) or immoral (akusala) thoughts [vitakka and vicāra], and is filled with the rapture and happiness born of concentration. He drenches, steeps, saturates, and suffuses his body with this rapture and happiness born of concentration so that there is no part of his entire body that is not suffused by this rapture and happiness. See, "Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra."

- "Great king, suppose there was a deep lake whose waters welled up from below. It would have no inlet for water from the east, west, north, or south, nor would it be refilled from time to time with showers of rain; yet a current of cool water, seeping through underground channels, would maintain the water level, so that the entire lake is filled to the brim. Similarly, the great king, the bhikkhu, drenches, steeps, saturates and suffuses his body with the rapture and happiness born of concentration so that his entire body is suffused with this rapture and happiness. This too, great king, is a visible fruit of a life abstaining from kāma and akusala.

## Experience in the Third Jhāna

5. "Further, great king, with the fading away of rapture ( $\boldsymbol{p} \overline{\boldsymbol{t}} \boldsymbol{i} \boldsymbol{i}$ or joy is lost), the bhikkhu dwells in equanimity, mindful and clearly comprehending, and experiences happiness with the body. Thus he enters and dwells in the third jhāna, of which the noble ones declare: 'He dwells happily with equanimity and mindfulness.' He drenches, steeps, saturates, and suffuses his body with this happiness free from rapture so that his entire body is suffused with this happiness.

- "Great king, suppose in a lotus pond there were blue, white, or red lotuses that have been born in the water, grow in the water, and never rise above the water, but flourish immersed in the water. From their tips to their roots, they would be drenched, steeped, saturated, and suffused with cool water, so that there would be no part of those lotuses not suffused with cool water. Similarly, the great king, the bhikkhu, drenches, steeps, saturates and suffuses his body with happiness free from rapture so that this happiness suffuses his entire body. This too, great king, is a visible fruit of a life abstaining from $k a ̄ m a$ and akusala.

## Experience in the Fourth Jhāna

6. "Further, great king, with the abandoning of bodily pleasure (sukha), the bhikkhu enters and dwells in the fourth $j h \bar{a} n a$, which is neither pleasant nor painful and contains mindfulness fully purified by equanimity. He sits suffusing his body with a pure bright mind so that there is no part of his entire body not suffused by a pure bright mind (one's physical body no longer is felt, and only a "white light" is discerned; that white light is the only "rūpa" left to be cognized).

- "Great king, suppose a man were to be sitting covered from the head down by a white cloth so that there would be no part of his entire body not suffused by the white cloth. In the same way, great king, the bhikkhu sits suffusing his body with a pure bright mind, so that there is no part of his entire body not suffused by a pure bright mind. This, too, is a visible fruit of a life abstaining from kāma and akusala.

The sutta now proceeds to describe what could be further accomplished by the bhikkhu.

- "With his mind thus concentrated, purified, and bright, unblemished, free from defects, pliant, malleable, steady, and attained to imperturbability, he directs and inclines it to knowledge and vision. He discerns: 'This body of mine is endowed with form, composed of the four primary elements, born from mother and father, nourished with rice and porridge, subject to inconstancy, rubbing, pressing, dissolution, and dispersion. And this consciousness of mine is supported here and bound up here.'
- In other words, the bhikkhu can now see the ādīnava (drawbacks) and the burden of carrying one's own physical body.

## Essential Background to Attain Jhāna

7. Sāmaññaphala Sutta is an excellent sutta which also discusses in detail how one can setup the necessary background to attain jhāna.

- It is too long a sutta to be discussed in a post. One could read Bhikkhu Bodhi's English translation to get a good idea: "WebLink: PDF Download: The Sāmaññaphala Sutta." It is a pdf file that one can download.

8. Also note that while the abandonment of the 10 types of micch $\bar{a}$ dittthi is needed for even anāriya jhānā.

- Ariya jhānā require a level of comprehension of Tilakkhaṇa also, and thus only Ariyā (Noble Persons) can attain them; see, "Tapussa Sutta (AN 9.41)- Akuppā Cetovimutti."

## Eventual Outcomes of Ariya and Anāriya Jhāna

9. Both types of jhāna lead to rebirth in corresponding Brahma realms. However, those with anāriya $j h \overline{a n a}$ will come back to the human realm at the end of their lifetime, and could be born in the apa $\bar{a} y \bar{a}$ in the future.

- On the other hand, those who have cultivated Ariya jhānā will never come back to kāma loka, let alone apāy $\bar{a}$. They will attain Nibbāna (Arahanthood) in Brahma realms.

10. This is clearly explained in the "WebLink: suttacentral: Pathamanānākarana Sutta (AN 4.123)" and several other sutta.

For example, regarding those who have cultivated the first anāriya jhāna: "Idha, bhikkhave, ekacco puggalo vivicceva kāmehi vivicca akusalehi dhammehi savitakkaì savicāramं vivekajaì pītisukham paṭhamaì jhānamं upasampajja viharati. So tadassādeti, taì nikāmeti, tena ca vittimim āpajjati. Tattha ṭhito tadadhimutto tabbahulavihār̄̄ aparihīno kālaì kurumāno brahmakāyikānaì devānai் sahabyataí upapajjati. Brahmakāyikānai், bhikkhave, devānai் kappo āyuppamānaì.
 khepetvā nirayampi gacchati tiracchānayonimpi gacchati pettivisayampi gacchati."

- Translated: "An individual, withdrawn from kāma rāga, withdrawn akusala, enters and remains in the first $j h a \bar{a} a$ filled with joy ( $\overline{\bar{i} t i) \text { and the whole body is suffused and filled with bodily happiness (sukha). If }}$ he does not lose the jhāna at death, he is born among the Brahmakayika devas, who have a life span of an eon. These normal humans (puthuijano), having used up all the life-span of those devas, may go to hell (niraya), to the animal realm, and the state of the hungry ghosts (peta)."

On the other hand, those who have attained the first Ariya jhāna: "Bhagavato pana sāvako tattha yāvatāyukaì ṭhatvā yāvatakaì tesaì devānaì āyuppamānaì taì sabbaì khepetvā tasmimyeva bhave parinibbāyati."

- Translated: "But a disciple of the Blessed One, having stayed there, attains Nibbāna from there."

11. The same is stated about those who have attained the second, third, and fourth anāriya jhāna. None of them is free from the $a p \bar{a} y \bar{a}$.

- On the other hand, those who have cultivated Ariya jhāna attain Nibbāna from those corresponding Brahma realms.

12. Finally, this discussion about getting rid of (or at least suppressing) any sensual thoughts or kāma rāga may discourage those new to Buddha Dhamma.

- That should not be the case; see, "Is It Necessary for a Buddhist to Eliminate Sensual Desires?" and "Starting on the Path Even without Belief in Rebirth."

### 4.7.4 Ascendance to Nibbāna via Jhāna (Dhyāna)

October 4, 2017; \#14 revised on October 5, 2017; November 15, 2017; November 30, 2018 (including \#8); October 9, 2022

1. There are three categories: One can attain magga phala without jhāna; one can attain jhāna and not have magga phala; one can attain magga phala and then cultivate jhāna. To sort these out, one needs to understand the difference between Ariya (supramundane) and anāriya (mundane) jhāna and whether (and how) they are related to magga phala.

- In a series of posts based on material from the Tipitaka, I will try to put together a consistent picture. Please let me know (lal@puredhamma.net) if I make any mistakes because this is important to everyone.
- Even before the Buddha, ancient yogis cultivated jhāna and attained what they believed to be cetovimutti (liberation via calming the mind). But the Buddha showed that such cetovimutti is temporary; one would not attain akuppā cetovimutti (true and unshakable liberation) until Nibbāna is realized; see, "Tapussa Sutta (AN 9.41)- Akuppā Cetovimutti."
 $j h a ̄ n a$, (ii) first attaining the Sotāpanna stage and then through Ariya (supramundane) jhāna.
- Of course, there is another way to attain Nibbāna, without any jhāna, in pañ $\tilde{\boldsymbol{a}} \boldsymbol{v} \boldsymbol{v i m u t t i}$ (liberation with wisdom); see below.
- If one takes the path via Ariya jhāna, one would attain cetovimutti.This is also called akupp $\bar{a}$ cetovimutti or unshakable/unbreakable cetovimutti. That is what the Buddha attained on the night of the Enlightenment. [ubhato : [ind.] in both ways or sides; twofold.][It is also called 'unshakable deliverance of mind' (akuppa-cetovimutti) ][akuppa : [adj.] steadfast; unshakable.]
- Those yogis who attain cetovimutti via anāriya jhāna have not removed avijjā anusaya; that is why they are not liberated. Then they can be reborn in the kāma loka; see \#4 below.

3. As the table below shows, the level of suffering decreases AND levels of both mundane and nirāmisa sukha increase as one moves successively to higher realms.

- In the post, "The Grand Unified Theory of Dhamma - Introduction," we described a model that consisted of 31 concentric "shells." The actuality is close to that analogy, with some additional features. I have compiled a summary of the 31 realms in the " 31 Realms of Existence" table.
- From those posts, it is clear that as one goes from the apāyā through higher kāma loka to rūpa loka and finally to arūpa loka, attachments to "this world" get weaker AND actual suffering decreases too.
- It seems that the highest arūpa realm is quite close to Nibbāna. In a way it is —but technically it is far away too.

4. Yogis like Āḷāra Kālāma and Uddakarāmaputta, who had attained the highest arūpa jhānā at the time of the Buddha, believed that the highest arūpavacara state was Nibbāna (or final release, vimutti). Indeed, at that highest realm of Ne'va sañ̃ña n $\bar{a} \operatorname{san} \tilde{n} \bar{a}$, connection to "this world" is ALMOST cutoff, and one can experience the "highest bliss" that can be attained without realizing Nibbāna.

- The Buddha (or rather the Bodhisattva), who learned to attain those highest jhānā from those yogis, realized that all living beings had attained those states many times in the rebirth process, and that is not the end of suffering.
- He realized that until one completely removes all ten samisāric bonds (see, "Dasa Samyojana - Bonds in Rebirth Process '", one will never be free of ANY of the 31 realms. As discussed in that post, one SUCCESSIVELY and PERMANENTLY leaves the lowest realms (apāyā), higher kāma loka realms, and then $r \bar{u} p a$ and $a r u \bar{u} p a$ realms by breaking those bonds (samyojana) few at a time (by following the Noble Path).

5. However, one can TEMPORARILY enjoy the highest arūpa realms existence by cultivating even the corresponding MUNDANE $j h a \bar{n} a$, i.e., those attained without removing ANY samiyojana.

- For example, while we live in this human realm we are not subjected to the harsh sufferings in the $a p \bar{a} y \bar{a}$, and we can enjoy the sensory pleasures, mixed in with some suffering.
- In the same way, when one is born in the rūpa realms, one will not be subjected to the sufferings in the human realm, and the suffering is even less going from $r \bar{u} p a$ to arūpa realms.
- However, since no samiyojana are broken, one can be reborn in any of the realms in the future (just like an average human can be born in the $a p \bar{a} y \bar{a}$ in the future).

6. The easiest way to understand jhānic states is to examine the properties of the ru$p a$ and aru$p a$ realms compared to those of the lower realms. The following table can be useful here.

| Realm(s) | Level of Suffering | Causes | Generation/Stopping of Sañkhāra |
| :---: | :---: | :---: | :---: |
| Niraya (Hell) | Incessant suffering | Dosa: Killing (especially humans), torture, rapes, etc |  |
| Peta (Hungry Ghosts) | Starvation | Excess greed (may I get all, not others) |  |
| Vinipāta Asura | Spend time aimlessly; mostly heavy bodies not movable | Moha: Thina middha, vicikicchā (lazy, lacking wisdom). |  |
| Animal (Tirisan: "tiri" + "san" or with all 3 causes) | Combinations of above three types | Combinations of lobha, dosa, moha |  |
| Human (Manussa: "mana" + "ussa" or with advanced mind) | In between lower and higher realms | In between lower and higher realms | Almost all sañkhāra responsible births in all realms occur here. |
| Deva (similar to human bodies, but much less dense) | Mostly no physical suffering and abundant sense pleasures ( $k \bar{a} m a$ ). But there is mental stress. | Good kamma vipāka (done with alobha, adosa, amoha). Mental stress arises due to kāma rāga. |  |
| Rūpāvacara Brahma (only manomaya kāya; cannot be even seen with a microscope) | Mental stress is much reduced. Mainly jhānic pleasures. Viparin̄āma dukha when close death. | Suppression of kāma rāga and cultivation of rūpāvacara jhāna (while in the human realm) |  |
| Arūpāvacara Brahma (only hadaya vatthu and mind) | Only arupavacara jhānic pleasures. Viparin̄āma dukha when close death. | Cultivation of arūpāvacara jhāna (while in the human realm) |  |
| Nibbāna | Permanent release from all suffering. | Elimination of all causes for existence, i.e., rāgakkhaya, dosakkhaya, mohakkhaya. | Mostly attained in the human realm, but possible in higher realms, especially after the Sotāpanna stage. |

7. If you look at any sutta describing Ariya jhāna, it always starts with verse, "..bhikkhu vivicceva kāmehi vivicca akusalehi dhammehi savitakkaiं savicāraì vivekajaì pītisukhaì paṭhamaì jhānamं upasampajja viharati.."

We can see why the above table is helpful in understanding how one gets to jhānā by first abstaining from akusala kamma (vivicca akusalehi dhammehi) and then kāma rāga (vivicceva kāmehi).

- Until one abstains from akusala kamma, one has no hope of escaping the $a p \bar{a} y \bar{a}$. Here abstaining does not mean complete removal.
- Until one overcomes kāma rāga, one has no hope of escaping the kāma loka and ascending to the rūpavacara realms.
- However, one does not need to REMOVE kāma rāga (with anusaya) to attain mundane (anāriya) $j h a \bar{n} a$, even up to the highest in the arūpa loka. This is why Alara Kalama and Uddaka Rama Putta, who are in the arūpa realms right now, could even be reborn in the apāya in future lives.
- All one needs to do is to have the mind focused on a neutral object to make it free of akusala thoughts and kāma rāga while in the jhāna.

8. We can summarize the above conclusions in the following way:

- One frequently engaged in akusala kamma is LIKELY to be born in the four lowest realms (apāyā).
- One who is frequently engaged in kusala kamma, AND avoids akusala kamma, but has $k \bar{a} m a c c h a n d a$, is LIKELY to be born in the human or the deva realms.
- One who abstains from akusala kamma and kāmacchanda, can cultivate rūpavacara or arūpavacara jhāna. Since they are mahaggata kusala kamma (mahaggata means higher), one WILL be reborn in rūpa or arūpa loka at the death of this physical body BEFORE the next cuti-paṭisandhi transition. Getting to even an anāriya jhāna is ānantarika kamma.
- However, if it is an anāriya jhāna, one has not been released from the apāy $\bar{a}$, since one has not removed avijjā by comprehending Tilakkhaṇa.

9. If one can stay away from akusala and suppress kāma rāga, one's mind AUTOMATICALLY moves to higher mental states. In other words, one starts feeling jhānic pleasures ("sañkhāra paccay $\bar{a}$ viññāna").

- When striving to discard kāma rāga, one is said to be cultivating mahaggata kusala kamma. Here one goes beyond mundane moral actions (puñña kamma) of giving, helping, etc, and loses (or suppresses) craving for kāma rāga.
- Therefore, while kusala kamma leads to rebirth in higher kāma loka (human and deva realms), mahaggata kusala kamma leads to rebirth in rūpa and arūpa loka. One, of course, experiences those jhānic states in this life.
- The jhānic experiences experienced by yogis correspond to various rūpa and arūpa realms; see, " 31 Realms of Existence." It is like one is born in the corresponding Brahma realm for the duration of the jhānic experience.

10. Mahaggata kusala kamma can be cultivated using Ariya (supramundane) or anāriya (mundane) meditation techniques, and get to the same mental states (the difference is in how one gets there and how permanent those states are).

- It is easy to see that the key to cultivating the first mundane $j h a \bar{a} a$ is to stay away from akusala and suppress sense cravings. Then one's mind will automatically point to the first rūpavacara mental state, i.e., the first $j h a \overline{n a}$.

11. One can get to the first anāriya jhāna by focusing on a fixed mundane object (breath or a kasiṇa object).

- When one does this for long periods and also abstains from sensual pleasures (like ancient yogis did), one can get into the first $j h \bar{a} n a$, followed by successively higher $j h \bar{a} n a$, when one practices for longer times.
- Conventional breath meditation is a kasiña meditation, since it focuses on the breath.

12. This is how all living beings in the lower realms get into the Abhassara Brahma realm when our world system (Cakkavata) is destroyed in a "loka vināsaya." When the Sun starts heating up, fine sense objects start being destroyed, and less sensual objects will be there to trigger kāma rāga. All humans and animals will move to higher realms (over an antakkappa which lasts billions of years).

- When the human and animal realms are destroyed, all those beings would be reborn in the first rūpa realms. When that is gradually destroyed, they will be reborn in the next higher realm and so on, until they are all in the Abhassara realm.
- Even though all dense material realms are destroyed at the destruction of the Sun and the Earth [loka vinasaya], all rūpa and arūpa realms at or above the Abhassara realm remain intact. When the Solar system is "re-formed" after billions of years, they all gradually come down to lower realms. See "Buddhism and Evolution - Aggañña Sutta (DN 27)."
- Just like none of those living beings had removed their anusaya (or broken the samyojana), one engaged in mundane $\boldsymbol{j} h \bar{a} n \bar{a}$ has not removed them either.

13. On the other hand, one gets to the first Ariya jhāna by focusing on the "cooling down" (Nibbāna) that one has seen. This is normally done by reciting/contemplating the verse "etaim santaim etaì pañ̄tai் ...", and also recalling one's own experience of Nibbāna (cooling down).

The best example from the Tipitaka is Ven. Moggallana. We all know that Ven. Moggallana (Kolita before becoming a bhikkhu), attained the Sotāpanna stage upon hearing a single verse by Ven. Assaji and then conveyed to him by Upatissa.

- Then Kolita (and Upatissa) went to see the Buddha and were ordained. It took them a week to two weeks to attain Arahanthood. The WebLink: suttacentral: Moggallana Samyutta in the Samyutta Nikāya has nine suttā that describe step-by-step how Ven. Moggallana attained Ariya jhānā one by one starting with the first Ariya jh $\bar{a} n a$. Thus it is quite clear that the Sotāpanna stage comes before any Ariya (supramundane) jhāna.
- In particular, the very first sutta there describes how the Buddha came to him by iddhi bala and encouraged him to cultivate the first Ariya jhāna (WebLink: suttacentral: Pathamajhāna Pañhā Sutta; SN 40.1): "..Atha kho maim, āvuso, bhagavā iddhiyā upasañkamitvā etadavoca: 'moggallāna, moggallāna. Mā, brāhmaṇa, paṭhamaì jhānam pamādo, paṭhame jhāne cittaí sanṭhapehi, paṭhame jhāne cittaì ekodim karohi, paṭhame jhāne cittaim samādahā'ti.." OR "..the Buddha came to me by iddhi bala and told me: Moggallana, Moggallana, Brahmana, do not become delayed, cultivate the first $j h a \bar{a} n a . . . "$
- The subsequent suttā in the Moggallana Samyutta describe how the Buddha instructed him through each successive rūpavacara and arūpavacara jhāna up to nirodha samāpatti, where Ven. Moggallana developed all iddhi bala and became second only to the Buddha in supernormal powers.

14. Thus, one needs to be at least a Sotāpanna to start cultivating Ariya jhāna. However, one will truly be in the first Ariya jhāna only when one has REMOVED kāma rāga; see, for example, "WebLink: suttacentral: Jhāna Sutta (Anguttara Nikāya 9.36)." We will discuss this in detail in the next post.

- This means one is essentially an Anāgāmī by the time one is fully absorbed in the first Ariya jhāna. But a Sotāpanna could be in the vicinity of the first Ariya jhāna. There are three levels for a given jhāna: hīna (weak), majjhima (middle), and panīta (strong).
- After that one gets to higher Ariya jhānā by doing vipassana (insight meditation) on the anicca nature of that $j h \bar{a} n a$ that one is already in, i.e., by eliminating successive $\boldsymbol{j} h \bar{a} n a$ factors OR one may be able to attain Nibbāna directly form there; see, "WebLink: suttacentral: Sallekha Sutta (Majihim Nikāya 8)."
- Since any jhāna is associated with either a rūpa realm or an arūpa realm, those states are subject to the anicca nature, just like everything else that belongs to this world of 31 realms.

15. Those who have higher wisdom can attain even the Arahant stage before getting to any jhāna or from lower Ariya or anāriya jhāna; they are called paññāvimutti Arahants. They may cultivate (Ariya) jhāna after the Arahanthood to seek relief until the end of their current life. Jhānic pleasures are the only "pleasures" recommended by the Buddha; of course, they are not sensory pleasures belonging to kāma loka.

- It is said that those Arahants can cultivate all Ariya jhāna (and become cetovimutti as well) and then get into nirodha samāpatti, where complete Nibbānic bliss can be experienced for up to 7 days at a time.
- Such Arahants are called "liberated both ways" or ubhatovimutti.

16. A question arises as to whether one can get into anāriya jhāna while cultivating Ariya jhāna, i.e. while following kammatthāna that are based on contemplating the Tilakkhana and taking Nibbāna as the $\bar{a} r a m m a n a$. The unknown factor here is whether the meditator is really focused on those things.

- Therefore, that is a question that can be answered only by the person in question. Just because one is reciting Ariya kammatthana does not necessarily mean one will get to Ariya jhāna. What matters is whether one has attained the Sotāpanna stage first, because one needs to keep Nibbāna as the ärammaṇa, not a worldly object (even light).
- We know that Devadatta, who had cultivated anāriya jhāna AND attained iddhi powers, finally ended up in an apāya. Even though he had been exposed to the correct interpretation of Tilakkhaña, he had not grasped them
- I will discuss more on this in the next post, where I will present evidence from the Tipitaka to clarify things.

17. However, anāriya jhāna cannot be labeled as "bad." They are higher mental states, and those who have cultivated anāriya jhāna will have an easier time attaining magga phala. One needs to contemplate the anicca nature of $j h a \overline{n i c}$ states.

- One can attain any magga phala up to full Nibbāna (Arahanthood) from the vicinity of ANY of the anāriya jhāna. This is how the 89 citt $\bar{a}$ become 121 citt $\bar{a}$; see, "The 89 (121) Types of Citta."
- When it is said, "from the vicinity of ANY of the anāriya jhāna," that includes the vicinity of the first mundane jhāna, i.e., just upacara samādhi. This is why jhānā are not NECESSARY to attain magga phala, and it is "Sammā Samādhi" in the Noble Eightfold Path that gets to Sammā Ñāna and Sammā Vimutti (i.e., Arahanthood).

18. The critical question is "If mundane and supramundane $j h \bar{a} n a$ seem to have similar characteristics that one feels, then how does one determine whether one has attained mundane or supramundane jhāna?

- As we saw above, one gets to the first Ariya jhāna by REMOVING kāma rāga, not just by suppressing as in anāriya jhāna, i.e., one is essentially an Anāgāmī if one can be fully absorbed in the first Ariya jhāna.
- While it may not be straightforward to determine whether one is a Sotāpanna or not, it is fairly easy to determine whether one is an Anāgāmí, who has removed all kāma rāga: one's CRAVING for ALL sense pleasures (food, music, sex, etc) should not be there anymore. This DOES NOT mean, for example, one should not eat tasty foods, or that one will not taste the sweetness of sugar. But one will not have the urge to drink or to engage in sex, for example.

19. Finally, a common problem is that some people get attached to mundane jhānic pleasures and get trapped there (for some, even a state of calmness is enough!). They must realize that anāriya (mundane) jhānic states also belong to this world. Until those bonds to a given realm in this world are removed, one would remain in the rebirth process (and thus, future suffering in the $a p \bar{a} y \bar{a}$ is not eliminated). We have attained the highest anāriya jhānā numerous times in our deep past.

- Those who can easily get into anāriya (mundane) jhāna, can do so most likely because they had cultivated $j h a \bar{n} a$ in recent lives, possibly in the current human bhava.
- Furthermore, those who cannot get into even anāriya (mundane) jhāna, should not be concerned. It could just be that they had not cultivated jhāna in recent births. As discussed above, jhānā are not necessary to attain magga phala. Thus, some people may have even attained the Sotāpanna stage, but may be stressed unnecessarily because of their inability to get into jhāna.

The basic layout was presented in this post. We will get into details in the upcoming posts.

### 4.7.5 Paññāvimutti - Arahanthood without Jhāna

September 12, 2018; revised February 24, 2019
[paññāvimutti : [f.] emancipation through insight.][WebLink: suttacentral: Paññāvimutti Sutta (AN 9:44)]

1. One could get to magga phala without ever going through jhāna. The Noble Eightfold Path, at its completion, takes one to Sammā Samādhi. Then one becomes an Arahant by completing the next two steps - Sammā Nāana and Sammā Vimutti - to become an Arahant.

This is stated clearly in the WebLink: suttacentral: Mahā Cattārīika Sutta (Majjhima Nikāya 117): "..Tatra, bhikkhave, sammādiṭṭhi pubbañgamā hoti. Kathañca, bhikkhave, sammādiṭthi pubbañgamā hoti? Sammādiṭṭhissa, bhikkhave, sammāsaǹkappo pahoti, sammāsañkappassa sammā $\mathbf{v a} c \bar{a}$ pahoti, sammāvācassa sammākammanto pahoti, sammākammantassa sammāājīvo pahoti, sammāāj̄̄vassa sammāvāyāmo pahoti, sammāvāyāmassa sammāsati pahoti, sammāsatissa sammāsamādhi pahoti, sammāsamādhissa sammāñānamin pahoti, sammāñānassa sammāvimutti pahoti. Iti kho, bhikkhave, aṭthañgasamannāgato sekkho, dasañgasamannāgato Arahā hoti. Tatrapi sammāñānena aneke pāpakā akusalā dhammā vigatā bhāvanāpāripūrim gacchanti.."

- Thus the Noble Path starts with Sammā Ditthi and gets to Sammā Samādhi, at which point one is said to have completed 8 steps and is still a sekkha (in training): atṭhangasamannāgato sekkho.
- Then one fully comprehends the real nature with $\operatorname{Samma} \overline{\operatorname{N}} \tilde{a} n a$ and attains full release or $\operatorname{Samma} \bar{a}$ Vimutti (Arahantship). Now, one has completed all 10 steps and is no longer in training (dasañgasamannāgato Arahā hoti).

2. Each and every one of us have had attained anāriya jhāna in many births during our deep past. Thus attaining a jhāna is insignificant compared to attaining a magga phala.

- It is also clear that even a Sotāpanna Anugāmi is million-fold better than one with not just the ability to get into jhāna, but even abhiññā powers, including the ability to travel through the air, create things by mind power, etc.
- Attaining $j h \bar{a} n \bar{a}$ can sometimes become a hindrance since many people get attached to $j h \bar{a} n a$ and stop making an effort towards magga phala, which is sad to see.

3. It takes time to cultivate jhāna, especially for those who had not cultivated them in recent past lives. People who have high wisdom (paññā) may attain magga phala (even Arahanthood) within a very short time, and they are called pañ $\tilde{a}$ äimutti Arahants or "wisdom-liberated." Bahiya Daruchiriya, who attained Arahantship upon listening to a single verse by the Buddha is a good example; see, "WebLink: suttacentral: Bahiya Sutta (Udāna 1.10)."

- There are many who got to magga phala without ever getting to a jhāna. Alavaka Yaksa, Upatissa, Kolita, Anggulimāla, minister Santati, and many others attained various stages of Nibbāna by just listening to a single desanā.
- The Susima Sutta, also called "WebLink: suttacentral: Susimaparibbājaka Sutta (Samyutta Nikāya 12.70)" discusses a group of Arahants who were paññāvimutti Arahants.
- In that sutta, the Buddha explained to Susima that there are Arahants without any supernormal (iddhi) powers, because they were paññāvimutti Arahants. Once attaining Arahanthood, they have no desire to cultivate iddhi (abhiññā) powers, since they have seen the anicca nature of those powers too.

4. In some exceptional cases, one may simultaneously gain abhiññā powers together with the Arahanthood, within a very short time.

- There are many who got to magga phala without ever getting to a jhāna. Alavaka Yaksa, Upatissa, kolita, Angulimāla, minister Santati, and many others attained various stages of Nibbāna by just listening to a single desanā. The account of Santati can be found at: "WebLink: tipitaka.net: Dhammapada Verse 142."
- Another prominent example in the Tipitaka is the story about the Culapanthaka Thero. He almost disrobed because he could not even memorize a single gāthā after trying hard for months. But with Buddha's help, he was able to attain the Arahanthood in a day, and simultaneously achieved abhiñ $\tilde{\bar{a}} \bar{a}$ powers as well: "WebLink: suttacentral.net: Cūlapanthaka."

5. Some argue that WebLink: suttacentral: Sacca Vibhañga Sutta (MN 141) states that Sammā Samādhi is attained ONLY WHEN one attains the first four $j h \bar{a} n \bar{a}$. This is not correct. All one needs to do is to get to the vicinity of to ANY of those four $j h \bar{a} n \bar{a}$ (thus one could get to the upcāra samādhi for the first $j h \bar{a} n a$, for example), and attain magga phala from there.

- Here is the relevant verse from the above sutta: "..Katamo cāvuso, sammāsamādhi? Idhāvuso, bhikkhu vivicceva kāmehi vivicca akusalehi dhammehi savitakkaì savicāraì vivekajaì pītisukhaì paṭhamaì jhānaì upasampajja viharati, vitakkavicārānaì vūpasamā ajjhattaì sampasādanamं cetaso ekodibhāvaì avitakkaì avicāraì samādhijaín pītisukhaín dutiyain jhānaì upasampajja viharati, pītiyā ca virāgā upekkhako ca viharati ... pe ... tatiyamं jhānà் ... pe ... catutthamं jhānaì upasampajja viharati, ayamं vuccatāvuso: 'sammāsamādhi'..."
- The key is "upasampajja viharati," which means one stays close to any one of those jhāna ("upa" means close or in the vicinity), which means one can either get to that jhāna or can get to upcāra samādhi for that $j h \bar{a} n a$. This is why it is not labelled as "Sammā Jhāna" but "Sammā Samādhi."
- This becomes clear when you analyze how 89 types of citta become 121 citta, as explained below.

6. The 89 (or 121) citta existing in the 31 realms are discussed in "The 89 (121) Types of Citta."

- There are 54 citta that could arise mainly in the kamavacara realms; 15 and 12 citta respectively mainly arise in the rupāvacara and arupāvacara realms respectively. The total so far is 81 citta
- Without going through any jhāna at all, there are 8 citta associated with the attainment of the four stages of Nibbāna ( 4 magga citta and 4 phala citta). Then the total number of citta is $81+8=89$.
- Now, one can attain each magga phala from the vicinity of 5 rupāvacara jhāna. For example, the Arahanthood can be reached from the vicinity of each of those five jhāna. Thus in this case, the total number of citta becomes $81+40=121$.
- It is to be noted that the five $\boldsymbol{j} h \bar{a} n a$ in the terminology of $A b h i d h a m m a$ are the same as $\mathbf{4} \boldsymbol{j} h \bar{a} n a$ in the terminology of the suttia; the first jhāna in sutta terminology is split into two in Abhidhamma.

7. In Anhidhamma, the above explanation becomes even more clear when one looks at the citta vīthi to attain a magga phala):

## B B B B B "BC BU MD P U A G M P P" B B B B B.....

where, $\mathrm{B}=$ bhavañga, BC (bhavañga calana), BU (bhavañga upacceda), $\mathrm{MD}=\operatorname{mind}$ door, $\mathrm{P}=$ parikamma, $\mathbf{U}=$ upacāra, $\mathbf{A}=$ anuloma, $\mathbf{G}=$ gotrabhu (change of lineage), $\mathbf{M}=$ magga citta, $\mathrm{P}=$ phala citta. [Here, "anu" means "through the understanding of Tilakkhana," "lo" means "craving for worldly things," and "ma" means "removal," and thus "anuloma" means "removal of craving for worldly things to some extent via the comprehension of Tilakkhana."]

- So, there is no jhāna citta preceding the magga or phala citta in the citta vīthi for a magga phala. Once one gets to the upacāra samādhi, it goes through anuloma and gotrabhu (change of lineage) to the magga and phala citta. This is why upacāra samādhi (which is Sammā Samādhi) is enough to attain even the Arahanthood.

8. On the other hand, a citta vīthi to attain a jhāna:

B B B B B "BC BU MD P U A G J" B B B B B.....
where, $\mathbf{J}=\boldsymbol{j} h \bar{a} n a$ citta .

- Note that upacāra citta for jhāna is different from upacāra citta for magga phala, even though they are represented by the same symbol normally. upacāra means "close", either to the jhāna or to magga phala, which are two different attainments. As we discussed earlier, jhāna are associated with "this world" and magga phala are associated with Nibbāna.
- Gotrabhu (change of lineage) citta is the one that induce either a magga phala or a jhāna, and those are two very different changes: jhāna is just change of lineage to one of the 31 realms, whereas magga phala is to be dissociate from the 31 realms.
- For a discussion on citta vīthi, see, "Citta Vithi - Processing of Sense Inputs."

9. There is another piece of strong evidence from the Tipiṭaka that one does not need to attain even the first Ariya jhāna in order to attain the Sotāpanna stage. We all know that Ven.Moggallana (who was Kolita before becoming a bhikkhu), attained the Sotāpanna stage upon hearing a single verse uttered by Ven. Assaji.

- Then Kolita (and Upatissa) went to see the Buddha and were ordained. It took them a week to two weeks to attain the Arahanthood. The WebLink: suttacentral: Moggallana Samyutta in the Samyutta Nikāya has 9 suttā that describe step-by-step how Ven. Moggallana attained Ariya jhānā one by one starting with the first Ariya jhāna. This is conclusive evidence that one does not need to attain any Ariya jhāna before attaining even the Sotāpanna stage.
- In particular, the very first sutta there describes how the Buddha came to him by iddhi bala and encouraged him to cultivate the first Ariya jhāna (WebLink: suttacentral: Pathamajhāna Pañhā Sutta; SN 40.1): "..Atha kho maìn, āvuso, bhagavā iddhiyā upasañkamitvā etadavoca: 'moggallāna, moggallāna. Mā, brāhmaṇa, paṭhamaì jhānaì pamādo, paṭhame jhāne cittaì saṇthapehi, paṭhame jhāne cittaì ekodim karohi, paṭhame jhāne cittaì samādahā'ti.." OR "..the Buddha came to me by iddhi bala and told me: Moggallana, Moggallana, Brahmana, do not become delayed, cultivate the first jhāna..."
- The subsequent suttā in the Moggallana Samyutta describe how the Buddha instructed him through each successive rupāvacara and arupāvacara jhānā, where Ven. Moggallana developed all iddhi bala and became second only to the Buddha in supernormal powers; see, "Ascendance to Nibbāna via Jhāna (Dhyāna)."

10. Therefore, one could get to the higher stages of Nibbāna via two paths.

- One could cultivate $j h \bar{a} n \bar{a}$ and attain successively higher $j h \bar{a} n \bar{a}$ by comprehending the anicca nature of those $j h \bar{a} n \bar{a}$ (as we mentioned above, they still belong to this world), and REMOVING successive jhāna factors.
- I will write more about this in the future, but the point is that those jhānic states are still subjected to both the sañkhāra dukkha and the viparināma dukkha, even though exempt from dukkha dukkha temporarily.
- The second path does not require jhāna; Sammā Samādhi is enough. For those with higher levels of wisdom (pañña), higher stages of Nibbāna can be arrived without going through jhāna.

11. The second path is discussed in the WebLink: suttacentral: Kimatthiya Sutta (Añguttara Nikāya 11.1). Here one can start with comprehending dukkha, which leads to Nibbāna via the following steps: saddhā, piti, passadhi, sukha, samādhi, yathabhutananadassana, nibbida, viraga, and to vimutti; see, "WebLink: suttacentral: Upanisa Sutta (Samyutta Nikāya 12.23)."

- When one starts with lokuttara Sammā Ditṭhi and follows the ariyakānta sīla (Sammā Vaca, Sammā Kammanta, Sammā Ajiva), one will automatically get to Sammā Vāyāma, Sammā Sati and Sammā Samādhi (these three path factors constitute Samādhi). By the way, Sammā Ditṭhi and Sammā Sañkappa constitute pañ̃̄̄̄. So, the sequence is pañ̃̄̄a, silla, samādhi.
- That Sammā Samādhi is all one needs to get to Sammā Ñāna (ultimate wisdom) and Sammā Vimutti (ultimate release) and thus to attain the Arahanthood; fulfiling all ten factors lead to the Arahanthood ("dasahangehi samannagato").

12. One time a bhikkhuni asked Ven. Ānanda: ".. 'yāyami, bhante ānanda, samādhi na cābhinato na cāpanato na ca sasañkhāraniggayhavāritagato, vimuttattā ṭhito, ṭhitattā santusito, santusitattā no paritassati. Ayamं, bhante ānanda, samādhi kimphalo vutto bhagavatā 'ti?," OR
"bhante annanda, I have this samādhi which is stable, without defilements, contented, joyful, and without agitation. What did the Blessed One call this samādhi?"

Ven. Ānanda replied: ".. 'yāyami, bhagini, samādhi na cābhinato na cāpanato na ca sasañkhāraniggayhavāritagato, vimuttattā ṭhito, ṭhitattā santusito, santusitattā no paritassati. Ayamं, bhagini, samādhi aññāphalo vutto bhagavatā'ti. Evainsaññ̄̄i kho, āvuso, tadāyatanain no pațisainvedetī"ti,"OR,
'Yes, bhikkhnuni, there is such a samādhi. The Blessed One called it Arahant phala samādhi that is without any defilements."

- This is in the WebLink: suttacentral: Ānanda Sutta (Anguttara Nikāya 9.37). She was an Arahant and she did not even realize that!
- That samādhi, is tadāyatana or Nibbāna; see, "Nibbāna "Exists", but Not in This World."

### 4.7.6 Mundane versus Supramundane Jhāna

## October 12, 2017; revised February 9, 2018; June 8, 2018; June 17, 2022; August 17, 2022

Here we will discuss three key suttā from the Tipiṭaka to resolve controversial arguments about mundane (anāriya) and supramundane (Ariya) jhāna. I would appreciate any comments (la@@puredhamma.net) pointing out any errors in my analysis or suggestions.

- February 28, 2019: I have found several Tipitaka references to anāriya jhāna, and a short one is discussed at the end. The post, "Tapussa Sutta (AN 9.41)- Akuppā Cetovimutti" clearly explains the difference between Ariya and anāriya jhāna.
- It is interesting to note that some suttā do not specifically label jhāna as Ariya or anāriya. One has to read a given sutta carefully to figure out which jhāna are discussed, but the conclusion always is that anāriya jhāna are worthless by themselves unless used as a platform to attain magga phala; see, "Samādhi, Jhāna, Magga Phala - Introduction."
- June 8, 2018: Some suttā discuss the critical differences; see "Pathama Mettā Sutta." As can be seen in this sutta, a Sotāpanna can cultivate anāriya jhāna (i.e., without removing kāma rāga) and be born in lower Brahma realms. However, unlike those with anāriya jhāna without magga phala, that person will not return to kāma loka.

1. The main characteristics and purposes of Ariya (supermundane) jhāna are described in detail in the "WebLink: suttacentral: Jhāna Sutta (Añguttara Nikāya 9.36)." The English translation (WebLink: suttacentral: Mental Absorption) at that site is not good, so that I will translate most of the sutta here.
 course, anicca and anatta are translated incorrectly there too.

- I will use key Pāli terms without translating since anyone reading the post will likely understand them. I think that would make it easier to read.

2. Now, I will translate the sutta, and the numbers below correspond to the paragraphs in the Pāli version: "WebLink: suttacentral: Jhāna Sutta (Añguttara Nikāya 9.36)."
\#1. Bhikkhus, I will state the removal of $\overline{\text { asava }}$ (mental fermentations) via the first $j h \bar{a} n a$, second jhāna, third jhāna, fourth jhāna, ākāsānañcāyatana, viññānañcāyatana, ākiñcañ̃̄̄̄yatana, nevasañn̄̄̄nāsañn̄āyatana, saññāvedayitanirodha (the last four are the arūpavacara jhānic states). Also, I have minimized wording to keep the paragraph short, just giving the meaning. [āsava: mental effluent, pollutant, or fermentation, (lit: influxes), 'cankers', taints, corruption's, intoxicant biases. There is a list of four (as in D. 16, Pts. M. , Vibh.): the canker of (wrong) views (dittthāsava), of sense-desire (kāmāsava), of (desiring eternal) existence (bhavāsava), and of ignorance (avijjāsava).]

- Thus the main purpose of jhānic states is to do insight meditation and remove āsava, not to enjoy that jhānic "pleasure" or relief. Nibbāna is attained via the removal of āsava: "The Way to Nibbāna Removal of Āsavas."
- There is a lot of important information in the next paragraph.
\#2. Bhikkhus, I surely declare the removal of $\bar{a} s a v a$ (mental fermentations) via the first jhāna. On account of what do I say that? A bhikkhu abstaining from sense pleasures (vivicceva kāmehi), abstaining from akusala, arrives in the vicinity of the first jhāna (upasampajja viharati). He thus contemplates the anicca nature (aniccato), dukkha nature (dukkhato), disease-ridden nature (rogato), cancer-like nature (gandato), arrow-like nature (sallato), painful (aghato), danger-ridden (ābādhato), alien (parato), subject to destruction (palokato), an empty (suñ̃̃ato), not-fruitful and leading to helplessness (anatto) OF rūpa, vedanā, sañ̃̄a, sañkhāra, viññāna (rūpagataì vedanāgataì sañn̄āgataì sañkhārāgataì viññānagataì). He turns his mind away from those phenomena and, having done so, inclines his mind to
 taṇhäkkhayo virāgo nirodho nibbānan'ti. ["It is peaceful, it is serene, the expelling of all sañkhāra, breaking of bonds, removing greed and hate; Nibbāna.'] Thus he gets rid of āsava. If he does not complete the removal of āsava, he would remove the first five sainyojana and thus will be born opapātika (in brahma loka) and attain parinibbāna there and will not return to this world (No ce āsavānaì khayaì pāpunāti, teneva dhammarāgena tāya dhammanandiyā pañcannaì orambhāgiyānai் samiyojanānaì parikkhayā opapātiko hoti tattha parinibbāȳ̄ anāvattidhammo tasmā lokā).
- Thus one cannot attain Ariya jhāna without comprehending anicca, dukkha, and anatta nature of the pañcakkhandha.
- The common verse, "..(pathamam) jhānam upasampajja viharati.." is commonly translated as, "..enters and remains in the (first) jhāna..." However, "upasampajja viharati" ("upa" + "san" + "pajja") means "abiding in the vicinity of clarifying and removing 'san""; of course 'san' are lobha, dosa, moha or āsava. The prefix "upa" means "near or close." For example, "upasampadä" ("upa" + "san" + "padā") means a bhikkhu has advanced and is getting close to "sorting out 'san"" and thus to magga phala.
－Now，let us recapture the three important steps in the above paragraph：First，one gets to the $j h a ̄ n a$ by contemplating on a long list of faults（ $\bar{a} d \overline{i n} a v a$ ）of the five aggregates rūpa，vedan $\bar{a}$ ，sañña $\bar{a}$ ， sañkhāra，viññāna that make up one＇s world；see，＂The Five Aggregates （Pañcakkhandha）．＂［ādīnava：m．過患，患難，過失，危難．bad consequences（suffering），difficult and dangerous situation（trouble），fault（inadvertent［not resulting from or achieved through deliberate planning］mistakes），danger and disaster（distress）］
－Once one gets to the vicinity of the first jhāna，one can intensify it and be fully absorbed in it by contemplating the relief that is already seen：＇etaì santaì etaì pañ̄̄taì yadidam sabbasañkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānan＇ti．This is the extra effort involved in cultivating the jhāna versus pañ$\tilde{\boldsymbol{n}} \boldsymbol{a} \boldsymbol{v i m u t t i}$ path．［It is peacefil，it is serene，the expelling of all sañkhāra，breaking of bonds，removing greed and hate；Nibbāna．］
－Thirdly，one can get to the higher jhāna by again contemplating the faults（ādinava）of the five aggregates．
\＃3．＂Bhikkhus，an archer or archer＇s apprentice，were to practice on a straw man or mound of clay，after a while，he would become able to shoot long distances，to fire accurate shots in rapid succession，and pierce great masses；in the same way，a bhikkhu abstaining from sensuality，abstaining from akusala，arrives in the vicinity（upasampajja）of the first jhāna．＂
－The rest is essentially the same as in \＃2 above from that point onward about how āsava are removed by contemplating those faults（ādinava）of the five aggregates，to the following confirmation statement at the end of the paragraph to emphasize the following：＂Bhikkhus，I surely declare removal of āsava（mental fermentations）via the first jhāna．＂
\＃4．This paragraph repeats the same paragraph of \＃2 above，for the second，third，and fourth jhāna．It is interesting that even at the fourth jhāna，one could only be guaranteed to become an Anāgāmī．However，as mentioned in \＃2，one could attain Arahanthood even from the first jhāna if all āsava are removed．That holds for any jhāna through the fourth．
\＃5．The same verse as \＃3 is repeated for the second，third，and fourth $j h a \bar{a} a$ ，with the paragraph ending，
＂．．Bhikkhus，I surely declare the removal of āsava（mental fermentations）via the fourth jhāna．＂
\＃6 ，\＃7．The paragraphs in \＃2 and \＃3 for the first jhāna are now repeated for the first arūpāvacara jhāna： ākāsānañcāyatana．
\＃8，\＃9．The paragraphs in \＃2 and \＃3 for the first jhāna are now repeated for the second and third arūpāvacara jhāna：viññāṇañcāyatana and $\bar{a} k i n ̃ c a n ̃ \tilde{n} a ̄ y a t a n a$ ．Again，it is interesting that even at such higher arūpāvacara jhānā，one could only be guaranteed to become an Anāgāmī．
\＃10．＂As for the two sañn̄̄asamāpatti āyatana－nevasaññā n̄̄ sañn̄āyatana samāpatti and saññ̄̄̄vedayitanirodho－they remove $\bar{a} s a v a$ and will lead to the faultless state of Nibbāna．＂
－Thus if one gets to the highest arūpāvacara Ariya jhāna，one will attain the Arahantship，and also will be able to get to nirodha samāpatti（saññ̄avedayitanirodho）．

3．That is，in essence，the complete sutta，which provides many key insights that have been hidden surprisingly．I almost fell off my chair when I first read it．I am unsure how and why modern translators failed to understand the importance of this sutta．
－Then I started reading more sutt $\bar{a}$ and realized that these key pieces of information are in many other suttā．See，for example，＂WebLink：suttacentral：Cūla Vvedalla Sutta（MN 44）＂AND＂WebLink： suttacentral：Kāvyagatāsati Sutta（MN 119）．＂

4．We can learn a lot of key aspects of Ariya jhāna from this important sutta．Let us begin with the fact that one gets to the vicinity（upasampajja）of the first jhāna by contemplating the faults（ādīnava）of
pañcakkhandha (rūpa, vedanā, sañña, sañkhāra, viññāṇa); once getting there, one further removes āsava by the same process.

- Thus, one gets to $j h a \bar{a} n a$ with insight meditation (Vipassanā) on the unsuitability (faults of) kāmāvacara states, and then once getting to jhāna, starts doing Vipassana $\bar{a}$ on the unsuitability of any jhānic state to transcend that state.
- There is a long list of such faults (ādīnava) (from \#1): anicca nature (aniccato), dukkha nature (dukkhato), disease-ridden nature (rogato), cancer-like nature (gandato), arrow-like nature (sallato), painful (aghato), danger-ridden (ābādhato), alien (parato), subject to destruction (palokato), an empty (suññato), not-fruitful and leading to helplessness (anatto).

5. Therefore, the main goal at any given Ariya jhāna is to contemplate all those faults (ādinava) of that state - thus move to the next higher state - and to finally arrive at Nibbāna at the last (8th) jhāna. Of course, one could completely remove all $\bar{a} s a v a$ and attain Nibbāna from any lower jhāna.

- If one attains Nibbāna from a lower jhānic state (below the highest arūpāvacara jhāna), one is said to attain pañ̃̄āvimutti. If one goes through to that highest jhāna and attains Nibbāna, one is said to have attained akuppā cetovimutti. I will have a separate post on this.
 Sinhala, meaning "burning").
- We will stick with the word "jhāna" instead of "dhyana" since it is commonly used. It is just useful to know where the meaning comes from.

6. One can think clearly in any jhāna. Even intermittent vitakka/vicāra ("wheeling around" with stray thoughts) will be absent after the second jhāna, i.e., one is in the avitakka/avicāra (free of vitakka/vicāra) mode after the second jhāna; I will discuss jhānanga or jhāna factors in a future post.

- This is why Ariya jhāna is helpful in insight (Vipassanā) meditation. The mind becomes clear when more and more sañkhāra are removed as one proceeds to higher jhāna states.

7. Even though the relief experienced in Ariya jhāna is the only "enjoyment" recommended by the Buddha, that is not the main purpose of Ariya jhāna. That is because if one gets attached to a jhāna, one cannot move up to the higher one. In any case, it is mainly those who get to anāriya jhāna who get attached to them (however, it is possible to attain any stage of magga phala even with anāriya jhāna or even without any jhāna). If one has seen the anicca nature, one will not get attached to a jhāna.

- In that context, in a previous post, it was discussed that any jhānic state is a mental state corresponding to "this world"; see "Ascendance to Nibbāna via Jhāna (Dhyāna)."

8. Pancanīvarana are also completely removed at the first Ariya jhāna. From the WebLink: suttacentral: Mahāvedalla Sutta (Majjhima Nikāya 43): ".. Idhāvuso, paṭhamaì jhānaí samāpannāssa bhikkhuno kāmacchando pahīno hoti, byāpādo pahīno hoti, thinamiddhai் pahīnai் hoti, uddhaccakukkuccamं pahīnaì hoti, vicikicchā pahīnā hoti..."

- Many suttā clearly state such conditions for the first supramundane jhāna.
- In contrast, neither the five samyojana nor the pañcanīvaraṇa is removed in any mundane jhāna. The reasons are obvious: none of the kilesa (klesha/defilements) can be removed by taking a neutral object as the arrammana.

9. This is why the Buddha told Ven. Saddhā: ".."Ājān̄̄yajhāyitaim kho, saddhā, jhāya; mā khaluñkajhāyitaim..", OR "Saddhā, cultivate the ajān̄̄ya (thoroughbred horse) jhāna, not the khalunka (mule) jhāna": WebLink: suttacentral: Saddhā Sutta (Añguttara Nikāya 11.9).

- In the WebLink: suttacentral: Sutta Central translation, khalunka is translated as a colt (a young horse). But the correct translation is a mule. As described in the sutta, a mule is lazy and useless compared to a thoroughbred horse.
- As described in the sutta, one who cultivates mundane jhāna takes worldly objects (kasiña, breath) as $\bar{a} r a m m a n ̃ a$, and even though can attain jhāna, they will not have the respect of the devas who can see the $\bar{a} r a m m a n a$.
- On the other hand, devas cannot see the ārammaṇa (Nibbāna) of those who have cultivated Ariya $j h a ̄ n a$, and they pay to him from a distance.

10. Therefore, there is a HUGE difference in HOW one arrives at a given jhāna.

- One using the anāriya path gets to jhānā by focusing one's mind on a mundane object, i.e., an object belonging to this world (for example, one's breath or a kasina object) and/or by contemplating mundane moral thoughts (benevolent, kind, etc.); we will discuss this in the next post.
- On the other hand, one on the Noble Path reaches a jhāna by contemplating Nibbāna, i.e., the anicca, $d u k k h a$, and anatta nature of this world of 31 realms. One may or may not get to Ariya jhāna that one can get into samāpatti (meaning uninterrupted jhāna, where the jhāna citta runs continuously without a break) before getting to the Arahanthood.
- However, jhāna sukha is the only sukha recommended by the Buddha since sense pleasures will bind one to the kāma loka. It is said that some pañ̃̃āvimutta Arahants cultivate jhāna after attaining Arahanthood.

11. Also see the previous post where it is discussed how Ven. Moggallana cultivated the first $j h a \bar{a} n a$ after attaining the Sotāpanna stage: "Ascendance to Nibbāna via Jhāna (Dhyāna)."

- One who can get fully absorbed in the first Ariya jhāna will be born in the Suddhāvāsa realms of the rūpa loka, and will not come back to the kāma loka, i.e., one is an $A n \bar{a} g \bar{a} m \bar{l}$, as clearly stated in the Jhāna Sutta and several other sutta.
- On the other hand, one who cultivates mundane first $\bar{j} h \bar{a} n a$ will be born in the first rūpāvacara Brahma realm in the next birth, but in later rebirths could even be born in the apāyā (since kāma rāga was only suppressed, not removed).

12. One can get into mundane (anāriya) jhāna via breath or kasiṇa meditation, and one could do Vipassanā from mundane jhānic states.

- But the problem is, in many cases, people get addicted to those states and cannot see their anicca nature of them.

13. In addition to the above sutt $\bar{a}$ (and more that I found) on Ariya jhāna, I found other suttō that discussed anāriya jhāna. In none of these suttā, there was a specific label saying Ariya jhāna or anāriya $j h \overline{a n a}$. However, one can see which is which when reading text.

- In the following reference, it is clearly stated that kama raga is only suppressed (vikkhambhanato) in all rūpāvacara and arūpāvacara jhāna. On the other hand, it states that kāma raga is removed (samucchedato) in stages via magga phala.
- The difference between vikkhambhana pahāna and samuccheda pahāna is discussed in, "Suffering in This Life - Role of Mental Impurities."

The following are the two relevant passages from the Khuddaka Nikāya, Mahāniddesa, Aț̣hakavagga: WebLink: suttacentral: 1. Kāmasuttaniddesa (Mnd 1) . There is no English translation there, but the Sinhala

Paṭhamaì jhānaì bhāventopi vikkhambhanato kāme parivajjeti ... pe ... dutiyaim jhānaì bhāventopi ... tatiyamं jhānaì bhāventopi ... catutthaì jhānai் bhāventopi ... ākāsānañcāyatanasamāpattim bhāventopi ... viññānañcāyatanasamāpattim bhāventopi ... ākiñcaññ̄yatanasamāpattim bhāventopi ... nevasaññānāsaññāyatanasamāpattim bhāventopi vikkhambhanato kāme parivajjeti. Evaì vikkhambhanato kāme parivajjeti.

- Translated: " $k \bar{a} m a$ " is suppressed (vikkhambhanato) in the first jhāna, ...to nevasañ̃̄ānāsaññāyatana (highest arupavacara jhāna). As we saw above, kāma is removed even before getting to Ariya jhāna. Thus, only anāriya (mundane) jhāna are meant here.
- See "WebLink: suttacentral: Tapussa Sutta (AN 9.41)" for another example.

Kathaì samucchedato kāme parivajjeti? Sotāpattimaggamं bhāventopi apāyagamanīye kāme samucchedato parivajjeti, sakadāgāmimaggaì bhāventopi olārike kāme samucchedato parivajjeti, anāgāmimaggaiं bhāventopi anusahagate kāme samucchedato parivajjeti, arahattamaggaì bhāventopi sabbena sabbaì sabbathā sabbai் asesaì nissesaì samucchedato kāme parivajjeti. Evamं samucchedato kāme parivajjetīti-yo kāme parivajjeti.

- Translated: "kāma" is removed (samucchedato) in stages via the Sotāpanna, Sakadāgām̄̄ stages and is removed at the Anāgāmi stage; it is removed without a trace at the Arahant stage.

14. The following sutta clearly states the difference between Ariya and anāriya jhānā.

WebLink: suttacentral: Pathamanānākarana Sutta (AN 4. 123): " Idha, bhikkhave, ekacco puggalo vivicceva kāmehi vivicca akusalehi dhammehi savitakkaiं savicāraì vivekajaì pītisukhaì paṭhamaì jhānaì upasampajja viharati. So tadassādeti, taì nikāmeti, tena ca vittim āpajjati. Tattha ṭhito tadadhimutto tabbahula-vihārī aparihīno kālaì kurumāno brahmakāyikānaì devānaì sahabyataì upapajjati. Brahmakāyikānaì, bhikkhave, devānaì kappo āyuppamānaì. Tattha puthujjano yāvatāyukaí ṭhatvā yāvatakaì tesaì devānaì āyuppamānaí taì sabbaí khepetvā nirayampi gacchati tiracchānayonimpi gacchati pettivisayampi gacchati. Bhagavato pana sāvako tattha yāvatāyukaì thatvā yāvatakaì tesaì devānai் āyuppamānaím taì sabbaì khepetvā tasmimyeva bhave parinibbāyati. Ayaiं kho, bhikkhave, viseso ayaì adhippayāso idamं nānākaraṇam sutavato ariyasāvakassa assutavatā puthujjanena, yadidam gatiyā upapattiyā sati."

Translated: 'There is the case where an individual, withdrawn from sensuality ( $k \bar{a} m a$ ), withdrawn from akusala, enters \& remains in the first jhāna: rapture \& pleasure born from withdrawal, accompanied by directed thought \& evaluation. He savors that, longs for that, and finds satisfaction through that. Staying there -fixed on that, dwelling there often, not losing the jhāna - then when he dies, he is born with the devas of Brahma's retinue. The devas of Brahma's retinue, monks, have a life span of an eon. A run-of-the-mill person, having stayed there, having used up all the life-span of those devas, goes to hell, to the animal realm, or the state of the hungry ghosts. But a disciple of the Blessed One, having stayed there, having used up all the life-span of those devas, attains Parinibbäna. This, monks, is the difference, this the distinction, this the distinguishing factor, between a Noble disciple and a normal person who had not heard the Noble Truths (assutavatā puthujjanena), in regards to the gati and birth."

- When one attains the first Ariya jhāna, one has become an Anāgāmī. He/she will be born in that Brahma realm and attain Parinibbāna there, as stated in the above sutta.
- In other words, kāma rāga must be completely REMOVED to get to the first Ariya jhāna. It is only temporarily suppressed (vikkhambana pahāna) for the anāriya jhāna.
- A Sotāpanna who gets to the first anāriya jhāna has not removed kāma rāga. But he/she will not come back to the kāma loka (will get the Anāgāmi phala moment in the Brahma loka and attain Nibbāna there). So, he/she is still an Anāgāmi ("na" + "āgami" or not coming back).
- Even some followers of Waharaka Thero in Sri Lanka do not seem to understand this point. However, Waharaka Thero has explained this in the following short desan $\bar{a}$ (in Sinhala): "WebLink: Ariya and Anāriya Jhāna (Audio)."

Nirodha samāpatti and various phala samāpatti are related to Nibbānā. Jhāna and jhāna samāpatti belong to "this world".

## Introduction

1. Nirodha samāpatti and various phala samāpatti are different, and they are very different from jhāna and jhānā samāpatti.

- The first two are related to Nibbāna. Jhāna belong to "this world." Jhāna are the mindsets that rūpāvacara and arūpāvacara Brahmā enjoy.

2. Before starting the discussion, I would like to emphasize the following. Concepts that we deal with in this post and that of Nibbāna (Arahanthood, in particular), are virtually impossible to imagine for most people. However, there could be a few people who have studied these concepts in detail and have some "nagging questions." Hopefully this information will be helpful.

- These concepts are contrary to ideas that normal humans are familiar with. Normal humans crave things in the material world so much it is almost impossible to rationalize why one would want to stop the rebirth process (i.e, to attain Arahanthood). Therefore, it is a waste of time to spend too much time thinking about such abstract concepts, at least until one gets to the Sotāpanna stage; these concepts start making sense only when one gets closer to the Anāgāmi stage.
- In the same way, it is hard to imagine for an average human how nirodha samāpatti (where all thoughts are stopped) can provide happiness. This is why I have explained in the "Nibbāna" subsection that Nibbānic bliss is NOT a feeling of pleasure (that would involve the vedana cetasika and thus would belong to this world). It is more like the relief one would feel when a long-lasting migraine headache goes away.
- With that out of the way, let us start the discussion.

## Life Maintained by Kammic Energy

3. First, it is essential to remember that life is maintained by kammic energy, not via citta vithi. Therefore, kammaja kāya is present at ALL TIMES. Kammaja ("kamma" +"ja") means "created by kamma (vipāka)."

- The kammaja kāya or the gandhabba (hadaya vatthu plus the five pasāda rūpa) is created at the cuti-patisandhi moment. The blueprint for our physical body is in the kammaja kāya (gandhabba), and thus the physical body grows according to the kammaja kāya (gandhabba).
- When kammaja kāya for the present bhava runs out of kammic energy, a new kammaja kāya matching the next bhava is initiated by kammic energy for the new bhava, at the cuti-patisandhi moment.

4. Therefore, each of us has had a kammaja kāya corresponding to most of the realms in this world from a time that cannot be traced to a beginning!

- Those unfamiliar with a specific term can use the "Search box" to find relevant posts. For example, we have four types of "kāya": kammaja, cittaja, utuja, and karaja (āhāraja) kāya. That last one is our physical body. Such a physical body is absent in rūpāvacara and arūpāvacara realms (basically just the gandhabba).

5. Cittaja kāya means the flow of citta vīthi. Remember that kāya is a "collection." Citta arise in the hadaya vatthu in the kammaja kāya.

- Cittā always run in "series" or vīthi. Each pañcadvāra (arising due to the five physical senses) citta vith ALWAYS has 17 cittā.
- A manodvāra (arising directly in mind) citta vīthi typically has 10-12 cittā. However, as we mentioned above, when in a samāpatti, manodvāra citta vīthi can run continuously. Therefore, there is no set upper limit to the number of manodvāra citta running continuously when in a samāpatti.
- The mind could be in different types of bhavañga states in between manodvāralpañcadvāra citta vīthi.

## Bhavañga State - Not a Citta

6. While the kammaja kāya is active AT ANY TIME, there CAN BE GAPS in the cittaja kāya.

- Bhavaña is a "state of mind" (other than bhavañga citta that sometimes appears inside a citta vith $h i$; see, "Bhava and Bhavañga - Simply Explained!"
- When in a bhavañga state, there are no citta vithi running, so not even universal cetasika present. One just knows that one is living, but there is no thought object (ārammana). No citta vīthi run inside a bhavañga state.
- A crude analogy of the bhavañga state is a TV set that is not tuned to a station. We can see the flickering white dots on the screen and hear a background "hum." But there is no picture. So, the mind is "on" but has no thought object.
- When an ārammaña comes to the mind, the mind captures that sound, picture, smell, etc. That is like that TV being tuned to a station and one can see the picture.

## Difference Between Samāpatti and Jhānā̄

7. The main difference between any samāpatti and jhāna is that jhāna citta do not run continuously. When one is in a jhāna, jhāna citta vīthi are interrupted by pañcadvāra citta vīthi running in between. Pañcadvāra citta vīthi are those coming through the five physical senses. Therefore, when one is in jhāna, one can see, hear, etc.

- But when one is in any type of samāpatti, corresponding manodvāra citta vīthi run continuously. Therefore, there is no opportunity for pañcadvāra citta vīthi to run, thus, one in a samāpatti is unaware of the external environment.

8. One could also be in a jhāna samāpatti. In this case also, there are no pañcadvāra citta vīthi are interrupting the flow of $j h a \overline{n a}$ citta vīthi. One in a jhāna samāpatti also will not see, hear, smell, etc.

- It is with practice that one who can get into jhāna can develop the ability to get into jhāna samāpatti. As one cultivates the jhāna, there will be less and less pañcadvāra citta vīthi coming in between successive jhāna citta vīthi. Initially, only 2-3 jhāna citta vīthi flow before a pañcadvāra citta vīthi comes in. With practice, one could be experiencing jhāna citta vīthi continuously for hours.

## Citta Absent in the Asañ̃ñalm

9. However, in the asañña realm, there is no cittaja k $\bar{a} y a$ or even a bhavañga state. One does not even know that one is alive. There is a fine physical body that is kept alive by kammic energy. So, the kammaja kāya is there.

- This is why the Buddha said it is a waste of time to be born in the asañ̃̃̄ $\bar{a}$ realm by cultivating asaññ $\bar{a}$ meditation techniques. One will live in the asañña realm for 500 mahā kappa (that is trillions of years), and just comes back to the human realm and start all over.
- In a previous post I provided evidence that viññāna cannot exist without a rūpakkhandha; see \#10 of "Gandhabba State - Evidence from Tipitaka." However, rūpakkhandha can exist without viññāna.
- If we become unconscious for some reason, that is like living in the asañña realm during that time.

## Phala Samāpatti

10. When one is in a phala samāpatti, that phala citta runs continuously.

- For example, if one is in the Arahant phala samāpatti, one has the Arahant phala citta running continuously.
- Not everyone with a magga phala can get into phala samāpatti automatically. Just like jhāna, they require a lot of practice unless one has cultivated jhāna in recent lives.

## Nirodha Samāpatti Versus Asaññā Realm

11. When in nirodha samāpatti, there is no citta vithi or a bhavañga state. It is sort of like in the asañña realm.

- But of course, there is a huge difference between nirodha samāpatti and being in the asañ̃̄̄̄ realm. One who can get to nirodha samāpatti has removed ALL DEFILEMENTS (and thus avijjā), but one in the asañ̃̃ $\bar{a}$ realm has not. So, at the end of the life in the asañ$\tilde{n} \bar{a}$ realm, that person would come back to the human realm and can be reborn even in the $a p \bar{a} y \bar{a}$ in later rebirths.
- This point explains why it is so peaceful not to have any citta running through the mind. That is the closest explanation that can be given to an average human as to how having no citta can be so peaceful. But this is hard even to imagine for a normal human, as I mentioned at the beginning. Those who cultivate jhāna, and get to higher jhānic states, can start seeing that this is true. That is why they cultivate jhāna up to the $8^{\text {th }}$ jhāna (neva saññā nā saññā).

## Nirodha Samāpatti

12. Nirodha samāpatti is succinctly described in a verse in the WebLink: suttacentral: Mahāvedalla Sutta (MN 43), where the difference between a dead body and the body of one in nirodha samāpatti is described: "Yvāyamं, āvuso, mato kālañkato tassa kāyasañkhārā niruddhā paṭippassaddhā, vacīsañkhārā niruddhā paṭippassaddhā, cittasañkhārā niruddhā paṭippassaddhā, āyu parikkhīno, usmā vūpasantā, indriyāni paribhinnāni. Yo cāyaì bhikkhu saññāvedayitanirodhaỉ samāpanno tassapi kāyasañkhārā niruddhā paṭippassaddhā, vacīsañkhārā niruddhā paṭippassaddhā, cittasañkhārā niruddhā patippassaddhā, āyu na parikkhīno, usmā avūpasantā, indriyāni vippasannāni. Yvāyaì, āvuso, mato kālañkato, yo cāyaí bhikkhu sañn̄̄̄vedayitanirodhai் samāpanno-idaì nesaì nānākaraṇan"ti.."

Translated: " $\bar{a} v u s o$, a dead body does not generate any kāya sañkhārā, vacī sañkhārā, or citta sañkhārā; its lifetime expired, and it does not breathe, and the body gets cold with all sense organs dead. But that bhikkhu in saññāvedayita-nirodha samāpatti, even though his kāya sañkhārā, vacī sañkhārā, and citta sañkhārā all have ceased, and does not breathe, his body does not get cold, and all sense organs are kept alive. This, āvuso, is the difference between a dead body and that bhikkhu in nirodha samāpatti."

- Since all sañkhāra are stopped, there is no citta with even the universal cetasika when in saññāvedayita nirodha samāpatti.
- This also clarifies that saññāvedayita means without any saññā or vedanā.

## Getting into Nirodha Samāpatti

13. Not all Arahants can get into nirodha samāpatti. Access to nirodha samāpatti is NOT by taking Nibbāna as the thought object, but via the $8^{\text {th }} j h a \bar{n} a$. As one gets to higher $j h a \bar{a} a$, number of cetasika in a citta get smaller, i.e., citta become less and less "burdened."

- An Arahant has to go through the following sequence to get to nirodha samāpatti. Cultivate all the $j h a ̄ n a \bar{a}$, get to the fourth $j h \bar{n} n a$ samāpatti, and access all arūpāvacara samāpatti up to the neva sañn̄̄ $n \bar{a}$ sañ̃̄ $\bar{n}$. The neva sañña n $\bar{a}$ sañña state is just a step away from stopping the arising of any citta.
- From there, the Arahant can make a determination of how long to stay in nirodha samāpatti, and make the transition from the neva sañña $n \bar{a}$ sañña $\bar{a}$ state to nirodha samāpatti.
- While anāriya yogis can get to the neva saññ̄ā n $\bar{a}$ saññ $\bar{a}$ state, they can make the transition to sañ̃̄̄̄vedayita nirodha samāpatti. Even an Anāgāmī who has cultivated arūpāvacara samāpatti can not get into sañ̃̃āvedayita nirodha samāpatti.
- By the way, this process of getting to nirodha samāpatti is described in the "WebLink: suttacentral: Anupada Sutta (MN 111)" and in the "WebLink: suttacentral: Pañcakañga Sutta (SN 36.19)."

## Nibbānic Bliss Is not a Cetasika Vedanā

14. The "WebLink: suttacentral: Pañcakanga Sutta (SN 36.19)" also clarifies another critical point. If there are no cittt̄ (with saññ̄̄ or vedan $\bar{a}$ ) when one is in saññ̄$v e d a y i t a ~ n i r o d h a ~ s a m a ̄ p a t t i, ~ h o w ~ c a n ~ o n e ~ s a y ~$ that it is the ultimate happiness (Nibbanic bliss)?

- Nibbānic bliss is not a cetasika vedanā, which would belong to this world. I have compared it to the relief one feels when a long-experienced migraine headache finally goes away; see "Nibbāna" subsection.

The above sutta, in the last verse, put it this way: "Thānaim kho panetaim, ānanda, vijjati yaín añ̃atitthiyā paribbājakā evai் vadeyyum: 'saññāvedayitanirodhaì samaṇo gotamo āha, tañca sukhasmimं paññapeti. Tayidamं kim̀su, tayidamं kathamisū ti?

Evaìvādino, ānanda, aññatitthiyā paribbājakā evamassu vacanīȳ̄: 'na kho, āvuso, bhagavā sukhaññeva vedanaì sandhāya sukhasmimं paññapeti. Yattha yattha, āvuso, sukhaì upalabbhati, yahimं yahim taì taì tathāgato sukhasmim paññapetī'" $t i$."

Translated: "It may happen, Ānanda, that Wanderers of other sects will be saying this: 'The recluse Gotama speaks of the sañ̃̄̄̄vedayita nirodha and describes it as pleasure. What is this pleasure and how is this a pleasure?
"Those who say so should be told: 'The Blessed One describes as pleasure not the feeling of pleasure. But a Tathägata describes as Nibbānic pleasure absence of suffering.'"

## Nirodha Samāpatti and Parinibbāna

15. No citta vīthi run in nirodha samāpatti, and bhavañga state is not present either. Life in the body is maintained with kammic energy. No vedanā, saññā, etc. The maximum time in nirodha samāpatti is 7 days. The Arahant can make a determination before getting into nirodha samāpatti, as to how long (up to 7 days) to stay in that state.

- Parinibbāna state is just like nirodha samāpatti. The only difference is that there is no "coming back" to this world upon entering Parinibbāna.
- Therefore, Arahants tend to get to nirodha samāpatti whenever possible, in order to experience the "Nibbānic bliss", and to get away from the "burdensome worldly thoughts." As I said, it is hard for normal humans to imagine this.

## Nirodha Samāpatti and Arahant Phala Samāpatti

16. In other types of samāpatti (other than the nirodha samāpatti), manodvāra citta vīthi will flow continuously. There is no falling to bhavañga or taking an external object with a pañcadvāra citta vīthi. Thus one cannot see, hear, etc. Normally, samāpatti will eventually break on its own or (when one gets good at it) one can pre-set the time to be in samappatti.

- Arahant phala samāpatti is where an Arahant experiences the pabhassara citta, a pure citta with just the universal cetasika, where the saññā cetasika is not contaminated. Nibbāna is the thought object made contact with phassa cetasika and vedana and sañña are based on that (we have no idea about that). One does not hear or see anything there, just like in jhānā samāpatti.
- When an Arahant is not in nirodha samāpatti or Arahant phala samāpatti, his/her citta gets only to the "mano" state, in the sequence that usually ends up in the viññānakkhandha state for an average human; see \#4 of "Pabhassara Citta, Radiant Mind, and Bhavañga."

## We Can Discuss Any Unresolved Issues

17. Hopefully, that should cover the questions raised in the discussion forum under the topics: "WebLink: Nirodha Samāpatti," "WebLink: Difference between "Arahant phala samāpatti" and "Nirodha samāpatti" ?," and "WebLink: Nirodha Samāpatti and Amoha."

- If there are more questions on this and related issues, please ask them under the topic "WebLink: Difference between "Arahant phala samāpatti" and "Nirodha samāpatti"?." I am going to close the other two topics in order not to have too many parallel and related discussions.
- Please also include any references from the Tipitaka, for above descriptions. This post was put together from what I have heard from Waharaka Thero's desanās, and I will also add references as I come across them in the Tipitaka.

### 4.8 Mental Body - Gandhabba

February 11, 2017

- Working of Kammā - Critical Role of Conditions

Deeper discussions on gandhabba can be found in the Abhidhamma subsection:

- Gandhabba (Manomaya Kāya)

## Our Mental Body - Gandhabba

December 26, 2016; revised February 1, 2020; July 14, 2022

## Introduction

1. Grasping the message of the Buddha requires two essential ingredients. (i) It is easier done with a mind that has fewer defilements (kilesa or keles or klesha), and (ii) One needs to go beyond learning mundane interpretations of crucial concepts.

- If those two conditions are satisfied, grasping deeper Dhamma concepts will not be a difficult task. If one can comprehend - not merely to memorize - the key concepts, it becomes easy to avoid getting the "viparīta sañ̃n̄"̄" or the "incorrect impression" of a given concept. [viparīta : [adj.] reversed; changed; wrong.]
- This process gradually leads to the comprehension of "anicca sañ̃̃̄" which is the key to the Sotāpanna stage of Nibbāna.
- In this post, we will start a discussion that will lead to a better explanation of "sañ̃$\tilde{\tilde{a}}$ " (which is one of the five aggregates) generally translated as "perception."

## Mental Body Is Primary and Physical Body Is Secondary

2. We will discuss how we grasp a given concept using any one of many human languages that are in use today.

- It is essential to understand that the mental body (manomaya kāya or gandhabba) is primary initiating all our thoughts, speech, and actions. The physical body that we value so much is secondary.
- While our brains help us grasp what is expressed in a given language (and we have to learn a given language), a gandhabba can understand that message directly - without using a brain or eyes, ears, etc. that are associated with the physical body. The gandhabba - when outside the physical body - can see and hear without using eyes and ears, and grasp what is expressed by thoughts of other beings directly (where allowed by their kammic potential).
- Gandhabbā — and most living beings — communicate among themselves via "sañ̃̃ā." No "spoken language" is involved since they cannot "talk" like we do. See, "Ghost 1990 Movie - Good Depiction of Gandhabba Concept."
- That is somewhat similar to how we experience dreams. We do not use our ears to hear in our dreams. We "perceive" what others say in our dreams. That is the closest analogy to how a gandhabba hears when outside a physical body. Seeing is the same way. In dreams, we don't use our eyes to see; our eyes remain closed when we dream. Both hearing and seeing are done just with the sota and cakkhu pasāda rūpa and the mind.

## Why Do We Highly-Value Our Physical Bodies?

Of course, until a Buddha comes to this world and explains the existence of a mental body, we would not be even aware of that distinction. Even today, scientists believe that the physical body is all we have and that our thoughts arise in the inert brain!
3. We highly value our physical bodies because we enjoy sense pleasures associated with smells, tastes, and body touches.

- However, to experience those three types of sensory contact, our mental bodies need to be trapped inside physical bodies. We pay the price for those sense enjoyments because those physical bodies are subject to rapid and unexpected decay and have relatively short lifetimes around 100 years.
- Furthermore, when the mental body is enclosed or trapped inside a physical body, it loses the ability to see external objects directly, hear external sounds, and recall dhamma (memories/concepts). All six sensory inputs now need to be processed by the brain and converted to a form ("sañ̃ $\bar{a}$ ") that can be grasped by the trapped mental body (gandhabba). For a more in-depth analysis, see "Brain - Interface between Mind and Body."
- The sense of smell, taste, or body touch is unavailable to beings in the higher 20 (Brahma) realms. Those Brahmā have mental bodies (with just a trace of matter) like our gandhabbā. Just like those Brahmā, the gandhabbā cannot sense smell, taste, or body touches, but can "directly see, hear, and grasp concepts" without the aid of a brain when outside a physical body.
- Please contemplate and grasp what is meant by those statements before proceeding further.

## The "Mental Body" Lives Much Longer!

4. Another critical factor is the difference between the lifetime of a physical body and that of a mental body (gandhabba).

- A human gandhabba born at the cuti-patisandhi moment can live for hundreds to thousands of years. Within a given "human bhava," there can be many repeated births as a human with a human body; see "Bhava and Jāti - States of Existence and Births Therein."
- When a physical body dies (and if more kammic energy for the human bhava remains), that gandhabba comes out of the dead body and waits for a suitable womb to re-enter and make a new human body. This process can happen many times during a given human bhava. Each time a different physical body is acquired by the gandhabba, as discussed below.
- Therefore, it makes more sense to focus on the well-being of the mental body (gandhabba) than on the short-lived physical body.

## Some Exceptions To The Above Rules

5. There are a few exceptions to the above process.

- If one commits a ānantariya pāpa kamma (killing a parent, for example), then gandhabba that comes out of a dead physical body "cannot survive." Because of that strong kamma vipāka, it undergoes a cuti-patisandhi moment and will be instantaneously born in an apāya suitable for that strong kamma.
- If one develops Ariya or anāriya jhāna, it also becomes a "good" ānantariya kamma. One will be born in a Brahma realm (corresponding to the highest jhānic state attained) by skipping the remaining human births. However, those who get to brahma realms via anāriya jhāna will return to human or lower realms. Any Ariya (starting with a Sotāpanna) who attains Ariya jhānā will never come back to kāma loka. Of course, a Sotāpanna (Sakadāgāmī) without Ariya jhānā will be reborn in human (deva) realms.
- That is also why an Arahant is not reborn, even if there is kammic energy left over for the human bhava. The gandhabba that comes out "cannot bear" the mindset of an Arahant, and will instantaneously undergo a cuti-paṭisandhi moment. Still, since an Arahant will not grasp a new bhava, they will not be reborn.
- Those above cases - where the human bhava prematurely terminates - are similar to the burning of a heater coil used in an immersion heater, when the heated coil comes out of the water. The heater coil can "bear" the heat as long as it is in the water. But once out of the water, the heater coil will quickly burn out. The physical human body can "bear" any of those states (ānantariya kamma) discussed above. That is why a person who killed their mother will not be born in an apāya immediately; only when the gandhabba comes out of the body will it be burnt, and new birth in an apāya will start.

## Why Are Most People Not Aware of The Gandhabba Concept?

6. Even though there is no discussion about the gandhabba in Buddhaghosa's Visuddhimagga, it is a critical concept in Buddha Dhamma. The Buddha compared a gandhabba coming out of a physical body to a sword coming out of its sheath. The gandhabba is sometimes called a Tirokuddha in Suttā.

- People with abhiññā powers can move the gandhabba out of the physical body at will.
- Some people had cultivated abhiññā powers in recent previous births and can do it at will even though they have less control over the mental body. One can float to the ceiling and watch one's physical body lying on the bed, for example. Furthermore, during heart operations, the gandhabba can come out and view the process from the above, and provide details about it later. See. "Out-of-Body Experience (OBE) and Manomaya Kāya."

7. The gandhabba has only a trace of matter even hard to imagine. It is our mental body or manomaya $k a ̄ y a$.

- To give an analogy: A barely seen dust particle may have millions of atoms. The "material stuff" in a gandhabba is million-fold smaller than an atom! The gandhabba is more like an "energy field."
- This mental body is like a fine mesh spread throughout the physical body with the seat of the mind (hadaya vatthu) overlapping the physical heart.
- If that mental body comes out of the physical body, the physical body becomes as inert as a piece of wood (as a dead body is).

## How Can a "Mental Body" Control a Heavy Physical Body?

8. Let us start by addressing some fundamental objections to the mental body's control of the physical body. First, how can a "mental body" move a heavy physical body?

- A good analogy is to compare it to how a human operator controls a heavy military tank from the inside of that enclosed tank. There, the human operator plays the role of the gandhabba.
- The human operator, of course, does not have enough energy to move the tank. He merely controls the direction of the movement by instructing the on-board computer. The power to move the tank comes from the fuel stored in the military tank.
- In the same way, the mental body (gandhabba) instructs the brain to generate required bodily movements or speech. Here, the brain plays the role of the computer in the military tank analogy. The small amount of energy needed for the gandhabba comes from the kammic power that led to human bhava. The energy required for bodily movements (including speech) comes from our food.

## Details of The "Operator Analogy"

9. In the above analogy, the operator is totally shielded from the external world. He can monitor the outside environment only via the audio and video equipment mounted on the tank. The video cameras, for example, can feed videos to an on-board computer, which analyzes and displays it on a monitor for the operator to see.

- In the same way, our physical eyes send a picture to our brain, which analyzes them, and converts them to a form ("sañ̃̄̄"") that can be "seen" - or comprehended - by the gandhabba inside. So, our brain is the computer that conveys the information to the gandhabba that is really trapped inside the solid physical body; see, "Brain - Interface between Mind and Body."
- The gandhabba accesses the other four sensory inputs the same way, with the help of the ears, tongue, nose, and the body.
- Our memories, plans, etc. (all mental) are also "out there" (in the mano loka) but, of course, cannot be seen. They are collectively called "dhamma"; see, "What are Dhamma? - A Deeper Analysis." Gandhabba accesses those with the help of the mana indriya in the brain, which is the sixth sense input (like eyes for seeing, ears for hearing, etc.), and has not been identified by science yet.
- The mano loka co-exists with the rūpa loka (material world); see, "Our Two Worlds: Material and Mental."

## How Does A Gandhabba Hear When Outside a Physical Body?

10. Another possible question is: "How does the gandhabba see and hear when outside the human body?"

- It is only in the human (and animal) realms that beings communicate via speech (and bodily gestures). In other realms, living beings communicate directly via sañ̃̃̄a, one of the five aggregates (pañcakkhandha). While not all living beings can communicate with all other (it depends on each realm), where it is possible, communications take place via sañ̃̃̄ā generated in one's thoughts.
- This experience is similar to one's experience with dreams. In a dream, we do not "hear" what others say in the same way when we hear speech normally. In a dream, we perceive what they are saying.
- That is how those with abhiññ̄ powers (even a few of us with gati from previous lives where they had such abhiññā skills in recent lives) can communicate with beings in other realms.

## Why Do People Have Different Physical Bodies in Successive Human Lives?

11. It is the "same" gandhabba that is born with human bodies in successive human lives. Then another question may arise, "Why do people look different in successive rebirths?." That is because the physical body in each human birth (within the same human bhava) arises with contributions from the parents for that life.

- Even though the gandhabba brings in his/her gati (habits), āsava (cravings), kilesa (mental impurities), etc from the previous life, the physical body for each birth has significant contributions from the new parents.
- Therefore, the DNA of the physical bodies of two successive lives could be different due to this reason. The building of a new physical body is described in the post, "Buddhist Explanations of Conception, Abortion, and Contraception."
- Even then, a gandhabba needs to match the gati of the parents.

## One Can Travel to Deva or Brahma Realms With the Manomaya Kāya

12. Another interesting piece of information comes from how the Buddha (and others with Iddhi Bala) traveled to deva or Brahma loka with the manomaya kāya. Here the physical body is left behind (the physical body does not die in this case, and is kept alive by the rūpa jīvitindriya). Upon returning, the manomaya kāya can re-enter the physical body.

- Those who attain the fourth jhāna can develop iddhi powers can separate the manomaya kāya from the physical body. Then they can travel far with that manomaya kāya. Just as a sword comes out of its sheath, those with iddhi powers can pull the manomaya kāya out of the physical body.
- Suttā state that the Buddha visited deva or Brahma lokas "within the time that takes a bent arm to be straightened."
- It is also possible for some of those with iddhi powers to travel with their physical bodies. That involves a different mechanism that is not relevant to this discussion.

## Connection to "Astral Travel"

13. Even today, some ordinary people can dissociate their mental body from the physical body and "astral travel." That manomaya kāya can then go to distant places within short times (this is what is called astral travel in the present day; see the Wikipedia article, "WebLink: WIKI: Astral projection."

- A gandhabba is the same as an "astral body" that is described in such accounts; see, for example, "Journeys Out of the Body: The Classic Work on Out-of-Body Experience," by Robert Monroe (1992). There are two sequels to that book, as well as books by others. Accounts in at least some of those books are consistent with the above mechanism.
- Also, the gandhabba can come out of the physical body under stressfil conditions, particularly during heart operations. Many such accounts by a cardiologist have been documented in the book, "Consciousness Beyond Life," by Pim van Lommel (2010).

## Explanation of the "Time Gap" Between Two Successive Human Births

14. Many rebirth account features can be explained by the correct interpretation where the manomaya kāya (gandhabba) inherits many successive (but time separated) physical bodies.

- In rebirth stories, there is always a "time gap" between successive human births ( $j \bar{a} t i)$. That time gap can be several years or at least few years. In between those successive lives, that lifestream lives as a gandhabba, without a physical body.
- In most rebirth stories, the previous human life was terminated unexpectedly, like in an accident or a killing. Therefore, the kammic energy for the human bhava had not been exhausted. And the gandhabba just came out of the dead body and waited for another womb to enter.
- The Buddha told Vacchagotta that the gandhabba survives that intervening time by using tanhh $\bar{a}$ as $\bar{a} h a ̄ r a$. Some gandhabbā can "inhale" aroma from plants, fruits, etc., too.

## Further Information

15. If one has been following - and trying to "live" the moral life recommended in the previous posts in the "Living Dhamma" section - it would be easier to follow the upcoming posts as we will be diving deeper.

- One aspect of realizing the anicca nature is to see the futility of expecting a "future happy life" by trying to make one's physical body the "main focus."
- It is essential to keep one's body in good condition by eating well and engaging in a good exercise program. It is ALSO important to realize that this body will only last about 100 years. On the other hand, the mental body or the gandhabba can last many hundreds of years.
- Thus one should try to improve the condition of the mental body (gandhabba) by cultivating good gati and getting rid of bad gati.
- A detailed analysis of life, in general, is in the "Origin of Life" section.

Next, "Saññā - What It Really Means."

### 4.8.2 Gandhabba State - Evidence from Tipitaka

September 16, 2017; revised September 30, 2107; November 14, 2018; August 31, 2019; July 8, 2022; October 25, 2022

## Introduction

1. I will present extensive evidence from the Tipitaka that the gandhabba state is a necessary feature of human (and animal) bhava. It is not an antarābhava (a state "in-between two bhava"). It is within the same human bhava.

- One's mental body (gandhabba or manomaya kāya) controls the physical body.
- Gandhabba state remains through many successive human births within a given human bhava (which can last many hundreds of years). When a given physical body dies, the gandhabba can enter another womb, when a matching one becomes available. Rebirth stories confirm this account.
- However, the gandhabba concept is different from the idea of a "soul." A gandhabba (manomaya $k \bar{a} y a)$ will keep changing during its lifetime. Furthermore, it will make a drastic change when the human bhava's lifetime end.

## Clear Evidence from Patthāna

2. Those who believe that patisandhi takes place in a womb need to consult the "Patthānapakarana" a section on Abhidhamma Pitaka in the Tipiṭaka.

- Patisandhi is the moment of grasping a new bhava, for example, a human bhava. At that moment a human gandhabba is born.
- That gandhabba gets into a womb later, and that event is okkanti. Human bhava is long, thousands of years, and that is the lifetime of a human gandhabba. During that time, many okkanti events could lead to rebirths with "physical human bodies."
- Paṭisandhi takes place with kamma paccaya and okkanti takes place with sahajāta paccaya.
- We know that birth in the human realm (pattisandhi) is a rare event. However, once in the human realm, a human gandhabba can be reborn with different "physical bodies" (via many okkanti events.) Otherwise, how can we account for so many rebirth accounts by children?

## Background

3. At the Third Buddhist Council, Moggaliputta Tissa Thero proved that there is no antarābhava in a debate with the Mahāyānists. That correct interpretation is in the Kathavatthu of the Tipitaka.

- Most current Thervādins erroneously believe that the gandhabba state is an "antarābhava" state. That is incorrect; see, "Antarābhava and Gandhabba" and "Cuti-Patisandhi - An Abhidhamma Description."

## - A human gandhabba exists within the human bhava.

4. A critical factor contributing to this erroneous belief that the gandhabba state is an "antarābhava" is the inability to distinguish between bhava and jāti. They erroneously believe that paṭisandhi takes place in the womb. But it is evident in the sutta passages above, that it is okkanti (of the gandhabba) that happens, not patisandhi.

- A human existence (bhava) could last hundreds or even thousands of years. Many human births ( $j \bar{a} t i$ ) can occur during that time; see, "Bhava and jāti- States of Existence and Births Therein."
- In rebirth stories, there is always a "time gap" (typically several years) between successive human births ( $j \bar{a} t i)$. Between those successive lives, that lifestream lives as a gandhabba, without a physical body.
- Even during a given human life ( $j \bar{a} t i$ ), the gandhabba may come out of the physical body under certain conditions, see, "Out-of-Body Experience (OBE) and Manomaya Kāya."
- The human bhava that is hard to attain; see "Rebirth - Connection to Suffering in the First Noble Truth." However, there can be many births within a given human bhava until the kammic energy for that human bhava runs out. Otherwise, how can one explain all these rebirth stories, where a human is reborn only a few years after dying in the previous human life?

5. I understand the reluctance of many to discard the deeply embedded idea that gandhabba is a Mahāyāna concept. I used to have that wrong view too. But as I have discussed above, many things will be left unexplained, and there will be many inconsistencies without them.

- Most importantly, rejecting the idea of a gandhabba (i.e., the existence of a para loka) is a micch $\bar{a}$ diṭthi. Thus one cannot even become a Sotāpanna Anugami with that micchā dittthi; see, "Micchā Ditthi, Gandhabba, and Sotāpanna Stage" and "Hidden World of the Gandhabba: Netherworld (Para loka)." So, I would urge everyone to sift through the evidence and make informed decisions.
- More evidence is in many other posts on the site. There are two subsections of the gandhabba state: "Mental Body - Gandhabba" and "Gandhabba (Manomaya Kāya)."
- One can also use the "Search" box on the top right to locate all relevant posts by typing "gandhabba."
- A simple description of human conception is in "Buddhist Explanations of Conception, Abortion, and Contraception." It could be helpful to read that first.

## Three Conditions for Conception per Sutt $\bar{a}$

6. The Buddha has described how three conditions must be satisfied for a conception to occur. That includes how a gandhabba (nominative case singular is gandhabbo; plural is gandhabba$\overline{\text { a }}$ ) descending to the womb. For example, in the WebLink: suttacentral: Mahā Tanhāsankhaya Sutta (MN 38): "..Tiṇnaì kho pana, bhikkhave, sannipātā gabbhassāvakkanti hoti. Idha mātāpitaro ca sannipatitā honti, mātā ca na utunī hoti, gandhabbo ca na paccupațthito hoti, neva tāva gabbhassāvakkanti hoti. Idha mātāpitaro ca sannipatitā honti, mātā ca utun̄̄ hoti, gandhabbo ca na paccupatṭhito hoti, neva tāva gabbhassāvakkanti hoti. Yato ca kho, bhikkhave, mātāpitaro ca sannipatitā honti, mātā ca utun̄̄ hoti, gandhabbo ca paccupatțhito hoti-evaì tiṇnamं sannipātā gabbhassāvakkanti hoti. Tamenaì, bhikkhave, mātā nava vā dasa vā māse gabbhaì kucchinā pariharati mahatā samimayena garubhārami..."

Here is the WebLink: suttacentral: English translation from the Sutta Central website (I have slightly modified it): "..Bhikkhus, the descent to the womb takes place through the union of three things. Here, there
is the union of the mother and father, but the mother is not in season, and the gandhabba is not presentin this case, no descent of an embryo takes place. Here, there is the union of the mother and father, and the mother is in season, but the gandhabba is not present-in this case too no embryo can result. All three following conditions must be met. Union of the mother and father, the mother is in season, and a gandhabba is present. That leads to the formation of an embryo. The mother then carries the embryo in her womb for nine or ten months with much anxiety, as a heavy burden..."

- Even though the venerable Bhikkhus who manage the Sutta Central website do not believe in the concept of a gandhabba, they have at least correctly translated most of the Pāli verse.
- By the way, the Sutta Central site is a valuable resource. It provides access to not only the Pāli version but also translations into several languages. I encourage everyone to contribute to that website to maintain that valuable database.
- One needs to remember that some critical Pāli terms are mistranslated there. Those include anicca as impermanence and anatta as "no-self." Furthermore, translating complex Pāli words like viññāna and sañkhāra as just single words in English can lead to severe problems.

7. In the WebLink: suttacentral: Assalāyana Sutta (MN 93), there is more evidence that for conception to occur, a gandhabba needs to descend into the mother's womb at the right time. That needs to happen within a few days of the parents' union, and it needs to be during the mother's season.

Here, the Buddha explains to Assalayana how the seer Asita Devala questioned seven brahmanā who had the wrong view that they were heirs to Maha Brahm $\bar{a}$. Here are the questions that seer Asita Devala asked:

## "Jānanti pana bhonto-yathā gabbhassa avakkanti hotī'ti? "

- "But do you, sirs, know how there is a conception in the womb?"
"Jānāma mayaì, bho-yathā gabbhassa avakkanti hoti 'ti. Jānāma mayaì, bho - yathā gabbhassa avakkanti hoti. Idha mātāpitaro ca sannipatitā honti, mātā ca utunī hoti, gandhabbo ca paccupaṭ! hito hoti; evaì tinṇaì sannipātā gabbhassa avakkanti hotī'ti."
- 'We do know, sir, how there is conception. There is coitus of the parents, it is the mother's season, and a gandhabba is present; it is on the conjunction of these three things that there is conception.'
"Jānanti pana bhonto-taggha so gandhabbo khattiyo vā brāhmaṇo vā vesso vā suddo vā'ti?."
- "But do you, sirs, know whether that gandhabba is a noble, brahman, merchant or worker?"
"Na mayamं, bho, jānāma-taggha so gandhabbo khattiyo vā brāhmaṇo vā vesso vā suddo vā'ti."
- "We do not know, sir, whether that gandhabba is a noble, brahman, merchant, or worker."

Therefore, the concept of a gandhabba was accepted even by other yogis in Buddha's time.
8. In the WebLink: suttacentral: Mahā Nidana Sutta (DN 15): "..Viññānapaccayā nāmarūpan'ti iti kho panetaì vuttaì, tadānanda, imināpetaì pariyāyena veditabbaì, yathā viññānapaccayā nāmarūpaì. Viññ̄ạnañca hi, ānanda, mātukucchismimं na okkamissatha, api nu kho nāmarūpaì mātukucchismimं samuccissathā"ti? "No hetaì, bhante." "Viññānañca hi, ānanda, mātukucchismim okkamitvā vokkamissatha, api nu kho nāmarūpaì itthattāya abhinibbattissathā"ti? "No hetaí, bhante."

Translated: "..With consciousness as a condition, there is mentality-materiality (nāmarūpa). How that is so, Ānanda, should be understood in this way: If viñ $\tilde{n} a ̄ n a$ were not to descend into the mother's womb, would mentality-materiality ( $n \bar{a} m a$ rūpa) take shape in the womb?" "Certainly not, venerable sir." "If, the descended viñnäna were to depart, would mentality-materiality be generated into this present state of being?" "Certainly not, venerable sir."

- Here, it is clear that by "a viñ̃nāṇa descending to the womb," the Buddha meant the descent of the manomaya kāya (gandhabba), not the paṭisandhi citta. A paṭisandhi viñnäạa cannot come out (depart) of the womb! In \#7 below, we will present evidence that the other four khandhas always accompany viññāna. That includes the rūpakkhandha (and a gandhabba has all five khandhas).
- The Pāli word "Okkanti" is often mistranslated as "rebirth." But it means the "descend" of an already formed manomaya kāya (gandhabba). Rebirth happens (and a gandhabba is born) within a thought moment, at the cuti-paṭisandhi moment; see, "Cuti-Patisandhi - An Abhidhamma Description."

## More Details from Suttā

9. In the WebLink: suttacentral: Kutuhala Sutta (SN 44.9), Vacca asked the Buddha, "..Yasmiñca pana, bho gotama, samaye imañca kāyamं nikkhipati, satto ca aññataramं kāyamं anupapanno hoti, imassa pana bhavaì gotamo kimं upādānasmim paññāpetī"ti? OR "..and, Master Gotama, when a being has given up this body but has not yet been reborn in another body, what food does it consume?"

- The Buddha answered, "..Yasmimi kho, vaccha, samaye imañca kāyaì nikkhipati, satto ca aññataraì kāyà̇ anupapanno hoti, tamahaì taṇhūpādānaì vadāmi." OR "..When, Vaccha, a being has given up this body but has not yet been reborn in another body, I declare that it uses craving as food."
- Thus when a gandhabba leaves one physical and is not yet reborn in another body, its life is sustained by tanh $\bar{a}$ (craving). That is similar to a rūpi Brahma making use of pīti (mental happiness) as food. Both gandhabbā and rūpi Brahmā have subtle bodies (smaller than an atom in modern science; only a few suddhatthaka). However, some gandhabbā can inhale odors for food and become relatively denser.

10. In the WebLink: suttacentral: Sangiti Sutta (Digha Nikāya 33), it is described how a gandhabba can enter a womb in four ways: "..Catasso gabbhāvakkantiyo. Idhāvuso, ekacco asampajāno mātukucchim okkamati, asampajāno mātukucchismim thāti, asampajāno mātukucchimhā nikkhamati, ayaì paṭhamā gabbhāvakkanti. Puna caparaì, āvuso, idhekacco sampajāno mātukucchim okkamati, asampajāno mātukucchismim thā̄ti, asampajāno mātukucchimhā nikkhamati, ayaì dutiy $\bar{a}$ gabbhāvakkanti. Puna caparaì, āvuso, idhekacco sampajāno mātukucchim okkamati, sampajāno mātukucchismimi ṭāti, asampajāno mātukucchimhā nikkhamati, ayaì tatiyā gabbhāvakkanti. Puna caparaì, āvuso, idhekacco sampajāno mātukucchim okkamati, sampajāno mātukucchismimं ṭhāti, sampajāno mātukucchimhā nikkhamati, ayaỉ catutthā gabbhāvakkanti."

Translated: "..Four ways of entering the womb. Herein, bhikkhus, one descends into the mother's womb unknowingly, abides there unknowing, and departs thence unknowing. That is the first class of conception. Another descends deliberately, but abides and departs unknowingly. Another descends and abides deliberately, but departs unknowingly. Lastly, another descends, abides, and departs knowingly."

- That is okkanti (descending of the gandhabba) into the womb (gabba), as described in the Mahā Taṇhāsañkhaya Sutta discussed above.
- Almost the same description is in the "WebLink: suttacentral: Sampasādanīya Sutta (Digha Nikāya 28)." Another relevant sutta is "WebLink: suttacentral: Titthāyatana Sutta (AN 3.61)."

11. It is a Bodhisattva in the last birth that, ".. descends, abides and departs the womb knowingly", the fourth way of entering a womb, mentioned above.

- In the WebLink: suttacentral: Mahāpadāna Sutta (DN 14): "..Atha kho, bhikkhave, vipassī bodhisatto tusitā kāyā cavitvā sato sampajāno mātukucchim okkami. Ayamettha dhammatā."
- Translated: "...Now Vipassī bodhisattva, bhikkhus, left the Tusita realm and descended into his mother's womb mindful and knowingly. That is the rule."
- At the cuti-patisandhi moment in the Tusita realm, the deva died, and a human gandhabba was born, who entered the mother's womb on Earth.
- This sutta describes in detail the last seven Buddhas including Buddha Gotama, who have appeared in our cakk $\bar{a} v a \bar{t} t a$ within the past 31 mahā kappa (great eons). English translation of the Sutta at Sutta Central provides a helpful summary in a table WebLink: suttacentral: English translation of the Sutta at Sutta Central.
- However, in this sutta, gabbhāvakkantiyo and okkami are mistranslated at Sutta Central.

## Patisandhi Viññāṇa Same as Gandhabba

12. In the Bija Sutta (WebLink: suttacentral: Samyutta Nikāya 22.54), it is clear that viññ̄ạna cannot exist or "travel" without the other four aggregates, including the rūpakkhandha: "..Yo, bhikkhave, evain vadeyya: 'ahamaññatra rūpā añ̃atra vedanāya añnatra saññāya añnatra sañkhārehi viññānassa āgatim vā gatim vā cutim vā upapattim vā vuddhim vā virūlhim vā vepullaí vā pañ̃̄āpessāmītti, netaim ṭhānain vijjati."
"Bhikkhus, I say that it is impossible for viñnāna to exist, to grow, and to move at rebirth in the absence of form, feeling, perception, and sañkhāra.."

- Therefore, descending of a patisandhi viññāna to a womb MUST be accompanied by all five khandhas, which is the kammaja kāya of the gandhabba. Viññāna can never exist without a rūpa; even the Brahmā in arūpa realms have hadaya vatthu, a suddhatṭhaka made of cattāro mahā bhūta.

## Antarāparinibbayi State and Gandhabba

13. The first seven samiyojana include kāma rāga, rūpa rāga, and arūpa rāga. In the absence of those three saminyojana, one cannot be reborn in any of the 31 realms in the $k \bar{a} m a$, rūpa, and arūpa loka. For a discussion on samyojana, see, "Dasa Samyojana - Bonds in Rebirth Process."

- When a person dies, the gandhabba comes out of the dead body. If that person had removed the first seven samyojana by the time he died, that gandhabba could not grasp a bhava in any of the 31 realms.
- However, since the last three samiyojana of māna, uddhacca, and avijjā are still there, that person will not be able to attain Parinibbāna either. In other words, gandhabba cannot die either.
- Then "that person" will remain in the gandhabba state until his kammic energy for the human bhava runs out. That is called the "Anatarāpainibbiyāni" state.
- That is described in the "WebLink: suttacentral: Samyojana Sutta (AN 4:131): "..Katamassa, bhikkhave, puggalassa orambhāgiyāni samiyojanāni pahīnāni, upapattipaṭilābhiyāni sam̀yojanāni pahīn̄ni, bhavapaṭilābhiyāni samyyojanāni appahīnāni? Antarāparinibbāyissa."
- The first five samiyojanā are called orambhāgiyā samiyojanā. Rūpa rāga and arūpa rāga are collectively called upapattipațilābhiyā samiyojanā, and māna, uddhacca, avijjā are collectively called bhavapatilābhiyā sam̀yojana.
There are many posts on gandhabba: "Mental Body - Gandhabba," "The Grand Unified Theory of Dhamma," and "Gandhabba (Manomaya Kāya)."

### 4.8.3 Antarābhava and Gandhabba

July 29, 2016; revised January 23, 2020; December 5, 2020; August 22, 2021
Title pronunciation:
WebLink: Listen to Pronunciation: Antarabhava and Gandhabba

## What Is Antarābhava?

1. There are many misinterpretations about the term "antarābhava." Just two to three hundred years after the Parinibbāna of the Buddha, Mahayanists started saying that there is an antarābhava, because they thought gandhabba belonged to an antarābhava.

- At the Third Buddhist Council, Moggaliputta Tissa Thero proved the non-existence of an antarābhava in a debate with the Mahāyānists. That correct interpretation is in the Kathavatthu of the Tipiṭaka.

2. Antarābhava ("antara" + "bhava," where antara is "in-between") means in between bhava or existences. For example, when a living being in the human bhava exhausts its kammic energy for that human existence, it grasps a new existence (bhava) at the cuti-patisandhi moment. Suppose the next existence or bhava is existence as a deer, for this example.

- The transition from a human to deer existence happens in a billionth of a second from the cuti citta (dying moment in the human bhava) to the patisandhi citta (first thought-moment in existence as a deer).
- Therefore, indeed there is no antarābhava. The time-lapse from the cuti citta to the pattisandhi citta is negligibly small; see, "Cuti-Patisandhi - An Abhidhamma Description." That was the point made by Moggaliputta Tissa Thero at the Third Buddhist Council: there is no "antarābhava" between the "human bhava" and the "deer bhava" in the above example.
- Gandhabba is in the same "human bhava" until the human bhava's kammic energy runs out (which could be many hundreds of years, compared to about 100 years of a lifetime for a human). In between successive human births within that human bhava, it is the gandhabba that lives in "para loka"; see, "Hidden World of the Gandhabba: Netherworld (Paraloka)."

## Bhava and Jāti Are Two Different Concepts

3. The critical point is that bhava and $j \bar{a} t i$ are two different things. That is why in Paticca Samuppāda, there is a step, "bhava paccayā jāti." There can be many "jāti" or births as a human within a single human bhava; see, "Bhava and Jāti- States of Existence and Births Therein."

- Living beings in human and animal realms are not born with fully-formed physical bodies. In all other 29 realms, beings are born with fully-formed bodies called opapātika or instantaneous births. Thus a deva or Brahma is born with fully-formed bodies.
- That means a deva or Brahma will have the same body during that bhava, even though that body will change. For them, there are only ONE $j \bar{j} t i \boldsymbol{w}$ whin that bhava.

## Humans (and Animals) Have Many Jäti Within That Bhava

4. In our example above, a human could have kammic energy supporting human existence (bhava) for thousands of years. However, a physical human body can last only for about 100 years.

- The kammic energy of a human bhava is not in the physical body (karaja kāya) but is in the "mental body" or the manomaya kāya of the gandhabba. There is a whole section on the gandhabba at this site; see "Gandhabba (Manomaya Kāya)."
- As explained in the post, "Manomaya Kāya (Gandhabba) and the Physical Body," a gandhabba will inherit "many physical bodies" during a given human existence.
- As discussed in the post, "Ghost in the Machine - Synonym for the Manomaya Kāya?," the physical body is inert, and it is the gandhabba that "gives life" to that inert body.

## $\overline{A y u k k h a y a ~ M a r a n ̣ a ~ a n d ~ K a m m a k k h a y a ~ M a r a n ̣ a ~}$

5. That is why the physical body's death does not necessarily imply a cuti citta, i.e., one may be NOT released from the human bhava. One will lose the human bhava only if it is a "kammakkhaya marana" or death where the kammic energy is exhausted ("marana" in Pail or Sinhala is for death).

- But most human deaths are "āyukkhaya maraṇa," i.e., the end of life for the physical body (here "āyu" means the lifetime of a physical body.) More kammic energy for the human bhava left. There is no cuti citta at that time. In that case, there is no change in the gandhabba at the moment of death of the physical body.
- That gandhabba would come out of the dead body and wait for another womb.
- A housefly lives for about a week or so. But the "fly bhava" may last for thousands and millions of years. When a fly dies, a "fly gandhabba" comes out of that dead body. It will get into an egg laid by another fly and soon be born a fly. That process will repeat an uncountable number of times during that "fly bhava" (or the existence as a fly.)

6. Thus, if it is a "āyukkhaya marana," the gandhabba comes out of that dead body and waits for another womb. It is improbable that a matching womb will appear precisely at the death of a human physical body. In most cases, the gandhabba has to wait months and more likely years before a matching womb becomes available (gati of the gandhabba have to match the gati of the parents).

- Most deaths due to accidents are not due to "kammakkhaya marana," i.e., just the physical body dies. The human in question will be reborn with a new human body at a later time. That is why many rebirths accounts describe death in a previous life due to an accident, murder, etc.
- Of course, one could die with āyukkhaya maraṇa even at old age.

## Mahāyāna Concept of Antarābhava

7. The reason that the Mahāyānists say that there is an antarābhava is that they believe that the gandhabba is not human and is an "in-between state."

- The irony is that many current Therāvadins even refuse to believe the EXISTENCE of a gandhabba simply because they do not want to be seen as taking the side of the Mahāyānists. Those Tharāvadins believe that when a human dies - with kammic energy left in the human bhava - the second human fetus starts INSTANTANEOUSLY in a womb. In other words, the previous human dies at the cuti moment, and a billionth of a second later appears as a new baby in a human womb (patisandhi).
- However, that approach leads to many inconsistencies: (i) Such precise timing is an impossibility. (ii) The step "bhava paccayā jāti" in Paṭicca Samuppāda does not make sense: Is that new human birth a new bhava?. (iii) Patisandhi or grasping a new bhava happens within a thought-moment. However, the birth of a human body occurs via a series of steps described in \#8 below. (iv) As discussed in \#9 - \#11 below, rebirth accounts are also not compatible with rebirth occurring in the womb. (v) There is more evidence from the Tipitaka, as discussed in \#12, \#13 below.

## A Physical Human Body Versus Manomaya Kāya (Gandhabba)

8. According to the Tipiṭaka, a full-pledged human appears via a series of steps: "jāti, sañjāti, okkanti, abhinibbatti, khandhānaì pātubhāvo, āyatānānaì pāṭilābho. See, "Vibhañga Sutta (SN 12.2)" and "Manomaya Kāya (Gandhabba) and the Physical Body."

- Here, $j \bar{a} t i$ is the patisandhi moment, when the kammaja kāya for the new bhava appears in a thoughtmoment. Moments later, that kammaja kāya is augmented by the cittaja kāya and a utuja kāya, and a manomaya kāya (gandhabba) results. That is the sañjāti moment. This gandhabba comes out of the dead body in the previous life (bhava).
- When that gandhabba goes into a suitable womb, that is the okkanti moment. In many sutta, that is described as "viññāna of a boy or a girl descending into a womb." Note that by the time descending into a womb, the sex is already determined. It is a human gandhabba that comes into a womb.
- There is no place in the Tipiṭaka that says paṭisandhi happens in a womb. Rather it says, "... gandhabba okkanti hoti."

9. Many rebirth account features are consistent with that correct interpretation where the manomaya kāya (gandhabba) inherits many successive (but time separated) physical bodies.

- There is always a "time gap" between successive human births ( $j \bar{a} t i$ ). They are always separated by several years or at least a few years. In between those successive lives, that lifestream survives as a gandhabba. The Buddha told Vacchagotta that the gandhabba survives that intervening time by using taṇhā as āhāra. Some gandhabbā can "inhale" aroma from plants, too.
- We all know that human existence is difficult to get; see "Rebirth - Connection to Suffering in the First Noble Truth." If each human birth is a "brand new human existence or bhava," that would be inconsistent since human existence is a rare event.

## Human Births Within the Human Bhava

10. Then another question may arise, "Why do people look different in successive rebirths?" The physical body in each human life (within the same human bhava) arises from the parents' contributions to that life.

- Even though the gandhabba brings in gati (habits), āsava (cravings), kilesa (mental impurities), etc., from the previous life, the physical body for the new life has significant contributions from the parents. The DNA of the physical bodies of two successive lives will be very different due to this reason. For details, see "Buddhist Explanations of Conception, Abortion, and Contraception."

## Gandhabba's Gati Will Change With Time

11. Furthermore, even the mental body of the gandhabba WILL change in the next life. Thus gati (habits), $\bar{a} s a v a$ (cravings), kilesa (mental impurities), etc., will also change as one grows up in a new environment under a different set of influences.

- For example, one could have lived a moral life in the previous birth but may be born into a family of drug addicts due to a bad kamma vipäka. In that case, the new life could drastically change to an immoral life.
- However, in most cases, the successive lives are not drastically different unless one makes drastic changes. If one could attain the Sotāpanna stage, then one will not be born into an immoral family. If one reaches the Anāgāmī stage of Nibbāna, one will never be born a human and born in the Brahma realm.
- On the other hand, even if one is born in a moral family but under the influence of bad friends becomes a drug addict and commits crimes, one is likely to be born into an immoral family in the next birth. If one commits a $\bar{a}$ nantariya p $\bar{p} p a \operatorname{kamm} \bar{a}$ (say by killing a parent), then one will be born in the ap $\bar{a} y \bar{a}$ at death, even if there is more kammic energy left in the human bhava.

## More Evidence From Tipiṭaka

12. Now, let us discuss more evidence from the Tipitaka. During the night of his Enlightenment, the Buddha (or more accurately the ascetic Siddhartha) first attained the "pubbe nivāsānussati ñāna," before attaining the "cutupapāda ñāna" and finally the "āsavakkhaya ñāna." It is the $\bar{a} s a v a k k h a y a ~ n ̃ a ̄ ̣ ̣ a ~ t h a t ~ l e d ~ t o ~ t h e ~$ Buddhahood; see, "The Way to Nibbāna - Removal of Āsavā."

- The first two pieces of knowledge (ñāna; pronounced "gnana";) can be attained even with anāriya $j h a ̄ n \bar{a}$ (with limited capabilities). Both those deal with the ability to look back at previous lives. But with the first one, pubbe nivāsānussati ñāna, one could only look at the previous human births.
- Here, "pubbe" means "previous," "nivasa" means "house," and "anussati" means "recall," i.e., the knowledge to recall successive residences of a given gandhabba. In a given human bhava, a gandhabba could have many different "houses," i.e., physical bodies. Thus with this ñāna, one could look at human births in the past, in multiple human bhava going back to very long times, depending on the yogi's capability.
- The second one, cutupapāda ñāna, extends the capability to see all previous rebirths in any realm. Here cutupapāda (cuti means the end of a bhava and upapāda means birth) refers to all types of rebirths in various realms (niraya, animal, deva, etc.) in the past.

## Connection to Pubbe Nivāsānussati Nāạna

13. Furthermore, the Buddha described how he saw human gandhabbā moving from one physical body to the next (in a single human bhava) with the pubbe nivāsānussati ñāna. He explained that with the following simile: If one is in an upper level of a multi-story building (yes, there were multi-storied buildings at the time of the Buddha) located at a busy junction, one could see people meandering in the streets below.

- Some people stay on the street, sometimes sitting in a bench or standing by the road, etc.; this is analogous to gandhabbā just waiting for a physical body (i.e., a womb).
- Sometimes, a person enters a house and stays there for a long time; this is comparable to a gandhabba in a physical body for a long time, i.e., until old age.
- Other times, a person may enter a house and come out after a few hours. That is comparable to death at a young age.
- Also, a person could enter a house and immediately come out. That corresponds to abortion or an unsuccessful pregnancy.

14. Thus, the pubbe nivāsānussati ñāna is limited to looking at past human lives. That is an excellent example that the Buddha clearly stated the concept of the gandhabba. The cutupapāda ñāna extends the capability to see all previous rebirths in any realm.

- In the Tirokudda Sutta, the gandhabba is called a "tirokudda"; see, "Hidden World of the Gandhabba: Netherworld (Paraloka)."

## Change of Bhava

15. If a human dies at the end of the kammic energy for the human bhava, then the cuti-patisandhi transition happens at the death moment. In the specific example of a human to deer transition, now a "deer gandhabba" comes out of that dead body and has to wait for a matching "deer womb" to become available.

- However, if the human was to become a deva, then a fully formed deva will appear instantaneously in a deva realm, the moment the human dies in a kammakkhaya marana. A gandhabba is involved only in human and animal realms; see, "Gandhabba - Only in Human and Animal Realms."

## Connection to Astral Travel

16. Another interesting piece of information is how the Buddha (and others with iddhi powers [bala]) traveled to deva or Brahma loka with the manomaya kāya (the same as gandhabba.) Here, the physical body is left behind. Yet, the physical body does not die, and is kept alive by the rūpa jivitindriya (kammic energy.) Upon returning, the gandhabba can re-enter the physical body.

- Those who attain the fourth jhāna can develop iddhi powers to be able to separate the manomaya $k \bar{a} y a$ from the physical body and travel far with that manomaya k $\bar{a} y a$. The Buddha stated that just as a sword comes out of its sheath, those with iddhi powers can pull the manomaya kāya out of the physical body. There are many suttā in the Dīgha Nikāya with that exact statement.
- That manomaya kaya can then go to distant places within very short times (this is what is called "astral travel" in the present day; see the Wikipedia article, "WebLink: Wiki: Astral projection." A gandhabba is the same as an "astral body."
- In many suttā, it is stated that the Buddha visited deva or Brahma lok $\bar{a}$ "within the time that takes a bent arm to be straightened."
- Some yogis with iddhi powers can travel with the physical body. Of course, the Buddha did that too. That involves a different mechanism that is not relevant to this discussion.

17. If you have any other questions or unresolved issues about this discussion, please send me a comment (lal@puredhamma.net) or post at the discussion forum. I can add to the post to address such questions.

### 4.8.4 <br> Ānantarika Kamma - Connection to Gandhabba

## June 2, 2018; revised December 14, 2021

1. Ānantarika or ānantariya comes from " $n a$ " + "an" + "antara." That rhymes like "ānantara." There are many words like this, meanings of which remain unclear to many. Pāli is a phonetic language, where some meanings can never be found grammatically.

- Anatta is the negation of "atta" or having refuge/having substance: "na" + "atta" (which rhymes as "anatta"): there is no substance/does not hold any ultimate truth; see, "Anatta - the Opposite of Which Atta?."
- The word $A n a \bar{a} g \bar{a} m \bar{\imath}$ comes from "na" + " $\bar{a} g \bar{a} m \vec{\imath} "$ or "not coming back": "na" + "āgām $\vec{\imath}$ ' rhymes as "anāgāmī." It means "not coming back to the kama loka." He/she will attain Nibbāna from those brahma realms.
- Words like this cannot be analyzed grammatically. This is why current Pāli experts are wrong in interpreting such words (and are unable to interpret many key words).
- By the way, anantara means the opposite of ānantara; see, "Anantara and Samanantara Paccaya."

2. Going back to the word "ānantarika": "An" means food or, in this case, the kamma seed; "antara" means in storage, waiting to bear fruit. Thus, anantara ("an" + "antara") means a kamma seed waiting to germinate. Now, "na" means "not." Therefore, if a kamma can bring vipāka right away, it is "na + anantara" which rhymes like "ānantara." Therefore, ānantarika means "not stored away to come back when conditions are right", i.e., it will bring vipāka "right away."

- When one does a kamma that is NOT ānantarika, its kammic energy is "stored away" at "antara" and can bring suitable kamma vipāka, when suitable CONDITIONS appear. Some kamma vipāka may not be realized for many lives simply because suitable conditions had not appeared.
- However, an ānantarika kamma vipāka SHOULD override any existing other kamma vipāka. Our life experiences (citta vīthi) ALWAYS start with a kamma vipāka (see, "How Are Paticca Samuppāda Cycles Initiated?‘). Therefore, an ānantarika kamma vipāka SHOULD BE enforced right after the kamma is done, even before any other pavutti kamma vipāka (like a seeing, hearing event) is initiated, i.e., instantaneously. There should be no need for a delay until the death of the human. [pavutti : happening, proceeding, fate, event]

3. However, an ānantarika kamma will bring vipāka "right away" ONLY in realms other than the human realm (ānantarika kamma are not relevant in the animal realm). In order to see why that is, let us first look at what types of kamma belong to ānantarika kamma.

- The BAD ānantarika kamma are five: killing one's mother, killing one's father, killing an Arahant, shedding the blood of a Buddha, creating Sañgha bheda. These are listed towards the end of the following link in the Tipiṭaka: WEBLINK: suttacentral: Nānakathā [bheda : [m.] breach; disunion; dissension.]
- Then, there are several GOOD ānantarika kamma: magga phala (stages of Nibbāna) and attainment of (Ariya or anāriya) jhānā.
- Any of these, by definition, should lead to their vipāka right away. However, there is another factor that comes into play for humans, which we will discuss now.

4. All of the five bad annantarika kamma are done by humans. Therefore, we need look at the good annantarika kamma in order to see how they work in other realms.

- For example, if a deva attains the Anāgāmī stage, that deva will instantaneously be born in a rūpāvacara brahma realm. [deva : (lit: the Radiant Ones; related to Lat. deus) : heavenly beings, deities, celestials, are beings who live in happy worlds, and who, as a rule, are invisible to the human eye. They are subject, however, just like all human and other beings, to ever-repeated rebirth, old age and death, and thus are not freed from the cycle of existence and from misery.]
- If a rūpāvacara Brahma attains the Arahant stage, that Brahma will instantaneously attain Parinibbāna, i.e., will cease to exist in the 31 realms.
- In both those cases, the true meaning of the term ānantarika kamma will be enforced, i.e., the vipāka will take place without a delay, instantaneously.

5. In the human realm, the enforcement of an anantarika kamma will be DELAYED due to the following reason.

- The primary "body" that is directly subjected to annantarika kamma vipāka is the kammaja kaya, the "primary body" created by kamma for that bhava at the cuti-patiisandhi moment. All living beings are born with a "mental body" (called "trija kaya" or three bodies) consisting of the kammaja kaya, cittaja kaya, and utuja kaya.
- Brahmā only have trija kaya. Even though devas in the six deva realms have a fourth "physical body" or a "karaja kaya," that is very fine. Thus, the trija kaya (specifically the kammaja kaya) of a deva is not shielded sufficiently and any ānantarika kamma vipāka will take place without a delay.
- This trija kaya in human and animal realms is given a special name "gandhabba."

6. The trija kaya or the gandhabba of a human is shielded by the "dense human physical body." Therefore, the instantaneous enforcement of the annantarika kamma vipāka on the kammaja kaya cannot take place. It will have to wait until the death of the physical body.

- When the physical body of a human dies, the trija kaya (which is given the special name gandhabba) comes out and is no longer shielded by the physical body. At that time, the ānantarika kamma vipāka will be enforced instantaneously.
- This is the reason that the term annantarika kamma vipāka does not apply to a human in the true sense of ānantarika (no delay).
- Therefore, the working of ānantarika kamma wipāka cannot be explained without the concept of gandhabba.

7. Now we can explain many applications of the ānantarika kamma vipāka for humans.

- On the "bad side", for example, one can kill a parent or cause Sañgha bheda and can live a full life. However, at the death of the physical body, one would be instantaneously born in the ap $\bar{a} y \bar{a}$ (even if there is more kammic energy for the current human bhava leff).
- On the "good side", one attaining a jhāna will be born in the appropriate Brahma realm only after death. One attaining the $A n \bar{a} g \bar{a} m \bar{\imath}$ stage will be born in the appropriate Brahma realm only after death, and one attaining the Arahant stage would undergo Parinibbāna (i.e., cease to exist in the 31 realms and immediately get to Nibbāna) only at death.

8. Now, another question may come up regarding the following situation: an Arahant's or an Anāgām $\bar{\imath} \mathrm{s}$ gandhabba may have to come out of the physical body when performing a supernormal action (abhiñ $\tilde{n} \bar{a}$ ). Wouldn't that gandhabba undergo instantaneous transformation at that time?

- The answer is no. The reason is that the gandhabba is still firmly connected to the living physical body (that is they can re-enter that body any time). It is as if the gandhabba is still protected by the physical body; the shielding is still active.
- This explanation holds also in the cases of astral projection and out-of-body experiences (OBE); see, "Manomaya Kāya and Out-of-Body Experience (OBE)." In the case of astral projection or astral travel, it is said that the astral body is kept "attached" to the physical body by "silver cord."

9. Now we can address another related issue. There seems to be two issues that may be difficult to grasp.

- A LIVING Arahant is subjected to kamma vipāka DURING his/her life.
- No kamma vipāka will come to an Arahant AFTER his/her death.

10. As we discussed above, a human Arahant will not attain Parinibbāna at the moment of attaining Arahanthood, because of the presence of the human physical body. Thus, a human Arahant has to wait until the death of the physical body to attain Parinibbāna.

- Now, attaining a magga phala does NOT mean the removal of kammic energies for previous kamma (see below). Therefore, those kamma vipāka will be still effective for the Arahant until death.
- This is why even the Buddha had to suffer from an injury to his toe, had back problems, and also had pains after the last meal.

11. There could be many more kamma vipāka left for an Arahant at the time of death. However, at death, the gandhabba comes out of the dead body and will instantaneously disappear from the 31 realms of this world, i.e., attain Parinibbāna.

- Therefore, any remaining kamma vipāka will NEVER be able to materialize. They are said to have become "ahosi kamma," or "ineffective kamma."
- So, now we have answers to the two questions raised in \#9 above.

12. However, some kamma vipāka other than an ānantarika kamma vipāka will be overcome by attaining a magga phala (at least the Sotāpanna stage), i.e., some kamma vipāka will become ahosi kamma. Of course, all kamma vipāka will become ahosi kamma at Parinibbāna.

- Let us discuss how some kamma vipāka can become ahosi kamma upon attaining stages of magga phala.
- In order to do that we need first to discuss what happens at the Arahant stage.

13. One attains the final stage of Nibbāna (Arahanthood), not by removing or exhausting all kamma vipāka from the past.

- One attains the Arahanthood by cultivating one's pañ̃̃ā (wisdom) to the level where one truly understands the real nature of this world. At that point, one's mind will not be tempted by ANY desire ( $\tanh \bar{a}$ ) to be born ANYWHERE in the 31 realms. That is a CRITICAL POINT to understand.
- Now when the gandhabba comes out of the dead body of an Arahant, it immediately undergoes the cuti (separation from the human bhava), due to the ānantarika kamma vipāka associated with the Arahant phala.
- But now, that lifestream CANNOT grasp a new bhava (patisandhi) anywhere in the 31 realms since there is no "upādāna" in the step of "upādāna paccayā bhava" in the Paṭicca Samuppāda process. This is because there is no taṇh $\bar{a}$ left for any existence in the 31 realms and thus "taṇh $\bar{a}$ paccay $\bar{a}$ upādāna" step will not happen.

14. Therefore, even though there are many good and bad kamma vipāka may be associated with that Arahant, all those will have become "ahosi kamma" (are not able to bring out vipāka), simply because one has lost ALL cravings (taṇhā).

- This is why Angulimāla became free of the $a p \bar{a} y \bar{a}$, even though he killed 999 people. That was not an ānantarika kamma. Only those kamma listed in \#3 above are ānantarika kamma.

15. However, in the case of the death of an Anāgāmī, the gandhabba comes out, undergoes cuti, but can grasp a bhava in the rūpāvacara brahma realms reserved for the Anāgāmiss. Therefore, a cuti-patisandhi transition takes place leading to the rebirth in such a realm.

- But an Anāgām $\bar{\imath}^{s}$ mind would not grasp a bhava anywhere in the $k \bar{a} m \bar{a} v a c a r a ~ r e a l m s, ~ s i n c e ~ h e / s h e ~ h a s ~$ lost all "upādāna" (tied to cravings via taṇhā) for such realms. Therefore, any previous kamma vipāka that could have led to a rebirth in the lower realms will have become ahosi kamma.

16. In the same way, a Sotāpanna's mind would not grasp a bhava in the apāyā. Any "apāyagāmī kamma" he/she had done have now become "ahosi kamma." If one has "apāyagāmī kamma vipāka" waiting to bear fruit (as almost all normal humans do), attaining the Sotāpanna stage will OVERRIDE those kamma vipāka.

- To put it in another way: at the dying moment, a Sotāpanna WILL NOT grasp (upādāna) birth in the apāy $\bar{a}$. His/her mindset has PERMANENTLY changed. Therefore, such kamma vipāka will NEVER materialize even in future lives for a Sotāpanna.
- His/her diṭthi anusaya and dițthāsava have been permanently removed, and the three samyojanā that binds one to the ap $\bar{a} y \bar{a}$ have been cut off, these terms describe the Sotāpanna attainment in different ways; see below.

17. Even though one who attained an anāriya jhāna would grasp a bhava in the appropriate Brahma realm, that is just for that particular cuti-patisandhi transition.

- Since he/she had not attained a magga phala (and thus has not "seen" the futility/danger of "apāyagām̄̄ actions"), a birth in the apa$y \bar{a}$ can happen in the future.
- One with an anāriya jhāna has only SUPPRESSED cravings for kāma loka, but such cravings remain as anusaya: One has not removed avijj $\bar{a}$ to the level of truly realizing the dangers of $k \bar{a} m a$ rāga, by comprehending Tilakkhaṇa. Thus, kāma rāga anusaya remains together with kāmāsava, and one has not broken through the kāma rāga samyojanā. These terms are explained in, "Gathi (Gati), Anusaya, and Āsava" and "Dasa Samyojana - Bonds in Rebirth Process."

18. Therefore, ultimately it is the true understanding of Tilakkhana at various levels that lead to various magga phala.

- However, understanding of Tilakkhana is possible only for one who has cultivated the mundane eightfold path, via discarding ALL 10 types of micchā ditṭhi. [See the 10 types of micch $\bar{a}$ ditṭhi at Mahā Chattārisaka Sutta (Discourse on the Great Forty), Micchā Ditthi, Gandhabba, and Sotāpanna Stage, Ten Immoral Actions (Dasa Akusala), and Three Kinds of Ditthi, Eightfold Paths, and Samadhi] [WebLink: suttacentral: 62 views at WebLink: suttacentral: Brahmajala Sutta]
- To put it another way, attaining magga phala at various stages is associated with getting rid of dasa akusala at various levels.
- Micchā dittthi is the worst of the dasa akusala, and at the root of miccha ditṭhi is are the 10 types of micch $\bar{a}$ ditṭhi. The second level of micchā diṭthi is removed with the comprehension of Tilakkhaṇa (that is when one starts on the Noble Eightfold Path).
- All wrong views (ditthi) are removed when one attains the Arahanthood. When all wrong views are removed, all other nine akusala are prevented. However, abstaining from other dasa akusala is necessary to remove wrong views, so they are all inter-connected.
- I keep repeating this, but I am not sure how many pay attention to these basic facts. Many people seem to waste time trying to comprehend Tilakkhana, before getting rid of the $\mathbf{1 0}$ types of micchā ditthi.

### 4.8.5 <br> Mental Body (Gandhabba) - Personal Accounts

## February 5, 2017; revised April 25, 2020

The evidence comes in three general types of accounts, as we discuss below.

1. Many people have at least briefly experienced an "out-of-body experience" (OBE), where the mental body just comes out of the physical body, and one sees one's own physical body from above.

- In his book, "Travels", the famous author of the Jurassic Park, Michael Crichton (1988, p. 307) mentions his ability to "shift my awareness out of my body and move it around the bedroom", and he says, "..I didn't think anything about it... I assumed that anybody could do it..".
- A similar account has been given by a woman recently who also thought that "everybody could do it": WebLink: ABCNews: Woman Has 'Out of Body' Experiences Whenever She Wants.
- Robert Monroe (see \#6 below) says mental bodies of most of us come out and wander around even without us realizing it. Sometimes, we are in a dream state (we believe) and then feel a "sudden fall" and wake up. He says this "dream state" is actually the mental body wandering around and we feel the "sudden fall" when the mental body re-enters the physical body.
- So it is not correct to assume that a gandhabba or the mental body as a "ghost." In a sense, it is a better representation of us than our physical bodies that are discarded after about $\mathbf{1 0 0}$ years, because it may live for many hundreds of years until the kammic energy for this human bhava is exhausted.

2. There are other - more dramatic - reported cases of OBE and some of them involve "near-death experiences" (NDE), where the person was presumed to be dead but revived later on. During that time, the mental body usually "went through a tunnel" to another dimension, but then came back to re-enter the body.

- Of course, there are many books written on OBE and NDE. "Consciousness Beyond Life", by Pim van Lommel (2010) gives detailed accounts of case studies of OBE and NDE experienced by people undergoing heart operations, some of whom were declared dead but came back to life.
- A third category involves the rebirth accounts from children, who were killed in an accident in the previous life. They can recall that incident from the previous life, where the mental body came out of a physical body and they watched the accident scene from above. They have provided accurate accounts of that scene. I will discuss one such account at the end of the post.

3. The experiences described in the accounts below need to be evaluated with the following nuances (subtle aspects) in mind. Once the mental body comes out, first it can be an exhilarating experience to be free of the heavy physical body. So, most people describe it as a "liberating experience."

- However, without the physical body, one cannot enjoy smells (in many cases), the taste of food, and also bodily pleasures. Thus, if one had to live without a physical body for a long-time, one could become frustrated, and one could suffer. This is the status of a gandhabba in between two consecutive human births.
- Therefore, even though it could be a "liberating experience" to come out from the shackles of the physical body for a short time as in OBE and NDE, it may not be that pleasant to stay in that state state if one has not given up the desire for sensual pleasures since one cannot "enjoy" sense pleasures without a physical body.

4. The other point to keep in mind is that many experiences (especially those from the Western world) are from people who have other religious backgrounds. In a way, this is good because we can get an unbiased opinion. But, unfortunately, they have a different bias due to their own religious beliefs. For example, many people say they visited heaven, which in reality could be a "good locality" of the gandhabbā.

- It must be kept in mind that gandhabba world is not just "one place", even though physical locations cannot be assigned. It is much better to say that "good gandhabba"" with higher moral values hang out together (such localities may be referred to as "heaven"), and "bad gandhabb $\vec{a}$ " segregate away from those. And there can be many varieties in between.
- It is similar to the case of people with similar gathi hanging together.
- So, it can be thought of as there being many "gandhabbā worlds" in the nether world or para loka.
- Some of the gandhabbā have very fine bodies, but others may have more dense bodies (still much less dense than our bodies). Some may "look" like humans, but some may have started already transforming to animal forms (due to types sañkhāra they cultivate) and may look half human and half animal. It is a very complex world.

5. Robert Monroe has written several books about the OBE experiences of himself and others. Two of his books are: "Journeys Out of the Body: The Classic Work on Out-of-Body Experience" and "Far Journeys."

- Here is how he describes his first OBE experience (there are many other youtube videos on his accounts):

## WebLink: Youtube: Robert Monroe explains his first OOBE

6. Here is an interesting documentary, "Beyond Our Sight - documentary." Thanks to Mr. Johnny Lim from Singapore for sending me this video.

## WebLink: YouTube: Beyond Our Sight - documentary (52')

7. In their book, "Soul Survivor: The Reincarnation of a World War II Fighter Pilot", by Bruce and Andrea Leininger detail the amazing story of their son's recount of a past life, mentioned in the above video. There the little boy vividly describes how he died in his previous life. This falls into the third category that I mentioned in \#1 above. Here is a ABC News report on the story:

WebLink: YouTube: Reincarnation - Airplane Boy (abc Primetime)

- Another youtube video link was sent to me by a reader from Sri Lanka who did not want to be identified. This video is in Sinhala and is the account of a boy. This boy was an adult in the previous life and was killed in an accident. He describes how his mental body came out of the dead body and how he watched from above the scene of the accident.
- The actual account starts at 3 minutes into the video.

WebLink: YouTube: wenasa (Video not avaliable 21 August 2018)
Several years later (during which time he was in the gandhabba world or para loka), he was born to a family in a different village in Sri Lanka.

- As is evident from the above two stories, successive births within a given bhava are likely to be- but not always - in similar geographic regions because of the tendency to match one's gathi.

8. Some scientists believe that these are mind-made hallucinations. Here is a researcher's account of his investigations into that possibility. He started the project to prove that it is a hallucination but ended up convincing himself otherwise.

## WebLink: YouTube: Larry King Interview with Melvin Morse

9. There are some people trying to make money saying they can teach how to do "astral projection." Astral projection is another name for OBE.

- This is not something that can be taught. So, don't waste money.
- The only way to do it systematically is to cultivate Ariya or anāriya jhānā to the fourth jhāna. Then one can practice further and learn how to remove the mental body from the physical. The Buddha compared this to removing a sword from its sheath.
- However, most people who can naturally do it get it as a sansāric habit. They are likely to have cultivated $j h \bar{a} n \bar{a}$ and developed abhiñ̃̃ $\bar{a}$ powers in recent past lives.
- The most common situation is when the mental body just pops out of the physical body in highly stressful situations where the stress is affecting the heart. The hadaya vatthu of the gandhabba overlaps the physical heart, and thus when the heart is stressed out, gandhabba may just pop out of the physical body.

10. The idea of a mental body controlling the physical body discussed in the previous post in this section ("Our Mental Body - Gandhabba.")

By the way, the mental body is not all mental. It has a fine material component at suddhatthaka level; see, "Gandhabba (Manomaya Kaya)- Introduction."

- There are many reported instances of this mental body coming out of the physical body, and I have mentioned some of those in other posts. But I would like to have some of that evidence in one place so that one can get an idea of why it is not an alien concept.
- But there are many made-up stories too. So, my advice is not to get carried away too much about watching these youtube videos. That is a waste of time. I just wanted to provide some idea that the mental body (gandhabba) is real.
- More information at, "Mental Body - Gandhabba," "Gandhabba (Manomaya Kaya)," and "The Grand Unified Theory of Dhamma."

### 4.8.6 Abnormal Births Due to Gandhabba Transformations

## September 30, 2017

1. Modern science and technology, especially the internet, is a very useful resource to understand and confirm some concepts in Buddha Dhamma. All of us can now access rare events in remote places, that we would never have known without the internet.

- I started thinking about this post when I received a youtube video of a "strange looking animal" sent to me by Mr. Tobias Große from Germany. Then I did a Google search and found that there are many such "abnormal" human and animal birth reports from all over the world.
- Such observations can be explained with the concept of gandhabba, which is an essential concept for describing the life in the human and animal realms. I have two sub-sections at the website devoted to the important concept of gandhabba: "Mental Body - Gandhabba" and "Gandhabba (Manomaya Kāya)."
- Of course, gandhabba is NOT a Mahāyāna concept, see, "Gandhabba State - Evidence from Tipitaka," and without that there will be many inconsistencies, including the observed fact that there are gaps of several years in between successive human rebirths; see, "Bhava and Jāti- States of Existence and Births Therein."

2. As we have discussed in those posts, a human bhava (existence) could last for many hundreds or even thousand of years. Within that time, one could be born with a human body many times. When one is born with a human body and when that "physical body" dies, the "mental body" or the gandhabba state could have many hundreds of years of life left.

- Thus, unless the kammic energy for that "human bhava" has been exhausted, the mental body (gandhabba) comes of the dead physical body unharmed. Since we cannot see that very fine body, it is
said that the gandhabba lives in "paralowa" (other world, sometime called nether world), compared to "this world" that we can see.
- That gandhabba has to wait for a suitable womb to become available, and at that time it is pulled into that "matching womb." This is why there is normally a gap of several years exists in between successive rebirths per rebirth stories; see, "Evidence for Rebirth."

3. During one's lifetime, the kammaja kaya of the gandhabba changes, and sometimes those changes can be drastic. If one kills a parent, that kammaja kaya does not change instantly only because it is "enclosed" in the dense physical body.

- But when the physical body dies, the gandhabba is automatically kicked out of that body, and will instantly transform to a kamma kaya suitable for a being in an apāya. Therefore, even if the original gandhabba had more kammic energy left for the human bhava, a cuti-patisandhi to a "hell being" will occur, and he/she will be instantly born in an apāya.
- There are such ānantariya kamma that can instantly lead to births in rūpa and arūpa loka: If one had cultivated jhāna, then when the gandhabba comes out of the dead body, it will instantly undergo a cutipatisandhi transition to a brahma and will be born instantly in the corresponding brahma realm.

4. Sometimes, a human gandhabba starts making the transformation to another bhava while in the gandhabba state after coming out of a dead body. This happens especially for those who are engaged in highly immoral deeds.

- For example, if one is cultivating "animal gati" (thinking and behaving like an animal), then the gandhabba will continue to generate such "animal sañkhāra" after coming out of the dead body, and may gradually transform to an animal while in the gandhabba state. Then, if a matching animal womb comes available, that half-human creature will be pulled into that womb.
- Now, by "matching womb" what is meant is the mental state of the mother at that time. She could be a "good moral person", but if for some reason her mental state at that time became "abnormal", then it could become a matching womb for that creature, who could be half human, half animal.
- Depending on how far that transformation had taken place, that gandhabba could be pulled into a human womb or an animal womb, i.e., be born to a human or animal mother. Here is the video sent to me by Mr. Tobias Große from an animal birth that looks partly human:
WebLink: gmx.net: Halb Mensch, halb Tier: Kuh sieht aus wie Fabelwesen

5. The following are some more examples of (both abnormal human and animal births) available as youtube videos (of course, in some cases "photoshop" may have been used; there are many on the internet and I have picked a couple that appear to be genuine):

WebLink: Youtube: Half Animal Half Human Found In Real Life
WebLink: Youtube: South African Sheep Births Half Human Half Beast (Video not avaliable 21 August 2018)

- Here is more information on the above "beast":

WebLink: Youtube: HALF HUMAN-HALF BEAST CREATURE SENT BY THE DEVIL

- Thanks to Mr. C. Saket from India for the following video. Some abnormalities shown there could also be due to gandhabba transformation together with bad kamma vipāka:

## WebLink: Youtube: 10 REAL People With Shocking Genetic Mutations

- Please send me any good videos that you come across, so that I can add them to this collection.

6. Anything and everything in this world happens due to a cause, or more correctly due to multiple causes. The foundation of science is causes and effects. If things happen arbitrarily, then there is no way to predict the outcome of a scientific experiment.

- But modern science deals mainly with the properties of material objects. Also, material objects only have a short "history"; a building or a car is assembled and eventually destroyed. Thus it is easier to see the link between causes and effects.
- But living beings have minds and each living being has a past that extends to the deep past (due to rebirth). So, the causes that bring about results now, may have been done in the deep past. That is why it is hard to see the connection between causes and effects for living beings.

7. My late Noble teacher, Waharaka Thero, has mentioned in several desanās how he saw such "gandhabba transformations" while in samādhi.

- When an immoral human dies, the gandhabba that comes out will keep cultivating those 'bad sañkhāra," and if they get strong enough the fine body of the gandhabba will start changing to match those "sañkhāra" and thus "gatí"; see, "Gati and Bhava - Many Varieties" and "Gati to Bhava to Jāti Ours to Control."
- For example, he had seen how a human gandhabba transforms to a bird. It started with the head getting longer and forming a beak. The rest of the body then changed gradually from top to bottom. When I heard that, those Egyptian pictures seen on pyramids of "bird men" with bird heads immediately came to my mind.

8. By the way, even some normal people can see those gandhabbas with fine bodies; this is due to "puñña $i d d h i$ " due to some past good kamma.

- There are different types of "puñña iddhi." Surviving without food and water is known as "breatharianism" and has been documented or claimed by many. an extreme case of a Hindu yogi, Prahlad Jani, is baffling to many modern scientists:

## WebLink: Youtube: Snippet from "IN THE BEGINNING THERE WAS LIGHT" - Yogi Prahlad Jani

- Thanks again to Mr. C. Saket for sending this video and the related comments above.
- The ability to have very detailed memories from this life is also such a "puñña iddhi," see, "Recent Evidence for Unbroken Memory Records (HSAM)", where a woman describes her memories from this life going back to many years. The level of detail she can remember is amazing.
- In fact, I am beginning to believe that in those early Buddhist Councils (Sangāyana), where Arahants recited the whole Tipitaka, they were likely to have VERIFIED then by actually re-visiting each sutta's delivery by iddhi power. When you listen to the woman describing past events in such detail, it is as if she is re-visiting that event.
- The ability of some people to see gandhabbas with fine bodies could be responsible for the misty "ghost figures" like the ones that we see in popular culture (in books, movies and on the internet).

9. A human gandhabba is a finer version of a human. When a human, say a middle aged person dies, the gandhabba that comes out looks very similar to that person (if one can see it). Then with time it will show normal changes that could be expected of a human: His hair and fingernails will grow, for example. In a few years, that gandhabba WILL look like ghost with long hair and long finger nails. Imagine what will happen to one's human body if one doesn't cut one's hair, finger nails, or shave. One will look like a ghost. That is why some gandhabbas look like ghosts, according to Waharaka Thero.

- Some of them get a bit denser by inhaling aroma and may become easier to see for those people with "puñña iddhi" that we mentioned earlier. However, when that gandhabba is pulled into a womb, it will shed all "added" mass (utuja kaya), and only the basic "kammaja kaya" with the hadaya vatthu and the pasāda rūpa (combined to be smaller than an atom in modern science) will merge with the zygote (the single cell formed by the union of mother and father) that is in the womb.
- Now that "new baby" will have a different body than the body in the previous life, because it have many features inherited from the parents (via DNA) in the zygote.
- But it is essentially the evolved kammaja kaya formed at the cuti-patisandhi moment that is still there for that next "birth" in the human world. Thus while the gandhabba keep its kammaja kaya, but the physical body will be influenced by the parents.
- This is discussed in detail in, "Buddhist Explanations of Conception, Abortion, and Contraception."

This world is much more complex than we realize, and the "paralowa" of the gandhabbas is even more complex; see "Hidden World of the Gandhabba: Netherworld (Paraloka)."

### 4.8.7 Cattāro Āhāra for Mental Body or Gandhabba

## February 11, 2017

1. As we have discussed in this subsection and elsewhere at the site, we have two bodies: the physical body (karaja kāya) and mental body (gandhabba). Both these bodies need food to survive.

- The food we eat to sustain the physical body is called kabalink $\bar{a} r a ~ a ̄ h a ̄ r a . ~$
- Our mental body consumes three more types of food: phassa, mano sañcetanā, and viññāna.
- The four types of food are called "satara āhāra." We will see that all four can be food for the mental body (gandhabba).

2. Food is essential for all living beings. If one stops taking kabalinkāra āhāra (which includes water) for about seven days or so, one's physical body will die.

- However, unless one is an Arahant, one will be reborn somewhere in the 31 realms upon death, because one's mental body (gandhabba) will not die.
- We cannot stop suffering by committing suicide, i.e., via the death of the physical body. The mental body needs to die in order to stop the rebirth process.

3. If one can stop giving food to the mental body for seven days, it will die, and one will never be reborn anywhere in the 31 realms, i.e., one will attain Nibbāna; then that Arahant will not be reborn upon death of the physical body. Thus the unimaginable suffering associated with the rebirth process will be over (as I discussed in the beginning of this section on "Living Dhamma," stopping the rebirth process seems scary and it should not be contemplated when one is starting on the Path).

- This is why in the Mahā Satipattthāna Sutta, the Buddha said that if one can practice the sutta without making any mistakes, one will attain Nibbāna in seven days.
- Let us discuss how this is possible.

4. There are two conditions that must be satisfied to generate a new mental body at the cuti-patisandhi moment: (i) There must be a kamma bija available to grasp, and (ii) one's mind must willingly grasp that kamma bīja.

- We all have accumulated numerous kamma bīja, so the first condition is always satisfied for anyone. Therefore, it is the second condition - grasping a new existence (bhava) at the cuti-patisandhi moment that can stop the rebirth process.
- At the beginning, we need to just focus on not grasping a bhava in the four lowest realms (apāyā).
- As we have discussed before, this grasping of a new bhava is not done consciously, but automatically.
- For example, a Sotāpanna's mind will not grasp a bhava in the apāy $\bar{a}$; A Sakadāgām $\bar{\imath} \mathrm{s}$ mind will not grasp a human bhava in addition, an Anāgām $\bar{\imath}$ will not grasp a bhava in the kāma loka, and an Arahant will not grasp any.

5. There is another way to look at this mechanism of grasping a new bhava at the cuti-patisandhi moment. In the upapatti Pațicca Samuppāda (PS) cycle, a certain bhava is grasped at "upādāna paccayā bhava."

- When we trace the cycle backwards, we see that it starts at "avijjā paccayā sañkhāra" and "sañkhāra paccayā viññāna."
- The grasping (upādāna) happens only if that PS starts with avijjā and generates an appropriate viññāna for grasping that bhava.

6. Therefore, it is important to realize the two roles that viññaña play. We can understand this by examining how a Sot $\bar{a} p a n n a$ avoids birth in the apa$y \bar{a}$.
(i) If one cultivates "apāyagāmī viññanna" by doing extremely hateful/greedy actions, viññanna will keep GENRERATING kamma bīja (energy) that fuel a new bhava in the apāy $\bar{a}$. When one attains the Sotāpanna stage, one will automatically stop generating any more such kamma bïja, but those ones that had been created will be there.
(ii) However, after someone attains the Sotāpanna stage, his/her mind will not start a upapatti PS cycle with an apāyagāmī viññanna, because that level of avijjā has been removed. That type of viññāna has been "killed" or removed from her mind and is no longer able to grasp a new bhava in the apa$y \bar{a}$, even though apāyagāmī kamma būja will still be there.
7. A good example from the Tipitaka is Ven. Angulimāla. He killed almost 1000 people and definitely had accumulated enough strong kamma bīja to be born in the apāy $\bar{a}$.

- But at death his mind was devoid of that kind of bad viñ̃ān̄a to grasp any type of bhava in the 31 realms. Therefore, he was not reborn anywhere in the 31 realms.

8. Therefore, the word viñ̃ñạna represents much more than just consciousness: It can be "food" for accumulating new kamma bïja AND also "food" or "fuel" that leads to grasping a new bhava.

- Viññāṇa is opposite of ñāna (pronounced "gnana") or wisdom. When one cultivates ñāna, one's avijjā is reduced and certain types of viññanna are concomitantly reduced.
- Pronunciation of viññāna:

WebLink: Pronunciation of Viññāna

- Pronunciation of $\tilde{n} a ̄ n a:$

WebLink: Pronunciation of ñāna

- There are many types of viññāna; see, " ${ }^{2}$. Viññāña (Consciousness) can be of Many Different Types and Forms."
- As one attains the four stages of Nibbāna, avijj $\bar{a}$ is removed in four stages and the strength of all types of viññāna are accordingly reduced (removed) and all are eventually removed at the Arahant stage.
- This pure level of consciousness - without any defilements and thus any cravings - is called pabhasvara citta; see, "Pabhassara Citta, Radiant Mind, and Bhavañga."
- In other words, an Arahant can experience the world with a purified mind that is not blemished by even a trace of greed, hate, or ignorance. Therefore, at death, his purified mind will not grasp any existence (bhava).

9. As long as one has viññāna, one will be born somewhere in the 31 realms. This is why viññāna is called a type of food for the mental body.

- As one proceeds at successive stages of Nibbāna, one will crave for less and less things in this world. For example, at the $A n \bar{a} g \bar{a} m \bar{\imath}$ stage, one would have lost all cravings (and hopes) - or viññāna - for any type of sensual pleasures.
- It must be noted that the birth in the $a p \bar{a} y \bar{a}$ is not due to cravings to be willingly born there (no one has such cravings), but due to immoral deeds one one had done to enjoy sensual pleasures AND has not yet removed that mentality (desire to enjoy sense pleasures at any cost) or bad viñ̃̃āṇa.

10. Any type of viññāna is cultivated by thinking, speaking, and acting in such a manner. Thinking, speaking, and acting is done based on mano, vacī, and kāya sañkhāra which arise due to sañcetanā ("san" + "cetana"" or defiled intentions; cetanā is pronounced "chethanā").

- For example, an alcoholic regularly thinks about drinking, likes to speak about it and likes to drink. The more he does those, the more that viññāna will grow.
- It is easy to see how a gambler, smoker, etc grow their corresponding viññanna the same way.
- Having such viññāna can lead to other immoral activities and corresponding viñ̃āṇa, say tendency to lie, steal, and even murder.
- Therefore, all activities done in cultivating such viñ̃āana are based on mano sañcetanā. That is why mano sañcetanā are also food for the mental body.

11. The triggers for such sañcetana are sense contacts or phassa. These are not mere sense contacts, but those that give rise to "samphassa ja vedanā."

- Phassa is a sense contact. When one just looks at something that is phassa. But if one looks at it with greed or hate (and ignorance) in mind, that is samphassa ("san" + "phassa"); see, "Vedanā (Feelings) Arise in Two Ways."
- This is why sense contacts or phassa (more precisely samphassa) are food for the mental body. Such sense contacts can lead to thoughts about bad actions and can give rise to future kammaja kāya.
- Therefore, one needs to avoid sense contacts with sense objects that one has taṇh $\bar{a}$ for. We need to remember that tanhh $\bar{a}$ is attachment to something via greed or hate; see, "Tanhā - How We Attach Via Greed, Hate, and Ignorance."
- So, it is a bad idea for a gambler to visit casinos, an alcoholic to make visits to bars, etc. Furthermore, one needs to avoid friends who encourage such activities too.
- It is best to avoid any type of contacts that can lead to sense exposures that provide "food" for the mental body, i.e, get us started thinking about those bad activities.

12. Now we can see how those three types of food act in sequence to feed the mental body: Sense contacts (phassa) can lead to mano sañcetanā, which in turn cultivate viññāna.

- Such sense contacts (samphassa) automatically start mano sañkhāra; then we start thinking and speaking about those favorite activities, i.e., we start vacī sañkhāra (consciously think about them and even speaking about them). Then when the feelings get strong, we will start doing them (using kāya sañkhāra).
- It is important to realize that mano sañkhāra, vacī sañkhāra, and kāya sañkhāra are all generated in the mind: Vacī sañkhāra are conscious thoughts that can lead to speech; kāya sañkhāra are conscious thoughts that move the physical body.
- All three types of sañkhāra arise due to mano sañcetanā. We cannot think, speak or do things without generating appropriate mano sañcetana $\overline{\text { a }}$.

13. As we discussed before, the physical body is just a shell; it is controlled by the mental body (gandhabba).

- Sense contacts come through the physical body. When we get attached to them, we generate mano sañcetanā and think, speak, and act accordingly, generating various types of viññāna.
- Kabalinka āhāra or the food that we eat are experienced through one of the six sense contacts (tongue or jivha pasāda). If we eat food with greed, that also lead to mano sañcetana and corresponding "greedy viññāna." Therefore, kabaliñkāra āhāra can also be a food for the mental body. More details can be found at "Āhāra (Food) in Udayavaya Ñāna."
- That is why all four types can be food for the mental body.

A deeper discussion on the four types of food (āhāra) is in the post, "Āhāra (Food) in Udayavaya Ñāna."
Next, "Micchā Ditthi, Gandhabba, and Sotāpanna Stage",..
4.8.8 Micchā Diṭ̣̣hi, Gandhabba, and Sotāpanna Stage

May 6, 2017; Revised September 24, 2019; May 16, 2021; May 21, 2022

## Two Eightfold Paths

1. There are two Eightfold Paths: mundane and Noble. See, "Mahā Cattārīsaka Sutta (Discourse on the Great Forty).."

- First, one starts on the mundane Eightfold Path by removing the ten types of micchā dittthi or wrong views.
- Only then one's mind can see the "bigger picture," and one could comprehend the Three Characteristics or Tilakkhana (anicca, dukkha, anatta) of this world of 31 realms. When one starts comprehending Tilakkhana, one starts on the Noble Eightfold Path.
- Once one comprehends Tilakkhaṇa to some extent, one becomes a Sotāpanna. Subsequently, one can attain higher stages of Nibbāna.

2. Many people today have at least some of the 10 types of micch $\bar{a}$ ditthi and believe that they are on the Noble Path. But it is clear from above that some may not even be on the mundane Path.

- Just by saying to oneself that one believes in them, one cannot get rid of the 10 types of micchā ditṭhi. One must be convinced of it, and that conviction comes by learning Dhamma, the true nature of this world.
- This post focuses on the para loka and gandhabba because many Theravadins incorrectly assume that gandhabba is a Mahāyāna concept.

## The Ten Types of Micchā Diṭthi (Wrong Views)

3. The 10 types of micch $\bar{a}$ ditṭhi are listed in many suttā, including the WebLink: suttacentral: Mah $\bar{a}$ Cattarisaka Sutta (MN 117) and Pathama Niraya Sagga Sutta (WebLink: suttacentral: Añguttara Nikāya: AN 10.211): "Natthi dinnamं, natthi yittham, natthi hutaím, natthi sukatadukkaṭānamं kammānaì phalaì vipāko, natthi ayà̀ loko, natthi paro loko, natthi mātā, natthi pitā, natthi sattā opapātikā, natthi loke samanabrāhmañā sammaggatā sammāpaṭipannā ye imañca lokaì parañca lokaì sayaí abhiññā sacchikatvā pavedentī'ti." Translated, the wrong views are:

- Giving (dāna) has no merits
- being grateful and responding in kind (for what others have done for oneself) has no merits
- respecting and making offerings to those with higher virtues has no merits
- We enjoy/suffer in this life not due to kamma vipāka, but they "just happen."
- this world does not exist
- para loka or the world of gandhabba does not exist
- there is no special person as a mother
- no special person as a father
- there are no opapātika (instantaneous) births
- there are no Samana brahmana (basically Ariyā or yogis) with abhiññā powers who can see both this world (imanca lokam) and para loka (paranca lokam)

## Micchā Diț̣hi (Wrong Views) About the Gandhabba

4. I have highlighted three types of micchā ditthi that are common. They are somewhat interrelated. But the one about the gandhabba is a common micchā ditṭhi. Even those who believe themselves to be "devout Buddhists" seem to have that wrong view. They believe that the Buddha did not teach about gandhabba or the para loka.

- There is WebLink: suttcentral: Tirokutta petavatthu in the Petavatthu in the Khuddaka Nikāya (KN). This has been translated to English (not very good), but one can get the idea: WebLink: accesstoinsight: Tirokudda Kanda: Hungry Shades Outside the Walls.
- The following verse in "15. Mogharājamānavapucchāniddesa" of "Cūlaniddesa" of the Tipiṭaka clearly states that para loka is part of the "manussa loka" or the "human world:" "Ayam loko paro lokoti. Ayam lokoti manussaloko. Paro lokoti manussalokam ṭhapetvā sabbo paro lokoti-ayam loko paro loko."
- Also, see "Antarabhava and Gandhabba."

5. In many suttā, including WebLink: suttcentral: Mahāsaccaka Sutta (MN 36) and WebLink: suttcentral: Bodhirājakumāra Sutta (MN 85) the Buddha described how he saw human gandhabbā moving from one physical body to the next (in a single human bhava) with the Pubbenivāsānussati Nāṇa on the night he attained the Buddhahood.

- While Ariyā with jhānā can attain both the Pubbenivāsānussati Nāṇa (about previous human rebirths) and the Cutūpapāda Ñāna (about past births in all realms), other yogis can mostly acquire only the first one, i.e., they can see only their previous human births. Note that this is related to the last type of micch $\bar{a}$ dittthi, i.e., to believe that no such Ariyā or yogis exist.
- In the sutta links above, the Pāli version is correct. Still, English and Sinhala translations are not correct, because there is no distinction made between the Pubbenivāsānussati Ñanna and the Cutūpapāda $\tilde{N} a ̄ n a$. With the first N$\tilde{N} a n a$, one can see previous human births, and with the second, one can see previous births in all 31 realms.
- By the way, hereafter, I will try to provide sutta references at the WebLink: suttcentral: SuttaCentral site. They have not only the Pāli version but also translations in different languages. However, we must keep in mind that some translations are incorrect, as mentioned above, and with the translations of anicca and anatta.

## Gandhabba is a Human Without a Human Body

6. We also need to realize that para loka, or the world of gandhabba (of both humans and animals,) is NOT a separate realm.

- In all other 29 realms, beings are born fully-formed instantaneously (opapātika) contrary to the 9th micch $\bar{a}$ ditthi on the list above. Those instantaneous births, of course, do not involve a mother's womb, and one bhava means just one $j \bar{a} t i$ (birth). For example, a deva or a Brahma is born once instantaneously. That Brahma dies only once.
- The difference in the human and animal realms is that those dense physical bodies have lifetimes much smaller than the kammic energies for the two bhava; see, "Gandhabba - Only in Human and Animal Realms."
- When a human or an animal dies - and if there is leftover kammic energy for the human or animal bhava - then a gandhabba comes out of the dead body and waits for a suitable womb to be born ( $j \bar{a} t i$ ) again in the same bhava (same realm).
- Thus, contrary to the widespread belief, gandhabba is not an "antarābhava" (in between bhava; "antara" means "in-between"), but rather is in the same bhava. The confusion arises with not knowing the difference between bhava and $j \bar{a} t i$.

## Gandhabba Lives in Para Loka

7. Until they find a suitable womb, those gandhabba are in "para loka" or the netherworld, which co-exists with our world (but normally we cannot see those fine bodies of gandhabbā).

- This is why one has miccha dittthi if one does not believe in the gandhabba concept (natthi paro loko in \#3 above.)
- Thus a human may be reborn many times before switching to another existence (deva, Brahma, animal, preta, etc.).
- This is why rebirth stories are common. The "human bhava" is extremely hard to get as the Buddha explained. But once in the human bhava, one could be born many times as human; see, "Rebirth Connection to Suffering in the First Noble Truth."
- The difference between bhava and $j \bar{a} t i$ is explained in "Bhava and Jāti - States of Existence and Births Therein."

8. So, I hope one can understand that one still has micchā ditṭhi if one adamantly rejects the concept of gandhabba or the concept of opapatika births.

- If one has any one of the ten micchā ditṭhi, one is not yet on even the mundane Eightfold Path; see, "Buddha Dhamma - In a Chart"" and the post referred to in that chart, "What is Unique in Buddha Dhamma?."
- The Buddha discussed this clearly in the "Mahā Cattārīisaka Sutta (Discourse on the Great Forty)."

## It is a Step-by-Step Process

9. To get to the Sotāpanna stage, the first step is to make sure that one learns Dhamma and clear up any remaining doubts about those ten types of micchā ditṭhi.

- When one gets rid of all ten micchā diṭthi, one is truly on the Noble Eightfold Path.
- At that point, one's mind has been cleansed to a stage where one can comprehend deeper Dhamma concepts. In particular, the Three Characteristics of Nature (Tilakkhaṇa): anicca, dukkha, anatta. This is a deeper micch $\bar{a}$ dittthi, the second type described in the Mahā Cattarisaka Sutta.
- When one comprehends the Tilakkhaṇa to some extent, one attains the Sotāpanna stage of Nibbāna. That is when one gets to the Lokuttara (Noble) Eightfold Path.
- Then, by following the Noble Eightfold Path, one reaches the higher stages of Nibbāna, culminating at the Arahant stage.

10. The Path to Nibbāna has been covered for hundreds of years because the above steps have not been clear. Furthermore, the meanings of those keywords, anicca, dukkha, and anatta have been distorted.

- That slow process of degradation of Buddha Dhamma took place over about 1500 years. In the late 1800s, when the Europeans discovered the ancient Sanskrit and Pāli documents, they did more damage.
- They first discovered Sanskrit Hindu Vedic literature in India (Buddhism had disappeared from India long before). They later came across the Pāli Tipiṭaka in Sri Lanka, Burma, and other Asian countries.
- The key problem arose when they ASSUMED that Sanskrit words "anitya" and "anātma" are the same as the Pāli words "anicca" and "anatta." The Sanskrit words "anitya" and "anātma" do mean
"impermanent' and "no-self," but the Pāli words "anicca" and "anatta" have totally different meanings. See, "Misinterpretation of Anicca and Anatta by Early European Scholars."

## More Information

11. Many posts in the "Historical Background" section fully explained that historical background. But at least read the posts starting with "Incorrect Theravāda Interpretations - Historical Timeline."

- The correct meanings of anicca, dukkha, and anatta have been discussed in the section, "Anicca, Dukkha, Anatta."

12. As for instantaneous births, instances of such opapātika births occur in many suttā. For example, in the WebLink: suttcentral: Mahā Parinibbāna Sutta (DN 16), the Buddha told Ven. Ānanda about opapātika births of many people who died in a certain village: "..Nandā, ānanda, bhikkhun̄̄ pañcannaì orambhāgiyānaì saimyojanānaì parikkhayā opapātika tattha parinibbāyinī anāvattidhammā tasmā lokā.."

- As I mentioned, the translations are available in several languages in the above SuttaCentral link for the sutta. For example, the above verse is translated into English as "..The nun Nandā, Ānanda, through the destruction of the five lower fetters have arisen spontaneously in the Brahmā worlds, and will attain Final Emancipation there, without returning from that world..."

- However, please keep in mind that those SuttaCentral translations also can have errors (as is the case at most online sites and books), as I pointed out in $\# 5$ above.

## Grasping the Real Nature

13. Finally, there may be people who attain magga phala but had never even heard about gandhabba in this life. If one comprehends the Tilakkhaña, that is all needed.

- In such cases, they had not rejected the concept of a gandhabba. If someone explained the concept to them, they would accept it since they can see that it must be true.
- However, if one hears those explanations and rejects them as "nonsense," that is micchā dittthi. Those are the concept of a gandhabba (and para loka), instantaneous births, the existence of other realms, and the existence of Ariyā or yogis who have the ability to see such realms as well as para loka.
- The only way to get rid of such micchā ditthi is to examine those concepts and convince oneself that they must be true.

14. In that process, it is also necessary that one lives a moral life staying away from dasa akusala as much as possible, as explained in the "Living Dhamma" section. Anyone needs to experience the mental clarity (and the "peace of mind" or "niveema") that comes with staying away from dasa akusala.

- By the way, the strongest of the dasa akusala is micchā dittthi, which includes not only the 10 types but also ignorance about Tilakkhaṇa. This is why a Sotāpanna removes $99 \%$ or more of the defilements by getting rid of the BOTH types of micchā ditṭhi; see, "What is the only Akusala Removed by a Sotāpanna?."
- The first type of micchā ditthi is about the 10 types discussed in \#3 above, which includes believing that nothing happens without a cause; bad causes (dasa akusala) lead to bad consequences. The second type is about not knowing the true nature of this world of 31 realms, i.e., that it is not possible to maintain anything to one's satisfaction (anicca), one is subjected to suffering because of that (dukkha), and thus, one is truly helpless in this rebirth process (anatta).
- However, it is difficult to "see" those Tilakkhaṇa until one believes in that bigger picture. That "bigger picture" includes the 31 realms, and the rebirth process, and the concept of para loka with gandhabb $\bar{a}$.

### 4.8.9 Working of kammā - Critical Role of Conditions

## May 21, 2017, revised May 11, 2022

1. We can see various human happiness/suffering levels around us. Some people live with relatively higher levels of health, wealth, and happiness, while others live in poverty, ill-health, and misery.

- We become distraught upon hearing that a child died prematurely or someone brutally murdered. Of course, we should generate empathy and sympathy and do our utmost to prevent such horrible occurrences.
- However, we also need to look at the CAUSES of such happenings. Once we understand the underlying causes, we will be able to prevent such things happening to us in the future, if not in this life, in future lives.
- Nothing happens without reason or a cause (commonly multiple causes). If we understand that specific causes can lead to bad outcomes, we need to block such causes. If we suspect suc causes are already there, we must stop making conditions for those causes to bear fruit.
- That is the key message of the Buddha: It is not possible to eliminate the suffering that has arisen (we can minimize it), but we can eradicate FUTURE suffering.

2. The principle of cause and effect (hetu/phala) is a key principle in Buddha Dhamma, as in modern science.

- Science is all about finding out HOW things HAPPEN around us due to CAUSES. A pebble on the ground will not go up by itself, ie., we have to pick it up and throw it up.
- We receive sunlight because the Sun puts out a vast amount of energy every second. And science has figured out how that happens: That energy comes from nuclear reactions; Sun is a giant fusion reactor.
- With the development of modern science we have figured out that nothing happens without a cause; usually, more than one cause leads to an effect.

3. However, science has not yet figured out that humans (and other living beings) are also subject to the principle of causes and conditions. That is Paticca Samuppāda in Buddha Dhamma.

- Does it just happen that X is born healthy and wealthy, Y is born healthy but poor, and Z is born handicapped and poor?
- There must be REASONS why $\mathrm{X}, \mathrm{Y}$, and Z are born that way.
- Not only that, a person born rich can become poor, and vice versa. Or a person in good health can die suddenly in an accident or by a heart attack. There must be reasons for such "turnarounds" too!
- The laws of kammā can explain all the above. But the laws of kammā are not just based on causes and effects; they DEPEND on CONDITIONS. That is what prevents laws of kamm $\bar{a}$ from being deterministic, i.e., one's future is NOT determined solely by past actions or kammā. Past kamma cannot bring vipāka unless suitable conditions are present.

4. Science has been unable to come up with explanations for the effects discussed above. There are two critical reasons for this lack of progress in science.

- First, unlike inert objects like a pebble, a living being has a mind. When a person moves, the cause originates in that person's mind, i.e., the person decides to move. Your hand will not move until you choose to move it. And you have the power to STOP its movement too!
- The second difference is that there is a rebirth process for living beings. The laws of kamm $\bar{a}$ cannot operate without the rebirth process. That is why not believing in rebirth is wrong (micchā dittthi.) With that wrong view, one will never be able to figure out the true nature of the world; see "Complexity of Life
and the Way to Seek "Good Rebirths"" and "Micchā Ditthi, Gandhabba, and Sotāpanna Stage." [May need this: Vagaries of Life and the Way to Seek "Good Rebirths]
- The human life of about 100 years is extremely short compared to the samsāric journey (rebirth process). Our mental states and physical appearance chage as we go from life to life; see "What Reincarnates? Concept of a Lifestream."

5. So, anything and everything happens due to reasons or causes. However, just because there is a cause, it is not guaranteed to give rise to the corresponding effect.

- In the terminology of Buddha Dhamma, past kammā do not necessarily lead to kammā vipāka.
- We can grasp this key idea with an example.

6. A seed CAN give rise to a tree. It has the POTENTIAL to bring a tree to existence. However, for that to happen, suitable CONDITIONS must be present.

- If we keep a seed in a cool, dry place, it will not give rise to a tree, and will remain a seed with that POTENTIAL for hundreds of years.
- Eventually, that potential to bring about a tree will disappear, and the seed will be "dead."

7. A strong kamm $\bar{a}$ creates a kamm $\bar{a} b \bar{j} \bar{j}$, or a kamm $\bar{a}$ seed, that works pretty much like an ordinary seed that we discussed above.

- For that kammā bīja to bring about its result, i.e., kammā vipāka, suitable CONDITIONS must exist.
- If suitable conditions do not materialize for a long time, then that kammā $b \bar{j} j a$ will lose its energy and it is said that it will become an ahosi $\operatorname{kamm} \bar{a}$, i.e., that kammā will not bring about any kammā vipāka.

8. As mentioned above, the other important factor in this complex process is that a living being goes through a rebirth that has no discoverable beginning.

- In this unimaginably long rebirth process, we all have accumulated uncountable kammā seeds, both good and bad.
- Those good kamm $\bar{a}$ seeds can bring about good results (health, wealth, beauty, etc.), and bad kamm $\bar{a}$ seeds lead to bad results (ailments, handicaps, poverty, etc.).
- But either kind can run out of energy without giving results (vipāka), if suitable CONDITIONS do not appear.

9. A seed cannot germinate unless suitable CONDITIONS appear (i.e., it should be in the ground, and water, sunlight, and nutrients must be present).

- In the same way, we can avoid many possible bad kammā vipāka by being mindful and not providing conditions for them to appear. We can also MAKE conditions for good kammā vipāka to bring about good results.
- For example, if one goes into a bad neighborhood at night, that provides conditions for any suitable bad kamm $\bar{a}$ seeds waiting to bring about their bad vipāka. On the other hand, we cannot be successful in any project unless we are willing to provide the right conditions: to pass an examination, we must study.
- Even if one is born poor, one could work hard and overcome poverty. If one is prone to catching diseases, one could eat healthily and exercise, to overcome at least some recurring ailments. Kamm $\bar{a}$ is not deterministic, see, "What is Kamma? - Is Everything Determined by Kamma?."

10. But of course it will be difficult to overcome the results of very strong kamm $\bar{a}$ seeds. One may be born handicapped due to a strong kammā seed that was generated in a previous birth.

- In the same way, strong good $k a m m \bar{a}$ seeds can bring about good results without much effort. Some are born rich, healthy, and wealthy due to a past strong good $\operatorname{kamma} \bar{a}$ seed coming to fruition.

11. So, I hope it is clear that one's happiness in this life could be determined by several different factors.

- In relatively few cases, one could automatically (without much effort) receive health, wealth, and RELATIVE happiness due to strong kamm $\bar{a}$ seeds. In the same way, some others could be facing miserable lives.
- However, on the average, one's happiness in this life is to a large extent is determined by one's willingness to make right CONDITIONS for good vipāka to take place and prevent bad vipāka from appearing.
- Even more importantly, one could make conditions for health, wealth, etc in future lives by living moral lives and doing good deeds.

12. Now let us look at what happens when a result materializes due to a kammā vipāka. Once a bad $v i p a \bar{k} a$ materializes, we can certainly manage it to minimize its effects, and in some cases even get rid of it by working to making conditions for a goodkamm $\bar{a}$ seed to overcome it.

- For example, if one comes down with cancer, in some cases it can be overcome by good medical treatment, i.e., making conditions to counter the initial effect.
- If one is born tall or short, there is nothing much one can do about it. If one is born handicapped, one will have to live the whole life that way.
- As we can see, we can improve some of those kammā vipāka, while we cannot do much about some others.
- Even the Buddha could not avoid certain vipāka. He had back aches and Devadatta was able to injure his foot. Ven. Moggallana was beaten to death.

13. Another observation we can make from the above discussion is that when one becomes an Arahant (or even a Buddha), his suffering is not completely ended at the Arahanthood. He still had to suffer due to the physical body that had already "started."

- So, what was meant by "removal of suffering" when one attains Nibbāna? It is the future suffering (i.e., suffering in future lives) that is ended. When an Arahant attains Parinibbāna (i.e., physical death), he/she will not be reborn in this suffering-filled world of 31 realms, and that is when the suffering completely ends.
- However, as we have discussed, part of suffering ends with the attainment of Arahanthood: suffering associated with "sañkhāra dukkhä" or what is called "samphassa jā vedana""; see, "Vedanā (Feelings) Arise in Two Ways."

14. Of course, IN THE LONG RUN (in the rebirth process), no matter how hard one strives, it will be IMPOSSIBLE to attain PERMANENT happiness anywhere in this world. This is called anicca nature. That is why we need to strive to attain Nibbāna to avoid future suffering.

- However, it is not an easy task to even to beginning to comprehend the anicca nature, until one enters the mundane Eightfold Path by getting rid of the 10 types of micchā ditthi, which include not believing in rebirth or the concept of a gandhabba; see, "Micchā Ditthi, Gandhabba, and Sotāpanna Stage."
- Only when one enters the mundane Eightfold Path that one will be able to grasp the Three Characteristics of Nature (anicca, dukkha, anatta), and start on the Noble Eightfold Path to attain Nibbāna.
- The two types of Eightfold Paths were discussed by the Buddha in the "Mahā Cattārīsaka Sutta (Discourse on the Great Forty)." Also see, "Buddha Dhamma - In a Chart."

15. Finally, the role of conditions in the laws of kammā are inherent in the Paticca Samuppāda; see, "What Does "Paccaya" Mean in Paticca Samuppāda?" and "Patthāna Dhamma - Connection to Cause and Effect (Hetu Phala)."

- Paṭicca Samuppāda is discussed in the section: "Paticca Samuppāda."

### 5.1 Dhamma and Science - Introduction

Revised January 22, 2019; August 22, 2019; February 26, 2020; August 27, 2022

1. Whether it is a scientist or a Buddha, each is "discovering" the way nature works, i.e., revealing to the world what the fundamental laws of nature are. To appreciate a Buddha compared to a scientist, contemplate the following. The scientific knowledge we have today is the CUMULATIVE effort of thousands of scientists, each taking the knowledge base a little further. As Newton said, "I was fortunate to stand on the shoulders of giants to see further."

- Not all scientists make similar contributions. Galileo, Newton, and Einstein made "giant leaps" compared to the smaller steps taken by other scientists.
- Now with cumulative effort over many hundreds of years, science has made significant advances concerning understanding some of the fundamental laws relevant to INERT MATTER.
- On the other hand, there is virtually no progress in understanding how the mind works; see "Consciousness - A Dhamma Perspective."

2. As I build up this site, anyone can see that Buddha Dhamma is the ultimate Grand Unified Theory. It explains the behavior of inert matter and living beings that we can see. And it also describes the existence of an infinite number of worlds with living beings in 29 other realms (other than the human and animal realms that we cannot see). See "The Grand Unified Theory of Dhamma."

- Buddha Dhamma is not a religion in the sense of providing salvation. The Buddha was not a God, a prophet, or a messenger. He was a human being who purified his mind to perfection so that he could see the whole of existence.
- The Buddha was the greatest scientist who investigated the problem of existence and found a complete solution. We all need to find our salvation by following his prescribed path to purify our minds.

3. Newton could not have discovered the laws of gravity if it were not for the efforts of scientists like Brahe and Copernicus. Similarly, Einstein could not have discovered relativity without the knowledge passed down by other scientists. Quantum mechanics would not have been possible without the efforts of multiple scientists who moved forward with the evidence gathered by hundreds of other scientists.

- The Buddha, in comparison, discovered the complete set of laws about the WHOLE EXISTENCE through his efforts. That includes the way inert matter behaves on this Earth and all of existence in the 31 realms (that science is not even aware of). That includes how inert matter behaves in all 31 realms AND the minds of beings in those 31 realms.
- I recently proposed an explanation for the controversy over the "non-locality" issue in quantum mechanics. Everything in this universe is inter-connected (or entangled) at a deep level; "Quantum Mechanics and Dhamma."

4. We could say that the minds of the caliber of Newton and Einstein appear roughly every 100 years. The mind of a Buddha is infinitely more advanced and appears once in many billions of years if beings are lucky.

- There have been four Buddhas in this Mahā kappa, but the last Buddha before them was born 30 Mah $\bar{a}$ kapp $\bar{a}$ ago. Thus, there was a gap of 30 Mahā kappā (roughly a trillion years) without a Buddha appearing in this world.
- The Buddhas use a method different from the "scientific method" used by scientists. Instead of conducting experiments on inert matter, they conduct mind experiments. Answers to ultimate questions on the existence of living beings with complex minds can be found only by PURIFYING a human mind to the ultimate level. That is what a Buddha does.

5. I will try to provide at least some details of the complex world view that the Buddha provided. Buddha Dhamma has been muddled and distorted over the past 2500 years.

- "Our world" is much more complicated than what is grasped by our senses; see "The Grand Unified Theory of Dhamma."
- And our lives do not end with this one; see "Evidence for Rebirth."
- Those two facts constitute the basis of the true nature of existence. They need to be thought about carefully. One cannot comprehend the message of the Buddha until one at least has some idea about this "big picture."

Now let us examine one case where it took 2500 years for science to come to be consistent with one part of Buddha Dhamma's world view.

## It Took 2500 Years...

Here is a picture of our Milky Way galaxy. We can see only a couple of thousand stars. But there are hundreds of BILLIONS of stars in our galaxy, and there are about an equal number of GALAXIES in our universe. Thus, there is a whole galaxy for each star in our galaxy. It is truly mind-boggling.

Milky Way

1. Even a few hundred years ago, even scientists believed our Earth was at the center of the universe: WebLink: WIKI: Geocentric model

- Therefore, Buddha's view of the universe as consisting of innumerable "world systems" was not looked at favorably even a few hundred years ago.
- Of course, that has changed now. Buddha's statement that "there is no discernible beginning to life" is also becoming vindicated with each new scientific discovery. See "Origin of Life."

2. In Buddha Dhamma, there is no First Cause (no Creator): Life always existed and will always exist. Each living being has gone through innumerable birth-rebirth processes without a conceivable beginning. However, everything in the "world around us" is impermanent, including our universe (a "major world system" in Buddha Dhamma).

- Everything is born, has a transient existence, and finally decays. And this includes our universe as well. Like everything else, stars (and associated planetary systems) come into existence and eventually fade away.

3. if there is no beginning to life, then where did life exist before the "big bang," i.e., before our universe came into existence? (actually, life is believed to have evolved on Earth much later).

- People who lived even a hundred years ago had to take Buddha's words on this point solely on faith. But we are lucky to be assured by the fact that modern science gives us some rather persuasive reasons to believe that life existed forever. Let us look at the emerging evidence.

4. Even as recently as at the beginning of the 1900s, Lord Kelvin (one of the top scientists of the day) estimated that the age of the Sun was $<40$ million years. He estimated that time based on gravitational contraction (scientists did not know about nuclear fusion then). Our knowledge of the universe was also pretty much limited to the Solar system. So, this meant the age of our 'known universe" was very short, and thus the Buddha's teachings on a beginning-less samisāra (or saysāra) seemed like a myth.

- Vindication of the Buddha's teachings started at the beginning of the 1900s with the advent of quantum mechanics and relativity. The discovery of radioactivity in 1898 by Becquerel and Einstein's explanation of the photoelectric effect in 1905 led to the quantum theory of atomic structure. That, in turn, led to the correct picture of nuclear fusion as the source of solar energy.
- So, by 1956, the solar system's age was $>4$ billion years, and the universe's age was estimated to be around 14 billion years. Even billions of years are hardly the same as "beginning-less time"!

5. By 1929, Edwin Hubble proved that distant galaxies were moving away from each other. And that our galaxy is but just one of many galaxies. That was a vast understatement since now we know that there are 400 billion galaxies in our observable universe!

- The currently accepted theory of the "big bang" is the inflationary theory of Alan Guth. See WebLink: PDF Download: "The Inflationary Universe" by Alan Guth (1997).
- However, a minority of scientists do not believe in the "Big Bang." They have proposed alternate theories; see WebLink: PDF Download: "Endless Universe" by Paul J. Steinhardt and Neil Turok (2007). In this view, universes are destroyed and reborn.

6. Buddha's world view does not have a "Big Bang" beginning either. Life always existed, and it will always exist in the future.

- See "Origin of Life."
- The post "Buddhism and Evolution - Aggañña Sutta (DN 27)" also discusses some key concepts.

7. By the way, there are several theories currently being explored in quantum mechanics related to cosmology. One theory requires a universe to exist for each possible event! So, there may be an infinite number of parallel universes. For example, see "The Beginning of Infinity" by David Deutsch (2011). In all these theories, multiple universes always exist.

- In any case, the Buddha did not say which of these theories is correct. He just said life always existed, and it always will. But he did say that "star systems" - like our Solar system - come into being, survive for long times, and are destroyed at the end.
- And that process repeats over and over!

8. More information at "Dhamma and Science" and "Quantum Mechanics and Dhamma."

### 5.2.1 Origin of Life - There is No Traceable Origin

July 10, 2019; revised July 11, 2019; June 21,2022

## Why Is This Issue Important?

1. As I explained in my previous post, we CREATE OUR OWN future lives, as described by Uppatti Pațicca Samuppāda; "Uppatti Paticca Samuppāda (How We Create Our Own Rebirths)."

- Pațicca Samuppāda cycle starts with "avijjā paccayā sañkhāra." As long as there is avijjā (no comprehension of the Four Noble Truths), one is bound to do (abhi)sañkhāra - and generate kamma - there will be bhava and $j \bar{a} t i$ (i.e., rebirth). That cycle will continue forever (just as it had no beginning).
- All types of births ( $j \bar{a} t i)$ lead to suffering, without exception.
- This cycle ends ONLY WHEN one's avijija is removed via comprehension of the real nature of this world of 31 realms and one voluntarily gives craving ( $\tanh \bar{a}$ ) for existence in this world of 31 realms. That is the attainment of Nibbāna or Arahanthood.
- This understanding is the FOUNDATION of Buddha Dhamma.

2. Therefore, the question, "What is the origin of life?" is very much relevant to UNDERSTANDING Buddha Dhamma.

- Most scientists believe that our universe came to existence only about 14 billion years ago with the "Big Bang."
- Furthermore, current scientific theories say that life first formed in a primitive state (single-cell entities) and evolved into more complex life forms. And that humans came into existence less than five hundred thousand years ago.
- Most scientists do not agree with the "Creation hypothesis" that is the foundation of Abrahamic religions (Christianity, Judaism, Islam) simply because it is not compatible with the Principle of Causality. It says nothing can come to existence without a cause(s). If a Creator created life, how did that Creator come into existence?
- The compatibility of a "Big Bang" origin with causality is also not clear. Scientists are exploring possibilities like the "multiverse theory", but those are still speculative.
- However, our focus in this series of posts is not on the actual origin of the universe, but on the origin of life on Earth.

## Buddha's Explanation

3. According to the Buddha, life has no traceable beginning. This is certainly compatible with causality.

- For example, in the "WebLink: suttacentral: Gaddulabaddha Sutta (SN 22.99)": "Anamataggoyamं, bhikkhave, samisāro" means "bhikkhus, there is no discernible beginning to the rebirth process." It also describes how living beings are bound to samisāra, because they do not realize the anicca, dukkha, and anatta nature, which we recently discussed: "Sotāpanna Stage and Tilakkhana."
- The above verse appears in all suttō in the "WebLink: suttacentral: Anamatagga Samyutta (SN 15.1 ~ 15.20)" of the Saimyutta Nikāya, where each sutta gives a simile to illustrate how long each of us has been in this rebirth process and how much suffering we have endured.
- However, it must be noted that Buddha's message is NOT a depressing one.
- Whether there is a Buddha in the world or not, this suffering exists. This suffering is real but there is a way to overcome that suffering.
- Without a Buddha, we will not even be aware of this hidden suffering. Furthermore, a Buddha FOUND A WAY (Noble Eightfold Path) to stop this perpetual suffering. That is the uplifting message.

4. As many of you may have observed, learning deeper aspects of Buddha Dhamma is not easy. It requires one to spend considerable time learning and then contemplating.

- Without an understanding of how long the sansāric journey is and how much suffering is encountered in most births, it is difficult to generate the MOTIVATION to study Buddha Dhamma. Most people turn to Buddha Dhamma only when they come down with harsh suffering, seeking relief. But the best time to learn is when one is healthy with a sharp mind, and I hope I can motivate those people too with this series.
- In the "WebLink: suttacentral: Upanisa Sutta (SN 12.23)," the Buddha discussed the proximate causes/conditions (upanisa) for various factors leading to Nibbāna. Understanding how various births ( $\bar{a} t i$ ) arise and how ALL those births give rise to $d u k k h a$ (suffering) is the key. When one comprehends the Four Noble Truths, one understands how dukkha arises (and that it can be stopped from arising); that leads to saddh $\bar{a}$ (faith). Starting there one can follow the Noble Eightfold Path and attain Nibbāna! That is the essence of the sutta, even though it may not be clear from the translation in the link.
- That understanding cannot be attained until one can clearly see that there has not been a BEGINNING to this rebirth process, and we all have suffered so much in each and every birth. Regarding the perpetual suffering, I will also discuss the "WebLink: suttacentral: Pathama Niraya Sagga Sutta (AN 10.211)" in the future. It explains the causes of rebirth in good and bad realms, and why most births are in bad realms.

5. Life has always existed, but planetary systems (like our Solar system) are destroyed periodically and reformed over long times.

- This is the only explanation that is consistent with the Principle of Causality: There is no "first beginning to life." Life always existed, and it evolves according to the Principle of Causality, which is Paticca

Samuppāda; see my previous post: "Uppatti Paticca Samuppāda (How We Create Our Own Rebirths)."

- If we go by the Principle of Causality (which is THE basis of modern science), there CANNOT be an origin of life, unless life can start with inert matter.
- What the video below explains is that it is NOT POSSIBLE to create EVEN A SINGLE CELL (a basic building block of life) in the laboratory starting with inter matter. If it cannot be created in a laboratory under controlled conditions, it WILL NOT be possible for life to arise in a natural process starting with inert matter.
- In a newly-formed Earth, the first cells are created by kammic energy. In other words, it is the "mental energy" in javana citta that is really responsible for a "first cell". I will discuss this in future posts on Aggañña Sutta.

## Evolutionists Versus Creationists

6. Of course, there is an ongoing debate between the evolutionists and creationists. Evolutionists believe that life evolved into complex entities like humans over billions of years. Furthermore, they believe that even the first cell (which is the building block of all life forms) evolved in the early Earth starting with inert molecules. Creationists, on the other hand, believe that a Creator God created life.

- I am providing a few references at the end of the post for both sides.
- It is to be noted that most evolutionists do not discuss the origin of a cell that much. They mainly focus on the "evolution of the species" STARTING WITH a fully functioning cell and progressing into more complex species with more and more cells of complex structure. Evolutionists are just speculating that a cell evolved in the primitive Earth due to random events. For example, Dr. Richard Dawkins writes in the reference given below, "How long would we have to wait before random chemical events on a planet, random thermal jostling of atoms and molecules, resulted in a self-replicating molecule? Chemists don't know the answer to this question" (p. 144).
- On the other hand, creationists focus on the issue of why it is not possible to "create a cell" via evolution. Many of them agree that complex life possibly evolved starting with simpler life forms.
- I agree with the creationists that it is not possible for a cell to come to existence "starting with inert molecules" via random events. You can decide for yourself based on the videos below (and the references if you are really interested). Of course, we can discuss at the discussion forum.

7. The video below is by a scientist (Dr. James Tour) who has a different viewpoint than most other scientists. He provides solid evidence that life could not have evolved starting with inert matter. It is too complex to have evolved by natural processes.

- At the end of the video, Dr. Tour comes to the conclusion that since life is too complex to evolve, it must have been CREATED by a Creator God. That is the other extreme view.
- According to Buddha Dhamma, life did not evolve from inert matter, nor it was created by a Creator God. Life always existed and it just takes different forms when a given "lifestream" is reborn a human, animal, deva, etc. We all have been born in most of the 31 realms in our deep past! When the conditions on Earth became suitable cells came into existence via kammic energy.

## Mind Is the Creator of (New Forms of) Life! No Beginning to Life

8. Of course, it is very likely that Dr. Tour is not aware of the extensive and scientific explanation by the Buddha in the Aggañña sutta: Life has ALWAYS existed. A given lifestream (you or I) have existed without a traceable beginning.

- I will not be able to discuss that complex process any time soon. But I have discussed the main points in the Aggañña sutta in the post:"Buddhism and Evolution - Aggañña Sutta (DN 27)."
- It is just that we ourselves CREATE OUR OWN future lives, as described via Uppatti Paticca Samuppāda (which I discussed in my previous post).

9. A cell is the building block of life. Setting aside a complex life form like a human (made of trillions of different types of cells), science WILL NOT be able to create even a single cell. In fact, even in any CURRENT living being, individual cells are not formed. Instead, an existing cell divides to make two cells, and that is how more and more living cells come into existence!

- Each of our bodies started with just a single cell (zygote), and it became alive only when a gandhabba (or paṭisandhi viñnāạa) "descended to the womb" and merged with that single cell. It is cell division that led to the current physical body with trillions of cells; see, "Buddhist Explanations of Conception, Abortion, and Contraception."
- No scientist has been able to CREATE even a primitive single cell. In cloning experiments, they deal only with existing cells; see, "Cloning and Gandhabba."
- As explained by Dr. Tour, a living cell is very complex and is like a working factory. He does a good job in his explanations.

## WebLink: youtube: James Tour: The Mystery of the Origin of Life

10. Here is an introductory video on a living cell (you may need to copy the URL below and paste in a browser window if the video does not show up):

## WebLink: youtube: Introduction to Cells: The Grand Cell Tour

## REFERENCES

## For evolution:

Richard Dawkins, "The Blind Watchmaker: Why the Evidence of Evolution Reveals a Universe without Design" (2015).

Jerry A. Coyne, "Why Evolution is True" (2010).
(Note that both these and other books/research papers do not provide ANY evidence for the evolution of a cell)

## For creation:

Stephen Meyer, "Signature in the Cell: DNA and the Evidence for Intelligent Design" (2010).
Richard Behe, "Darwin's Black Box: The Biochemical Challenge to Evolution" (2006).

## Both evolution and creation not adequate:

Thomas Nagel, "Mind \& Cosmos: Why the Materialist Neo-Darwinian Conception of Nature is Almost Certainly False" (2012).

- Professor Nagel (who is a philosopher) obviously has had no exposure to Buddha Dhamma. But I am very much impressed that he came to the conclusion that mind MUST play a central role. I will write more on that in future posts.
5.2.2 Human Life - A Mental Base (Gandhabba) and a Material Base (Cell)

July 15, 2019; revised July 16, 2019

## Current Scientific Understanding of a Human Birth

1. Of course, science assumes that life is only associated with a physical body and when the physical body dies, that is the end of the story. This is what we called "uccheda dittthi" in the post, "Sakkāya Ditthi Getting Rid of Deeper Wrong Views." Here is a summary of the current scientific understanding of the beginning of a human life.

- During the mother's menstrual cycle, one egg (ovum) is usually released from one of the ovaries and is swept into the funnel-shaped end of one of the fallopian tubes.
- After intercourse with the father, If a sperm penetrates the egg there, fertilization results and the fertilized egg (zygote) moves down the fallopian tube and ends up in the uterus. This zygote divides into two cells, those two to four cells, etc.
- This collection of cells enters the uterus in 3 to 5 days. In the uterus, the cells continue to divide, becoming a ball of cells called a blastocyst. Inside the uterus, the blastocyst implants in the wall of the uterus, where it develops into an embryo attached to a placenta and surrounded by fluid-filled membranes; see, WebLink: merckmanuals.com: Stages of Development of the Fetus

2. This cell division is what causes that baby to grow (first inside the womb and then outside the womb) to become a full-grown human with trillions of cells. It is that first cell (which cannot even be seen with the naked eye) that eventually multiplied to a mass of trillion of cells in a grown human!

- However, there is much confusion about WHEN that zygote becomes alive, i.e., when it can be called "a human." This "time of conception" varies widely based on personal and religious beliefs.
- Some people believe life starts at the moment of the merger of the egg and sperm (to form the zygote). At the other end, some say the actual birth of the baby (i.e., coming out of the womb) is the start of the human life! Some others define the life to start when the embryo's heart starts beating.
- This confusion goes away when one understands the complete process described by the Buddha.

## Buddhist Description of a Human Life - Bhava and Jāti

One needs to understand the concepts of bhava, okkanti, and $\boldsymbol{j} \boldsymbol{a} \boldsymbol{t} \boldsymbol{i}$ in order to understand how a human being is conceived in the womb (conception) and is born 9 months later.
3. According to the sutt $\bar{a}$ as well as Abhidhamma in the Tipiṭaka, a new human existence (bhava) does not start in a womb. It starts at the cuti-patisandhi moment when the previous bhava comes to an end. For example, if a deva dies and becomes a human, a human gandhabba (fine mental body) will be formed at the time of death of that deva; see, "Bhava and Jāti- States of Existence and Births Therein."

- A human bhava can last thousands of years. On the other hand, a physical human body lasts only about 100 years. In between successive births with "human bodies", the gandhabba (mental body) lives in what is called "para loka." The para loka co-exists with our human loka, but we cannot see those fine mental bodies of gandhabbas; see, "Micchā Ditthi, Gandhabba, and Sotāpanna Stage."
- It must be noted that all living beings have a mental body and it is called "manomaya kāya." Gandhabba is a special case of a manomaya kāya; see \#12 below.
- That human gandhabba will have to wait until a suitable womb becomes available. By "suitable" it means that the gati (loosely related to character/habits) of the gandhabba have to match those of the parents, especially the mother. Gati is an important concept in Buddha Dhamma that has been ignored for a long time; do a search for "gati" on the top right search box to find about "gati." A starting post is, "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsavas)."
- Anytime after the egg and sperm are merged to form the zygote, a "matching gandhabba" can descend to the womb. Now a new human life starts with a mental body and the seed for a physical body (zygote).

4. Therefore, the time of conception is very precise in Buddha Dhamma: It happens at the time when the lifeless zygote becomes "alive" with the merging of the gandhabba. That is the time of conception and it happens very early, normally within a day after intercourse.

- In suttā, this is called "okkanthi" (a gandhabba or a pațisandhi viññāna descending to a womb); see, "Gandhabba State - Evidence from Tipitaka." When the baby is born that is $j \bar{a} t i$.
- The moral issues involving contraception and abortions are discussed in the post, "Buddhist Explanations of Conception, Abortion, and Contraception."

5. What happens in a womb (when an egg is fertilized with a sperm) is just to provide the "material basis" (zygote or the "first cell") for the gandhabba to start a new "human being" that will eventually grow to become an adult with trillions of cells.

- The "blueprint" for that physical body (i.e., the gandhabba) was created at the dying moment in the previous life. The gandhabba brings his/her own gati as well as a set of kamma vipāka that would come into play during the existence of that human body.
- However, the physical body will also take into account the features of the mother and father via that zygote; see, \#1 above.
- Therefore, the new baby will have a complex mixture of physical and mental characteristics of all three.
- All this is discussed in more detail in several posts, including "Ghost in the Machine - Synonym for the Manomaya Kāya?," "Manomaya Kāya (Gandhabba) and the Physical Body", and a more technical description in "Cuti-Patisandhi - An Abhidhamma Description."

## Connection to Sakkāya Diṭthi

6. I will take this opportunity to point out that is it only series of events that lead to a "new human being." That gandhabba which led to a new life arose due to a "paṭisandhi viñnäạa," which is nothing other than a "packet of kammic energy" created in a previous life. Therefore, it was NOT an existing "living being" that "became the new human being."

- This is why the Buddha said there is no "self" traveling from life-to-life. Any living being just CREATES energy (kammic energy in terms of a paṭisandhi viñ̃̄ānaa) to start a new "life form."
- However, there is a "continuity of life" that was CAUSED in a previous life (when a strong kamma was done and this patisandhi viññāna was created). Therefore, it is also not correct to say that a new life arises without a previous life making causes for it. There is a causal connection between adjacent lives.
- If one can grasp this key point, that will help to remove sakkāya dittthi (which is the key to the Sotāpanna stage).

7. There is no NEW living being and there has not been a FIXED living being (i.e., a "soul" or an "atma") either. Life just moves from one existence to another based on what types of pattisandhi viñ̃̄āṇa have been created in the past!

- For example, one may be born many times with a human body while in the "human bhava," but when the energy for that "human bhava" runs out, that lifestream gets hold of a new bhava (as a brahma, deva, animal, etc) which is the strongest paṭisandhi viñ̃̄äna, i.e., the strongest kamma (good or bad) done in the past.
- If one is able to follow that "chain of past lives", one will go through billions of past lives per minute, but will never be able to find a "beginning" life!
- According to the Buddha, life has no traceable beginning. "WebLink: suttacentral: Gaddulabaddha Sutta (SN 22.99)" is about how long the rebirth process. At the very beginning of the sutta: "Anamataggoyaì, bhikkhave, saïsāro" means "bhikkhus, there is no discernible beginning to
the rebirth process." This verse is in many suttā including all the suttā in the "WebLink: suttacentral: Anamatagga Samyuutta."

## A Mental Base (Gandhabba) and a Material Base (Cell)

8. A human life requires two basic components: a mental body (gandhabbalpatisandhi viñ̃̃̄āna) and a physical body (consisting of cells).

- A mental body or gandhabba (in different forms) has existed forever with any existing life-form, as explained in \#6 and \#7 above.
- The material body starts with a single cell created by the union of mother and father; that single cell (zygote) multiplies over time and the body of an adult has trillions of cells.

9. As I pointed out towards the end of the previous post, a cell is the basic building block of a live physical body. All living things (sentient beings and plants) are made of cells.

- Each of these cells comes into existence from pre-existing cells! No new cells are produced individually. This is a very important point.
- However, the first cells that appeared in the Earth were created by kammic energy (in javana cittō); I will discuss this below.
- Therefore, both mental and physical components of a human life have origins in the MIND.

10. Of course, there are many scientists today with the view that a "first cell" was created solely with inert matter early in Earth's history, within a billion years of the formation of the Earth.

- This "first formation time" comes just from archeological studies. As new studies find fossilized cells going back to earlier rocks, the time it took to form the "first cell" has now been pushed back within 300 million years of the formation of the Earth!
- However, living is cell is too complex to be formed via random combinations of inert molecules no matter how long a time is given. It not just forming complex molecules of DNA, but those DNA strands have a built-in program for life, just like a computer program.
- Random re-arrangement of inert molecules CANNOT lead to the formation of a "programmed cell." More on that in the next post.

## All Life on Earth is Made of Cells

11. All life that we see (whether sentient or not, i.e., whether have a mind or not) are made of cells. To be more precise, human and animal bodies - and plants - are made of cells.

- Some of them (plants) are not conscious, i.e., they do not have a mind.
- On the other hand, humans and animals are also made of cells, but they have a mind too.

12. So, we must realize that being alive and being conscious are two different things. Plants are alive but they cannot think: plant cells just mechanically perform "pre-programmed" functions. On the other hand, humans and animals are also made up of cells, but there is an additional entity associated with them: gandhabba or the mental body!

- (It must be noted that all living beings have a mental body, and it is called manomaya k $\bar{a} y a$. A manomaya kāya of a human or an animal is called a gandhabba because it can inhale aroma gandhabba comes from "gandha" + "abba" or "taking in aroma or scents" -, and become dense; see, '"Manomaya Kāya and Out-of-Body Experience (OBE)").
- It is amazing to see that even plant cells are very active, buzzing with activity. All cells are programmed for various functions. Of course, different types of cells are programmed for carrying out different tasks.

This is an interesting topic that we do not want to get too much involved in, because that can be a real distraction to the main task of learning Dhamma and following the Noble Eightfold Path.

- However, having at least a rough idea about the complexities of life can be a motivation to learn more about Buddha Dhamma.

## Complex Structure of a Cell

13. Here are two videos that explain the current status of understanding of cells. I will get to more relevant aspects in the next post.

## WebLink: youtube: Organelles of the Cell (updated)

14. Energy for ALL cells come from Solar energy. Plant cells first convert Solar energy to forms of energy that can be used by animal cells. Therefore, plant cells play a major role in sustaining human and animal life!

## WebLink: youtube: Cells: Structure and Function

### 5.2.3 <br> Clarification of "Mental Body" and "Physical Body" - Different Types of "Kāya"

July 19, 2019; revised September 8, 2019

## Introduction

1. There are words in Pāli that can have similar meanings. But one word may be better than another word in a particular situation. That is also true in English or any other language.

- In Buddha Dhamma, several Pāli words are used in different contexts regarding the "mental body." They are manomaya kāya, kammaja kāya, gandhabba, and paṭisandhi viñ̃ñana. I will try to make things a bit clear in this post.
- We need to keep in mind that the mind is very complex, and living beings in different realms have different types of "mental bodies." It is good to have a basic idea of these differences.

2. Most important here is to realize that these "mental bodies" are very different from the "physical bodies" we see in humans and animals.

- In particular, a brahma does not have a physical body at all. Then how can a Brahma see and hear without physical eyes and ears, and a brain to process those signals? These are questions that naturally arise in our minds. That is because we are not used to the concept of a "living being" without a solid body.
- The following discussion lays out a simple picture (with a few omissions to keep it more uncomplicated).

## Mental Body and Physical Body

3. All living beings have a "mental body" ("manomaya kāya"). Living beings in some realms also have a "physical body" (āhāraja kāya).

- So, the very first thing we need to realize is that such a "kāya" is not the same as a "physical body" that we are used to, weighing tens of kilograms or hundreds of pounds. The Pāli word "kāya" means a collection. Even in English "body" is sometimes implies a collection of parts. Some examples are, a "body of evidence" or "a body of water." [kāya : (m.), a heap; a collection; the body.]
- "Manomaya" means "made by the mind." Therefore, a manomaya kāya is a collection of very fine parts (hadaya vatthu and several pasāda rūpa) that are necessary for any living being. A manomaya
$k \bar{a} y a$ arises out of kammic energy created in our thoughts (citta). Abhidhamma is even more specific and says that our javana citta generates this energy.
- "Kammaja kāya" is the primary component of the manomaya kāya. This is because it is the first $\boldsymbol{k} \bar{a} y a$ "created by kammic energy."

4. Now we can look at the two words kammaja kāya and āhāraja kāya. Here each composite word is made from two parts: The common component, in this case, is " $j a$," which means "generated by" or "born due to."

- The collection of parts that arise due to kammic energy is "kammaja kāya." This "kāya" or "body" is very fine. A whole "kammaja kāya" is a billion times smaller than an atom. But as we will see, this "kaya" is the more powerful one. That is where the seat of the mind (hadaya vatthu) and the five real sensing elements of "pasāda rūpa" are located.
- Those six elements are made of the smallest units of matter (suddhattthaka) in Buddha Dhamma.
- Therefore, a whole "kammaja kāya" is unimaginably small, by our standards. One would not be able to see one even with an electron microscope. As we see below, that is all a brahma has!
 eating food. In humans and animals, this is the "physical body" that we see.
- Therefore, an "āhāraja kāya" is a "collection of heavy components of a body" like the head, arms, legs, eyes, ears, etc. That is what we call the "physical body." A physical body grows by using energy intake from the food we eat.
- For beings like us with solid physical bodies, the sensory signals are first received by the five physical senses (eyes, ears, nose, tongue, and body). Then the brain processes those signals and sends them to the manomaya kāya. The manomaya kāya senses those signals.
- Eyes and ears, for example, do not actually see or hear. Eyes and ears pass those signals to the brain. The brain processes those signals send them to the corresponding pasāda rupa in the manomaya kāya; see, "Brain - Interface between Mind and Body."
- In other words, for beings like us with physical bodies, the sensory signals received by the five physical senses (eyes, ears, nose, tongue, and body). Then processes those signals and send to the manomaya $k \bar{a} y a$. The manomaya kāya senses those signals.
- As we have discussed in recent posts in this series, a physical body (of a human or an animal) starts with a single cell called a zygote. The development of a complete human body, beginning with that one cell is another fascinating story. Scientists have no idea how that happens via a program that is in the DNA of that single cell. Who designed that program? See "Origin of Life."

## Beings in Brahma and Deva Realms

6. Brahmā do not have an āhāraja kāya, and just have the kammaja kāya. The kammaja kāya of a brahma has only a hadaya vatthu and TWO pasāda rūpa (cakkhu and sota) for seeing and hearing. Still, they can see and hear with that ultra-fine "body" without having any eyes or ears (and brains) like ours. Of course, it is tough for us to imagine such a living being.

- Therefore, a brahma with just a manomaya kāya has a mass less than that of an electron. We cannot see even a cell or an atom, let alone an electron. Now we can understand why we should not think of "Brahma bodies" in the same sense as a "solid body."
- Those Brahmā cannot taste the food, smell odors, or touch things physically like we do. In other words, they do not have ghāna, jivhā, and kāya pasāda rūpa.
- By the way, Brahmā do not need food. Kammic energy sustains their lives. Only the hadaya vatthu and the two pasāda rūpa of cakkhu pasāda and sota pasāda need to be maintained.

7. Devās do have āhāraja kāya, but that is much finer, and we would not a deva if we come face-to-face with one.

- They have all five physical senses. Their food is just a drink called "amurta." That is probably not the correct Päli word, but that is the Sinhala - and probably Sanskrit - name for it.
- Therefore, we need to be careful not to carry over our perceptions of "heavy bodies" to bodies of other beings in other realms. Millions of devas and Brahmā were present to hear the first discourse by the Buddha, according to the Vinaya Pitaka. However, those five ascetics probably did not even realize that at that time.

## What is Gandhabba?

8. A human (or an animal) has a both a manomaya kāya and a āhāraja kāya. But the manomaya kāya of a human has a special name of gandhabba due to the following reason.

- A human bhava starts with the generation of a manomaya kāya (or kammaja kāya) by kammic energy. For example, if an animal dies and gets a human bhava (which is extremely rare), a human manomaya kāya will come out of that dead animal. If a deva dies and gets a human bhava, a human manomaya k $\bar{a} y a$ will appear in the human realm.
- That human manomaya kāya has a hadaya vatthu and five pasāda rūpa as mentioned above. However, it has the ability to absorb aroma (scents from plants and even food), and to get a bit denser (unlike a brahma). Thus the name gandhabba ("gandha" + "abba" or "inhaling aroma") for the manomaya kāya of a human (or an animal).
- Therefore, the name gandhabba is used only for the manomaya kāya of humans and animals.
- Normal humans cannot see that relatively dense "body" of a gandhabba. They are in the "para loka" (which is within the human realm).

## What is the Connection of Gandhabba to Paṭisandhi Viññāṇa?

9. Another phrase used in some suttā to indicate a manomaya kāya of a human or animal (i.e., a gandhabba) is patisandhi viññāna.

- As we had discussed before, a human gandhabba could live for thousands of years until the end of that human existence of "human bhava." During that time, it can give rise to many "human lives" ( $j \bar{a} t i$ ) with different physical bodies.
- For example, suppose one of those human $j \bar{a} t i$ ends. At that moment, the gandhabba comes out of the dead body and waits for another "matching womb." (Gati of the gandhabba has to match those of the parents, especially the mother). When a matching womb becomes available, gandhabba is drawn to that womb. That is described in the post, "Buddhist Explanations of Conception, Abortion, and Contraception."
- The WebLink: suttacentral: Mahā Tanhāsañkhava Sutta (Majjhima Nikāya 38), describes that as "descending of the gandhabba to the womb." WebLink: suttacentral: The Mahā Nidana Sutta (Dīgha Nikāya 15) it is stated as "paṭisandhi viñ̃̄̄ana descending to the womb." That is because a paṭisandhi viññāna created that gandhabba. That is discussed in detail in the post, "Gandhabba State - Evidence from Tipitaka."

## The Physical Body Shields Manomaya Kāya of Humans and Animals

10. A question may have come up in the mind of some readers. Why cannot a gandhabba in a human physical body directly sense the outside world without the help of the five physical senses (eyes, ears, etc), if the brahmā can do that?

- The dense physical body shields the manomaya kāya of the gandhabba. As long as the gandhabba is inside the physical body, it is unable to get those "sense inputs" directly. Those sensory inputs come through our "sense doors", eyes, ears, nose, tongue, and the body. The brain processes those signal and transmit them to the gandhabba (manomaya kāya). See, "Brain - Interface between Mind and Body."
- We can compare this situation to a human operator inside an enclosed military tank. That operator cannot see or hear anything outside. Audio and video equipment mounted on the tank sends those signals to an on-board computer, which analyzes and displays them for the operator.
- In that analogy, video camera and audio equipment mounted on the tank act like the eyes and ears of a human. The computer is like the brain. Without getting those signals, the operator is totally blind and deaf to the outside world. In the same way, the manomaya kaya cannot receive those sense inputs if the eyes are ears are damaged.
- A detailed discussion at: "Our Mental Body - Gandhabba."

11. But that manomaya kāya can be "kicked out of the physical body" in a traumatic situation, mostly in cases of heart operations; such claims are categorized as "out-of-body experiences" (OBE). In such cases, some patients have reported being able to see doctors perform operations on their own bodies from the ceiling (with their manomaya kāya).

- It may also happen to people whom the doctors thought had died, but "come back to life" within a short time. They report being able to travel with their manomaya kāya. Such cases are "near-death experiences" (NDE).
- Some others report being able to do "astral travel" with their manomaya kāya whenever they like, see, "WebLink: wikipedia.org: Astral projection." At least some reports in this category seem to be valid. Reports of OBE and NDE are more trustworthy, because doctors and nurses confirm the accounts of those patients.
- These are discussed in the post, "Manomaya Kāya and Out-of-Body Experience (OBE)."

### 5.2.4 Four Types of Births in Buddhism

July 30, 2022 (revised \#11, \#12 same day); revised \#3, \#9 on Aug. 1, 2022
Buddha explained that there are four types of births: jalābuja (womb), aṇlaja (egg), samisedaja (chemical), and opapātika (spontaneous). However, the other three types depend on an opapātika birth first occurring at the cuti-patisandhi moment. [jaläbuja : [adj.] born in a placenta; viviparous. andaja : [adj.] oviparous; born of an egg. (m.) a bird; a serpent. samsedaja : [adj.] born from moisture. opapātika : [adj.] arisen without visible cause; born spontaneously.]

## Introduction

1. There are several suttas where the Buddha explained the four types of births: andaja, jalābuja, samisedaja, and opapātika. For example, in "WebLink: suttacentral: Mahāsīhanāda Sutta (MN 12)." the Buddha explains, "Catasso kho imā, sāriputta, yoniyo-Aṇ̣dajā yoni, jalābujā yoni, samisedaja yoni, opapātika yoni." That means "Sāriputta, there are four kinds of births-Born from an egg, from a womb, from chemical composition, or spontane ously."

- It is a good idea to read the English translation there, even if not perfect, to get an idea of not only the four types of birth but also about births in various realms, including the four lowest realms. One could start at, "Sāriputta, there are these four kinds of reproduction. What four?"

## Spontaneous (Opapātika) Birth Is the "Seed" for the Other Three Types of Birth

2. Let us briefly discuss the four types of births listed above. As we will see below, the spontaneous or opapātika birth must occur first for the other three types to proceed (in situations where one or more of those three types come into play.) Those three types of births are predominant only in the human and animal realms.

- In the six Deva and twenty Brahma realms, only opapātika births take place. Devas and Brahmas are born in their "final form" spontaneously. They live their whole lives (ranging from millions to billions of years) in that form. Of course, they have subtle "energy bodies" that are invisible to us.
- When a human existence (bhava) is grasped at the pattisandhi moment (after leaving previous existence in one of the 31 realms), kammic energy creates a gandhabba/manomaya kāya first via an opapātika birth. A gandhabba also has an invisible "energy body" (like Devas and Brahmas) with a hadaya $v a t t h u$ and five pasāda rūpa. That gandhabba MAY NOT be born with a physical body of a human (with a jalābuja birth) for years after that.
- As explained in the post, "Bhava and Jāti - States of Existence and Births Therein" a human gandhabba's lifetime could be many thousands of years. That gandhabba may be born with a physical human body many times during that lifetime. Many "rebirth accounts" by children worldwide confirm that rebirths with human bodies happen with gaps of several years between consecutive births. Those are consecutive "womb-born" (jalābuja) births for a single human gandhabba. On the other hand, getting another human bhava is extremely rare; see "How the Buddha Described the Chance of Rebirth in the Human Realm."

## Births With Physical Human Bodies Are "Jalābuja" Births

3. Any birth among the 31 realms occurs due to a kamma vipāka. The first step is to be "born into a certain bhava," for example, "human bhava" or Deva bhava. But there is a crucial difference between what happens next in those two cases.

- A fully-formed Deva is born with an opapātika birth and will live through the whole life in that Deva realm.
- Similarly, only the subtle (and invisible) manomaya kāya of a gandhabba is born when a human bhava is grasped with an opapātika birth. But that will be followed by a jalābuja birth at some point. That gandhabba is pulled into a mother's womb when a "matching womb" becomes available. Then a human baby will be born with a physical body after nine months. Such a birth belongs to the "jalābuja" type of 31 above.
- A human with a physical body lives in "this world (ayam loka)," and that same human in the absence of a physical body lives in the "other world (para loka)." Thus, until the end of the human bhava, many "back and forth" between the "two worlds" occur. See "Gandhabba Sensing the World - With and Without a Physical Body."
- Let us summarize for clarity.

## Devas/Brahmas Have Only Opapātika Births, Humans Have Opapātika and Jalābuja Births

4. Any Deva or a Brahma has only the opapātika birth (i.e., one $j \bar{a} t i$ per bhava.)

- On the other hand, to be born with a physical human body like ours, there must be two stages. First, a human gandhabba is born in an opapātika birth (in the "upādāna paccayā bhava" step in Paticca Samuppāda.) Then that gandhabba gets into a mother's womb and will be born a human baby nine months later. That second birth is a jalābuja birth or "birth from a womb" with "breaking out of the amniotic sac." As mentioned above, there can be many jalābuja births for a human gandhabba. These are the "bhava paccayā jāti" in Paticca Samuppāda.
- That explains many rebirth accounts. The Buddha emphasized that it is extremely rare to be born human; see."How the Buddha Described the Chance of Rebirth in the Human Realm." Does that mean there is a contradiction with rebirth accounts? No.
- It is extremely rare to be born in the human realm as a human gandhabba with an opapātika birth. But once becoming a human gandhabba, there can be many births with different physical bodies (jalābuja birth). A physical human body dies in about 100 years. But that is not the end of the human bhava. The human gandhabba comes out of the dead body and can be reborn with a different body. There was a good discussion on a fascinating rebirth account at the forum that could be informative: "WebLink: suttacentral: PureDhamma Forums: Rebirth Account of Dorothy Eady."

## Animal Realm Has All Four Types of Births

5. For an animal, the first opapātika birth produces an animal gandhabba. Then, one of the remaining three modes can apply to give birth to an animal with a physical body that we can see.

- Some animal gandhabbā are born with physical bodies via womb-births (jalābujā) like humans. Some examples are monkeys, lions, deer, etc.
- Chicken, birds, etc., are born from an egg (aṇdajā birth). Here, for example, a "chicken gandhabba" will be drawn into an egg growing inside a chicken. After the chicken lays eggs, those eggs will hatch, and chicks will come out.
- The last mode of samisedaja is rare for big animals and applies primarily to microscopic animals. Here the required "chemical base" for the gandhabba evolves naturally in rotten meat or leaves. This type of birth has not been confirmed by science yet.
- Note that in all those cases, a "seed" (manomaya kāyalgandhabba) must have been first produced by kammic energy, just like in the case of a human.

6. Let us discuss an animal's birth for clarification.

- For example, a fly lives in a physical body only for a few weeks before dying. However, that "fly existence" (bhava) may last thousands/millions of years. When a fly dies, its manomaya $k \bar{a} y a / g a n d h a b b a$ will come out and wait until getting into another "fly egg." It will be reborn countless times as a fly with wings (of course, the "fly gandhabba" will be invisible, just like a "human gandhabba.") That is an "egg-born" (andaja) birth.
- Many animals, especially small ones, have lifetimes much shorter than humans. But their "animal bhava" can be millions of years long. Regardless of which of the three types of births is followed by an opapātika birth of an animal, there will be many "births with physical bodies" for that "animal gandhabba." That is why it is critical to understand that there can be many $j \bar{a} t i s$ within a bhava for humans and animals. See "Jāti- Different Types of Births."

## Current Confusion About "When a Baby Becomes Conscious/Human"

7. We see a lot of confusion these days about "when a baby can be called human"?

- These days in the US, there are many "theories/speculations" about when a baby becomes "fully conscious." Then that evolves into arguments about "a baby not being human" up to a few days, a few months, or even at birth. Some even speculate that since a child cannot "think rationally" until at least a couple of years of age, they may not be "human." That is ridiculous!
- With that argument, a person in sleep or under anesthesia can be categorized as a "non-person" because they are unconscious! That would mean killing a person while in sleep, under anesthesia, in a vegetative state due to brain damage, etc., would be legal!
- I have discussed situations where people in vegetative states fully recovered; see "Persistent Vegetative State - Buddhist View." Further details in "Brain and the Gandhabba."

8. A zygote in a womb becomes human as soon as a gandhabba merges with it!

- See "Buddhist Explanations of Conception, Abortion, and Contraception"
- It does not matter whether people can make ridiculous arguments like those in \#7. Aborting a baby anytime after conception is a pān $\bar{a} t i p a ̄ t \bar{a}$ or "taking a life," not just any life, but a human life!

## The Physical Human Body Is Just a Shell - Gandhabba Makes It Alive

9. Recent accounts of Near-Death Experiences (NDE) show that human life is much more complex than many believe. A physical body without a gandhabba inside is lifeless.

- NDE accounts confirm that the physical body shows no sign of life (heartbeat, pulse, brain activity, etc.) for many minutes. The startling fact is that during that time, that person had been watching the whole situation from the ceiling of the hospital room!
- A gandhabba can see without "physical eyes" while outside a physical body. This critical point has been illustrated in the following video. The woman had never experienced vision (due to her physical eyes being damaged), and she could see for the first time in her life when she had an NDE. The ability to see goes away after the NDE experience once the gandhabba goes inside the physical body.
WebLink: youtube: Near Death Experience - Blind woman 'sees' while out of body
- Details: "Near-Death Experiences (NDE): Brain Is Not the Mind."

## Scientific Consensus - Life Begins With a Zygote

10. Most scientists agree that human life begins at conception, i.e., fertilization or the "joining of an egg and a sperm" to produce a zygote.

- See, for example, "WebLink: PDF Download: Embryonic Human Persons-2009" and "WebLink: PDF Download: Personhood status of the human zygote,-2017."
- That position is close to the Buddhist position.
- The only difference is that, in Buddha Dhamma, a human gandhabba must merge with a zygote for that zygote to become alive. A zygote by itself is inert, just like an egg or a sperm.

11. We don't need scientific evidence to realize that a fetus inside a womb is alive. How can anyone watching the following videos say that a baby growing inside a womb is not alive?

WebLink: youtube: Is an Embryo a Person? | When Does Life Begin?
WebLink: youtube: Fetal Development Week by Week Overview

- The following additional information may be helpfil to some readers.

## Javana Power in Kamma Viññạ̄a Responsible for All Births

11. As discussed above, any type of birth starts with an opapātika birth. Furthermore, the subtle manomaya kāya produced by kammic energy is unimaginably "small." We can consider an analogy to get an idea. If you take a drop of water and put it on a hot pan, it will vaporize instantly, and you will barely see a plume of water vapor. Now, imagine that drop of water to be a million-fold smaller. That is an analogy of the "size" of the manomaya kāya. That is why scientists cannot detect any change in the zygote when a gandhabba merges with a zygote at conception.

- When a baby grows inside a womb, food to grow the baby's physical body comes from the mother through the umbilical cord. As that physical body grows, the manomaya kāya/gandhabba expands (like that plume of water vapor) to spread throughout the physical body.
- Several posts have explained that the all-important sensing elements (hadaya vatthu and five pasāda $r \bar{u} p a$ ) are in that invisible gandhabba kāya. See "Brain and the Gandhabba."

12. It is a good idea to make the connection to Paticca Samuppāda as well.

- The uppatti Pațicca Samuppāda starts with "avijjā paccayā sañkhāra" and ends with "upādāna paccayā bhava" and "bhava paccayā jāti." The "upādāna paccayā bhava" step is where a new opapātika birth takes place. (Then, the "bhava paccayā jāti" step leads to a jalābuja birth for a human; for an animal, it could be any of the aṇ̣aj $\bar{a}$, jalābuj $\bar{a}$, or samisedaja birth, depending on the type of animal.)
- The steps "avijjā paccayā (abhi)sañkhāra" through "(kamma)viññāna paccayā nāmarūpa" steps MUST produce energy to create the manomaya kāya associated with the opapātika birth. That energy is the javana power in kamma viññāna! See "Javana of a Citta - The Root of Mental Power."
- It is, in fact, in the key step of "(kamma) viñnāṇa paccayā nāmarūpa" that the mind "combines nāma and rūpa" to generate kammic energy for future salāyatana (i.e., sensing elements) in manomaya kāya of future opapātika births. That is a subtle point. See "Viññāna Paccayā Nāmarūpa."

### 5.2.5 Buddhist Explanations of Conception, Abortion, and Contraception

Revised with a new title: November 10, 2018; revised November 14, 2018 (rewritten and replaces What does Buddha Dhamma (Buddhism) say about Birth Control?); revised January 5, 2020; revised \#8 on December 28, 2020

## Introduction

This completely revised post is necessary to continue our discussion on Paticca Samuppāda: "Paticca Samuppāda - Not 'Self' or 'No-Self."

1. Buddhist explanation of conception is in several Tipitaka sutta . Following is a simple account based on those sutt $\overline{\text {. It }}$ is compatible with modern science but provides more details than science.

- Moral issues regarding abortion and birth control have clear answers in Buddha Dhamma. In particular, at what stage of pregnancy does a human life first appear in a womb?
- Modern science cannot determine the "time of conception" or "when a human life starts in a womb."
- Let us first review the current scientific knowledge base.

## Current Scientific Knowledge

2. First of all, there must be a fertilized egg (zygote) in the womb. The fertilization happens when a sperm from the father combines with an egg from the mother to form a zygote or a fertilized egg.

- During the mother's menstrual cycle, one egg (ovum) is usually released from one of the ovaries and swept into the funnel-shaped end of one of the fallopian tubes.
- After intercourse with the father, If a sperm penetrates the egg there, fertilization results, and the fertilized egg (zygote) moves down the fallopian tube toward the uterus.
- The "live zygote" enters the uterus in 3 to 5 days. In the womb, the cells continue to divide, becoming a hollow ball of cells called a blastocyst. Inside the womb, the blastocyst implants in the wall of the uterus, where it develops into an embryo attached to the placenta and surrounded by fluid-filled membranes.
- See,"WebLink: merckmanuals.com: Stages of Development of the Fetus."

3. It is important to note that science does not have an answer to the question of why all zygotes do not result in pregnancies, and why some couples who could not have babies for many years all of a sudden have success.

- Science cannot explain how an inert zygote (a cell) becomes "alive" and a living baby comes out of the womb.
- Furthermore, science cannot say WHEN that inert cell, the zygote, becomes alive. Some say a live baby is there as soon as a zygote is formed, and others say there is no life there until a heartbeat can be seen.
- For more details on the controversy on the "time of conception" see, "WebLink: wikipedia.org: Beginning of pregnancy controversy."

## Buddhist Explanation - Mind is in the "Mental Body" or Manomaya Kāya

4. We humans have two "bodies." Manomaya kāya is the "mental body" (with a trace of matter) born at the beginning of the human existence or human bhava.

- Here is "body" means a "collection." The physical body is a collection of "physical body parts." The mental body has only a trace of matter and is a collection of "mental parts" (vedanā, saññ̄a, Sañkhāra, and viññāna.) For details, see "Human Life - A Mental Base (Gandhabba) and a Material Base (Cell)" and "Clarification of"Mental Body" and "Physical Body" - Different Types of 'Kāya'." Those two were posted earlier in this series of posts.
- The mental body is referred to as "gandhabba" in the Tipitaka. See, "Gandhabba State - Evidence from Tipitika." However, for the current discussion, we do not need details on the gandhabba.
- Thus, a "human gandhabba" has only a trace of matter, and thus, we cannot see it. Some sutt $\bar{a}$ refer to the gandhabba state as "paṭisandhi viññāna." See, "Gandhabba State - Evidence from Tipitaka."

## A Human Existence Can Last Thousands of Years

5. A human existence (bhava) can last thousands of years, and that is the lifetime of the gandhabba or the mental body.

- On the other hand, a physical human body lasts only about 100 years. With the death of the physical body, the gandhabba comes out and waits for another womb. Thus, there can be many births ( $j \bar{a} t i$ ) as a human within a given human existence (bhava). See, "Bhava and Jäti - States of Existence and Births Therein."
- In between successive births with "human bodies," the gandhabba (mental "body") lives in the "para loka." The para loka co-exists with our human loka, but we cannot see those subtle "mental bodies" of gandhabbas.

6. A new human existence (bhava) does not start in a womb. It begins at the cuti-patisandhi moment when the previous bhava comes to an end. For example, if a deva dies and becomes a human, a human gandhabba (fine "mental body") will be formed at the time of death of that deva.

- Then that human gandhabba will have to wait until a suitable womb becomes available. By "suitable," it means that the gati (loosely related to character/habits) of the gandhabba have to match those of the parents, especially the mother.
- Gati is an essential concept in Buddha Dhamma. But it is absent in modern texts. Search "gati" on the top right search box to find about "gati." I have discussed Tipiṭaka references in several posts. See, "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsava)" and references therein.

## A Zygote Becomes Alive When a Gandhabba Takes Possession of It

7. With the above background, now we can make the connection to current scientific understanding and extend that understanding. As science has shown, human life arises with a single cell called a zygote; see \#2 and \#3 above.

- A gandhabba may have to wait for even many years until a suitable womb becomes available. Then, kammic energy will pull it into that womb. And the gandhabba will merge with the zygote in the womb that was created by a sperm fertilizing an egg.
- A gandhabba entering a womb is sometimes referred to as "paṭisandhi viñnãạa descending to a womb" as stated in the Mahā Nidāna Sutta (DN 15.) In the Mahā Taṇhāsañkhaya Sutta (MN 38) it is stated as, "a gandhabba descending to a womb."
- As we saw above, Nature automatically matches the "gati" the parents (we can say that matching the zygote that was formed by the union of the mother and father), and a "matching" gandhabba will be "pulled in" by the kammic energy.
- However, the gandhabba concept is different from the idea of a "soul." A gandhabba will keep changing during its lifetime. Furthermore, it will make a drastic change when the lifetime of the human bhava comes to an end. At that time, it can become an animal, a Deva, a Brahma, etc.

8. Therefore, a zygote just provides the "material basis" (zygote) for the gandhabba to form a physical body. (That zygote develops when an egg combines with a sperm.)

- The "blueprint" for that physical body (i.e., the gandhabba) is in the patisandhi viññāna. However, the physical body will also take into account the features of the mother and father via that zygote; see \#3 and \#4 above.
- If the mother (and father) are unable to have a child due to a previous kamma vipāka, the resulting zygote will be a "dud." Thus no gandhabba can "descend to the womb," i.e., pregnancy is not possible.
- All this is discussed in more detail in several posts, including "Ghost in the Machine - Synonym for the Manomaya Kāya?," "Manomaya Kāya (Gandhabba) and the Physical Body," and a more technical description in "Cuti-Patisandhi - An Abhidhamma Description."
- Once a gandhabba takes possession of a zygote that zygote grows into a baby in the mother's womb via several steps (consistent with current science.) Those stages are listed in the "WebLink: suttacentral: Indaka Sutta (SN 10.1)"

## The 'Time of Conception" is Precise

9. A gandhabba can take hold of that fertilized egg (zygote) any time after its formed.

- Therefore, the conception of a new baby happens when the life-less zygote becomes "alive" with the merging of the gandhabba. That is the time of conception, and it happens very early, generally within a day after intercourse.
- Once a gandhabba merges with the zygote, the cells of the zygote start repeatedly dividing as the zygote moves down the fallopian tube. Thus cell division and the formation of a baby DOES NOT start unless and until a gandhabba merges with the zygote.

## Effects of Condoms/Birth Control Pills

10. Now let us see what happens with a condom or with birth control pills.

- With the use of a condom, an egg will not be able to come to contact with a sperm to form a zygote. Thus there will be no "material basis" or a zygote in the womb.
- If the mother is taking birth control pills, again, that will prevent the formation of a zygote for a gandhabba to start a new life.
- Thus it is clear that there are no moral issues involved in either of those two cases. Terminating a life does not happen in either case.

If a Gandhabba Is in the Womb, There Is a Human There
11. On the other hand, once a gandhabba "is in the womb," then there is a living being in the womb.

- Any procedure to remove the live gandhabba after this "real conception" is equivalent to killing a human. The exact time of the removal procedure does not matter. It could be a month before the birth of the baby or just a day after the gandhabba came into the womb.
- The only uncertainty about the "time of conception" is a few days. Conception happens when the gandhabba takes hold of the zygote. That could happen immediately after intercourse or a few days after sex.
- Thus Buddha Dhamma provides an unambiguous picture of the moral issues involved in the birth control process.

## Other Aspects

12. The death of a physical body of a human does not mean its existence as a human has ended. If there is remaining "kammic energy" for the human bhava left, the mental body (gandhabba) will come of the dead physical body and will wait for another suitable womb.

- However, if the "kammic energy for the present human bhava" is exhausted at the time of death, then the transition to the next "bhava" or existence happens at the dying moment. If that new existence is that of a cat, a "cat gandhabba" will leave the dead body.
- Here again, the "cat gandhabba" will have to wait until a suitable "cat womb" becomes available. At that time it will go into the womb of the "cat mother." And a baby cat will be born later on.
- However, except for humans and animals, a gandhabba is not involved in most other realms. That is true, for example, in Deva and Brahma realms.

13. Sometimes the child may have different "gati" compared to the parents. For example, a "fairly moral" couple may have a child with violent character qualities. That could be due to a drastic change in the mindset of the mother during that "conception window." (Between the formation of the zygote and a gandhabba "descending" to the womb.) Violent rape is one possibility.

- Furthermore, this is also why mothers who could not get pregnant for years, suddenly get pregnant. This happens during a time when the mother most likely has a "personality shift" or a significant change in her mental state.

## Cloning - A Detailed Analysis

14. I have revised and updated another relevant post, "Cloning and Gandhabba."

- More details on the formation of the zygote are discussed there, before the discussion on cloning.
- We will make the connection to Paticca Samuppāda in the next post.

### 5.2.6 Cloning and Gandhabba

March 5, 2018; revised January 5, 2020; January 8, 2020

## Introduction - Cloning of Dolly the Sheep

1. Cloning of various types of animals has become common since Dolly was cloned in 1996. Three sheep contributed to the birth of Dolly. One provided the egg, another the DNA (donor), and a third (surrogate mother) carried the cloned embryo to term.

- Obviously, a clone has most similarities with the donor and there is no "father" involved (no sperm is needed). Are these consistent with the Buddha Dhamma, and how does a gandhabba play a role?
- Also, there are some myths associated with cloning, such as whether "totally unexpected creatures or monsters" can result from cloning.
- Therefore, it is good to review the key steps in the cloning process and to clarify these issues.

## What Happens in a Normal Conception?

2. But, first, we need to look at what happens in a "normal conception" where an egg and a sperm combine to form the unique cell called a zygote. This was explained in the post, "Buddhist Explanations of Conception, Abortion, and Contraception." Here, we will first extend that discussion.

- The "material base" for a new life is a zygote. In a natural conception, the zygote is formed by the fertilization of a female egg by a sperm from a male. Then a gandhabba can come into the womb and provide the "mental basis" for the new life, as explained in the above post.
- There are two things REQUIRED to make a zygote. The first requirement is the egg that comes from the mother and is unique. However, eggs have only 23 chromosomes instead of 46 chromosomes in all other cells. Therefore, the second requirement is to somehow have 46 chromosomes in the nucleus of an egg.
- Let us discuss the two factors in a bit more detail since this was not discussed in the previous post.

## An Egg Is Unique

3. Eggs are the most remarkable of cells. They can give rise to a completely new individual within a matter of days or weeks in some animals. No other cell in a higher animal has this ability. Egg cells also contain many mitochondria which supply the energy required for cell replication and division.

- However, an egg must be "activated" first in order to start the cell division process. It is activated only when its nucleus has a full complement of 46 chromosomes or 23 pairs.
- You can read more about the role of the egg at, "WebLink: discovermagazine.com: How Does a Single Cell Become a Whole Body?."

## Activation of the Egg by the Presence of 46 Chromosomes

4. Now, to the second factor. Most cells in a body have 23 pairs of chromosomes, for a total of 46. The egg and sperm are different. Each egg and each sperm has only one set of 23 chromosomes, not a pair.

- When fertilization occurs in normal conception, the 23 chromosomes from the egg combine with the 23 from the sperm to create a zygote or a fertilized egg with the full complement of $\mathbf{2 3}$ pairs of chromosomes. This is shown in the following diagram (Fertilization. Zygote is egg plus sperm genetically different individuals. Fusion of two haploid gametes to form a diploid zygote):

- In this case of normal conception, those two nuclei from mother and father will combine to form a single nucleus in the yellow cell (egg), which is now the zygote.
- So, we see that in normal conception, the nucleus of the zygote - or the result of the merger of the egg with the sperm - will be a cell with a nucleus that has half chromosomes from the mother and the other half from the father. Thus, DNA from mother and father BOTH contribute to the zygote in normal conception. This is why the baby will have bodily features from both parents (a mix).

## Science Cannot Explain Why Some Zygotes Are "Duds"

5. When the above process is complete, the egg becomes a zygote. At this point, the cell division is supposed to activate. However, some zygotes do not activate and thus do not lead to a fetus or a baby.

- Scientists do not know why the zygotes formed by the union of some couples do not lead to cell division, i.e., why certain couples cannot have babies.

## It Is a Gandhabba That "Activates" the Zygote!

6. The only difference in Buddha Dhamma is that the cell division starts ONLY IF (and when) a gandhabba descends to the womb and merges with that zygote.

- A new animal or human life cannot be initiated without a gandhabba (or the "mental body" or "manomaya kāya.")
- In the case of a natural conception, the matching gandhabba (or pațisandhi viñ̃āạa) will descend to the womb and will be merged with that fertilized egg to complete the conception. However, if a previous kamma vipāka for the mother and father does not allow a conception, a gandhabba WILL NOT be drawn into the womb.
- Otherwise, a matching gandhabba with gati that are a mix of gati of mother and father will be drawn into the womb. That is why a child is likely to have gati which are a mix of the two parents. That is in addition to having physical features of the parents.

## A Gandhabba (Mental Body) Makes the Zygote Alive

7. Without the "mental component" or the gandhabba, there is no life! A zygote is an inert cell and has no "sentient life." The zygote that results from the merger of the egg and the sperm is just the "material base" and not a "new life."

- It is only when the gandhabba descends to the womb and takes possession of that zygote that it "becomes alive."

## The Procedure of Cloning Versus Natural Conception

8. The zygote formation is different in cloning compared to the natural conception. In the case of cloning, a sperm from a father is not involved.

- Here the nucleus of the egg is REMOVED, and the nucleus of the "donor cell" with the full set of 46 chromosomes is INSERTED in the egg. That is the key difference in cloning. So, now the nucleus of the egg has the full set of chromosomes needed to start cell division. The basic process involved in cloning is nicely represented by the following diagram:

Somatic body cell with desired genes

9. However, it seems that is not enough to initiate the cell division. An electric shock is required to activate the process (i.e., to initiate cell division of this artificially created zygote.) This is the second difference compared to the natural process.

- Therefore, the artificially modified egg is placed in the womb of the surrogate mother, and an electrical shock is applied to start the cell division.
- The above figure is from the article, " $\underline{20}$ years after Dolly: Everything you always wanted to know about the cloned sheep and what came next." You may want to read that article too.

## A Gandhabba Is Still Needed in Cloning

10. Even though that is the whole picture according to science, Buddha Dhamma says, there MUST be a gandhabba merging with that cell in order to "give it life."

- Just like in the case of natural conception we discussed above, there is no "new life" created with cloning. It just created a suitable "temporary home" for the gandhabba.
- When that physical body dies, the gandhabba would come out and wait for another womb to be ready. Dolly has now died and it is possible that she was reborn as another sheep somewhere.

## Genetic Material Is From One Cell in Cloning

11. The main thing from the above figure in \#8 on cloning for our discussion is that the yellow cell is the egg from the mother. The other cell on the top is from the "donor." It is not sperm but any kind of cell. No sperm is in the picture. Instead of half the genetic material coming from sperm and half from an egg, it all comes from a single cell.

- The unique feature of the egg from the mother is that it allows the growth of a whole animal (with many body parts for doing very different things) just starting with that single cell.
- However, the egg needs to have a full set of 46 chromosomes to form the zygote. In cloning, the whole set comes from the "donor" as shown in the above figure. In a natural conception, half of the
chromosomes come from the mother (egg), and the other half comes from the father (sperm), as shown in the figure above in \#4.
- When an egg starts cell division, it splits - first into 2 , then 4 , then $8,16,32,64$, and so on - it is not merely splitting. It is a complex process that produces descendant cells with a huge variety of shapes and functions: bone cells, nerve cells, red and white blood cells; the cells of the eyes, fingernails, stomach, skin, etc.

## More Information From Scientific Studies

12. Now, in the case of cloning, the following should be clear, according to science:

- The mother that provides the egg, provides the all-important platform for cell division that leads to the formation of the new offspring.
- However, $99 \%$ of the DNA comes from the donor. Therefore, the physical resemblance of the offspring would be to the donor, as is the case with Dolly the sheep.
- The surrogate mother who carries the embryo to term would provide no real contribution to the physical appearance of the offspring, according to science.

## No "Monsters" Will be Created With Cloning

13. Studies done over the past 20 years with different types of animals show that:

- Some people are afraid that cloning can lead to unexpected outcomes like "creating monsters." However, from the above discussion, it is clear that monstrous creatures cannot be expected to form due to cloning. This is because the source of DNA is the donor. Therefore, the clone will look like the donor.
- It is not possible to clone an animal that is identical to the donor. Even if they look similar, their character traits are different.
- The success rate is low, around $10 \%$.
- Those are observations from the cloning studies over the past 20 years. They are consistent with our picture of the gandhabba having gati close to that of the donor. No two animals can be the same. In the case of natural birth, gandhabba's gati will be close to those of both parents.

## Additional Points From Buddha Dhamma

14. That is pretty much the picture in Buddha Dhamma too, but with the following exceptions:

- All three involved in the cloning process would contribute to some extent to the "mental qualities" in selecting a matching gandhabba (which happens automatically.) However, the major contribution is likely to come from the donor.
- Of course, we can only make a guess, since the Buddha never had to explain this particular case. The Buddha specifically mentioned that the "mental state of the mother" at the time of gandhabba descending to the womb is a factor. This is why even the most moral mother may, in a few cases, end up with a baby who turns out to have immoral gati.
- Therefore, the surrogate mother - within whose womb the actual descending of the gandhabba would occur - could play some minor role in determining the behavior of the baby, but not the physical appearance, i.e., the developing embryo would be affected by the mood and health of the surrogate mother.

## Conclusion - New Life Cannot Be Created

15. The word "clone" is defined as, "an organism or cell produced asexually from one ancestor or stock, to which they are genetically identical."

- However, a clone will NEVER be exactly the same as the "donor." They are two different "lifestreams." The Buddha taught that each lifestream has existed "forever" and we discussed Tipiṭaka references in, "Origin of Life - There is No Traceable Origin."
- All living beings in existence now have been in the rebirth process forever. The Buddha said that there is no discernible beginning to any living being.

16. The main point from Buddha Dhamma is that a new life cannot be created by any means, whether in a laboratory or anywhere in the universe. This is the only inconsistency with science here, and it is a major inconsistency.

- Living beings just keep switching from realm to realm, but most are trapped in the lower realms. While in the human or animal realms, they spend a lot of time as gandhabbas; see, "Gandhabba - Only in Human and Animal Realms."
- So, an animal like Dolly would be switching from a "sheep gandhabba" to a sheep to a "sheep gandhabba" to a sheep... until the kammic energy for the "sheep bhava" or "sheep existence" runs out.
- When the kammic energy for the "sheep bhava" runs out, it will grasp another existence. There is no end to this process until reaching the Arahanthood.

17. So, I hope it is clear that cloning itself is consistent with Buddha Dhamma, and specifically with the concept of gandhabba.

- I wrote this post in response to a question at the discussion forum: "Gandhabba and Cloning." If there are more questions or comments, we can discuss them there.

### 5.2.7 Living Cell - How Did the First Cell Come to Existence?

July 24, 2019

## Relevance to Buddha Dhamma

1. A discussion on the origins of a first cell will help understand the fundamentals of Buddha Dhamma, in particular, the power of kammic energy.

- This discussion is about how modern science is beginning to confirm Buddha Dhamma. Modern science (biochemistry) provides additional information from a "material aspect," i.e., on the basic building block of a physical body (cell). Even though many scientists believe that a living cell can arise by random combinations of inert molecules, there is no evidence to support that hypothesis.
- Of course, science has not yet even realized that there is a "mental body" too, i.e., the vital role of the manomaya kāya.

2. Human life requires two primary components: a mental body (manomaya kāya or a kammaja kāya) and a material body (āhāraja kāya), as I pointed out in the previous post; see, "Clarification of "Mental Body" and "Physical Body" - Different Types of "Kāya."

- The mental body has existed forever (in different forms); it is called a gandhabba for humans and animals. Even though we are all humans at present, we had been born devās, brahmā, animals, and of course "hell beings"; it is just an unbroken "lifestream."
- A cell is the basic building block of a physical body, which starts with a single cell (zygote) created by the union of mother and father. That single-cell multiplies over time (the physical body of an adult has trillions of cells); see, "Buddhist Explanations of Conception, Abortion, and Contraception."
- For any given conscious living being, there is no traceable beginning to a first manomaya kāya. When an existing manomaya kāya dies, mental energy or kammic energy creates a "new manomaya
$k \bar{a} y a . "$ Furthermore, cells make up human (and animal) bodies, and the "first cells" on this Earth were created by kammic energy long ago as we discuss below. All cells of current living beings come from those first cells!

## How Cells Come to Existence

3. Biochemistry says all cells existing now come from pre-existing cells. How did the first cells on Earth come to existence? Creationists and evolutionists say those "first cells" could only have come from one of two possible places:

- Spontaneous creation - Random chemical processes created the first living cell.
- Supernatural creation - God or some other supernatural power created the first living cell.
- However, both sides have not even realized that there is a third possibility, i.e., "first cells" were created via kammic energy, which is the same as "mental energy."

4. The Buddha taught that there is "no traceable beginning" to life. Therefore, it is not possible to trace back to a "first manomaya kāya (mental body)." When a human (or an animal) is born, it has a physical body in addition to the manomaya kāya. That physical body is made with cells.

- Of course, the Buddha did not talk about cells. I am just bridging that part of the puzzle, based on modern science and Aggañña Sutta; see, "Buddhism and Evolution - Aggañña Sutta (DN 27)."
- Now scientists can perform the "cloning" of animals. That is not the same as the creation of a new life form. Two existing cells create a zygote, and then an existing gandhabba can the "take possession" of that zygote; see, "Cloning and Gandhabba."

## Origins of "First Cells" on Earth

5. It is essential to realize that Darwin's theory of evolution is NOT about the "evolution of a cell." It is about the evolution of advanced species of plants and animals STARTING WITH simpler lifeforms with a single cell.

- Most scientists who believe in the theory of evolution of SPECIES do also think that it MAY BE possible that A FIRST CELL also evolved starting with inert matter.
- Some scientists have concluded that random interactions of inert molecules cannot lead to the formation of a living cell. But they erroneously concluded that therefore life must have been created by a Creator God.

6. Since Robert Hook discovered the existence of cells in 1665, scientists have uncovered a lot of information about cells. The current "cell theory" in biochemistry has two fundamental axioms:
i. All living things (living beings or living plants) are made of cells,
ii. New cells are made by "cell division," i.e., by the division of existing cells.

- Biochemistry books do not discuss how "first cells" came into existence!

7. Therefore, the question remains as to how the "first cells" on Earth came to life. Evolutionists say random combinations of inert molecules created them.

- Despite what you may have heard in science fiction or popular science literature, scientists are NOT EVEN CLOSE to making even the simplest cell in a laboratory.
- They will NEVER be able to do so. Once we discuss the current status of cell research, you will see why.
- On the other hand, creationists say a Creator God created all life.

## Buddhist Explanation of Life

According to Buddha Dhamma, a conscious living being has a mental body (manomaya kāya), and some may have a physical body (āhāraja kāya). In Brahma realms, there are no physical bodies like ours (therefore no cells).
8. A NEW living being can never be created starting from scratch. A dying manomaya kāya gives rise to a new one. Any living being creates CAUSES and CONDITIONS that lead to the next existence (bhava)!

- For example, one may be born many times with a human body while in the "human bhava," but when the energy for that "human bhava" runs out, that lifestream gets hold of a new bhava (as a Brahma, deva, animal, etc.) because of a strong kamma done in the past, as we discussed in previous posts. Therefore, it is kammic energy that gives rise to a manomaya kāya!
- A new manomaya kāya is ALWAYS associated with a past life. It is just that the form of the gandhabba keeps changing from bhava to bhava, i.e., an "animal gandhabba" or "Brahma manomaya kaya" is different from a "human gandhabba," but the same lifestream can take all those various forms.
- If one can follow that "chain of past lives," one will go through billions of past lives a minute, but will never be able to find a "beginning" life! The Buddha did that upon attaining the Buddhahood, and stated: "bhikkhus, there is no discernible beginning to the rebirth process."; see, for example, "WebLink: suttacentral: Gaddulabaddha Sutta (SN 22.99)":

9. A physical body for a human or an animal is a collection of cells. It starts with a single cell (called a zygote) and grows to a large mass with trillions of cells after a gandhabba (born of a paṭisandhi viñ̃āạa) "descends to the womb" and gets possession of that zygote. For Tipitaka references, see, "Gandhabba State - Evidence from Tipitaka."

- On the other hand, a brahma has no physical body made of cells. It is just the mental body (gandhabba) with a trace of matter at the suddhatthaka level.
- Below, we will discuss how "first cells" on Earth came to existence. We first need to consider how complex a cell is.

## The complexity of a Cell

10. Even the simplest cell is very complex and surprising. Even though nanotechnology has made significant advances, it is nowhere close to being able to make a functioning cell.

- The critical issue is not making new complex DNA molecules, but the following: Those DNA strands in a cell nucleus are "coded with information," just like a computer is programmed.
- Just like a computer program can run by itself and manage a factory, information coded in those DNA strands in the nucleus of the cell control cell's functions.
- This "information" comes not by a Creator and not created via random jostling of molecules in early Earth. It comes from kammic energy, just like a gandhabba is created by kammic energy.

11. In the following video, one can get a good idea about the basic layout and the complexity of a cell.

## WebLink: youtube: Organelles of the Cell (updated)

12. It becomes even more impressive when we look at how small an animal cell is. Here are some rough numbers (in comparison, a mustard seed is 1 to 2 mm in diameter):

- Cell (per side) 0.050 mm (or 50 micrometers).
- Cell membrane 0.000007 mm thick.
- Nucleus (diameter) 0.007 mm .
- Nucleolus (diameter) 0.0025 mm .
- Endoplasmic reticulum: each layer 0.0002 mm ( 0.0001 mm gap between layers)
- Golgi complex 0.007 mm thick, each layer.
- Ribosomes 0.00003 mm ( 30 nanometers) in diameter.

13. But the most amazing thing is not that such a small cell has all that complexity. It is that a cell has a "builtin computer-like program" that manages all cell functions, including what kind of proteins are to produce. Yes. A living cell is a factory that makes proteins in addition to making copies of its DNA.

- In humans, a copy of the entire genome - more than 3 billion DNA base pairs-is contained in all cells that have a nucleus. The DNA from a single human cell has a length of $\sim 1.8 \mathrm{~m}$ or about 6 feet (but at a width of $\sim 2.4$ nanometers).
- This genome has the blueprint for a given human (animal) body.

14. The machinery and the activities inside a cell - which we cannot see with the naked eye - are impressive. As mentioned, a living cell is a pre-programmed, very sophisticated factory. Whatever progress that nanotechnology has made cannot even come close to the level of a cell, as can be seen with the following video:

## WebLink: youtube: Ron Vale (UCSF, HHMI) 1: Molecular Motor Proteins

## First Cells on Earth Created via Kammic Energy (Same as a Gandhabba)

15. At present, the division of existing cells creates new cells of different properties (scientists do not understand how!). A new human baby starts with a single cell (zygote) that is formed by the merger of two cells from the mother and father.

- In the newly-formed Earth, kammic energy created the first cells. That happened a long time after the "first humans" who were without physical bodies. The early humans had very subtle bodies (like brahmã), and thus, they did not have physical bodies with cells. Hundreds of million years later, those early (Brahma-like) humans got back their "human gati," and their bodies become visible with a physical body made of cells.
- The "first cells" come into existence via kammic energies from the past. Once they get started, then the "normal method" of cell division led to more cells (what we see now).
- In the same way, there are no new gandhabbas in the sense of starting a new lifestream. When an existing gandhabba dies (at cuti-patisandhi), a new gandhabba takes its place because of a new paṭisandhi viññāna (via Paticca Samuppāda).
- Therefore, the MIND is the precursor to EVERYTHING. Even plant life has origins in collective kammic energies of all conscious beings on Earth. Thus the Buddha declared, "Manopubbangamā Dhammā.." or "mind is at the forefront of everything in this world."

16. It is essential to realize that the dense physical body, say of a human being, is not directly created by mental energy.

- Mind energy provides the two seeds: gandhabba and the first cell, the zygote. The fusion of two cells from mother and father creates a zygote.
- When a gandhabba merges with a zygote in a womb, that starts a process where no more kammic energy is needed. That first "live cell" multiplies and leads to more and more cells using sustenance from the mother, and that is how an embryo grows. After birth, a baby grows by eating its food.

17. Another critical point is that the cells of ALL LIVING THINGS are similar, and they depend on each other.

- Cells of humans and animals are very similar. The differences come from the variations in the genome (DNA that is inside the cell nucleus).
- Even cells of plants are not that different. The main difference in a plant cell is the presence of chloroplast, which generates energy using sunlight.
- Energy to sustain bodies of humans and animals can be traced back to plants. Even though humans and animals do eat other animals, it is those animals like cows who first extract energy from plants.
- Now we can see how inter-related and inter-dependent ALL LIFE is. And how complicated life is, even at the physical level.
- The mental body (gandhabba) is even more complicated. Only a Buddha can sort out these complexities of life. We are fortunate to live at a time when modern science helps us clarify some of his teachings.

### 5.2.8 Mystical Phenomena in Buddhism?

July 28, 2019; rivised June 9, 2020

## Introduction

Some phenomena may be labeled "mystical" or "incomprehensible" only because there are no rational explanations yet. However, logical explanations become available as science makes progress.

1. There are two essential points to make regarding the series of posts on the "origin of Life," and in general, regarding Buddha's teachings.

- Some characteristics of the other 29 realms in this world may not be compatible with our ordinary sensory experiences. Some phenomena are not "perceivable" or "easily understood" to humans. The Pāli word for "perceivable" is "gocara" pronounced "gochara."
- The second issue is how kammic energy can create a manomaya kāya with the ability to "see" and "hear" without physical eyes or ears. Also, how did those "first living cells" on Earth come to existence? See. "Origin of Life - There is No Traceable Origin."
- However, with the advances made in science, it is now possible to convince ourselves that such phenomena are scientifically plausible. There are no contradictions with science, at least theoretically (i.e., in principle).
- We are fortunate to live at a time when scientific findings show that some of the "hard-to-believe" phenomena discussed in the Tipitaka are consistent with science. In this post, I will start with a couple of such issues (associated with "supernormal powers").

## Non-Perceivability of Some Phenomena

2. First, let me clarify what I mean by "perceivable" or "easily understood." Our six senses can "detect" only a tiny fraction of the "our world."

- We directly experience only the human and animal realms, where living beings can be "seen with our eyes." We have no idea about the "bodies" those living beings in other realms. If we visit a Brahma or a deva domain, for example, we may think that there is "no one there." Their bodies are too wispy to be seen with our eyes.
- Even when scientists probe the universe with their best equipment, they also see only a small fraction of "things" out there. At a base level, science today can account for only 4 percent of the mass of our
universe; see, "The 4 Percent Universe: Dark Matter, Dark Energy, and the Race to Discover the Rest of Reality", by Richard Panek (2011).
- Many things have not been "discovered" by science yet. In particular, nothing significant about the MIND.

## Buddha Dhamma Is Self-Consistent

3. Trying to gauge the validity of Buddha Dhamma with just what we can see with our eyes is foolish. That is like a blind man trying to figure out what an elephant is like, by touching just a leg of the elephant; see, "How do we Decide which View is Wrong View (Ditthi)?."

- A frog living in a well does not know anything about the wider world of 31 realms. Similarly, an average human - including scientists - faces the problem of trying to figure out the "reality" by only using data available through our limited six senses. With the help of scientific instruments, we are making progress.
- Thus a scientific theory can't be ever "complete" as proven by the mathematician Kurt Gödel; see, "Gödel's Incompleteness Theorem." However, science is helping to clarify some concepts.
- Unless one attains abhiññā powers and can visit those realms, one would not be able to verify such characteristics of other domains. For example, we cannot see their ultra-fine bodies; see, "Clarification of "Mental Body" and "Physical Body" - Different Types of "Kāya"."
- However, if one spends time learning Dhamma, one would be able to see the truth of them. We will discuss a few examples below. Also, see "Buddha Dhamma: Non-Perceivability and Self-Consistency."

## Touching the Sun - Is That Possible?

4. Some phenomena described in the Tipițaka seem to be "mystical" or "beyond comprehension." But they are entirely feasible based on the advances in science. I will discuss a couple of examples in the Tipitaka to illustrate this point. In the "WebLink: suttacentral: Sāmaññaphala Sutta (DN 2)", it is stated, ".. imepi candimasūriye evaimmahiddhike evaimmahānubhāve pāninā parāmasati parimajjati.." or, ". he touches and strokes the Sun and the moon, so mighty and powerful..."

- This verse describes the powers of a yogi with supernormal capabilities (Iddhividha ñāna). How can one 'touch and stroke the Sun?" Isn't the Sun supposed to be extremely hot?
- Here, the yogi is in the manomaya kāya, not with his physical body. Of course, a physical body will burn well before it gets close to the Sun. The key is to note that the manomaya kāya has just a few suddhaṭthaka. For example, a human manomaya kāya has a hadaya vatthu and five pasāda rūpa and each is a suddhatthaka; see, "Clarification of "Mental Body" and "Physical Body" - Different Types of"Kāya."
- A suddhatthaka is the smallest unit of matter in Buddha Dhamma and is billion times smaller than an atom in modern science. Therefore, the manomaya kāya of a yogi is unimaginably tiny; it is a "packet of energy."

5. An entity at the level of suddhatthaka will not be affected by the Sun's high temperatures or even by a supernova explosion. We can understand that from modern science as follows: A regular fire can burn dense things like wood or paper. At higher temperatures, melting ovens can melt steel bars. But neither of those can burn molecular gases like hydrogen or nitrogen. Those gases burn at even higher temperatures.

- However, even at the temperatures generated by a supernova explosion, matter at the suddhatthaka level is not affected. A supernova is the blowing up of a star.
- The Earth and the Sun are destroyed at the end of a mahā kappa. However, the brahma realms lying at or above the Abhassara brahma realm survove. Those Brahmā have very fine bodies (with only a trace of matter) that are not affected even by a supernova; see, "Buddhism and Evolution - Aggañña Sutta (DN 27)."
- Well before that destruction, all living beings in our world move up to the Abhassara brahma realm.
- Now we can see how a yogi with a manomaya kāya of a Brahma CAN indeed touch the Sun. That is not a miracle. It is just that a manomaya $k \bar{a} y a$ is so fine (subtle) that it is not affected by even a supernova, which has much more power than the Sun.

## How Can One Go Through Walls?

6. The same sutta (and many other sutt $\bar{a}$ ) also describe the ability of yogis with iddhi powers to go through walls and dive into the Earth and come out from a different location, among others.

The following verse appears in many suttā in the WebLink: suttacentral: Iddhipāda Samyutta of the Samiyutta Nikāya (SN 51.11 through SN 51.32): "Ye hi keci, bhikkhave, etarahi samanā vā brāhmaṇā $\boldsymbol{v} \overline{\boldsymbol{a}}$ anekavihitaì iddhividhaim paccanubhonti-ekopi hutvā bahudhā honti, bahudhāpi hutvā eko honti; āvibhāvamं, tirobhāvaì; tirokuțtaì tiropākāraì tiropabbatam asajjamānā gacchanti, seyyathāpi ākāse; pathaviyāpi ummujjanimujjaì karonti, seyyathāpi udake; udakepi abhijjamāne gacchanti, seyyathāpi pathaviyamं; ākāsepi pallañkena kamanti, seyyathāpi pakkhī sakuṇo; imepi candimasūriye evaimmahiddhike evaimmahānubhāve pāninā parimasanti parimajjanti; yāva brahmalokāpi kāyena vasamं vattenti, .."

Translated: "Bhikkhus, a bhikkhu or a brāhmana who has developed supernormal powers (iddhi) wields various psychic powers: He can become many copies of himself. He appears and vanishes. He travels unimpeded through walls, ramparts, and mountains, and dives in and out of the Earth as if it were water. He walks on water without sinking as if it were the Earth. Sitting cross-legged, he travels through space like a winged bird. With his hand, he touches and strokes the Sun and the Moon, so mighty and powerful. He displays mastery as far as the brahmā -realms..."

- It is also evident in this verse that it could be anyone who can cultivate these powers, not just Buddhists.
- Let us first clarify a few things with science, and then we will discuss how it is possible to "go through walls and dive into the Earth."
- We need to first discuss some aspects of atoms and molecules uncovered by modern science.

## An Atom is Virtually Empty!

7. Here is a simplified version of some relevant properties of an atom. An atom has a tiny nucleus with $99.9 \%$ of the mass (or "weight" in ordinary language.) It is surrounded by an "electron cloud" that takes up almost all the "space occupied by the atom." In other words, it is analogous to a miniaturized version of our Solar system, where the massive Sun is at the center, and several planets revolve around the Sun.

- The main difference is that those electrons are not in circular orbits. They have complicated "orbitals," and the easiest is to visualize an "electron cloud" around the nucleus.
- The nucleus is tiny but has all the mass of the atom essentially. Electrons are spread out in a large volume around the nucleus (core.)
- We can use the following analogy to get a perspective on the size of an atom compared to the nucleus. If a mustard seed with a millimeter diameter represents the nucleus, the "electron cloud" would occupy a volume with 100 meters in diameter. We could say a nucleus would be like a grain of sand in the chamber of a large cathedral or a football stadium.

8. Therefore, an atom (or a molecule) is mostly empty. That means our bodies that we think are very solid are also basically empty. Even steel or diamond would be similarly "empty."

- P.S. If it is possible to take out all that empty space in our bodies (which of course, is not possible), all the matter in the physical bodies of 9 billion humans in the world today would fit inside a sugar cube!
- If our atoms are mostly space, why can't we pass through walls like those ghosts in movies?
- Electrical repulsion among the electron clouds of neighboring atoms forces them to stay away without getting close.
- Therefore, we cannot go through walls or any other "solid object" with our physical bodies.

## Go Through Walls and Dive Into the Earth?

9. Even though our physical bodies cannot go through other "solid objects," our manomaya kāya (gandhabba) made of very fine suddhatṭhaka can!

- That level of "matter" is much more refined and subtle than even electrons. Furthermore, "particles" at the suddhatthaka level are not electrically charged. So, they do not have any problem going through the electron cloud.
- Therefore, modern science (physics) helps us understand why this is not a miracle at all.

10. Those objects that appear to be "highly condensed" - such as walls or even steel - are mostly hollow at the atomic level. An atom has a tiny nucleus surrounded by an "electron cloud." The size of an atom is defined by the electron cloud, which is spreads out over a relatively large volume. Two adjacent atoms cannot come too close to each other because of the mutual repulsion between their electron clouds.

- Therefore, an atom is "virtually empty." The dense nucleus takes only a little volume, and the electron cloud is far away. Therefore, a manomaya kāya made of only a few suddhatthaka can freely move through "solid matter" made of atoms and molecules.
- A yogi with such abhiññ̄a powers could use the manomaya kāya to travel through "solid objects."
- One with even more developed abilities may be able to reduce one's physical body to the suddhatt level, go through the "solid object" and then "reassemble" at the other end. That sounds like science fiction ("teleportation"), but that is precisely how it may be done in the future with further progress in science. Of course, one with such abhiññ̄ powers would be able to do that right now.
- P.S. An account from the Tipitaka regarding "teleportation": Ven. Ananda attained the Arahanthood only the day before the first Buddhist Council held 3 months after the Parinibbāna of the Buddha. Only Arahants participated. Everyone was waiting for the arrival of Ven. Ananda. In order to remove any doubts of those who were present that he had indeed attained the Arahanthood - complete with all iddhi powers - Ven. Ananda is said to have entered the room through the keyhole in the door. So, this is an example of teleportation.

## Summary and Other Implications

11. Other "mysterious phenomena" in verse in \#6 above can also be explained to be consistent with science.

As science makes progress, these clarifications will have more support.

- I will be discussing some of those other phenomena in the future after covering the necessary background material.

12. On a side note, this clarification also helps us understand that our concept of "touching someone" is not as intimate as we think. When we "touch" something, it is only the outer electrons of the atoms (molecules) on our body "touching" the same on the other object.

- I am very serious about this. Suppose you are blind-folded and someone touches you on the arm. If you think it is your girl (boy) friend, that will make you generate sensual thoughts. However, you will 0feel only affectionate feelings of a different kind if you are under the impression that it is your parent. If you think it is a total stranger (and not good looking!), you may barely notice him/her.

Buddha Discouraged "Magic Shows" by Those With Iddhi Powers
13. I must also emphasize that the Buddha not only discouraged but banned in most cases, display of such supernormal powers by bhikkhus. The main reason for that was explained to Kevatta by the Buddha in the WebLink: suttacentral: Kevatta Sutta (DN 11). The English translation there: "WebLink: suttacentral: To Kevatta (DN 11)."

- So, there were people at the time of the Buddha who could do such "miracles" using special techniques like "Gandhāra magic trick" (gandhārī nāma vijjā). Some others cultivated supernormal powers via anāriya jhāna. Then such people can put down Buddha Dhamma, saying that "I can also do those things without Buddha's teachings."
- Even today, some magicians perform such "miracles." Here is a video showing "WebLink: youtube: Criss Angel walking on water."

Of course, it is an illusion. But it looks real! Criss Angel discusses these illusions or magic tricks in his book, "Mindfreak" (2007).

- However, only Buddha Dhamma can make it possible to stop future suffering, and that is not possible with magic tricks!

5.2.9.1 Views on Life - Wrong View of Materialism

## August 4, 2019; revised August 15, 2021

Materialism says life has origins in inert matter. This view is held by many scientists and atheists. It was called "uccheda ditṭhi" by the Buddha.

## Introduction

The issue of the origin of life is critical to Sakkāya Ditthi, which is one of the key wrong views to be removed to attain the Sotāpanna stage. I have discussed some background material in the past several posts. It is time to take an in-depth look at each of the three views on the origin of life.

1. As I have already mentioned in the past few posts, there are two wrong views regarding life.

- The materialistic view says life has origins in inert matter. Science says 108 or so atoms make everything in this world. Somehow consciousness with feelings, perceptions, desires, and hopes arise out of inert matter. Many scientists and atheists hold this view.
- Those who are faithful followers of the Abrahamic religions (Christianity, Judaism, Islam) or Hinduism believe that there is a separate "mental component" that makes the inert physical body "alive" with feelings, perceptions, desires, and hopes (four mental aggregates). A Creator God or Mahā Brahma created life according to them.

2. We also need to keep in mind the "endpoints of a life" according to those two views.

- In the materialistic view, one lives only the present life, and it all ends with the death of the physical body. This view was called "uccheda dittthi" by the Buddha because here the life ends (uccheda means "cut off") with the death of the physical body.
- In the opposite view, the "mental body" survives even after the physical body dies. In Abrahamic religions, the "soul" either is either born in heaven or "hell" forever. In Hinduism, the "ātma" keeps going through the rebirth process until one is born in the Mahā Brahma realm, which is again eternal. In either case, one will eventually live forever (in heaven, hell, or the Brahma realm). This view was called "sassata ditt"hi" (sassata means "eternal") by the Buddha.

3. In refuting those two views, the Buddha taught that there is a "mental component" to life, but that is not a "soul" or "a a atma" going from one life to the next.

- That is because everything in this world arises due to causes. Life can take many different forms (human, deva, Brahma, animal, peta, hell-beings, etc.). When one such existence ends, another arises depending on which causes (kamma vipāka) come into play.
- "Good" or "bad" forms of life arise due to "good" or "bad" actions done in the past, and the net result of existence in the "long term" is suffering (mainly because most kamma lead to "bad births").
- There is no "soul" or a "àtma" that can be considered to be "me" or "my essence." As long as one has that perception, the rebirth process will continue with much suffering.
- When one realizes the truth of this reality, one will stop grasping (upādāna) new existences.

## The Conception and Birth of a Baby

4. Let us focus on human life. When the fertile mother (i.e., who has ovulated) has sex with the father, that leads to seed for a new life. The following is a summary extracted from "WebLink: Stages of Development of the Fetus."

- During each normal menstrual cycle, one of the ovaries release an egg. The release of the egg is called ovulation. The egg enters the funnel-shaped end of one of the fallopian tubes.
- Within 5 minutes of having sex, sperms from the father move from the vagina to the fallopian tube.
- Suppose a sperm penetrates the egg, fertilization results. The fusion of the egg and sperm produces a new cell called a zygote, the seed of life for a brand new baby.

5. Tiny hairlike cilia lining the fallopian tube propel the zygote toward the uterus. The cells of the zygote repeatedly divide as the zygote moves down the fallopian tube. The zygote enters the uterus in 3 to 5 days.

- The cells continue to divide in the uterus, becoming a hollow ball of cells called a blastocyst. Between five and eight days after fertilization, the blastocyst attaches to the lining of the uterus lining, usually near the top. This process, called implantation, is completed by day 9 or 10 . The inner cells develop into the embryo, and the outer cells develop into the placenta.
- Some of the cells from the placenta develop into an outer layer of membranes (chorion) around the developing blastocyst. Other cells develop into an inner layer of membranes (amnion), which form the amniotic sac. The blastocyst is considered an embryo when the sac is formed (by about day 10 to 12). The amniotic sac fills with a clear liquid (amniotic fluid) and expands to envelop the developing fetus, which floats within it.

6. Most internal organs and external body structures get built in this stage. Most organs begin to form about three weeks after fertilization, which equals five weeks of pregnancy. (Doctors date pregnancy from the first day of the woman's last menstrual period, typically two weeks before fertilization).

- The embryo is considered a fetus at the end of the 8th week after fertilization (10 weeks of pregnancy). Almost all organs are formed about ten weeks after fertilization (which equals 12 weeks of pregnancy). The exceptions are the brain and spinal cord, which continue to form and develop throughout pregnancy.
- By about 24 weeks: The fetus has a chance of survival outside the uterus. The lungs continue to mature until near the time of delivery. The brain accumulates new cells throughout pregnancy and the first year of life after birth.

## Materialistic View

7. The above process describes the steps in forming the "physical body" of a new human being. It cannot identify the time "when the mental stuff" is activated, i.e., when that inert zygote becomes alive.

- Some say "life of the new baby" starts when the heartbeat starts, and at the other extreme, some say when the baby is capable of surviving outside the womb; see, for example, "WebLink: lozierinstitute.org: A Scientific View of When Life Begins."
- According to Buddha Dhamma, the new life starts when a gandhabba (or patisandhi viñ̃̃āna) "descends to the womb and takes possession of the zygote." That happens very early, within a day or two of the formation of the zygote; see, "Buddhist Explanations of Conception, Abortion, and Contraception."

8. Besides the above hurdle, the materialistic view cannot explain how that single cell or the zygote gives rise to a complex human with many trillions of different types of cells.

- Even though we all start with a single cell, the cells in different parts of our bodies are very different. Liver cells are different from heart cells, and the cells in the brain - called neural cells or neurons - are much more diverse.
- Furthermore, how do these cells know when to start building different cells for the liver, heart, brain, arms, legs, etc.?

9. These issues have been studied in detail even since Watson and Crick discovered the double-helix structure of the DNA (Deoxyribonucleic acid) molecule back in 1953. We have discussed the complexity of a cell, so now we can summarize these findings as follows: [WebLink: What is DNA?]

- DNA strand in a cell has the necessary "code" (similar to computer code) to build the whole body consisting of trillions of cells.
- This DNA, or the blueprint for the whole body, is in every cell. However, the proteins and body parts generated by each cell are different. How does each cell "know" which part of the "code" to read?
- I am skipping a lot of details. Those who are interested should read two excellent books (Ref. 1 and Ref. 2 below). The former is by an evolutionist and the latter by a creationist. However, studying this complex issue in detail; it is enough to "get the basic idea."

structure are colour-coded by element and the detailed structures of two base pairs are shown in the bottom right.

## Fundamental Problems with the Materialistic View

10. Two key issues remain unresolved. The first is, how did this complex DNA structure evolve, starting with simple molecules?

- In 1953, Stanley Miller and Harold Urey mixed chemicals in a simulated "early-Earth atmosphere" and produced amino acids - precursors of DNA. It received much publicity as a significant clue to the origin
of life. But that is a far cry from making a working cell in a laboratory. No one has even come close to that in the 65 years following that "breakthrough."
- The videos in my previous posts discuss this problem at length; see "Origin of Life - There is No Traceable Origin" and "Living Cell - How Did the First Cell Come to Existence?."

11. There is an even more critical issue: Is it even possible for such a complex "genetic code" to evolve?

- Those of us who have written computer programs know that even a simple program requires "planning" and would not work unless it is free of "bugs." Even though it is relatively easy to "fix a bug" with KNOWLEDGE of the code, it is unimaginable that a bug in such a sophisticated program can "get fixed" via a random "trial and error" process. It is more likely to "add more errors" to code than fixing an existing error in such a random process.
- The following review paper summarizes current status: "WebLink: pdf file: Koonin and NovozhilovOrigin and Evolution of Universal Genetic Code - 2017."
- For those who like to find more details, I recommend Ref. 3 below. The author is offering 10 million dollars to anyone illustrating the feasibility of genetic code evolution; see, "WebLink: evo2.org: Evolution 2.0." I recommend watching the video there. It is not really about the prize; he explains why it is an impossibility.

12. Darwin's original theory of evolution predicted a "gradual evolution" of SPECIES, i.e., simple lifeforms evolving to complex lifeforms. However, the "neo Darwinism" of the present time is trying to tackling the following key issues.

- Recent studies reveal that the GENETIC CODE is virtually the same for many species, ranging from mice to humans (in animals with a few cells, the genome is small). In other words, the DNA in mice essentially has the code to start a human life, but those sections in the program are NOT TRIGGERED for mice; see Ref. 1 for details.
- That is a critical point. The CODE Is virtually the same in many lifeforms, but the "correct sections of the code" must be triggered for each species. It is as if someone had planned for all lifeforms in advance!
- It is just that different parts of the code get activated for different species! That raises another issue. WHO (or WHAT in the code) triggers specific genes to be enabled in different species AND at the right time (e.g., fingers come after the arms)?
- That is possibly why some evolutionist scientists are switching to the creationist side (Dr. Francis Collins, the director of the Human Genome Project, is an example). There has not been a third alternative (because most people do not know - or understand - Buddha's version).

In the next post, I will discuss problems associated with the creationist view (sassata ditthi).

### 5.2.9.2 Wrong View of Creationism (and Eternal Future Life) - Part 1

August 12, 2019

## Introduction

1. The concept of eternal future life is built into most of the religions today. It comes in two varieties.

- In Abrahamic religions (Christianity, Judaism, and Islam), one is born only once. Then at the end of this life, one is either taken to heaven or hell for eternity.
- In Hinduism, one has born before, will reborn again and again, until one is born in the Mahā Brahma realm. Then one will live there forever.
- Both varieties require a Creator (God or Mahā Brahma).
- (Please note that the intent of my post is just to lay down the facts (to my knowledge). If I have miswritten something, please post a comment at the discussion forum or send me an email at lal@puredhamma.net. I would be happy to correct any errors.)

2. In the time of the Buddha, there was only the latter view associated with a future eternal life. However, in both the above cases, the expectation is that one will have eternal life at the end. Such a view of eternal life was called sassata ditṭhi by the Buddha ("sassata" means eternal).

- As we recall from my previous post, "Views on Life - Wrong View of Materialism," this is the opposite of the wrong that life ends with death in this life. That was called uccheda ditthi ("ucceda" means cut off) by the Buddha.
- As we know, the Buddha explained 62 types of wrong views in the WebLink: suttacentral: Brahmajāla Sutta (DN 1). However, the two main wrong views REGARDING LIFE are the above. Some of those 62 wrong views are on whether the world is eternal or not, and whether the world is finite or not.

## Eternal Life in Hinduism and Abrahamic Religions

3. In the WebLink: suttacentral: Brahmajāla Sutta (DN 1), the Buddha explained how some people at that time concluded eternal soul or atta (ātma in Sanskrit/Hinduism).

- There were yogis, even before the Buddha, who could attain (anāriya) jhāna and with them the ability to recall past lives. Some were able to recall hundreds and thousands of past lives. One may change the form of birth (human, deva, etc.), but each birth associated with "oneself."
- Some of them had cultivated abhiññ̄ powers to higher levels, where they could "see" very far back. They could see many destructions/re-formations of the world (i.e., many mahā kappās). Even for such long times, they could see their "ātma" or "atta" taking different forms, but it was the "same self" who acquired such various forms.
- The Buddha gave an analogy in the Brahmajāla Sutta. A person may live in a particular city for several years during childhood, move to another to go to school, get a job in a yet another city, and eventually retire in yet a different country. But that person has the perception that it was "me" who was at all those different places, with different physical bodies. Going through different lives is similar; there is a perception of "me" or "self" or "soul" (ātma/atta).

4. Now we can see a difference in views of Abrahamic religions and Hinduism.

- The concept of rebirth is firmly in Hinduism. That is coming for a long time even before the Buddha Gotama. It is based on the experience of ancient yogis who had cultivated the ability to look at past lives.
- On the other hand, rebirth is entirely absent in Abrahamic religions. So, the origin of human life in Abrahamic religions is purely materialistic. The only requirement is to have a zygote created by the union of the mother's egg and father's sperm. Therefore, there is some overlap here with the materialistic view of life; see, "Views on Life - Wrong View of Materialism."
- However, as far as the end of life is concerned, both Abrahamic religions and Hinduism have a similar view. That one attains eternal life at the end.

## Issues Only Relevant to Abrahamic Religions

5. The other difference between Abrahamic religions and Hinduism is that in the former, one is born only once AND gets only this life to work towards getting eternal life in heaven. If one misses that opportunity, one will be committed to the hell for eternity.

- The Bible clearly says one dies only once and then faces judgment (WebLink: biblia.com: Hebrews 9:27). The Bible never mentions people having a second chance at life or coming back as different people or animals. WebLink: biblia.com: Matthew 25:46 says explicitly that believers go on to eternal life while unbelievers go onto eternal punishment. As I understand, Judaism and Islam have the same concept.
- I wonder what happens to a baby dying very young. Does it go to heaven or hell? What about a mentally disabled person? It does not seem to be fair if they are committed to hell for eternity. If they do get qualified to be born in heaven, it would be better to skip this life (be killed as a baby) and be born in heaven right away.
- I may not be aware of the details on that issue. But it is an important issue. As I mentioned earlier, I welcome comments. The goal is to have a clear and correct picture of different world views.

6. Since this is the "first life" for any human alive today (since there is no rebirth process in Abrahamic religions), the following question arises. Why is it that people are born healthy/with disabilities, poor/rich, beautifu/ugly, etc.?

- To put it another way, is each of us a "new creations of the Creator"? If so, why did he choose to create some of us with disabilities, for example? If we did not have prior lives, there was no basis to differentiate among new births.
- Furthermore, was the "soul" of an existing individual created at the time of his/her conception or birth?
- There are simple questions that need answers, in my opinion.

7. I do understand that the Creator God is supposed to have "breathed life" to Adam and Eve made them in his image. But not to animals; they do not have a soul in Abrahamic religions).

- Animals are made of the same "stuff" as humans. As I discussed in the previous post, many animals have DNA that is $99 \%$ the same as those for humans; see, "Views on Life - Wrong View of Materialism."
- Animals are supposed to be there for the consumption of humans. That also does not seem to be logical.

## Issues Only Relevant to Hinduism

8. The Purush-Sukta, a section of the Rig Veda, describes the divine origin of human beings into the four social groups, or castes, that comprise Hindu society: Brahmin, Kshatriya, Vaishya, and Sudra. According to the Purush-Sukta, brahmins born from the mouth of the Brahma, kshatriya from the arms, vaishya from the thighs, and sudra from the calves.

- This categorization comes at the beginning of the Agganna Sutta (DN 27). Vāseṭ̣ha, himself a brahmin, tells the Buddha that other brahmins say to him that he should not associate with lower-caste people. Followers of the Buddha came from all four castes. They tell him that, "Only brahmins are genuine children of Brahma, born of his mouth, offspring of Brahma $\bar{a}$, created by Brahm $\bar{a}$, heirs of Brahm $\bar{a}$."
- The Buddha tells Vāsetṭha that all people today are womb-born.
- Then he proceeded to give an account of how all "first humans" at the beginning of this Mahā Kappa were born instantaneously (opapātika births) with brahma-like bodies, and how they "evolved" over the past several billions of years to end up with "womb-born births"; see, "Buddhism and Evolution Aggañ̃̃a Sutta (DN 27)."
- The current series on the "Origin of Life" will provide more details from that sutta. Darwin's theory of evolution is somewhat correct for the appearance of increasingly complex animal species over time. It is
not right to say that humans have "evolved from animals." Furthermore, a "first living cell" can't evolve from inert matter to form the primitive animal species either, as we have discussed in recent posts.

9. As in the case of a Creator God in Abrahamic religions, why did Mahā Brahma create four classes of humans at the beginning, per \#7 above? Why not create them all equal?

- Did Mahā Brahma also create animals as well? Can humans be born as animals? If so, do animals have a $\bar{a} t m a$ ?
- I may be ignorant of these issues. One problem that I have had with Hinduism is that there are so many different versions. One good example is that in some Hindu temples animal sacrifice is carried out regularly. On the other hand, there are other Hindus who abstain from eating meat, let alone killing animals!
- The best way to clarify these issues is to start a discussion at the discussion forum. Then I can revise this post based on that discussion if needed. I have opened a new topic to discuss any of the posts in the "Origin of Life" series: "Questions on Posts in the "Origin of Life" Subsection."

I will discuss apparent problems associated with all creator-based religions in the next post.

### 5.2.9.3 Wrong View of Creationism (and Eternal Future Life) - Part 2

August 19, 2019; revised August 28, 2022
In the previous post, "Wrong View of Creationism (and Eternal Future Life) - Part 1," we discussed some problems associated with creationism. We will continue that discussion.

## How Did the Creator Come to Existence?

Now we can get to the issues common to Abrahamic religions and Hinduism.

1. First, the inevitable question is, how did the Creator (God or Mahā Brahma) come to existence? The Principle of Causality, the foundation of modern science, says things do not happen or materialize without causes.

- The idea of a Creator as "the First Cause" has a long history; see the Wikipedia article, "WebLink: wikipedia: Cosmological argument."
- Logically it cannot be defended, but it has come to be a belief for those who have faith in a Creator.

2. In the previous post, we saw a crucial difference between Buddhism and Hinduism. (Even though the concept of rebirth is there in both.) In Hinduism, there is the belief in an everlasting existence in the Mah $\bar{a}$ Brahma realm (or reunification with the Brahman).

- Of course, a similar concept is there with Abrahamic religions, with eternal life in heaven or hell.
- However, the idea of rebirth is absent in Abrahamic faiths.
- Let us now focus on the issue of "eternal life" after death in Abrahamic religions and Hinduism.

3. In Abrahamic religions, the Creator God lives in the heavens. If one lives a moral life, one will get to live "in the heavens" forever; see the Wikipedia article, "WebLink: wikipedia: Heaven in Christianity."

- In Hinduism, the Creator Brahma lives in a Brahma realm; see the Wikipedia article, "WebLink: wikipedia: Brahma." One can be born there by living a moral life and cultivating $j h a ̄ n a$.
- Therefore, all Creator-based religions assume the existence of a heavenly plane where life is permanent. Once born there, one will live forever without ever dying.

## Nothing in This World Is Forever

4. Stars in the heavens appear to be serene and shiny. Even though we see beautiful and calm "starry nights," outer space is a violent place.

- In reality, a typical star converts millions of tons of mass into energy every second, with each gram releasing as much energy as an atomic bomb!
- Within the range of our telescopes, there are several supernova explosions per second. A supernova is the explosion of a star at the end of its lifetime.
- Therefore, even though our ancestors thought that Gods reside among those nice-looking stars and the heavens are stable and peaceful, the reality is very different.

5. The Buddha's worldview (as discussed in upcoming posts) is that no existence is everlasting. Life in any heavenly realm (Deva or Brahma realms) is finite, even though some can be long lifetimes.

- At the time of the Buddha, Abrahamic religions were not there. He has addressed the issue of everlasting life in the Mahā Brahma realm in several suttā. We will discuss that in future posts.
- Before that, let us look at the scientific evidence that any type of matter (which is essential for life) has a finite lifetime.

6. A permanently-existing heavenly body contradicts modern science as well as with Buddha's description of 31 realms where every life ends at some point. Even though Deva and Brahma realms have long lifetimes, they are not free of death.

- According to current scientific theories, the whole universe will run down in several billion years. In contrast, the Buddha taught that life has no "discernible beginning." See "Origin of Life."
- Furthermore, each star is either destroyed in a violent blast (some are called "supernova") or will be subjected to "heat death" reaching the white dwarf stage; see the Wikipedia article, "WebLink: wikipedia: Star."
- In Buddha Dhamma, clusters of star systems (cakkavāla) get destroyed periodically. Even though higher-lying realms survive, living beings in those realms also have finite lifetimes. After many billions of years, those star systems reformed. So, it is a cyclic process where destruction is followed by rebirth (reformation), just like for a living being; see "Buddhism and Evolution - Aggañña Sutta (DN 27)."

## The Problem of Suffering

7. Then there is the critical issue of why a Creator would let the man he created suffer. He could have created a suffering-free world.

- The general explanation in Christianity is that Adam and Eve sinned.
- But the Creator could have made it not possible for Adam and Eve to sin. Furthermore, it does not make sense for the descendants to punished for Adam and Eve's sins.
- And why are some born to suffer (mentally retarded or handicapped, for example)? What is the explanation for some people born that way? Also, why are some born poor compared to others born rich?

8. As I mentioned in a previous post, "Views on Life - Wrong View of Materialism," some scientists like Francis Collins and James Tour have given up their belief in the theory of evolution. They have become proponents of creationism since they do not see another option.

- We discussed James Tour's views in the post, "Origin of Life - There is No Traceable Origin."

9. Francis Collins has written a book about why he changed his views to become a creationist. I have written a post to critically examine the issues he could not explain with creationism: ""The Language of God" by Francis Collins." Please read that post for details, but the following are the key points.

- As I pointed out, Dr. Collins faced the same difficulties as C. S. Lewis in explaining why God left room for suffering.
- Why would God allow the existence of Satan and the associated immoral behavior by people? The main conclusion was that God chose to give man free will, and man abused it. But God could have given free will without the existence of Satan or the ability to sin.
- The existence of "Moral Law" (the ability to differentiate right from wrong) is the fundamental basis for his belief in God. However, that argument works for all religions.
- These are critical issues that do not have answers in the creationism worldview.

## Debate Between Materialists and Creationists

10. In the last few posts, I presented the two sides as Evolutionists and creationists. However, some creationists do not have a problem with Darwin's theory of evolution if it just pertains to the "evolution of species."

- The critical issue for them is about the "origin of life" and not the evolution of species. In other words, many creationists agree that once life started with simple life forms, more complex life forms evolved gradually.
- In fundamental terms, the critical question is, "how did the first cell come to existence"?

11. Of course, evolutionists believe that the first living cell also evolved, starting from inert atoms and molecules.

- However, evolutionists have very little to say about how the first cell came into existence. I have read many books by evolutionists, and they mainly discuss just the evolution of species. They have little evidence or feasibility of how complex DNA molecules are assembled, starting with simple atoms and molecules in random chemical reactions.
- They have even less to say about how the genetic code could have evolved. As I emphasized in previous posts, it is hard to imagine how such a program could develop in a random process. We know that computer codes do not "evolve." Furthermore, any accidental changes in the working computer code will only break that code, not make it better!

## Intelligent Design Argument

12. As I mentioned above, some scientists have been convinced that a living cell with DNA code can't evolve. However, they are not comfortable with the concept of a Creator God.

- They have come up with the concept of "intelligent design." They do not explicitly invoke a Creator God but insist that a higher intelligence must have designed a living cell.
- That is also called the "Teleological argument." See the Wikipedia article, "WebLink: wikipedia: Teleological argument."

13. As explained in that Wikipedia article, the phrase "argument from design" was first used by William Paley, an English clergyman, in 1802. He said that if one finds a clock on the beach, one can safely conclude that the watch must have had a designer. In the same way, complex living beings must have had a "designer."

- Modern advocates of the intelligent design argument point out that a cell is much more complicated than a watch and could not have evolved due to random processes.
- However, that does not solve the problem. Such a "designer" must have super-human capabilities and thus is not that different from the idea of a Creator. The idea of a creator or a designer runs contradictory to the Principle of Causation, upon which science is based (see \#1 above).

## Summary

14. The existence of permanent life and suffering are two critical problems with the creator-based origin of life. However, there are many related issues.

- Can the life of a human arise randomly? In other words, why are humans born under very different health, wealth, beauty, etc.? Neither evolutionists nor creationists (or "intelligent designers") can explain it. They all say, "it just happens that way."
- The second issue concerns the origin of life (not the evolution of species). How did life originate? For example, how did the first cell with its complex double-helix DNA structure AND genetic code come into existence? The two sides have different explanations for that issue.

15. Materialists believe that a living cell can arise via random jostling of atoms and molecules which are inert "matter." The critical question is, is it possible for that to happen in a random process? Another significant issue that we have not even discussed is: How can feelings, perceptions, desires, hopes, etc. arise from "dead matter"?

- Creationists (and those who believe that a creator or a designer with super-human intelligence in "intelligent design") created living cells. That creator gave life to inert matter. The question is, how did that creator or designer come to existence?

## Buddhist Explanation

16. In Buddha Dhamma, this "intelligent designer" is none other than Nature. Life itself was not created but has existed forever. That is consistent with the Principle of Causality. Of course, Buddha provided (indirect) evidence in terms of a fully self-consistent "theory."

- Furthermore, the mental qualities of a human are the CAUSES of existence (rebirth): It is impossible to create a lifestream. All existing life-streams have ALWAYS existed. That life-form takes different forms in different existences (not only human and animal, but among 31 possible realms). See "What Reincarnates? - Concept of a Lifestream."
- Future existences of a given lifestream DEPEND on the "mental qualities" (and actions, speech, thoughts that arise BASED ON those mental qualities) of that lifestream.
- Suffering and pleasure exist in this world. Both arise due to previous actions (kamma). And one's deeds are based on one's mental state.

17. When one understands those key concepts, one will "see" that there is no "atta" or "soul" or "ātma" going from birth to birth. That is the first stage of Sammā Ditṭhi. Causes (kamma) and conditions lead to corresponding outcomes (kamma vipāka) per Paṭicca Samuppāda. That understanding is the key to removing "sakkāya ditṭhi."

- We will first discuss those "mental qualities" next. It is essential to understand those to discuss Buddha's teachings of life. His world views were not speculation but based on his ability to "see" how life progressed over trillions of years in the past. It is NOT JUST a logical or philosophical argument, even though it is self-consistent.
- Understanding the essential points discussed so far is critical to continue with upcoming posts. I recommend re-reading \#16 and \#17 until those key ideas are grasped, at least vaguely.

18. The "Origin of Life" section discusses all possible theories in detail.

### 5.2.9.4 Worldview of the Buddha

August 26, 2019

## Buddhist Worldview - Introduction

Contact Between Āyatana Leads to Vipāka Viññāṇa

How Do Sense Faculties Become Internal Āyatana?
Indriya Make Phassa and Āyatana Make Samphassa
Is There a "Self"?
Citta - Basis of Our Experience and Actions

Mental Body Versus the Physical Body

### 5.2.9.4 <br> Buddhist Worldview - Introduction

. 1
August 26, 2019

## Introduction

1. The Buddhist worldview is somewhat complicated but is self-consistent. In the previous three posts, we discussed the two dominant world views of evolutionism and creationism. The Buddha categorized them respectively as uccheda ditṭhi and sassata ditṭhi in the "WebLink: suttacentral: Brahmajāla Sutta (DN 1)." When one removes both those wrong views, one would have removed sakkāya diṭthi and attained the Sotāpanna stage of Nibbāna.

- In both those world views, there is the idea of an "existing person." Evolutionists say that "a person" ends with the death of the physical body. Creationists say that the "soul" or the "ātma" of "a person" will get an "everlasting life" at some point. See the discussion so far at "Origin of Life."
- The Buddha taught that the existence of such "a person" is illusory. At each moment, there is an experience that arises due to past causes AND based on prevailing conditions. That "conditional cause and effect" or the Principle of Causality is called Paticca Samuppāda. However, those experiences and any physical sufferings are real.

2. Thus, in the Buddhist worldview, "a person," at a given time, may be defined as a "set of gati" or "character qualities." Those gati are the conditions to bring about the results (vipāka) of past actions (kamma). When one gets rid of those "gati," that will lead to the stopping of those sense experiences burdened with suffering. That is Parinibbāna or "full release from suffering." However, the perception (sañña $)$ of such "a person" will be there until one attains the Arahanthood.

- That is a very brief summary. With this post, we will start discussing the details.

3. The "material or physical world" takes precedence in current dominant world views of evolutionism and creationism. Evolutionists consider mental aspects as secondary and to arise from inert matter. Thus, they believe the mind is an emergent phenomenon.

- Even the creationists do not pay much attention to the diverse mind phenomena. They believe that the mind is separate from matter and that the Creator created both.
- Buddha has taught material aspects briefly but focused on the mind in great detail. Furthermore, he has explained that the opposite of materialism is the correct worldview. That is, instead of mind phenomena arising from inert matter, the mind is the precursor to matter.
- That may sound astounding. That is why we need to go through the steps slowly. But it is essential first to remind ourselves that it is not possible to create a brand-new "lifestream" or a "new living being."

## A Life-Stream (Rebirth Process) Has No Beginning

4. All living beings (an infinite number of them) have lived from a time that has "no traceable beginning." That is a cornerstone of the Buddhist worldview.

- The Buddha declared that as, "Anamataggoyamं, bhikkhave, samisāro." That means "bhikkhus, there is no discernible beginning to the rebirth process." This statement is in every sutta in the "WebLink: suttacentral: Anamatagga Samyutta" in Samiyutta Nikāya (SN).
- You and I have existed "forever." We will continue to live in one of the 31 realms until we attain the Arahanthood and then attain Parinibbāna. Parinibbāna means "complete Nibbāna." That is completely separating from this world of 31 realms. No more rebirths in this world. No more suffering.
- I have discussed this in detail in the post, "Origin of Life - There is No Traceable Origin."

5. The above statement of a life existing from a time with no traceable beginning may seem to be contradictory to the fundamental concept that nothing in this world lasts forever. There is no contradiction.

- At any time, a given "lifestream" has a hadaya vatthu (seat of mind) and several pasāda rūpa ranging from zero (in arūpāvacara realms or planes) to five (in kāma realms). Hadaya vatthu and a set of pasāda rūpa are the "manomaya kāya" that every living being has. It is unimaginably small (smaller than

## an atom in modern science). That manomaya kāya keeps changing as the lifestream moves among the 31 realms.

- The manomaya kāya is a "mental body." But "body" here means a "collection," the collection of hadaya vatthu and a set of pasāda rūpa. One's "mental body" weighs much less than a mustard seed. In fact, at the moment of conception ("pațisandhi viñ̃̄̄aña descending to the womb), our "physical body" consists only of a single cell (zygote), as we discussed in "Clarification of "Mental Body" and "Physical Body" - Different Types of "Kāya"."
- In humans and animals, this manomaya kāya is the same as gandhabba. For brahmā, manomaya $k \bar{a} y a$ is all they have!
- The "mental body" (gandhabba) is what controls the massive physical body of a human or an animal.

## A Worldview Based on Experience

6. The Buddhist worldview is not a theory or speculation. The Buddha could "see" each of the 31 realms of this world. He could "see" how a lifestream moves from one realm to another based on kamma vipāka and prevailing conditions, i.e., Paticca Samuppāda.

- Many suttā describe Buddha's and his disciples' visits to brahma and deva planes. Others describe visits of brahmā and devas to the human world (mainly to listen to the discourses of the Buddha and to ask questions from the Buddha).
- For example, in the Vinaya Piṭaka, it is described that billions of devas and brahmā were there to listen to the first discourse of the Buddha, Dhammacappavattana Sutta (SN 56.11). The Brahmanimantanika Sutta (MN 49), describes how the Buddha visited the realm of the Mahā Brahma to explain to him that his existence is not eternal; see, "Anidassana Viññ̄ña - What It Really Means."
- One time, a brahmin came to the Buddha and asked whether the Buddha believes in the existence of devas, brahma $\bar{a}, ~ a p \bar{a} y \bar{a}$, etc. The Buddha told him that he "sees" them and communicates with them. If someone comes across the name of that sutta, please let me know: lal@puredhamma.net. I will add that reference here.
- August 28, 2019: Reader Siebe sent me the following reference: "WebLink: suttacentral: Devadūta Sutta (MN 130)" that describes "hells" or "niraya." A translation at: "WebLink: accesstoinsight.org: Devaduta Sutta: The Deva Messengers." A similar sutta about some realms located close to Earth are described in the "WebLink: suttacentral: Ātānātiva Sutta (DN 23)." A translation there, "WebLink: suttacentral: The Ātānātiya Discourse (DN 23)." Also, see my post on August 28, 2019, at the discussion forum on, "WebLink: Pure Dhamma Forums: Questions on Posts in the "Origin of Life" Subsection." It discusses "life in hell."
- More information on hells at: "Does the Hell (Niraya) Exist?." I revised and updated that post on August 29, 2019.

7. More than 2500 years ago, the Buddha described the "physical world" consisting of billions of galaxies with billions of stars in each galaxy (with different names of course).

- On the other hand, even a few hundred years ago, modern science's view of the universe was that it included only the Solar system.
- In the early 1600 s, Galileo invented the telescope. He first saw that the Moon is similar to the Earth in composition, that the stars are no different from our Sun. With more powerful telescopes, we now know that there is an unbelievable number of stars (with planets around them) out there.

8. However, the Buddha taught that studying the physical structure of the universe is not beneficial. While it is an exciting subject, studying that would not solve the "problem of suffering." We have only a limited time in this life, and we must focus on the task of removing future suffering.

- Regarding that aspect, one should focus on one's inner world. In particular, on the issue of how sufferingfilled rebirths materialize due to one's thoughts, speech, and actions. We do not need telescopes or other fancy instruments for that. We can use our minds.
- By the way, by focusing on the mental phenomena, one can also find much more about the physical world with billions of galaxies WITHOUT any scientific instrument. That is how the Buddha knew more about the universe than modern scientists.
- Therefore, the Buddhist worldview can provide a complete description of how our world. The Buddha explained how an infinite number of "lifestreams" takes different forms in a rebirth process that has no beginning.

## What is One's World?

9. A given person's world is what he/she experiences. What exactly do we experience?

- We see forms with our eyes, hear sounds with ears, taste with tongues, smell with the nose, body touches with physical bodies. Those are the five physical sense faculties and the five types of "external entities" experienced by them. Modern science still thinks the mind is an "emergent phenomenon" arising from the brain.
- However, in Buddha Dhamma, the mind is much more critical than those five physical senses, and we will see why.

10. With the mind, we remember past events, think about concepts like mathematics or Buddha Dhamma, and plan for the future. That latter is the most crucial task by the mind. We think about, plan, and initiate activities by generating sañkhāra in mind.

- Most such activities start due to ignorance (avijja) about the real nature of this world. That is why the akusala-mūla Paticca Samuppāda cycle begins with "avijjā paccayā sañkhāra." We create good/bad kamma via sañkhāra, which lead to defiled viññāṇa via "sañkhāra paccayā viñ̃̄āṇa."
- When viññāna become strong enough, they can become pațisandhi viññāna that fuel the rebirth process. We will discuss this later. That is how the mind creates future existences in the Buddhist worldview.

## Our World Consists of Twelve Ayatanas

11. The "WebLink: suttacentral: Chachakka Sutta (MN 148)" describes in detail the sensory experience in the Buddhist worldview. For an English translation see, "WebLink: suttacentral: The Six Sets of Six (MN 148)." We will discuss this sutta in detail.

- In that sutta, the Buddha labeled our six types of internal sense faculties as six "internal $\bar{a} y a t a n a "$ (ajjhattikāni āyatanāni). Furthermore, he called the six external entities sensed by them as "external āyatana" (bāhirāni āyatanāni). From now on, we will use the terms "internal āyatana" and "external āyatana."
- As I emphasize often, it is best to learn what is meant by some critical Pāli words and use those Pāli words. In many cases, there are no exact English translations. Note that in the above English translation of the sutta, the word "āyatana" translated as "base." When we start discussing Paticca Samuppāda, you will see why it is better to use the Pāli term, āyatana.
- In summary, our world consists of twelve āyatana. Material wise, there is NOTHING ELSE in the world. The Buddha called those twelve "sabba" or "all"; see, WebLink: suttacentral: Sabba Sutta (SN 35.23).

12. The WebLink: suttacentral: Āyatanavibhanga provides details on the twelve āyatana. For example: "Tattha katamaì cakkhāyatanaì? Yaì cakkhu catunnaì mahābhūtānaì upādāya pasādo attabhāvapariyāpanno anidassano sappatigho, yena cakkhunā anidassanena sappaṭighena rūpaì
sanidassanaì sappaṭighaì passi v $\bar{a}$ passati v $\bar{a}$ passissati $v \bar{a}$ passe $v \bar{a}$, cakkhumpetaì cakkhāyatanampetaì cakkhudhātupesā cakkhundriyampetaì lokopeso dvārāpesā samuddopeso pandarampetaï khettampetai் vatthumpetai் nettampetai் nayanampetai் orimai் tīrampetaì suñño gāmopeso. Idam̀ vuccati "cakkhāyatanaì."

Translated: "What is cakkhāyatana? It is that cakkhu pasāda derived from the four great elements. It is invisible (anidassano), makes contact (sappatighena) with visible (object)."

- I have just translated the first part with an important fact: One cannot see the cakkhāyatana. It is NOT the eyes. We will discuss in the next post how eyes act like cameras, just capturing the signal from the object. The brain processes that signal, which then is passed on to the cakkhāyatana.
- In the same way, sotāyatana, ghānāyatana, jivhāyatana, kāyāyatana are all invisible. Those five are the pasāda rūpa that I mentioned above. They are in the manomaya kaya, around the hadaya vatthu (seat of mind). Also see, "Rūpa (Material Form)."
- The hadaya vatthu and five pasāda rūpa are in the manomaya kāya overlap the heart in the physical body. That is why the manomaya kāya comes out when the heart is stressed, like during some heart operations; see, "Manomaya Kāya and Out-of-Body Experience (OBE)."

## Internal and External Āyatana

13. The six INTERNAL āyatana (cakkhu, sota, ghāna, jivhā, kāya, and mana) are responsible for detecting sensory inputs.

- They are all very fine $r \bar{u} p a$ (traces of matter) at the suddhatt thaka level, i.e., they are the smallest units of matter.
- However, their ability to detect external rūpa comes from the kammic energy embedded in them. Those kammic energies induce rotation and spin modes, i.e., those suddhatthaka start turning and spinning just like electrons in an atom. That is why they called units of ten or dasaka. For example, cakkhu rūpa is called a cakkhu dasaka. It has a suddhatthaka (eight units of matter) and two units of energy (one in rotation and one in spin). See, "The Origin of Matter - Suddhatthaka."
- Yes. The Buddha knew about rotation and spin before modern science. "Energy" can be in spin

14. There are six types of EXTERNAL $\bar{a} y a t a n a ~(v a n n ̣ a ~ r u ̄ p a, ~ s a d d a ~ r u ̄ p a, ~ g a n d h a ~ r u ̄ p a, ~ r a s a ~ r u ̄ p a, ~$ photṭhabba rūpa, and dhamma rūpa or dhammā).

- Most times, vaṇna rūpa are called rūpa rūpa or just rūpa. In the Chachakka Sutta, they are just called $r \bar{u} p a$. Those are the ones we see with our eyes. Many people assume that those are the only $r \bar{u} p a$. That is because they do not perceive sound as a form of $r \bar{u} p a$, for example. But a sound-wave carries energy.
- Even modern science accepted that energy and matter are indistinguishable only after Einstein found the connection between energy and matter with his famous equation, $\mathrm{E}=\mathrm{mc}^{\wedge} 2$.
- Gandha or smell is associated with fine particles of odor that flow through the air and get into our noses. Rasa or taste comes from the food we eat. Photthabba or touch is with solid matter. So, those are also rūpa.
- Yes. Some of dhamma rūpa or dhammā (sensed by the mind) are also rūpa. Dhammā are called sukhuma rūpa because they are below the suddhatṭhaka stage. See, "What are Rūpa? - Dhammā are Rūpa too!." Also, the mind can detect memories (nama gotta) and concepts (like mathematics) too.

15. We have discussed all types of matter (and energy) in our world within the Buddhist worldview. In the next post, we will discuss how our mental experience (through vedanā, saññā, sañkhāra, and viñ̃āạa) arise when internal āyatana come into contact with external āyatana.

### 5.2.9.4 Contact Between Āyatana Leads to Vipāka Viññāṇa

September 2, 2019; revised November 14, 2019; January 15, 2021 (\#8); October 9, 2022

## Introduction

1. Vipāka viññāna arise due to kamma vipāka. In the previous post, we introduced the concept that our sensory experiences occur due to six internal $r \bar{u} p \bar{a}$ and six external $r \bar{u} p \bar{a}$.

- Those six types of internal types of $r \bar{u} p \bar{a}$ are "internal $\bar{a} y a t a n a$." In mundane terms, those are our eyes, ears, nose, tongue, body, and mind.
- With those, we experience sights, sounds, smells, tastes, body touches, and dhammā (memories, concepts, and hopes). Those $r \bar{u} p \bar{a}$ are external to us and "external āyatana."
- You may wish to review the previous post, "Buddhist Worldview - Introduction."

## Awareness of Living Things and Living Beings

2. When we look at a tree, for example, that is contact between our internal ayatana (eyes or, more correctly cakkhu pasāda rūpa) and external āyatana (tree in this case). That leads to a mental phenomenon called consciousness (in this case, cakkhu viññanna). It just means we are "aware of that tree."

- Humans and animals generate such "awareness" or consciousness when seeing, hearing, smelling, and tasting external $r \bar{u} p \bar{a}$.
- However, we know that plants and trees also seem aware of the external world and can even respond in some cases. For example, a plant or a tree can "turn" towards sunlight. Their roots grow towards water sources, away from dry soil, etc.

3. There are a couple of "mental factors" (or cetasika) that are not exclusively "mental." They can arise even without a mind. Those two are vedanā and sañ̃̄̄̄.
 aware") in Sinhala. That means to "become aware of something." When we make contact with an "external $\bar{a} y a t a n a " ~ v i a ~ o u r ~ s i x ~ s e n s e s, ~ w e ~ b e c o m e ~ a w a r e ~ o f ~ t h a t ~ e x t e r n a l ~ r u \bar{u} \bar{a}$; that is vedana. See, "Vedanā (Feelings)."

- At the fundamental level, Saññ̄ā means "recognition" of an object, person, or concept, for example. Generally, it is the recognition of an "external āyatana" or "external $r \bar{u} p \bar{a}$." See "Saññā - What It Really Means."
- Therefore, plants and trees have a basic form of vedanā and sañ̃̃̄̄. A plant can "feel" when sunlight falls on it (vedanā) and recognize that as sunlight (sañña $\bar{a}$ ).

4. However, a plant CANNOT generate sañkhārā (thoughts) about those vedanā and saññā. One may ask: "Then how does a plant turn towards sunlight?."

- Plants are like robots. A moving robot may have sensors that can detect obstacles in the way. That involves vedanā and saññā in the elementary sense.
- For example, that robot may also have a computer that can instruct how to go around an obstacle.
- The working of a plant is very similar. A plant seed has necessary "programs" installed in its cells to deal with the external environment. I briefly discussed this in my posts on "living cells." See the old posts in "Origin of Life."
- Therefore, some "live things" like plants can generate vedanā and saññ̄a, but they CANNOT create sañkhārā and viññanna. We remember that sañkhārā and viññāna arise via, "avijjā paccayā sañkhārā" and "sañkhārā paccayā viññāṇa."

## Two Types of Viññạ̄a of a Living Being

5. A living thing like a tree may have vedanā and sañña. But only a living being like a human or an animal has a full set of mental phenomena: vedanā, saññā, sañkhārā, and viññāna.

- In other words, only living beings have minds with which they can generate sañkhārā (loosely called thoughts), which in turn leads to viññāna.
- Now we will focus on two types of viññāna that arise in a living being upon a sensory contact between one of its "internal ayatana" and the corresponding "external äyatana."
- For simplicity, let us consider the contact between cakkhu and vaṇna ru$p \bar{a}$ (or rūpa $r \bar{u} \bar{p} \bar{a}$ or simply $r \bar{u} p \bar{a}$ ). In mundane terms, this means "contact" between eyes and a form or an object (such as a tree).
- However, It is essential to keep in mind that it is the cakkhu pas $\bar{a} d a$ r $\bar{u} p \bar{a}$ in the mental body (gandhabba) that "sees" the vannna rūp $\overline{\text { or }}$ or the image captured by the eyes. See \#11 through \#14 in the post, "Buddhist Worldview - Introduction."

## Vipāka Viññāṇa - No Strong Kamma Done

All our INITIAL sensory experiences are due to the results of our past kamma, i.e., they are kamma vipāka.
6. When eyes (or, more correctly, cakkhu pasāda rūpa) and vaṇṇa rūpā come into contact, cakkhu viññāna arises. Cakkhu viññāna is "seeing."

- Cakkhu viñnāṇa arises due to kamma vipāka. In the same way, sota, ghāna, jivhā, and kāya viññāna are ALL "vipāka viññāna."
- Some mano viññāna are vipāka viññāna. For example, when we recall a past event, that is a mano viññāna that cannot generate strong kamma.
- There is no strong kamma done by vipāka viññāna. By "strong kamma," I mean kamma, which can lead to future rebirths. Only mano sañkhārā are involved in kamma viññāna Kamma leading future rebirths done via "avijjā paccayā sañkhārā" and "sañkhārā paccayā viññāna." Those involve $v a c i ̄$ and $k \bar{a} y a ~ s a n ̃ k h a ̄ r a ̄ . ~ S e e ~ " A b h i s a n ̃ k h a ̄ r a ~ L e a d ~ t o ~ K a m m a ~ V i n ̃ n ̃ a ̄ n a . " ~ " ~$
- What is essential at this point is to remember that only mano viññāna can be either vipāka viññāṇa or kamma viññāna (we discuss below the second category). The other five types of viññāna (cakkhu, sota, ghāna, jivhā, and kāya viññāṇa) are only vipāka viññāna.

7. "WebLink: suttacentral: Chachakka Sutta (MN 148)" describes the arising of such vipāka viññāna: "Cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññānaì, sotañca paṭicca sadde ca uppajjati sotaviññānaì, ghānañca pațicca gandhe ca uppajjati ghānaviññānain, jivhāñca paṭicca rase ca uppajjati jivhāviññānam், kāyañca paṭicca phoṭthabbe ca uppajjati kāyaviññānaim, manañca paṭicca dhamme ca uppajjati manoviññānam.."

- For example, cakkhu viññāna arises when a rūpa makes contact (paṭicca) with cakkhu pasāda rūpā. As we discussed in \#12 of the previous post "Buddhist Worldview - Introduction," cakkhu here DOES NOT mean "eyes"; it means "cakkhu pasāda rūpa."
- When the eyes capture an image of a tree, that image is processed by the brain and then passed along to the cakkhu pasāda rūpa, which is in the mental body or manomaya kāya. In the case of a human or an animal, manomaya kāya is the same as gandhabba.
- Vipāka viñ̃̃āṇa do not generate strong kamma. For example, cakkhu viñãāṇa means just "seeing," sota viññāna means only "hearing," etc. Just because one sees or hears, one does not do any strong kamma.

## Vipāka Viñ̃̄āña Could be "Consciousness"?

8. Therefore, vipāka viññāṇa DO NOT arise directly with Paṭicca Samuppāda. They occur when our sense faculties come to contact with external $r \bar{u} p \bar{a}$, as described in $\# 7$ above. Those $r \bar{u} p \bar{a}$ can be six types: vaṇna rūpā, sadda, gandha, rasa, photṭhabba, and dhammā.

- Note: However, immediately following the arising of a vipāka viññāna, a Paṭicca Samuppāda process takes place in the very next citta. This is a deeper aspect that would be of interest to those who are deep into Abhidhamma: "Avyākata Paticca Samuppāda for Vipāka Viññāna."
- The contact of an internal āyatana with an external āyatana leads to the "awareness" of that external rūpā.
- Therefore, vipāka viññāna could be the closest to the English word, "consciousness." Even then, there are some mano sañkhārā that arise with a vipāka viññāna. Therefore, it is better not to refer to even vipāka viññāna as just consciousness.
- That is why the Buddha described viññana as a magician. But this "magic show nature" is easier to see with the kamma viññāna that we discuss below. The mind on its own creates kamma viññāna via sañkhārā ("sañkhārā paccayā viññāṇa").

9. When we become conscious of an external āyatana (or an external $r \bar{u} p \bar{a}$ ), we may get interested in it. (We need to remember that external $r \bar{u} p \bar{a}$ include visible objects, sounds, smells, tastes, bodily touches, or memories),

- That is when we start generating NEW KAMMA. That will happen IF we get attached to that sensory experience via greed or anger, for example.
- Those CONSCIOUS thoughts (called sañkhārā) lead to a new type of mano viññāna. Those viññāna arise via "avijjā paccayā sañkhārā" followed by "sañkhārā paccayā viññāna." Such viññāna are kamma viññāna.
- Such kamma viññāna MAY arise as the next step following the generation of any of the six types of vipāka viññāna. That happens ONLY IF we get attached to the initial vipāka viññāna.

## Kamma Viññāna - How We Create New Kamma

10. We do kamma when we start generating conscious thoughts (vacī and kāya sañkhārā) with INTENTION. The Buddha said, "Cetanāhaim, bhikkhave, kammaí vadāmi" or, "bhikkhus, I say that kamma is one's intention." (WebLink: suttacentral: Nibbedhika Sutta - AN 6.63.) When we think, speak, and act with specific INTENTION (good or bad) that leads to the generation of kamma (good or bad).

- However, those initial mano sañkhārā (associated with vipāka viññāña) arise AUTOMATICALLY. Since the intention is involved indirectly, those mano sañkhārā cannot bring about rebirth.
- To generate strong kamma, we must CONSCIOUSLY and DELIBERATELY create sañkhārāa.
- Such "strong sañkhārä" are vacī and kāya sañkhārā. As we have discussed before, vacī sañkhāra involves 'talking to oneself' and speech. Kāya sañkhāra leads to bodily actions.
- In other words, we do vacī kamma and kāya kamma with those vacī sañkhārā and kāya sañkhār $\bar{a}$. Of course, vacī kammā are lying, gossiping, etc., and $k \bar{a} y a$ kamm $\bar{a}$ are stealing, killing, etc.
- Stated yet another way, we generate speech and actions that can lead to future rebirths only via $v a c \bar{\imath}$ and kāya sañkhārā.

11. For those familiar with Abhidhamma (others can skip this and move on to \#12): A sensory event discussed in \#7 starts a pañcadvāra citta vīthi with 17 cittt̄. The vipāka viññāña occurs at the beginning of the citta vīthi. For example, a "seeing event" is a cakkhu viñ̃n̄ạna.

- Then, the mind accepts that sensory input with sampațicchana and santīraṇa citta. It is in the next citta of votthapana that our minds MAKE decisions on how to respond to that sense input BASED ON our gati (character qualities).
- Then based on that determination, seven javana cittā run consecutively. With javana cittā, we respond (think, speak, and act).
- That is a very brief summary. More details at " Citta Vithi - Processing of Sense Inputs."

## Kamma Viññạna Arise Due to "Sañkhāra Paccayā Viññāna"

12. Suppose one sees an appealing object and gets attached to it. One may start thinking, speaking, and even taking action to enjoy that sight again and again. That leads to the generation of kamma via mano viñ̃āṇa (generated via vacī and kāya sañkhārā.)

- The same happens if we get annoyed or angry about something we see. Then we would be generating angry thoughts, speech, and action. Those are also mano viññāna. Such mano viññāna are "kamma viñ̃̄̄ạna."
- Of course, both those cases arise due to $a v i j j \bar{a}$. We get attached (or get stuck) to a given sensory input because we like it or dislike it (both are done with tanhā; see below). Both happen due to $a v i j j \bar{a}$, not knowing the "true nature." One comprehends the true nature when one attains "yathäbhūta $\tilde{n} a ̈ \underline{a} a . "$ We will discuss this in future posts.

13. We can sort out the difference by seeing that all kamma viñ̃̃āna have sañkhāra as precursors. They arise when we think, speak, and act based on greed, anger, and ignorance. I will explain just the case of attachment (tanh $\bar{a})$ via greed.

- For example, when we first see something attractive, we AUTOMATICALLY get the perception of "liking it." Those INITIAL and AUTOMATIC thoughts are mano sañkhārā. These arise due to our gati.
- If we start pursuing such thoughts CONSCIOUSLY AND WILLFULLY, we are generating vitakka and vicāra (which means consciously thinking about it). Those are vacī sañkhārā. We may also speak out with vitakka/vicāra, and vacī sañkhārā are also responsible for speech.
- If our mind gets firmly attached, we may take action using the body. Those bodily actions are due to kāya sañkhārā generated in the mind.

14. Now, we can see the difference between vipāka viññ̄ṇa and kamma viññāna. Vipāka viñ̃̄āṇa do not have sañkhārā involved.

- On the other hand, kamma viññ̄ạna ALWAYS arise due to sañkhārā generated via avijjā. Those are the viñṇ̃̄̄na that can lead to future vipāka (and even rebirth) via akusala-mūla Paṭicca Samuppāda.
- In other words, kamma viññāṇa are the viññāna arising via "avijjā paccayā sañkhārā" followed by "sañkhārā paccayā viñ̃n̄ạna."
- That process continues with "viññāṇa paccayā nāmarūpa," etc., and ends up in "bhava paccayā jāti, "jāti paccayā jarā, marana," and "the whole mass of suffering."
- That is why those created with sañkhārā are kamma viññāṇa.

## Summary

15. To summarize what we discussed in this post:

- Cakkhu, sota, ghāna, jivhā, and kāya viññāna are ONLY vipāka viññāna. They cannot lead to new rebirths.
- Kamma viññāna are those viññāṇa that COULD lead to future rebirths.
- Mano viññāna can be "vipāka viññạ̄a" or "kamma viññạna."

16. We will discuss more details in the next post. I am proceeding slowly to emphasize these fundamental ideas. It is crucial to understand what is MEANT by a given critical key Pāli word. Then we can use that Pāli word, without explaining its meaning again.

- I hope you can now understand why it is incorrect to translate viññaña as just "consciousness'.
- In the same way, taṇh $\bar{a}$ is NOT just greed. Taṇh $\bar{a}$ includes getting attached via anger too; see "Tanhh $\bar{a}-$ How We Attach Via Greed, Hate, and Ignorance." Also, see \#12 above.
- There are several keywords like that, including anicca and anatta.
- Understanding the meanings of such vital Pāli words is critical since there are no equivalent English words.

All posts on this general topic are at "Origin of Life." Please direct any questions on the above post to the discussion forum at "Questions on Posts in the "Origin of Life" Subsection." If not registered at the forum, send questions to my email address, la@puredhamma.net.

### 5.2.9.4 How Do Sense Faculties Become Internal Āyatana?

September 8, 2019; revised October 13, 2022

## Introduction

1. Sense faculties are a crucial concept in Buddha Dhamma. In mundane usage, we are used to identifying sensory faculties such as eyes, ears, nose, tongue, and the body.

- However, in Buddha Dhamma, there are two different Pāli words depending on the usage of those sensory faculties.
- The sensory faculties of an average human are "internal ayatana." With those, an average person experiences the outside world AND forms attachments to them.
- Then those external rūpā become "external āyatana" (for example, "my house", "my friend", etc); see, "Contact Between Āyatana Leads to Vipāka Viññāna." Therefore, external āyatana are the external $r \bar{u} p \bar{a}$ that one gets attached to. For an Arahant, external $r \bar{u} p \bar{a}$ never become external āyatana; they are just external $r \bar{u} p \bar{a}$.

2. An Arahant has removed all greed, anger, and ignorance from the mind. The sense faculties of an Arahant are indriya. With his sensory faculties, an Arahant experiences "external r $\bar{u} p \bar{a}$ " such as "a house," "a person," etc., without any attachment. That house may be an elegant house where he lived some time back. But now it is just a house. That person could have been a "close friend" at that time, but now just another human being. Of course, the Arahant will recognize the house he lived in as a child and that the person was his friend.

- In brief, a sense faculty is an indriya if there is no "attachment." It becomes an internal $\bar{a} y a t a n a$ if one is attracted to or repulsed by it. In the same way, an external ru$p a$ becomes an external ayatana if one becomes attached to it.
- The Pāli word for attachment is "tanhhā." It is critical to realize that "attachment" can occur via greed, anger, or ignorance. Once "attached," one just keeps thinking about it (that means generating sañkhāra; see below). Also, see "Tanhā - How We Attach Via Greed, Hate, and Ignorance."

## How Do Indriya Become Internal Āyatana?

3. First, let us clarify the difference between an internal ay yatana and an indriya.

- We have six sense faculties, not just the five mentioned above. They are the eyes (cakkhu), ears (sota), nose (ghāna), tongue (jivhā), body (kāya), and mind (mano).
- Our initial sensory inputs (what we see, hear, etc) are due to kamma vipāka. At the moment of initial sensory contact, such sensory faculties operate as indriya. For example, when we see an attractive person on the road, we just "see that person" with the cakkhu indriya. This is like taking a picture with a camera; the picture registers in mind.

4. However, based on that initial sensory experience, we may INTENTIONALLY use those indriya to enjoy that sensory experience again and again. Then those indriya become āyatana. In the above example, if we get attached to that attractive person and keep looking at that person, then we are using our eyes as cakkhāyatana (cakkhu āyatana rhymes as cakkhāyatana.)

- Therefore, an initial sensory event is captured by an indriya. But immediately after receiving that sensory input, we tend to use that sense faculty as an internal āyatana. That happens if we get attached or form "tanh $\bar{a}$ "; see \#2 above.
- The "mechanical parts" associated with vision (eyes, nerves, brain circuit, etc., and also cakkhu pasāda rūpa) are parts of cakkhu indriya. It is only when one attaches to what is seen that it becomes cakkhuāyatana or cakkāyatana. Thus, an Arahant has cakkhu indriya, but it will not become cakkāyatana.
- There is no equivalent English word for āyatana, so we will keep using indriya and āyatana from now on.

5. Let us take the example of two people eating a delicious cake. One is an average human (X), and the other is an Arahant. Here the sense faculty is taste ( $j i v h \bar{a})$.

- Both will generate the same kind of jivhā viññanna when they first taste it. That is just the taste of the cake. If the sensory elements in the tongue and the brain work normally, both will likely find that cake "tasty." That "good taste" is a kamma vipāka. (By the way, an infinite number of kamma bïja are waiting to bear fruit, including such a "small vipāka" as tasting a piece of cake.)
- The difference becomes apparent just after tasting the cake. The Arahant would forget all about that taste, even though he/she would have felt the "good taste." It was just a sensory experience; thus, the Arahant was using that sense faculty as an indriya.
- On the other hand, X may "fall in love" with that tasty cake. She may ask for another serving. Now she is using that sense faculty as a āyatana. She will be accumulating NEW kamma with such actions.

## How One Indriya Can Lead to Many Āyatana (Saḷāyatana)

6. In many cases, when we experience a sensory event due to one indriya, we may start using some or all of the indriya as $\bar{a} y a t a n a$. Then the set of indriya becomes salāyatana.

- In the above example of a tasty cake (a kamma vipāka for both), they experience "a tasty cake." While the Arahant will not have any more thoughts about that taste, the average human ( X ) may be just getting started. She may ask for another piece even if she is not hungry.
- Let us analyze the situation carefully. The Arahant may accept a second piece if he is hungry. That request was not made because of greedy thoughts. Thus, jivhā indriya (tongue, nerves, etc., and the $j i v h \bar{a}$ pasāda) has NOT led to the arising of jivhā āyatana. Arising of an ayatana is a mental construct.
- If $X$ asks for another piece, even if she is not hungry, that is definitely due to a craving for that taste. Then her tongue has become a āyatana. Her request could be based on BOTH hunger and craving (if she is hungry.) So, now her tongue (more precisely jivhā pasāda) is still a $\bar{a} y a t a n a$, but the difference is not as clear cut.

7. Whether or not X's jivhā pasāda rūpā (internal indriya for tasting) has become a a $\overline{\text { anatana }}$ or not may become more apparent if she takes further action.

- She may smell it and say, "it smells good too." She may keep saying how good the taste is and ask about the recipe or where to buy one.
- Now she is using her sensory faculties as $\bar{a} y a t a n a$. Ghana pasāda rūp $\bar{a}$ (for smelling) has now become ghānāyatana (ghāna + āyatana). Eating cake is not limited to quenching hunger; many sensory faculties are used for pleasure. "Indriya to āyatana" is a "mental transition."
- She is thinking about how to go about tasting that cake again. Therefore, the mind (mana) has become manāyatana (mana $+\bar{a} y a t a n a)$. If she starts writing down the recipe, her body (kāya) is helping out, too, acting as a kāyāyatana (kāya $+\bar{a} y a t a n a)$.
- Therefore, when more than one $\bar{a} y a t a n a$ becomes engaged, the set of āyatana (called salāyatana) may come into play. But it all started with just one sensory input, in this case, eating a piece of cake.

## Indriya Become Āyatana With Saìkhāra

8. The easiest way to figure out whether an indriya has become an ayatana or not is to check whether one has started generating CONSCIOUS thoughts about that sensory input or experience.

- Interest in a sensory input leads to attachment to it via greed, revulsion, or ignorance.
- For example, the smell of good perfume can lead to thinking about buying it. Seeing an enemy, one may generate angry thoughts. In some situations, one may get confused about what to do and make the wrong decisions.
- Such CONSCIOUS thoughts are vacī and kāya sañkhāra.
- Vacī sañkhāra are "talking to oneself" and possibly speaking too. First, greedy/angry/ignorant thoughts are generated, which may lead to speaking out (lying, gossiping, etc).
- Kāya sañkhāra involves bodily actions, for example, hitting, stealing, killings, etc. Here, one would use more ayatana since one would need to look and hear in addition to moving body parts.

9. Most of the time we use our sensory faculties as indriya: we see, hear, etc many things in a day but ignore most of them. But when we experience something we have a craving for, then we start using our sense faculties as āyatana.

- The akusala-mūla Paṭicca Samuppāda cycle operates only when we use our sense faculties as āyatana.
- Those sañkhāra do not arise in an Arahant. That is because such sañkhāra arise due to avijjā, i.e., they arise via "avijjā paccayā sañkhāra."
- An Arahant ALWAYS uses his/her sensory faculties as indriyās. He/she will see, hear, etc just like an average human, but will not get "attached to" anything. Therefore, the akusala-mūla Pațicca Samuppāda cycle does not operate for an Arahant.

## Abhisañkhāra Are Stronger Versions of Sañkhāra

10. Some of those "extra activities" that we do with āyatana could be abhisañkhāra. Just eating a cake is not abhisañkhāra; see, "Kāma Guna, Kāma, Kāma Rāga, Kāmacchanda."

- The distinction between sañkhāra and abhisañkhāra is clear-cut when those conscious thoughts (and therefore speech and actions) become immoral.
- Generating thoughts of anger in a person is abhisañkhāra. Then telling a lie about that person is also abhisañkhāra. Both are vacī kamma done with vacī (abhi)sañkhāra.
- Stealing something or hitting someone is a kāya kamma done with kāya (abhi)sañkhāra.
- Therefore, immoral thoughts, speech, and actions are based on abhisañkhāra. They are apuññābhisañkhāra (apuñña $+a b h i+$ sañkhāra) or immoral strong sañkhāra.

11. We can get some insights by analyzing the case of a young person $(\mathrm{Z})$ becoming an alcoholic due to an association with bad friends. As a child, Z may see a bottle of alcohol and would not generate any second thoughts about it. It would just be a "seeing event' and Z would only use his eyes (or more precisely, cakkhu pasāda rūpā) as cakkhu indriya.

- But Z had some bad friends and they persuaded him to start drinking. He has now become an alcoholic. If he sees a bottle of alcohol now, he immediately thinks about having a drink. Of course, he would have a drink If he was at a party. If he is at home, and the bottle belongs to his father, he may steal a drink from it. If he travels by himself and sees a bar, he may go in and have a drink.
- It could get even worse. He may be drinking at a party and may get into an argument with someone. Suppose that leads to a fight and he kills that person. He may get the death sentence or go to jail for a long time. But a much worse outcome awaits him at his death. He would be born in an apāya.
- I hope you can see that vacī and kāya sañkhāra are behind all those. They are strong sañkhāra. They are thus abhisañkhāra. If he kills someone, that is due to an apuñ̃̄ābhisañkhāra. That would qualify him to be born in an apāya.

12. There are also puññābhisañkhāra (puñña + abhi + sañkhāra) or strong moral sañkhāra.

- For example, feeding a hungry person or giving to charity are kāya kamma done with strong kāya sañkhāra. They are both puññäbhisañkhāra.
- Such strong puñña kamma done with puññābhisañkhāra lead to good rebirths (in human and higher realms).

## How Do External Rūpā Become External Āyatana?

13. The moment an indriya becomes an internal $\bar{a} y a t a n a$, the corresponding external r $\bar{u} p \bar{a}$ becomes an external āyatana.

- Let us consider the following example. You are walking down a street and see a person approaching you at a distance. Without recognizing who it is, your eyes are working only as indriya. But as the person gets closer, you recognize him as one of your friends. At that moment, your cakkhu indriya has become a cakkhāyatana. At the same time, that external rūp $\bar{a}$ of a "person" has now become a "friend."
- To take that one step further, suppose after some time you get into an argument with that friend and it escalates to the point that he has become an enemy. Now if you see him on the road, you will recognize him as an enemy. When you see him, your cakkhu indriya will again become an internal ayatana, and the body you see will become an external āyatana.
－However，those two external $\bar{a} y a t a n a \bar{s}$ are very different．In one case，you saw a friend and in the other an enemy，even though that external $r \bar{u} p \bar{a}$（body of that other person）was the same．

14．We can find many examples in our daily lives to see how an indriya becomes a āyatana．In another example，suppose you park the car on the side of the road and go to a restaurant to eat．When you come back，you see that someone has bumped his car into it，and there is a scratch on it．You，of course，get upset．
－Suppose，after a while you sell that car．Then a few days later，you see it was destroyed in an accident． But now you are not upset about the same car getting destroyed．When you see that badly－damaged car， your cakkhu indriya does not become an internal āyatana．And that external rūpa（the car）does not become an external āyatana．
－The only difference was that you had given up the attachment to that car the moment you sold it．It is no longer＂your car．＂It became just another car the moment you gave up the＂ownership＂of the car．

## How to Stop Indriya Becoming Ayatana？

15．That last example illustrates how one ends suffering at Arahanthood．When one no longer attaches to ANYTHING in this world，one＇s mind will not be perturbed by anything．That includes knowing that one day one＇s own body will die．
－However，that state of mind of Arahanthood cannot even be comprehended by an average human．It is a long process，from being an average human to becoming an Arahant．
－We must follow the path step－by－step．Those attachments to＂worldly things＂CANNOT be forcefully removed from one＇s mind．The first step is comprehending the unfruitfuiness AND danger of doing IMMORAL things to get sensory enjoyment．See＂Is It Necessary for a Buddhist to Eliminate Sensual Desires？．＂
－However，in the beginning，it is good to get an overview of the＂big picture＂or the fundamentals of Buddha Dhamma．That is necessary to discard the wrong views about this world including kamma and kamma vipäka，and the validity of the rebirth process．One cannot even start on the Noble Eightfold Path with wrong views about such fundamental concepts．
－This series on＂Origin of Life＂is so important．One must evaluate all existing views（which we summarized in the early posts in this series）．The Buddhist view is more complex and will take several more posts to complete．

## 5．2．9．4 Indriya Make Phassa and Āyatana Make Samphassa

September 15，2019；revised November 13，2019；August 4， 2022

## Summary of＂Worldview of The Buddha＂So Far

1．We are discussing the＂WebLink：suttacentral：Chachakka Sutta（MN 148）＂which describes the sensory experience in the Buddhist worldview in detail．As we will see，this sutta explains how each person＇s world arises due to his／her actions．
－Each living being＇s existence as a human，deva，animal，etc．has arisen due to past actions．Those previous actions（kamma）resulted due to sensory experiences．
－If one does immoral actions（pāpa kamma）to gain／maintain sensory pleasures，kamma vipāka of those kamma lead to rebirths in＂bad realms＂called dugati．The word dugati comes from＂du＂＋＂gati＂or ＂bad gati．＂［du－：dur－prefix［Sk．duḥ，duṣ］Evil，bad，difficult．惡的，不好的，（困）難的．］
－On the other hand，meritorious deeds（puñña kamma）lead to rebirths in＂good realms＂or sugati realms．The word sugati comes from＂su＂＋＂gati＂or＂good gati．＂［su－prefix ：kind，good，easy．善的，好的，容易的］

- However, due to ignorance, living beings tend to do many more immoral deeds than moral ones. Therefore, more than $99 \%$ of the rebirths are in dugati realms. That is why the rebirth process is "filled with suffering." See, "Rebirth - Connection to Suffering in the First Noble Truth."

## With Taṇhā, Indriya Become Āyatana

2. Our sensory experiences constitute "our world." We experience six types of sensory inputs (rūpa rūpa, sadda rūpa, gandha rūpa, rasa rūpa, phottthabba rūpa, dhammā rūpa) with six kinds of indriya we have (cakkhu, sota, ghāna, jivhā, kāya, mano). When the corresponding pairs make "contact" (phassa), one of the six matching types of viññāna arise (cakkhu, sota, ghāna, jivhā, kāya, and mano viñ̃ān̄na.) Those are vipāka viññāna. See, "Buddhist Worldview - Introduction."

- Average humans go beyond experiencing vipāka viññ̄ạna. They deliberately make more sensory contacts to "enjoy them more." Then the six indriya become six internal ayatana, and the six types of external rūpa become external āyatana. See, "Contact Between Āyatana Leads to Vipāka Viññāna."
- An indriya makes "just contact" or "phassa." When sensory contacts are done "with attachment or tanh $\bar{a}$," those indriya become internal $\bar{a} y a t a n a$. That is the crucial concept explained in the previous post, "How Do Sense Faculties Become Internal Āyatana?."
- You may want to re-read the above posts if something is not clear. Of course, I would be happy to answer any questions.

## The Transition from Just a Sensory Contact to Kamma Formation

3. Even for an average human, the INITIAL CONTACT between an internal ayatana and an external $\bar{a} y a t a n a$ does not lead to the generation of strong kamma. For example, only when we see a beautiful thing or a person (called rūpa rūpa or just $r \bar{u} p a$ ), that we become aware of that $r \bar{u} p a$. (There are mano sañkhāra that arise automatically. Mano sañkhāra cannot lead to a strong kamma responsible for rebirth. We will discuss that later.)

- However, for anyone who has not reached the Arahant stage, sense faculties is labeled as "internal $\bar{a} y a t a n a, "$ and external rūpa are labeled "external $\bar{a} y a t a n a$." That is evident in the Chachakka Sutta (MN 148).
- Only Arahant uses his/her sense faculties as indriya all the time.

4. In the Chachakka Sutta (MN 148), that initial contact - for example between cakkhāyatana (cakkhu) and rūpāyatana (rūpa) - is stated as "Cakkhuñca pațicca rūpe ca uppajjati cakkhu viññānaain." Similar statements are there for the other five pairs, the last one being "manañca paṭicca dhamme ca uppajjati mano viñ̃̄ānaam."

- We will focus on the progression of what happens due to the contact between cakkhu and rūpa (eyes and an external object in mundane terms.) Other types of contacts will lead to similar results.
- The sutta states that the "attachment" step starts with the next paragraph. Regarding the contact between cakkhu and rūpa, it says, "Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viñ̃ān̄ami, tiṇnam sangati phasso." (Note that each successive paragraph of the sutta is the next step the mind takes.)

## What is "tiṇuam sañgati phasso"?

5. The phrase "tinnaim sañgati phasso" is commonly mistranslated as "the meeting of the three is contact." What are those three? Are they cakkhu, rūpa, and cakkhuviññāna? That is not correct because the "contact" (phasso) leads to "phassa paccayā vedanā," as we will discuss below. This "phassa paccay $\bar{a}$ vedanä" arises AFTER cakkhu viññāṇa.

- That short verse is a KEY verse in the whole sutta. It expresses how an indriya becomes āyatana due to one's gati. Those are the gati for attachment (taṇhā) via craving or dislike.
- "Tiṇ̣am"" is three and "sañgati" ("san" + "gati") are "gati contaminated with san." Normal humans have gati based on three fundamental root causes: lobha (greed), dosa (anger/hate), and moha (no comprehension of the Four Noble Truths). That is why "san" is a keyword in Buddha Dhamma; see, "What is "San"? Meaning of Sansāra (or Samsāra)." [sañgati :[f.] association with. gati :[f.] going; career; course; passing on to another existence; destiny; behaviour.]
- Just like the word "san," another critical Pāli word that has lost its significance over the years is "gati." I have explained this word in detail in many posts. See, for example, "The Law of Attraction, Habits, Character (Gati), and Cravings (Asavas)" and "9. Key to Anapanasati - How to Change Habits and Character (Gati)."

## Phassa in "Tiṇ̣am Sañgati Phasso" Is Samphassa

6. Therefore, following that initial sensory contact, one MAY form a like/dislike for the seen, heard, smelled, tasted, touched, or memory that came to mind (dhammā). But it happens within a fraction of a second of the initial cakkhu viññāna.

- For example, a young lady looking at a dress may form a liking for it. Another person seeing his enemy will develop a dislike. A teenager may get attached to a particular song, etc.
- Such mental contacts - with likes/dislikes or "san" - happen instantaneously due to our "gati." We do not have any control over it.
- However, there is a lag between that initial reaction and our subsequent conscious actions. Therefore, we still have time to control our speech or bodily actions. Even if bad thoughts come to our minds, we can stop speech or bodily actions. That is what we do in "kāyānupassana"" in Satipatthāna meditations. See "9. Key to Anapanasati - How to Change Habits and Character (Gati)" and "Mahā Satipatthāna Sutta."
- Those contacts (phassa) done with "san" are samphassa. Here, "san" + "phassa" combine to rhyme as "sanphassa." But "samphassa" rhymes better. In the same way, "sansāra" ("san" + "sāra" or "good") is commonly pronounced — and written - as "samisāra."

## No Samphassa for an Arahant

7. An Arahant has no "gati" left. All defiled "gati" arise due to lobha, dosa, moha. Therefore, an Arahant does not attach (tanh $\bar{a})$ to any sensory event. In other words, "tiṇnamं sañgati phasso" does not take place in an Arahant's mind. Also, note that attachment (tanhhā) can be due to attraction (liking) or aversion (dislike). See "Tanhā - How We Attach Via Greed, Hate, and Ignorance."

- That is why an Arahant will never elevate his indriya to "internal āyatana." Therefore, any external rūpa sensed by a given indriya will be "just a rūpa." No matter how attractive a person is or how tasty a given food, etc., there will be no attachment to it. A bribe of any value will not be able to entice an Arahant.
- In the same way, even if someone cuts his/her arm off, there will be no anger generated in Arahant's mind.
- Such a mindset is incomprehensible to an average human. That is WHY one should not even contemplate that far on the Path. When on a long journey on foot, we focus on the next mile, not the final stretch hundreds of miles down the road. However, having a general idea about the whole terrain is good.

8. The state of mind of an Arahant could seem "hard to achieve" even to an Anāgāmi, even though it may no longer seem incomprehensible.

- For a Sotāpanna, the mindset of an Anāgāmi seems "out-of-reach." As we know, the Anāgāmi stage is reached by getting rid of cravings for sensory pleasures. It is not easy to remove our deeply-embedded
desires for sensory pleasures. For an average human, this would be impossible. But a Sotāpanna has seen the "anicca nature."
- However, a Sotāpanna will not be tempted to do immoral actions to enjoy sensory pleasures. A Sotāpanna could be living a normal life of a "householder" but will NEVER engage in any "apāyagāmi actions." Those immoral deeds make one eligible to be born in the apāyā. For example, a Sotāpanna will not engage in extra-marital affairs.

## "Phassa Paccayā Vedanā" Is Actually "Samphassa jā Vedanā"

9. Now we get to the next verse in the Chachakka Sutta (MN 148): "Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viñnānain, tiṇnaì sañgati phasso, phassa paccay $\bar{a}$ vedanā."

- (I hope you see the way the sutta makes gradual progression. "Phassa paccayā vedanā" is the third step in the progress of the sensory experience. But all these steps - including more steps in the rest of sutta - happen within a split second. Only a Buddha can "see" these details in this fast process that occurs in mind.)
- From the above discussion, it is clear that "phassa paccay $\bar{a}$ vedana $\bar{a}$ " should be "samphassa paccay $\bar{a}$ vedanā." In some suttā, it is written as "samphassa jā vedanā." Here "jä" means "born due to." In other words, a vedanā arises due to "samphassa."
- Therefore, this is the SECOND TYPE of vedanā that can arise due to a sensory event. That CAN BE stopped from arising. That type of vedana does not occur in an Arahant.

## The difference in Sensory Experience Between an Average Human and an Arahant

10. "Tiṇ̂amin sañgati phasso" and "phassa paccaya vedanä" are two critical steps in the progression of the sensory experience.

- Those two steps state how anyone without full comprehension of Tilakkhaṇa (anicca, dukkha, anatta nature) COULD generate additional types of vedan $\bar{a}$.
- Now we need to recall something important from the earlier posts, "Contact Between Āyatana Leads to Vipāka Viññāna" and "How Do Sense Faculties Become Internal Āyatana?." In those two posts, we discussed the initial sensory contact, for example, "cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññānami." That gave rise to a vedanā common to an average human and an Arahant.
- As we discussed in the previous post, an average human and an Arahant would feel the "sweetness" of a piece of cake. You may want to go back and read those two posts to refresh your memory.
- Now it is those two steps of "tinnuain sañgati phasso" and "phassa paccay $\bar{a}$ vedan $\vec{a}$ " that COULD generate ADDITIONAL vedan $\bar{a}$ of attachment (to the cake in that example) in an average human. Such vedana DO NOT arise in an Arahant since there are no attachments left.

## Summary

11. I am taking the two extreme cases of an average human and an Arahant to explain the critical concepts in the Chachakka Sutta (MN 148). In many suttā, key ideas are just briefly stated, i.e., they are in either "uddesa" or "niddesa" versions. See "Sutta Interpretation - Uddesa, Niddesa, Patiniddesa."

- I hope you can see that key suttā like the Chachakka Sutta (MN 148) need detailed explanations. That is the "patiniddesa" version of a sutta.
- That is why translating such a sutta word-by-word is of minimal benefit. There is no need to study many sutt $\bar{a}$. Understanding a few suttā in detail can lead to a good understanding of the Buddha's core teachings.
- Therefore, it is essential to understand these fundamental ideas. If something is not clear, I would be happy to explain further.

12. We will discuss the types of vedana that can arise due to "phassa paccay $\bar{a}$ vedan $\vec{a}$ " or more accurately, "samphassa jā vedanā." See, "Vipāka Vedanā and "Samphassa jā Vedanā" in a Sensory Event."

## An Aside (Extra Information)

13. The steps we have discussed so far, "Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññānaín, tiṇ̂am sañgati phasso, phassa paccaya vedanä" are just a part of the more general statement, "saḷāyatana paccayā phasso; phassapaccayā vedanā,.." in Paticca Samuppāda.

- In the WebLink: suttacentral: Vibhañga Sutta (SN 12.2), the terms "phassa" and "vedana"" are clarified as "samphassa" and "samphassa jā vedanā." That applies only to the average human acting with avijjā (i.e., in Paṭicca Samuppāda and the Chachakka Sutta (MN 148).
- "Phassa" in Paṭicca Samuppāda is explained in the Vibhañga Sutta (SN 12.2): "Katamo ca, bhikkhave, phasso? Chayime, bhikkhave, phassakāyā-cakkhusamphasso, sotasamphasso, ghānasamphasso, jivhāsamphasso, kāyasamphasso, manosamphasso. Ayamं vuccati, bhikkhave, phasso."
- "Vedana" in Pațicca Samuppāda is explained in the Vibhañga Sutta (SN 12.2): "Katamā ca, bhikkhave, vedanā? Chayime, bhikkhave, vedanākāy $\bar{a}-$ cakkhusamphassajā vedanā, sotasamphassaj $\bar{a}$ vedana $\bar{a}, \quad$ ghānasamphassaja $\bar{a}$ vedana $\bar{a}$ jivhāsamphassaj $\bar{a}$ vedana $\bar{a}$, $k \bar{a} y a s a m p h a s s a j \bar{a} ~ v e d a n \bar{a}$, manosamphassajā vedanā. Ayamं vuccati, bhikkhave, vedanā."
- If you do not see the connection, don't worry about it. We will discuss all types of vedanā in the next post, "Vipāka Vedanā and "Samphassa jā Vedanā" in a Sensory Event." Understanding that will help get rid of sakkāya ditṭhi; see "Paticca Samuppāda - A "Self" Exists Due to Avijjā."

### 5.2.9.5 Wider Worldview of the Buddha

## The Framework of Buddha Dhamma

## The Suffering (Dukkha) in the First Noble Truth

Dangers of Ten Types of Wrong Views and Four Possible Paths
Sammā Ditthī - Only One Leads to the Noble Path
Fear of Nibbāna (Enlightenment)

### 5.2.9.5 The Framework of Buddha Dhamma

February 22, 2020; revised February 25, 2020

## Introduction

The framework of Buddha Dhamma identifies the critical foundation upon which Buddha's teachings can be understood.

1. We have finished the section on "Worldview of the Buddha." There we discussed Buddha's analysis of sensory events, i.e., how we experience the external world. However, we have not addressed the "real nature" of that external world.

- With this post, I will be starting a new section on the "Wider Worldview of the Buddha." This section describes a world that includes 29 more realms than the two that we are familiar with, i.e., human and
animal realms. The Buddha explained how any living being keeps moving from one realm to another in the rebirth process that has no discernible beginning (and no end until attaining Nibbāna.)
- The First Noble Truth on suffering is NOT about the suffering that we feel due to diseases, bodily pains, etc. even though that is a tiny fraction. It is about the much worse possible suffering in future lives, where most suffering will be in "undesirable realms."
- To understand the "suffering" that the Buddha said we could stop, it is essential to understand that "wider worldview."
- The Buddha laid out the critical components of that framework in the first two discourses that he delivered. In the word-by-word translations of the sutta, this "wider worldview" of the Buddha is just glossed over. No one seems to pay much attention to these key concepts, without which there is no point in doing further analysis. It is like trying to learn calculus without learning addition/subtraction first.

## The First Two Discourses of the Buddha

2. Dhammacakkappavattana Sutta (SN 56.11) was the first discourse delivered by the Buddha. The five ascetics Koṇ̣añña, Bhaddiya, Vappa, Mahānāma, and Assaji, listened to it several days after the Buddha attained Enlightenment (Buddhahood.) All five ascetics reached the Sotāpanna stage after several days of explaining by the Buddha.

- Then with the delivery of the second sutta, WebLink: suttacentral: Anattalakkhana Sutta (SN 22.59), all five ascetics attained the Arahanthood.
- Later on, Ven. Sariputta delivered the WebLink: suttacentral: Saccavibhañga Sutta (MN 141) to a gathering of bhikkhus to explain further details of the Dhammacakkappavattana Sutta.
- Therefore, a good understanding of Buddha Dhamma is possible with a discussion of those three suttā.

## The Framework of Buddha Dhamma

3. Dhammacakkappavattana Sutta has most of the essential concepts, even though it is in a highly condensed form.

In the document, WebLink: pdf download: Dhammacakkappavattana Sutta - Printout, I have divided the sutta to 14 sections, You may want to download and print for reference. We will discuss that document first. It has the framework of Buddha Dhamma.

- The name of the sutta comes from the combination of three terms: Dhamma, Cakka, and Pavattana. Dhamma here means the Buddha Dhamma or the true nature of existence. Cakka means "wheel." Pavattana means to "set in motion" AND to "maintain."
- Therefore, this first sutta "gets the Wheel of Dhamma in Motion." It has all the critical concepts of Buddha Dhamma.
- As in many Pāli terms, the word "dhammacakkappavattana" comes from the combination of three above words, with an additional " p " just before pavattana. As we discussed before, pañcakkhandha is the combination of pañca with khandha with an extra k in tying up the two words.
- Sometimes the sutta referred to as the Dhamma Cakka Pavattana Sutta without combining those three words.
- Let us go through the sutta from the beginning. I will refer to sections \#1 through \#14 in the document above. We will frst go through the main ideas without going to detail.

## The "Middle Path" Recommended by the Buddha - Sections 1 and 2

4. Section \#1 can be summarized as follows. "Bhikkhus, two extremes should not be followed by you. What two? The pursuit of sensual pleasures, which is low, vulgar, the way of the average ignorant person. The
other is the pursuit of rituals that involve subjecting one to extreme hardships. Without veering towards either of these extremes, the Tathāgata followed the middle way of living a simple life leading to Nibbāna."

- That middle path is the Noble Eightfold Path of Sammā Diṭthi, Sammā Sañkappa, Sammā Vācā, Sammā Kammanta, Sammā Āj̄̄̄va, Sammā Vāyāma, Sammā Sati, and, Sammā Samādhi.

## Four Noble Truths - Section 3

5. The First Noble Truth of suffering: Birth is suffering, aging is suffering, illness is suffering; death is suffering. Union with what is undesirable is suffering. Separation from what is desirable is suffering. Not to get what one wants (icch $\overline{\boldsymbol{a}}$ ) is suffering. In brief, clinging (upādāna) to the five aggregates is suffering.

- The Second Noble Truth of the origin of suffering: It is this $\boldsymbol{t} \boldsymbol{a} \boldsymbol{\eta} h \bar{a}$ which leads to repeated rebirths.

- The Third Noble Truth of the cessation of suffering: It is the remainderless fading away and cessation of the three types of $\boldsymbol{t a n h} \overline{\boldsymbol{a}}$.
- The Fourth Noble Truth of the way to the cessation of suffering: It is the Noble Eightfold Path or the Middle Path of Sammā Ditṭhi, Sammā Sañkappa, Sammā Vācā, Sammā Kammanta, Sammā $\bar{A} j \bar{i} v a, S a m m a ̄ ~ V a ̄ y a ̄ m a, ~ S a m m a ̄ ~ S a t i, ~ a n d, ~ S a m m a ̄ ~ S a m a ̄ d h i . ~$

## The Previously Unheard Dhamma (Teaching) of Suffering in The Wider World - Sections 4-7

6. Sections 4 through 7 state how the Buddha attained the Buddhahood via comprehending — through Paticca Samuppāda - the tiparivatttaya (three ramparts or walls of bondage to this world) that has never been known to the world (except during the times of previous Buddhā): "..pubbe ananussutesu dhammesu.. ."

- We will discuss Sections 4 through 7 in more detail later. Right now, we are taking a quick look at the framework of Buddha Dhamma outlined in the sutta.
- However, it is essential to discuss the verse, "..pubbe ananussutesu dhammesu cakkhum udapādi, $\tilde{n} a ̄ n a \dot{m}$ udapādi, paññā udapādi, vijjā udapādi, āloko udapādi," that appears 12 times in the Sections 4 through 7. It is critical to understand this verse.

7. When the Buddha attained the Buddhahood via comprehending this Dhamma that has never been known to the world, five unique pieces of knowledge arose in him at that moment: cakkhu, $\tilde{n} \bar{a} n a$, pañ $\tilde{n} \bar{a}, v i j j \bar{a}$, and āloka.

- Here "cakkhu" is the "Dhamma eye," the ability to "see" the true nature of this world. We can loosely translate $\tilde{n} a n a$ and pañ̃̃ā as "knowledge" and "wisdom."
- The next one is " $v i j j \vec{a}$ " (the Sanskrit word is " $v i d y \vec{a}$ "). That is the "ultimate science" about the world, what I called the "The Grand Unified Theory of Dhamma." A Buddha Is the greatest scientist that comes to the world very infrequently.
- Simultaneously with the comprehension of vijja, one is removed from "this material world" or "āloka" ("a" + "loka"). The word "āloka" has other meanings, including "light," which we will discuss later.

## Three "Rounds" or Bondage to Overcome - Section 8

8. "Tiparivatta" means the three rounds of bondage. One may visualize a living-being trapped inside the inner wall, a prison with three concentric walls or ramparts. To be freed (i.e., to get to Nibbāna,) all three barriers must be overcome. The 31 realms of this world (discussed below) divide into three sections with those three walls.

- The first is to be released from the apāyā (four lowest realms), via the Sotāpanna stage, by removing the wrong views about existence in the 31 realms. This requires the first stage of Sammā Ditṭhi or grasping the framework of Buddha Dhamma that we are discussing now.
- In the second round, one overcomes the kāma loka (realms 5 through 11, which include the human realm and 6 Deva realms). That happens via two stages. A Sakadāgāmi will not be reborn with bodies subjected to diseases. Thus there will be no more rebirths for a Sakadāgāmi in the five lowest realms (apāyā and the human realm.) Then, at the Anāgāmi stage, kāma rāga and pațigha go away, and one is released from births anywhere in the kāma loka. That means complete cessation of $\boldsymbol{k} \overline{\boldsymbol{a} m a} \tanh \overline{\boldsymbol{a}}$.
- In the third round, any linkage to anywhere in the 31 realms removed. The mind becomes free of attachment to any trace of matter, and the Arahant stage attained. See, "What Are Rūpa? (Relation to Nibbāna)." That is complete cessation of bhava tanhēa and vibhava tanhā.

## The Result of Arahanthood (Parinibbāna) Is No More Rebirths - Section 9

9. The rebirth process among the 31 realms in this world is a crucial concept to understand. More details in \#13 below. The "suffering" in the First Noble Truth is the harsh levels of suffering in the four lowest realms (apāy $\bar{a}$.) Even if one spends millions of years in a Deva realm, that "pleasurable time" is insignificant because one will spend much more time in the $a p \bar{a} y \bar{a}$ in the LONG RUN.

- We will discuss that in detail, with Tipitaka references, as we proceed. But here I want to point out that the verse, "Nānañea pana me dassanamं udapādi: 'akuppā me vimutti, ayamantimā jāti, natthi dāni punabbhavo'" $t$.
- There, ayamantimā is "ayam antima," where "ayam" is "this" and "antima" means "last"), and punabbhavo is "puna bhava," where "puna" is "repeated," and "bhava" is "existence in THIS WORLD."
- Thus, the above verse means: "The knowledge and vision arose in me: 'Unshakable is the liberation of my mind. This is my last birth. There will be no more rebirths for me."
- Upon Parinibbāna, one is no longer born anywhere in the 31 realms of THIS WORLD. One is free of any future suffering.

## Venerable Koṇ̣̣añña Attains The Sotāpanna Stage - Section 10 and 14

10. At the end of the discourse, Venerable Koṇạañña attained the Sotāpanna stage of Nibbāna. Venerable Koṇ̣añña understood the essence of the "framework of Buddha Dhamma": "yain kiñci samudaya dhammain sabbaì taim nirodha dhamman" ti.

- That verse means: "Whatever dhammā that give rise to things in this world are subject to cessation." Therefore, it is possible to stop any existence in this world from arising."
- We all have gone through innumerable lives filled with suffering in the rebirth process because we never understood how to stop future lives from arising. Of course, until a Buddha is born in the world, humans are NOT AWARE of the existence of the other 29 realms, including the four lowest realms ( $a p \bar{a} y \bar{a})$ filled with suffering.
- Many of you must be wondering WHY would one ever want to stop future lives! That is an important issue that we will discuss in the next post.
- That involves the rebirth process in the "wider world of 31 realms" that only a Buddha can "see" upon Enlightenment. That is the "..pubbe ananussutesu dhammesu.." or "previously unknown nature of this world" that we discussed in \#6 above.

11. At the end of the sutta (in Section 13), it says that the Buddha saw that Ven. Konḍañña has attained the Sotāpanna stage and declared: "Koṇạañña has understood! Koṇạañña has indeed understood!"

- That is how Venerable Koṇdañña acquired the name "Añña Koṇ̣añña-Koṇ̣añña Who Has Understood."

## The Wheel of the Dhamma Set in Motion - Section 11 and 12

12. With the Wheel of the Dhamma set in motion by the Blessed One, the earth-dwelling devā (bhumma $\overline{\boldsymbol{a}}$ $\boldsymbol{d e v} \overline{\boldsymbol{a}}$ ) belonging to the cātumahārājikā $\operatorname{dev} \overline{\boldsymbol{a}}$ realm raised a cry. "At Baraṇasi, in the Deer Park at Isipatana, the Wheel of the Dhamma has been set in motion by the Blessed One. It cannot be stopped by any ascetic or brahmin or Deva or Māra or Brahma or by anyone in the world."

- That Wheel of the Dhamma is still in motion. It is supposed to be in effect for roughly 2500 more years for a total of 5000 years.
- Those bhummā devā are part of the Cātumahārājika Deva realm but reside among humans (even though we cannot see them). They first became aware of the desan $\bar{a}$ and notified their higher-lying main realm with their cries.
- Devā of the higher-lying cātumahārājikā devā realm then repeated that cry which then progressively transmitted to the other Deva realms lying further away from the Earth.

## The 31 Realms of Existence - Section 13

13. Section 13 is long and takes a significant part of the sutta. That section names the 6 Deva realms and 15 out of 16 rūpi Brahma realms. See the document, WebLink: pdf download: Dhammacakkappavattana Sutta - Printout. Most of this section missing in many published versions of the sutta, including that at Sutta Central. However, this section is essential for a couple of reasons.

- First, it clearly shows that the Buddha indeed described a "wider world" than experienced by us, consisting of 31 realms; see, "The Grand Unified Theory of Dhamma" and " 31 Realms of Existence."
- Second, it says that many Devā/Brahmā from those realms listened to the desanā. Starting from the 6 Deva realms, it lists 15 rūpi Brahma realms (except the asañña realms, where beings have only a physical body and thus cannot listen to a desanā ). Numerous Devā and Brahma attained various stages of Nibbāna.
- Note that the Buddha discussed the contents of the sutta in detail with the five ascetics overnight, until Ven. Koṇ̣añña reached the Sotāpanna stage. It took further discussions over several days before all five reached the Sotāpanna stage. Delivery of the second sutta, Anattalakkhaṇa Sutta (SN 22.59), took place after that.

14. Section 13 lists how the news progressively propagated to higher-lying realms, and eventually, Dev $\bar{a}$ from all those 21 realms came to listen to the desana $\overline{\text { a }}$

- As you can see those realms match the names listed in the following post: " 31 Realms of Existence" and " 31 Realms Associated with the Earth."
- Note that all of those realms referred to as Deva realms in the sutta, regardless of whether they belong to the 6 Deva realms or the rūpi Brahma realms.
- Of course, only five humans (the five ascetics) were present. Any living-being in the lowest four realms cannot comprehend Dhamma. Also, Brahmā in the four arūpi realms do not have ears to listen to. Thus section 13 lists 21 realms. Not listed are the four lowest realms, the asañña realm, and the four arūpi Brahma realms. Many other suttā mention those other realms.

We will discuss the details of this "framework of Buddha Dhamma" in upcoming posts.

### 5.2.9.5 . 2

February 29, 2020

## Introduction

1. In the previous post, "The Framework of Buddha Dhamma" we discussed the framework of Buddha Dhamma as laid out by the Buddha in the Dhammacakkappavattana Sutta (SN 56.11.) That is the "view from the 30,000 feet."

- The " 30,000 -foot view" is a common phrase that describes getting to a high enough level to see the "big picture." The next time you are in a commercial airplane and cruising around 30,000 feet, take a look out the window and note what you see-some clouds, large swaths of land, maybe a mountain range. The reality is you're too high up to see much of anything with any precision.
- Take a helicopter-ride between 500 to 1,000 feet, and you'll be able to recognize what you're looking at, with the benefit of seeing it from a new, higher perspective.
- Starting with this post, we will take a " 1000 -foot view" of the Buddha Dhamma by getting into a bit more detail, specifically on the First Noble Truth.
- First of all, we need to figure out "the suffering" that the Buddha wanted us to understand.
- By the way, I have discussed these ideas previously over the past five years. However, the website now has over 500 posts. Therefore, this series of posts is an excellent way to present a systematic approach. I will refer to existing posts as needed. Please make sure to read them.

## What Is the "Previous Unheard" Suffering (Dukkha)?

2. In \#6 and \#7 of the previous post, we mentioned that the verse, "..pubbe ananussutesu dhammesu cakkhumं udapādi, ñānamं udapādi, paññā udapādi, vijjā udapādi, äloko udapādi," that appears 12 times in the Sections 4 through 7 of the sutta. See, WebLink: pdf download: Dhammacakkappavattana Sutta - Printout.

- The word "ananussutesu" comes from "na" + "anussuta" or "not heard." Pubbe means "previous," and thus "..pubbe ananussutesu dhammesu.." means a Dhamma (teaching) that has never been known to the world (except during the times of previous Buddhā.)
- The First Noble Truth is "Dukkha Sacca" so it should state "the previously unheard suffering." That is in Section 3 of the printout and \#5 of the previous post. Remember that "sacca" is pronounced as "sachcha." See the two posts on "Tipiṭaka English" at ""Tipitaka English" Convention Adopted by Early European Scholars - Part 1" and "Tipitaka English" Convention Adopted by Early European Scholars Part 2."
- The First Noble Truth of suffering: Birth is suffering, aging is suffering, illness is suffering; death is suffering. Union with what is undesirable is suffering. Separation from what is desirable is suffering. Not to get what one wants (icchā) is suffering. In brief, clinging (upādāna) to the five aggregates is suffering.

## First Noble Truth of suffering

3. In the above statement on the First Noble Truth of suffering, I have highlighted in orange the "previously unheard parts."

- Anyone knows that "aging is suffering, illness is suffering; death is suffering. Union with what is undesirable is suffering. Separation from what is desirable is suffering."
- Anyone would also agree that "Not to get what one wants (icchā) is suffering." But it has more profound implications that an average human would not contemplate. One needs to know the "broader worldview" to see those more profound implications, as we will see later.
- But why did the Buddha say that "Birth is suffering?" Why did he state that "In brief, clinging (upādāna) to the five aggregates is suffering?"
- It is NOT correct to translate the word "sañkhittena" as "in brief." The verse, sañkhittena pañcupādānakkhandhā dukkhä" has a deeper meaning than "In brief, clinging (upādāna) to the five aggregates is suffering"? We will discuss that later. [sañkhittena means being overthrown by defilements]
- Instead, it is easier to get started with Section 8 of the printout on "Tiparivatta." We discussed that briefly in \#8 of the previous post. We will expand it a bit more here.

## Tiparivatta - The Three Rounds of Bondage

4. The word "tiparivatta" comes from "ti" for three and "vatta" for "round" (actually a circular wall.) A "parivatta" is a complete circular wall. Thus, the word tiparivatt!a provides a good visualization of a livingbeing trapped in the middle of prison with three concentric walls.

- Most suffering is within the first barrier or the first round. Once one overcomes the first barrier, one is free from the four lowest realms (niraya, peta, asura, and animal.)
- The next reduced level of suffering is in between the first and second walls, which correspond to seven realms (human and six Deva realms.) Suffering and happiness both present in the human realm. The six Deva realms have much less suffering and much higher levels of "pleasures" compared to the human realm.
- The twenty Brahma realms lie between the second and third "walls." Sixteen of those are in the rūpāvacara Brahma realms and the other four in higher arupāvacara Brahma realms. There is hardly any suffering in these higher realms. Even humans, who can cultivate $j h a \bar{n} a$, can experience such " $j h a \bar{a} i c$ pleasures."
- The 31 reams discussed in " 31 Realms of Existence" and " 31 Realms Associated with the Earth."

## Much More Suffering Than Pleasures in the Rebirth Process

5. So, why don't we just do good deeds (kamma) and be born in a Deva realm and enjoy such "heavenly pleasures"? Or, cultivate jhāna, be born in a Brahma realm, and enjoy jhānic pleasures" for millions of years? The problem is that such "pleasures" are very short-lived (in the rebirth process.) The overall rebirth process subjects any living-being to much more suffering due to the following reasons.

- Any given living-being spends MUCH MORE time in the lowest four realms compared to the higherlying reams. In particular, getting a human existence is VERY rare. See "Rebirth - Connection to Suffering in the First Noble Truth."
- Suffering in the lowest four realms is unbearable, as described in many sutt $\bar{a}$, for example, Devaduta Sutta (MN 130.) The animal realm is relatively better than the other three, and we can see the suffering in that realm.

## Power of Kammic Energy

6. Birth in any realm is due to one's deeds (kamma.) Good deeds lead to "good births" and evil deeds to "bad births." There is a high-level of "mental energy" (kammic energy) associated with strong (good or bad) kamma.

We can get a good idea of this "kammic energy" by looking at an angry person. Angry thoughts manifest as changes in the physical body. His/her face becomes distorted and unpleasant to look at. That angry person also has "pumped up" energy to strike another person or even to kill another person.

- Such "powerful thoughts" (javana citta) can arise while doing bad or good deeds. They are the source of kammic energy that gives rise to births in different realms.
- The lifetime in any realm depends on the strength of the corresponding kammic energy.
- Humans tend to do immoral deeds (akusala kamma) in their desire (icch $\overline{\boldsymbol{a}}$ ) to "enjoy life." Akusala kamma lead to rebirths in the lowest four realms (apayy $\bar{a}$.) Thus it is essential to learn about the laws of kamma. However, they are NOT deterministic, as we will discuss.
- A good sutta to read about rebirths in bad realms due to dasa akusala and also rebirths in good realms due to the avoidance of dasa akusala is "WebLink: suttacentral: Pathamanirayasagga Sutta (AN 10.211)." That link gives two English translations.
- Also, see "Anguttara Nikāya - Suttā on Key Concepts" where dasa akusala and dasa kusala discussed with many short suttā.

## Wider Worldview Is Necessary to Understand the "Previously Unheard Suffering"

7. From the above, it must be clear that "suffering" in the First Noble Truth is NOT what we perceive to be suffering. Everyone KNOWS about that "mundane suffering" associated with aches and pains, diseases, injuries, etc.

- As we saw in \#4 above, we need to be MOST concerned with possible future suffering in the four lowest realms (apayy $\bar{a}$.) Thus, we first need to figure out how to stop rebirths in the $a p \bar{a} y \bar{a}$. As we saw in the previous post, that is accomplished by reaching the Sotāpanna stage of Nibbāna.
- Some people engage in "breath mediation" to alleviate their day-to-day stresses, or even to cultivate mundane jhāna. Although that will give temporary relief, that is not the "suffering" that the Buddha was concerned with.
- To put it in a different way, the "mundane suffering" is included in vedanā. Specifically, it is the "kāyika dukkha vedan $\vec{a}$ " associated with the physical body or "domanassa vedana" associated with mental stress. Even "jhānic pleasures" are vedanā and belong to "this world" (specifically to Brahma realms.)
- But one needs to "see" the "previously unheard suffering" in future rebirths (especially in the apāyā) with wisdom (pañ̃̃̄ $\bar{a}$.) That is "lokuttara Sammā Ditṭhi" needed to comprehend the First Noble Truth.

## How Can We Believe This "Previously Unheard Teachings" of the Buddha?

8. This is another critical issue that we need to discuss. Many concepts discussed above are not self-evident. We have not seen first hand any harsh suffering in the apāyā, except for in the animal realm.

- We do that by first looking at the "preliminary material" taught by the Buddha. When we can see the selfevident truth in them, our confidence in Buddha's teachings on things that we cannot see for ourselves will grow. That is building faith/confidence (or saddh $\bar{a}$ ) in the Buddha and his teachings (Buddha Dhamma.)
- One needs to go through primary and secondary schools before being eligible for a college education. In the same way, one needs to learn the fundamental principles in Buddha Dhamma first.
- Understanding the laws of kamma, the validity of the rebirth process and associated concepts are essential. That is cultivating "conventional Sammā Ditṭhi."
- Only after that one can comprehend "lokuttara Sammā Ditthi" (and the ability to "see" the harsh sufferings in the apāyā.)
- The Buddha clarified that in the Mahā Cattārīsaka Sutta (MN 117). I will discuss it in the next post.

## Good or Bad Deeds May Bring Their Results Much Later

9. That is another CRITICAL issue. We tend to think only about "near-term results" of our actions. For example, person X may kill someone while robbing that person's house. X may not be caught and live a luxurious life with the valuables stolen from that house.

- However, person X's immoral deed (kamma) will not go unpunished by Nature. The corresponding result (kamma vipāka) can materialize in a future life, if not in this life. A strong bad kamma like killing a human can even be responsible for rebirth in one of the four lowest realms. In the same way, one who does a good kamma like engaging in compassionate deeds may be reborn in a Deva realm.
- Kammic consequences of either kind of action (good and bad) are stringent. Nature enforces them automatically. There is no "higher-being" reviewing one's deeds. There is a built-in mechanism in Nature to take into account various complexities automatically. Such laws of kamma can be complicated, but we can get a good general idea. We will discuss them in the future.
- But most people tend to believe just what they can experience for themselves. Not believing in rebirth is a strong wrong view that, by itself, can lead to rebirth in the apāy $\bar{a}$. That is why one needs to remove the ten types of wrong views well before being able to grasp the "previously-unheard teachings" of the Buddha.

## There is No Permanently "Good" or "Bad" Person

10. No one is a "good person" or a "bad person" forever. Until one becomes at least a Sotāpanna Anugāmi, one's character/habits (gati) can change. Gati (pronounced "gathi") is a crucial Pāli word even though very few people are aware of it these days. So, that is another topic that I will be discussing in detail.

- One with "good gati" is likely to do more "good deeds," and another with "bad gati" is likely to do more of"bad deeds."
- However, even one with "good character" may do evil deeds if the temptation is high enough. For example, we often hear about "good people" arrested for bribery or rape charges.
- In the same way, even a person labeled as a 'bad person' may do meritorious deeds under certain conditions.
- One's family, friends, and associates play significant roles in the formation of new gati and getting rid of old gati (good or bad.)
- More details at, " 9 . Key to Ānāpānasati- How to Change Habits and Character (Gati)."

## Having Wrong Views Is a Major Akusala Kamma

11. Any realm has a finite lifetime. One will NEVER live in a "good realm" forever or be trapped forever in a "bad realm." Each of us has been in most of the 31 realms, many times over. The rebirth process has no discernible beginning. See, "Origin of Life - There is No Traceable Origin."

- In general, good deeds (kusala kamma) lead to good rebirths (those in the human and higher realms.) Evil deeds (akusala kamma) lead to bad existences (the lowest four realms or the apāy $\bar{a}$.)
- One key factor that many people are not aware of is the following. Even if one does not do any "conventional immoral deeds," just having wrong views about the world is one of the dasa akusala. See "Ten Immoral Actions (Dasa Akusala)."
- Most people consider immoral deeds to be only "bad bodily deeds" (killing, stealing, sexual misconduct) and "bad speech" (lying, gossiping, slandering, harsh speech.)
- That is the key to understand the first stage (first round in the tiparivatta) of the First Noble Truth.

12. However, there are three akusala kamma done with the mind, i.e., just with one's THOUGHTS. Those are greedy thoughts (abhijjhā), angry thoughts (vyāpāda), and wrong views (micchā ditthi).

- Those three kinds of evil THOUGHTS lead to bad speech and bodily actions. Furthermore, wrong views are the root cause of greed and anger as well, as we will see.
- It may be hardl to believe, but wrong views are the main reason that most humans are reborn in the $a p \bar{a} y \bar{a}$. See "Rebirth - Connection to Suffering in the First Noble Truth."
- With this post, we are just expanding the worldview a bit more. Some people may be aware of these facts, but many people are not aware of them. I want to make sure everyone is on-board.

In the upcoming posts, we will discuss the above issues in detail. It is not beneficial to try to understand deep suttā without having a good understanding of the "essential fundamentals."

### 5.2.9.5 Dangers of Ten Types of Wrong Views and Four Possible Paths

March 7, 2020; revised March 9, 2020; August 20, 2022; August 29, 2022

## Introduction

1. We started this series of posts with "The Framework of Buddha Dhamma" to understand the details in the Dhammacakkappavattana Sutta (SN 56.11.) As we noted, Dhammacakkappavattana Sutta provides only an outline of the framework of Buddha Dhamma. Then in the subsequent post, "The Suffering (Dukkha) in the First Noble Truth," we noted that the Buddha pointed out that there are two "good paths" and "two bad paths."
The WebLink: suttacentral: Mahācattārīsaka Sutta (MN 117) describes those four paths. Any person is on one of those four paths at a given time.

- One could be on two paths leading to much suffering in the $a p \bar{a} y \bar{a}$.
- There are also two "good" paths. One COULD lead to rebirths in "good" realms. The other is the Noble Path leading to Nibbāna.
- It all depends on the types of views about the world. One with the ten types of micchā ditṭh $\bar{\imath}$ (wrong views) will be on one of the two paths leading to much future suffering.
- We will discuss the "two bad paths" in this post and the "two good paths" in the next post.

2. One who has removed the ten types of micchā diṭth $\bar{\imath}$ initially have mundane Sammā Ditṭhī. They are on the path toward "good rebirths." However, that is NOT a guarantee for all future rebirths since one could switch back to having wrong views in the future.

- Someone who has removed the ten types of micchā dittthī CAN go beyond that and remove the possibility of switching back to wrong views by comprehending the "real Nature," i.e., gain "yathābhūta ñāna." That means comprehending Tilakkhaṇa or the anicca, dukkha, and anatta nature. At that point, one will be on the Noble Path and reach Nibbāna within a limited number of rebirths in good realms.
- I will only discuss sections of the WebLink: suttacentral: Mahācattārīsaka Sutta (MN 117) to discuss the four types of possible paths. The Pāli version and translations to several languages are at that link.

Steps to Nibbāna - Sammā ditṭhi, Sammā Samādhi, Sammā Vimutti
3. At the beginning of the sutta, the Buddha says: "Bhikkhus, I shall teach you samma $\operatorname{a}$ samādhi with its necessary supports ( saupanisain or "with upanisa") and essentials (saparikkhāram or "with parikkhāra.")
"What is Noble samm $\bar{a}$ samādhi with its necessary supports? Those are sammā ditthi, sammā sañkappo, samm $\bar{a} v \bar{a} c \bar{a}, ~ s a m m a \bar{a}$ kammanto, sammā $\overline{a j} \bar{i} v o$, samm $\bar{a} v \bar{a} y \bar{a} m o, ~ s a m m a \bar{a}$ sati. That is samma samādhi, reached with the purification of mind, and equipped with those seven supporting factors."

- It is to be noted that one starts the Noble Path with Sammā Ditṭhi or the "right views." That sequentially leads to Samma $\bar{a}$ Samādhi or the eighth factor.
- Sammā Ditt of mundane Sammā Ditṭhi is reached by getting rid of the ten types of wrong views (micch $\bar{a}$ diṭth $\bar{u}$.)
- Once one completes the mundane path with mundane Sammā Ditthi, one can start comprehending Tilakkhaña (anicca, dukkha, and anatta.) At that point, one is a Sotāpanna Anugāmi and is on the Noble Path. He/she can get to "total release from all suffering" (Sammā Vimutti) via four stages of Sotāpanna, Sakadāgāmi, Anāgāmi, and Arahant.

## Ten types of wrong views (Micchā Ditṭh $\overline{\boldsymbol{u}})$

4. "Therein, bhikkhus, sammā ditṭhi (right view) comes first. And how does the right view come first? One understands the wrong views (micch $\bar{a} \operatorname{ditt} h \bar{\imath}$ ) as the wrong views and the right view as the correct view. That is one's right view.
"And what are the wrong views?
(i) No profit in giving (dāna.)
(ii) No corresponding benefits in making offerings on a large scale.
(iii) Respecting and offering to those with higher virtues has no merit.
(iv) Good and bad actions (kamma) do not lead to corresponding results (vipāka.)
(v) This world (ayam loko) does not exist.
(vi) Para loka (of gandhabba) does not exist.
(vii) Mother is not a special person.
(viii) Father is not a special person.
(ix) Living beings cannot be reborn spontaneously (sattā opapātikā.)
(x) No virtuous recluses in the world who have seen for themselves by direct knowledge and declare this world and the para loka exist.

- Those are the wrong views. These are stated the same way in over 30 suttā in the Tipiṭaka because of their importance. A partial list for such suttā: SN 24.5, AN 3.117 through AN 3.119, AN 10. 211, MN 42, MN 110, MN 41, MN 60, MN 76, DN 5, DN 34.

## Why Are Those Views Bad? - Laws of Kamma

5. Before proceeding with the sutta, we must ask, "why are those views bad, and why are they so critical?"

- As we have discussed in the previous two posts, the worldview of the Buddha is VERY different from that of an average human. An average human is unaware of the existence of 31 realms and the endless rebirth process within those 31 realms.
- The mechanism that sustains the rebirth process within the 31 realms is that $k a m m \bar{a}$ (specifically meritorious and immoral actions) have their corresponding vipāka. The first four wrong views are associated with not having a good understanding of kamma/kamma vipāka.
- Rebirths among the 31 realms are based on kamma vipāka (results of previous kamma.) We discussed that briefly in \#6 in the previous post, "The Suffering (Dukkha) in the First Noble Truth."

6. There is a rebirth process WITHIN the human existence (human bhava) where one is repeatedly reborn with a human body many times. Between those human rebirths, that life-stream is in the para loka as a gandhabba (i.e., just with a "mostly mental" body.) That is why there are so many rebirth stories, where especially children, talk about their previous human lives ( $j \bar{a} t i$. ) On the other hand, it is very difficult to get a human existence (bhava.) It is necessary to understand the difference between bhava and $j \bar{a} t i$.

- Most people reject the laws of kamma because they cannot "see" the consequences of some deeds (kamma) in this life. But all causes lead to results. But there must be the right conditions for the results to appear. A seed does not germinate until the right conditions arise. See "What Does "Paccaya"" Mean in Paticca Samuppāda?" That is why there is a "time delay" between kamma and kamma vipāka.
- Buddha Dhamma is amazingly self-consistent. It just takes an effort to see these "interconnections." If one becomes interested and makes an effort, there will be many "Aha!" moments. That is when one starts having "real faith" or "saddhā."

## Why Are Those Views Bad? - Rebirth Process Within 31 Realms

7. It is frustrating to be in the para loka as a gandhabba without a physical body. One cannot eat, smell, or touch (and have sex.) One is in the kāma loka BECAUSE one craves those sensory pleasures. On the spiritual side, it is impossible to concentrate and, thus, make progress on the path. That is why one should be grateful to the mother and father for providing an opportunity to be born with a physical body. The wrong views number five through eight arise because one is unaware of that process involving "this world that we experience" and the "para loka of the gandhabbā."

- For a crude, but good, visualization of the gandhabba and para loka see the post, "Ghost 1990 Movie - Good Depiction of Gandhabba Concept."
- The ninth wrong view arises because one is unaware of realms other than the human and animal realms. Many living beings (sattā) are reborn spontaneously (opapātik $\bar{a}$ ) in many realms. In such births unlike in the human and animal realms - one is not born a baby and grows to an adult; rather, the birth is in the "final form." Of course, many living beings do not have dense physical bodies like ours.
- Finally, it is possible to cultivate (Ariya or anāriya) jhāna and see one's previous lives. It is not easy to develop abhiññā powers to see previous other existences (bhava), such as previous existence in animal or Deva realms. However, it is relatively easy to see one's past human lives WITHIN the current human bhava. Many can do that even today, including some children (rebirth accounts.) Discarding such true statements as "mere speculation" is the tenth wrong view.

## Those With Micchā Diṭ̣thi Are Destined to be Reborn in Niraya

8. As clearly stated in the following sutta, those with micch $\bar{a}$ dittth $\bar{\imath}$ end up in niraya (the lowest of the ap $\bar{y} y \bar{a}$.) On the other hand, those who do not have any of the ten types of micch $\bar{a}$ dittth $\bar{\imath}$ (and thus have mundane samma ditṭhi) are likely to be reborn in the higher realms at or above the human realm (collectively labeled sagga.)

## The WebLink: suttacentral: Ditthi Sutta (AN 4.212) is short:

- "Catūhi, bhikkhave, dhammehi samannāgato yathābhataì nikkhitto evaì niraye. Katamehi catūhi? Kāyaduccaritena, vacīduccaritena, manoduccaritena, micchā ditṭhiyā-imehi kho, bhikkhave, catūhi dhammehi samannāgato yathābhataì nikkhitto evaì niraye.
- Catūhi, bhikkhave, dhammehi samannāgato yathābhataì nikkhitto evai் sagge. Katamehi catūhi? Kāyasucaritena, vacīsucaritena, manosucaritena, sammā diṭthiȳ̄̄-imehi kho, bhikkhave, catūhi dhammehi samannāgato yathābhataì nikkhitto evaì sagge"ti.

## Translated:

- "Bhikkhave, those who are proficient in four types of dhamm $\bar{a}$ (these are sometimes specifically called adhamm $\bar{a}$ or "bad dhamm $\bar{a}$ "), are bound to be born in the niraya. Those four types are bad conduct with body, speech, and mind, and having wrong views." Those are dasa akusala.
- "Bhikkhave, those proficient in four types of dhammā, are bound to be born in the good realms. Those four types are good conduct with body, speech, and mind, and having removed wrong views." They are dasa kusala.
- Of course, niraya (hell) is the lowest realm of the 31 realms. A good sutta to read about rebirths in bad realms due to dasa akusala and rebirths in good realms due to the avoidance of dasa akusala is "WebLink: suttacentral: Pathamanirayasagga Sutta (AN 10.211)." That link gives two English translations.

## Two Paths for Those With Micchā Ditthi

9. Towards the end of the Mahācattārīsaka Sutta, the Buddha states that there are two paths (and 20 factors) with correct views (vissati kusala pakkhā) and two paths (and 20 factors) with wrong views ( $\mathbf{v i s s a t i ~ a k u s a l a ~ p a k k h a ̄ ) . ~ T h e r e ~ a r e ~ f o r t y ~ f a c t o r s ~ i n ~ a l l , ~ a n d ~ h e n c e ~ t h e ~ n a m e ~ m a h a ̄ ~ c a t t a ̄ r i ̄ s a k a : ~ " I t i ~ k h o , ~}$ bhikkhave, vīsati kusala pakkhā, vīsati akusala pakkhā-mahā cattārīsako dhammapariyāyo pavattito appaṭivattiyo samañena vā brāhmañena vā devena vā mārena vā brahmuna vākenaci v $\bar{a}$ lokasmim."

Mahācattārīsaka Sutta (MN 117) does not go into details about the two paths with wrong views. However, several suttā in the Anguttara Nikāya (AN 4.204 through AN 4. 210) specifically discuss those two paths for those with wrong views.

- WebLink: suttacentral: Dasakamma Sutta (AN 4.204) states that one who engages in dasa akusala (that includes having wrong views) is an immoral person (asappuriso.)
- If that person also encourages or teaches others to engage in such activities, then he/she becomes a highly-immoral person (asappurisena asappurisataro.) Here, asappurisataro with "taro" at the end emphasizes the intense immorality. Note that a highly-immoral person has the same wrong views, but they are much more ingrained or established in mind.
- The opposites are valid for a moral person (sappuriso) and a highly-moral person (sappurisena sappurisataro.)
- Dasa akusala discussed at, "Ten Immoral Actions (Dasa Akusala)."

10. The WebLink: suttacentral: Pathamapāpadhamma Sutta (AN 4.207) states the same in another revealing way. "Katamo ca, bhikkhave, pāpo? Idha, bhikkhave, ekacco pānāatipātū hoti ... pe ... micchāditṭhiko hoti. Ayaì vuccati, bhikkhave, pāpo."

- That means a person who engages in dasa akusala (including killing, stealing,..wrong views) is a pāpo or immoral.

The next verse: "Katamo ca, bhikkhave, pāpena pāpataro? Idha, bhikkhave, ekacco attanā ca pānāātipāt̄̄ hoti, parañca pānātipāte samādapeti ... pe ... attanā ca micchādiṭthiko hoti, parañca micchādiṭthiyā samādapeti. Ayaì vuccati, bhikkhave, pāpena pāpataro."

- If that person encourages others to engage in such activities (or teaches wrong views), he/she becomes a highly-immoral person (pāpena pāpataro.)

Note that the two sutt $\bar{a}$ use different words to indicate an immoral person, asappuriso and pāpo. Both mean "an immoral person."

## Summary

11. Those with extreme wrong views (i.e., highly-immoral persons) can get to micch $\bar{a}$ vimutti (and become someone like Hitler or Pol Pot in Cambodia.) It is extremely difficult to change the mindset of such a person. However, it is possible to do that, as illustrated in the example of Angulimāla, who had killed almost a thousand people but attained Arahanthood, see "Account of Angulimāla - Many Insights to Buddha Dhamma."

- In the next post, we will discuss the two "good paths" with two corresponding "correct views" in detail. Here one first gets to the mundane Sammā Diṭthi by cultivating ten factors that are opposites of the ten factors in micchā ditṭhi.
- We will see that one with mundane Sammā Dittthi can get to Ariya sammā dittthi by learning the true teachings of the Buddha on the Four Noble Truths. Specifically, one needs to comprehend that the "suffering" in the First Noble Truth is the suffering associated with the rebirth process.
- When one starts comprehending the First Noble Truth by grasping the anicca, dukkha, anatta nature of this world, one becomes a Sotāpanna Anugāmi. That understanding becomes complete at Arahanthood and one attains Sammā Ñäna (by fully comprehending "yathābhūta ñāna") and Sammā Vimutti (release from all future suffering.)
- We will discuss that in the next post and complete the discussion on the Mahācattārīsaka Sutta regarding the four possible paths.

### 5.2.9.5 Sammā Diṭ̣hī - Only One Leads to the Noble Path . 4

March 14, 2020; revised August 20, 2022

## Introduction

There are two types of sammā ditthī or "right views." Only one belongs to the Noble Path and leads to Nibbāna.

1. We are continuing the series of posts on "Wider Worldview of the Buddha." In the previous post, we started a discussion on the WebLink: suttacentral: Mahācattārīsaka Sutta (MN 117) to clarify the four worldviews and four possible paths.

- There are "two good paths" and the Noble Eightfold Path is the only path to Nibbāna.
- The previous post, "Dangers of Ten Types of Wrong Views and Four Possible Paths," discussed the "two bad paths." In this post, we will discuss the "two good paths."

## Two Types of Sammā Ditṭhi

2. After discussing the two "bad paths" for those with the ten types of micch $\bar{a}$ dittth $\bar{\imath}$ in the Mahācattārīsaka Sutta, the Buddha asks: "What, bhikkhus, is the right view? The right view, I say, is twofold:

- There is the right view that is tainted with cravings (sāsavā or with $\bar{a} s a v \bar{a}$ ), meritorious and bringing good vipāka.
- That "good path" is available even without a Buddha. Ancient yogis were there before the Buddha (like $\bar{A} l ̣ a ̄ r a ~ K a ̄ l a ̄ m a ~ a n d ~ U d d a k a ~ R a ̄ m a p u t t a), ~ w h o ~ l i v e d ~ m o r a l l y ~ a n d ~ e v e n ~ c u l t i v a t e d ~ t h e ~ h i g h e s t ~ j h a ̄ n a . ~ T h e y ~$ were able to get "good rebirths." However, that is a temporary solution to the samiāric suffering since one can "fall back" from that "good path" and be born in the apa $\bar{a} \bar{a}$ in the future.
- Then there is the right view that is Noble (Ariya) and without cravings (anāsavā or without $\bar{a} s a v \bar{a})$, supramundane (lokuttarā), a factor of the Noble Path."

Sammā Diṭthi for the Noble Path Includes Comprehension of Tilakkhaṇa
3. The difference between those two paths is CRITICAL. We need to discuss that in detail.

- The first, mundane right view, is mostly followed by those who "live a moral life." That could be just following the five precepts, for example, as many people do. However, to attain Nibbāna, one needs to comprehend the "unfruitful, and dangerous nature" of this world (Tilakkhana) or the "real Nature," i.e., gain "yathābhūta ñāna."
- Upon Enlightenment, the Buddha discovered that living a moral life, by itself, CANNOT solve the problem of suffering in the rebirth process. Following a moral life COULD lead to a future "good rebirth." However, since we have also done both good and bad deeds in our past lives, such bad deeds can bring birth in a bad realm. Of course, we do not know what kind of good/bad deeds we have done in our past lives.
- To start on the Noble Path leading to Nibbāna, we need to understand that our cravings for sensory pleasures are ultimately the root cause of suffering. Those cravings ( $\bar{a} s a v a$ ) lead to taṇh $\bar{a}$. See "Tanhhā The Origin of Suffering."
- Then the '"taṇhā paccayā upādāna" step in Paṭicca Samuppāda leads to "upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyasā sambhavan'ti," i.e., the "whole mass of suffering."
- That is a brief summary. We will discuss that in detail in upcoming posts. Let us first discuss samma $\bar{a}$ ditṭhī for the mundane path.

## Mundane Sammā Ditthi

4. After saying that there are two right views (\#2 above,) the Buddha asks: "And what, bhikkhus, is the right view that is tainted with cravings ( $s \bar{a} s a v \bar{a}$ or with $\bar{a} s a v \bar{a}$ ), meritorious and bringing good vipāka? " and explains that is the view where one believes that,
(i) There is profit in giving (dāna.)
(ii) More profit in giving generously.
(iii) Respecting and making offerings to those with higher virtues is beneficial (bhikkhus, Noble Persons, yogis, etc.)
(iv) Good and bad actions (kamma) lead to corresponding results (vipāka.)
(v) This world (ayam̀ loko) does exist.
(vi) Para loka (of gandhabba) does exist.
(vii) Mother is a special person.
(viii) Father is a special person.
(ix) Living-beings can be reborn spontaneously (sattā opapātikā.)
(x) There are virtuous recluses (like Ālāra Kālāma and Uddaka Rāmaputta) in the world who have seen for themselves by direct knowledge and declare this world and the para loka exist.
Those are the (mundane) right views that are tainted with cravings. They are meritorious and bring good vipāka.

- As you remember from the previous post, the above are the opposites of the ten types of wrong views (micch $\bar{a}$ dittth $\overline{\mathrm{l}}$.) Those who have those ten "good factors" can get "good rebirths," as discussed in \#2.

## Why Is Mundane Sammā Ditṭhi a Prerequisite for Ariya Sammā Diṭthi?

5. The main goal of a Buddhist is to STOP all future suffering in the rebirth process.

- How can one start on the Noble Path to stop rebirth, if one does not even believe in the rebirth process?
- But how do we know that there is a rebirth process with much suffering? How can we believe that there are 31 realms in this world instead of just two realms that we can see?

6. As discussed in \#2 above, those were known to the world even before the Buddha. There were yogis like Ālāra Kālāma and Uddaka Rāmaputta. They had cultivated abhiñ̃n̄̄ powers and could see their past lives as well as could confirm the existence of higher Deva and Brahma realms.

- Therefore, it is possible to verify the above ten factors even without a Buddha in the world.
- Even without abhiñ $\bar{n} \bar{a}$ powers, one can logically conclude that those ten factors are indeed true. Accounts of past lives from children worldwide and Near-Death Experiences (NDE) of many heartpatients provide evidence. See "Evidence for Rebirth" and "Out-of-Body Experience (OBE) and Manomaya Kāya."

## Inviolable Axioms - Could Be Self-Evident for an Undefiled Mind

7. The core teaching of the Buddha is that our efforts in seeking happiness within the rebirth process are futile. The only way to reach a state where there is absolutely NO suffering is to disengage from the rebirth process.

- Seeking that goal REQUIRES the following "axioms" in scientific terminology.

1. Existence of the 31 realms.
2. The rebirth process.
3. The laws of kamma determine how rebirths take place.
4. Existence of gandhabba and para loka makes it possible for many human (and animal) rebirths within a single existence.

- An axiom in science is a "fundamental truth" that is "self-evident." However, the above axioms may not be "self-evident" until explained logically. After all, there were yogis like Ālāra Kālāma and Uddaka Rāmaputta these days who could see past lives. Waharaka Thero had some such capabilities, but unfortunately, we have lost that resource.
- By the way, evidence for the gandhabba from the Tipitaka is discussed in "Gandhabba State Evidence from Tipitaka." Other evidence is discussed in "Evidence for Rebirth" and "Out-of-Body Experience (OBE) and Manomaya Kāya."

## Buddha Dhamma: Non-Perceivability and Self-Consistency

8. However, those axioms CAN become self-evident if one spends enough time contemplating the laws of kamma. They are logical and self-consistence. For example, see "Complexity of Life and the Way to Seek 'Good Rebirths'" and "What is Kamma? - Is Everything Determined by Kamma?"

- One cannot learn higher mathematics like calculus without learning basic arithmetic first, then algebra, and so on. Buddha Dhamma describes the laws of nature. Nature's laws are much more complex than advanced mathe matics or quantum mechanics.

9. There is an additional factor involved too. The ability to understand becomes easier when one starts "cleansing one's mind." That does not just mean following some precepts (even though they are an important part). See "The Importance of Purifying the Mind."

- One has to start on the mundane path, and live a simple life (away from both too much sensory pleasures and also hardships). One's mind will become less stressful and less agitated.
- As one lives a moral life and keeps learning (and seeing the self-consistencies) one's faith in the teachings will grow. See "Buddha Dhamma: Non-Perceivability and Self-Consistency."

## The "Previously Unheard" Teaching

10. Even though the "good path" followed by yogis like Āḷāra Kālāma and Uddaka Rāmaputta led to the cultivation of abhiññ̄a powers and even "good rebirths," it did not lead to the end of suffering. That is because one would still be engaged in the rebirth process.

- All births, even in the highest Brahma realms, have finite lifetimes. At the end of those long lifetimes, previous bad kamma can bring rebirths in lower realms.
- Rebirths in the lowest four realms ( $a p \bar{a} y \bar{a}$ ) are unavoidable until one starts comprehending the true nature of this world described by the Three Characteristics of Nature or Tilakkhaṇa (anicca, dukkha, anatta.) That means any "good" existence in the 31 realms cannot be maintained. Future rebirths in the apāyā cannot be avoided until one comprehends Tilakkhaṇa.

## All Births (Jäti) End Up in Suffering

11. From Paṭicca Samuppāda: "avijjā paccayā sañkhāra; sañkhāra paccayā viññanna; viññāna paccayā nāmarūpa, nāmarūpa paccayā salāyatana, salāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, marana, soka-parideva-dukkha-domanassupāyasā sambhavan'ti"

- "The whole mass of suffering" is inevitable for each jātit (birth) because each birth ends in death. Any birth (even in good realms) MUST come to an end. That is the harshest suffering to face (in the sense of leaving behind everything.)
- A birth does not happen without bhava (existence.) Therefore it is critical to understand what bhava and $j \bar{a} t i$ are. That is why one needs to understand the mundane right views of (v) through (viii) in \#4 above, BEFORE trying to understand what is meant by Nibbāna (the stopping of ALL future suffering by stopping ALL future $j \bar{a} t i$.)
- One grasps a new bhava (existence) at the end of the current bhava, ONLY because one has cravings for "worldly pleasures" (whether sensual pleasures or jhānic pleasures). Those inevitably lead to tanhā, upädäna, bhava, $j \bar{a} t i$, and then "the whole mass of suffering" is inevitable.
- One CANNOT stop those cravings as long as one values those sensory/jhānic pleasures; in other words, until one gets rid of $a v i j j \bar{a}$ or the ignorance of the Four Noble Truths.
- Now we get to the verse that requires a good discussion to understand the Ariya Sammā Dittthi that comes at the forefront of the Ariya Atṭhangika Magga or the Noble Eight-fold Path.

## The Ariya Sammā Ditṭhi

12. Next verse from the Mahācattārīsaka Sutta (after the verse in \#4): "Katamā ca, bhikkhave, sammādiṭṭhi ariyā anāsavā lokuttarā maggañgā? Yā kho, bhikkhave, ariyacittassa anāsavacittassa ariyamaggasamañgino ariyamaggamं bhāvayato pañña pañ̃̃indriyain paññābalaì dhammavicayasambojjhañgo sammādiṭthi maggañgaí-ayaì vuccati, bhikkhave, sammādiṭthi ariyā anāsavā lokuttarā maggañgā."

- There are many factors summarized in that verse. But we can get started with the following.
"And what is the right view that is Noble, without cravings (anāsavā or without $\bar{a} s a v \bar{a}$ ), and is a factor of the Noble Path leading to Nibbāna? Note that in the sutta, the word lokuttarā means "loka" + "uttara" where loka is "this world" and uttara implies "better than." Thus, lokuttarā maggangā means "a factor of the Noble Path that overcomes this world, leading to Nibbāna."
- As we mentioned in the first two posts in this series on "Wider Worldview of the Buddha," Buddha's teachings were "previously unknown to the world."
- That "previously unknown part" is seeing the suffering hidden in what we perceive as "pleasures." Such pleasures - sensory or jhānic as pleasures - belong to this world. They are temporary. Furthermore, people tend to do immoral things in seeking such pleasures.

## The Suffering Hidden in Sensory Pleasures

13. Anusaya are our hidden cravings. They come to the surface triggered by mind-pleasing (or unpleasant) thought-objects (ārammaña.) See, "Paticca Samuppāda - A "Self" Exists Due to Avijijā."

- Then one attaches to that ārammaṇa via greed or anger depending on whether the ārammaṇa is mindpleasing or distasteful. That is tanhha. Whether one gets attached or not depends on one's gati. We have discussed this in detail in earlier posts in the "Worldview of the Buddha."
- The key to attaining Nibbāna (āsavakkhaya or the removal of $\bar{a} s a v a$ ) is to understand how to get rid of our gati to attach (tanhhā) to various ārammaṇa. As we will see, that originates from our ignorance of this world's true (anicca, dukkha, and anatta) nature. What we perceive to provide happiness leads to suffering.
- The best analogy is a fish who bites into a tasty bait, not realizing the dangers hidden in that bait (a tasty worm.) Imagine the suffering associated with a hook piercing one's mouth. Of course, that suffering ends up in an agonizing death due to lack of oxygen since the fish cannot breathe outside water.
- In the same way, we do not "see" the long-term consequences of our cravings for sensory/jhānic pleasures. That is the core idea embedded in Tilakkhana. We will discuss that in detail in the upcoming posts.

### 5.2.9.5 Fear of Nibbāna (Enlightenment)

## March 18, 2020

## Introduction

1. I have presented an outline of the Buddha Dhamma in the "Wider Worldview of the Buddha" subsection. As explained there, the key message of the Buddha is that future suffering can be stopped only by stopping the rebirth process, i.e., by attaining Nibbāna. Now I need to clarify a few things.

- The main issue that I want to address is the "fear of Nibbāna." That arises with the wrong view of "I exist." Then the implication is that by stopping the rebirth process "I will be extinct." It is also a wrong view to say that "I do not exist." It is true that "I exist now as a human." In the future, I may exist as Deva, Brahma, or an animal, based on the cumulative effect of my kamma (causes) up to now.
- If I attain the Arahanthood in this life, then after my death I will not exist anywhere in the 31 realms of this world. I would merge with Nibbāna.
- These days there are many unfruitful discussions about whether a "self" exists or not. As the Buddha pointed out, that is the wrong starting point to discuss life-cycle. A given lifestream evolves according to causes (kamma.) When the ability for past kamma to bring their vipāka is stopped (i.e., taṇhā or upādāna stopped,) then that process will stop and one merges with Nibbāna at the death of that last physical body.
- The Buddha clearly stated that Nibbāna exists. See, "Nibbāna "Exists", but Not in This World."
- I have discussed the Buddhist concept that while a "self with gati" exists until one attains Nibbāna, that is NOT a "permanent self" like a soul. See, for example, "Anattā (Mundane Interpretation) - No 'Unchanging Self." "An Apparent "Self" Is Involved in Kamma Generation," and "Paticca Samuppāda A "Self" Exists Due to Avijija." Also see, "Yamaka Sutta (SN 22.85) - Arahanthood Is Not Annihilation but End of Suffering."

2. We will re-visit that deeper concept in upcoming posts again, in a systematic way.

- First, I would like to explain in simple terms that there is no need to be fearful about "stopping the rebirth process."
- I did a Google search and found the following comments by two people in online discussion forums. Those are representative of the comments of many others and thus I would like to address those.

## First Myth - Fear of "Vanishing" or "Extinction" Equated to Nibbāna

3. The following are extractions from the comments of Person 1.

- 'I started taking the Buddhist path not long ago, less than three years ago. At that time, life felt too heavy and it felt like it was pushing me towards not wanting to play the game anymore. So Buddhism seemed like the way to go."
- 'I can't forget the first time I faced the idea of vanishing from this existence forever, the true death; never being able to come back once I 'saw it'. Nevertheless, I kept investigating."
- "Then I contemplated the idea of being trapped in this. Existence has no way out, anywhere you go there is still existence. In other words 'What if it has been like this for millions, billions of years, maybe even for eternity?"
- "But if enlightenment is the only escape, I am afraid of never being able to come back. I am afraid everything is just an illusion, that there aren't others, just images and I'm alone. Sometimes I fear there isn't even enlightenment to save me. My question is: Am I going crazy? Am I getting it all wrong?"

## There Are Those Who Want to "End the Existence"

4. First of all, think about the mindset of those who commit suicide. Why do those people want to leave this world? Most of them probably do not believe in rebirth. But they just "wanted out" because they could not bear whatever the suffering that they were experiencing.

- In fact, that is the mindset of living-beings in the $a p \bar{a} y \bar{a}$. They just want to "end it all." But no matter how much they "want out," that will not happen. That is a good example of the suffering expressed by the Buddha in the verse, "yampicchain na labhati tampi dukkham," or "not to get what one desires (icch $\bar{a}$ ) is suffering", in the Dhammacakkappavattana Sutta (SN 56.11.)
- In the WebLink: suttacentral: Saccavibhañga Sutta (MN 141), Ven. Sariputta explains the meaning of that verse: "Katamañcāvuso, yampiccham na labhati tampi dukkhaì? Jātidhammānaì, āvuso, sattānaì evaì icchā uppajjati: 'aho vata mayaì na jātidhammā assāma; na ca vata no jāti $\bar{a} g a c c h e y y \bar{a} t i$. Na kho panetain icchāya pattabbaì."
- Translated: "In a living-being subject to (some) births the wish (desire) arises, 'Oh, may I not be subject to such a birth, and may that birth not come to me.' But such a desire will not be fulfilled (and thus one will be subjected to suffering.)"

5. Thus, it is only when faced with physical pain/mental stress that one wishes it would just go away. Many people become interested in Buddhism when they run into either physical problems (getting sick or starting various body ailments due to old age) or mental problems (day-to-day stresses or even depression.)

- They can, of course, get relief from those issues by living a simple life and abstaining from immoral deeds.
- But then they start reading about Nibbāna as "ending of one's existence" and then they freak out. That is what happened to Person 1 above.

## Life in "Good Realms" Is Short-Lived

6. We normally do not realize the kind of harsh suffering experienced by many living beings. Of course, we can see only the animal realm other than the human realm. Even then, we do not pay much attention to the suffering of animals. In fact, we are conditioned to "not see" or "not recognize" the suffering of many animals that is in full display.

- For example, people enjoy watching animal shows on TV where, for example, a tiger chases a deer, catches up with it and eats it alive.
- Those who enjoy fishing do not see the suffering of a fish that is subjected to excruciating pain, with its mouth pierced by the hook, and unable to breathe outside water. But unlike some animals, fish cannot show emotion, which is a part of their kamma vipāka.
- On the other hand, we can clearly see many animals showing their suffering by either yelling out or by their facial expressions.
- All those animals had been humans at some point in the rebirth process!

7. Suffering in the other three realms of the apāy $\bar{a}$ is much worse. Therefore, those are the births ( $j \bar{a} t i$ ) that we would not want for sure.

- The point is that as long as we are in the rebirth process, such births cannot be avoided. Such births are much more likely than human birth just based on the statistics we can verify.
- For example, there are less than eight billion people on Earth. But there are a million times more ants on Earth! There are a trillion TYPES OF lifeforms on Earth; see, "WebLink: sciencealert.com: The Largest Study of Life Forms Ever Has Estimated That Earth Is Home to 1 TRILLION Species." These are mind-boggling numbers! That is not counting the other three realms in the apayy that we cannot see.
- That is why the Buddha said that a human bhava (existence) is VERY rare. Any "pleasures" that we experience as a human is of VERY SHORT duration. The suffering that the Buddha taught was the suffering in the rebirth process where a given living-being spends much more time in the apa$y \bar{a}$.
- Now we turn to the issue of "fear of non-existence in this world."

## We Are "Effectively Not in Existence" During at Least a Third of a Day

8. Even though we may fear "extinction out of existence," we are not aware of "our existence" during sleep. We are not conscious while we sleep, especially during the deep sleep cycle. Most of the time, we go to sleep and until we wake up the next morning, we are completely unaware of our existence in the world.

- We don't think about that normally. But I became acutely aware of this fact when I was made unconscious for over 9 hours during my brain surgery. I remember losing consciousness after the injection of the drug. The next thing I was aware of was when I came out of the drug-induced unconsciousness state.
- While unconscious or in deep sleep, we are (effectively) "not in this world."
- When an Arahant dies, it will be like in such an "unconscious state (as far as this world is concerned)" forever. But he/she would have merged with Nibbāna. The Buddha clearly stated that Nibbāna exists. We just cannot explain it in terms of the concepts (rūpa, citta, cetasika) in this world. See, "Nibbāna "Exists", but Not in This World."
- There is no overlap between "this world of 31 realms" and Nibbāna (full Nibbāna or Parinibbāna.) They are mutually exclusive. One is either "in this world" or "in Parinibbāna." Either the Buddha or any of the Arahants who have passed away are not in this world anymore.
- Once an Arahant dies and merges with Nibbāna, there will be no more deaths. Attainment of Nibbāna is by removing ALL causes for the birth and death cycle (with complete removal of avijj $\bar{a}$.) That is why Nibbāna is also called "deathless."

## Comments of Person 2

9. The second comment that I chose was from Person 2. Some of the selected parts are below.

- "..I was meditating yesterday and had this weird "experience." It freaks me the hell out because it was like I was never there. I'm just feeling scared now after that experience. It felt extremely beautiful to me yesterday but right now I'm just freaking out for some reason. My mind is just racing with the thought "I don't want to die" and I'm just having an existential crisis."
- 'I'm wishing I never did any of this meditation or consciousness work in the first place because it's making me think that I can delude myself into thinking I'm alive but I've always been dead and have just been an empty void. I feel like I'm going insane. I'm just feeling a wave of negativity."
- 'I know that the way I'm phrasing it is silly but I'm just curious about people who are completely enlightened (if such a thing is $\mathbf{1 0 0 \%}$ possible). Are these people like talking corpses? All these words can come out their mouth and it looks like they're alive, but they're really dead?"

## Can One Lose Perception While Meditating?

10. The first part of Person 2's comment is to do with meditation. What he experienced was a "perceptionless meditative state" or an "asañña samādhi."

- Such a state is reached by focusing on getting rid of ALL thoughts that come to the mind. That is NOT Buddhist meditation. In Buddhist meditation, one stops ONLY those thoughts that are immoral. One would CULTIVATE good or moral thoughts.
- One who cultivates such an anāriya meditation may be reborn in the asañña realm. That realm has a very long lifetime and there are no thoughts arising. It is like being unconscious for a billion years! Of course, that life will also end and one would be back in another realm.

## Is An Arahant a Zombie?

11. Now, let us discuss the second highlighted comment from Person 2. An Arahant does not lose perception like in the case above in \#10. A living Arahant "engages with the external world" just like anyone else.

- The only difference is that a living Arahant WILL NOT generate greedy, angry, or unwise thoughts.
- But he/she will recognize people as his/her mother, friend, an attractive person/object. He/she will experience the sweetness of sugar or the bitterness of vinegar, etc. Until the death of the physical body, an Arahant will live like any other human.

## Nibbāna is Escape From Suffering - Two Types of Nibbāna

## 

- WebLink: suttacentral: Ādittapariyāya Sutta (SN 35.28) is one of the early discourses of the Buddha. In that sutta, the Buddha compared said that the world is burning. That means the mind of anyone who embraces the world as good and fruitful is always "burning" or "under stress." That stress goes away at the first stage of Nibbāna (saupādisesa Nibbāna) experienced by a living Arahant.
- However, a living Arahant has a physical body that arose due to past kamma. That body can experience bad kamma vipāka from the past. After the death of that physical body, an Arahant will not be reborn and that is the end of any and all suffering. That is anupādisesa Nibbāna or Parinibbāna (full Nibbāna.)

13. Finally, if anyone has other issues related to this topic, this is a good time to discuss them. This kind of discussion will help clarify issues that I may not have thought about, but others may have.

# 5.2.9.6 Worldview of the Buddha - Explanatory Material 

Ghost 1990 Movie - Good Depiction of Gandhabba Concept

Mental Body Versus the Physical Body<br>"Tipitaka English" Convention Adopted by Early European Scholars - Part 1<br>"Tipitaka English" Convention Adopted by Early European Scholars - Part 2

January 17, 2020; revised August 29, 2022 (added \#1; other minor revisions)

## Introduction

1. I have been trying to convey the concept of a gandhabba (mental body or manomaya kāya) for several years. But I don't think many readers grasp the concept well. One critical problem is that sometimes it is tough to explain a new concept with just words.

- When we see the word "kāya" (body), We immediately perceive a "solid body" like our physical body. But the "manomaya kāya" or the "gandhabba kaya" of a gandhabba has no "matter" as in solid objects.
- In Buddha Dhamma, "rūpa" includes energy and "tangible matter." Modern science has also adopted this after Einstein showed that matter and energy are related by his famous equation, $\mathrm{E}=\mathrm{mc}^{\wedge} 2$. Also, see "Photons Are Particles Not Waves." Radio waves are also photons.
- We can listen to a radio in the house because radio waves can go through walls. A gandhabba is like radio waves and can go through walls. That is how those with iddhi powers go through walls, as described in many suttas; see "Pātihāriya (Supernormal Abilities) of a Buddha - Part I."

2. The 1990 movie "Ghost" provides a good visualization of gandhabba. That movie is about the gandhabba of Sam Wheat, who dies tragically.

- A description of the movie and the plot is in the Wikipedia article "Ghost (1990 film)." However, one MUST watch the movie and read the following discussion to understand the gandhabba concept. A free version of the full movie is available online; make sure it is the 1990 version.

## The Background (Up to 23 Minutes)

3. From the above article: "Sam Wheat, a banker, and his girlfriend Molly Jensen, a potter, renovate and move into an apartment in Manhattan with the help of Sam's friend and co-worker Carl Bruner. One afternoon, Sam confides in Carl about his discovery of unusually high balances in obscure bank accounts. He decides to investigate the matter himself, declining Carl's offer of assistance. That night, Sam and Molly are attacked by a mugger who shoots and kills Sam in a scuffle before stealing his wallet. Sam sees Molly crying over his body and discovers he is now a ghost, invisible and unable to interact with the mortal world."

- The ghost, of course, is the gandhabba or the manomaya kāya of Sam. The movie clearly shows some of the features of the gandhabba that I have tried to explain with words. When Sam dies, his gandhabba comes out of the dead body. Initially, he does not even realize that he has died. By the way, if one dies such a sudden death, there is no time to feel the physical pain.
- So, Sam is confused when he sees his dead body and his girlfriend, Molly, crying. It takes him a little while to realize what happened. He sees his own bloodied body held up by Molly. He tries to touch the body, and his fingers "go through the dead body." We can disregard the next few moments showing the "white light" coming to "take him to heaven." This will be discussed in \#12 below.
- When a human dies suddenly by a gunshot, his "bhava" will likely not change. So, Sam probably has more time left in the human bhava, but he now has to stay in the "gandhabba state" until a matching mother's womb becomes available for his next human birth. See, "Bhava and Jāti - States of Existence and Births Therein."
- According to the movie script, Sam's mind is focused on Molly, and thus the "white light" goes back without him.

## Gandhabba Is Not a "Scary Misty Ghost"

4. Many of you may have imagined that a gandhabba is like a "scary misty ghost" as in popular cartoons. However, a gandhabba coming out of a body is a "complete imprint" of that human including the clothes he/she had been wearing.

- Thus, Sam's ghost or Sam's gandhabba looks just like Sam when he died, complete with whatever he was wearing. That is part of the "utuja kāya" or the "fine body" around the "mental body." That mental body by itself is just a few suddhatthaka.
- However, when that gandhabba is pulled into a womb, the utuja kāya is shed and only the "pure mental body" of a few suddhatthaka merge with the zygote in the womb. See, "Buddhist Explanations of Conception, Abortion, and Contraception" and "Cloning and Gandhabba."

## At the Hospital (Up to 26 minutes)

5. An ambulance takes Sam's body to the hospital, and he stays by the dead body trying to make sense of things. Of course, with that "mental body," he can go anywhere he wishes.

- While sitting by his dead body, another gandhabba (old guy) comes and talks to him. They also watch another patient dying and his "ghost" or gandhabba taken to heaven with the "white light." As the old guy says, most of the dead go to hell not heaven.
- Then an attendant comes and takes his dead body "right through him." That is what II try to say that a gandhabba has a "very subtle fine body." It is an "energy body" or a "force field."
- His gandhabba body" has only a trace of matter. Solid objects can go right through, and "he" can go through solid objects!

## Sam's Ghost (Gandhabba) Learning About the Gandhabba World (Para Loka) - (Up to 54 minutes)

6. Sam sees another "gandhabba woman" walking through a tombstone at his funeral. Later, at Molly's place, he goes "through a door" for the first time. Sam's killer comes to Molly's apartment, and Sam follows him back to the killer's apartment. On the subway train ride, Sam meets a violent "subway ghost" who has learned to move physical objects with mind power. Later on, Sam would learn from him how to focus on mental energy and move physical objects.

- That is possible per Buddha Dhamma. Even though most gandhabbā do not have such an ability, a few of them may also get such capability due to "puñña iddhi" or due to exceptional past kamma vipāka.

7. Anyway, Sam finds out that the name of his killer is Willie. In Willie's neighborhood, Sam also meets psychic Oda Mae, a charlatan pretending to communicate with the spirits of the dead. However, it turns out that Oda's mother had such capabilities, and after the meeting with "Sam's ghost," Oda can also hear his voice.

- That is also possible per Buddha Dhamma. Some humans are born with puñña iddhi to be able to hear and/or see gandhabbā. Such accounts (over long periods) may be responsible for the "cartoon versions" we come across in books and movies such as this.
- Sam persuades Oda Mae to help him. They still have a hard time convincing Molly. But Molly is convinced by the personal details Sam provides through Oda.

At this point, you may want to watch the movie. I will be revealing the storyline from this point. If you want to enjoy the film, it is a good idea to finish watching it and then read the rest of this post.

## Sam's Friend Carl - (Up to 72 minutes)

8. Molly decides to contact Carl, a friend and co-worker of Sam. She tells him that Sam's ghost discovered his killer was Willie. Carl promises to check on that.

- Molly goes to the police, and they don't believe the story either. The detective says there is no record of Willie, but Oda Mae has a history of deceiving people.
- Meanwhile, Carl goes to meet Willie and Sam follows him. Sam is shocked to find out that it was Carl who hired Willie. It turns out that Sam had a bank code in his wallet for an account that had four million dollars, and Carl wanted Willie to get Sam's wallet. But things did not go as planned, and Willie shot and killed Sam.
- Later on, Carl goes back to Molly and tries to seduce her. Sam gets into a rage and lunges at Carl. Of course, he could not make contact, but he was astonished to see that he could knock a picture off a table.

## Sam's Ghost Learns How to Make Bodily Contact - (Up to 78 minutes)

9. Sam remembers the "subway ghost" who can move physical objects with mind power. He returns to the subway and learns how to focus the mind's power to move physical objects.

- In Buddha Dhamma, that is possible via cultivating jhāna. As we discussed before, there are rare cases where a gandhabba would be able to make physical contact via puñña iddhi. However, this movie aspect is unlikely to happen in real life.
- This is why it is not fun to be a gandhabba. Some gandhabbā (ghosts in the movie) can see and hear humans. But they are frustrated that they cannot touch, eat food, or smell scents like humans do. There is a scene in the movie where the "subway ghost" says he would give anything to smoke a cigarette (@ 76 minutes.)
- (I have mentioned in previous posts that a gandhabba can "take in various types of scents" and become a bit denser. That is a different mechanism than inhaling through the nose (a gandhabba only has an imprint of a nose and not a real nose.)

## Mind Power - (Up to 78 minutes)

10. The "subway ghost" explains to Sam that he has no physical body even though he seems to be wearing clothes etc. He says, "you've got no body (meaning no physical body), son. It is all up here" and points to the head. (But of course, the seat of the mind is not in the head. It is close to where the physical heart normally is.)

- Subway ghost says, "If you want to move something, you've got to move it with your mind. You've got to focus all your anger, love, and hate, and push from all the way here, from the middle of your stomach. And let it explode like a reactor." (That turns out to be the right place!)
- That is a CRITICAL point. Even from our own experience, we know that when we try to do something hard, the "push" comes from the heart area, and not the head.
- The real power is in our thoughts (specifically javana citta.) That power can be highly focused on when one is in a jhāna. But when one is in jhāna samāpatti, one can focus the mind power and even

CREATE matter! See, "Mystical Phenomena in Buddhism?." [samāpatti :[f.] attainment; an enjoying stage of meditation.]

## Oda Mae Is Now a Genuine Psychic Reader - (Up to 80 minutes)

11. Oda Mae is no longer a fake. She can make contact with many "ghosts" or gandhabbas in the para loka. As you see, the para loka co-exists with our loka; it is just that we cannot see those in the para loka.

- However, she is now in trouble since Carl knows her identity. The story gets interesting now and there are no more "technical details" that need to be discussed here.
- If there are questions, we can discuss them at the discussion forum. This is a very complex subject, but I hope you get a general idea.

## Other Relevant Points - Births in Different Realms

12. A human gandhabba (ghost in the movie) comes out of a dead body ONLY IF that person has more kammic energy left for human bhava. That is the case in many instances, especially if one dies by a gunshot as in this case.

- However, if the kammic energy for human bhava runs out at the moment of death, then an entirely different event occurs. Let us consider specific cases of a human dying and grasping an animal, Deva, and Brahma bhava.
- If the dying human grasps an animal bhava (say a dog), then instead of a "human ghost" it is a "dog ghost" or a "dog gandhabba" that comes out of the dead body. That "dog gandhabba" will not stay in that vicinity. It will be attracted to somewhere there are dogs with matching gati. Then it will stay there until a suitable womb becomes available, and at that time it will be drawn into that womb.
- A very different thing happens if a dying human grasps a Deva bhava. In that case, no "ghost" or gandhabba will come out of the dead body. Instead, a full-blown Deva will appear in a matching Deva realm instantaneously. If a Brahma bhava is grasped, a Brahma will appear in the matching Brahma realm.
- What we discussed in that last bullet is a critical point. There is no "being" going from here to the Deva or Brahma realm (located far above the Earth.) The human dies here and Deva (or Brahma) is born there. Due to a past cause (kamma), a Deva or a Brahma is born at the appropriate location.

## Other Misconceptions in the Movie

13. The movie shows that "good people" like Sam get to go to heaven (though the white light) and "bad people" like Carl and Willie are taken to hell by "hell beings." But Buddha Dhamma has a different picture of rebirth.

- First, hell and heaven (Deva realms) are not the only two "destinations." One can be born among any of the 31 realms, including the animal realm we see.
- The second is that one's human bhava does not normally end at death. A human bhava can last thousands of years and unless one has used up all kammic energy for the human bhava, one could be reborn with a human body again. In that case, the "mental body" corresponding to the human bhava (i.e., human gandhabba) comes out of the dead body and has to wait until a matching womb becomes available.
- There is an exception to the rule in the last bullet. If one has done a ānantariya kamma (like killing a parent or cultivating a jhāna) then one's human bhava will end at the death of the physical body even if there is more kammic energy left. In the first case, one will be born in hell and in the second (jhāna) one will be born in a Brahma realm.
- There are a few other inconsistencies in the movie, but those are the major ones.

## Pāli Word for Ghost is "Bhūta"

14. Another interesting point is that the Pāli word for "ghost" is "bhūta."

- Bhūta in Pāli (and Sinhala, @ŋ) means an entity that one cannot grasp.
- For example, scientists are trying to figure out the fundamental "blocks" that all matter is made of. They initially thought an atom would be the smallest unit of matter. Then they discovered that an atom is made of electrons, protons, and neutrons. They kept probing deeper and now are down to levels where it is hard to distinguish between "matter" and "energy."
- The four great elements (cattāri mahābhūtāni) in Buddha Dhamma are pathavī, āpo, tejo, and vāyo. But they can NEVER be detected individually. They ALWAYS come in packets called "suddhatthaka." A suddhatṭhaka has those four great elements and four more elementary units. Even that unit cannot be "seen" and is said to be at the "bhūta stage."
- A gandhabba (ghost in the above discussion) has only three suddhatthaka (they are called dasaka because when vibrational and rotational "modes" are added to become "ten units each."
- To be visible to our eyes, billions and billions of such suddhattthaka need to be piled up. We can see that a gandhabba hardly has any "tangible matter." That is why it is called a "ghost" or a "bhūta."

## One Last Thing

15. At 109 minutes, Oda Mae "lets" Sam get into her physical body so that Molly will be able to "touch him" for the last time.

- That is possible according to Buddha Dhamma. A gandhabba can "get into" that physical body of a willing human.
- Even if the human is not willing but has a "weak mind," a rogue gandhabba can "get in." It is said that human is now "possessed." Such cases are still reported in Sri Lanka and the human is said to be "possessed by a demon." But it is usually a gandhabba with bad character and not a demon.
- By the way, I was very much moved by that last scene. This is part of the suffering we tend to be unaware of or even disregard. It is a good example of "piyehi vippayogo dukkho" OR "separation from what is loved is suffering." We will all face that at least at the moment of death. We will have no choice but to leave all that we love.

There are many more details like that. But the above discussion should provide the basic ideas involved with a gandhabba. As the Buddha admonished, we will never be able to uncover and sort out all such complexities. But it is good to be aware of the general ideas involved.

## Mental Body Versus the Physical Body

February 2, 2020; revised August 24, 2021

## Essential Facts for this post

1. The mental body is far more important than the physical body. Let me first summarize the relevant conclusions from the "Origin of Life" section for this post.

- The mind does not exist by itself. There must be at least a trace of matter for the mind to exist. That is a critical point in Buddha Dhamma that many people do not realize. The "seat of the mind" is called "hadaya vatthu." It is unbelievably small and is created by kammic energy when a living being grasps a new existence. In addition to hadaya vatthu, up to five "pasāda rūpa" are created by the kammic energy at that time.
- That package, hadaya vatthu together with the set of pasāda rūpa is the "smallest unit of existence." It is called the "manomaya kāya" because the energy for its creation comes from the kammic energy based on a strong past kamma. See, "Origin of Life - One Creates One's Own Future Lives."
- In the 20 Brahma realms (out of 31 realms in this world) that "manomaya kaya" is all they have. They do not need a physical body with "flesh and blood" because those Brahmā do not experience taste, smell, or touch.
- When a living being is born in the human realm, it is born with that "manomaya kāa"" which is given a special name of gandhabba. When a suitable womb with "matching gati" appears, that gandhabba is drawn into it and merges with the zygote there. That "living zygote" first grows into a baby (by taking in food from the mother.). After being born, that baby grows into an adult with a body weighing a hundred plus pounds (or tens of kg.) Details in \#4 below.
- Thus, it is clear that virtually all physical matter in the human body comes from food.

## The Critical "Body" Is Not "Physical Body" But "Mental Body" (Manomaya Kāya)

2. Therefore, in most of the realms below the Brahma realms, there is an "additional body," the "physical body."

- That physical body is required ONLY to provide sensory inputs on tastes, smells, and touches.
- In contrast to the physical body, the mental body has "something extra" that makes it ALIVE, as we will discuss below. It is quite clear that the "physical body" is secondary to the "mental body" (manomaya $k \bar{a} y a$ or the gandhabba.)
- In fact, the mental body can perform the other functions (seeing and hearing) BETTER if it is not trapped inside the physical body.
- The lady in the following video was born blind. She could not see only because there was something wrong with her PHYSICAL eyes, the optic nerve, or the visual cortex in the brain. Once the gandhabba (mental body) came out, she was able to see for the first time in her life:

WebLink: youtube: Near Death Experience - Blind woman 'sees' while out of body

- In the previous post, "Origin of Life - One Creates One's Own Future Lives," I added another relevant video a day after that post was published. You may want to watch that video too. Both these videos present powerful evidence of not only the existence of gandhabba but also why it is the "essence of a human." The physical body is just a shell.
- All mental activity occurs in the gandhabba or the mental body. However, we cannot taste, smell, or touch without that physical body.

## Relevance to Satipatṭhāna Bhāvanā - Paṭikūlamanasikāra Pabba

3. In the Mahā Satipatthāna Sutta (DN 22,) the Buddha allocated several sections under the Kāyānupassanā section to discuss the physical human body.

- The subsection on 1.4. Kāyānupassanā Pațikūlamanasikāra Pabba describes the 32 parts of the human body. That title is incorrectly translated as "Applying the Mind to Repulsiveness of the Body." That section shows that the physical body of a human is just a "collection of parts."
- The Buddha never emphasized "repulsiveness" of anything. (He only emphasized the "unfruitfulness" of getting attached to "mind-pleasing" things in this world.)
- If one starts contemplating that one's body is repulsive (as many people mistakenly do,) that only leads to patigha (friction) in mind. Such a mindset is not conducive to meditation.

## Relevance to Satipatṭhāna Bhāvanā - Dhātumanasikāra Pabba

4. The next subsection, 1.5. Kāyānupassanā Dhātumanasikāra Pabba, points out that the physical body only has four great elements (pathavī dhātu, āpo dhātu, tejo dhātu, vāyo dhātu.) Bodies of any other living beings are, as well as inert objects, also have the same four great elements. There is NOTHING in the PHYSICAL BODY of a human being that is different from an animal or an inert object.

- In the language of modern science, all those have the same atoms and molecules.
- There is nothing special about the composition of the human body. The basic unit of a living cell is the same for a human as an animal. See the video in \#9 of the post, "Origin of Life - There is No Traceable Origin." That post started the series of posts on "Origin of Life." We will be referring back to those posts often.
- If there is anything "special" in a human or animal body, that is the cell. We remember that a human physical body starts with just a single cell (zygote) and, of course, a gandhabba. See, "Buddhist Explanations of Conception, Abortion, and Contraception" and "Cloning and Gandhabba."
- By the way, plants have cells too. A tiny seed grows into a big tree because of cell division. However, only humans and animals have mental bodies, that set them apart from plants. Plants cannot think.

## Relevance to Satipaṭthāna Bhāvanā - Navasivathika Pabba

5. Then the section on 1.6. Kāyānupassanā Navasivathika Pabba is about contemplating on what happens to that physical body after one dies.

- Once the gandhabba or the manomaya kāya leaves a dead physical body, that physical body is no different from a log of wood.
- It is the manomaya kāya that keeps a physical body "live" and "warm." As soon as the gandhabba leaves for good, the physical body loses the "aliveness." Our dog died several years ago, and I was shocked when I touched its dead body. It was cold and rigid, just like a piece of wood. The body warmth may be there for a little while because it takes some time to lose the body heat.
- In the days of the Buddha, most dead bodies were taken deep into the forests and discarded. Then wild animals would come and eat those bodies. If animals do not eat such a body, it will start decaying and will start smelling bad. Then it will lose the flesh over time, and only the bones would be left. Even those bones will degrade and become dust in the long term.
- This Navasivathika Bhāvanā needs to be done in that fashion, to realize the unfruitfuiness of getting overly attached to the physical body. Of course, we need to keep it in good shape by eating healthy and exercising regularly. If the physical body becomes out-of-shape that will lead to illnesses and much discomfort. We need to live a comfortable (not luxurious) life to make progress on the Path.

## The Uniqueness of the Mental Body (Manomaya Kāya)

6. It helps a lot to realize that one's physical body cannot be taken as one's essence.

- Even the mental body does not have an essence since that also will be discarded when a new existence (bhava) is grasped.
- However, the mental body is ESSENTIAL to make progress on the Path. The mental body of human existence is "hard to get." Thus, we should utilize it now that we have that rare opportunity.

Why Is Mental Body Unique?
7. The mental body (gandhabba) is VERY DIFFERENT from the physical body. The mental body has a few of the smallest units of matter (suddhatthaka) TOGETHER with the essential elements of LIFE.

Those ESSENTIAL elements are the hadaya vatthu and a set of five pasāda rūpa. Those are the only LIVE things in a human (or an animal.)

- The hadaya vatthu is the "seat of the mind" and where thoughts (citta) arise.
- We experience the five physical, sensory inputs with the five pasāda rūpa.
- Those essential items (collectively called gandhabba) are created by kammic energy and sustain the human bhava.

## How the Mental Body Controls the Physical Body

8. A live physical body has a gandhabba (mental body) in it. In the post "Our Mental Body - Gandhabba," we discussed a good analogy of how the mental body controls the physical body (see \#8 in that post.)

- That gandhabba consists of a UNIQUE set of seven items called "dasaka" or "packages of tens." Those are listed in \#9 of the post "Gandhabba Sensing the World - With and Without a Physical Body." In many posts, I often refer to six entities: hadaya vatthu and five pasāda rūpa.
- Different types of dasaka are formed just by incorporating one mode of spin (bramana) and one mode of rotation (paribramana) to a suddhatthaka (smallest unit of matter.) That is how an inert suddhatthaka becomes ALIVE. When the kammic energy wears out, those motions stop, which is the end of that existence (bhava.)
- Details are in the two posts, "Our Mental Body - Gandhabba," and "Gandhabba Sensing the World With and Without a Physical Body." One can get a deeper understanding by reading those posts. It is good to have at least a general idea.

## Kammic Energy creates the Mental Body

9. In fact, as we have discussed, when ANY living being grasps ANY new existence, a corresponding mental body is created by the kammic energy. That mental body matches the particular kamma that was responsible for the new existence (bhava.)

- If that kamma was a papa kamma done with anger (say the killing of a human,) then the new bhava could be in a niraya (hell.) If that kamma was a puñ̃̃a kamma done with compassion (say taking care of an invalid or sick person,) then the new bhava could be in a Deva realm. See, "Kilesa - Relationship To Akusala, Kusala, And Puñ̃̃a Kamma."
- Both those two scenarios could be true of ANY person who is below the Sotāpanna Anugāmi stage.
- The point is that even if one did not kill a human in the CURRENT life, such crimes might have been done in a previous life. We have no idea what we have done in our previous lives. That is the danger in the rebirth process.

## Gandhabba (Mental Body) Is Unique to Human and Animal Realms

10. We started the series with five posts ("Origin of Life - There is No Traceable Origin" to "Cloning and Gandhabba" that laid the basic foundation of the Buddha's description of life. As summarized in that first post, Buddha taught that there is no "traceable beginning" to life. That means each of us has existed (among the 31 realms of this world) "forever."

- The next four posts specifically dealt with life in the human realm. It is a bit complex because human life involves a physical body (collection of material body parts) in addition to the mental body created by kammic energy. That same picture also holds for the animal realm.
- Living beings in all other realms have "one integrated body." For example, a Brahma only has a "body" very similar to the human mental body (gandhabba.) Such a "body" is "mostly mental" and the amount
of matter is million-times smaller than a mustard seed. Of course, it expands to the size of the human body while inside the human body (it is like an energy field.)
- A Deva has a bit more dense "material body" but is still invisible to us. Again, it has no gandhabba-type separate mental body.
- Beings in the lower realms may have denser bodies but again do not have separate mental bodies.
- We need to focus more on human life. Without the concept of gandhabba, we cannot explain the growth of a "human body" in the mother's womb (starting with an inert single cell .) That is why I published those four posts on gandhabba at the beginning of the series.

## Summary

11. The mental body is much more important than the physical body due to the following reasons.

- The "essence of a human" is the mental body that has the hadaya vatthu (seat of the mind) and the five pasāda rūpa (that "sense" visuals, sounds, tastes, smells, and touches.) Those entities are what constitute "the mind." The ONLY WAY those six entities created is via our kammic energy in our thoughts (specifically javana cittā.)
- The mental body (gandhabba) controls the physical body.
- A physical body lives only about a hundred years, while the mental body (gandhabba) may last hundreds of years.
- However, we also need a healthy physical body to live a healthy life. We especially need a healthy brain. The brain first processes all external sensory inputs.

### 5.2.9.6 "Tipitaka English" Convention Adopted by Early European Scholars - Part 1

February 8, 2020; added \#13 (pronunciation guide) on July 23, 2020; August 25, 2022; October 14, 2022

## Background

1. Just three months after the Buddha's Parinibbāna (passing away), the First Buddhist Council (Dhamma Sangāyanā) took place. The leading disciples of the Buddha realized the importance of organizing the teachings of the Buddha accumulated over 45 years. Organizing the material into "three baskets" (Tipiṭaka) was completed only at the Third Council held 200 years after the Parinibbāna of the Buddha.

- The material in the Tipitaka was transmitted mostly verbally from one generation to the next over roughly the first four hundred years. It was only at the Fourth Council that the Tipitaka was written down.
- The Tipitaka (or the Pāli Canon) was written down in Matale, Sri Lanka, at the turn of the first century, 2000 years ago. Pāli is a spoken language and does not have a script. The Tipiṭaka was written in the Sinhala script.
- See details in "Preservation of the Buddha Dhamma."

## Writing Pāli Words in English - Different Convention

2. There are two specific issues in writing Pāli words in any language. Note that this is not regarding translation to English.

- Pāli is a phonetic language, meaning words must provide original sounds. Many words have their meanings explicit in the way they sound. See "Why is it Necessary to Learn Key Pāli Words?"
- However, In "Standard English," the same letter combinations may yield different sounds. For example, "th" is pronounced differently in "them" than in "thief." Therefore, "Standard English" writing will lead to problems writing Pāli words.
- The second problem is that Pāli words written in "Standard English" become very long. I see many Sri Lankans writing "anicca" as "anichcha" (2ช3อ包in Sinhala) because that is how it is pronounced. I also used to write "gati" as "gathi" since that is how it is pronounced.
- However, we must adhere to the convention adopted by the Early Europeans (in the late 1800s) to avoid confusion.

3. When the early Europeans started writing the Pāli Tipitaka using the English alphabet (a Latin alphabet), they realized the necessity to represent the original sounds in an "unambiguous and efficient" way.

- We will call the convention they adopted "Tipitaka English."
- That "Tipiṭaka English" convention is DIFFERENT from "Standard English."
- Let us first address the "sound" issue.

## English "th" Sound Depends on the Word

4. We know that "th" represents a different sound in the word "them" than in "thief."

- A phoneme is the smallest contrastive segment in a language. In other words, they are the smallest building blocks that make the difference between two words. The term digraph describes a combination of two letters representing only a single phoneme.
- In words like them, father, and writhe, the digraph is th (voiced), and the phoneme is /th/. This is the " $\varepsilon$ " sound in Sinhala, as we will see below.
- On the other hand, in words like thief, Catholic, and both, the digraph is th (voiceless) and the phoneme is /th/. This is the " $\square$ " sound in Sinhala.
- Don't worry about the above technical terms. The point here is that one MUST be aware of the correct "Standard English" when pronouncing those English words.
- That was one reason to adopt a new "Tipitaka English" convention. Now, let us discuss the second reason.

## Pāli Words can become very long in "Standard English"

5. Now, let us see why the "Standard English" convention leads to long words written with the English (Latin) alphabet. Let us take a simple Pāli word, "citta." In the original Tipitaka, it was written as "33ơ? Sinhala.

The "ch" sound in English is seen, for example, in "china" and "chain." It takes two English letters to produce the "D" sound. In the same way, the "Ђ"" sound requires two letters, "th," in English as in "Theme" or "both."

- Therefore, in "Standard English," "(3)>>'బ") would be reproduced as "chiththa."
- As you can see, writing that word using "Standard English" would take eight letters instead of five in "citta."
- With more complex Pāli words, the corresponding "Standard English" reproduction would be cumbersome. That seems to be the second reason for using a different "Tipitaka English" convention; see below.

## Evolution of "Tipitaka English"

To address the above issues, a "Tipitaka English" convention was adopted in the 1800s, as discussed below. You will see it below if you have not grasped what I am trying to get to.
6. I came across an old book by James D'Alwis, published in $\mathbf{1 8 7 0}$ (Ref. 1), that describes the historical process of cataloging the Pāli literature found in Sri Lanka (called Ceylon at that time.) The book is available on Amazon.

- The seed for the project was a request by a government agent in 1868 to the "Chief Translator to Government" to assist with a project in India to collect and compile Sanskrit literature.
- In 1869, the Chief Translator to Government replied that nearly all Sanskrit manuscripts in Ceylon were "importations from India." He suggested that it would be worthwhile to initiate a similar effort to collect and compile the Pāli and Sinhalese manuscripts in Ceylon.
- That proposal was approved in early 1870. James D'Alwis, who had done some work on Pāli/Sinhalese literature and Buddhism, was selected to collect and compile such manuscripts mainly from Buddhist temples ("pansalas.)"
- Mr. D'Alwis was a civil servant of the British Government at that time. At that time, there was a concerted effort by the English civil servants to recover and preserve all ancient literature that they came across in Asian countries. See "Background on the Current Revival of Buddhism (Buddha Dhamma)."
- Dr. Malalasekera's account confirms the above background in Ref. 2, pp. xv-xvii.

## The Original Convention for "Tipiṭaka English"

7. The goal was to collect all Pāli manuscripts and write them with the English (Latin) alphabet. The early work by Mr. D'Alwis followed (as quoted from p. xxvii of the book) 'the system sanctioned by Government in the Minute, which is published in the Appendix."

- A full page in the Appendix has the complete alphabet of the Sinhala language (and the corresponding English script adopted.) Download here: WebLink: PureDhamma Picture: Complete Orthography $=$ Sinhala to English
- That page (on p. 234 of the book) has the Sinhala alphabet, together with the Latin letters adopted to represent those sounds (adopted on August 28, 1866.) That was the first version of the "Tipitaka English" convention. As we will see below, one more change was adopted based on a recommendation by D'Alwis.
- It may be difficult to read that page. The following is an enlarged section containing the consonants.

Consonants.

| Gutterals | ... | $\infty \mathrm{k}$ | จ kh | (6) g | *s ${ }^{\text {g }} \mathrm{gh}$ | Q in |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Dentals |  | $\cdots \mathrm{t}$ | $\theta$ th | $¢_{9} 1$ | Q dh | 00 n |
| Labials |  | E11 | $\theta \mathrm{ph}$ | อ 1 | * bh | (e) 11 |
| Semi vowel | 1 | ce y | 6 r | Cl | e | - v |
| Sibilants | ... | es s | ce $\mathrm{s}^{\prime}$ | \% sh | (3) h |  |

Download here: Pāli Words - Sinhala to English Script - Consonants

## Consonants

| Gutterals | 20k | จkh | c) g | \% gh | ฉn่ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Palatals | Och | \% chh | ¢ز | $20 . j \mathrm{~h}$ |  |
| Linguals | Ot | $\omega$ ¢ th | ฉ | చి ḍh | бn |

| Dentals | 3 t | oth | દ̨d | ■ dh | 3 n |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Labials | з $p$ | चิ-ph | هb | ७bh | Om |
| Semi vowels | $\omega \mathrm{y}$ | Or | ¢1 | e! | Ov |
| Sibilants | $\sim_{\text {us }}$ |  | ® sh | ठ h |  |

- Now, let us discuss some of the adopted conventions in "Tipiṭaka English."

## Only " $t$ " Represents the " $>$ " Sound

8. The letter " $\square$ " in Sinhala represents the sound "th" is in theme or north. But the "Tipitaka convention" is to use "t."

- Therefore, "theme" in "ordinary English" becomes "teme" in "Tipitaka English."
- The word "gati" is pronounced as "gathi," where the sound "th" as in theme. But the "Tipitaka English" convention is to write as "gati."
- The word "Tipitaka" also starts with the "ə"" sound. In "Standard English," it would be "Thipitaka." Anatta in "Standard English" would be "anaththa."
- Therefore, words become significantly shorter with the "Tipitaka English" convention. With more complex words with the "ch" and "th" sounds, the corresponding English words can become very long.

## Only "d" Represents the "ट̨" Sound

9. Another is the "e" sound, pronounced like "this." In "Tipitaka English," the letter "d" represents the "th" sound in "this" or "that."

- For example, the Pāli word "टृथ"" in "Tipiṭaka English" is "dasa." which needs to be pronounced like the "th" sound in "the" or "that."
- Of course, the word "dasa" appears in "dasa akusala" for "ten immoral deeds."
- More examples are sadda, hadaya and Deva.

## The "อ" Sound In the Above Table is With "ch"

10. It is interesting to see that the above Table (in \#7) has the "อ" sound represented with "ch" as in
"Standard English." Thus the decision to just use "c" to represent the "D" sound was made later.

- The text in D'Alwis's book represented that "mixed convention." On p. 136, for example, the name "Kacchchāna" appears. In modern texts, it is "Kaccāna."
- The word "vivicchati" ( $\mathfrak{( 1 ) త ో ర ి ~ i n ~ S i n h a l a ) ~ a p p e a r s ~ o n ~ p . ~} 73$ as "vivichchhati"" where "ch" represents the "D" sound and "chh" represented the "œ" sound. We can see why they decided to make that change too!
- By the time "The Dhammasangani" by Edward Müller came out in $\mathbf{1 8 8 5}$ (Ref. 3), they had adopted the current convention to use "c" to represent the "D" sound.

## Current Convention - Only "c" Represents the "ว" Sound

11. For example, the letter "อ" frequently appears in Pāli verses, and it has the "ch" sound (as in chai tea). In "ordinary English," the Pāli word anicca ( $2 \boldsymbol{2} \mathrm{z}$ 包) would be "anichcha." You can see why that would lead to very long words in English. I used to do that too, and I still see some Sri Lankans writing words that way.

- Therefore, in almost all cases, a single English letter "c" represents the "ch" sound in "Tipitaka English."
- Note that "chai tea" would be "cai tea" in "Tipitaka English"!

## "Tipiṭaka English" Conventions Hold Everywhere

12. The " $\square$ " sound is ALWAYS represented by " t ," and the following are some examples we use often.

- Atta, Anatta, gati, sota, tanhā, tejo, Tilakkhana, Tisarana, āyatana

The " $๕$ " sound is ALWAYS represented by "d" as in the following:

- Hadaya, sadda, dosa, Deva, desanā, diṭṭhi, dukkha, dugati, pasāda

Finally, the "อ" sound is ALWAYS represented by "c" as in the following:

- Anicca, citta, cakkhu, cuti, paccayā, sacca, rūpāvacara, cetasika, cetanā

The above words are pronounced in the audio below:
Pāli-words-Tipitaka-English-Post-1

## Pāli Alphabet with Illustrations \& subtitles

13. The following video could be very useful in learning the Pāli alphabet (in English.) Moreover, it provides excellent instructions on pronunciation.

A few more essential features of the "Tipitaka English" convention are discussed in the next post, "Tipitaka English" Convention Adopted by Early European Scholars - Part 2.

### 5.2.9.6 "Tipitaka English" Convention Adopted by Early European Scholars - Part 2

February 15, 2020; revised on July 23, 2020 added \#12 (pronunciation guide); August 25, 2022

## Introduction

1. In the previous post, we discussed the reasons for adopting a "Tipitaka English" convention to write Pāli words by European scholars in the 1800s. It is necessary to read that post first: "Tipitaka English" Convention Adopted by Early European Scholars - Part 1."

- As we discussed, those early European scholars realized the importance of the need to preserve the "Pāli sounds" as much as possible. Of course, the other requirement was to keep the corresponding English version short.
- In that post, we discussed the adoption of " $t$," " d ," and "c" to represent the " $\mathfrak{D}$," "民." and the "อ" sounds in Pāli.
- Here we will continue that discussion. The " $t$ " (with a "dot" underneath the " $t$ ") represents the " 0 " sound in Pāli.
- Then there are aspirated sounds "th", "dh", "ch", and "ṭh" respectively for the " t "" "d," " c ," and " t " sounds. Some of those "aspirated words" represent "emphasized versions" of the "unaspirated words." I will explain it below.

## We Need to Be Familiar With the "Tipitaka English" Convention

2. As I mentioned in the previous post, the above convention went into effect before 1900. Thus all Pāli documents compiled by the Pāli Text Society are consistent with this convention.

- The Pāli texts (with the English alphabet) available on the Sutta Central website are directly from the Pāli Text Society. Those texts are accurate. For example, here is the "WebLink: suttacentral: Dhammacakkappavattana Sutta (SN 56.11)" that was the first discourse delivered by the Buddha.
- It is an excellent idea to examine that sutta (and try pronunciations of those Pāli words) with the guidelines provided in my two posts on the "Tipiṭaka English" Convention.
- Many of my posts at the puredhamma.net website are not entirely consistent with the "Tipitaka English" Convention, but I will try to make them compatible gradually. I have been trying to "upgrade" several weekly posts in recent months.
- Of course, as I have repeatedly pointed out, many English translations of Pāli words at the Sutta Central site are not correct. Examples include anicca, anatta, Ānāpāna Bhāvanā, and viññāna. See, for example, "Misinterpretation of Anicca and Anatta by Early European Scholars."
- Now let us continue introducing the "Tipitaka English" convention.

## Only " C " Represents the "ठ" Sound

2. The "D" sound in Pāli is the "ta" sound in English, as in "Tom." The "O" sound in Pāli is ALWAYS represented by "t." Note the "dot" underneath the " t ."

- Some examples are Paṭicca, paṭigha, paṭiloma, paṭisandhi, paṭipadā.
- In the previous post, we saw that the " $\square$ " sound is ALWAYS represented by " t " (without the "dot" underneath the $t$.)
- The word Tipitaka is an excellent example of both sounds, the " $t$ " and the " $t$." I hope you can catch the difference in the audio in \#4 below.

## Aspirated Versions

3. Now, let us consider the "aspirated versions" of those four sounds we have discussed. We must remember that we are dealing with "Tipitaka English" and NOT "Standard English."

- The aspirated version accompanies a forceful expulsion of air. If you hold a thin piece of paper in front of the mouth, it should move when you make an "aspirated sound."
- The following video explains that for English words. But it is the same idea.

## WebLink: youtube: Aspirated sounds

## Putting Emphasis on " $\partial$ " Sound to Make the " $\omega$ " Sound

4. The " $t$ " ("ס") sound, when aspirated with "thh," becomes the " $\omega$ " sound. It is not that common to have the "th" by itself. An example is thapetvā, meaning "placement."

－Here are more examples of the＂t＂（＂0＂）AND＂ṭh＂（＂બ＂）sounds coming together：ditthi（ę己た్ for
 kammaṭ！$h \bar{n} n a$, satipat！̣hāna．
－In \＃2，we mentioned some example words with the＂$t$＂sound：Paticca，patigha，paṭiloma，paṭisandhi， paṭipadā．
 （ewsiffor living being；note that Bodhisatta is a living being who is striving to attain the Buddhahood．）
－Here is the pronunciation of the unaspirated paṭicca，paṭigha，paṭiloma，paṭisandhi，paṭipadā AND aspirated ṭhapetv $\bar{a}$ ．Both aspirated and unaspirated in aṭtha，diṭthi，sandiṭthika，at！thañgika， kammat！thāna，and satipat！̣thāna．Also，Tipitaka．
WebLink：mp3 file：Pali words Tipitaka English Post 2－1

## Putting Emphasis on＂$\quad$＂Sound to Make＂$\circlearrowleft$＂Sound

5．The sound＂th＂is the＂aspirated version＂of＂ t ＂as in Samatha（ $ఙ \circlearrowleft \bigcirc \vartheta$ in Sinhala）in Samatha Bhāvanā． The word ratha（ $6 \partial f o r ~ " v e h i c l e ") ~ i s ~ a n o t h e r . ~$
－Here are more words with both the＂$t$＂and the＂th＂sounds：tathāgata（ yathābhūta，hadaya vatthu．

6．There are a few words with both aspirated and unaspirated versions．For example，when the

－There are a few words like that where the meaning is emphasized with the aspirated version．We will discuss that with examples from the Tipitaka later on．Two more such words addressed in \＃8 below．
－Many other words do not have such an＂emphasized＂and＂non－emphasized＂versions．Here are some examples with ONLY the＂th＂sound：vithi，Itthi，Samatha，Thero，For example，there are no words as viti，Itti，Samata，or Tero．
－Here is the pronunciation of Samatha，ratha，tathāgata，natthi，atthi，yathābhūta，hadaya vatthu， vīthi，Itthi，Samatha，Thero．

WebLink：mp3 file：Pali words Tipitaka English Post 2－2

## Putting Emphasis on＂¿ृ＂Sound to Make the＂$ద$＂Sound

7．The sound＂dh＂is the＂aspirated version＂of＂d＂as in Dhamma（ద๑＂๑）．More examples of words with the ＂dh＂sound：Dhamma，adhamma，dhātu，gandha，gandhabba，middha，nirodha，saddhā，andha， sandhi，sādhu，patisandhi，samādhi．
－Both the unaspirated and the aspirated sounds are in words，Dhammapada（దఆ७ఆ̧̨ in Sinhala）and Buddha（（ذُ
－Here is the pronunciation of Dhamma，adhamma，dhātu，gandha，gandhabba，middha，nirodha， saddhā，andha，sandhi，sādhu，paṭisandhi，samādhi，Dhammapada，Buddha，passaddhi，iddhi， middha．
WebLink：mp3 file：Pali words Tipitaka English Post 2－3

## Putting Emphasis on＂อ＂Sound to Make the＂て్＂Sound

 unaspirated is in calana（Deb），meaning＂movement．＂

- Most Pāli words with the "ch" sound also have the "c" sound coming first. Some examples are, iccha, vicikicchā, appiccha (appa iccha), macchariya, micchā, micchācāra, micchā̄āc̄a, pariccheda, gacchati, uccheda.
- Two more critical Pāli words have the aspirated version emphasizing the meaning of the unaspirated version, just like in the case of atta/attha discussed above in \#6.
 emphasize the meanings of unaspirated words. We will discuss that in the next post.
- Here is the pronunciation of chanda, calana, iccha, vicikicch $\bar{a}$, appiccha, macchariya, micch $\bar{a}$, micchācāra, micchāvācā, pariccheda, gacchati, uccheda, icca, iccha, anicca, aniccha.

WebLink: mp3 file: Pali words Tipitaka English Post 2-4

## Connection to Key Concepts in Buddha Dhamma

9. Over the past year, I have realized that many misconceptions could be easily avoided by looking at a few Pāli words and their inherent meanings.

- For example, the Pāli word atta has two different meanings. Furthermore, the word attha emphasizes just one of those two meanings.
- Similarly, the meanings of the words icca and anicca become emphasized in iccha and aniccha.
- See "Icca, Nicca, Anicca - Important Connections."

## Many of Posts at Puredhamma.net May Not be Up To the "Tipiṭaka English" Convention

10. I gradually became aware of this issue over the past several months. During that time, I have progressively followed the above rules. I will try to stick to this convention in future posts and gradually revise old posts to be compatible. That will take some time.

- All Pāli literature on the Sutta Central website is compatible with the "Tipitaka English" convention.
- Once you select a sutta, you can access translations to several languages using the "hamburger icon" on the top left.
- Of course, all translations there have errors, especially with keywords like anicca, anatta, Ānāpāna Bhāvanā, and viññāṇa.

## Singular to Plural in Pāli

11. The following issue is somewhat unrelated, and many people could be aware of it. But I would mention it here since it is essential to know.

- Many Pāli nouns ending in "short $a(/ 2 /)$ " converted to plural by replacing that "short $a$ " with a "long $a$ " or $\bar{a}$.
- For example, Deva, Brahma, sutta, citta, apāya, gandhabba, jhāna are singular and the corresponding plural are Devā, Brahmā, suttā, cittā, apāyā, gandhabbā, jhānā.
- Finally, Pāli Glossary pages with pronunciation are available at "Tables and Summaries."

## Pāli Alphabet with Illustrations \& subtitles

12. The following video could be very useful in learning the Pāli alphabet (in English.) Moreover, it provides excellent instructions on pronunciation.

### 5.2.10 Origin of Life - One Creates One's Own Future Lives

January 25, 2020; revised January 26, 2020 (video inserted in \#15)

## Introduction - Origin of Life

1. In the first post in this series, I pointed out that there is no traceable "beginning" to the life of any existing living being. See, "Origin of Life - There is No Traceable Origin."

- However, any living being's FUTURE LIVES are created by that living being.
- It is critical to understand how one's mindset and thoughts (in particular abhisañkhāra) can lead to different types of rebirths. That is the basis of Buddha Dhamma and is explained in Paṭicca Samuppāda (PS.)
- In simple terms, "bad thoughts/mindset" lead to "bad births" and "good thoughts/mindset" lead to "good births." The problem is that most are "bad births" and those infrequent "good births" do not last long.
- The Buddha said, "One who sees Paṭicca Samuppāda sees the Dhamma. One who sees the Dhamma sees Paṭicca Samuppāda." See, "Paticca Samuppāda - "Pati+ichcha" + "Sama+uppāda"."

2. In the first several posts in "Origin of Life," we discussed the background material necessary to understand how a complex physical body of a human starts with a single cell, a zygote.

- However, the most important part of a human is not the physical body, but the mental body. It goes by various names in Buddha Dhamma, manomaya kāya and gandhabba being the most common. However, that mental body arises due to a pattisandhi viññāna and remains as a kamma bïja until coming to the mind of a living being at the beginning of a new existence (bhava) as a dhamm $\bar{a}$.
- Average humans focus only on keeping the physical body in good condition. It is much more beneficial to improve the "mental body." That way, one will be able to stop ALL FUTURE SUFFERING.

## Critical Role of Paṭicca Samuppāda

3. The seed (kamma bīja) for a future existence (bhava) is the patisandhi viññanna cultivated via "sañkhāra paccayā viññanna" in PS. I briefly discussed/explained that with nine recent posts on Paticca Samuppāda (PS.) The last of those posts, "Paticca Samuppāda - From Mind to Matter" came to that conclusion.

- In many previous posts, we have discussed that pațisandhi viñãāna, gandhabba, kamma bī̈ja, and dhammā are very similar terms. See, "Dhammā, Kamma, Sañkhāra, Mind - Critical Connections."
- When grasping a new human existence, that patisandhi viññāna becomes a human gandhabba with the complete blueprint of that human. See, "Dhammā, Kamma, Sañkhāra, Mind - Critical Connections."
- Then we discussed the 1990 movie "ghost" to provide visualization of a human gandhabba. A gandhabba has only a trace matter. An average human cannot see a gandhabba. However, it has the complete "blueprint" for a human. See, "Ghost 1990 Movie - Good Depiction of Gandhabba Concept."
- That gandhabba then gives rise to a fully-grown human as explained in the two posts, "Buddhist Explanations of Conception, Abortion, and Contraception" and "Cloning and Gandhabba."

4. There is a lot of information summarized above using different terms. In the following, I will try to organize that in a systematic way and will also describe the "bigger picture" within the 31 realms of existence.

## The General Process of Grasping an Existence (Bhava)

5. In broad terms, there are three main existences (bhava) but they branch out to thirty-one. Existence in the kāma bhava (i.e., 11 realms in kāma loka), rūpa bhava ( 16 realms in rūpāvacara Brahma loka), and arūpa bhava (4 realms in arūpāvacara Brahma loka.) The 11 realms in $k a \overline{m a}$ loka are the 4 realms in the apāya, one human, and six Deva realms.)

- Thus, there are 31 existences (bhava) in this world. Any living being belongs to one of those. Each such existence has a finite lifetime. Some are fixed and others are variable. Deva and Brahma realms have fixed lifetimes. Lower realms starting with the human realm have variable lifetimes. See, " 31 Realms of Existence."
- However, when a living being grasps a new existence in ANY realm, the duration of that existence WILL BE fixed. For the human and lower realms, that lifetime depends on the kammic energy that "feeds" that particular existence. For example, one human may have that human existence for 10,000 years and another may have only 900 years.

## Each Bhava Starts With a Mind-Made Body (Manomaya Kāya)

6. Any living being (other than an Arahant) will grasp (or latch onto) a new existence when the current existence runs out of its lifetime. At that moment, kammic energy for the new existence creates a "mindmade body" or a manomaya kāya.

- That transition from one existence (bhava) to another happens with an upapatti PS process. Specifically, that happens with the "upādāna paccayā bhava" step in that upapatti PS cycle.
- But it is a patisandhi viñ $\tilde{n} \bar{a} \underline{n a}$ " created via "sañkhāra paccayā viñnäna" step in PS that is responsible for that new existence (bhava.)
- In other words, the kammic energy embedded in that patisandhi viñ̃ān̄a is the energy that creates the manomaya kāya of the new existence (bhava.) Thus, manomaya kāya has only a tiny bit of energy that was created by the mind.
- That manomaya kāya does not die until the end of that bhava. Living beings in each and every realm will have a manomaya kāya.
- Details are at the nine posts on PS, "Paticca Samuppāda - Not 'Self' or 'No-Self."

## Brahma Realms Only Have Manomaya Kāya

7. A manomaya kāya has a hadaya vatthu (seat of the mind) and UP TO five pasāda rūpa (that enable experiencing the external world.) The hadaya vatthu is different for different realms and also has INDIVIDUAL characteristics. Thus even two humans will have different hadaya vatthu embedding their personal characteristics. The following is a brief summary of different realms.

- The four highest Brahma realms (arūpāvacara Brahma realms) have ONLY the hadaya vatthu. Those Brahmā can only think.
- Brahmā in the 16 rūpāvacara Brahma realms have hadaya vatthu and TWO pasāda rūpa: cakkhu and sota pasāda rūpa. They can see and hear with just those pasāda rūpa. They do not have physical bodies, and thus do not have eyes and ears like us. Their "seeing" does not require light and they "see' things far away. In the same way, they can hear sounds that are far away. But they need to "direct their attention" to a particular location to see or hear.
- All those Brahmā in the 20 Brahma realms have only manomaya kāya.

## Living Beings in Kāma Loka Realms Have Denser Bodies In Addition to Manomaya Käya

8. Things become complex when we get to the 11 realms in the kāma loka.

- Devā in the six Deva realms have manomaya kāya with hadaya vatthu and five pasāda rūpa. They also have "physical bodies" like ours but at a much finer level. Those "subtle bodies" are also created by kammic energy and thus Devā are born with their "fiull bodies." That means they do not grow or get old but just die at the end of their lifetimes. There is only one "jāti" within a Brahma or Deva bhava. We cannot see either Brahmā or Devā.
- Human "structure" is the same as that of the Devā but, of course, human physical bodies are much denser. Furthermore, human "structure" has many common features with the animal realm. The other three lower realms in the kāma loka are more complex and we will not discuss them here.
- Let us briefly discuss the features of the human and animal realm. I will address only the human realm, but most of those features are the same for the animal realm.

## There are Multiple Jāti Within a Human Bhava

9. A human also has a manomaya kāya with a hadaya vatthu and five pasāda rūpa. But a human can exist in TWO forms.

- ONE: Much of the time in the human bhava, it stays with JUST the manomaya kāya. That state is normally referred to as the gandhabba state. A gandhabba is like a Brahma in the following aspect. A gandhabba can see and hear without the aid of physical eyes and physical ears. Even though it has five pasāda rūpa, it cannot touch, taste, or smell since there is no dense physical body.
- TWO: A human will have a "dense physical body" only after that gandhabba (manomaya kāya) gets into a womb and creates a physical human body.
- It is good to contemplate how such a tiny amount of energy in a manomaya kāya can "build" a human body that can weigh over a hundred pounds (or many kilograms.)

## A Gandhabba for a Human Is Like a Seed for a Tree

10. A good point to start is to think about how a tiny seed grows into a huge oak tree.

- That seed has the blueprint for the whole tree. The seed germinates and pulls in food and water from the soil to grow into a large tree. The tree trunk, limbs, and leaves are all made from the food and water extracted from the soil.
- In the same way, the "seed" for a full-grown human is a zygote, which is a single cell. But a zygote by itself cannot grow into a human. A "human mental body" (or a gandhabba) needs to merge with the zygote to start the process. See, "Buddhist Explanations of Conception, Abortion, and Contraception" and "Cloning and Gandhabba."
- The mental body or the gandhabba has the blueprint for a full-grown human. Some features of the physical body come from the parents via the zygote.

11. We saw that the seed takes all the "building material" from the soil to grow to a tree. A "live zygote" grows first by taking food from the mother to become a baby. Once outside the womb, that baby starts eating food and becomes a grown human.

- This is why the physical body is secondary to the mental body (gandhabba.) All mental activities are with the gandhabba. Furthermore, a gandhabba is fully human. It just does not have a dense body to be able to touch, eat, or to smell odors. See, "Ghost 1990 Movie - Good Depiction of Gandhabba Concept."
- The physical body is just a shell. The gandhabba makes all the decisions. The physical body is needed for the gandhabba to experience touches, tastes, and odors. See, "Gandhabba Sensing the World With and Without a Physical Body."

## The Lifetime of a Gandhabba Is the Length of Human Bhava

12. Therefore, within a human bhava, there can be many "human births" ( $j a \bar{a} t i$.) See, "Bhava and Jāti States of Existence and Births Therein."

- When a physical body dies, the gandhabba comes out and waits for another womb. However, that gandhabba state in between two human lives is not an antarābhava because it is within the SAME human bhava. See, "Antarābhava and Gandhabba."
- A human $j \bar{a} t i$ lasts around a hundred years, but a human bhava may last thousands of years.
- Those different human births ( $j a \bar{a} t i$ ) within a human bhava will have similar characteristics. The physical appearance will change since those of parents influence via the zygote. But the successive lives usually have similar gati and also tend to have close geographic locations of birth.
- A good example is Dhammruwan, who is now a Sri Lankan, but was born in India at the time of Buddhaghosa 1500 years ago; see, "Boy Who Remembered Pāli Suttā for 1500 Years." More rebirth accounts at, "Evidence for Rebirth."

## How Does a Gandhabba (or a Brahma) See and Hear Without Eyes and Ears?

13. In the movie "ghost" we saw that a gandhabba can see not only other gandhabbā (which is the plural for gandhabba) but also humans and anything else in the world. See, "Ghost 1990 Movie - Good Depiction of Gandhabba Concept." How is that possible without having physical eyes and ears?

- Our understanding of nature is extremely limited. Before modern science made some technical breakthroughs within the past hundred years or so, we would not have believed that it would be possible to "see" an event happening thousands of miles away, in real-time. Yet, we do that with televisions now and don't think twice about it.
- These days we can record such visuals with micro-sensors that are so small that they are hard to see. Details at, "Gandhabba Sensing the World - With and Without a Physical Body."

14. When a human gandhabba is born (at a cuti-patisandhi moment of grasping a new bhava), the following amazingly miniature "sensors" are made by kammic energy.

- They are hadaya vatthu (seat of the mind) and five pasāda rūpa (cakkhu, sota, ghāna, jivhā, kāya.) Of course, the ghāna, jivhā, and kāya pasāda rūpa REQUIRE signals from a physical body (of odors, tastes, and touches) to function.
- The cakkhu and sota pasāda rūpa can detect visuals and sounds without the aid of eyes and ears. The cakkhu pasāda rūpa is the smallest entity that can "see." Sota pasāda rūpa is the smallest entity that can hear.
- Evidence for the existence of gandhabba (manomaya kāya) has accumulated over the recent years, as we discuss now.

## Seeing and Hearing With the "Mental Body" (Gandhabba)

15. People who had Near-Death Experiences (NDE) say they could see and hear even though their physical bodies (and the brains) were "clinically dead." They say they were watching doctors operating on their bodies from the ceiling. Their "mental bodies" (gandhabbā) had come out of the physical body. The book "Consciousness Beyond Life" by physician Pim van Lommel (2010) gives detailed accounts of case studies of NDE experienced by people undergoing heart operations. Here is a youtube video on the subject:

WebLink: youtube: Near Death Experiences \& Evidence of the Afterlife

- Some people can have Out-of-Body Experiences at will; see, "Manomaya Kāya and Out-of-Body Experience (OBE)." They can remove their gandhabba kāya from the physical body at will. Then they do not need eyes and ears to see and hear.
- Even though there are people who say they can teach others how to do that, I don't think that is possible. That ability is due to a puñña iddhi or due to past good kamma.

16. It is critical to realize that there phenomena that cannot be explained with our ordinary sensory experiences. Only a Buddha can discover these "hidden" facts about a wider world with 31 realms.

- However, the Buddha said that average humans are not capable of fully comprehending the characteristics of living beings in various realms. It is good to know the basic facts, but it does not serve any purpose to try to rationalize them with the limited sensory faculties we have.
- Yet any average human is capable of figuring out that these explanations are self-consistent and help clarify many of our experiences. That confidence will grow as one starts following the Path (i.e., not only living a moral life but also learn the true nature of this world.) The mind becomes purified and is able to 'see" at deeper levels.

## Why Do We Have Physical Bodies?

17. We need physical bodies to be able to touch (and for sex), taste foods, and to smell odors. But a physical body comes with a price. We have to endure all kinds of diseases including cancer, body aches, the decay of body parts, etc. Brahm $\bar{a}$ and $\operatorname{Dev} \bar{a}$ do not experience those, but of course, death is inevitable to all.

- Furthermore, it is a burden to "carry around" this heavy body. As I have mentioned before, even breathing requires an effort (but only asthma patients feel that.) It is such a relief to come out of the physical body, as described by those who have had NDE or OBE experiences.
- However, if one is forced to stay with the gandhabba body for a long time, one will start "missing" the ability to touch, taste, and smell. That is why all human gandhabbā desperately wish to be able to get into a womb to get a human birth.
- The point is that a gandhabba with an unimaginably small "body" can experience everything better, except the ability to touch, taste, and smell.

## Why Are There So Many Different Terms for Kammic Energy?

18. Even though viññāna, kamma bīja, dhammā, and gandhabba are related, those terms are used in different contexts. Here is one way to remember how these different terms appear in different situations.

- First, energy for future vipāka (including future rebirths) created via "(abhi)sañkhāra paccayā viññāna."
- Such tiny amounts of energies stay in the "nāma loka" (out there) as kamma bïja (kamma seeds.) See, "Our Two Worlds: Material and Immaterial."
- When the conditions are right, a strong kamma bīja can give rise to a new existence (bhava) when those kammic energies come back to the mind as dhamm $\bar{a}$.
- Such a new existence are grasped as paṭisandhi viññāṇa. That paṭisandhi viññāṇa gives rise to a manomaya kāya, which has a special name of gandhabba for human and animal realms.
- Manomaya kāya means "a body made by the mind." That is how we create our own future lives!
- If you do not fully understand the above, you can read the previous posts in this series, or ask questions. It may take a little while to fully comprehend all relationships.

19. We have now finished the first phase of Buddha Dhamma dealing with the origin of life. Life is not created by a Creator. It does not arise arbitrarily either. We discussed those two extreme views earlier in "Origin of Life" series.

- Those concepts discussed above could be new to many, and thus may take some time to understand or get used to. But I assure that there is complete self-consistency of what I have described and also
consistency with the Tipitaka. My suggestion is to print out this series of posts and to have them ready for quick reference. If there are any questions, please comment at the forum or send an email: la1@puredhamma.net.
- We will discuss several significant implications that can be reached with this "correct world view" of the Buddha in future posts.

### 5.3 Good Explanations - Key to Weeding Out Bad Versions of Dhamma

1. Today, we have many different religions, world views, cults, and even different versions of the Buddha Dhamma: Theravāda, Mahāyāna, Zen, Vajrayana (Tibetan), etc. Actually, Zen and Vajrayana both originated from Mahāyāna (see, "Historical Timeline of Edward Conze"); thus Theravāda and Mahāyāna are the two main categories. How could one decide which one to choose?
2. Here is a good example of an obvious inconsistency:

In Mahāyāna Buddhism, one is supposed to take a vow as to not to attain Enlightenment (Nibbāna) until ALL BEINGS are ready to attain Nibbāna. Whoever came up with this idea did not understand that there are an infinite number of beings.

- On this Earth alone, scientists estimate that there are 10 trillion of just ants (million ants for each human being!). It also displays a lack of understanding that most beings are incapable of attaining Nibbāna, until a human or deva birth is attained, which are rare events; see, "The Grand Unified Theory of Dhamma."
- As the Buddha advised in the Kalama Sutta, everyone needs to examine the different options and choose the one that is without any contradictions.

3. In Buddha's time, there was of course no "science" that educated the masses about the physical world. Even though the Buddha referred to the innumerable world systems and innumerable beings in them, people just had to believe those only based on faith. Today we are fortunate to have a well-established scientific method to rule out "bad theories" and to focus on "good theories."

- This method cannot match the Buddha's method of deciding by EXPERIENCE that he advised in the Kalama Sutta as mentioned above, but it gives a filtering mechanism to weed out the stuff that is clearly not worth pursuing. Thus the scientific method can be used as "pre-screening" to get rid of obviously unsuitable paths or "theories."

4. What is the "scientific method"?

An acceptable "theory" must have,

- power (ability) to explain as many things that we experience in this world,
- consistency, i.e., not one explanation can be inconsistent with another within the same theory,
- the power to predict, i.e., point out things that are still unknown but could be verified in the future.

5. If one would want to read more about the scientific method, I can recommend two books: "The structure of scientific Revolutions" by Thomas Kuhn is a classic; "The Beginning of Infinity" by David Deutsch is a recent and more easy-to-read book which also discusses infinity which is a key concept in Dhamma.
6. Thus explanatory power, consistency, and the power of prediction are the three measures of the validity of a scientific theory. Buddha Dhamma is a theory about existence for someone who has not yet "seen" its validity.

- My goal with this website is to present the Dhamma as a scientific theory. I will try to point out the explanatory power of the Dhamma, that there are no inconsistencies in Dhamma, and that many things in the Dhamma that were so far ahead of the times and only now are being confirmed by science.
- In the following video Dr. Deutsch explains the start of the scientific revolution on a few hundred years ago.
WebLink: YOUTUBE David Deutsch: A new way to explain explanation
- As explained above, science proceeds via conjectures (theories) that are continually tested. There are no conjectures in Buddha Dhamma. The truths revealed in Dhamma are still being re-discovered by science. The vagaries of life can only be explained in terms of Buddha Dhamma; see, "Complexity of Life and the Way to Seek Good Rebirths."

7. Buddha Dhamma is not a religion in the normally accepted sense of the word "religion." The Buddha never said that he can take someone to "salvation" if someone believed in him. One attains Nibbāna by purifying ONE'S OWN mind. The Buddha just showed WHY one should strive for Nibbāna and HOW to purify one's mind by following the Noble Eightfold Path.

- Buddha Dhamma is a complete description of existence, or nature. A Buddha discovers the laws of nature appears by his own mental efforts. It is for us to decide whether that world view makes sense to us, and then to use the Path he showed to attain Nibbāna, the state of unconditioned, permanent happiness.
- One could start on the Path of the Buddha in a gradual manner, verifying for oneself the benefits at each step; see, "Living Dhamma."

### 5.3.1 Consciousness and the Brain

I think Professor John Searle is one of the great philosophers of today who have the right ideas about consciousness. If he comes to learn about pure Dhamma, he may be able to articulate his points even better. Here is one of his presentations:

## WebLink: YOUTUBE: Consciousness \& the Brain

### 5.3.2 Matter Creates Mind or Mind Creates Matter?

## Re-written August 29, 2022

1. The deep meaning of "Manopubbangama Dhamma, mano setta manomaya" is that the mind is the origin of everything. This is unfathomably a strange statement at first, but when one studies Abhidhamma, it becomes clear why this is true.

- Before I get into the details, it is important to know that some scientists are beginning to realize that the mind could be the precursor to matter. Even though they cannot yet make the right connection, they can see that the reality has to be that way. It will be interesting to see how much progress they can make, without approaching the problem other than from Buddha Dhamma.
- Let us listen to these "new ideas" from a special group of scientists. They are new ideas from their perspective, since they have not been exposed to Buddha Dhamma.

2. In the following video a group of scientists discusses why the time has come to change the paradigm:

## WebLink: YOUTUBE: Consciousness \& Quantum Physics

3. Here is a presentation by Dr. Robert Lanza, whose book "Biocentrism" basically says that life did not arise from matter (universe). Still, the universe arose from life (pretty much agreeing with the Buddha Dhamma):

WebLink: YOUTUBE: Robert Lanza on theory of Biocentrism
4. In addition, philosophers are joining the discussion as well: Thomas Nagel, "Mind \& Cosmos: Why the Materialist Neo-Darwinian Conception of Nature Is Almost Certainly False" (2012). The following is a lengthy review of this book.

WebLink: youtube: Analysis of Thomas Nagel's Mind and Cosmos - Alexander Fink

- Even though some scientists and philosophers are beginning to realize that the mind could be the precursor to matter, they have no idea HOW that happens.

5. However, the Buddha explained that the mind creates EVERYTHING in this world via Paticca Samuppāda.

- Up to now, we have only discussed how Paticca Samuppāda explains the rebirth process for living beings. See "Paticca Samuppāda."
- But Paticca Samuppāda can also explain the formation of planetary systems in the universe. In the future, I will start writing about that process.
- Also, see "Manōpubbangamā Dhammā.." and the references therein.

### 5.4 Consciousness - A Dhamma Perspective

\author{

How do we Experience the Outside World?
}

### 5.4.1 Consciousness Dependence on Number of Dimensions

## Revised August 23, 2022

For an introduction to consciousness, see "What is Consciousness?."

1. When we look deeply into the issue of consciousness, we realize the unimaginable possible varieties of life. Let us start with the issue of dimensionality. Humans live in a four dimensional world; in other words, humans are aware of four dimensions -three dimensions of space plus time.

- Even though we used to think of time as being different from spatial dimensions, with his Theory of General Relativity, Einstein demonstrated that space and time are interrelated. He showed that the force of gravity could be explained as perturbations in the space-time fabric due to mass.
- Can living beings exist in higher dimensions that we are not aware of?

2. Of course, we cannot even begin to imagine more than four dimensions (or more than three spatial dimensions). However, it is easier to think of and visualize the lower number of dimensions.

- Imagine a two-dimensional creature living on your kitchen table. An ant will be the closest real example if we imagine that the ant cannot see above the table (a real two-dimensional creature would have only a length and width and no height). Now, if we put a hand on the table, the 2D creature could see part of the projection of the hand on the table. Now if we take the hand off the table, as far as the 2D creature is concerned, the "hand" disappears; it cannot "see" any part of the hand if it is off the table, and thus it has no "awareness" of that hand existing anywhere. It does not exist in its " 2 -D universe."
- For an amusing story of a 2D creature, see "Flatland: A Romance of Many Dimensions" by Edwin A. Abbott (2002). It was written in 1884 by Abbott, a mathematician.
- Here is a "fun video" from Dr. Quantum which illustrates the idea:

WebLink: YOUTUBE Dr. Quantum in Flatland
3. Therefore, the "awareness" of the 2D creature on the kitchen table surface is limited to its 2 D world. It is not aware of anything outside the surface of the table (if it is a " 2 D world," the surface can extend to infinity and as far as our 2D creature is concerned, it would not have "an end"). Furthermore, a 1-D world embedded in that 2 D world would be a line on that surface. A 1-D creature in that 1-D world will not see anything that lies outside the line. Thus, the 2-D creatures can go in and out of the 1-D world by crossing that line!

- Clearly, the consciousness of a 1-D creature is very limited, not necessarily by its mental capabilities, but by the dimensions of the "world" that it is in. A 2-D creature has an expanded consciousness compared to a 1-D creature. We in the 3-D world have even further expanded consciousness. (It must be kept in mind that one needs to incorporate the time dimension in all the above cases where only the space dimensionality was considered).

4. Therefore, if our world has more than three spatial dimensions, there may be other worlds we are unaware of since our consciousness is limited to the three spatial dimensions.

- Thus, there may be beings in different dimensions that we are not aware of. We may be able to see "projections" of them if there is some overlap in 1,2 , or 3 dimensions. If there is no overlap, then we will not be able to see them at all, i.e., we will not be "conscious" of their presence.
- For example, in the low dimensionality case we considered above, if a 2-D creature crosses over the " 1 D line world", the 1-D creature will see a "dot" when there is an overlap of the 2-D creature with the line. Yet, if the "1D world" lies above the tabletop, there is no overlap, and both creatures will not be conscious of the presence of each other's worlds.

5. It is possible the "see" living beings other than humans and animals by developing certain jhānic (abhiñña $\bar{a}$ ) powers. Even before the Buddha, many yogis could access other realms and interact with such beings. One does not have to attain Nibbāna to do that, and some Arahants have not developed such powers. The Buddha discouraged people from interacting with such beings, particularly those in the lower realms.

- "Our world" is much more complex than what is grasped by our senses, even though technology has enabled us to expand our consciousness; see "Expanding Consciousness using Technology." Yet, we can expand consciousness even more by purifying our minds; see, "Expanding Consciousness by Purifying the Mind." A purified mind can see the truth in the Buddha's wider world; see, "The Grand Unified Theory of Dhamma."
- And our lives do not end with this one; see "Evidence for Rebirth."
- Those two facts constitute the basis of the true nature of existence and need to be thought about critically; one cannot comprehend the message of the Buddha until one at least has some idea about this "big picture."

Next, "Six Kinds of Consciousness in our 3-D World",

### 5.4.2 Six Kinds of Consciousness in Our 3-D World

## Revised August 23, 2022

Having looked into the issue of the "awareness" or consciousness issue related to dimensions, we now turn to our familiar 3-D space. Even here the possibilities are endless, as we see below.

1. We become aware of our surrounding "objects" (i.e., visual objects, sound, smell, taste, tangible objects) using the five "external senses" of eye, ear, nose, tongue, and body. We see visual objects with our eyes, sounds with our ears, smell with our nose, taste with the tongue, and touch or feel with our body.

- Correspondingly, the Buddha stated that there is eye-consciousness, ear-consciousness, noseconsciousness, tongue-consciousness, and body-consciousness. The cognitive processes that involve those "five physical doors" are called five-door processes.
- In addition to those five traditional physical senses, in Buddha Dhamma, there is the mind and the associated mind-consciousness since we are also conscious of mind-objects such as thoughts and visual images. The mind-consciousness is also involved in each of the five-physical-door processes.

2. Note that the Buddha did not mention the brain in the mind-consciousness, and he used the term "mental element" without mentioning the brain. This is because the mind belongs to the "manomaya kāya" and the brain belongs to the "physical body"; see, "Manomaya Kāya (Gandhabba) and the Physical Body."

- Also note that five "indriya" (eye, ear, etc.) are not the physical eye, physical ear, etc. The five indriya, are called internal rūpa or pasāda rūpa, are invisible and unknown to modern science. The physical eye is different from the cakkhu pasāda rūpa; but the physical eye is needed for seeing.
- When one develops the mind, it is possible to see without the physical eye and much more (like beings in other realms). Similarly, the mind is not the brain, but the brain is needed for a normal human for mind to work.

3. Therefore, our five physical senses limit our consciousness; we perceive the "world" as we sense it with our five physical senses of eyes, ears, nose, tongue, and body.

- The "world" or "the universe" is much more complex than we perceive. This is one reason we think everything around us is permanent, and is why it is so hard for us to understand the true nature of "this world," i.e., anicca, dukkha, and anatta.
- With our "enhanced consciousness" from our scientific and technological advances, we have recently realized that even our universe is not permanent; it came into being some 14 billion years ago and will eventually re-collapse or disintegrate.
- Furthermore, as I mentioned elsewhere, we can still "see" only $4 \%-6 \% \%$ of the "stuff" in the universe. The other $96 \%$ or so is termed "dark energy" and "dark matter" by scientists because we do not know what that $96 \%$ consists of, see, "The Four Percent Universe" by Richard Panek (2011). Thus, even though we have vastly expanded our awareness, we are far from conscious of the "world as it is."

4. In Buddha Dhamma, the above discussion with six sense bases applies specifically to humans, but in general applies to many but not all animals as well as other beings in the "sense sphere" (kāmaloka).

- The Buddha categorized all the living beings subject to the rebirth process in the samsarra, and the categorization is according to consciousness. Beings in the other planes of existence have different consciousness than humans or animals.
- For example, beings in the Arupaloka ("form-less sphere") have only the mind consciousness since they do not have physical bodies. Before getting into that discussion, let us first discuss different aspects of consciousness that we see around us.

5. Even though the "beings" in the "sense-sphere" that includes humans and animals in general have five external sense-doors (eye, ear, nose, tongue, and body), there are many exceptions.

- For example, some animals do not have fully-developed five external senses. Others have different types of sense doors; a jellyfish has eyes but no brain for information processing, so its visual consciousness is still very limited. It can distinguish between dark and illuminated areas, and that is about all. On the other hand, a dog has visual consciousness comparable to humans, and it can catch a rabbit by chasing it.
- A bat does not have visual consciousness, so it cannot hunt during the daytime but has different consciousness using radar that enables it to hunt at night. So, it is clear that "consciousness" or "awareness" has many different "avenues" (for example, humans become aware of their surroundings by using sight, hearing, smell, taste, touch, and thoughts).
- Lower life forms may have fewer avenues of consciousness, and the degree of consciousness can vary too (a jellyfish has minimal visual consciousness). In a few cases, we may be less conscious than an animal. For example, a bat would be much more conscious about its dark surroundings than a human.

6. Even though most animals have the same five physical senses as humans, they are "aware" of only their immediate environment.

- But contemporary humans are aware of a huge Black hole at the center of our Milky Way universe, millions of light years away.
- Humans used to have much limited awareness even a few hundred years ago, before the advent of the telescope and the microscope. Since then, humans have slowly built up our awareness using technology; see "Expanding Consciousness by Using Technology."
- However, we must remember that a complete theory of consciousness (Buddha Dhamma) was described by the Buddha 2500 years ago. It had been hidden for nearly 2000 years, at least in its pure form.

7. Therefore, it is clear that "the awareness' or the "consciousness" can come in different flavors as well as different levels of intensity, even within the "sense sphere" (kāmaloka):

- The humans and devas in the kāmaloka have the highest levels of consciousness (especially mindconsciousness).
- In the "form-sphere" (rūpaloka), the consciousness level in general is higher, even though they have only visual, auditory, and mind-consciousness; their minds are much higher.
- The beings in the "form-less sphere" (arūpa loka) do not have physical bodies at all and have highly developed minds and thus have even higher levels of consciousness.
- Those three levels of consciousness are called lokiya (mundane).
- Beings in the three mundane levels have finite lifetimes, and a given "being" wanders through all these different planes in the unfathomably-long samisāra (rebirth process). Even a sentient being born in the arūpaloka may end up in the lowest level (apāya) in the kāmaloka, depending on the unspent kamma.

8. The higher levels of consciousness are supermundane or "beyond mundane" (lokuttara), and there are four levels of supermundane consciousness, with Nibbāna achieved by the Arahants being the highest.

- The first three levels of supermundane consciousness are Stream Enterer (Sotāpanna), Once-Returner (Sakadāgāmì), and Non-Returner (Anāgāmī).
- As one progresses on the Path, the consciousness starts to clear up, first by removing the five hindrances (panca nivarana) at the Sotāpanna stage.
- The Arahant stage purified consciousness. The undefiled mind becomes separated from any trace of matter (four great elements or cattāro mahā bhūta) at the death of the Arahant. Thus the Arahant is not reborn anywhere in the 31 realms, and his/her mind becomes free, Nibbāna.
- All the suffering we experience is due to trying to satisfy the physical body attached to the mind. When attachment to that body (which is subjected to decay and death) is severed, the worldly bonds are broken (Nibbāna), and the mind attains the complete "cooled down" (Nivana); see "How to Taste Nibbāna," and "Nibbāna - Is It Difficult to Understand?."

Next, "Expanding Consciousness by Using Technology",

### 5.4.3 Expanding "Consciousness" by Using Technology

1. Focusing on the human world, we can expand our "awareness" or consciousness in two ways so that we can be more "aware" of the "world" around us.

- One is using the scientific approach and by developing new techniques that enable us to "see" or "be aware" of things that are not directly accessible to our senses.
- For example, we have infrared sensors that allow us to see in the dark; we have constructed particle accelerators that allow us to "see" elementary particles; we can even "see" supernova explosions that happen millions of light years away using our sophisticated instruments. In the latter two cases, we do not actually see with our eyes, but we are aware of the existence of these events.

2. However, it must be noted that we can "see" only about $6 \%$ of the "stuff" that our universe is made of. Scientists don't know what the rest of the "stuff" is made of and have labelled it as "dark matter" and "dark energy."

- This means we are "not aware" of $94 \%$ of our own universe! For those interested, you can also do a Google search on dark energy and dark matter and learn more.

3. The scientific methods which have been developed over only the past few hundred years are still at a very early stage; even though science and technology has greatly expanded our "awareness" of the external world, according to Buddhism there is much more to be explored, i.e., our consciousness is still very limited.

- We have not been able to contact any life form outside the Earth, even though scientists now accept the existence of life outside the earth to be a certainty.
- Possible existence of life forms that exist in the "form-sphere" and the "form-less sphere" are not even contemplated at this time.

Also see, "Quantum Mechanics and Dhamma."

### 5.4.4 Expanding "Consciousness" by Purifying the Mind

## Revised December 18, 2020; August 28, 2022

According to the Buddha, expanding consciousness means to "see things as they are" (yathābhūta ñāṇa.)

1. Twenty-five hundred years ago, the Buddha achieved the ultimate state of mind and became "all-knowing" (or "perfectly conscious"). He learned about the boundless universe, the endless cycle of rebirths, and the complex process of cause and effect (Paticca Samuppāda), which sustains everything in the universe.
2. By developing scientific instruments (starting with simple telescopes and microscopes, we have now developed very sophisticated instruments), we have expanded our "awareness."

- For example, within the past century, we have expanded our awareness of the vast space around us, and now we know not only that our universe is possibly infinite in extent, but there may be other parallel universes as well. Yet, what science has achieved so far is nowhere close to the level achieved by the Buddha.

## 3. As humans, we may get close to the ultimate knowledge using the scientific approach someday well into the future.

- But we can get there in a lifetime by developing our minds by following the path the Buddha laid out.
- For all their impressive "material achievements," today's science and technology are still at very early stages concerning mental phenomena.

4. According to Buddha Dhamma, one is said to achieve full and clear consciousness (anidassana viññāna), i.e., that person will be able to "see the whole world as it is" when he/she achieves Nibbāna. See, \#11 of "Pabhassara Citta, Radiant Mind, and Bhavañga."

- This does not mean that a person who achieves Nibbāna will be an expert in relativity or quantum mechanics. Relativity and quantum mechanics provide only partial explanations, and even then, just for material aspects of the world.
- When one achieves the ultimate knowledge (Nibbāna), relativity or quantum mechanics become irrelevant since they account for only some of the impermanent and transient behavior. The matter is secondary to the mind.

5. Furthermore, people with good meditative skills can expand their consciousness by accessing higher meditative states (jhāna), i.e., controlling and focusing the mind.

- Even before the Buddha, ancient Yogis could access such meditative states via concentration meditation (Samatha Bhāvanā). For example, when Prince Siddhartha became an ascetic on the way to the Buddhahood, he first followed two well-known yogis at that time, Āḷara Kālāma and Uddaka

Rāmaputta. They achieve very high states of jhāna (that belong in the $r \bar{u} p a l o k a$ and arūpa loka) via concentration meditation.

- However, it will be explained in the future that these jhānic achievements of such yogis can be traced back to Buddha Kassapa, who lived before Buddha Gotama.

6. Even today, people from other religions could experience such states when they get deeply absorbed in prayer or any deep mental concentration; this has nothing to do with a particular religion. However, like everything else, such states are transitory; none of these states is permanent other than Nibbāna.

- And Nibbāna is not possible to attain via concentration meditation alone. For that, the unique Buddhist system of insight meditation (vipassana Bhāvanā) is needed whereby anicca, dukkha, anatta, Paticca Samuppāda (Dependent Origination or "cause and effect") and the Four Noble Truths (that the existence in samisāra is dukha, attachment or craving as the origin of the dukha, Nibbāna is the cessation of $d u k h a$, and the Eightfold Path is the path to the cessation of $d u k h a$ ) are understood.

7. To recap, according to Buddha Dhamma, "beings" exist in different planes of existence with different levels of consciousness; different planes can exist in different dimensions and different physical locations (such as planetary systems in this or other universes, for example). Beings are categorized according to their level of consciousness, and the humans lie somewhere in the middle (but still at a unique place, as is discussed in "The Grand Unified Theory of Dhamma")
8. Being "aware" or having consciousness is only one aspect of a living being's mental composition; in Pāli, consciousness is viññāna. The other mental constituents that make up a living being are feeling (vedana $\bar{a}$, perception (sañ̃̃̄̄), and mental volitions (sañkhāra). Consciousness (citta) is nothing more than "being aware." The other three, called mental factors (cetasika), arise with citta.

- For example, when we "see" an object, that is pure visual consciousness. Based on the visual, we next recognize the object based on our familiarity with the object. This is perception (sañ̃̄ $\bar{a}$ ).
- Then the mind may start forming an "expectation" if that object is desirable. That is when "pure citta" evolves into viñ̃̃̄ạna, which is "defiled consciousness." See "Viññāna (Defiled Consciousness)."

9. The chief characteristic of perception is the cognition of an object by a previous acquaintance. It is a perception that enables one to recognize an object. According to Abhidhamma, "Its procedure is likened to the carpenter's recognition of certain kinds of wood by the mark he had made on each; to the treasurer's specifying certain articles of jewelry by the ticket on each...".

- It happens automatically since the mind compares the observed image with the stored images of people we know and quickly makes the "match." (I was happy to see that scientist Jeff Hawkins has described this very well in scientific terms in his book "On Intelligence"; this book is a worthwhile read to see how scientists are slowly making progress!). Of course, the more frequently the memory is refreshed of the image, the easier it is to recognize.
- Sometimes people, especially young children, can recognize people and material objects from their past lives.

10. Modern neuroscientists and philosophers are struggling with how even to define these "mental characteristics." They have coined the term "qualia" to represent the subjective aspect of sense experience.

- In his book "Second Nature: Brain Science and Human Knowledge" (2006), Gerald M. Edelman, a neuroscientist, states (p. 14): ".The property most often described as particularly mysterious is the phenomenological aspect of consciousness, the experience of qualia. Qualia are, for example, the greenness of green and the warmness of warmth. But several students, myself included, go beyond these simple qualities and consider the whole ensemble of conscious senses or experiences to be qualia. Many consider explaining qualia to be the acid test of a consciousness theory. How can we explain not only qualia but all the other features of consciousness? The answer I propose is to look into how the brain works, formulating a global brain theory that can be extended to explain consciousness..."
- In Buddha Dhamma, the qualia are the mental factors (cetasika), and they are built-in to a sentient being and are strictly individualistic. By definition, they cannot arise just from inert matter, but scientists are trying to derive them from matter.

11. An interesting read on various ideas of different philosophers' and scientists' reasoning on how to explain consciousness and associated mental aspects such as qualia is given in the book "Conversations on Consciousness" by Susan Blackmore (2006).
12. Let us consider, for example, the visual recognition of a person, say Joe Smith. With the recognition of Joe Smith, "feelings" arise together with a whole host of mental volitions, which are fifty-two in total. We immediately feel a certain way about Joe Smith based on our experience.

- For example, if hatred, one of the possible 52 mental volitions, arises when we see Joe Smith, we could be acquiring bad kamma and let our mind cultivate those feelings further.

13. It needs to be emphasized that pure consciousness does not entail the recognition of an object. It is only a sort of awareness- awareness of the presence of an object. When the eye comes in contact with a color, for instance, blue, visual consciousness arises, which is awareness of the presence of color. But it does not recognize that it is blue. There is no recognition at this stage. It is perception (sañ $\tilde{n} \bar{a}$ ) that recognizes that it is blue. The term "visual consciousness" is a philosophical expression denoting the same idea conveyed by the ordinary word "seeing." Seeing does not mean recognizing. The same is true for other forms of consciousness.

- Viññāna, which incorporates all mental factors, including sañ̃̃̄̄, vedanā, etc., has all these mental factors in addition to pure awareness.

14. Using a somewhat different nomenclature, a "being" in the sense sphere can also be represented by just five "heaps of things" or aggregates (khandha), i.e., pañcakkhandhā (pronounced as "pañchakkhandha," pañca meaning five and khandha means a "heap"): consciousness (viñ̃̃āna), feeling (vedanā), perception (sañña), volitions (sañkhāra), and form or materiality ( $r \bar{u} p a$ ); see, "The Five Aggregates (Pañcakkhandha)."

- These five components co-exist; they are born together at conception. It is not possible to separate nāma from $r \bar{u} p a$ or the four mental aggregates from each other. Therefore, nāma does not arise from rūpa as scientists believe today; nāma and rūpa arise together from the moment of conception in the mother's womb.
- Nāma and rūpa (associated with a human) arise together from conception in the mother's womb. Here, nāma is the "patisandhi viñ̃ñạa" (or gandhabba), and rūpa is the zygote made by the mother's egg and father's sperm; see "Buddhist Explanations of Conception, Abortion, and Contraception."

15. The Buddha told his disciples that what he taught them was just a minute fraction of his knowledge about "this world." What he taught was sufficient to achieve Nibbāna and cut short the samisāric journey filled with dukha (unsatisfactoriness and suffering). He did not want people to spend their precious time in this human life studying things like the origin of the universe or the origin of life which would serve no purpose in achieving Nibbāna. The following passages are from the Simsāpa Sutta:

- Once the Buddha was staying at Kosambi in the Simsāpa forest. Then, picking up a few Simsāpa leaves with his hand, he asked the monks, "What do you think, monks: Which are more numerous, the few Simsāpa leaves in my hand or those overhead in the Simsāpa forest?"
- "The leaves in the hand of the Blessed One are few, Lord. Those in the Simsāpa forest are much more numerous."
- "In the same way, monks, those things that I have known with direct knowledge but have not taught are far more numerous [than what I have taught]. And why haven't I taught them? Because they are not connected with the goal, do not relate to the rudiments of the holy life, and do not lead to
disenchantment, dispassion, cessation, calm, direct knowledge, self-awakening, to Unbinding. That is why I have not taught them."
- "And what have I taught? 'This is dukkha... This is the origination of dukkha... This is the cessation of $d u k k h a \ldots$ This is the path of practice leading to dukkha's cessation: This is what I have taught. And why have I taught these things? Because they are connected with the goal, relate to the basics of the holy life, lead to disenchantment, dispassion, cessation, calm, direct knowledge, self-awakening, and unbinding. This is why I have taught them."

16. But nowadays, one may be justified to spend a little time convincing oneself that Buddha Dhamma is compatible with contemporary "scientific knowledge" because that will enable one to build faith in Buddha Dhamma.

- However, when one probes deeper into Dhamma, one realizes that it is not a matter of science proving Dhamma to be correct. Rather, as described by Dhamma, science is at a very early stage of discovering the world's true nature.

17. Let me close with an example of the difference between technological progress in expanding consciousness and the mind's purification. The modern world was unaware of microscopic living beings' existence until the advent of the microscope by Leeuwenhoek in the late 17th century: WebLink: WIKI: Antonie van Leeuwenhoek.

- However, a person who has developed meditation and attained higher jhānā can "see" such microscopic beings. There is this story in the Tipitaka about a bhikkhu who had developed abhiññā powers but had not yet attained Arahanthood. One day he was about to drink a glass of water when he realized that there were numerous microscopic living beings in the water. He tried to filter them out in vain and got depressed. The Buddha saw this and told him that "it is not possible to live "in this world" without hurting other beings; the only thing we can do is to attain Nibbāna as soon as possible and get out of this world."
- Thus one can attain much more "knowledge" about this world by developing the mind. We can probe deeper into the microscopic world using the scientific knowledge achieved over hundreds of years, but we can "see" much more by purifying the mind in a lifetime.

### 5.5 Consistencies with Science

- Second Law of Thermodynamics is Part of Anicca!

The following posts discuss cases where current theories of science are consistent with Buddha Dhamma.

- Quantum Entanglement - We Are All Connected
- Infinity - How Big Is It?
- Gödel's Incompleteness Theorem
- Truine Brain: How the Mind Rewires the Brain via Meditation/Habits
- How Habits are Formed and Broken - A Scientific View

### 5.5.1 Second Law of Thermodynamics is Part of Anicca!

## Revised January 12, 2020; re-written July 20, 2021

## Anicca - Inability to Maintain Things the Way We Like

1. As we saw in the post, "Anicca - True Meaning," anicca describes one of the three primary characteristics of "this world," namely, no matter how hard we try, "we cannot maintain things to our satisfaction in the long term."

- When things evolve in a way we don't like, we suffer. First, we suffer mentally. Then we have to work hard to try to change it to the way we like. It is a constant struggle.
- That is only the mundane meaning. The real suffering arises when we get rebirths that we don't like!
- But it is good to first contemplate the suffering that we experience due to our physical bodies (and people and things we like.)

## Physical World Naturally Evolve Towards Disorder

2. What does the Second Law of Thermodynamics say? It says, "things in a closed system go from order to disorder unless energy is put into the system to keep the order."

- Thus we can maintain a sort of stability (or "keep things the way we like them to be") by striving or working hard. This is part of "sañkhāra dukkha." See, "Introduction -2 - The Three Categories of Suffering."
- But as we get old, our ability to do that wanes, and ultimately we become too weak to do anything or die. It does not matter how much money we have accumulated. All sense pleasures lose their vigor as the body gets old, and money or will power cannot maintain them.

3. A successful business person could say, "look at all the wealth that I created. I have achieved what I wanted." It is a good accomplishment, but can he enjoy all that in the long term? How much effort does he make to keep them that way?

- Even all that money cannot maintain a simple thing like the taste of food when he gets really old, not to mention the fact that all that wealth will be left behind at death.
- However, when we are young, it SEEMS that we CAN maintain things to our satisfaction. That is why it is hard to explain anicca to a young person. A young boy will say, "look at the muscles I built over the past year by working out at the gym! I am invincible." A young woman will say, "I look much more beautiful now than I was a year ago."
- Yet, blossoming at around twenty or so years is just the beginning of a slippery slope. In the end all those strong muscles will fade, and the beautiful figure will sag and decay. That is the reality.
WebLink: YOUTUBE: Done Got Old

## Everyday Examples

4. We can see the effects of the Second Law of Thermodynamics at different levels. A nice hot cup of coffee will cool down with time, and we will have to re-heat to enjoy it again. An ice cream bowl will melt if not kept cold by putting it in the refrigerator, which uses energy to run.

- Mom will come and clean a child's room, only to find the next day that it is back to the chaotic state; she will need to go through all that work again to get it back to presentable condition.
- We build a house with a beautiful garden, only to find that we will have to do repairs to the home, and much work is needed to keep the weeds out of the garden and grass cut, etc.
- The Sun will power our planet for another few billion years, and then it will die. Long before the Sun dies, the Earth will get destroyed.
- Even our universe will "run down" in 15 billion or so more years.

## Anicca Is a Universal Characteristic

5. Thus, we can see that the concept of anicca is a universal characteristic of this world. Things can be maintained, EVEN WITH AN EFFORT, only up to a certain time, and NOT forever.

- The Second Law of Thermodynamics describes the impermanence or the "root cause" for anicca. Even though the scientists understand this impermanence, they do not necessarily PERCEIVE that in their minds with regards to themselves. That is the difference between "impermanence" and anicca.
- Just like a scientist who has contemplated on the Second Law of Thermodynamics, anyone who is trying to cultivate "anicca sañ$\tilde{n} \vec{a} "$ by contemplating on impermanence is nowhere close to Nibbāna; see, "Saññā - What It Really Means."
- Thus, like those young people mentioned above, we all have the wrong PERCEPTION that "we can maintain things to our satisfaction," i.e., we have the false perception of nicca, not the actual reality of anicca.

6. Even when our universe dies, many come into existence. This process has been going on for eternity, and so have we. We have been in the rebirth process forever.

- The problem is that most of those lives were not as good as this one; we have suffered unimaginably, and unless we get out of this predicament, such future suffering is not avoidable. That is the anicca nature; see, "Anicca - Inability to Keep What We Like."
- Of course, anicca has other related meanings too; see, "Anicca - True Meaning."

## Nibbāna is of Nicca Nature

7. The opposite of "anicca" is "nicca." Nicca nature means one will never be subjected to suffering. For a comprehensive discussion, see "Basic Framework of Buddha Dhamma."

- Therefore, the good news is that our minds can become free of this non-stop rebirth process by decoupling from this unstable material base. We are reborn in this "material world" because of our perception of "nicca," i.e., we believe that we CAN find some suitable place with permanent happiness in this world.
- Once we grasp the reality of "anicca," our minds will automatically start becoming free, and we will start feeling the nirāmisa sukha arising from this detachment from the material world; see, "Three Kinds of Happiness - What is Nirāmisa Sukha?."
- That is another way to look at reality and our choices.

### 5.5.2 Quantum Entanglement - We Are All Connected

## Revised January 21, 2016 (\#6); March 13, 2018; September 22, 2019; June 25, 2022

Quantum entanglement is the ability of two spatially separated "entangled particles" to be able to respond to each other instantaneously. This proven interconnectedness has Implications for the rebirth process.

1. When we get deep into Buddha Dhamma, we will see that the mind creates EVERYTHING in this world. That is why the Buddha said, "mano pubbangama dhamma.......", i.e., the mind is the precursor to everything. But let us proceed at a slow pace.

- By the way, dhamma is "what we bear" in this world ("darana deya" in Sinhala); this means absolutely everything in this world. And all dhamma are anatta, i.e., fruitless, or there is nothing substantial in any dhamma (it does not mean "no-self" or "anātma"); see, "Anicca, Dukkha, Anatta - Wrong Interpretations," and "Anicca - True Meanings."

2. Everything happens due to causes and conditions; see, "What is Kamma? - Is Everything Determined by Kamma?." Also, this world is not four-dimensional ( 3 space dimensions and time) as we experience, but is multi-dimensional; see, "What Happens in Other Dimensions." That is why we see only two realms (human and animal) out of the 31 realms of existence; see, "The Grand Unified Theory of Dhamma." Just because we cannot experience directly or is not proven by science YET is not reason to discard them. But the current string theories do predict a ten or 11-dimensional world.

- What can we explain with Buddha Dhamma? Everything in this world. See "Vagaries of Life and the Way to seek "Good Rebirths"," for some examples.
- Also, see "Origin of Life." This series explains how the mind creates EVERYTHING in this world.

3. Furthermore, science has been confirming many things that ordinary people rejected as "impossible" over the past few hundred years; and that activity started increasing over the past hundred years since the advent of quantum mechanics and relativity; see, "Dhamma and Science - Introduction." That should give us more confidence in Buddha Dhamma. That is saddhā or faith-based evidence.
4. Here, we will discuss yet another recent finding in science that makes the process of rebirth more easily "explainable." Please note that I am not trying to verify Buddha Dhamma by science. It is the other way around. I am saying that science is far behind Buddha Dhamma. Science is now trying to catch up just the material aspects of how this world works and has not made any significant progress on how the mind works.

- In the essay "Evidence for Rebirth," we saw that a person who dies in one geographical location is reborn in another. The consciousness does NOT transmigrate as is believed in some other religions. However, some form of energy leaving one place must instantly appear at another.
- What about the speed of the light barrier for anything or any information to travel, based on Einstein's Special Theory of Relativity? It turns out that we are in a unique time in history. Buddha's teachings are beginning to be, even if not confirmed, at least elevated to the level of possibility by Western science. For millennia, numerous people had strong enough faith to believe Buddha's words and commit their entire lives to pursuing Nibbāna. (Actually, it is not blind faith. If one studied the Dhamma / Abhidhamma carefully, one can verify that it must be true).

5. In 1935, Einstein, Podolsky, and Rosen published a paper that showed that if quantum mechanics is correct, then a particle can somehow "know" what another particle, even if separated from it by a large distance, is doing. Einstein derisively called this "spooky action at a distance" and dismissed the prediction.

Even though his theories led to quantum mechanics, Einstein was firmly opposed to quantum mechanics throughout his lifetime.

- However, in 1964, physicist John Bell proposed an experiment to test this concept. Those are experiments on "violation of Bell's inequality." Several experiments carried out since 1997 proved that Einstein was wrong. The experimenters created "entangled particles," which shared a wave function. In 1997 Nicholas Gisin did the first experiment with entangled photons, in which they were sent seven miles apart via optical fibers. When they reached the ends of these fibers, the two photons were forced to make random choices between alternative, equally possible pathways.
- There was no way for the photons to communicate with each other. Thus, "classical" physics would predict that their independent choices would bear no relationship to each other. But when the paths of the two photons were adjusted correctly and the results compared, the independent decisions by the paired photons always matched. There was no real way for them to communicate with each other. The responses were instantaneous, even though the two events were separated by about 26 milliseconds at the speed of light.

6. Since then, that same experiment has been repeated with electrons and ions as well. This effect is called the "quantum entanglement," It leads directly to other related concepts such as "holographic universe" and "interconnectedness." The conclusion is that entangled particles can be interconnected even if they are situated across the universe!

- In late 2015, "nonlocality of nature" or the violation of Bell's inequality was confirmed in three "loopholefree" experiments; see the pdf, "WebLink: PDF File: Wiseman-Death by experiment for local realism-Nature-2015."
- And the first of those experiments is: "WebLink: Hensen-Loophole-free Bell Inequality-Nature-2015."
- Details at "Quantum Mechanics and Dhamma."

7. The following fun video by Dr. Quantum illustrates the basic idea of quantum entanglement:

## WebLink: YOUTUBE: Dr Quantum - Entanglement

8. Quantum entanglement could be intimately connected (and can be "explained" easier) with a universe that is multi-dimensional (like the proposed 11-dimensional string theory). If you have read the post on "Consciousness Dependence on Number of Dimensions," it will be easier to follow my simple (and crude) illustration:

- Think about a two-dimensional "world," say, the kitchen floor, and consider an ant on the floor as a "two-dimensional being,"; which means we assume that the ant can see only those things that make direct contact with the floor. If a chair is there, the ant can see only four "impenetrable circles" where the chair's legs touch the floor. For the ant, those four "circles" are not connected. They lie far apart from each other. However, if we lift that chair, all four "circles" will be removed simultaneously. That means that, for the ant, this means that the four "circles" were "entangled" or connected to each other. Of course, we can see that they were connected via the rest of the chair in the third dimension, above the floor.
- Similarly, things that appear to us as "far apart" (say New York and Houston) may be connected via a dimension that we cannot see. A person dying in New York may be born instantaneously in Houston because those two "places" may have a direct path via a hidden dimension.
- Those "entangled particles" in \#5 above may travel far apart from each other. But they could be connected via a hidden dimension. Just like the ant in the above example is not aware of the rest of the chair, we are not aware of such hidden dimensions.

9. However, quantum mechanics is not restricted to working on "intellectual" problems such as above. Those are what the man-on-the-street calls "abstract stuff." Most of the "things" that we have grown accustomed to happen to be byproducts of quantum mechanics. Those vary from computers and cell phones to lasers and nuclear bombs.

- So, these new observations do indeed make more plausible the concept of a connection across the universe. But there is no point in wasting valuable time trying to find answers to questions such as the end of the universe or the beginning of life. That is what the Buddha advised.
- We are fortunate to be born in the human world, which is an infrequent event. See, "Rebirth Connection to Suffering in the First Noble Truth.") Thus, one should diligently work towards achieving liberation (Nibbāna). In realms below the human world, life is too painful, and life in heavenly worlds is too blissful for one to focus on working toward Nibbāna.

## Is the Universe Multi-Dimensional? - Another Emerging Possibility

It was Einstein's dream to work out such a Grand Unified Theory, but he was unable to do so. Many scientists are trying to accomplish this goal, and the newest theories are called string theories. No Grand Unified Theory exists yet, but the closest is a version of the M-theory's string theory. M-theory says that the universe is 11 -dimensional universe, even though we can see only four dimensions (including time). So, could there be life existing in other dimensions that we cannot observe? That is another possibility. I briefly discuss this possibility under the heading, "What Happens in Other Dimensions?." [Consciousness Dependence on Number of Dimensions]

## Consciousness and Quantum Mechanics

March 13, 2018: I have started a new section, "Quantum Mechanics and Dhamma," where a new interpretation of quantum mechanics is presented. I explain why quantum theory cannot explain consciousness.
Next, "What is Mind? - How do we Experience the Outside World?", .......

### 5.5.3 Infinity - How Big Is It?

## Revised June 3, 2018; January 19, 2020; August 9, 2021; September 23, 2022

Infinity is a concept that is hard to comprehend. The rebirth process (or samisāra) does not have a traceable beginning, i.e., it extends back to infinity. Mathematicians have concluded that there are many levels of infinity!

## Introduction

1. What is the largest number you can think of? Well, add one, and you have a larger number! There are some large numbers that we are aware of. With record budget deficits of the developed nations in trillions of dollars (and the total nominal value of all the derivatives traded around the world approaching a thousand trillion dollars, or a quadrillion dollars), trillion and quadrillions are indeed large numbers.

- Even though a trillion rolls off the tongue, not very different from a billion, a trillion is much bigger than a billion. Spending a billion dollars a day will take a thousand days to spend a trillion dollars.

## How to Represent Large Numbers?

2. The number of molecules in a cubic centimeter of gas is $2.7 \times 10^{18}$ or $2.7 \times 10^{\wedge} 18$ (this is a simple way to express big numbers; instead of 10000 , we write $10^{4}$ or $10^{\wedge} 4$ ). Since electrons are even smaller, you would think there would be a humongous number of electrons in the observable universe; the estimated number is around $10^{87}$. That is, of course, a huge number, but it is not infinity by any means.

- That should give you an idea of the power of an exponent. Each time the exponent increases by one, the number becomes ten times bigger. So, even though $10^{87}$ may not look that big compared to $10^{18}$, it is a
humongous increase. Another large number should be the distance from the Earth to the edge of the observable universe, estimated to be about 46 billion light-years or around $10^{23}$ miles. Even though such large numbers are hard to be contemplated in our minds, they are all finite.

## What Is a Googol?

3. There are some famous large numbers. A Googol is $10^{100}$, which is unimaginably vast compared to even the number of electrons in the universe $\left(10^{87}\right)$. As an aside, the internet company Google was to be named Googol, but someone made a mistake, and Google was the name given. A Googolplex is a whopper; it is $10^{\text {Googol }}$ or $10^{\left(10^{\wedge} 100\right)}$. There are many such "famous large numbers."

- Yet, you can add one to any of these large numbers and always get a bigger number. Therefore, no number, however large, is still finite.
WebLink: YOUTUBE: Googol and Googolplex by Carl Sagan

## Infinity - Beyond Any Conceivable Number

4. So, the mathematicians coined the term "infinity" to denote an indefinitely high number; The word comes from the Latin "infinitas" or "unboundedness." Since infinity is uncountable, it has some strange characteristics: whatever you add to (or multiply by) an infinity (even if it is another infinity), you still end up with infinity.

- The famous German mathematician David Hilbert illustrated the "abnormal" properties associated with infinity using the idea of an "infinity hotel," which has an infinite number of rooms. The "infinity hotel" always has a vacancy: the management can always ask the person occupying the Nth room to move to the $(\mathrm{N}+1)^{\text {th }}$ room, $(\mathrm{N}+1)^{\text {th }}$ room to move to the $(\mathrm{N}+2)^{\text {th }}$ room, and so on, and thus give the $\mathrm{N}^{\text {th }}$ room to the new guest. Even if an infinite number of new guests arrive, the hotel can accommodate all of them!

## Infinity Is Real

5. That is not to say that infinity is a useless or bogus concept. The arguments described above are valid. Mathematicians cannot do many integrations without infinity. Physicists deal with infinity all the time (but they try to end up with finite physical values).

- The concept of infinity is real (and weird). For example, a line of any finite length has infinite points, whether it is an inch or thousand miles. The invention of calculus by Newton and Leibniz helped handle some problems arising from such situations.

## Space and Time - Infinite!

6. In the physical sense, infinity is a rather vague concept meaning "larger than anything that could in principle be encompassed by experience." For example, space is infinite, and as far as our sophisticated instruments allow us to "see," there is no end.

- Our universe is possibly spatially infinite since scientists can "see" only to a finite extent. So, space is unlimited.
- What about the time? If our universe started at the Big Bang, that inflationary theory says multiple, parallel universes exist.
- According to the "cyclic theory" model, an alternate theory, the same universe comes to a "Big Crunch," which leads to another Big Bang, and the whole process keeps repeating. So, there is no beginning to time either; time is infinite.
- By the way, both those theories are not correct, according to Buddha Dhamma. Individual star systems ("Cakkā$v a \bar{a} l a "$ or "Cakk $\bar{a} v a \bar{a} a ") ~ u n d e r g o ~ t h e ~ b i r t h-d e s t r u c t i o n ~ c y c l i c ~ p r o c e s s . ~$
- I will write more in the future, but see the discussion: "WebLink: Multiverse: Different Physical Laws and Different Dhamma?." The lifetime of a Cakkāvāta (like our Solar system) is called a Mahā Kappa (great eon) in Buddha Dhamma.

## Sainsāra (Rebirth Process) Goes Back Infinite Time!

7. The Buddha used a great eon as the measurement unit to help his followers visualize the enormous length of saimsāra. A great eon (mahā kalpa [in Sinhala] or mahā kappa) is said by the Buddha to be longer than the time it would take a man to wear away a mountain of solid granite one yojana (about 7 miles) around and one yojana high, by stroking it once every hundred years with a silk cloth.

- These days scientists use the word "eon" to denote the duration of a universe (from the "big bang" either to a "big crunch" or just fading away). But a Maha Kappa means the lifetime of our Solar system. Our universe has "no beginning." I believe that in the future, science will conclude that the "Big Bang Theory" is not correct (which says that our universe came into existence from nowhere in a "Big Bang.")See the discussion: "WebLink: Multiverse: Different Physical Laws and Different Dhamma?."

## Another Analogy of the Buddha

8. One day, the Bhikkhus asked the Buddha how many "great eons" had already passed and gone by. The Buddha told them, "Suppose, Bhikkhus, there were four disciples here, each with a lifespan of hundred years, and each day they were each to recollect a hundred thousand great eons. There would still be great eons not yet recollected by them when those four disciples pass away at the end of a hundred years. Because, Bhikkhus, this samisarra is without discoverable beginning."

- A fascinating book about such hard-to-grasp ideas (in science) involving infinity is "The Beginning of Infinity: Explanations That Transform the World" by David Deutsch.
- Infinity is a mind-boggling concept. For example, one question that comes up frequently is the following. We have had infinite time to attain Nibbāna. So, why have all living beings not attained Nibbāna yet?
- I have discussed that in "The Infinity Problem in Buddhism."

## Summary

9. Each of us (including all living beings today) has "lived" for an infinite time. There is no traceable beginning to life, per Buddha. See "Origin of Life - There is No Traceable Origin."

- During much of that time, each of us suffered much more than any brief stretches of pleasure. That is because births in "good realms" (like human, Deva, and Brahma realms) are rare. See "Rebirth Connection to Suffering in the First Noble Truth."
- Most of our past births had been in the four lower realms (including the animal realm), where suffering dominates.
- That is why the Buddha admonished us to strive to attain Nibbāna to avoid such harsh suffering in future rebirths.

Detailed discussion in the subsection, "Origin of Life."

### 5.5.4 <br> Gödel's Incompleteness Theorem

## Revised March 6, 2021; \#2 added March 24, 2021

## Introduction

1. Mathematician Kurt Gödel, in his Incompleteness Theorem, proved that it is impossible to find complete "truth" or "complete explanations" of a system from WITHIN a system.

- No theory that any scientist discovers is, thus, cannot be proven to be the "ultimate truth." This is another way of saying that one cannot comprehend the complete picture of the system IF one is within the system. Then only parts of the system can be studied.

## A Simple Description of Gödel's Incompleteness Theorem

2. The following video provides a simple explanation without going into details.

- At 8 minutes, he says, 'What is outside 'this world' is not 'matter', not energy, not space, and outside of time." It may be possible to get a "complete and self-consistent picture only from the "outside" That is Nibbāna.
- The Buddha, once attaining Nibbāna, was able to "look from the outside and "see things as they are."
- No one else, looking from within can EVER figure out the ultimate truth about this world.
- The second video below is interesting. He assigns "outside of the universe" to God. Other than that, his conclusion is perfect.

## Wrong Conclusion

WebLink: youtube: Kurt Gödel's Incompleteness Theorem and the Origin of the Universe (part 2)

- The key question regarding a "God" or "Creator" is: Is He (God) inside the system or outside? If He is inside, then He is also subjected to Gödel's theorem. If He is outside, how can He affect things from the outside? "Inside" and "outside" are mutually exclusive!

## Nibbāna Is Outside This World

3. The Buddha transcended "this world" by developing his mind; see "The Grand Unified Theory of Dhamma" for a description of the 31 realms of existence.

- This is again something that a human being cannot prove. One accepts, as I have, of the truth of that by examining the evidence: that the Buddha was able to explain so much about "this world" 2500 years ago. By "this world," it means not only the Earth or even this universe but also total existence.
- Of course, the Buddha lived in this world until the death of the physical body. However, his mind had transcended this world. Attaining Nibbāna is reached at the Buddhahood or the Arahanthood. That Nibbāna would be complete at Parinibbāna at the death of the physical body.

4. The only way to disprove what I stated above is to find inconsistencies within the Buddha Dhamma (this is the same method used by the scientists in assessing scientific theories). I have not found any. See, "Buddha Dhamma: Non-Perceivability and Self-Consistency."

- If you find anything inconsistent about the Buddha Dhamma, that is because there have been numerous "alterations" over the past 2500 years. But if you find any inconsistencies at this site, please let me know. If there are any, that is due to my possible carelessness or ignorance, and I would fix them.
- In fact, this is the only way to get rid of any inconsistent "bits and pieces." Just like if you have a piece of a puzzle at the wrong place that will only hinder the progress of solving the puzzle, having wrong information somewhere will only slow down our progress in "figuring out the pure version of the Buddha Dhamma."
- However, I do believe that the "big pieces of the puzzle" are in correct places here.

## I Hope Scientists Would Become Interested in Buddha Dhamma

5. Kurt Gödel would have really enjoyed Buddha Dhamma. It would have been tremendous if he was alive to go through the material here and point out any inconsistencies. Many of the scientists that I admire, including Einstein, Feynman, Gödel, Heisenberg, de Broglie, Sagan, and many more, would have easily grasped the message of the Buddha. Unfortunately, they never came across the pure Dhamma; David Bohm came close.

- I hope the current generation of scientists and philosophers will get an opportunity to examine the pure Dhamma.

6. I do not want wrong impressions to come out of this post. I love science and physics in particular. Before discovering the pure Dhamma, physics was my passion, and I still try to keep up with new findings.

- Yet, I have realized that discovering how inert matter behaves is a minute fraction of the whole existence's knowledge. We cannot even discover everything about "matter" until we start finding out more about the "mind." The Buddha said, "mano pubbañgamā dhammā..." or "the mind precedes everything in this world....".

7. Let me give some examples. Albert Einstein introduced his Special Theory of Relativity in 1905 and his General Theory of Relativity in 1915. The first showed that Newton's Three Laws of Motion were only approximately correct, breaking down when velocities approached that of light. The second showed that Newton's Law of Gravitation was also only approximately correct, breaking down when gravitation became very strong.

- We could not see anything wrong with Newton's laws of motion until we developed technologies that transcended our 'level of consciousness"; see, "Expanding 'Consciousness' by Using Technology." They worked well within our "probing sensitivities." Even today, scientists do not use relativity equations to map out rocket trajectories to the Moon; Newton's equations are good enough to that.
- In the same way, everything that science discovers expands our horizons but never will provide the "ultimate answers." We can find "everything about this world" just by purifying our minds; see, "Expanding 'Consciousness' by Purifying the Mind."
- The above statements may not mean much right now. However, I ask you to be patient and go through the material at the website, and gradually you may realize what I am trying to say.

## Testable Predictions

8. A "good theory" is all about "testable predictions." As I stated on the home page, I try to present material on Buddha Dhamma as a "theory on how nature works." As I pointed out in many essays, many of the "predictions" or "statements" about this world's nature have proven to be correct by science over the years, especially during the past few hundred years.

- I can make another prediction just for the records. Darwin's theory of evolution will be proven to be only partly correct and only for limited spans of time. The theory of evolution is correct only over the recent past of this planet, where we can trace past events using radiocarbon dating techniques. The oldest dates that can be reliably measured by radiocarbon dating go back to around 50,000 years ago. Even if we put the limit at a million years, that is only a tiny fraction of over four billion years lifespan of the planet.
- What is correctly stated in the theory of evolution is that species arise when conditions become suitable for them to arise AND for them to survive.

## Some Aspects of Buddha Dhamma Not Amenable to Mundane Interpretations

9. However, it is dangerous to talk about concepts that are not amenable to our minds. That will lead only to "loss of faith." It would be impossible to explain to someone who time-traveled to the present time from several hundred years ago how a light bulb can light up just by flipping a switch. There is no way for that person to "grasp" the concept of an electric current; he/she would believe it to be a "magic trick."

- The Buddha never revealed any details of nature that were not discernible to at least his top disciples at that time. Let me give an example from the Tipitaka. One time Ven. Moggallana, who was only second to the Buddha in abhiñ̃̃̄̄ (supernormal) powers, saw many beings in the peta realm near the Giijakuta mountain. Beings in the peta realm have invisible bodies that only those with abhiññ̄ $\bar{a}$ powers can see.
- So, none of the Arahants who had abhiññā powers could see those petas, and they told Ven. Moggallana, "how come we cannot see them?." Ven. Moggallana told them to ask the Buddha. The Buddha told those Arahants that he had actually seen them previously. When the bhikkhus asked why the Buddha did not mention it to them, he told them that, "If I tell you something that you cannot verify by yourselves, that will only lead to doubts. That is why I did not mention it. But now that Moggallana has seen them, there is at least one person there to confirm it."
- See, "Buddhahood Associated Controversies" and "Buddha Dhamma - A Scientific Approach."

10. Even today, there are people with abhiñ̃̃ $\bar{a}$ powers that can see some of these beings in other realms. My teacher Thero says he can see them, and I have no reason to doubt them. Developing abhiñña powers requires being able to get to the fourth jhāna AND then working to develop those powers. So, it is not an easy task. If I ever get to that stage, I will mention that here.

- Developing abhiññā powers or evenjhānā is not necessary to attain Nibbāna. One can even attain the Arahanthood without developing any jhāna ahead of time.
- It is important to experience the "cooling down" of Nibbāna even without getting to the Sotāpanna stage. That itself provides an incentive to continue with the practice; see, "How to Taste Nibbāna."

## References

For those who would like to read more on this subject, the following references could be useful. However, I do not encourage anyone to "go off track." I included this section to point out that all existing scientific theories are incomplete because they all were generated within the system. The Buddha was able to transcend "this world" and thus was able to provide a complete world view.

### 5.5.5 Truine Brain: How the Mind Rewires the Brain via Meditation/Habits

Revised December 20, 2016; September 21, 2020; October 21, 2022
The triune brain model of the brain is no longer widely discussed. However, it provides a simple way to look at three primary brain functions, as we will see below.

## Triune Brain - Three Major Components of the Brain

1. Triune means "consisting of three." The human brain, the most advanced of all animals, shows how different animals have "different levels" of consciousness.

- The brain has three distinctive regions (see the figure below): (1) brain stem (labeled "reptilian" in the figure), (2) limbic system, (3) cerebral cortex or just cortex (labeled "neo-cortex" in the figure).
- Details in Ref. 1. We will summarize very basic features of the "three parts" of the brain.

## Reptilian Brain (Brain Stem and the Cerebellum)

2. The brain stem (reptilian brain may be a misnomer, since reptiles have limbic systems) is the most primitive and all developed animals have it. It governs automatic physiological functions such as the heart rate, respiration, digestion, etc.

- And that is all the lowest-ranked animals can do (automatically). They are almost like fully-automated robots.

## The Limbic System

3. Animals with somewhat higher intelligence have a limbic system in addition to the brain stem. But still no triune brain.

- It coordinates sensory reception, memory, and unconscious emotional reactions. These animals with limbic systems - like snakes and lizards - react spontaneously to external influences.
- Humans tend to do that too. In case of a threat, the limbic system instantaneously and automatically makes the "fight or flight" decision. We could say that automatic mano sañkhāra arise via the limbic system. See, "Sañkhāra - What It Really Means."
- It is pretty clear from the definition of an Arahant that even this instantaneous response can be entirely tamed by cultivating wisdom (pañ̃ $\bar{a}$, ) i.e., by following the eightfold path. An Arahant's mind would not attach to any ārammana.

## The Cerebral Cortex (Neocortex)

4. The cerebral cortex (learning brain; neo-cortex in the figure) is the most advanced part of the brain; can make "rational decisions" by contemplation but it is time delayed. Therefore, it is called the "thinking brain."

- The cortex is responsible for language capability, logic, reasoning, learning and critical thinking, the good stuff. All primates have it, but of course, humans have the largest.
- In other words, we generate vacī and kāya sañkhāra with the help of the neocortex.
- In contrast, even higher animals like apes and elephants have limited capabilities. However, they are not "robots," as clearly illustrated by this elephant:
- By controlling our vacī and kāya sañkhāra, we can change our gati. This is the "modern scientific rationale" behind the basis of Buddha Dhamma. See, for example, "9. Key to Ānapānasati - How to Change Habits and Character (Gati)."

5. All our sensory inputs are processed in the neocortex before they are sent to the hadaya vatthu or the "seat of the mind" in the gandhabba close to our physical heart.

- Since it takes time for our brains to analyze the "incoming data," typically there is about a 100th of a second delay between incoming sense inputs and our mind generating thoughts about that sensory input.
- The brain can handle only one sensory input at a time. This means it can handle only about 100 sense inputs in a second. So, even though our minds generate an initial response quickly, the follow-up "thoughts" are delayed due to this "processing delay" in the brain.
- This process is discussed in detail in "Citta and Cetasika - How Viññāna (Consciousness) Arises."
- That pre-processing is minimal even in "higher animals" with small cortexes, like dogs and apes. This is why humans are unique. We have a large cortex that slows the response time and also helps us "analyze the situation" rationally.

## Ways to Improve Brain Functionality

6. Neural pathways in the brain are strengthened by:

- Repeated application (meditation included). Repeated activity forms both good and bad habits as we discussed in several posts, and is the key to molding the character (gati); see, "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsavā)," and other related posts.
- Good foods and regular exercise increase the production of Dopamine and other "good" chemicals.
- Exercise and meditate! It will keep you healthy and alert; see ""Spark' by John Ratey" for information on the value of a good exercise program.

## Brain Plasticity

7. Until about the late 1980s, there was wide belief that one had just to live with the brain that one was born with. But since then, the ability of the brain to change (neuroplasticity of the brain) has been demonstrated, and studies on the effects of meditation on the brain have become an active research field.

- Of course, 2500 years ago, the Buddha said that the mind is the precursor to everything. The mind does not arise from the brain. It controls all body parts, including the brain. See, "Brain and the Gandhabba."
- The key is that insight meditation should DRASTICALLY change neural wiring. However, there have not been any brain scans of someone who has cultivated the "correct versions" of Satipatthāna and Ānāpānasati meditation.
- Other posts at the site describe this "re-wiring" of the cortex that leads to change in our gati. See, for example, " 9 . Key to Ānāpānasati - How to Change Habits and Character (Gati)."

## Effects of Meditation on the Brain

8. As shown in the references below, there is compelling scientific evidence that even mundane versions of meditation improve both the cortex AND the limbic system.

- Those studies show that basic Samatha meditation helps, but Mettā Bhāvanā (compassion meditation) is particularly effective.
- It must be noted that Tibetan Samatha (breath meditation) or Mettā Bhāvanā (mundane version) are anāriya versions. For the Ariya versions, see, "6. Ānāpānasati Bhävanä (Introduction)" and " 5 . Ariya

Mettā Bhāvanā (Loving Kindness Meditation)." I am sure that a brain scan of Ariya (Noble person) will yield more revealing results.

- For example, meditation also affects breathing patterns (thus, the brain stem). Therefore, meditation affects overall brain function. An Arahant can stop breathing for up to 7 days in Nirodha Samāpatti. It will be extremely interesting to see a brain scan of an Arahant.

## The malleability of the Neocortex and the Limbic System

9. The following case illustrates the complex role played by the brain. A developed left brain (of the neocortex) indicates compassion for others and enhanced happiness for oneself, and a relatively larger right side indicates an aggressive character.

- Here is the link to a video showing the results of brain scans of an advanced meditator who had done loving-kindness meditation for an extended time compared to 150 non-meditators.

## WebLink: YOUTUBE: Matthieu Ricard: The habits of happiness

The discussion on the brain scan data is from about 17:00 to about 18:20 minutes if you don't want to watch the full video.

- We must also remember that Tibetan loving-kindness meditation is an anāriya version of the Mett $\bar{a}$ Bhāvanā. See "5. Ariya Metta Bhāvana (Loving Kindness Meditation)."

## Humans Have Control Over Their Lives

10. Furthermore, we are not programmed by our genes, environment, or even our past kamma. However, all of those can affect our destiny. The most powerful is our mind. In other words, citta niyama dominates kamma niyama.

- The saying goes, "you can do anything you put your mind to." This is the factual basis of free will.

11. Even though scientists are making some progress regarding the mind, the brain is not the mind, just as the physical eye is not the cakkhu pasāda rūpa; see "Manomaya Kaya (Gandhabba) and the Physical Body," and other related posts. Yet it is essential to keep the physical eye (and other physical sense faculties) and the brain in good condition for the whole body and the mind to work properly.

- Finally, the triune brain model is no longer widely discussed. However, it provides a simple way to look at three primary functions of the brain.

## How Habits are Formed and Broken - A Scientific View

Revised November 26, 2018; re-written October 11, 2022; re-written October 21, 2022
Understanding how gati (habits/character) can be changed is the key to cultivating Ānāpānasati/Satipatṭhāna meditations.

## Breaking Habits With Ānāpānasati - Simple Explanation

1. The verse "..sō satō vā assa sati, satō vā passa sati. Dīghaì vā assasanto 'dīghamं assasāmī'ti pajānāti, dīghaì vā passasanto 'dīghaì passasāmī'ti pajānāti; rassaim vā assasanto 'rassam̀ assasāmītti pajānāti, ......" appears repeatedly in the "WebLink: suttacentral: Ānāpānasati Sutta, (MN 118)" and "WebLink: suttacentral: Satipatthāna Sutta (MN 10)."

- A simple explanation is: There are certain "bad habits" (that lead to sustaining the rebirth process) we must remove. That is done via "taking in the factors of the Noble Path" and "expelling the opposing factors in micch $\bar{a}$ paths."
- See also "7. What is Ānāpāna?" and "Ānāpānasati Not About Breath - Icchānañgala Sutta."

## Dīghaim and Rassaím - Strong and Weak Gati

2. These are specifically gati to attach to various worldly ārammana and generate kamma bija that can perpetuate the rebirth process among the 31 realms.

- Some gati are firmly entrenched in our minds due to Samsaric habits cultivated over long times (dīghaim.) They are more challenging to get rid of. Then there are others cultivated over shorter times (rassami) that are relatively easy to eliminate.
- As we have discussed, getting rid of all such gati is the key to attaining Nibbāna.
- Once getting to the Sotapanna stage, one can cultivate Ānāpānasati/Satipatṭhāna Bhāvanā to make dīghaì to rassaì transition and eventually get rid of all such gati.

## Key Steps Recommended by the Buddha

3. The Buddha said to follow the following procedure to break a bad habit and instill a good habit:
i. understand the reasons why a particular habit is detrimental,
ii. stop engaging in activities that enhance the habit,
iii. deviate the mind from such harmful activities by focusing on opposing beneficial activities,
iv. contemplate the "release" or "cooling down" that has already resulted by following the above procedure, strengthen the resolve to stay on course, and keep doing (i) through (iii).

With time, the bad habit(s) will disappear, and the good habit(s) will take hold. There comes a time when one will automatically follow this procedure; it becomes a "way of life."
4. The reasoning behind this is based on the key factors that we discussed in the previous posts; see "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsavā)" and "Habits, Goals, and Character (Gati or Gathi) ":

- We do many things automatically (i.e., without being mindful or without deliberate thinking); these are done via the habits we formed during this life or even from previous lives.
- There are both good and bad habits. We want to keep and cultivate good habits and discard bad habits.
- Changing (cultivating) habits first requires some "external adjustments" like one's physical environment, friends, etc., and, more importantly, the four steps listed above.

5. As I pointed out in the posts on the manōmaya kaya (gandhabba) and physical body, our physical body is "prepared" by the kamma seed that was the cause for this life to arise. But the manomaya kaya is constantly making "adjustments" to the physical body based on the current status of the mind.

- Many kamma vipāka are "built-in" even at conception; some may be avoidable by taking care of the body (exercise, food, etc.), and the mind (contemplation, meditation, etc.), but some strong vipāka may not be avoidable. We will never know when cancer, an accident, or even a natural calamity can drastically change our lives; this is anicca, "the inability to maintain our lives the way we would like to."
- Another factor we need to remember is that our "sampāaric habits" are built-in. We keep changing/adding such habits as we grow up, influenced by our family, friends, and society. Thus one's "character" (gati; pronounced "gathi" as on "both") is in constant flux, either by choice or influenced by the environment.

## Critical Role of Vacī Saíkhāra in Formation/Elimination of Gati

6. Our thoughts, speech, and actions are based on our gati (habits/character.) Whether we automatically attach to an ārammaṇa depends on our gati. If we like that ārammaṇa, "joyful feelings (samphassa-j $\bar{a}$ vedanā") arise, and we attach to it ("samphassa-j̄̄-vedanā paccayā taṇhā."

- Once the mind attaches to an ārammaṇa, it starts thinking about it unconsciously (manō sañkhāra arise.) That is immediately followed by conscious thoughts (vaci sañkhāra) where we start planning, and then we may speak (more vaci sañkhāra) and even act (with kāya sañkhāra) to enjoy that ārammaṇa. That will lead to strengthening that gati.
- But if we stop such vaci sañkhāra at early stages (by being mindful of our thoughts), then that gati to attach to such an ārammaṇa will reduce with time and will go away at some point.
- On the other hand, if we willingly cultivate vaci and kāya sañkhāra to "enjoy that ārammaṇa," that will strengthen the gati.

7. Those last two bullets highlight the basis of $\bar{A} n \bar{a} p a \overline{n a s a t i / S a t i p a t t ̣ h a ̄ n a ~ B h a ̄ v a n a \bar{a}}$. The following chart illustrates that.

- Download/print the chart: "Role of Upādāna in Ānāpānasati."
- It is essential to realize that Pațicca Samuppāda and kamma generation starts with an ārammaṇa. See "Difference Between Tanhā and Upādāna" and "Icchā (Cravings) Lead to Upādāna and to Eventual Suffering."

## Sabbakāya Patisamivedī - Becoming "Sensitized"

8. As we progress on "being mindful," we will be able to "catch" immoral thoughts, speech, and action progressively earlier.

- For example, first, one will realize a wrong action after it happened. Then one will realize it while it happens and will stop it. That is the stopping at the strongest "kāya abhisañkhāra" stage.
- At the next level, one will realize an inappropriate speech after the fact, while speaking, and before words start coming out.
- As progress is made, one will "feel" immoral thoughts (vaci abhisañkhāra) starting to build. With more practice, one will become aware of such abhisañkhāra arising early. Eventually, even bad mano sañkhāra will stop arising once the gati (and related anusaya) is removed.
- That is what is meant by the verse, '"sabba kāya paṭisamived̄̄ assasissāmī'ti sikkhati, 'sabba kāya paṭisamived̄̄ passasissāmī'ti sikkhati" in Ānāpānasati/Satipaṭthāna. Paṭisamived̄̄ means "becoming acutely aware/sensitive" of one's mistakes; here, "sabba kāya" means twelve types of kāya: cakkhu kāya, rupa kāya, ...mano kāya, dhamma kāya. That is "being mindful."
- See "Kāyānupassanā - The Section on Habits (Sampajānapabba)."

## Repercussions of Immoral Gati

9. As long as we have gati (habits/character) to attach to various ārammana, we will engage in immoral thoughts, speech, and deeds. That will perpetuate the rebirth process.

- The danger is especially getting rebirths in an apāya. We can see suffering in the animal realm, even if we cannot "see" other realms.
- Understanding that will also lead to the following realization:
(i.) No "soul/ātman" travels the rebirth process (removal of sakkāya diṭthi.)
(ii.) One creates the causes for future rebirths.
(iii.) As long as one craves worldly things, another existence (bhava) will be grasped at the cutipatisandhi moment.
(iv.) Until we get rid of "apāyagāmi gati," rebirth in an apāya is not only possible but inevitable.

## Recent Scientific Studies on Habits

10. Beginning in the early 1990s, scientific investigations in several fields (effects of meditation on the brain, behavioral studies on animals and humans, neurology, etc.) have come to similar conclusions.

- We will discuss these in detail in the future, but I just want to highlight the main similarities. Furthermore, discussing how the mechanism occurs in the brain provides an alternative way to visualize these changes.
- We are indeed fortunate to live at a time when we have evidence from science to provide additional evidence.
- See "Triune Brain: How the Mind Rewires the Brain via Meditation/Habits."

11. In science, the key is in the neurons in the brain and how we can train our neocortex to fire the right sets of neurons more frequently. The "frontal lobes" of the neocortex are the command center for brain activities.

- The frontal lobes can be visualized as the boss. If it is a lazy boss, it will just assign duties to the limbic system to carry out things "as usual."
- But if the boss is energetic and always looking for ways to "improve things," they will start investigating new approaches. And once better approaches are found, it will get them "hard-wired," and they will essentially become the "new limbic system."
- This is the key to "developing a new you" by discarding bad habits and developing good habits. Essentially you need to get the frontal lobes to be an active, energetic boss for the brain.

12. Dr. Jeffrey Schwartz is a psychiatrist specializing in treating Obsessive Compulsive Disorders (OCD) and has pioneered using "habit makeovers" to treat OCD. He has written several books, but I highly recommend the two books, "The Mind and the Brain" and "You are not Your Brains."

He has developed a "Four Step" method to change one's habits that give rise to OCD:

1. Identify the problem area.
2. Recognize the need to change.
3. Deviate from automatically "going along" with old ways and re-direct attention to "new paths."
4. Re-assess the situation, and keep working on accelerating the process.
5. He has kept records of his patients' brain scans, which clearly show the improvements in the brain with time, and of course, most patients can get rid of their compulsive behavior.

- The key is to slow down the "firing of neurons" associated with a bad habit and to increase the firing of neurons associated with an opposing good habit.
- There is a rule called Hebb's rule that says, 'neurons that fire together, wire together'. The more one keeps doing a particular activity, a set of neurons start to fire together. That neural connection gets stronger by the day. It is just like strengthening one's arm by "doing more liftings" with it.
- In the same way, when one decreases the use of a particular activity, the set of neurons allocated for that activity gets weaker, fewer neurons participate, and eventually, it loses being a habitual act.

14. Here is a figure from Dr. Schwartz's book, "The Mind and the Brain" (p. 362), that illustrates the "rewiring" of a new network in the brain and the concomitant weakening of a network for an undesirable habit (click to open it):

## WebLink: PDF download: Habit Formation Figure

This figure explains how a patient with an obsessive disorder to wash his hand constantly got rid of that habit by WILLFULLY stepping outside to the garden when he got the urge to wash his hands. As he kept doing it, the wiring to "wash hands" weakened. Instead, wiring for "stepping outside" got more assertive, and eventually, he lost the compulsive urge to wash his hands too often.
15. The same principle has been used to eliminate other annoying habits and severe disorders. We can use the same procedure to stay away from immoral habits and cultivate moral habits; this is the basis of "ānapāna," see "9. Key to Ānāpānasati - How to Change Character and Habits (Gati)."

### 5.6 Inconsistencies with Science

## Revised March 4, 2018; December 16, 2020

Previous title "Abhidhamma via Science", renamed to "Inconsistencies with Science" on March 4, 2018. Reinstate on February 16, 2021 after revision at "Abhidhamma via Science".

1. We all are impressed by the scientific advances made during the past 100 years or so making our lives easier and more productive. I am actually a cheerleader for scientific and technological advances.

- Physics had been my passion since high school days, and that changed when I started learning Buddha Dhamma several years ago.
- I still love and work on topics of interest in physics (and science in general). Fortunately, I am finding that those two interests are not mutually exclusive, and there is significant overlap. In fact, this section is the result of my two overlapping interests.

2. The following posts discuss cases where current theories of science are not consistent with Buddha Dhamma. I believe that science will recognize the primary nature of the mind in the future, and will discard the current notion that the mind (consciousness) arises out of inert matter.

- Neuroscience says there is no Free Will? - That is a Misinterpretation!
- The Double Slit Experiment - Correlation between Mind and Matter?
- Vision (Cakkhu Viññāna) is Not Just Seeing
- Mystical Phenomena in Buddhism?
- Buddhism and Evolution - Aggañña Sutta (DN 27)

Many other issues relating to life discussed in the section: "Origin of Life"
3. Despite the advances in science and technology, there is much about the human mind that science does not understand, and has not even begun to understand. Western science is based on the five physical senses, leaving out the most important one, the mind.

- At the present time, in 2016, scientists have the wrong view that consciousness originates in the brain.
- All scientific theories relating to the mind are based on this wrong hypothesis. However, Buddha Dhamma says not only that the mind is a sense of its own, but it is the most powerful of all six senses.

Here is a post from the Abhidhamma section that has a deeper analysis of the brain-mind connection:
Brain - Interface between Mind and Body
5.6.1 Neuroscience says there is no Free Will? - That is a Misinterpretation!

Revised April 22, 2016; revised November 15, 2019; September 6, 2020 (update at the end of the post)

## Libet's Experiment

1. In 1983, Benjamin Libet conducted an experiment apparently showing that our brain makes decisions before we become aware of it. When a person moves a finger, the brain activity appears to start before the person actually makes that decision.

- There have been numerous follow-up experiments since then. All those experiments seemed to confirm this observation, even though the time delays vary.
- Scientists and philosophers are quite puzzled and some are very worried that we are just zombies run by a program in our brain.

2. Here is a video clip that illustrates the basic experiment:

## WebLink: VIMEO: Neuroscience and Free Will

Here is a recent youtube video on the same subject:

## WebLink: Youtube: Do humans truly have Free Will?

## Does Libet's Experiment Prove There is No Free-Will?

3. Since Libet published his results, scientists and philosophers have been debating whether these experiments show that man has no free will:

## WebLink: WIKI: Neuroscience of free will

- Also, see the recent post, "Mind Is Not in the Brain" and follow-up posts at "Buddha Dhamma - A Scientific Approach"

## Refined Follow-Up Experiments

4. The second recent experiment is a bit more refined. Let us summarize that experiment:

- The person randomly decides (no pre-planning) to press a button at some time. Let us take this time to be TM ( M for the mind) making the decision.
- He presses the button at TF, which is recorded electronically ( F for using the finger to press the button).
- At the same time that he decides to press the button, he is watching the clock and makes a mental note of the "time" and after hitting the button, records that time too: TE (E for using the eye to see the time on the clock. It is important to note that TE is the time that the MIND says it saw the clock).
- Finally, his brain activity is recorded by the sensors attached to his head. Let us take the recorded start of brain activity to be TB.

Here is a summary from the researchers (you can click on the figure to expand and then hit the back button on the browser to get back):

So, the researchers conclude that since brain activity started at TB before, either (i) him pressing the button (at time TF), or (ii) him recording the "clock" at the time TE when he made the decision, the brain activity started before he made the decision.

- The problem is that they ASSUME that the time, TE, that one gets off the clock is the same as the time, TM, that the mind makes the decision to press the button.

## Explanation From Buddha Dhamma

5. In Buddha Dhamma, the mind is the precursor to every action that we do with the body. The mind's decisions are implemented by the brain. The brain is just a very sophisticated computer.

- Buddha's explanation of the mind is very thorough. The basic ideas at "Moral Living and Fundamentals" and "Essential Abhidhamma - The Basics."
- More detailed analyses on how the mind and the brain work together at "Buddha Dhamma - A Scientific Approach," "The Grand Unified Theory of Dhamma" and "Mental Body - Gandhabba,"
- Deeper aspects discussed in the "Abhidhamma" section.
- Some of the basic aspects are discussed below.

## Brain Is The "Control Center"

6. The brain is the control center for the mechanical body to carry out both these tasks ASSIGNED BY THE MIND. The brain gets the finger to push the button and the physical eye to look at the watch.

- Now the mind is in the manomaya $k \bar{a} y a$ and is lined up with the heart of the physical body. The mind and the brain are connected by a signal system that is analogous to how television or radio signals are transmitted (very fast, possibly electromagnetic). The brain communicates with the five senses via the nervous system, and those communications are slower.
- Thus the brain gets the message from the mind to "press the button" and to "watch the clock." Thus TB is ALWAYS later than TM.
- Modern science has shown that, "It normally takes $0.4-0.6$ seconds for the nervous system to activate available muscle motor units to contract,......." (see, at the very end of the article: WebLink: WIKI: Motor control). The finger movement involves muscles in the arm, and the eye movement involves muscles in the head and the eye).
- Both actions of "watch the clock" and "press the button" are initiated by the brain (with the help of the central nervous system) per mind's instructions. The eye function circuitry can be logically thought to be a bit faster than the mechanical finger moving. Thus "watching clock" gets done first with the eye, and a little time later the finger has pushed the button. So, here is the time sequence per Buddha Dhamma (you can click on the figure to expand and then hit the back button on the browser to get back):

6. The mind initiates all movements of the body. Here, it is the mind that starts off the brain activity, i.e., TB is later than TM. The brain activity starts AFTER the mind decides to take action because the brain needs to
get the signal from the mind. The seat of the mind (hadaya vatthu) lies close to the physical heart, far away from the brain.

- Now the brain needs to carry out those two functions of pressing the button and look at the clock. The vision circuitry is faster. The mechanical movement of the fingers is slower (it involves moving muscles), and thus pushing the button happens a bit later.

## Back to Libet's Experiment

7. Now, let us go back to the first experiment. The only difference here is that the person is not recording the time. He just presses the left or right button. So, there are just two events recorded now instead of three events. All we have to do is to remove TE from the above two graphs.

- It is simpler: His mind decides to push the button. The mind directs the brain to push either the left or right finger, and it takes some time for the brain to mobilize the muscles to move the finger. The time sequence is the same as in the same figure. The mind decides (TM), the brain starts working on it (TB), and the sensors attached to his head record that brain activity (wiggly line). Finally, the finger pushes the button (TF).
- As in the other experiment, the mistake is to assume that finger pushing happens SIMULTANEOUS with the mind's decision. But the mind only gets the brain (the computer) to initiate the complex sequence of events to work the muscles in the arm and hand to move the finger, and that is the lag time.

## An Analogy

8. The body is like a mechanical instrument, say, a sophisticated tank that is used to fire at the distant object. The operator is like the mind. He aims the gun barrel using sophisticated computer-controlled circuitry and then fires the gun. He can drive the tank where ever he wants. But things do not, and cannot, happen simultaneously with the operator's decision. The gun needs to be moved into position before it is fired.

- The mind is controlling the body just like that. The finger (and the eye) in the above case(s) are just two instruments helping with the two tasks of pressing the button (and reading the clock), and the brain is the "control center" that oversees both those activities on the command of the mind.
- The connection between the body and the mind is explained in the post, "Brain - Interface between Mind and Body" and other posts on the gandhabba.

## Thoughts Arise in Hadaya Vatthu, Not In The Brain

9. The "seat of the mind" (hadaya vatthu) is in the manomaya kāya (also called gandhabba). Thoughts arise there, not in the brain. The brain is a very sophisticated computer and controls the physical body per instructions given by the mind. At death, the manomaya kaya with the mind leaves the body and both the body and the brain become lifeless. See, "Ghost in the Machine - Synonym for the Manomaya Kāya?," "Manomaya Kāya (Gandhabba) and the Physical Body," and "Manomaya Kāya and Out-of-Body (OBE) Experience."

- Therefore, we are not robots controlled by a program running in our brain. The brain is just a sophisticated mechanical instrument that helps the mind with coordinating the tasks (like the computer in the tank in the above example that is helping the tank operator). But there are certain functions like breathing that the brain carries out without input from the mind. We will discuss those in an upcoming post soon.
- Any person has the POTENTIAL to do things in a scale that is unimaginable to us. We just do not realize the power of our minds; see, "Power of the Human Mind - Introduction," and the follow-up posts.

September 6, 2020 update:

There have been a few recent experiments that reduce the delay between TE and TF in \#4 above. The following is the most recent paper on the subject: "WebLink: sciencedirect.com: Sanford-Libet's Intention Reports are Invalid-2020"

- To quote from the abstract of the above paper: "..We argue that Libet's intention reports are invalid and explore the phenomenology of intention in the Libet's experiment."

## The Double Slit Experiment - Correlation between Mind and Matter?

## Revised March 13, 2018; November 15, 2019

## Introduction

1. The failure of the materialistic approach to explaining consciousness is becoming ever more apparent; see Ref. 1 and Ref. 2 below.

- The materialistic approach, of course, is to explain mental phenomena to arise in the brain that is composed of inert matter.

2. A number of scientists/philosophers are hoping that quantum mechanics can come to the rescue (Ref. 3, and Ref. 4).

- They say that even though the deterministic Newtonian mechanics is unable to explain consciousness, quantum mechanics can (because quantum mechanics does not have such an apparent deterministic nature.)

## Quantum Mechanics to the Rescue?

3. Quantum mechanics $(\mathrm{QM})$ is different from other branches of physics where one can get an intuitive idea of what is taking place.

- What we are currently doing with QM can be called a "black box" approach. When we apply the correct equations, we get the right results. Einstein did not like this at all. Yet, to his frustration, all his predictions of the inadequacy of QM did not materialize AND the predictions of QM have been correct to amazing accuracy.

4. Those experiments, the results of which can only be explained by QM, appear to be non-deterministic in nature.

- This has compelled some scientists to investigate whether there is a connection between QM and the mind, which IS non-deterministic. Two experiments, in particular, have been at the forefront of these discussions. The "double-slit experiment" and the "Schrödinger's cat experiment."

5. My intent in this essay is to challenge the two prominent assumptions on this postulated relationship between QM and the mind:
i. Even if QM and the mind are non-deterministic in their own rights, there is no special reason to believe that there is an apparent connection between them.
ii. There is nothing really "non-deterministic" about QM, other than the indeterminacy depicted by the Heisenberg uncertainty principle. That is just on the accuracy of a given measurement.

## Quantum Mechanics Is Not Intrinsically Psychophysical

6. Let us look into (i) first. Henry Stapp is a leading physicist who argues that quantum theory will ultimately provide an explanation for consciousness. In his book, "Mindful Universe" he says (p.2), "... quantum theory itself is intrinsically psychophysical as designed by its founders, and as used in actual scientific practice, it is
ultimately a theory about the structure of our experience that is erected upon a radical mathematical generalization of the laws of classical physics."

- My basic point is that quantum theory is NOT psychophysical; there is no way to accommodate "subjectivity" in QM. Where is the "mind connection" in the theory of QM?
- There are others who work on theories that try to explain consciousness as arising from quantum effects in the brain; see, for example, "Conversations on Consciousness", by Susan Blackmore (2006). No one has clarified how these theories make the connection between "psyche" and "physical" in "psychophysical."

## The "Observer Effect" in QM

7. Let us review one experiment that has become the main demonstration for the "observer effect" in QM, the "double-slit experiment." Here is a short video by Dr Quantum to illustrate the "paradox" of the double slit experiment:

## WebLink: YOUTUBE: Dr Quantum Double Slit Experiment

8. The two main points of this experiment are:
a. the particles behave like waves when both slits are open, and
b. this "wave nature" goes away when the path of the particle is "observed" or monitored.

## Bohmian theory of Quantum Mechanics

9. There is a version of QM called the Bohmian theory or the Pilot Wave theory that was developed by the late David Bohm. It does use Schrodinger's equation which is used to track the propagation of a "pilot wave." That theory is explicitly non-local, i.e., quantum entanglement is built-in.

- With this theory, each solution of the wave equation describes a DETERMINISTIC path for the particle, and the statistical average agrees with the experiments and the results of the standard QM calculations.
- The actual trajectories have been harder to measure not because of a "mind effect," but because observation can disturb the particle trajectory itself. Recent experiments have been conducted to "weakly" measure a system without appreciably disturbing the trajectories. Those experimental results are consistent with the predictions of Bohmian theory (Ref. 5).

Thus the role played by Bohmian mechanics in these "QM experiments" is just like the role statistical mechanics played in thermodynamics.

- Here is a very short video showing INDIVIDUAL trajectories for a double-slit experiment calculated using the Bohmian theory. There is nothing "mysterious." Each particle has a definite trajectory. There is no "observer effect."

## WebLink: YOUTUBE: Bohmian Trajectories in the Double-Slit Experiment

- When it is attempted to observe the path of an individual particle, the coherence of the system or the pilot wave is disturbed and the interference pattern goes away. Thus there is no "observer effect," in the sense of bringing "subjectivity" in.

## "Schrödinger's Cat" Thought Experiment

10. Another famous experiment that has been the subject of much discussion is the "Schrödinger's cat" thought experiment. This experiment suggested by Schrödinger back in 1935, involves a cat in a closed chamber.

- A radioactive sample in the chamber, if undergoes decay within a given period of time, triggers the release of a hammer that breaks a vial of a toxic gas that kills the cat. If a conscious observation is required to collapse the wave function, then the fate of the cat is not known until the box is opened. Unfortunately, both the consciousness-based and consciousness-free interpretations of quantum measurement are indistinguishable to the observer outside the box.
- In 2006, an actual experiment was conducted to simulate this experiment. It was reported that "... measurement alone, rather than conscious observation of measurement, is sufficient"; see Ref. 6.

## No Real "Observer Effect"

11. Thus there is no real "observer effect" in the double-slit experiments or in the Schrödinger cat experiment.

- In the double-slit experiment, what an "observer" does is to disturb the coherence of the system, if the disturbance is strong. It does not matter whether the "observer" is human or a mechanical device (in most cases it is non-human); one ALWAYS gets the same result. This is in contrast to real subjective situations. For example, in the stock market, complex subjective decisions are made by millions of people.
- So, where does the "objectivity" or "intention" - in the sense of the mind affecting the experimental result - come from? "Intent to monitor" is not really a significant subjective decision; just a simple "yes" or "no."

12. Therefore, it is clear that there was no evidence for "subjectivity" in those experiments even before Bohmian mechanics or the Schrödinger's cat experiment. Those two pieces of evidence really make that point undeniable. There is no evidence of the mind affecting the outcomes of those experiments.

## The Mind Creates Matter, Not the Other Way Around

13. The Buddha stated that the mind is at the forefront; "Manopubbangamā Dhammā.." A deeper Abhidhamma analysis is available at "The Origin of Matter - Suddhatthaka."

- Even though mind affects matter and even CREATES matter, science has not advanced enough yet to confirm that.

14. There has to be a paradigm change in science to explain consciousness. Any theory based on matter and attempt to treat mental phenomena as a byproduct will not succeed. The mind is the more fundamental entity and takes precedence over matter.

- Some philosophers are beginning to sense this reality. Even though he does not appear to know anything about Buddha Dhamma, philosopher Thomas Nagel says the following. "The great advances in the physical and biological sciences were made possible by excluding the mind from the physical world... ..But at some point it will be necessary to make a new start on a more comprehensive understanding that includes the mind." (Ref. 1, p.8). Then on p. 15, "...The possibility opens up of a persuasive conception of the natural order very different from materialism - one that makes mind central, rather than a side effect of physical law."

## Consciousness and Quantum Mechanics

March 13, 2018: I have started a new section "Quantum Mechanics and Dhamma," where a new interpretation of quantum mechanics is presented, and it is discussed why a connection between quantum theory and consciousness will not be possible.

### 5.6.3 Vision (Cakkhu Viñ̃n̄āṇa) is Not Just Seeing

July 15, 2016; revised October 19, 2020

## Introduction

1. In 1988, Dee Fletcher almost died due to carbon monoxide poisoning. Her husband found her unconscious just in time to save her life. However, when she recovered, she had lost "sight" in the normal sense of the word.

- She could not see and recognize someone standing right in front or read a book.

2. But soon she realized that she had some peculiar abilities. She could grab a pencil from the hand of a person who held it in front of her, even though she could not actually "see" the pencil or the person.

- Her vision is good enough for picking something up, but not good enough for seeing it!

## Dee Fletcher's Case Provided Many Clues on Vision

Since then researchers have done numerous experiments on her, which have led to some astonishing findings of how vision works.

- For example, they tested her with a mailbox with a narrow slit for inserting letters. Even though she could not see the mailbox - let alone the slit or the envelope - she could insert the letter in the slot without any effort. Even when they tilted the slit, she did not have a problem at all! It was as if a phantom inside her was doing that task for her.

3. Another ability of Dee was to be able to walk around the house without bumping into furniture or walls. Since that ability could be due to her familiarity with the house, they took her to an unfamiliar trail and she did not have any problem walking there without tripping over rocks or bumping into trees.

- This disorder is known as visual agnosia.
- It turns out that there are two relatively independent visual systems in the brain: One for conscious perception (visual cortex), which was severely damaged in Dee. The other was for unconscious control of action (superior colliculus), which is largely preserved.

## Two Ways of Visual Processing

4. The following figure shows the optical nerve splitting and connecting to those two areas in the brain.

You can download the figure here.
5. The presence of two streams of visual processing in the brain had been known only since 1982. Even though the role of the visual cortex in the brain (in producing a "picture in the mind") had been known before that, the role of a second processing area in the brain (superior colliculus) that helps with figuring out the "depth of vision" or how far a given object was proposed in 1982 by Leslie Ungerleider and Mort Mishkin.

- Of course, their model helped explain the symptoms experienced by Dee Fletcher. She had parts of her visual cortex damaged by the carbon monoxide poisoning, while her superior colliculus was left mostly intact. Her eyes were sending the signals to the visual cortex, but the damaged visual cortex could not process that signal.
- By the way, you do not need to know the details of the visual cortex, superior colliculus, or any other technical term to get the idea that I plan to convey. I do not know details about them either.

## How Vision Happens - Still a Mystery for Science

6. Of course, scientists are only aware that those two areas in the brain contribute to those two functions. They do not know exactly how the visual cortex gleans information about what the object is (i.e., its visual characteristics.) Also, it is not known how the superior colliculus figures out the dimensions of the object and how far it is at (in order to correctly grab an item both types of information are needed).

- We need to realize that there is "no light" going to the visual cortex and there is no screen at the back of the head that displays the object in question. The optical nerve only transmits a chemical (and electrical) signal. The visual cortex somehow generates a "picture" for our minds to see.
- Even more mysterious is how the superior colliculus figures out the depth of vision just from that chemical signal coming through the optical nerve.
- We will come back to these issues in upcoming posts, but first, let us continue with our discussion on what the scientists know at this time and how they found them.

## Further Details of Dee Fletcher's Case

7. There are many research papers that describe experiments involving Dee Fletcher, and the two principal researchers have written a book on this research: "Sight Unseen - An Exploration of Conscious and Unconscious Vision" by M. A. Goodale and A. D. Milner (2004).

- The above book is a bit expensive. Chapter 4 of V. S. Ramachandran's popular book, "Phantoms in the Brain" (1998) provides a less technical description. That book also describes some other interesting findings of the brain. I hope to discuss a couple of those observations (particularly his and others' work on "phantom limbs") in future posts.
- There is also a Wikipedia article on the WebLink: WIKI: Two-streams hypothesis on vision.

8. The book by Goodale and Milner also describes a visual problem that is the opposite of that of Ms. Fletcher. This syndrome is called the "optic ataxia," and those who have it can "see" and recognize objects very well, but they have difficulty in actions involving objects.

- Those who suffer from optic ataxia, for example, can see the mail box and the slit described in \#2 above. However, they have much difficulty in putting a letter through the slit.
- It turns out that these people have their superior colliculus damaged, but the visual cortex works fine.

## How Does the Mind Figure out the Distances to Objects Around Us?

9. Have you thought about how we can move around without bumping into each other and other objects like trees on the ground and cars on the road? The presence of the two processing streams can BEGIN TO explain how the brain figures out not only "what is in front of us (a human, tree, or a car)" but also "how far is it at and how big it is."

- As mentioned above, part of the signal going through the optical nerve to the visual cortex deals with the first task, and the other part going to the superior colliculus deals with the "haw far and how big" issue.

10. Even though scientists have figured out that those two areas in the brain (visual cortex and the superior colliculus) somehow extract the two kinds of information, they have absolutely no idea how those areas extract that information from the chemical signal that comes through the optical nerve.

- Scientists do know that the lens in an eye projects an image of the object to the back of the eye (retina); see the figure above. It is pretty much the same as an image you can see with a lens:

This is pretty much how a camera captures an image:

## How Can a Chemical Signal Provide the Perception of Sight (and Light)?

11. Of course, the film in an old camera undergoes some chemical changes when the image falls on it. Then that film is chemically processed to reveal the picture.

- In the same way, when the image of an object falls on the retina of an eye, the cells on the retina generate a chemical (and electrical) signal. The optical nerve transmits this signal to the visual cortex and the superior colliculus in the brain. There is no "picture" transmitted to the brain.
- So, how does the visual cortex generates a visual of the object starting with the chemical signal that comes from the eye?
- Even more puzzling is how the superior colliculus figures out the distance to the object (and the dimensions of the object), solely based on that same signal.

12. Even within the visual cortex itself, there are 30 different areas specialized to carry out different tasks. They all help provide a "comprehensive picture" of the object.

- For example, the area called V4 deals with the color of the object, but does not care about the direction of motion.
- On the other hand, area MT (also called V5) responds to targets in the visual field based on their direction of motion, but does not care about the color of the object. Specialized sub-areas in the visual cortex carry out multiple tasks.

## The brain is Not a Computer - It Can Change

13. Brain is indeed a very sophisticated machine! However, as we will find out in upcoming posts, it is not a typical machine like a computer. It can change on its own!

- While a computer cannot get rid of parts that go bad, the brain can indeed replace or repair bad parts and even make new parts in some cases (however, when a whole section is damaged, like in the case of the visual cortex or superior colliculus such a rejuvenation is not possible). This is what is puzzling the neuroscientists right now. They have confirmed that these things happen (I will discuss examples in future posts), but have no idea HOW the brain does that.
- The key to this puzzle is the following. Our "mental body" or the gandhabba controls the physical body. The gandhabba has three components: kammaja kāya, cittaja kāya, and the utuja kāya. It is actually the cittaja kāya that plays the dominant role in CHANGING brain functions. In other words, it is OUR THOUGHTS that can change the brain!
- Ultimately, one attains Nibbāna by gradually transforming one's own brain. In other words, getting rid of greed, hate, and ignorance can change one's brain! However, even a Buddha can only show the way, and one has to make the effort.
- The four types of bodies that we have and the gandhabba are discussed in the section "Gandhabba (Manomaya Kāya)." The key functions of the cittaja kāya are also discussed in the post, "Udayavaya Nāna - Importance of the Cittaja Kāya."

## Buddha Dhamma and Science - a Symbiotic Relationship

14. We live in a truly opportune time to comprehend the value of Buddha Dhamma. Modern science provides clues that can be used with Buddha Dhamma to clarify many issues and vice versa. See, "Buddha Dhamma - A Scientific Approach" and "Quantum Mechanics and Dhamma."

- In this series of posts, I hope to suggest some such avenues for scientists to explore, based on Buddha Dhamma, which can also explain many of these "new findings."
- As I have mentioned many times, attaining Nibbāna does not require such details. However, for most people, future confirmation of such "predictions" hopefully will help build confidence in Buddha Dhamma, and to appreciate its value.
- Of course, the real value of Buddha Dhamma is not in exposing such mundane things, but showing the path to liberation from suffering (Nibbāna). But it is good to have faith in Buddha Dhamma, so that one can feel confident that one is not wasting one's precious time in learning Buddha Dhamma.

## VI Elephants in the Room

## February 28, 2022

The goal is to highlight the obvious contradictions in current English (and other languages) translations of key concepts in Buddha Dhamma.

- I call these "elephants in the room" because these obvious contradictions have gone unnoticed for all these years. It is a puzzling phenomenon because it is not necessary to have knowledge of Pāli to see some of these contradictions. Even a child should be able to see some of these contradictions!
- Note that there are several posts within each section and some of them branch out to even more posts.

First Elephant: "Elephant in the Room 1 - Direct Translation of the Tipitaka"
Second Elephant: "Elephant in the Room 2 - Jhāna and Kasina"
Third Elephant: "Elephant in the Room 3 - Ānāpānasati"

### 6.1 Word-for-Word Translation of the Tipitaka

## February 28, 2022

### 6.1.1 Elephant in the Room 1 - Direct Translation of the Tipitaka

February 28, 2022; revised March 1, 2022 (\#2); October 16, 2022 (new \#2, among other revisions)
Direct (word-for-word) translation of Tipiṭaka suttas is a significant problem. Many people are confused by contradictions that inevitably arise due to this practice.

## "Elephant in the Room"

1. To quote Wikipedia: "The expression "the elephant in the room" (or "the elephant in the living room") is a metaphorical idiom in English for an important or enormous topic, question, or controversial issue that is obvious or that everyone knows about, but no one mentions or wants to discuss because it makes at least some of them uncomfortable and is personally, socially, or politically embarrassing, controversial, inflammatory, or dangerous." See, "WebLink: en.wikipedia.org: Elephant in the room."

- Even though the Pāli Tipitaka remains intact, Buddha's teachings are NOT correctly communicated these days. After many years of writing an English website on Buddha Dhamma and participating in discussion forums, the root cause has slowly dawned on me. The main problem is the word-for-word translation of the suttas.

2. I have pointed out this problem in several posts during the past few months. See, for example, "Distortion of Pāli Keywords in Paticca Samuppāda."

- Even after providing clear evidence, many people ignore this "elephant in the room." I then realized that many people do not have the basic understanding necessary to see the problem! They simply don't see the elephant. Thus the need for this series of posts.
- Tipitaka was not translated word-for-word to any language until the 1800s. That practice started with European scholars in the 1800s trying their best to understand the vast amount of Pāli and Sanskrit texts found in India, Sri Lanka, and many other Asian countries.

3. For example, a direct translation of the Tipitaka to the Sinhala language took place only in 2005. The Tipiṭaka had remained in the Pāli language (written with Sinhala script) since first written down in 29 BCE (2000 years ago). [WebLink: ocbs.org: The Historical Authenticity of Early Buddhist Literature - A Critical Evaluation by Alexander Wynne - Page 37.]

- During that time, bhikkhus clarified key concepts with long discourses or written commentaries. Many suttas in the Tipitaka are in a highly-condensed form (uddesa version) suitable for oral transmission (Ref. 1.) That was necessary because the Tipiṭaka was transmitted orally in the first 500 years after the passing away of the Buddha.
- Deep concepts in those suttas were explained to the general public in their native languages by bhikkhus. Furthermore, three commentaries were composed in Pāli during the time of the Buddha. Per the Sinhala version of those three commentaries, one was the work of Ven. Sāriputta and the other two attributed to Ven. Mahākaccāna (or Mahākaccāyana.)
- About 200 years after the passing away of the Buddha (i.e., about 2300 years ago), Ven. Mahinda in Sri Lanka started writing commentaries in the Sinhala language (Sinhala Atthakathā.)
- When writing on leaves became more widespread (but still tedious) around 2000 years ago, an assembly of Arahants wrote down the Pāli Tipitaka and the three original commentaries. That constitutes about 60 volumes of the Tipitaka that we have today.

## Mahāyāna Influence on Theravāda

4. Within 500 years of the passing away of the Buddha, the Indian Mahāyānists started not only refining but incorporating concepts that were alien to Theravāda Buddha Dhamma.

Those who started this revision process tried to make things "simpler" and "innovative" by replacing anicca and anatta. So, they defined those in their terms (anitya and anātma) and then got into a slippery slope in explaining those terms by inventing more concepts. It snowballed, and in the words of Edward Conze, who translated many Mahāyāna texts to English (Ref. 2):

- "......About 100 BCE (roughly 400 years after the Buddha's Parinibbāna), many Buddhists in India felt that the existing statements of the doctrine had become stale and useless. They were convinced that Dhamma required new reformulations to meet the needs of new ages, new populations, and new social circumstances. So they set out to produce new literature, which ultimately became known as Mahāyāna Buddhism. The creation of this literature was one of the most significant outbursts of creative energy known to human history and"sustained for about four to five centuries. Repetition alone, they believed, cannot sustain a living religion. They believed that unless counterbalanced by constant innovation, it will become fossilized and lose its life-giving qualities."

## Poor Status of Buddhism in the 1800s

5. To complete the historical background relevant to this discussion, let me quickly summarize the sad status of Buddhism in the 1800s.

- The invasions by the Portuguese, Dutch, and finally the British spanned over four centuries starting in 1498; see "WebLink: en.wikipedia.org: Portugues' presence in Asia." That led to a drastic decline of Buddha Dhamma (Buddhism) in all Asian countries (Sri Lanka, India, Burma, Thailand, etc.)
- Buddhism was non-existent in India by the 1800s. However, Mahāyāna Buddhism arose in India just 500 years after the Buddha and flourished for several centuries. Those heydays of Mahāyāna Buddhism corrupted Theravāda Buddhism in Sri Lanka and other Asian countries. See Ref. 2.
- The following video is in the Sinhala language. It provides an account of the restoration of Ruwanvalisāya, one of the largest stupās in Sri Lanka. That project took many years and was completed with assistance from the British Governor in Sri Lanka at that time. You can see the status of Buddhist temples and stupās in the 1800s before their restoration:
 20 2ep jo od Naranvita Sumanasara Thero
- A picture of Ruwanvalisāya in the early1800s is at @1:10 minutes. By 1869, a small residence for bhikkhus had been built (@1:30 mins.) Even by 1921, complete restoration had not taken place. Also, see the Wikipedia article, "WebLink: en.wikipedia.org: Ruwanwelisaya."

## Revival of Buddhism Starting in the 1800s

6. In the 1800 s Buddhism underwent a period of revival due to the efforts of some British civil servants.

- They found many key Buddhist sites like Lumbini and even the Asoka pillars in India in ruins. They also found many Sanskrit texts in India and Pāli texts in Sri Lanka, Burma, etc.
- Those civil servants coordinated to collect the vast historical documents found in the Asian countries. Those included not only Tipiṭaka documents but Mahāyāna and Vedic documents as well. Scholars in European countries tried to sort them out and figure out those new concepts.
- However, even Theravāda bhikkhus had already mistaken mistranslated anicca and anatta to be the same as Sanskrit anitya and anātma by that time. That was due to the influence of the Mahāyāna Buddhism just 500 years after the Buddha; see \#4 above and in Ref. 3.

## The Book "In Search of the Buddha" by Charles Allen

7. To get an idea of how those European pioneers struggled to interpret the inscriptions on Ashoka pillars and the vast collection of Pāli and Sanskrit texts, I highly recommend the book, "In Search of the Buddha" by Charles Allen (2003). His family had been in India for generations serving in the British government, and he was born in India.

- The book has a lot of information and pictures of many historical sites in India before their restoration. For example, a photo of The Mahābodhi Temple taken in 1799 is on p. 147.
- It is truly fascinating to read about the efforts of those who dedicated their lives to the effort of uncovering Buddha Dhamma. Even though not shown in that book, historical sites in Sri Lanka and other Buddhist countries were also dilapidated, as shown in the video of \#3. Charles Allen's book focuses on India.
- Those civil servants/European scholars were primarily responsible for the current revival of Buddhism. However, they unintentionally solidified some critical damages previously done to Theravāda concepts (especially misinterpretation of anicca and anatta).

## Imagine the Task of Deciphering Three Novel Religious Concepts Written in Two Foreign Languages!

8. There were Sanskrit documents in India. No Pāli documents on Theravāda or Sanskrit documents on Mahāyāna were found in India.

- Mostly, Pāli texts on Theravāda were found in Sri Lanka. Sanskrit texts on Mahāyāna, as well as Pāli texts on Theravāda were found in other Asian countries. See, "WebLink: en.wikipedia.org: Sanskrit Buddhist Literature."
- The enormity of the task faced by those European scholars becomes apparent when one realizes that three sets of different concepts were involved in Theravāda, Mahāyāna, and Vedic texts.
- Many academics in European universities then started translating the Tipitaka into English, German, and French. They needed to learn the concepts of Buddhism (as well as Pāli and Sanskrit languages) from "local experts," but at that time, there were no bhikkhus with in-depth knowledge of Buddha Dhamma.
- That is when the practice of translating the Tipitaka word-for-word to another language started.

## Academic Credentials Not Enough to Teach Buddha Dhamma

9. Those European scholars did their best to interpret the vast collection of historical documents. Those efforts are well-documented in Charles Allen's book. Professor Rhys Davids was among those scholars, and most current interpretations are based on his work.

- Following the original translations by Rhys Davids, Eugene Burnouf, and others, contemporary Sinhala scholars like Malalasekara (a doctoral student of Rhys Davids) "learned" Buddhism from the Europeans and thus started using wrong interpretations.
- Other Sinhala scholars like Kalupahana and Jayathilake also learned "Buddhism" at universities in the United Kingdom (received Doctoral degrees in Buddhism) and wrote books in English and Sinhala.
- Of course, scholars in other Buddhist countries did the same in their languages, and the incorrect interpretations spread worldwide.

10. I hope I have provided enough information to contemplate why the opinions of "scholars" are likely to be wrong due to reasons beyond their control. Again, I admire and appreciate what Rhys Davids, Burnouf, Muller, and others did in those days, and it was not their intention to distort Buddha Dhamma. It is not the fault of current scholars either.

- To emphasize, one needs to learn Buddha Dhamma from a true disciple of the Buddha who has attained at least the Sotāpanna stage.
- Academic credentials mean NOTHING as far as teaching Buddha Dhamma is concerned. With all due respect to those European scholars, they DID NOT understand the key message of the Buddha. That message is that the rebirth process is filled with suffering, and the goal of a true Buddhist is to stop the rebirth process and attain Nibbāna. See, "Basic Framework of Buddha Dhamma."

## Summary and Future Posts

11. The description above provides the necessary historical background.

- The main point I will focus on in the upcoming posts is the following: Confusion caused by the word-for-word translation of the Tipiṭaka. I will address that in detail in the next post.
- Of course, those European scholars who started that practice had no idea it was the wrong approach.
- Within the past 20 years, the correct interpretations of the Tipitaka started circulating. Explanations by Waharaka Thero became increasingly widespread, first in Sri Lanka and then in other countries by Sri Lankans who resided in those countries.

12. How was Waharaka Thero able to make those correct interpretations?

- Waharaka Thero was a jāti Sotāpanna, as he had declared. Once one attains the Sotāpanna stage, one will not lose that deeper understanding through future lives.
- However, Waharaka Thero was more than just a jāti Sotāpanna. A Sotāpanna may not be able to explain concepts to others, even if they understand them. That is a unique ability of only those with "Paṭisambhidā Ñāna."

13. How can we trust those interpretations to be correct?

- Just as in modern science, the ultimate test is self-consistency. The Tipitaka, compiled AND written down by Arahants, is fully self-consistent. Therefore, any interpretation must be selfconsistent within the Tipitaka as well.
- I will first show that most current interpretations are blatantly self-contradictory. Even a child can see those contradictions. I will first provide many instances of such contradictions.
- Then I will also show that the interpretations of Waharaka Thero are entirely self-consistent.
- I welcome comments at the discussion forum.

3. "Misinterpretation of Anicca and Anatta by Early European Scholars." I will expand that analysis later in this series.

### 6.11.11 Niddesa (Brief Description) of Paṭicca Samuppāda

March 7, 2022
Niddesa version (Brief Description) of Paticca Samuppāda provides a bit more clarity than the uddesa (utterance) version. We discuss the niddesa version in this post.

## Three "Elephants in the Room"

1. During the emergence of Mahāyāna (with Sanskrit literature) around 2000 years ago had distorted meanings of keywords like anicca and anatta. Misinterpretation of Ānäpānasati as "breath meditation" by Buddhaghosa got incorporated into Theravāda Buddhism about 1500 years ago.

- Buddha Dhamma (Buddhism) came out of yet another recent dark period of 300-400 years thanks to the efforts of some British civil servants and European scholars starting in the 1800s. However, they (unintentionally) made those earlier distortions permanent using the newly discovered printing press. Furthermore, they started the practice of translating the Pāli Tipiṭaka word-for-word to English.
- The adoption of wrong interpretations of keywords like anicca and anatta due to the influence of Mahāyāna would be ONE issue to tackle. Misinterpretation of Ānāpānasati as "breath meditation" is the SECOND. I have discussed those two issues in the past but will address them again in this series of posts.
- Before that, I need to address the more urgent THIRD issue that resulted from translating the Tipitaka word-by-word. Most of these contradictions can be seen even by a child without any knowledge of Pāli. That is what I will call the FIRST "Elephant in the Room." It is impossible to translate the Tipitaka word-for-word and convey the embedded deep concepts.

## The First "Elephant in the Room"

2. The following verse (in the uddesa form) is from the "WebLink: suttacentral: Dutivabodhi Sutta (Ud 1.2)". The Päli version of the corresponding verses are in Ref. 1:
"In the second part of the night, he reflected on dependent origination in reverse order:

When this doesn't exist, that is not; due to the cessation of this, that ceases. That is: When ignorance ceases, choices cease. When choices cease, consciousness ceases. When consciousness ceases, name and form cease. When name and form cease, the six sense fields cease. When the six sense fields cease, contact ceases. When contact ceases, feeling ceases. When feeling ceases, craving ceases. When craving ceases, grasping ceases. When grasping ceases, continued existence ceases. When continued existence ceases, rebirth ceases. When rebirth ceases, old age and death, sorrow, lamentation, pain, sadness, and distress cease. That is how this entire mass of suffering ceases."

- The second translation at Sutta Central is almost the same: "WebLink: suttacentral: The Second Discourse about the Awakening Tree."
- Such translations have existed for many years without anyone asking questions about their apparent incorrectness.

## Insane Discussions in Discussion Forums

3. There is a recent ongoing discussion at Dhamma Wheel: "WebLink: dhammawheel.com: Do Arhats experience contact with their sixfold sense media? What about vedanā?" It is a clear example of the confusion caused by such translations. The participants are understandably confused by translations like in the sutta in \#2 above.

- The translation in \#2 plainly says that when ignorance (avijjā) is not there, choices (sañkhāra), consciousness (viñ̃āña), and the rest of the entities cease to exist.
- We all agree that the Buddha and Arahants do not have even a trace of avijjā (ignorance about the Four Noble Truths) left.
- Then, according to the translations in \#2 above, they would not generate any more sañkhāra and would not have consciousness (viñ $\tilde{n} \bar{a} n a$ ). That means they would essentially not be living! That is what confused those people in that discussion forum in the above link.
- On the contrary, we know that the Buddha lived for 45 years after Enlightenment. He experienced all six sensory faculties, used them optimally, and had the best mind. He could recall any event in the past as far as he desired. But he also felt all types of vedana , including bodily dukkha vedanā (he had back problems and once was injured by Devadatta).

4. So, where is the problem? Is that sutta wrong?

- The sutta is perfectly fine. Such problems arise when translators start translating Pāli suttas word-for-word without paying attention (or not understanding) to the basic concepts in Buddha Dhamma.
- The critical point here is that many suttas are in the highly-condensed uddesa version. There are THREE levels of explanations as discussed in "Sutta Interpretation - Uddesa, Niddesa, Patiniddesa."
- The niddesa form provides a slightly expanded version. Then the patiniddesa form provides details with examples. If someone tries to translate the uddesa version to English word-for-word, that leads to severe problems as we saw in \#2 and \#3 above.
- Many keywords have different usages depending on the context. For example, viñãāṇa cannot be translated as "consciousness" for all cases because there are many types of viññanna (for instance, vipāka viññāna and kamma viññāna are two VERY different types.) One needs to know which kind of viññāna a given sutta discusses.

## How Can One Learn Paticca Samuppāda by Reading These Translations?

5. There are "WebLink: suttacentral: 32 results for avijijā AND nirodhā AND sañkhāranirodho," meaning there are at least 32 suttas with the INCORRECT verse of Ref. 1. Many of the suttas in this list are
from the Sainyutta Nikāya 12, discussing Paticcca Samuppāda. I don't see how anyone can learn Paticca Samuppāda by reading those English translations!

- In all those instances, the standard verse in Pațiloma (Backward) Paṭicca Samuppāda, "avijjā nirodhā sañkhāranirodho, sañkhāra nirodhā viññāna nirodho," is translated to English as "When ignorance ceases, choices cease. When choices cease, consciousness ceases..."
- Did the Buddha lose consciousness upon attaining the Buddhahood? Does an Arahant lose consciousness when reaching the Arahanthood? On the contrary, we know that the Buddha lived for 45 years after the Enlightenment, and many Arahants lived for long times after Arahanthood teaching Dhamma to others.
- The problem is worse because it does not matter who the translator is. All English translations I have seen have the exact direct, word-for-word translation.

## The problem of Word-for-Word Translations Is Much Deeper

6. Of course, the problem is much more severe. Even the Anuloma (Forward) Paṭicca Samuppāda is incomprehensible with such word-by-word translations.

- The sutta in Ref. 2 (and all the suttas of the list in \#5) states: "avijjā paccayā sañkhārā, sañkhāra paccayā viññānam..." which they translate as "Ignorance is a condition for choices. Choices are a condition for consciousness.."
- There are MANY types of sañkhāra. Some arise due to avijja, but Arahants who have no avijjā generate other types of sañkhāra.

## What Are "Choices" and "Volitional Formations"?

7. Another problem is translating sañkhāra as "choices" and "volitional formations." No one has explained what those words mean. Here is an instance where that question came up and a "non-answer" was given: "WebLink: discourse.suttacentral.net: Explaining sannkhāra= "choices." Here is another discussion that ended without a resolution: "WebLink: dhammawheel.com: The way I analyzed Sañkhāra."

- Mano sañkhāra (defined as vedanā and sañ̃̄̄̄) arises with any sensory event. Thus any vipāka viññāna would have mano sañkhāra.
- However, sañkhāra in "avijjā paccayā sañkhārā" are abhisañkhāra. We accumulate kamma based on our thoughts, speech, and actions based on abhisañkhāra. That is the niddesa explanation. Thus, kamma viññạ̄a arise due to abhisañkhāra.
- I have explained the above in detail in the pattiniddesa version in many posts previously, but we will discuss them again here in upcoming posts.
- Only kamma viññāna cease to arise for an Arahant. They do experience vipāka viñ̃̃āña.

8. Stated in another way, anyone (even without a basic understanding of Buddha Dhamma) can do word-for-word translations. It is just a matter of keeping a dictionary by the side and translating word-by-word. But that leads to utter confusion, as we saw above.

- Many standard dictionaries are those compiled by early European scholars like Rhys Davids. They had no understanding of Buddha's profound teachings. They learned Pāli (and Sanskrit) from the locals and then translated the Tipitaka word-for-word!
- Think about that. That is equivalent to saying that anyone who understands French and English can translate a textbook on medicine from French to English! Would that make sense?

## Niddesa Version of Explanation

9. The steps in the Patiloma Paticca Samuppāda (in the sutta of \#2 above) are in the "utterance (uddesa)" form. That is to recite the 11 steps. Those steps need explanations in either the niddesa (brief descriptions) or the patiniddesa (detailed explanations.)

- We can begin to see some clarity in the niddesa version below, which is the next level of explanation. This version uses more specific types of sañkhāra, viññāna, etc.

10. In the niddesa version, the steps would be: ".. when avijjā ceases abhisañkhāra cease, when abhisañkhāra cease kamma viññāna cease, when kamma viññāna cease nāmarūpa cease, when nāmarūpa cease salāyatana cease, when salāyatana cease samphassa cease, when samphassa cease samphassa-j $\bar{a}$-vedan $\bar{a}$ cease, when samphassa-j $\bar{a}$-vedan $\bar{a}$ cease $\tanh \bar{a}$ cease, when $\operatorname{tanhh} \bar{a}$ cease upādāna cease, when upādāna cease bhava cease, when bhava cease jāti cease, when jāti cease jarāmaranain sokaparidevadukkhadomanassupāy $\bar{a} s \bar{a}$ cease." That is the end of the whole mass of suffering.

- We are beginning to see some clarity on the question discussed at the Dhamma Wheel forum in \#3 above.
- All those terms in orange WILL cease to exist for an Arahant. But the Arahant WILL experience vipāka viññ̄āna (ordinary consciousness via the six senses) and normal feelings (vedanā) that arise with such consciousness, for example.
- Of course, $j \bar{a} t i$ refers to future births in the Uppatti Pațicca Samuppāda. All births (including the one that Arahant was born to) will undergo old age, decay, suffering, and eventual death. Thus even an Arahant will be subjected to them until the death of the physical body. But no more births and no more suffering after that!

11. Note that I have not translated key Pāli words to English in \#10 above. In many cases, there are no equivalent English words!

- It is only kamma viññanna that would stop arising for a Buddha or an Arahant. Ordinary consciousness (vipāka viññāna) would be there until their death (Parinibbāna.)
- Of course, the reader needs to know what is meant by kamma viñ̃̃āna and vipāka viññāna. See, "Abhisañkhāra Lead to Kamma Viññāna."

## Why Don't Others See the "Elephant in the Room"?

12. How is it that such apparent contradictions have gone unnoticed for so long? We may never fully understand that. But I think it is due to several factors.

- Many people who turn to Buddhism may accept certain concepts without bothering to even look for inconsistencies. Some may think Buddhism has some "mystical features" that they are not supposed to question.
- Another is people's high respect towards bhikkhus/scholars who have written "books" on Buddhism. While honoring bhikkhus is undoubtedly an exemplary aspect, the Buddha taught not to believe even his own words without asking questions to clarify any doubtful concept.
- But the main reason most English-speaking people do not "see the elephant" is the following. Most simply don't understand that words like sañkhāra and viññāna cannot be just translated word-by-word as "formations" and "consciousness." They do not even have a basic idea of Paticca Samuppāda. I will be spending most time clarifying these basic concepts in this series. But we all need first to agree that there is a problem!
- Recent comments in discussion forums have led me to conclude the above. No matter how obvious the error that I point out, they say, "Oh, I just believe so and so." They will not even acknowledge that there is a problem. I say something like, "Person X says 2 plus 3 is 6 - Is that not a contradiction?" They ignore that and start commenting about an entirely different issue.

## Concept of Paṭicca Samuppāda in Simple Terms

13. It will be quite beneficial to understand the basic framework of Pațicca Samuppāda.

- In the next post, I will explain that using simple examples. As the Buddha instructed, one needs to grasp the concepts. Memorization of words/verses is of no benefit.

## References

1. Relevant verse from "WebLink: suttacentral: Dutivabodhi Sutta (Ud 1.2)":

Bhava and Jãti Within a Lifetime - Example
6.11.2 Idappaccayatā Paṭicca Samuppāda - Bhava and Jāti Within a Lifetime

March 14, 2022

Idappaccayatā Pațicca Samuppāda explains the accumulation of kammic energies within the current life. One is "born" in various temporary "existences" numerous times during a lifetime. Understanding that helps clarify how future rebirths arise.

## Introduction

1. As I have explained in recent posts, keywords in the Tipitaka require detailed explanations. Many suttas (particularly those with deep insights) need detailed explanations. The practice of translating such suttas word-for-word to English has led to dangerous results, as I have explained in recent posts in "Word-forWord Translation of the Tipitaka."

- In the "WebLink: suttacentral: Mahānidāna Sutta (DN 15)," the Buddha advised Ven. Ānanda to learn how life evolves moment-to-moment based on the causes and conditions AT a given moment.
- That may not be clear from the English translation in the above link. That again goes back to the problem of translating word-for-word without understanding the basic concepts.

2. Translation of the verse, "Atthi idappaccayā viñ̃n̄ạnan'ti iti puțthena satā, ānanda, atthītissa vacanīyam" in the above link is: "When asked, 'Is there a specific condition for consciousness?' you should answer, 'There is.'

- "Specific condition" is the English phrase used in that translation for "idappaccayā."
- However, "idappaccaya"" comes from "ida" + "paccaya" meaning "based on the conditions at that time."
- Thus, the correct translation should be: "When asked, 'Is there a viññaña arising due to conditions at that time?' you should answer, 'There is.'

## Idappaccayat $\bar{a}$ - At a Given Moment

3. Idappaccayatā Pațicca Samuppāda (IPS) is another essential teaching that remained hidden for hundreds of years. The word "Idappaccayatā" comes from "ida" for "here," and the closest English word for "paccay $\bar{a}$ " is "condition." Thus Idappaccayatā implies "based on this condition at this moment."

- Therefore, Idappaccayatā Pațicca Samuppāda describes how "paṭi icca" leads to "sama uppāda" moment by moment based on the conditions present at that moment; see, "Paticca Samuppāda "Pati+ichcha" + "Sama+uppāda."
- The additional "p" in "idappacayat $\bar{a}$ " comes from the combination of "ida" and "paccayā." This is similar to "dammacakka" and "pavattana" combined to yield "dhammacakkappavattana" in the Dhammacakkappavattana Sutta.
- The following verse in "WebLink: suttacentral: Avijiā Sutta (AN 10.61)" provides more insight.
"The first point of ignorance, bhikkhus, cannot be seen. Ignorance can arise at any time when the conditions are right." (Pāli verse: "Purimā, bhikkhave, koṭi na paññ̄āati avijjāya: 'ito pubbe avijjā nāhosi, atha pacchā samabhavī̀ti. Evañcetaì, bhikkhave, vuccati, atha ca pana pañāāyati: 'idappaccayā avijjā̄ti.')
- In the same way, EACH TERM in Idappaccayatā Pațicca Samuppāda arises at any given moment.

4. The standard Uppatti (or Upapatti) Pațicca Samuppāda discusses how avijjā leads to future existences (bhava) and births ( $j \bar{a} t i$ ). That is the only Paticca Samuppāda that most people are aware of these days. But that version shows the cumulative effects of numerous Idappaccayat $\bar{a}$ Paṭicca Samuppāda cycles!

- As the Buddha explained to Ven. Ānanda in the Mahānidāna Sutta in \#1 above, it is beneficial to understand the operation of Paticca Samuppāda DURING a lifetime, moment-to-moment.
- Before that, we first need to realize that there are TWO main categories of viññāna, and only one comes to play in Pațicca Samuppāda.

## Numerous Types of Viññāṇa Arise in a Day!

5. We have numerous types of viññāna arising in a day! They are mainly of TWO main categories: vipāka viññāna and kamma viñãāṇa.
6. Each sensory input (seeing, hearing, tasting, smelling, touching, recalling) is a vipāka viñnāạa. They are cakkhu, sota, ghāna, jivhā, kāya, and mano viññāna. We don't pay much attention to many of such vipāka viññāṇa.
7. But we "attach" to some of vipāka viññāna we start generating kamma viññanna, which can be of two types: vacī and kāya viññāna. Even though mano viññāna also falls in this category, only vac $\bar{\imath}$ and kāya viññāna lead to a significant generation of kammic energies.

- Only kamma viññāna generating kammic energies are involved in the "sañkhāra paccayā viññāna" step in any type of Paṭicca Samuppāda. See, "Viññāna - Two Critical Meanings."

## Viññāna in Paṭicca Samuppāda Are Kamma Viññāṇa

6. All initial steps in Idappaccayatā Paticca Samuppāda working in real-time (moment-to-moment) provide the basis for the working of other types of Paticca Samuppāda.

- Accumulation of kamma bhava (kammic energy for future existences) happens over numerous such Idappaccayatā Paticca Samuppāda cycles taking place over a lifetime and even over many lifetimes. Then birth in such an existence (uppatti bhava) can occur in the future.
- A given person has a specific set of gati (pronounced "gathi") over a given time, and their thoughts/speech/actions lead to the accumulation of kammic energies (bhava) related to those gati.
- For example, person X with violent gati tends to think, speak, and act violently, engaging in harsh speech and violent actions. X will regularly generate kammic energies through such thoughts, speech, and actions. Such kammic energies lead to appropriate bhava, such as that of a vicious animal like a tiger, leading to rebirth ( $j \bar{a} t i)$ as such an animal in the future. That is the basic principle of Uppatti Paticca Samuppāda. That Uppatti Paṭicca Samuppāda is the standard Paṭicca Samuppāda in most textbooks today.
- Uppatti Paṭicca Samuppāda is a result of numerous Idappaccayatā Paṭicca Samuppāda.

7. Therefore, it is critical is to realize the importance of understanding the working of Paticca Samuppāda during a lifetime, i.e., Idappaccayatā Paticca Samuppāda.

- We also need to see that X will NOT always think, speak, act that way. There will be times when X is interacting with his family. During such times he will think loving thoughts and speak and act with caring thoughts. Those involve "good" mano, vacī, and kāya sañkhāra.
- It is easy to see how X will change from a "bad person" (in \#6 above) to a "good person" when the conditions change.
- If X sees one of his enemies on the road, he will get into a "bad state of mind." He will start Idappaccayatā Pațicca Samuppāda cycles first with generating evil thoughts (mano and vacī abhisañkhāra) and thus "bad kammic energies."
- But when X goes home, he will see his family and start generating opposite types of mano, vacī, and kāya sañkhāra. They may even engage in "good activities" like participating in a volunteer project or providing meals to the hungry. During such activities, "good" Idappaccayatā Paticca Samuppāda cycles will operate.

## Triggering of Idappaccayatā Paṭicca Samuppāda

8. The starting of an Idappaccayatā Paticca Samuppāda cycle ALWAYS starts with sensory input (ārammana). The example given in \#7 above began with X seeing his enemy, say Y.

- Let us take another example, where X gets into a similar Idappaccayatā Paticca Samuppāda (IPS) cycle triggered by an ārammaṇa coming through the ears.
- Suppose X is at home and is having a pleasant conversation with his wife. During the conversation, the wife mentions Y. Just hearing Y's name could trigger X to recall some bad memories of Y . Thus, X may start telling his wife about his interactions with Y .
- Just hearing Y's name made X's mind go through numerous IPS cycles within a short time. Let us look into that.

9. Hearing of Y's name was a sota viññāna. X heard Y's name because his wife was talking about something, and she may have mentioned Y's name, saying that "I saw Y while ..."

- That was enough for X's mind to have a flashback at prior experiences with Y. Now, if strong feelings about Y emerge, X may start describing to his wife how bad a person Y is.
- While having that conversation with his wife, X will recall his experiences with Y and start getting agitated. If his wife encourages that, he will get "worked up." The two of them may even begin discussing how to hurt Y. If that happens, both will go through many IPS cycles accumulating more kammic energies!
- Even though they are not doing any physical harm to Y, just the generation of vacī abhisañkhāra will generate kammic energy! See, "Correct Meaning of Vacī Sañkhāra."

## Abhisañkhāra Versus Sañkhāra

10. Sañkhāra that arise via "avijjā paccayā sañkhāra" are abhisañkhāra; see the previous post, "Niddesa (Brief Description) of Paticca Samuppāda."

- Abhisañkhāra are sañkhāra with lobha, dosa, moha (avijjā).
- For example, an Arahant speaks with vacī sañkhāra. Such vacī sañkhāra DO NOT have cetanā with lobha, dosa, moha.
- Cetanā WITH lobha, dosa, moha are sañcetanā ("san" + "cetana"). Thus, abhisañkhāra have sañcetana ("san" + "cetanā") or "defiled intention." An Arahant would not generate $a b h i s a n ̃ k h a ̄ r a$ via sañcetanā; they only generate cetanā.

11. Now let us go back to our discussion in \#9. While X and his wife engage in IPS, they automatically go through all the steps in Paticca Samuppāda. As we see, while they discuss how to hurt Y, abhisañkhāra arise via avijjā! They do not realize that such abhisañkhāra will lead to future suffering.

- As they make plans, a future expectation of "hurting Y " is established, and that is the "kamma viñ $\tilde{n} a n a$ na" arising via "sañkhāra paccayā viññāna" or more precisely "abhisañkhāra paccayā kamma viññăna" in the niddesa version.
- Their plan to hurt Y may involve telling some lies about Y to the friends of Y. They may talk about specific friends of Y , and "mental images of friends of Y " come to the minds of the two of them. In IPS, those are the "nāmarūpa" in "viññāña paccayā nāmarūpa." In an extreme case, they may plan to hurt Y physically, and any weapons used will be discussed with images of such weapons going through their minds. Those are also types of "nāmarūpa" in IPS. Note that "nāmarūpa" in Uppatti Paṭicca Samuppāda (UPS) has a different meaning; see, "Viññān̄a Paccayā Nāmarūpa."
- Later on, when they implement their plan, they will also use other sensory faculties. For example, if they go and purchase a weapon, that involves all six faculties. That is "nāmarūpa paccayā salāyatana."

## Bhava in This Life and for Future Lives

12. Since they will be using the sensory faculties with an angry mindset, all sensory contacts become "samphassa" ("san" + "phassa") or defiled contacts with dosa (anger/hate.) Then they lead to "samphassa-jā-vedanä" or angry feelings based on hate. See, "Vedanā (Feelings) Arise in Two Ways."

- That, in turn, leads to "getting attached" to that effort even more. That attachment (via anger) is also $\boldsymbol{t a n h} \boldsymbol{a}$. See, "Tanhā - How We Attach Via Greed, Hate, and Ignorance."
- Once attached to an ārammaṇa, a mind stays on it, keeping it close. That is the "taṇhā paccayā upādäna" step. In the above example, X and his wife will now focus on ways to hurt Y . Their minds will go through numerous cycles of the above steps generating more kammic energy. That is the "upādāna paccayā bhava" step.

13. That kammic energy will produce two effects.
14. Part of it will fuel an "angry bhava" in this life. Both of them have created "angry bhava" and are now "born in an "angry state." Thus, "bhava paccayā $j \bar{a} t i$ " has already taken place. That is $j \bar{a} t i$ in IPS.
15. The rest of the kammic energy created will be preserved in viññāna dhātu as "fuel for future bhava." Such kammic energies can bring future births in matching existences. That is $j \bar{a} t i$ in UPS.

- Both types of " $j \bar{a} t i$ " will lead to more suffering. That is the last step in PS in both IPS and UPS cycles.

That is a brief description of Idappaccayatā Paṭicca Samuppāda. It may be a good idea to go back and read the previous post "Niddesa (Brief Description) of Paticca Samuppāda." That will help solidify the understanding.

## Better Not to Translate the Pāli Terms

14. Paticca Samuppāda is not an exotic process. While it can go to great depths, the basic principles are simple. However, one needs to truly understand the meanings of the 11 terms: avijj $\bar{a}$, sañkhāra, viññāna, nāmarūpa, saḷāyatana, phassa, vedanā, taṇhā, upādāna, bhava, and jāti.

- It is a big mistake to try to translate those terms word-for-word. There can be variations in the meaning of a word based on the situation.
- The Sinhala language DOES NOT even have its own words for those 11 terms. The same words
 Sinhala language. That has been a blessing because it leads to less confusion even among those who may not fully understand the concepts.
- That is why I have tried to use the original Pāli words as much as possible in my posts. In discussing Paṭicca Samuppāda, it is almost impossible to use English words to convey the actual concepts. That is why I try to use the Pāli words wherever possible.

### 6.1.1.2 Change of Mindset Due to an Ārammana

March 21, 2022
Idappaccayatā Paticca Samuppāda starts with an ārammaṇa or a sensory input.

## Numerous Changes of Mindset in a Day

1. Think about how many times our "mood" or "mindset" changes in a day.

- Consider person X eating a meal and experiencing a good mindset; he enjoyed the food. That mindset arose due to an ärammaṇa, which was the taste of the food.
- Suppose halfway through the meal, X saw a long hair on the plate. For some people like X, that new arammana of "seeing the hair on the plate" is enough to ruin the meal and get into an angry mindset. Suppose X was eating at a restaurant, and he called the waiter and angrily complained.
- The waiter apologized and promised to bring X a fresh meal. Soon as X heard that, he again became happy. X finished his meal and came out of the restaurant with a happy and content mindset.
- While walking, X saw one of his worst enemies, Y. The sight of Y brought in a new "strong arammana"" changed X's mood again. He started thinking about the problems that person had caused and he got angrier by the minute.

2. As you see, our mindset and related thoughts change many times during the day. The examples that we discussed above can be explained via Idappaccayatā Paticca Samuppāda, which we discussed in the previous post: "Idappaccayatā Paticca Samuppāda - Bhava and Jāti Within a Lifetime."

- Each of the mindsets discussed above resulted from a new ārammaña coming through one of the six senses.
- In chronological order, those mindsets were triggered by tasting food (jivhā viñnān̄a), seeing the hair (cakkhu viñ̃̄āna), waiter saying that he will get a fresh serving (sota viññāna), and seeing Y (cakkhu viñ̃̄āna).
- All those triggers were vipāka viññāna or different types of "consciousness." They happened to be that way. The meal could have been not tasty; if you didn't see the hair, that would have avoided you getting into an angry mindset, etc.

## Pāli Word for "Mindset" Is "Bhavańga"

3. The word "bhavañga" comes from "bhava" + "aṅga" where "bhava" means "existence" and "añga" means "part of." Thus, "bhavanga" means "part of existence at that time," which is the "mindset at that time." [añga : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

- There is also a "natural bhavanga" that we are born with. If the mind is not focused on a "strong arammana" the mind falls back to that "natural bhavañga." Thus, we can say that our mind is in the "natural bhavañga" state while we sleep.
- However, once we wake up and start getting bombarded with all kinds of ārammaña coming through the six senses, our "mindset" or "temporary bhavanga" can change many times a day, as we saw above.
- I will be using "mindset" and 'temporary bhavañga" interchangeably so that you will get used to the meaning.
- Now you can start seeing the difference between Upapatti PS and Idappaccayatā PS. In the former, "bhava" refers to "human existence," while in the latter, "a temporary bhava" is the mindset (or existence) lasting a relatively short time.

## Only "Strong Arammaṇa" Can Bring in a "Temporary Bhavañga"

4. During a day, we get bombarded with an uncountable number of ārammaṇa, i.e., sensory inputs comping through the six senses. Yet, we don't pay attention to most of them, i.e., they are "weak ärammana" not strong enough to "grab our attention." In such cases, there is no change in the "bhavañga" or "mindset."

- So, what kind of ārammaṇa "grabs our attention" and changes the "bhavañga" state?
- That would be one we "really like," "really dislike," or "something unusual or something we cannot understand." In the latter case, we could get into a "confused state of mind." A "strong a rammana" is usually associated with "lobha," "dosa," and "moha."
- Let us examine the examples in \#1 to clarify.

5. Taste of food was a "strong ārammana" that changed the mindset from the "natural bhavañga" state to a good "temporary bhavañga" state. Here, the àrammaṇa was associated with lobha (attachment via liking.)

- Then another "strong ārammana" of "seeing the hair" flipped the mindset to an angry "temporary bhavañga" state. That ārammaṇa was associated with dosa (attachment via dislike.)
- Hearing the waiter promising to bring a new meal was new "strong ārammaña" made a good "temporary bhavañga" again. That ārammaṇa was associated with lobha (attachment via liking.)
- Seeing Y on the road was enough for X to get into a bad state of mind (with dosa) again.

6. To summarize: Our minds usually are in the "natural bhavañga" state that comes with human existence. It can change to a different "temporary bhavañga" by a 'strong ārammana." Depending on how strong that $\bar{a} r a m m a n ̣ a ~ i s, ~ t h e ~ " t e m p o r a r y ~ b h a v a n ̃ g a " ~ c a n ~ s t a y ~ f o r ~ m i n u t e s ~ t o ~ h o u r s ~ t o ~ m a n y ~ d a y s . ~$

- In the examples discussed above, "temporary bhavañga" states lasted only for short limes, less than an hour. In the Abhidhamma language, such ārammaña are categorized as "mahantārammaṇa" ("mahanta + ārammaṇa" or "strong ārammaṇa.")
- However, a very strong ārammana can keep that "temporary bhavañga" state for many days. For example, upon hearing the death of a parent, one may get into a "sad mindset" that can last even weeks. They are "very strong ārammaṇa" or "atimahantārammaṇa" ("ati + mahanta + ārammaṇa".)

## How Does an Ārammaṇa Change the Mindset (Bhavañga)?

7. It is CRITICALLY important to understand how the mindset (temporary bhavañga) changes due to an ārammaṇa.

- As we discussed, a new ārammaṇa comes via a new sensory input coming through the six senses. Thus, it is one of the following: cakkhu, sota, ghāna, jivhā, kāya, or mano viñ̃n̄ạna. They are ALL vipāka viññāna. They provide sensory input. We see, hear, taste, smell, touch, or recall a memory. That, by itself, cannot change our mindset.
- For example, an Arahant will also see attractive things or taste a delicious meal. But no matter how delicious that meal is, it will NOT change the mindset of an Arahant.
- But the person in our example in \#1 above got "attached" to the tasty meal. That is normal for an average human, and so are the other "mood swings" that the person went through in \#1. But it is essential to understand how each of those swings in the mindset took place.

8. Delicious taste from the meal was a vipāka viññanna, specifically a jivhā viññanna. The pleasant taste experienced was a natural vipāka vedanā associated with that vipāka viññāna. If an Arahant had eaten the same meal, he would have experienced its delicious taste. But what happens immediately after taking the first few bites would be very different for X and the Arahant.

- X got attached to the taste of the meal. In the Dhamma language, he started generating vaci abhisañkhāra that naturally would arise for an average human. He started thinking about how delicious the meal is AND how he might come back to the restaurant to have the same meal. Those thoughts were lobha-based (i.e., greedy) vacī abhisañkhāra. They were a strong version of sañkhāra, i.e., abhisañkhāra. Thus, they arose via "avijjā paccayā abhisañkhāra" in Idappaccayatā Paṭicca Samuppāda.
- That immediately led to the second effect of "deciding to come back to the restaurant in the future to have the same meal." That expectation is a kamma viññanna. That kamma viññāna or the "expectation" was the result of abhisañkhāra, i.e., "(abhi)sañkhāra paccayā viññāṇa."

9. Those abhisañkhāra and kamma viññāna arose in powerful javana citta that ran through X's mind while he was enjoying the meal. His mindset (temporary bhavañga) also changed to a "happy state."

- So, here is the time sequence: (i) experience of a delicious taste (vipāka viññāna), (ii) arising of "happy but greedy thoughts" or vacī abhisañkhāra in javana citta, (iii) arising of a future expectation of having the same meal (creation of a kamma viññāna), and (iv) registration of that experience as a 'temporary bhavañga" state.
- Note: Javana cittā are a special type of citta that makes a kamma viñnāạa more than just "consciousness." A kamma viññāna has an expectation/desire. Abhisañkhāra (with strong feelings) arise in javana citta and make javana citta become kamma viññāna.
- As we know, vipāka viñnāṇa are of six types: cakkhu, sota, ghāna, jivhā,kāya, and mano viññāna.
- On the other hand, kamma viññāna are ALWAYS mano viññāna. We create kamma viññạ̄a with javana citta. Such kamma viññāṇa arises via "(abhi)sañkhāra paccayā viññāṇa" in any type of Paṭicca Samuppāda.

## No Change in Mindset (and No Javana Citta) in an Arahant

10. Now, let us see what would happen to an Arahant if he had the same meal.

- The Arahant would have tasted the meal to be delicious too. Thus, the vipāka viññāna (jivhā viññāna) was the same.
- But since an Arahant would not generate any lobha, dosa, moha thoughts, vacī abhisañkhāra that arose in X will not occur in the Arahant. Thus, such powerful javana citta would not have arisen in the Arahant.
- Thus, the Arahant will not generate any future expectation to taste it again, i.e., no kamma viñ $\tilde{n} a \bar{n} a$.
- Furthermore, the Arahant would not generate a "happy mindset" "temporary bhavanga" state. An Arahant will always have a neutral mindset.

11. Thus, abhisañkhāra in javana citta, establishing a new expectation (kamma viññāna), and change in the bhavañga (mindset) will occur ONLY IF one attaches to a strong ārammaṇa.

- Those are the drastic differences between X and an Arahant due to eating the same meal.
- In the next post, we will discuss why such javana citta with lobha, dosa, moha would not arise in an Arahant.
- It is critical to realize that an Arahant does not need to control the arising of such defiled thoughts. It happens automatically. The root causes for arising of such thoughts had been removed from the mind of an Arahant.

### 6.1.1.2 Khandhā in Idappaccayatā Paṭicca Samuppāda

## March 28, 2022

We never experience a single unit of cognition, but only khandhas or the cumulative effect of millions/billions of such units. That is why instead of r $\bar{p} p a$, vedanā, saññ̄, sañkhāra, viñ̃n̄̄ṇa some suttas refer to "heaps of them" called khandhas, i.e., rūpakkhandha, vedanākkhandha, saññākkhandha, sañkhārakkhandha, and viññānakkhandha.

## Five Aggregates in Different Contexts

1. As we know the five aggregates (pañcakkhandhā) are rūpakkhandha, vedanākkhandha, saññäkkhandha, sañkhārakkhandha, and viññānakkhandha. As is the case with many Pāli words, we need to understand the meaning of a "khandha" or a "collection/aggregate" in the context of where it is used.

- As we discussed, Idappaccayatā Paticcca Samuppāda explains how our actions at the PRESENT moment can impact our future.
- The Buddha described our "mental aspects" with four entities: vedanā, saññā, sañkhāra, and viññāṇa. Those mental entities arise when internal r $\bar{u} p \bar{a}$ make contact with external ru $\bar{u} \bar{a}$. Thus, $r \bar{u} p a$ is the fifth category in the five aggregates of $r \bar{u} p a$, vedanā, saññ̄ $\bar{a}$, sañkhāra, and viññāna.
- But why do we talk about the "aggregates" (or "khandha") of those entities?
- The reason is that we NEVER experience a single such entity even at a given moment. Thus, we only EXPERIENCE the effect of numerous such entities (khandha) even in Idappaccayatā Pațicca Samuppāda.

## We Experience Not a Citta but Viññ̄ạakkhandha

2. There is no English word for "citta." A "thought" may have billions of cittā. Furthermore, each citta evolves into viñ̃̃äna and we experience the effect of billions of them called viññānakkhandha. Let us discuss that in detail.

- We NEVER experience a "pure citta." Instead, we only experience the cumulative effect of billions of viññāna that arise within a fraction of a second. That is why many suttas refer to "collections of viññāna" or "viññānakkhandha."
- The same is true for vedanā, saññ̄a, and sañkhāra. We never experience single units of them, but only "aggregates" of them, i.e., vedanākkhandha, saññākkhandha, and sañkhārakkhandha.
- Even though a sensory event may be initiated by a rasa rūpa (taste) we may be smelling it at the same time (gandha rūpa). The appearance of food (vanṇa rūpa) will affect our thinking too. Furthermore, the next bite may taste a bit different, even though it is also a rasa rūpa. Thus, we always experience multiple rūpa (rūpakkhandha) within a short time.
- It is critical to understand the concepts in this post. It will become invaluable when we start discussing the concepts of "sakkāya ditthi" and "anatta."

3. When a new sensory input (ārammaña) makes contact (phassa) with the mind, that triggers a series of citta or a "citta vīthi." Billions of such citta vīthi can run through the mind in a split second! Note that citta pronounced "chiththa"; see Ref. 1 below on "writing in Tipitaka English" and pronunciation.

- Citta, viññāna, and viññānakkhandha are DIFFERENT STAGES of the same entity. It may be hard to believe but it is true.
- As we have discussed it is NOT correct to translate viññāna as "consciousness" in general. As we saw, viññāna are mainly of two types (vipāka viññāna and kamma viññāna) OR six types (cakkhu, sota, ghāna, jivhā, kāya, and mano viñ̃āạna.)
- All six types in the second category fall in the vipāka viñãāṇa category. Kamma viñ̃ãaña are ALWAYS mano viññāṇa. Thus, mano viññāna can be either vipāka viññạ̣̄a or kamma viññāṇa. Explanation of what happens in a citta vithi will help clarify that.
- However, clarification of how a citta evolves is the first step. That will take the mystery out of these related words. So let us do that first.

## A Citta Evolves into Viñ̃̄āṇa and Viññāṇakkhandha Within Fraction of a Second!

4. A citta is the elementary unit of cognition in Buddha Dhamma. There are THREE critical things to remember about citta:
(i) A single citta NEVER arises by itself. It arises in a series of citta or citta vīthi.
(ii) A citta arises and perishes in an unimaginable small time. The Buddha said there can be billions of citta vīthi arising within the "blink of an eye." See Ref. 2.
(iii) During that unimaginably small time interval, a javana citta evolves through nine stages of evolution (Ref. 3): citta, mano, mānasaì, hadayaì, pandaraì, mano manāyatanam், mana indriyaì (or manindriyaì), viñ̃̃̄̄̄na, viññānakkhandha. While you may not be familiar with many of those intermediate stages, you have probably come across those highlighted in orange.

- By the time the viññannakkhandha is reached, the mind has incorporated ALL relevant information for that ārammana from past experiences as well as one's expectations for the future. We never perceive ANY of the intermediate states, but only the viññānakkhandhastage. That is why most suttas only refer to viññānakkhandha.
- Only a Buddha can "see" such fast processes. We are aware only of the CUMULATIVE EFFECT of billions of citta vithi that go through within a second, i.e., we are aware ONLY of viññānakkhandha.

## Influence of Bhavañga (Mental State) Preceding an Arammaṇa on a Citta Vīthi

5. In the previous post, we discussed how our mindset can change (to a temporary bhavañga state) due to an ārammaṇa. See, "Change of Mindset Due to an Ārammana."

- That "change in the mindset" happens with a special type of citta called javana citta; see \#9 of that post.
- Then that citta vīthi will alter the mindset (bhavañga) and that new mindset (new bhavañga) will affect the next citta vithi.
- Thus, one may end up with a drastically different mindset within a fraction of a second. That is why we can even see an angry person getting angrier very quickly. Once this process is understood, we will get a good idea of how to control anger. The same is true for kāma rāga too.
- It may appear that I keep jumping from one subject to another. But all these pieces are very much inter-related. It may take a few more posts to "see the whole picture."

## A Citta Arises with Seven Cetasika (Mental Factors) and Add More As It Evolves

6. A citta ALWAYS arises with a number of cetasika (mental factors) that define the "quality" of the citta. In the first citta stage, there are only 7 cetasika that arise with the citta: phassa, vedan $\bar{a}, \operatorname{san} \tilde{n} \bar{a}$, cetan $\bar{a}$, manasikāra, ekaggatā, and jivitindriya. It is a "pure citta" or a "pabhassara citta." See Ref. 4.

- As the citta evolves through the next stages, the mind KEEPS ADDING more cetasika and the citta becomes increasingly contaminated. By the viñ̃ñ̄na stage, it is fully contaminated; see Ref. 3. That "contamination" happens within an unbelievably small time. We CANNOT consciously control that. It happens according to our gati (character/habits).
- That contamination takes place via incorporating more cetasika (greed, anger, etc) and those "added cetasika" are collectively called "sañkhāra." For example, apuñña abhisañkhāra involves cetasika like lobha and dosa, while puñña abhisañkhāra adds cetasika like alobha and adosa.
- Now, let us see what is meant by viñnäñakkhandha in different contexts.

## We Experience the Cumulative Effect of Numerous Units of Viñnāāna

7. As we saw in \#4 above, millions of citta (or citta vith ) can arise within a fraction of a second! A citta vīthi starts with a vipāka viñ̃n̄ạna and ends up with kamma viññāna (in javana citta).

- Furthermore, the mind can analyze different anrammaṇa coming through any of the six senses within a fraction of a second. Thus, during a fraction of a second, the mind experiences a "heap/collection" of different types of vipāka viññanna (cakkhu viñ̃āạa through mano viññāna.) It will also experience kamma viṇ̣̃̃̄̄̄a (mano viññāna) in javana citta that arise in citta vithi.
- A "khandha" ("mestę" in Sinhala) means "a collection/aggregate" or a "heap."
- Thus, we ALWAYS experience viññānakkhandha or a "heap" of many types of viññạna. We never experience a single cakkhu viññāna or a mano viññāna, for example.
- The same is true for other aggregates of rūpakkhandha, vedanākkhandha, saññākkhandha, and sañkhārakkhandha.

## Other Khandhas - Vedanākkhandha, Saññākkhandha, Saṅkhārakkhandha

8. Now we can see that ALL FOUR mental aggregates (vedanākkhandha, saññäkkhandha, sañkhārakkhandha, and viññānakkhandha) arise when an ärammaṇa comes to the mind. As we saw in \#2 above, any $\bar{a} r a m m a n ̃ a ~ w i l l ~ a l s o ~ i n i t i a t e ~ c o n t a c t s ~ w i t h ~ m u l t i p l e ~ r u ̄ p a ~ a n d ~ w e ~ e x p e r i e n c e ~ t h e ~ c u m u l a t i v e ~$ effect of rūpakkhandha.

- In \#6 above, we saw that vedanā, saññ̄a, and cetanā arise with the first stage of a citta. As the citta evolves through those 9 stages to become a viññānakkhandha, vedanā and sañña also evolve to become vedanākkhandha and saññākkhandha!
- For example, when we watch a movie, we will recognize many types of sights and sounds, i.e., different sañña (due to different types of $r \bar{u} p a$ ), within short times; we may also experience different types of vedanā.
- Thus, it is important to realize that we NEVER experience a citta but are aware of one type of viñ $\tilde{n} \bar{a} n a$.
- An ārammaṇa brings in a vipāka viññāna and based on that we either initiate a new kamma viñ̃āṇa or strengthen an existing kamma viññāṇa.

9. Also note that mano sañkhāra are defined as "vedanā and saññā", and thus, mano sañkhāra are also part of even a pure citta.

- As a citta evolves into viññanna, it incorporates other types of cetasika. That gives rise to vacī and kāya sañkhāra. Thus, different types of vacī and kāya sañkhāra are incorporated by the time a citta evolves into the viñ̃̄āna stage. (Don't worry if you don't understand that part yet.)
- We can clearly see the unbelievable rapidity (and complexity) of the evolution of a citta to viññānakkhandha and, at the same time, also giving rise to vedanākkhandha, saññākkhandha, and sañkhārakkhandha.

## Summary

10. We discussed the formation/arising of the five aggregates (pañcakkhandh $\bar{a}$ ) in Idappaccayat $\bar{a}$ Pațicca Samuppāda, i.e., within a relatively short time.

- At a given moment, we only experience things that took place over a fraction of a second. That is a LONG TIME in terms of the lifetime of a citta!
- Thus, we experience only the cumulative effect of billions of citta. By that time all those cittas would have evolved into different types of viṇ̃̃̄̄̄a, and thus we experience an aggregate/collection of viññāna or viññānakkhandha.
- Not only that, but we also experience the cumulative effect of a variety of $r \bar{u} p a$, vedana $\bar{a}$, sañn $\bar{a}$, and sañkhāra (as rūpakkhandha, vedanākkhandha, saññäkkhandha, and sañkhārakkhandha.)
- As the citta evolves the cetanā cetasika incorporates one's gati (character/habits) RELEVANT TO that specific ārammana. Thus, the evolution of the five aggregates will depend on the person. That happens automatically, without us even being aware of it. We will discuss that in the next post.

11. The above analysis may appear complex at first, but it will immensely help in clarifying many 'knotty issues" that I see discussed over many years at discussion forums. It is a good idea to periodically review the posts in this new section "Paticca Samuppāda During a Lifetime."

- Please read them repeatedly and even print this post and keep it for future reference. If there are questions/comments, please use the discussion forum.

## References

1. It is highly beneficial to learn how to pronounce Pāli words. When the European scholars started writing the Pāli Tipitaka with the English alphabet, they came up with a unique system that I call the "Tipiṭaka English" Convention. It has helped keep the 'word length" short.

- For example, even though written as "gati," its pronunciation is "gathi." Similarly, "icca" is for "ichcha." If written as pronounced, "dhammacakkappavattana" would be "dhammachakkappavaththana."
- See ""Tipitaka English" Convention Adopted by Early European Scholars - Part 1" and "Tipitaka English" Convention Adopted by Early European Scholars - Part 2" for details.
- A pronunciation guide at "Pāli Glossary - (A-K)" and "Pāli Glossary - (L-Z)."
- Don't be discouraged. Start getting used to the method of learning the meanings/pronunciations gradually. Learn the common keywords first.

2. Buddha said it is hard to find any phenomena in this world that change faster than the mind: "WebLink: suttacentral: Añguttara Nikāya (1.48)."

The short sutta says: "Nāhaì, bhikkhave, aññaì ekadhammampi samanupassāmi yaím evaì lahuparivattaì yathayidamं cittam். Yāvañcidaì, bhikkhave, upamāpi na sukarā yāva lahuparivattaí cittan"ti."

Translated: "I consider, bhikkhus, that there is no phenomenon that comes and goes so quickly as citta. It is not easy to find an analogy (a simile) to show how quickly citta changes."

4. A "pure citta" or a "pabhassara citta" recognizes an ārammaṇa as sight, sound, etc. but does not recognize it. See "Pabhassara Citta, Radiant Mind, and Bhavanga." One is only aware that one is living. That is the experience of an Arahant in "Arahant-phala Samapatti."

### 6.1.1.2 Seeing Is a Series of "Snapshots"

## April 4, 2022; revised April 6, 2022 (\#9)

Even though we perceive seeing to be continuous, it results from a series of discrete sensory events or "snapshots." That is the real meaning of the verse, "dittthe dittthamattaim bhavissati." The other sensory experiences work the same way.

## Mind and Cittā

1. A mind is not active all the time. For example, when in deep sleep we are not even aware that we are alive. The mind becomes active when an ārammaña comes in via one of the six sense faculties. An
$\bar{a} r a m m a n ̣ a ~ t r i g g e r s ~ c i t t t \bar{a}$ (plural of citta) to arise - and the mind to become active. That is why some consider the mind synonymous with citt $\bar{a}$, but that is not correct.

- It takes numerous citta vīthi for us to be aware of that ārammaṇa AND identify what that ārammana is. For example, when we hear a glass falling and breaking, it only takes a split second for the mind to register that sound and for us to become aware of it. But numerous citta vithi run during that split second.
- A citta can take only one ārammaṇa at a time. In fact, all cittā in a citta vīthi take the same $\bar{a} r a m m a n ̣ a$. We CANNOT see and hear at the same time. When a new ārammaṇa comes in, a new citta vithi focused on that starts. But since the mind is so fast, it appears to us that we are seeing and hearing at the same time.
- Thus the mind can take in many a arammana within a second BECAUSE it is so fast! That means the mind can jump from one ārammaṇa to another and back in a split second.

2. Buddha said it is hard to find any phenomena in this world that change faster than the mind: "WebLink: suttacentral: Anguttara Nikāya 5. Panihitaacchavagga (AN 1.48)".

- The short sutta says: "Nāhain, bhikkhave, añnam ekadhammampi samanupassāmi yain evain lahuparivattaì yathayidaì cittaì. Yāvañcidaì, bhikkhave, upamāpi na sukarā yāva lahuparivattaì cittan"ti."
- Translated: "I consider, bhikkhus, that there is no phenomenon that comes and goes so quickly as citta. It is not easy to find an analogy (a simile) to show how quickly citta changes."
- Also see the previous post, "Khandhā in Idappaccayatā Paticca Samuppāda."

## $\bar{A} r a m m a n ̣ a ̄ ~ C o m e ~ i n ~ v i a ~ t h e ~ S i x ~ S e n s e ~ F a c u l t i e s ~$

3. To "experience an arammana," the mind (more precisely, the seat of the mind or hadaya vatthu) must make contact with an external rūpa. The phassa cetasika in a citta makes that "contact."

- There are five types of external rūpa above the suddhatṭhaka stage (vanṇa, sadda, gandha, rasa, and photthabba rūpa.) When one such rūpa contacts the corresponding pasāda rūpa (cakkhu, sota, ghāna, jivhā, or kāya pasāda), that leads to contact (phassa) with the hadaya vatthu simultaneously.
- Then there are $r \bar{u} p \bar{a}$ below the suddhatthaka level (i.e., dhamm $\bar{a}$ ), which directly make contact (phassa) with hadaya vatthu.
- Those six types of ārammaṇa lead to cakkhu, sota, ghāna, jivhā, kāya, and mano viñ̃āṇa. They are all vipāka viññāna.

## We Can Experience Many Ārammaṇa in a Short Time

4. Our experiences are the cumulative effect of billions of "momentary experiences" coming to the mind via cittā (more precisely citta vīthi) arising each second. It will be much easier to proceed once one understands that.

- In the previous two posts, we discussed that the mind is "at rest" in a bhavañga state when not focused on an ārammana, i.e., when not exposed to sensory input. That is the case when we are sleeping. Even while we are awake, the mind could be in a bhavañga state if there is no active ārammana. That happens, for example, when we feel drowsy.
- Furthermore, since the flow of citta vithi is so fast, the mind could be in a bhavañga state between citta vīthi for a short time.
- When a robust sensory input comes in, the mind comes off that bhavanga state and starts focusing on that $\bar{a} r a m m a n a$ with citta wīthi. However, the mind can switch back and forth among several ārammaṇa within a short time. Let us take an example to illustrate that.

5. Suppose you are having a meal with a friend. Let us see how many ārammana run through your mind within a few minutes.

- Your friend is talking, and you are listening. That is an ārammana coming through sotadvāra or the ears. You see the meal in front of you, and that ārammaña comes through cakkhudvāra (eyes). You take a bite and taste the food (jivhādvāra or tongue). You also see your friend (another cakkhudvāra $\bar{a} r a m m a n ̃ a)$. If someone drops a glass at a nearby table, you will hear it breaking (sotadvāra.)
- As you can see, the mind can switch very fast among all such ārammaṇa coming in rapidly!

## The Amazing Mind

6. It is even more impressive that the mind can recognize ALL those ārammaña without the slightest pause. That may sound trivial at first but think about it carefully.

- Suppose your friend (X) is talking about a mutual friend, Y. As X talks, you can relate to everything about Y . The mind can recall your past experiences with Y and relate to your friend's account.
- While that is happening, you can see and identify all types of foods on your plate. You are chewing food and experiencing its taste.
- You are looking at the friend, too, and can relate to his words and hand motions.
- When you hear the glass breaking at a nearby table, you know what happened without even seeing someone dropping the glass.
- How does the mind do ALL THAT in a split second? It is a real problem for scientists who believe that the mind IS the brain, as we discuss below.

## Even Processing a Single Ārammaṇa Is a Complex Process

7. It gets even more complex. Even recognizing a single ārammana involves many things taking place rapidly.

- Let us think about recognizing the food on the plate. When the waiter brought in the food, you looked at the plate and immediately identified the food; let's say that it is a pizza.
- You may say that is trivial. But suppose your friend came from a remote village in a distant country and had never seen or tasted a pizza. He would not know what it was.
- You knew that it was a pizza because you had seen and tasted pizza many times. But how did the mind recall such past experiences and recognize the pizza in such a short time? Not only that, but you know how it will taste before you take a bite.

## The "Binding Problem" in Neuroscience

8. Think about all the sensory experiences mind was able to process within a couple of minutes in \#5 and \#6.

- Modern science is grappling with the issue involving just one such sensory experience right now. Neuroscientists are trying to figure out how the brain identifies a given object, say, a car coming towards you on the road. When you see a vehicle, you recognize its color, shape, and rough distance from you to the vehicle. If you are crossing the road, you may run to avoid the car hitting you if you think it is coming too fast.
- Neuroscientists are trying to figure out how the brain gets all that done in a split second. That is the "binding problem" in neuroscience. It is a sub-category in the general problem of mind tackling several sensory inputs (like in \#5 and \#6 above), blending all that into a smooth sensory experience. See the Wikipedia article, "WebLink: en.wikipedia.org: Multisensory integration."
- They will never figure that out. It is the hadaya vatthu (seat of the mind in Buddha Dhamma) that recalls past events VERY FAST. However, the brain DOES play a crucial role in processing
incoming sensory data. Then it passes that information to hadaya vatthu. I have discussed that in a bit technical post: "Brain - Interface between Mind and Body."

## Relation to Perception of " $I$ " or "Me"

9. This fantastic ability of the mind (more correctly hadaya vatthu) to process and identify multiple sensory inputs in a split second leads to the perception of a "person" experiencing all those sensory inputs.

- But the Buddha explained that all sensory experiences result from an EXTREMELY FAST automatic progression of discrete events that runs through a mind ONE AT A TIME; see below.
- Thus, there is no "person" experiencing ALL SIX sensory inputs at the same time. It is just a process taking place ONE sensory input at a time!

## Seeing Is a Series of "Snapshots"

10. To get the basic idea, let us focus on a series of events involving just vision.

- A video camera captures many static pictures (snapshots) of a scene when making a movie. Then those snapshots are projected to a screen at a specific rate. If the playback speed is too slow, we can see individual pictures, but above a particular "projection rate," it looks like actual motion. Here is a video that illustrates this well:

```
WebLink: youtube: Animation basics: The optical illusion of motion - TED-Ed
```

- A movie projector projects static pictures to the screen at a rate of about 30 frames a second, and we see the movie as a continuous progression of events.
- More details in "Vision Is a Series of "Snapshots" - Movie Analogy."

11. In the same way, our minds do not experience the continuous motion of objects. The mind receives only discrete snapshots of the object (at certain time intervals) from the brain. Therefore, in reality, we see only a "movie" put together by the mind based on a number of "snapshots" per second. That is why the Buddha called viññaṇa a "magician."

- That is what the Buddha explained to Bāhiya in the "WebLink: suttacentral: Bāhiva Sutta (Ud 1.10)" with the verse, "diṭthe dittthamattaì bhavissati, sute sutamattaì bhavissati,.."
- That verse is incorrectly translated as; "In the seen will be merely the seen; in the heard will be merely the heard.."
- However, it explains exactly what we discussed above. Seeing is just like taking a series of snapshots. What we PERCEIVE as a person walking is really a series of such snapshots "made into a movie" by the mind. The same holds for hearing, tasting, etc.
- We will discuss that in detail in upcoming posts. Understanding that will help get rid of sakkāya diṭthi.

## Summary

12. First thing is to understand that it is WRONG to translate citta as either a "thought" or "mind." A "thought-moment" may be better. A mind appears fast because numerous cittā run through the mind very fast.

- A citta is the smallest unit of cognition. There could be billions of cittā arising in a mind in a second. Only a Buddha can "see" or "experience" a citta! We only experience the cumulative effect of millions of cittā that run through the mind in a split second.
- As we have discussed, a citta evolves to the viññāna stage. We experience the effect of "bundles" or "aggregates" of such viññāna. That is the reason for using "viññānakkhandha" instead of viññāna in many instances in Buddha Dhamma.

13. The "movie analogy" in \#9 above explains the basic idea of how the mind sees the external world "seemingly without any gaps" even though only a series of 'snapshots" come into the mind.

- The following post will discuss how the mind tackles several DIFFERENT sensory inputs (sights, sound, taste, etc.) that we discussed in \#5 and \#6 above.
- All posts in this subsection at, "Paticca Samuppāda During a Lifetime."

### 6.11.2 Aggregate of Forms - Collection of "Mental Impressions" of Forms

April 10, 2022
The aggregate of forms (rūpakkhandha) is not a collection of forms or rūpa. It includes mental impressions of $r \bar{u} p a$ that one has experienced. Here we discuss how that accumulation of "mental impressions of $r \bar{u} p a$ " takes place.

## Rūpa and Rūpakkhandha

1. $\boldsymbol{R} \bar{u} p \bar{a}$ (normally translated as "forms") are those in the external world: visuals of people, tress, etc., sounds, tastes, odors, and other objects that we touch. Rup $\bar{a}$ (plural of $r \bar{u} p a$ ) are made of the four great elements: pathavi, āpo, tejo, vāyo.

- On the other hand, rūpakkhandha (normally translated as the "aggregate of forms") consists of a person's MENTAL IMPRESSIONS of such rūpa. In a day, we see, hear, taste, smell and touch many things and ALL those impressions are added to a person's rūpakkhandha each second.
- These days, only a handful of people have understood that. It is very important to understand what rūpakkhandha is.
- I have set the background with two previous posts referred to below. You may want to read them as needed.

## Rūpakkhandha Grows With Each Ārammaṇa

2. The concept of rupakkhandha (form aggregate) is easily explained with an example. It starts with an arrammana coming to the mind via one of the six senses.

- As we discussed in recent posts, the mind can stay on ONLY ONE ārammaṇa at any given time. However, the mind can jump back and forth among all six senses very fast.
- How quickly the mind can jump among different senses is limited ONLY by how fast the brain can process information coming through the five physical senses (eyes, ears, tongue, nose, and body).
- In the posts, "Seeing Is a Series of 'Snapshots"" and "Vision Is a Series of "Snapshots" - Movie Analogy" we discussed some examples. Let us discuss that further to clarify what happens in terms of a series of "snapshots" the mind receives RANDOMLY from the six senses. The following is the example in \#5 of the post "Seeing Is a Series of 'Snapshots'." We can further simplify by focusing on just three ārammaṇa.

## Example of Accumulation of Rūpakkhandha

3. Suppose you are having a meal with a friend. Let us see how many citta vìthi run through your mind within a few minutes due to different ārammaña.

- Your friend is talking, and you are listening. That is an ārammaña coming through sotadvāra or the ears. You see him too, and that ārammaṇa comes through cakkhudvāra (eyes). You take a bite and taste the food (jivhādvāra or tongue).
- You can experience all of those without any pause. It FEELS as if you are experiencing all three simultaneously. But that is only an illusion arising from the fact that the mind is THE FASTEST entity in this world. We discussed that in those two posts.
- As you can see, the mind can switch very fast among all discrete data sets from all ārammaña coming in rapidly!

## It takes Four Citta Vīthi to Process One "Data Set" from One Ārammana

4. As we have discussed, the mind receives ONLY ONE snapshot (let us call it a "data set") at one moment through sotadvāra, cakkhudvāra, or jivhādvāra, in the above example. The brain may process those sensory signals ("data sets") in parallel. But when they come to the mind, the mind processes only one "data set" at a time. But since the mind is unimaginably fast, it appears that the mind processes them simultaneously.

- In our example of \#3 above, let us say the mind (more correctly the seat of the mind or hadaya vatthu) processes them in the following sequence: sotadvāra, cakkhudvāra, jivhādvāra. Each one involves a citta vīthi (with 17 cittā.)
- We also need to keep in mind that each of them is fully absorbed by the mind with three more manodvāra citta vith $h i$. I mentioned that in \#1 of the post, "Vision Is a Series of "Snapshots" - Movie Analogy."
- Therefore, citta vīthi go through the mind in the following order: 1 sotadvāra/3 manodvāra, 1 cakkhudvāra/3 manodvāra, 1 jivhādvāra/3 manodvāra.
- As the brain keeps sending more "data sets," such citta vīthi keep flowing through the mind.

## Hundreds of "Data Sets" Processed by the Mind in a Second

5. To keep it simple, let us assume that no other ārammaña comes to mind for several minutes. Furthermore, let us assume that subsequent citta vithi flow through the mind in the same order. Thus, we have 1 sotadvāra/3 manodvāra, 1 cakkhudvāra/3 manodvāra, 1 jivhādvāra/3 manodvāra, 1 sotadvāra/3 manodvāra, 1 cakkhudvāra/3 manodvāra, 1 jivhādvāra/3 manodvāra, ...

- The series in bold is the second series of citta vīthi. In the second post mentioned above (see \#11), we estimated that the brain can process about 100 data packets on vision per second. Each of those will trigger 1 cakkhudvāra/3 manodvāra citta vīthi.
- Therefore, in a second roughly $\mathbf{3 0 0}$ of the following set will go through the mind: 1 sotadvāra/3 manodvāra, 1 cakkhudvāra/3 manodvāra, 1 jïvhādvāra/3 manodvāra.

## Mind Can Sort Out "Data Sets" from Different Senses

6. In other words, the mind will get a "sound bite" of your friend's words (possibly one word) followed by a "snapshot" of your friend. That is immediately followed by a bit of taste of the food. It is critical to think through exactly what takes place.

- The point is that the mind can handle ONLY ONE sensory input at a time. The brain keeps sending 100 packets of "data" (per second) on each of the three senses involved in our example: sound, taste, and vision. The mind is much faster than the brain and it processes all of them without any problem.
- But the intriguing thing is that the mind DOES NOT receive "data" continuously from one sense. Rather it gets bits of data on sound, vision, and taste. Then that sequence is repeated. Thus here is the sequence of "bits of data" that comes to the mind: sound/vision/taste, sound/vision/taste, sound/vision/taste, ...

7. But the mind has the amazing ability to sort out and connect data from each sense faculty separately.

- Thus, in the above example, the mind will have formed THREE separate chains of data: sound, sound, sound, $\ldots$ vision, vision, vision,... taste, taste, taste, ...
- In other words, the mind is capable of putting the "bits of data" on sound coming at different times together as one series and thus understanding the meaning of your friend's words. For example, it may hear the friend say "my dad", "came to", "see me", and "yesterday." But they did not come in one after the other. Adjacent sets of words were separated by bits of data on vision and taste. But the mind was able to put it all together as "my dad came to see me yesterday."

8. In the same way, it may get the taste of a bit of meat in one packet, and a bit of cheese in another, with data on vision and sound coming in between. But the mind combines all that to give YOU the taste of the pizza.

- Same for vision. The mind combined many "snapshots" of your friend in several seconds and see him taking and eating. That part of the vision is exactly the same as projecting static pictures in a movie that we discussed in those two previous posts.
- All sensory data for the three senses got added to the rūpakkhandha in the above example.

## What Is in the Aggregate of Forms (Rūpakkhandha)?

9. The five types of aggregates (khandhas) are explained in the "WebLink: suttacentral: Khandha Sutta (SN 22. 48)." There, the rūpakkhandha (form aggregate) is, "Yaim kiñci, bhikkhave, rūpaìm atītānāgatapaccuppannaì ajjhattaì vā bahiddhā vā oḷārikaì vā sukhumaì vā hinaì va panītaì $v \bar{a}$ yaì dūre santike $v \bar{a}$, ayaì vuccati rūpakkhandho."

Translated: "Any kind of rūpa-past, future, or present; internal or external; coarse or fine; inferior or superior, far or near: all of them belong to the aggregate of form or $r \bar{u} p a k k h a n d h a$."

- The key point here has not been explained in current English translations. All rūpā that belong to $r \bar{u} p a k k h a n d h a$ are the "mental impressions" of external r $\bar{u} p \bar{a}$. In other words, they are NOT made of pathavi, āpo, tejo, vāyo, or suddhāṭthaka.
- But, of course, those "mental impressions" arose DUE TO external rūpa made of pathavi, āpo, tejo, vāyo, or suddhātṭhaka.

10. One easy way to see that is to see that the Buddha included all past rūpa in rūpakkhandha. That means any $r \bar{u} p a$ that one saw, heard, tasted, smelled, touched, or thought about is included. Since our past goes back to infinite time, a VAST MAJORITY of rūpa in the rūpakkhandha are such past rūpa.

- For example, suppose YOU saw a tree yesterday. The "mental impression" of that tree is in YOUR rüpakkhandha. You can recall how it looked if you took a good look at it. Even if that tree was cut down just after you looked at it, that mental impression is still there. It is in YOUR rūpakkhandha.
- However, since I did not see that tree, MY rüpakkhandha does not have an impression of that tree.
- Each person has their own rūpakkhandha.

## Present (Paccuppanna) Rūpa Are Just a Fraction!

11. As we discussed, the present (paccuppanna) moment lasts only a split second. If we say the word "kaya" by the time "ya" sound comes, the "ka" sound has gone to the past.

- Thus each rūpa experienced in a fraction of a second immediately goes becomes a "past rūpa." The "present moment" is gone in a flash!
- Future (anāgata) rūpa are mental impressions of $r \bar{u} p a$ that one hopes to experience in the future.
- The other types of rūpa are sub-categories of the past, present, and future rūpa. Internal (ajjhatta) rūpa are those that are part of oneself: all body parts, including the ones inside the body.

External (bahiddha) rūpa are, of course, anything outside of one's body. Coarse (olārika) rūpa are what we call "solid matter," and fine/subtle (sukhuma) rūpa are "energy" (heat, sound, dhammā, etc.)

- As we can see, rūpakkhandha grows immensely even in a day. But we attach to only a tiny fraction of it. That fraction is rūpupādānakkhandha (commonly translated as "aggregate of form connected with grasping."

## What is in the Rūpupādānakkhandha ("Aggregate of Forms Grasped")?

## 12. $\boldsymbol{R} \bar{u} p u p \bar{a} d \bar{a} n a k k h a n d h a(r u \bar{p} a+u p \bar{a} d \bar{a} n a+k h a n d h a)$ is the collection of forms that "one is attached to" or "one has grasped"; The Buddha stated that in the same Khandha Sutta that defined rūpakkhandha

 in \#9 above; see Ref. 1.- As we have seen rūpakkhandha includes ALL rūpa that we have ever experienced. That is huge! infinite!
- We don't even remember most of our past rūpa. We are attached to only a tiny fraction of rūpa in our rūpakkhandha. Those are mostly from this life. However, attachment to those has been influenced by $r u \bar{p} a$ experienced in past lives.

13. For example, person $X$ may have "fallen in love" with an attractive person that he saw yesterday. It is possible that out of all persons/things X saw yesterday, only that visual rūpa got "added" to his rūpupādānakkhandha.

- X may have heard many sounds yesterday. Out of those, he may NOT have added any "sound $r \bar{u} p a$ " to his rūpupādānakkhandha even though many "sound rūpa" would have been added to his rūpakkhandha.
- Just think about such examples to clarify the difference between rūpakkhandha and rūpupādānakkhandha.
- Remember that rūpa are six types: They include Rūpa rūpa (or vaṇna rūpa) that one sees. Similarly, sadda rūpa, gandha rūpa, rasa rūpa, phoṭthabba rūpa, and dhamma rūpa (dhammā) are sounds, smells, tastes, touches, and memories.

## Reference

1. In the "WebLink: suttacentral: Khandha Sutta (SN 22. 48)" rūpupādānakkhandha is, "Yaï kiñci, bhikkhave, rūpaiं atītānāgatapaccuppannai் ...pe... yaí dūre santike vā sāsavain upādāniyain, ayaì vuccati rūpupādānakkhandho."

Translated: "Any kind of form-past, future, or present; internal or external; coarse or fine; inferior or superior; far or near, which leads to $\bar{a} s a v a$ (craving) and upādāna (the mind cannot let go of) is called the rūpupādānakkhandha ("aggregate of form connected with grasping.")

### 6.1.1.2 Rūpakkhandha in Idappaccayatā Paṭicca Samuppāda

April 16, 2022
Only a tiny fraction of rūpakkhandha plays a direct role in what happens at a given moment, i.e., in Idappaccayatā Paticca Samuppāda.

## Summary of Rūpakkhandha (Form Aggregate)

1. If you have not read the previous three posts on the form aggregate (rūpakkhandha), it is a good idea to read them first at "Paticca Samuppāda During a Lifetime," starting with "Khandhā in Idappaccayatā Paticca Samuppāda." It is critically important to understand the basic ideas.

- As discussed in those three posts, the form aggregate is MOSTLY our mental impressions of forms (rūpa) that we experienced in the past, including all previous lives.
- Of course, we can recall only a fraction of past $r \bar{u} p a$ that we experienced. However, the cultivation of $j h a ̄ n a$ allows one to remember even previous lives. The Buddha could recall anything from his past lives as far as he wanted.
- Recent findings confirm that moment-by-moment records of ALL rūpa experienced remain intact. Some people can recall past events in astonishing detail.

## Memory Recall - Recent Findings

2. That AMAZING ability first came to light with Jill Price, who contacted a team of scientists in the early 2000s about her ability to recall anything from 1974 onwards. Here is a video of her with Diane Sawyer on an ABC News program in 2008:

## WebLink: youtube: The woman that never forgets - Jill Price First Interview!

- I discussed that video in detail in the post "Where Are Memories "Stored"? - Connection to Pañcakkhandha."
- Discussions with a few more people with that ability are in "Autobiographical Memory - Preserved in Nāma Loka."
- Therefore, it is important to realize that — in the strict sense - rūpakkhandha includes any rūpa that one has ever experienced.
- This fact is a foundation of Buddha Dhamma. It is a fact that RECORDS of ALL past experiences are preserved as "nāmagotta" in viñ̃̃̄̄ṇa dhātu. Thanks to the accounts of Jill Price and others that fact is now undeniable.

## Memories (Nāmagotta) Preserved in Viññāṇa Dhātu

3. The "past component of pañcakkhandha" is preserved as "nāmagotta" in the viñ̃̃āṇa dhātu. Jill Price and a few other people can recall memories in such detail only because those memories (nāmagotta) have been in the viñ̃̃̄ana dhātu. See "Where Are Memories Stored? - Viñ̃̃̄̄na Dhātu."

- In the same way, some children can recall memories from their recent past lives. See "Evidence for Rebirth." Some yogis can remember many past lives. A Buddha can recall any past life as he wishes. For example, Buddha Gotama described the lives of several previous Buddhas (spanning many billions of years) in detail in several suttas. See, for example, "WebLink: suttacentral: Mahāpadāna Sutta (DN 14)."
- Therefore, it is absolutely necessary to include "all past rūpa" in the rūpakkhandha in a general sense.
- However, when one is trying to avoid generating "bad sañkhāra" at the present moment, we DO NOT need to focus on the whole $r \bar{u} p a k k h a n d h a$. We just need to pay attention to the rūpa that we are experiencing at that time. Such ru$p \bar{a}$ belong to "a much smaller "collection of $r \bar{u} p \bar{a}$ " or rūpakkhandha." Let us discuss that now.

## Rūpakkhandha at the Present Moment Is the Most Important

4. Only those rūpakkhandha that arise close to the current moment play a direct role in Idappaccayatā Paticca Samuppāda, i.e., play a role in "what happens at the present moment."

- Even though the "past rūpakkhandha" going back to the "beginningless rebirth process" makes up the bulk of the rupakkhandha of a person, most of us cannot even recall most of the "past rūpakkhandha" from yesterday.
- That is why the Buddha advised Ven. Ānanda to first understand the Idappaccayatā Paṭicca Samuppāda. We discussed that at the beginning of this series a few posts ago. See "Idappaccayatā Paticca Samuppāda - Bhava and Jāti Within a Lifetime."
- But that does not imply that those memory records have no value at all. They do influence our present actions through our samisāric habits.

5. The Idappaccayatā Paṭicca Samuppāda explains the accumulation of kammic energies at the present moment. It is based on rūpakkhandha that arises at the present moment. Of course, they arise and go to the past momentarily. So, rūpa or rūpakkhandha involved in Idappaccayatā Paticca Samuppāda are MOSTLY those that one is experiencing at the present time and moving to the past as soon as they arise.

- That "present time" could vary from minutes to hours depending on how long one's mind is focused on an ārammaṇa.
- Note that rūpakkhandha is only one of five aggregates (khandhās) associated with an experience.
- Before we start discussing the other four aggregates, it is a good idea to understand the usage of the term "rūpakkhandha" in this context.

## Why Do We Call Rūpa Experienced at a given Moment "Rūpakkhandha"?

6. Even over a short time of a few seconds, a mind DOES NOT capture the full impression of a "rūpa" in one instant. Rather, such a sight, sound, etc., are captured with MANY "snapshots." Read \#6 through \#8 in the post, "Aggregate of Forms - Collection of 'Mental Impressions' of Forms." It could a good idea to review that first. These concepts are new to most people.

- That is the basis of Buddha saying there is no "person" seeing, hearing, etc. It is just a series of events that happens via Idappaccayatā Paṭicca Samuppāda. But we need to discuss that in more detail.
- First, let us review some facts about " $\bar{u} p \bar{a}$." It is unfortunate that sometimes people use "r $\bar{u} \bar{a} \vec{a}$ " just for "visual objects." But those are "rūpa rūp $\bar{a} "$ or "vaṇna rūp $\bar{a}$." Here, vaṇ̣a ("varna" in Sanskrit) means "color."
- We see "vanṇa rūpa" with eyes, "sadda rūpa" with ears, "rasa rūpa" with tongue, "gandha rūpa" with the nose, and "photṭhabba rūpa" with touches. We also recall memories with "dhamm $\vec{a}$ " or "dhamma ru$p a$ " with the mind. Of course, it is the mind that experiences the other five $r \bar{u} p \bar{a}$ that come through the eyes, ears, tongue, nose, and body.
- Those six types of $r \bar{u} p \bar{a}$ make contact with the mind very rapidly and in "packets." For example, we don't see or hear continuously. Only one sense faculty makes contact with the mind at one moment, and that contact is of short duration, about one-hundredth of a second!

7. We discussed in the last post how the mind is able to sort out those different sensory inputs and make a coherent picture of our world. See "Aggregate of Forms - Collection of 'Mental Impressions' of Forms." Let us discuss one more simple example to illustrate this point. It is critical to get this basic idea.

Suppose you are eating an apple and you are alone. Your mind is totally focused on the apple. Still, many inputs come in providing you with information on touch, taste, sight, smell, and even sounds.

- You are holding the apple and that sensation comes through kāyadvāra or touch. The taste of apple comes through jivhādvāra or tongue, and you hear the chewing sound (sotadvāra or the ears.) Of course, you see the apple too via cakkhudvāra (eyes). You may also smell the apple coming via ghānadvāra (nose.)
- Of course, the mind put together all those sensory inputs as "enjoying the apple." Therefore, the manodvāra is involved too. The other five sensory inputs come to the MIND via those "doors" (dvāra)
- You can experience all of those without any pause. It is an all-inclusive cohesive experience. It FEELS as if you are experiencing all those sensations simultaneously. But that is only an illusion arising from the fact that the mind is THE FASTEST entity in this world. We discussed that in the previous three posts too.

## Where Does the "Experience" Take Place?

8. Think about what happens within those few minutes while you are eating the apple. You see the apple in your hand and feel its texture. You can taste the apple and also smell its aroma. You also hear the chewing sound. Those are the five sensory experiences through the five physical senses.

- While you are doing all that, the brain is processing all that data to a form that can be "understood" by the mind. The brain DOES NOT understand anything; it is just like a computer. This is a critical point that needs to be understood.
- There are separate regions in the brain that process data from those five senses. The brain processes such data into a form that can be understood by the mind. This is a fully kammic process that scientists will never be able to figure out.
- It is worthwhile to think about what must happen, for example, to 'see' that apple.

## How do we "see" an apple?

9. Scientists have traced the electrical/chemical signals from the back of the eye (retina) to the visual cortex in the brain. But they have no idea what the visual cortex is doing or how it transforms those electrical/chemical signals into "light" and the "form resembling an apple."

- That is the "hard problem of consciousness" in simple terms. Google "hard problem of consciousness" and you can read about the struggles of scientists and philosophers trying to make a breakthrough.
- That problem arises only because they are trying to explain consciousness to "arise from matter" specifically in the brain.
- The Buddha explained that it is the other way around. It is the mind that gives rise to matter. That is a deep issue I have discussed briefly in "The Origin of Matter - Suddhatthaka." However, it is not prudent to go that deep UNTIL understanding the Idappaccayatā Pațicca Samuppāda.
- By the way, some scientists and philosophers are beginning to realize that it would be impossible to explain consciousness to ARISE in the brain. The brain only has a secondary role; see, "How Do We See? - Role of the Gandhabba" and "Will Quantum Mechanics Be Able to Explain Consciousness?"

10. The point is that after light falls on the back of the eye, light DOES NOT play any role in vision. Then how do we see an image of that apple? How do we see light? It is totally dark inside the skull!

- The same is true for the other senses. Scientists have found that sounds create vibrations in the air and deep inside our ears there are sensors that detect those vibrations. How can the brain "hear" those sounds? It cannot. The brain itself was formed by kammic energy. Its role is to transform those "vibration signals" into a form that can be understood by the mind (more precisely the "seat of the mind" or "hadaya vatthu".)
- It is a good idea to read the post "How Do We See? - Role of the Gandhabba." There is no need to get into details discussed in that post. Don't forget to read Ref. 4 per \#6 in the post. It is the gandhabba (with the hadaya vatthu) that sees, hears, tastes, smells, feels, and thinks! Yet that gandhabba lasts only for the duration of human existence. After that, it could transform into an animal gandhabba, Deva, or even a "hell-being". There is no real essence even in that human gandhabba. It is a temporary existence!

## "Eating an Apple" Experience Involves Many Types of Rūpakkhandha

11. It is utterly useless to read the "word-by-word" translations of suttas. The Buddha explained things that we experience in real life. Even though the world is complex, we can simplify things by looking at the details of sensory experience. It may appear complex at first, but once the basic idea sinks in, it will become much easier.

- Let us summarize our discussion on the experience of eating an apple.
- We experience different types of rūpa within those few minutes. They are vaṇna rūpa, sadda rūpa, gandha rūpa, rasa rūpa, and photṭhabba rūpa. In plain English sight, sound, smell, taste, and touch.
- Even the sight of the apple is not captured in one instant. The sight of the apple comes in "brief snapshots" each one lasting only a billionth of a second. Remember that even though the brain may take one-thousandth of a second to process a "data packet on the vision" the mind (more precisely hadaya $v a t t h u$ ) processes that in a billionth of a second.
- Thus, "seeing of the apple" is due to a collection of many such "snapshots." That is a "rūpakkhandha" on VISION over a short time.

## Rūpakkhandha Includes All Types of $\boldsymbol{R} \bar{u} p a$

12. However, we also hear the chewing of the apple, the taste, its smell, and also feel the texture of the apple in the hand. Thus, five types of rūpakkhandha go through the mind in that short time.

- In other words, the rellevant rūpakkhandha is the aggregate of all those rūpakkhandha formed by the five senses.
- The mind is able to put all of those together and provide a seamless experience of a "person eating an apple" by looking at the overall rūpakkhandha accumulated over several minutes.
- But in reality, it is just a collection of many DISCRETE events taking place at a very fast rate. This is why it is important to understand the basic concept explained in the video in the post "Vision Is a Series of "Snapshots" - Movie Analogy."
- Here is another analogy. In the old days, people made metal chains by connecting many small metal loops by hand. All one does is connect two loops at a time. You see a "chain" only after you connect many such loops and look at the result of that activity.

## Next Post

13. Experiencing a sensory input involves not only the rūpakkhandha but also associated "mental aspects". In the next post, we will discuss that.

- As we will see, the other four khandhās (vēdanākkhandha, saññākkhandha, sañkhārakkhandha, and viññānakkhandha) work the same as the rūpakkhandha. That is why we discussed rūpakkhandha in detail.

### 6.1.1.2 Five Aggregates - Experiences of Each Sentient Being

April 24, 2022; revised April 25, 2022; August 2, 2022
Five aggregates (pañcakkhandh $\bar{a}$ ) are the accumulation of one's experiences and expectations for the future. Not only a human but any sentient being has its pañcakkhandhā.

1. We discussed how one's rūpakkhandha grows with each sensory experience in several previous posts,

- A sensory experience occurs when an external rūpa comes into contact with an internal $r \bar{u} p a$, i.e., when an ārammaṇa (vaṇna rūpa, sadda rūpa, gandha rūpa, rasa rūpa, phoț̣habba rūpa, or a dhamma rūpa) comes to the mind either via the "five physical doors" or directly (dhamma rūpa).
- Thus during the waking hours, one's rupakkhandha (form aggregate) grows and is added to the existing rūpakkhandha (collection of rūpa that one has ever experienced.)
- We need to discuss how all five aggregates (pañcakkhandha) grow simultaneously.

## Each Sensory Contact Also Gives Rise to the Four Mental Aggregates

2. The easiest way to look at that is as follows. One of the six types of vipāka viññāna (cakkhu, sota, ghāna, jivhā, kāya, mano viññāna) arises with each such sensory experience.

- That vipāka viññāna includes vedanā, saññā, and thus mano sañkhāra AUTOMATICALLY. Note that mano sañkhāra is "vedanā and sañ̃̄ā" (see Ref. 1). At this initial stage, there will be no vacī or kāya sañkhāra.
- Therefore, all five aggregates grow with EACH sensory experience.

3. We take the next step and see how the aggregates of feelings, perceptions, "mental formations," and "consciousness" arise. As we have discussed, it is better to use the Pāli terms of vedanākkhandha, saññākkhandha, sañkhārakkhandha, and viññāṇakkhandha instead of those English terms.

- As I have explained, only one type of viñ̃̄āṇa can be called "consciousness," and that is vipāka viññāna.
- However, viññānakkhandha includes all kinds of viññ̄ạna. See "Distortion of Pāli Keywords in Paticca Samuppāda."

## Example - Visual Sensory Contact

4. A cakkhu viññāna gets added to viññānakkhandha simultaneously with the addition of a "mental impression of a rūpa" to rūpakkhandha.

- Simultaneously, that cakkhu viññāna not only with an impression of the rūpa but is accompanied by vedanā, sañ̃̄̄̄, and sañkhāra as well, and additions to rūpakkhandha, vedanākkhandha, sañ̃̄̄̄kkhandha, and sañkhārakkhandha take place simultaneously.
- Think carefully about that. With each sensory input (ārammaṇa), ALL FIVE AGGREGATES grow.

## All Five Khandhās Arise Together

5. We based our discussion in the previous two posts on rūpakkhandha on the "WebLink: suttacentral: Khandha Sutta (SN 22. 48)."

- The same sutta describes the other four khandhās in the same way as the $r \bar{u} p a k k h a n d h a$, as we can expect.
- Thus, for example, vedanākkhandha is: "Any kind of vedan̄-past, future, or present; internal or external; coarse or fine; inferior or superior; far or near: all of them belong to the aggregate of form or vedanākkhandha."
- After that, the Buddha concludes, "Ime vuccanti, bhikkhave, pañcakkhandhä" or "Bhikkhus, Those are the five aggregates."

6. Therefore, as soon as an ārammana goes through the mind, a record of the associated rūpa, vedana , sañ̃ $\bar{a}$, sañkhāra, and viñ̃n̄ạa is added to the five aggregates (pañcakkhandha.)

- Thus, when we recall a past event, we remember the $r \bar{u} p a$ and the mental aspects associated with that event, i.e., the pañcakkhandha related to that event. The "past component" of the pañcakkhandha also goes by "nāmagotta."
- The "past component of pañcakkhandha" is preserved as "nāmagotta" in the viñ̃̃āṇa dhātu.
- For example, when you recall a tasty meal last week, you identify the type of food and the taste. You had "good feelings" about the meal, which is vedana $\overline{\text {. }}$

## Memories (Nāmagotta) Preserved in Viññāṇa Dhātu

7. Even though most of us cannot, few people can recall past events from this life in astonishing DETAIL.

- Jill Price and a few other people can recall memories in such detail only because those memories (nāmagotta) have been in the viñ̃̃āna dhātu. See "Where Are Memories Stored? - Viññāna Dhātu."
- With advances in science and access to experiences by people worldwide, evidence keeps accumulating for Buddha Dhamma. Another related study is on Near-Death-Experiences (NDE) conducted by heart surgeons. See "Near-Death Experiences (NDE): Brain Is Not the Mind."
- In the same way, some children can recall memories from their recent past lives. See "Evidence for Rebirth." Some yogis can remember many past lives. A Buddha can recall any past life as he wishes. For example, Buddha Gotama described the lives of several previous Buddhas in detail in several suttas. See, for example, "WebLink: suttacentral: Mahāpadāna Sutta (DN 14)."
- None of those accounts can be explained by the proposal saying "consciousness and memories" arise in the brain. A brain has NO DIRECT CONNECTION to past lives.

8. In \#7 above, I stated, "A brain has NO CONNECTION to the past lives." The brain can't contain such memories intrinsically, i.e., those memories obviously cannot be "stored in the brain." However, the brain DOES play a role in memory recall; see "Brain - Interface between Mind and Body."

- The mana indriya in the brain can extract memories from the viññāna dhātu. If a specific brain region is damaged, the brain will lose the ability to recall such memories. Just as sights come in through the physical eyes, memories come through the "mana indriya" in the brain.
- I have discussed that in "Patient H.M. - Different Roles of Brain in Memory" and a few other related posts. From the account of patient H.M., we can deduce that "mana indriya" could be related to THE hippocampus in the brain. He lost the ability to recall memories after the removal of the hippocampus.

## Each Sentient Being Generates Pañcakkhandha

9. Any sentient being (living in the 31 realms) continually adds to its pañcakkhandha via each sensory experience. Even the smallest living creature generates pañcakkhandha.

- Of course, most animals do not have brains. They have different mechanisms for memory recall. They can recall mostly just their life experiences in their current life. For example, they know where they found food in the past, which areas to avoid because of dangers, etc.
- Our large brains (in particular the neocortex of the brain) make humans unique. The neocortex "slows down" the arising of citta vithi. It takes time to process sensory data as we discussed in "Seeing Is a Series of 'Snapshots'." That gives us time to make decisions and not just "go with the flow." That makes humans unique to have "free will."
- Even though some other mammals also have the neocortex, those are smaller. They all take action impulsively. Even some of us who have not cultivated mindfulness tend to act impulsively "without thinking through (about consequences of such actions)."

## We Attach to Pañcakkhandha, Not Just to Rūpakkhandha

10. As discussed above, when we recall past events, we remember the corresponding rūpa and the associated mental aspects. Then we attach to such rūpa that provided either joyful or hateful experiences.

- In other words, our recollections (and attachments) involve all five aggregates (pañcakkhandha) associated with that event, not only the form aggregate (rūpakkhandha.)
- Attachment to rūpa cannot be dissociated from those mental aspects arising from the sensory contacts due to external rūpa.
- That is why "pañca upādāna khandhä" give rise to dukkha, not just the "rūpa upādāna khandha."
- In the previous posts, we noted that rūpupādānakkhandha (rūpa upādāna khandha) is only a tiny fraction of rūpakkhandha. Thus, it is also clear that pañcupādānakkhandha (pañca upādāna khandha) is only a small fraction of pañcakkhandha!
- Attachment to pañcakkhandha (i.e., pañcupādānakkhandha) is the root cause of future suffering.
- We have previously discussed that in other posts; see, for example, "Loka Sutta - Origin and Cessation of the World." However, we will briefly discuss that here.

## We Attach at the Present Moment!

11. We create kammic energies to power up future rebirths at the present moment, when we attach to an $\bar{a} r a m m a n ̣ a$. We attach via greed, anger, and ignorance. Ignorance of the Noble Truths prevents one from thinking about the CONSEQUENCES of one's actions/speech/thoughts at a given moment.

- That is what the Buddha explained to Ven. Ānanda in the "WebLink: suttacentral: Mahānidāna Sutta (DN 15)."
- That is the Idappaccayatā Pațicca Samuppāda that we have been discussing in the current series of posts: "Paticca Samuppāda During a Lifetime."
- In this post series, we are connecting to the pañcakkhandha (five aggregates), which has been mistranslated or at least not adequately explained in most English texts.

## Analysis of Deep Suttas Requires This Understanding

12. We incorrectly think that we see a "full figure of a person with one glance" or "a whole statement made by such person," etc.

- However, those are just "collections" or "khandhas" of very brief "snapshots" put together by the mind (viññanna.) It is only a "magic show," as the Buddha explained.
- That is what the Buddha explained to Bāhiya in the "WebLink: suttacentral: Bāhiya Sutta (Ud 1.10)" with the verse, "ditṭhe ditthamattam bhavissati, sute sutamattam bhavissati,.." Seeing is just like taking a series of snapshots. What we PERCEIVE as a person walking is a series of such snapshots "made into a movie" by the mind. The same holds for hearing, tasting, etc. That is why it is critically important to understand the current series of posts: "Paticca Samuppāda During a Lifetime." Don't forget to watch the youtube movie in the post "Seeing Is a Series of 'Snapshots'" and understand the basic idea.
- There are a series of Bhaddekaratta Sutta (MN 131 through MN 134) based on the same basic but deep concept. See, for example, the first one, "WebLink: suttacentral: Bhaddekaratta Suttas (MN 131)." The English translation there is completely off. It has nothing to do with "One Fine Night," which is the title of the English translation!

## Reference

1. In the WebLink: suttacentral: Cūlavedalla Sutta (MN 44) on the types of sañkhāra generated: "Assāsapassāsā kho, $\bar{a} v u s o ~ v i s a ̄ k h a, ~ k a ̄ y i k \bar{a} ~ e t e ~ d h a m m a ̄ ~ k a ̄ y a p p a t ̦ i b a d d h a ̄, ~ t a s m a ̄ ~ a s s a ̄ s a p a s s a ̄ s a ̄ ~$ kāyasañkhāro. Pubbe kho, āvuso visākha, vitakketvā vicāretvā pacchā vācaṃ bhindati, tasmā vitakkavicārā vacīsañkhāro. Saññ̄ā ca vedanā ca cetasikā ete dhammā cittappaṭibaddhā, tasmā saññā ca vedanā ca cittasañkhāro"ti.

- [The three sañkhārā listed in the Vibhanga 6 on Pațicca Samuppāda Vibhañga of Abhidhamma Piṭaka are, $\boldsymbol{k} \bar{a} y a s a \dot{n} k h a ̄ r o, ~ v a c \bar{c} s a \dot{n} k h a ̄ r o, ~ a n d ~ c i t t a s a n ̃ k h a ̄ r o]$.
- Assāsa passāsā (breathing in and out) is associated with the body (movements). Thus, assāsa passāsa is kāya sañkhāra.
- Vitakka/vicāra arise before speech "breaks out." Therefore, vitakka/vicāra are vacī sañkhāra.
- Saññā and vedanā are associated with any citta. Thus, saññ̄a and vedanā are citta (mano) sañkhāra.

## Pañcupādānakkhandha - Attachment to One's Experiences

May 1, 2022
Even though pañcakkhandha includes many categories - including one's all past experiences - we only attach to pañcakkhandha arising at the present moment, i.e., pañcupādānakkhandha.

## We Attach to Pañcakkhandha That Arise at the Present Moment

1. Attachment to pañcakkhandha DOES NOT mean attachment to ALL OF accumulated pañcakkhandha.

- It just means attachment to the five aggregates that arise AT THAT MOMENT. That is a CRITICAL point to understand.
- We discussed that at the start of this series in "Idappaccayatā Paticca Samuppāda - Bhava and Jāti Within a Lifetime."
"Idappaccay $\bar{a} "$ comes from "ida" + "paccay $\bar{a}$," meaning "based on the conditions at that time."
- Let us discuss that carefully and systematically since it is a CRITICAL issue. Many people say, "attachment to khandhas" with the idea of "attachment to ALL khandhas that define me."
- We attach to "khandhas" that arise at the PRESENT MOMENT. There must be a "trigger" to be attached. Suppose you see, hear, taste, smell, touch, or think about something that you like/dislike/unsure. You may attach (tanhhā) or "get stuck with it" via greed/anger/uncertainty.
- Take a minute to contemplate that.

## Arising of Pañcakkhandha Triggered by an Ārammaṇa

2. The trigger to "get attached to something" is an arrammana. Let us think about what "triggers" an alcoholic (or even a casual drinker) to "have a drink."

- A common trigger is if someone offers a drink. Even a casual drinker may accept the offer.
- For an alcoholic, the idea to "have a drink" may come to mind as a kamma vipāka. They would have built up an "expectation" (kamma viñ̃ñana) to "have a drink at a certain time."
- Regardless of how the idea of "having a drink" comes to the mind, that is accompanied by a "visual of a drink" (added to rūpakkhandha), and the relevant mental aspects (vedanā, sañ̃̄̄a, sañkhāra, viññāna) associated with previous experiences of "having a drink" come to the mind. The latter "mental parts" are added to the vedanākkhandha, saññākkhandha, sañkhārakkhandha, and viññānakkhandha. That is how the pañcakkhandha is added with an ārammaṇa, as we discussed in recent posts in detail.

## How Do Pañcakkhandha Become Pañcupādānakkhandha?

3. Now, an alcoholic will become "joyful" and he will proceed to either accept the offer or make a drink for himself, depending on the two situations above. In other words, now pañcakkhandha has AUTOMATICALLY become pañcupādānakkhandha!

- But if the person doe not like to drink alcohol, such a "joyful mindset" will not take place in him EVEN IF a drink is offered.
- Thus, for such an individual pañcakkhandha would arise when someone offered a drink. But those will be based on his past experiences and his gati. Because he does not have gati to crave "alcoholic drinks" it WILL NOT become pañcupādānakkhandha!
- That is the difference between pañcakkhandha and pañcupādānakkhandha!
- Just reading these words will not be enough to make progress. One must think through these concepts.

## Samphassa-jā-Vedanā Arise Due to Gati

4. To put it another way, the alcoholic will automatically generate pañcupādānakkhandha which will have "samphassa-j $\bar{a}$-vedan $\bar{a} "$ in his vedanākkhandha.

- On the other hand, the other person (who does not like alcohol) WILL NOT have "samphassa-j $\bar{a}$ vedana $\vec{a}$ " in his vedanākkhandha.
- It is critical to understand what is meant by "samphassa-jā-vedanā." See, "WebLink: PureDhammaSearch: Search Results for: samphassa vedanā."

5. It is mainly the vedanā (that arises with pañcakkhandha) leading to the attachment. If it is sukha vedanā, one attaches with greed, and a dukkha vedanā leads to attachment with anger. A neutral vedanā could also lead to attachment via ignorance (one does not understand the proper response to an ārammaṇa.) [See "WebLink: suttacentral: Anicca Sutta SN 36.9" which says that vedanā is anicca, sañkhatā, paticcasamuppannā, khayadhammā, vayadhamm $\bar{a}$, virāgadhamm $\bar{a}$, nirodhadhammā .]

- Following are examples. Eating tasty food gets one attached to it; they will try to figure out how to taste it again. Seeing an enemy succeeding in life, some people will try to get involved and put obstacles in their way. Seeing shadowy figures at night may cause anxiety.
- Let us analyze the example in the post, "Aggregate of Forms - Collection of 'Mental Impressions' of Forms," to get more clarity.

## Example With Many Ārammaṇa

6. Sometimes many ārammaṇa run through our minds within minutes. In such cases, only one may lead to pañcupādānakkhandha even though all of them contribute to pañcakkhandha.

- We started in that post (in \#3) with the following example. Suppose you are having a meal with a friend. We analyzed how many citta vithi run through your mind within a few minutes due to different $\bar{a} r a m m a n a$. To keep the discussion simple, let us bypass the citta vith $h$ analysis.
- Your friend is talking, and you are listening. That is an ārammaṇa coming through sotadvāra or the ears. You see him too, and that ārammaṇa comes through cakkhudvāra (eyes). You taste the food (with jivhādvāra or tongue).
- The point relevant to the present discussion is that you not only see your friend's face, but you have certain "mental aspects" associated with that rūpa DEPENDING ON both him and what he is talking about. We cannot break those mental aspects into two separate parts, say one for just seeing his face and another for what he is talking about.

7. For example, suppose he started by saying that he had not seen you for several days and how glad he was to see you. The feelings that arise in you would be loving/sympathetic. Then he switched the subject to talk about a common enemy of the two of you, and the mental aspects that arise at that moment are more likely to be those of anger toward that other person.

- Thus within a few minutes, your mental aggregates will change.
- Now you are eating your food at the same time. If the food tastes good, there will be "good feelings" about the food.
- In a situation like that, what type of mental aspects become DOMINANT will depend on the RELATIVE STRENGTHS of the three ārammaṇa in that example.

## We Attach Only to Certain Parts of Pañcakkhandha Arising at the Present Moment

8. If you become agitated about the "common enemy" that the friend is talking about, that will primarily affect your mindset. You may even forget that you are eating. You may even stop eating and start talking about a bad incident with that person.

- Therefore, three types of mental aspects may arise within minutes. All those are part of pañcakkhandha that occur within those few minutes.
- However, you focused on that "common enemy" in this particular case. That became "pañcupādānakkhandha" at that time. Your mind did not "attach" to your friend or your meal. It got "trapped/stuck" on only one ārammaṇa, that about the common enemy.
- That is a straightforward example of how pañcakkhandha arises and how a part of that pañcakkhandha can turn into pañcupādānakkhandha.

## Attaching to Part of Pañcakkhandha Based on Gati

9. When an ārammaṇa comes to mind, that leads to accumulating the five aggregates (pañcakkhandha.)

- Even though pañcakkhandha includes ALL of one's experiences in the past, we attach ONLY to pañcakkhandha that arise at that moment.
- However, whether one attaches to pañcakkhandha arising is influenced by one's past experiences (a past component of pañcakkhandha) via one's gati.
- If you did not have gati to become upset about the person your friend was talking about, the situation would have been different. You may try to calm down the friend instead of encouraging him to criticize that person.

## Gati Form Over Long Times Due to One's Cumulative Experiences

10. It is necessary to get a good idea about the role of one's gati. The Pāli word "gati" (pronounced "gathi") can loosely one's character, which also defines one's habits.

- You may want to read "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsava)" and the posts referred to there.
- "Good gati" lead to rebirths in the "good realms," and "bad gati" lead to rebirths in the "bad realms." When one comprehends the Four Noble Truths/Paticca Samuppāda/Tilakkhaña, one realizes that the goal is not JUST to develop "good gati" but to eventually "see" the fruitlessness of such efforts. An Arahant has removed all gati.
- However, one MUST remove the "bad gati" first. Then with wisdom, one will see how to remove all gati GRADUALLY. See " 9. Key to Ānāpānasati - How to Change Habits and Character (Gati)."

## One Attaches Automatically According to One's Gati

11. Whether one gets attached to a given ārammana (sight, sound, taste, smell, touch, thought) depends on TWO things. One is the ārammaña itself, and the second is that person's "gati" (character/habits.)

- Each person has a unique set of àrammaṇa that lead to attachment. No two people will attach to the same types of ārammaṇa.
- Furthermore, as one's gati change, that set will also change. Also, the ārammana itself can change too. For example, X may dislike Y because of a particular characteristic of Y , but if Y gives up that, X may start liking Y.
- Thus, what matters is one's gati at the present moment when one is experiencing a certain $\bar{a} r a m m a n a$. That is the critical principle in Idappaccayatā Paticca Samuppāda.

## Kamma Viññạna Form When We Attach

12. Upon getting attached to an ārammaṇa, we make expectations. Those are kamma viññāna.

- Suppose a friend tells you that he tasted a nice meal at a particular restaurant. You are impressed by his description, and you decide to taste that meal. That expectation of enjoying that meal is a $\boldsymbol{j} \boldsymbol{i} \boldsymbol{v h} \overline{\boldsymbol{a}}$ viññāna.
- The conversation you had with the friend is a part of pañcakkhandha. You may have talked about other things, and they are all part of pañcakkhandha. But only part of that pañcakkhandha became a pañcupādānakkhandha and generated a kamma viññāna, a future expectation to do something. It usually is an expectation based on greed, anger, or ignorance.
- That expectation generated a kammic energy that is in that jivhā viñ $\tilde{a} \bar{n} \boldsymbol{n}$. It is in the kamma bhava (in viñ̃̄̄̄ṇa dhātu) and can "come back to your mind" and remind you that you need to act on it. So, even a few days later, you will suddenly remember that conversation with the friend and may get the urge to taste that meal. You may call the restaurant and make a reservation.

## Summary

13. I have tried to connect different concepts that we discussed in this new series on Idappaccayat $\bar{a}$ Pațicca Samuppāda with other concepts like kamma viñ̃āạa and gati that we have discussed many times before.

- Buddha Dhamma is fully self-consistent. The more you learn, the more faith you will have. But it requires an effort to review those concepts and make necessary connections or see the relationships among them.

### 6.1.1.2 Noble Truth of Suffering- Pañcupādānakkhandhā Dukkhā

May 7, 2022
The verse "sañkhittena pañcupādānakkhandhā dukkhā" in the Dhammacakkappavattana Sutta (SN 56.11) says that attachment to pañcakkhandha (i.e., pañcupādānakkhandhā) is the root cause of suffering.

## Noble Truth of Suffering

1. The Noble Truth of suffering explains the ROOT CAUSE of suffering.

- It is expressed succinctly in the "WebLink: suttacentral: Dhammacakkappavattana Sutta (SN 56.11)" as "sañkhittena pañcupādānakkhandh $\bar{a}$ dukkh $\vec{a} "$ OR "In brief, the cause of suffering is attachment to one's sensory experiences."
- In the previous post, we discussed why pañcupādānakkhandhā MEANS "attachment to sensory experiences." See "Pañcupādānakkhandha - Attachment to One's Experiences."
- That post culminated in a series of posts in the subsection "Paticca Samuppāda During a Lifetime." If you are unable to see why pañcupādānakkhandhā means "attachment to sensory experiences," please review all the posts in that subsection.
- That is the First Noble Truth. Thus, it is critical to understand it.

## What You Do at the Present Moment Is What Counts

2. If you attach to an ārammaṇa at the present moment, TWO THINGS can happen.
i. You "pull that ārammaṇa in." The Pāli word for that is "upādāna." I have often explained that "upādāna" means to "keep something close in mind." That is how one "grasps" a new existence at the end of the current existence. That is the mechanism of grasping a new existence in Uppatti (or Upapatti) Paticca Samuppāda.
ii. When you grasp that "state of mind," you start "living in that mindset." Thus, you start thinking, speaking, and acting based on that ārammaṇa. That leads to kamma formation during life, i.e., via Idappaccayatā Paticca Samuppāda.

- In other words, attachment to an ārammaṇa can play essential roles in Uppatti Pațicca Samuppāda (i above) and Idappaccayatā Pațicca Samuppāda (ii above.)
- I discussed that in detail in: "Change of Mindset Due to an Ārammana." Some people may not have understood that post at that time. It is a good idea to review that post in any case. Let me briefly summarize the two cases. You may want to read that post for details.

## Change of Mindset Due to an Arammana

3. A mind usually is in the "natural bhavanga state" that it received at the beginning of its current existence (bhava.)

- However, when a strong a rammana comes to mind, the mind switches over to a state compatible with that ārammaṇa. Depending on the strength of the ārammaṇa, that "temporary bhavanga state" could be there for a short time or many days.
- Getting into a "temporary bhavanga state" is the same as getting into a "temporary bhava."
- For example, if you eat a tasty meal, you may have that "satisfied mindset" for a couple of hours. If you had a nice meal at a restaurant and talked to someone later that day, you may recommend the meal to that person.
- However, some ārammaṇa can lead to a "changed mindset" for longer and also lead to bad consequences. If an alcoholic who has been "sober" for several weeks is induced to take a drink, he/she could go back to the "alcoholic mindset" that may linger for a long time. If a husband catches his wife in bed with another man, that may get him to the mindset of a killer. He could be "born" in that mindset and may carry out the killing. By the time he comes back to his senses (i.e., to the "natural bhavañga state") the damage is done!

## Born in a "Temporary Existence" via an Arammaṇa

4. Let us think about the "sad state of mind" that arises upon hearing about the death of a parent or a loved one. One could be in that "sad existence" for many weeks. That "sad mindset" will affect one's thoughts, speech, and actions during that time. One will not feel like going to a party or to a movie.

- In the terminology of Idappaccayatā Paticca Samuppāda, we can understand how one got "temporarily born" in a "sad state of mind" upon hearing that sad news. Those are "temporary bhava and temporary $\mathbf{j a} t i{ }^{\prime}$ " in Idappaccayatā Paṭicca Samuppāda.
- I have explained that in detail in an earlier post in this series: "Idappaccayatā Paticca Samuppāda Bhava and Jāti Within a Lifetime."
- These concepts are very much interrelated. If you can "latch on" somewhere, you can pursue that and fully understand Idappaccayatā Pațicca Samuppāda.
- If something is not clear, we can discuss it at the "WebLink: PureDhamma: Forums." Don't hesitate to ask questions. The Buddha advised Ven. Ananda to learn how life evolves moment-to-moment based on the causes and conditions AT any given moment. See, "WebLink: suttacentral: Mahānidāna Sutta (DN 15)."

## Key Points of Idappaccayatā Paṭicca Samuppāda

5. An Idappaccayatā Pațicca Samuppāda always starts with an ārammaṇa (sight, sound, taste, smell, touch, memory recall) that comes to the mind as a vipāka viññ̄ạna. I have discussed this in different sections of the website and only will give some of the links below. I discussed it extensively in the "Origin of Life" series, starting with the post, "Chachakka Sutta - Six Types of Vipāka Viññāna."

- In the example above, it is the hearing of the death of a parent is a sota viññaña that comes in via the sotadvāra ("ear door.") The Idappaccayatā Pațicca Samuppāda process starts with "salāyatana paccayā phasso" where "salāyatana" is the "sota āyatana." That can lead to contact or "phassa," which is "samphassa" or "contact with one's defilements."
- That leads to the next several steps "samphassa paccayā samphassa-jā-vedanā", "samphassa-j $\bar{a}$ vedanā paccayā taṇhā," "taṇhā paccayā upādāna," "upādāna paccayā bhava," "bhava paccayā $j \bar{a} t i . "$
- See "Difference between Phassa and Samphassa."

6. Thus, upon hearing the sad news, one will "temporarily get into a sad bhava" and be "born in that sad existence for a while." That is a "temporary birth" lasting as long as "temporary bhavañga" lasts. It could last for many weeks, depending on the person.

- In this case, the ārammaṇa of the "sad news" may not lead to kamma accumulation.
- But there are cases where one will be temporarily born in a "greedy state" or an "angry state." That can contribute to (i) generating kammic energy that can lead to rebirths in "bad realms" and (ii) "grasping a new bhava at the "cuti-paṭisandhi" moment in Uppatti Paṭicca Samuppāda. Let us discuss an example.

## Implications for Uppatti Paṭicca Samuppāda (Grasping a New Bhava)

7. This is essentially the same as what happens in Idappaccayatā Paṭicca Samuppāda described above, i.e., you "grasp that ārammana" and "get into that mindset or the temporary bhavañga state."

- But if that happens in the last citta vīthi for the current existence, then that "temporary bhava" BECOMES the next existence (bhava.)
 existence matching that "angry state mind." Of course, the actual realm in the apāy $\bar{a} s$ will be determined by "how angry one becomes." If the angry mindset can kill a human, that may lead to grasping an existence in the niraya (similar to hell in Christianity.) If it is less, the next existence could be that of a vicious animal like a tiger.

8. Let us summarize the two PS cases of the result of grasping an ārammana:

- Uppatti Paṭicca Samuppāda: That ārammaṇa is a special ārammaṇa brought in by kammic energy. It comes in with the last citta vīthi arises based on the strongest kamma that one has done up to that point. It could be from the current life or a previous life.
- Idappaccayatā Paṭicca Samuppāda: These ārammaṇa arise due to daily sensory experiences. If one gets attached to one, that could lead to the accumulation of new kamma (kammic energies.)

## Cetanā Sutta (SN 12.38) - Role of an Ārammaṇa

9. If we attach to an arrammaṇa, that is when "all the troubles start." The sequences of events are as follows:
 many citta vīthi, each one bringing in just a fraction of that sight, sound, etc.

- That gives rise to the four mental khandhas (aggregates) of vedanākkhandha, saññākkhandha, sañkhārakkhandha, and viññānakkhandha.
- Thus, all five aggregates (pañcakkhandha) arise with an ārammaṇa. If the mind attaches to that particular pañcakkhandha, each khandha becomes a upādānakkhandha. In particular, viññānakkhandha becomes viñ̃ān̄upādānaakkhandha, and the viñ̃̃āna there is a kamma viññāna (it has an expectation.)
- Thus, pañcakkhandha becomes pañcupādānakkhandha.
- That leads to either further accumulation of kamma (via a temporary existence) or grasping a new existence.

10. The "WebLink: suttacentral: Cetanā Sutta (SN 12.38)" summarizes what we discussed above. Of course, that English translation does not explain anything and can be misleading.
"Bhikkhus, if you pursue an ārammaṇa by thinking how good it is, and make plans accordingly, then a kamma viññāna (future expectation) is established. ("Yañca, bhikkhave, ceteti yañca pakappeti yañca anuseti, ārammanametaì hoti viññāṇassa thitiyā.)

When you keep your mind on that ārammaña, that viñ̃ān̄a becomes established. (Ārammane sati patițthā viññānassa hoti.)

When viñ̃āna (expectation) is established and grows, there is rebirth into a new state of existence in the future. (Tasmimं patiṭthite viññāne virūḷe āyatim punabbhavābhinibbatti hoti.)

When there is rebirth into a new state of existence in the future, future rebirth, old age, and death come to be,
 jarāmaraṇam sokaparidevadukkhadomanassupāyāsā sambhavanti.)

That is how this entire mass of suffering originates. (Evametassa kevalassa dukkhakkhandhassa samudayo hoti.)

- That summary includes both the Idappaccayatā and Uppatti Paṭicca Samuppāda.
- These suttas REQUIRE detailed explanations. Word-by-word translations are useless and can be misleading. Incorrect translation of words can magnify problems!
- In particular, just translating viñnāạna there as "consciousness" is a grave error. But those translators do not understand that viñ $\tilde{n} \tilde{a} \boldsymbol{u} \boldsymbol{a}$ can have different meanings depending on the context. Here it is a "kamma viñ̃nāna."

## Summary

9. It is critically important to understand the concept of ārammaṇa and the TWO main consequences of an ārammaṇa.

- Arammana is simply a sensory input that grabs your attention. It can come through one of the five physical senses (eyes, ears, nose, tongue, body touch) or the sixth one, the mind (memory recall.)
- If you attach to the arammana that comes in with the last citta vīthi in the current existence, and if your mind willingly grasps the corresponding mindset, you will be born in a new existence corresponding to that mindset. Note that it is NOT a conscious decision. You are capturing a new existence automatically according to your gati at that moment. That happens in Uppatti Paticca Samuppāda.
- If attachment to an ārammaṇa happens during daily life and gets one into a "temporary existence," one will start accumulating kamma accordingly. Idappaccayatā Paṭicca Samuppāda describes this process.
- The Buddha defined "sakkāya" to be pañcupādānakkhandhā. "Sakkāya Ditṭhi is the wrong view that sakkāya or pañcupādānakkhandhā leads to sukha (happiness). When one understands Paticca Samuppāda and realizes that pañcupādānakkhandhā leads to suffering, one would get rid of Sakkāya Diṭthi and becomes a Sotāpanna.
- We will discuss that in the next post.

May 15, 2022
Sakkāya diṭthi is the wrong view that there is an "unchanging personality" or some "permanent essence."

## Sakkāya = Pañcupādānakkhandhā

1. Several suttas explicitly state that the word "Sakkāya" means "pañcupādānakkhandha:" SN 38.15, SN 38.16, SN 22.105, SN 22.112, MN 14, MN 106, AN 4.33, and AN 6.61.

- In the "WebLink: suttacentral: Sakk $\bar{a} v a p a n ̃ h \bar{a}$ Sutta (SN 38.15)" Ven. Sariputta explains: "Reverend, the Buddha said that "Sakkāya" means "the five grasping aggregates (pañca upādānakkhandhā)" rūpupādānakkhandha, vedanupādānakkhandha, sañnupādānakkhandha, sañkhārupādānakkhandha, viññānupādānakkhandha."
- The other suttas listed give the same explanation.
- Let us briefly summarize the key steps in the initiation of "pañcupādānakkhandha." That will help us understand the connection between sakkāya and sakkāya diṭthi. As we know, one becomes a Sotāpanna by getting rid of Sakkāya ditṭhi. Thus, it is critical to understand this process.

## Arammaṇa Recognized with a "Collection of Rūpa" (Rūpakkhandha)

2. Pañcakkhandha arises when an ārammaṇa comes to mind. Quite simply, pañcakkhandha (five aggregates) are the rupa and the four mental components (vedanā, sañ̃̄̄a, sañkhāra, viññāna) that arise due to that rūpa.

But why are they called "aggregates"? It is because the " $r \bar{u} p a$ " itself is seen, heard, tasted, smelled, felt, or comprehended as a result of many "automatic" steps, i.e., they DO NOT come to the mind "as a whole in one step." Thus, the following are CRITICAL points:
i. The mind understands the ru$p a$ only after receiving many "snapshots" of the $r \bar{u} p a$. Comprehension sets in with not just one "snapshot" but due to an aggregate of many such "snapshots." In Pāli, it is a "rūpa matta" where "matta" means "a trace." (By the way, that is the "matta" in "diṭthe ditṭha mattaim bhavissati" in the Bāhiya Sutta; see, \#12 of "Five Aggregates - Experiences of Each Sentient Being.")
ii. For example, only a faint image of the tree comes in first when one looks at a tree. That image gets sharper and clear in several steps. But that happens too fast for us of those steps.
iii. It is an automatic process that takes place without us being consciously aware of it. Only the vastly purified mind of a Buddha can see that extremely fast process.
iv. The point is that a "person" is not consciously involved in that fast process. It takes place automatically.
3. I tried to explain that process in the previous posts in this series: "Paticca Samuppāda During a Lifetime." In particular, see "Aggregate of Forms - Collection of "Mental Impressions" of Forms." See \#7 there.

- As I discussed there, it is necessary to hear the whole sentence "My Dad came to see me yesterday" to understand its meaning. However, the mind may receive it in several pieces of "my dad," "came to," "see me," and "yesterday." Those words could be separated by bits of other data coming through other senses, as discussed there. But the mind is able to collect and put together a data stream from each sensory input.
- We consciously become aware of that " $r \bar{u} p a$ " (whether it is a visual, sound, taste, taste, touch, or a memory recall) only after that fast and automatic process occurs. That takes only a split second.
- But there is another critical process that also happens automatically and fast.

## Pañcakkhandhā May Become Pañcupādānakkhandhā Instantly

4. By that time we become aware of the rūpa (or ārammana) the mind may have already attached to that ārammana based on our gati.

- Thus, if one sees a figure that is compatible with one's gati, the initial "attraction" has already taken place, and one is already taking a "second look" by the time one becomes aware of it.
- The whole idea behind "mindfulness" is to catch any "bad attraction/ārammana" as early as possible and to stop it. But we DO need to engage in "good arrammana" that lead to moral thoughts/speech/actions.

5. In other words, what we discussed above is the initial sensory event (seeing someone, for example),
 upādāna" step in Pațicca Samuppāda.

- We have experienced a sensory event (ārammaña) and have already attached to it. That means "pañcakkhandha" has automatically turned into a "pañca upādānakkhandha."

## Sakkāya = Pañca Upādāna Khandha

5. But that will happen ONLY IF we (or our mind) perceive such an ārammaña to be beneficial to us. For example, one could be easily attracted to the opposite sex if one has "kāma gati." Any man would be able to an attractive woman, i.e., pañcakkhandha, for that sight will arise in any man. However, attraction to that woman will not happen for an Anāgāmi/Arahant, i.e., they will not generate pañcupādānakkhandha.

- The word "Sakkāya" comes from "sath" + " $k \bar{a} y a$," where "sath" means "good/beneficial" and " $k \bar{a} y a$ " is a "collection." Since "khandha" also means a "collection," we can see that "Sakkāya" means "beneficial collections/aggregates."
- That is why "Sakkāya" means the same as "pañca upādāna khandha" (pañcupādānakkhandha), as stated in those suttas in \#1 above.
- One would have "upādāna" only for those things that one deems to be beneficial.

## We Can Stop the "Upādāna Paccayā Bhava" Step

6. In the above we discussed the fact that the mind can AUTOMATICALLY attach to an arammana without us being aware of it.

- As we know, that ārammaṇa comes through an āyatana via the "salāyatana paccayā phassa" step in Patticca Samuppāda. Then the next two steps of "phassa paccayā vedanā" and "vedanā paccay $\bar{a}$ taṇhä also happen automatically.
- It is only at the step "tanhhā paccayā upādāna" that we become aware of that "attachment." That is when we start accumulating new kamma via "upādāna paccayā bhava" step by acting with avijjā: "avijjā paccayā saǹkhāra."
- That "upādāna paccayā bhava" step creates a "temporary bhava" (greedy bhava, angry bhava, etc) and that is when we start doing new kamma (via abhisañkhāra.) See "Change of Mindset Due to an Arrammana." In fact, it would be a good idea to review the previous posts in this series: "Paticca Samuppāda During a Lifetime."
- It is at this step, we can deliberately and willfully stop new kamma (abhisañkhāra) accumulation. That is a critical point discussed in detail in "Difference Between Tanhā and Upādāna."
- Now, let us get back to the issue of sakkāya ditṭhi.

## The View of Sakkāya Is "Sakkāya Diț̣hi"

7. As long as one has the wrong view that attachment to "worldly sensory inputs" can be beneficial, one has "sakkāya diṭthi." In other words, sakkāya dittthi is the view that pañcupādānakkhandhā lead to sukha.

Removal of Sakkāya diṭthi at the Sotāpanna stage leads to the removal of "diṭthi vipallāsa."

- However, as I have explained over and over, getting rid of that wrong view WILL NOT remove "saññā vipallāsa" and "citta vipallāsa." Thus, a Sotāpanna may still engage in pleasurable activities, including sex. However, a Sotāpanna WILL NOT be tempted to do apāyagāmi deeds in pursuit of sensory pleasure.
- See details in "Vipallāsa (Ditthi, Saññā, Citta) Affect Sañkhāra."

8. Understanding the concepts of the five khandhas (pañcakkhandha) - and how they can become pañcupādānakkhandha - will help get rid of Sakkāya dittthi.

- The concept of khandhas shows that at least the initial attachment DOES NOT involve a person. As I have tried to explain in the posts in this section, experiencing sensory input is an automatic process.
- Furthermore, even the first stage of "attachment to a sensory event" (and to give rise to pañcupādānakkhandha) happens automatically, based on one's gati.

## Sakkāya Diṭ̣hi = View that "There is an Unchanging Person" Experiencing the World

9. That means 'there is no unchanging person." As one's gati change, one will respond differently to sensory inputs. As one makes progress on the Noble Path, one's gati to be attracted to various ārammaṇa will decrease, and there will be no "gati" left at the Arahant stage. Future births are according to dominant gati. An Arahant with no gati left will not be reborn in this suffering-filled world of 31 realms.

- That is a key concept in Buddha Dhamma. There is no "permanent soul" as in Abrahamic religions. There is no "a $\overline{t m a}$ " as in Hinduism.
- Note that even after the removal of Sakkāya ditṭhi, the perception of a "me" or "I" will still be there. That goes away only at the Arahant stage with the removal of "manna" (or "asmi māna.") While Sakkāya dittthi is a samyojana removed at the Sotāpanna stage, "māna" is a higher samimojana removed at the Arahant stage.
- The concepts of "atta/anatta" in Buddha Dhamma are NOT directly related to the concepts of "ātma/anātma" in Sanskrit. There is so much confusion these days because many people incorrectly assume that anatta is the same as anātma.

## Another way to Explain

10. Pañcakkhandha (five "aggregates") are the aggregates of rūpa, vedanā, sañ̃̄̄̄, sañkhāra, and viññāṇa that one experiences. We don't EVER experience a rūpa "in one instant."

- For example, we don't see a tree with one citta. For us to be AWARE of that tree, many cittā (many citta vīthi) must go through the mind. The impression of a "tree" emerges gradually, with many citt $\bar{a}$ contributing a "partial image" of that tree. To recognize the tree, many such "partial images" must accumulate. That is a khandha or an aggregate. But since it happens VERY FAST, we feel like we see a tree "in one shot." See "Seeing Is a Series of 'Snapshots""
- Our mental "aggregates" also accumulate over many citta vīthi. That is why they are also "aggregates." The point here is that the idea of a "person" seeing a tree (and generating mental aspects based on it) is not what actually happens.
- Rather it is the result of an automatic process with many steps taking place in the seat of the mind (hadaya vatthu.) But it happens according to one's gati. We can control that automatic process only indirectly via changing gati.

11. Let us briefly review what happens when an arammaṇa that gives rise to attachment via greed/anger/ignorance comes in via one of the six senses:
i. The $\bar{a} r a m m a n ̣ a ~ c o m e s ~ i n . ~ T h a t ~ g i v e s ~ r i s e ~ t o ~ r u \bar{u} a k k h a n d h a ~(a ~ m e n t a l ~ i m p r i n t ~ o f ~ t h e ~ r \bar{u} p a$ ), and the other four mental aggregates, i.e., an ārammaṇa, give rise to pañcakkhandha.
ii. If the mind attaches to that ārammaṇa (i.e., to the pañcakkhandha), it keeps that ārammaña "close to ti and starts acting on it." That means pañcakkhandha turned into pañcupādānakkhandha.
iii. "Starts acting on that ārammaṇa" means generating mano, vacī, and kāya sañkhāra. Subsequent speech and actions arise based on vacī and kāya sañkhāra. They are abhisañkhāra If greed/anger/ignorance come into play! It is critical to note that in Paṭicca Samuppāda, sañkhāra in "avijjā paccayā sañkhāra" are abhisañkhāra.

## Why Would a Mind Attach to an Arammaṇa?

12. Now, why would a mind attach to that ärammaña? That happens due to one of three possible reasons:
i. That ārammana (sight, sound, taste, smell, touch, or memory) is perceived to be beneficial/pleasurable. That gives rise to attachment with greed/liking (lobha).
ii. It is perceived to be blocking one's pleasure, which gives rise to anger/hate (dosa.)
iii. The mind cannot understand whether that arrammana can be beneficial or not. It is confused about how to respond due to ignorance (avijjā.)

- We pursue such an ārammaṇa because we value the six types of rūpa in this world (sights, sounds, tastes, smells, touches, and memories of them.)
- However, if we act with lobha, dosa, and moha (avijjā) in that pursuit, we will generate abhisañkhāra with avijj $\bar{a}$. That will inevitably lead to suffering in the future. Pațicca Samuppāda guarantees that.
- That suffering may not materialize in this life and may result in future life. That is why it is hard for most people to understand the laws of kamma, especially if they don't believe in rebirth.

13. In \#12 above, I didn't ask, "Why Would a Person Attach to an Arammana?"

- That is because the initial attachment is spontaneous. You don't do it consciously. It automatically happens ACCORDING to your gati. Since one's gati can change, a "person with a fixed identity" does not exist.
- That is a critical point to understand and is the key to getting rid of Sakkāya diṭthi.
- There will be no instant attachment if someone does not have gati to be attracted to an ārammaṇa.
- One will start thinking about an ārammaña ONLY IF that initial attachment occurs. But that happens only after the AUTOMATIC attachment to that ārammana!

14. It is important to understand that there is no "unchanging personality" or a "permanent essence" within each of us. While we are humans in this life, one could be born a Deva, Brahma, an animal, or even worse. Sakkāya ditṭhi goes away with that realization.

- That is the key step toward the Sotāpanna stage.
6.1.1.2 Bhava and Jāti Within a Lifetime - Example

May 22, 2022
$B h a v a$ and $j \bar{a} t i$ within a lifetime discussed with an example of how a thief is born.

## Paṭicca Samuppāda During a Lifetime

1. As the Buddha advised Ven. Ānanda, in the "WebLink: suttacentral: Mahānidāna Sutta (DN 15)," it is necessary to understand how one can be "born" in very different "births" during a lifetime. The Idappaccayatā Paticca Samuppāda explains that process.

- The same principle operates in the Uppatti Paticca Samuppāda, which explains future births in various realms.
- We are at the last post in this subsection on the "Paticca Samuppāda During a Lifetime." After reading this post, you can review the previous posts to "fill in" any gaps. Please don't hesitate to ask questions at the discussion forum.
- With the help of the material we discussed, let us discuss a couple of examples of "births within a lifetime."

## An Easy Way to Understand Paṭicca Samuppāda

2. There are many ways to analyze and understand Pațicca Samuppāda. In the current section, I have discussed it a bit deeper. That analysis will help get rid of sakkāya dittthi.

- But we can get the basic ideas behind Paṭicca Samuppāda by looking at the easy-to-understand relationships between causes and effects.
- The critical point is that we tend to engage in "mind-pleasing activities" without thinking about their consequences. Let us take an example.

## No One Is Born a Thief - Birth Within a Lifetime

3. Let us consider a hypothetical situation. A man (say, person X ) is in prison for stealing.

- X was NOT born a thief by birth. At birth, he was like any other human baby.
- If we ask X to explain how he became a thief, the explanation could be something like the following.
'I now understand what happened to me. I was born into a good family, but I started associating with bad friends at school. Their influence led me to participate in immoral activities for fun. We started drinking, and then we got into drugs. When we ran out of money, we started stealing.

Both my parents worked, and it was too late by the time they found out and started advising me. But then it was too late. I enjoyed the time with my friends, and we got deeper into drugs and stealing to pay for the drugs. Eventually, I got fed up with my parents' " interference " and moved out of their house. I quit school and joined a gang. We resorted to selling drugs and stealing to make a living. Eventually, several of us were caught in a robbery and sent to prison.

I would not be a thief if I did not come under the influence of those bad friends. I could have been "saved" if my parents had intervened earlier."

## Connection to Idappaccayatā Pațicca Samuppāda

4. That is indeed a sad story. But it is also apparent that the person has now realized the basic principles of Idappaccayatā Pațicca Samuppāda.

- When X started enjoying the "bad activities" with his friends, he never thought about the dire consequences of such actions. They were "fiun activities." He was probably too young to realize that such "fun activities" would have harmful consequences.
- His parents were too busy to notice him "going down the wrong path;" if they realized what was happening to X early enough, they could have advised him about the bad consequences of drinking, taking drugs, and stealing.
- He was "born a thief" because his mindset changed to that of a thief, i.e., he engaged in activities matching the mindset of a thief. That led to cultivating "thief bhava" from his early school days.
- We can figure out the Pāli terms in Pațicca Samuppāda that contributed to X becoming a thief.

## Understand the Pāli Terms - Not Memorize

5. X went down the wrong path because he started liking the activities of his evil friends and was constantly thinking about such activities. That is the critical "upādāna" step, where such activities become priorities. He would instead engage in such activities than spend time at home or playing with other kids.

- He got attached to such activities (tanhhā) because he enjoyed such activities. Drinking and using drugs provided "good sensations" (vedanā.) X got attached to such vedanā: "vedanā paccayā taṇhā." But that vedanā was a "mind-made vedanā."
- Those are "mend-made vedanä" or "samphassa-jī-vedanā."

## Phassa and Samphassa

6. Now, we have traced back to the critical step. How did X start liking alcohol?

- We can understand the difference between "phassa" and "samphassa." A natural sensory contact is "phassa." That is the contact between the sensory input and the corresponding sensory faculty. In our example, contact (phassa) is alcohol touching the tongue.
- For most people, that vedana (taste of alcohol) is not good. It is a bitter taste, especially for strong alcohol. So, our teenager was probably not attracted to that taste, and he may have even refused to drink at first. But he probably drank under the "peer pressure" and got drunk. With more drinking, one gets used to the taste and likes the feeling of "being drunk." Furthermore, the drunken mindset in a party atmosphere gets teenagers into the "party mood."

8. With time, X's mind generates not the natural "vedana" but the mind-made "samphassa-j $\bar{a}$-vedan $\bar{a}$."

- Thus, the "phassa paccay $\bar{a}$ vedan $\vec{a}$ " step in PS is only a brief version. The expanded version is "samphassa paccayā samphassa-j $\bar{a}$-vedanā."
- Thus, it was the "jivhāyatana" (jivhā āyatana) that mainly contributed to the "salāyatana paccayā samphassa" step leading to "samphassa paccayā samphassa-j $\bar{a}$-vedanā." In other words, the taste of alcohol generated a "mind-made vedana" of happiness, especially in a party atmosphere.

## Once on the Wrong Path, It Is Hard to Change

9. Thus, now it became a habit (gati) for X to get drunk and have a good time with his friends. Then one day, someone brought drugs to a party, and they all get hooked on drugs.

- Over time, X cultivated a "kamma viññāna" or an "expectation" to enjoy alcohol, drugs and partying with friends. That kamma viññāna slowly got established as X started enjoying those activities more. His mind was constantly on the lookout for opportunities to get together with friends and have a good time. That is the critical "upādāna" step.
- That means it became easier to get to that mindset with an ārammana. All X needed was a prompting by a friend. Even the sight of a familiar drug dealer may prompt him to buy some drugs and enjoy them by himself.
- Any bad habit (gati), when cultivated, leads to more bad habits . When X and his friends didn't have money to buy alcoholdrugs, they resorted to stealing. That is how X was "born a thief."

## Most People Realize the Problem Only After Damage Is Done

10. It was only after getting caught stealing and sent to prison that X realized what happened to him.

- Even though he was not born a thief when his mother gave birth to him, X is now known as a thief. Everyone knows him as a thief.
- Of course, he had no desire to become a thief. His goal was to "enjoy life" with his friends. But that way of enjoying life involved an immoral way of thinking, immoral speech, and immoral deeds.
- He unknowingly got pațicca ("pati"" "icca" or "willingly attached") to things that would inevitably lead to samuppāda ("sama" + "uppāda" or "corresponding births"), i.e., to be "born a thief."
- In other words, his mind generated apuñña abhisañkhāra due to his ignorance (avijjā) of their consequences.
- Those apuñña abhisañkhāra arise as to mano, vacī, and kāya abhisañkhāra. They are immoral thinking, speech, and actions.

## Need to Look at the Root Causes (Lobha, Dosa, Moha)

11. Note that X just focused on the immediate gratification of such activities. He never realized (and thus never thought about) the possible harmfil consequences of such actions.

- Stealing was the secondary effect of $X$ stating to drink, use drugs, and generally have a good time with his friends. The initial attraction was for the vedana experienced with drugs and alcohol. Drinking alcohol led to craving that taste and the accompanying "feel good" mindset.
- X got attached or patticca ("pati" + "icca" or "willingly attached") to things that gave imme diate sensory pleasure. We could say that he was "born" in a "joyful state" at that time.
- However, in a deeper sense he got attached to immoral causes with much more drastic and dangerous "births" in the future. Those deeper causes would inevitably lead to samuppāda ("sama" + "uppāda" or "corresponding births"), i.e., to be "born a thief" later in life.
- But it does not end there. Part of that kammic energy can even bring future rebirths, depending on the severity of kamma done with that mindset. For example, if X killed someone during a robbery, that would definitely lead to a "bad rebirth." That comes under Uppatti Paticcca Samuppāda.

## Review of the Steps

12. Let us review the steps that led to X becoming a Thief.

- It all started with X starting his associating with bad friends. Under their influence, he started drinking due to his ignorance about bad future outcomes. That is "avijjā paccayā sañkhāra" or, more precisely, "avijjā paccayā abhisañkhāra."
- With frequent cultivation of abhisañkhāra, he developed a desire/future expectation (kamma viññāna) to enjoy drinking/partying. That is "(abhi) sañkhāra paccayā (kamma)viññāna."
- His mind was constantly visualizing scenes of such get-together, alcohol, his favorite friends, etc. Those are the "nāmarūpa" that arise in his mind with that kamma viñ̃āṇa: "(kamma)viññāna paccayā nāmarūpa."
- When such nāmarūpa arose in his mind, he will start using his sensory faculties. For example, he may call a friend to meet for a drink or organize a party. He may look for a drug dealer to get more drugs, etc. That is "nāmarūpa paccayā salāyatana."
- When such encounters took place, he would be fully engaged in drinking, taking drugs, etc., and would enjoy such experiences (samphassa-j $\bar{a}-\mathrm{vedana}$. .) That involves "salāyatana paccayā samphassa" and "samphassa paccayā samphassa-j $\bar{a}$-vedanā."
- The more he does those things, the more he will attach to such activities: "samphassa-j $\bar{a}$-vedan $\bar{a}$ paccayā taṇhā." That will make the "upādāna" stronger: "taṇhā paccayā upādāna."
- With such a strong attachment to those activities, he would do it again and again with "avijjā paccayā abhisañkhāra," and the whole cycle repeated repeatedly.

13. If he didn't have money for such activities, he would steal. It probably started by stealing from his parents. As X got into drugs, he and his friends had to start stealing more. Thus they cultivated the gati of thieves, and got into "thief bhava" and "thief $j \bar{a} t i$."

- That "samphassa-j $\bar{a}$-vedan $\vec{a}$ " can arise even without taking a sip of alcohol but seeing an alcohol bottle or even mentioning an upcoming party.
- Even if one has not studied the formal Patticca Samuppāda, one can understand the above steps.
- However, it is imperative to understand the meanings of those Pāli words, so that we can understand them in other contexts.

### 6.11.3 Often Mistranslated Pāli Keywords

May 28, 2022

## Rāga and Jhāna - Two Commonly Misunderstood Words

### 6.1.1.3 . 1 <br> Rāga and Jhāna - Two Commonly Misunderstood Words

May 28, 2022; revised August 27, 2022
We will discuss two key Pāli words, rāga and jhāna, that are also interrelated. People cultivate anāriya $j h a ̄ n a$ due to rūpa rāga and arūpa rāga.

## The Elephant in the Room - Wrong Translations

1. Many people are prevented from learning the correct teachings of the Buddha because of two key issues.
i. It has become standard to translate the Tipitaka suttas word-by-word. Many suttas (especially on deep concepts) REQUIRE lengthy explanations.
ii. Some Pāli keywords DO NOT have equivalent English words. It is WRONG to translate anicca and anatta as impermanence and "no-self."

- I discussed this issue in" "Elephant in the Room 1 - Direct Translation of the Tipitaka" and "Distortion of Pāli Keywords in Paticca Samuppāda."

2. Anicca and anatta are two words that require lengthy explanations. I have explained them in several posts. I will try to organize them in upcoming posts.

- I will first explain the correct meanings of some simpler keywords.

## Rāga - Not "Lust" or "Attachment"

3. The correct "pada nirutti" (etymology) of "rāga" comes from " $r \vec{a} "+$ "agga," where "r $\vec{a} "$ means to "travel (in the saimsāric journey)" and "agga" is to "give priority." Thus, "rāga" means "giving priority to engage in samsāric journey or rebirth process." That happens because of the tendency to value different aspects of this world.

There are three types of rāga: kāma rāga, rūpa rāga, and arūpa rāga.
i. Kāma rāga prioritizes sensual pleasures in the higher seven realms of kāma loka: the human realm and the six Deva realms. As long as one craves such pleasures, one will be born among the 11 realms of the kāma loka; rebirths in the lowest four realms are possible if one engages in immoral deeds while seeking sensual pleasures. See, "Lobha, Rāga and Kāmacchanda, Kāmarāga."
ii. Those who cultivate the rūp $\bar{a} v a c a r a ~ j h a \bar{n} \bar{a}$ prioritize jhānic pleasures over sensual pleasures; they have rūpa rāga. One has to either SUPPRESS or ELIMINATE kāma rāga to get to such rūpāvacara jhānā. Such jhānā led to rebirths in the 16 rūpāvacara Brahma realms. Those Brahmas are born without the sense faculties for taste, smell, and touch because those senses are needed only for sensual pleasures.
iii. Those who have cultivated the ar $\bar{u} p \bar{a} v a c a r a ~ j h a ̄ n a \bar{s}$ have arūpa rāga. That means one would be satisfied with just having the mind faculty (even less burden than rūpāvacara jhānā.) Those who cultivate arupāvacara jhānā will be reborn in the four highest Brahma realms.

- To attain Nibbāna (at Arahanthood), one must remove all three types of the rāga.
- However, any of the three types of rāga CAN NOT be removed with willpower. It happens automatically via comprehension of the Four Noble Truths. See "Is It Necessary for a Buddhist to Eliminate Sensual Desires?"

## Removal of Kāma Rāga, Rūpa Rāga, and Arūpa Rāga

4. The critical point here is that even if one gets to the highest arupāvacara jhānās, one can return to the kāma loka in the future and be reborn in an apāya.

- Until one gets to at least the Sotāpanna Anugāmi stage, rebirth in any realm is possible in the future because one can be born in the highest realms without overcoming the three samyojana that can lead to rebirth in the apāyās. But a Sotāpanna Anugāmi, Sotāpanna, or a Sakadāgāmi will be reborn in the kāma loka because they have kāma rāga.
- With the removal of $k \bar{a} m a \operatorname{ra} g a$ (at the Anāgāmi stage), rebirths in the 11 realms of $k \bar{a} m a$ loka will stop.
- Rūpa rāga and arūpa rāga are two samyojana that will be removed only at the Arahant stage. See "Dasa Samyojana - Bonds in Rebirth Process."

5. Now, we can easily see why the Buddha said, "rāgakkhayo Nibbānan" OR "Nibbāna is the ending of all types of rāga." Full Nibbāna requires the removal of all three types of rāga.

- When one would not prioritize any realm in kāma loka, rūpa loka, and arūpa loka, the mind will become free, and one will attain Arahanthood. Upon the death of the physical body, there will be no rebirth among the 31 realms in this world.
- Of course, when that happens, dosa and moha would have been eliminated when that happens. Thus, the verse: "rāgakkhayo dosakkhayo mohakkhayo-idaim vuccati nibbānan"ti. See, for example, "WebLink: suttacentral: Sāmandaka Sutta (SN 39.1)."

## Jhāna - Result of Puñ̃na Kamma

6. Cultivating $j h \bar{a} n \bar{a}$ is a particular type of puñña kamma, just like giving (dāna.) Cultivating jhāna $\bar{a}$ is a puñña abhisañkhāra (puññābhisañkhāra.)
"WebLink: suttacentral: Paticcasamuppāda Vibhañga" explains the step "avijjā paccayā sañkhāra" as, "Tattha katame avijjā paccayā sañkhārā? Puññābhisañkhāro, apuññābhisañkhāro, āneñjābhisañkhāro."

Translated: 'What is meant by 'avijjā paccayā sañkhārā?' It means puññābhisañkhāra, apuññābhisañkhāra, āneñjābhisañkhāra arising due to avijjā."

- Now, let us discuss what types of rebirths arise due to those three types of abhisañkhāra. The same section of the "WebLink: suttacentral: Paticcasamuppāda Vibhañga" describe those as well.

## Three Types of Abhisañkhāra Lead to Rebirths Among the 31 Realms

7. "Tattha katamo apuññābhisañkhāro? Akusalā cetanā kāmāvacarā-ayaim vuccati "apuññābhisañkhāro".

Translated: "Akusala cetanā leading to rebirths in the kāma loka is apuñnābhisañkhāra." These are the rebirths in the apāyās (lowest four realms.)
"Tattha katamo puñnābhisañkhāro? Kusalā cetanā kāmāvacarā rūpāvacarā dānamayā sīlamayā bhāvanāmayā-ayaì vuccati "puññābhisañkhāro".

Translated: "Kusala cetanā leading to rebirths in the kāma loka and rūpa loka are puñ̃äbhisañkhāra." Those rebirths in the kāma loka are the human realm and the six Deva realms are due to (dānamayā sīlamayā) kusala kamma. Rebirths in the rūpa loka (16 rūpāvacara Brahma realms) require (bhāvanāmayā) kusala kamma, i.e., rūpāvacara jhāna.
"Tattha katamo āneñjābhisañkhāro? Kusalā cetanā arūpāvacarā-ayaí vuccati "āneñjābhisañkhāro"."

Translated: "Kusala cetanā leading to rebirths in the arūpa loka are āneñjābhisañkhāra." Those kusala kamma are the cultivation of ar $\bar{u} p a \operatorname{jh} \bar{n} \bar{a}$ leading to rebirths in the four ar $\bar{u} p \bar{v} v a c a r a$ Brahma realms.

- Note: Strictly speaking, there are only four $j h \bar{a} n \bar{a}$ described in the Tipitaka. The "higher $j h \bar{a} n \bar{a} "$ "as they are known today are NOT really $j h \bar{a} n \bar{a}$. They are all described in eight suttas starting with "WebLink: suttacentral: Pathamajhānapañhā Sutta (SN 40.1)" through "WebLink: suttacentral: Nevasaññānāsañn̄̄̄yatanapañhā Sutta (SN 40.8)." Note that the higher four are NOT called jhānā. However, since they have very long names, it is easier to refer to them as $j h \bar{a} n \bar{a}$.

8. Let us summarize the above for clarity. We know that Akusala-mūla Paṭicca Samuppāda starts with "avijj $\bar{a}$ paccayā sañkhāra" and lead to $j \bar{a} t i$ (rebirths) and eventually "the whole mass of suffering."

- Note that "kusalā cetanā kāmāvacarā" are "kusala kamma leading to rebirths in the kāma loka." Similarly, "kusalā cetana rūpāvacarā" are "kusala kamma leading to rebirths in the rūpa loka," and "kusalā cetanā arūpāvacarā" are "kusala kamma leading to rebirths in the arūpa loka." All three of them are also called "puñña kamma."
- That is why engaging in puñna kamma (including cultivating $j h a \bar{a} n \bar{a})$ is NOT ENOUGH to be released from the rebirth process and future suffering. Even though the above three types of puñña kamma lead to rebirth in the "good realms," those existences have finite lifetimes. Rebirth in an ap $\bar{a} y \bar{a}$ after that is possible UNTIL comprehending the Four Noble Truths/ Pațicca Samuppāda/Tilakkhaṇa.
- That is discussed in detail in "Rebirths Take Place According to Abhisañkhāra," "Kilesa - Relationship to Akusala, Kusala, and Puñña Kamma," and "Puñña Kamma - Dāna, Sila, Bhāvanā." It is good to review those posts to solidify the relevant concepts.

9. The "WebLink: suttacentral: Parivimainsana Sutta (SN 12.51)" summarizes those conclusions in the following verse: "Avijjāgato yamं, bhikkhave, purisapuggalo puñnañee sañkhāraì abhisañkharoti, puññ̄̄pagaì hoti viññānà̇. Apuññañce sañkhārain abhisañkharoti, apuññūpagamं hoti

Translated: "If one cultivates puñ̃̃a abhisañkhāra without comprehension of Noble Truths, that will lead to rebirths in the good realms. Cultivating apuñña abhisañkhāra will lead to rebirths in the bad

- Of course, puñña abhisañkhāra includes the cultivation of rūpāvacara jhānā. Thus, puñña abhisañkhāra lead to rebirths in the human realms, 6 Deva realms, and the 16 rūpāvacara Brahma realms.
- It is interesting to note that "āneñja" means "no more rebirths" and thus "permanent." Ancient yogis (including Alara Kalama and Uddakarama Putta) thought these realms had infinite lifetimes and equated the births there to the "ultimate release". Of course, the Buddha discovered that those also have finite lifetimes, even though extremely long, lasting eons (billions of years). Thus, "äneñjābhi (āneñja abhi san khāra) saṅkhāra" are also generated with avijjā.
- Note that the word-by-word English translation in the above link does not clarify these things.

## Puñña Abhisañkhāra Must be Cultivated

10. The Buddha taught ONLY to abstain from lobha, dosa, and moha since those will lead to rebirths in the apāyās.

- As we know, rebirths in this world are caused by acting with lobha, dosa, moha, AND the mundane versions of alobha, adosa, and amoha (which lead to good rebirths.)
- With the comprehension of lokuttara versions of alobha, adosa, and amoha, such puñna abhisañkhāra will become kusala-mūla sañkhāra (leading to Nibbāna.)
- For details, see "Kilesa - Relationship to Akusala, Kusala, and Puñña Kamma,"

## Possible Drawbacks of Cultivating Jhāna

11. The $j h \bar{a} n i c$ experience is the same whether it is an anāriya jhāna (reached by suppressing kāma rāga) or an Ariya jhānā (reached by eliminating kāma rāga.)

- All living beings (including those in the apāyās) have attained the highest anāriya jhānās in their previous lives. Thus, such anāriya jhānās do not provide relief from samsāric suffering. Note that at the end of a mahā kappa (with the destruction of Earth), all living beings end up in the A$b h a s s a r a ~ B r a h m a ~ r e a l m ~$ and remain there until the formation of a "new Earth." See \#8-\#11 in the post "Buddhism and Evolution Aggañ̃̃a Sutta (DN 27)."
- The Buddha instructed HOUSEHOLDERS to cultivate puñ̃a abhisañkhāra with dāna and silla. He instructed BHIKKHUS to cultivate puñ̃a abhisañkhāra with dāna, sīla, and Ariya jhānāa. (Of course, EVERYONE needs to comprehend the Four Nobel Truths.)
- That is because householders CANNOT cultivate Ariya jhānā since that would REQUIRE abstaining from any sexual activity. If a householder is serious about attaining Ariya jhānā, they MUST give up cravings for all sense-pleasing activities, including sexual activity.

## Only the Bhikkhus Instructed on the Cultivation of Jhāna

12. Read any sutta on the cultivation of jhāna, and you will see that the Buddha delivered those suttas to bhikkhus. I have not seen an instance where the Buddha instructed a householder to cultivate $j h a ̄ n \bar{a}$.

- The standard verse in the suttas on the cultivation of $j h a \bar{n} \bar{a}$ is the following: "Idha, bhikkhave, bhikkhu vivicceva kāmehi vivicca akusalehi dhammehi savitakkaì savicāraì vivekajaì pūtisukhamं paṭhamaì jhānaì upasampajja viharati.." the translation of which is, "Here, a bhikkhu, abstaining from sensual pleasures, abstaining from akusala kamma, enters and remains in the first $j h a \bar{n} \bar{a} . "$
- The following link provides a list of Tipitaka references on jhānās: "WebLink: suttacentral: 531 results for viviccev a kämehi." Anyone can go through the suttas in that list and see whether my statements above are correct or not. Please let me know if you find a sutta delivered to a "householder" in the above list. Keep in mind that a few householders abstained from "householder activities" and had attained jhānā. They were Anāgāmis, like Citta Gahapati.

## Jhānā Not Necessary to Attain Magga Phala

13. A householder can choose to deliberately refrain from sexual activities and cultivate Ariya jhān̄̄̄. Such a householder is an "WebLink: wikipedia.org: Anagārika." Most householders who attained the Arahant stage (like King Suddodana and Minister Santati) got there without cultivating jhānā. Some bhikkhus attained the Arahant stage without cultivating jhānā (Paññāvimutti Arahants.) Those who took the "jhānic path" became Cetovimutti Arahants.

- Householders can cultivate anāriya jhānā while being a householder by suppressing kāma $r \bar{a} g a$. There is nothing wrong with that if one can realize that it is not an Ariya jhān $\bar{a}$. The problem arises when they think they have Ariya jhānā. Also, some become enamored with "jhānic pleasures" and lose focus on attaining Nibbāna.
- Another misconception is that it is impossible to get to the Sotāpanna stage without cultivating jhānā. That can easily be disproven. We know that a Sotāpanna can be reborn in the human or Deva realms. However, anyone with even the first anāriya jhānā will be reborn in a Brahma realm at death. Since attaining any jhānā is an ānantariya puñña kamma, such a person will be separated from the human bhava at the death of the physical body, even if there is kammic energy left in the human bhava. Thus, if a Sotāpanna has even an anāriya jhāna, they cannot be reborn in kāma loka. That contradicts the idea that a Sotāpanna must have a jhāna.
- The fact that only samādhi is needed to attain magga phala is also clear with the Abhidhamma analysis of relevant citta vīthi; see at the end of the post "Citta Vithi - Processing of Sense Inputs."
- It is critically important to understand these key concepts. Please feel free to comment/ask questions in the discussion forum.

### 6.1.2 Elephant in the Room 2 - Jhāna and Kasiṇa

June 16, 2022
Samādhi, Jhāna, and Sammā Samādhi
Jhāna, Jhāya, and Jhāyi- Different Meanings

### 6.1.2.1 Samādhi, Jhāna, and Sammā Samādhi

June 16, 2022
Sammā Samādhi is possible only for a Noble Person (Ariya at or above the Sotapanna Anugāmi stage) with the comprehension of the Four Noble Truths. In comparison, various types of samādhi and jhāna are accessible to all humans.

## Elephants in the Room - Change of Format

1. On February 28, 2022, I started a new series of posts on "Elephants in the Room." The goal is to highlight the apparent contradictions in current English (and other) translations of critical concepts in Buddha Dhamma.

- I call these "elephants in the room" because these apparent contradictions have gone unnoticed all these years.
- It is a puzzling phenomenon because it is not necessary to know Pāli to see some of these contradictions. Even a child should be able to see some of these contradictions once pointed out!

2. The main issue is that most translators do not seem to fully understand the underlying fundamental concepts in Buddha Dhamma. That itself has roots in incorrect/incomplete translations of some Pāli keywords. In a simple example, "viññāna" is universally translated as "consciousness," but that gives rise to many contradictions; see, "First Elephant: "Elephant in the Room 1 - Direct Translation of the Tipitaka."

- I am starting on the Second Elephant, "Elephant in the Room 2 - Jhāna and Kasina," today.
- The Third Elephant is "Elephant in the Room 3 - Ānāpānasati." I wrote two posts on a series of posts on $\bar{A} n \bar{a} p a \overline{n a s a t i, ~ b u t ~ t h a t ~ n e e d s ~ t o ~ b e ~ o n ~ h o l d . ~ D i s c u s s i n g ~ t h e ~ b a c k g r o u n d ~ o n ~ j h a ̄ n a / k a s i n a ~ m e d i t a t i o n s ~}$ first is a good idea.
- Because of many prevalent misconceptions about jhāna/kasina, it is good to take a "deep dive" into the Tipiṭaka for a comprehensive analysis. Please make necessary comments in the discussion forum at "WebLink: PureDhammal: Posts on "Elephants in the Room""

## Billions of Samādhi - Can be Good or Bad

3. Samādhi ("sama" +" adhi" where "sama" means "equilibrium" and "adhi" means "dominance") means keeping the mind focused on a single arammana or a nimitta. When attention is tightly focused on something, the mind gets to "samādhi." However, there can be billions of samādhi: some are neutral, some are good, and others are bad.

- For example, if one is fully absorbed in an exciting book, one may not hear external disturbances. That is a neutral Samādhi. A suicide bomber assembling a bomb is also entirely concentrated on it because if he makes a mistake, that will blow him up. That is an example of evil or immoral Samādhi.
- Someone listening to a discourse or meditating can be in a good Samādhi. They may be fully absorbed in it too.
- Therefore, there can be billions of types of Samādhi with the mind focused on a specific ārammaṇa.

## Jhānā are Special Types of Samādhi

4. There are only four types of jhāna. But they can be either anariya jhāna or Ariya jhāna. We will discuss the distinction in upcoming posts.

- Jhānā are particular types of "good samādhi." They correspond to the mental states experienced in rupāvacara Brahma realms.
- One may realize such jhānic states via cultivating a particular type of puññābhisañkhāra (puñña abhisañkhāra.) Here one's mind becomes focused enough to be detached from "kāma sañkappa" or sensual stray thoughts. Then one's mind transcends the "kāma loka" and grasps the mindset of a particular rupāvacara Brahma realm. There are only four jhānic states. However, in a "normal jhānic state," the mind is not fully focused. Only in a "jhāna samāpatti" is a mind fully absorbed in a jhānic state.
- Today, many English texts incorrectly label the "higher rupāvacara samāpatti" as the fifth through the eighth jhāna. In the Tipiṭaka, they are labeled as ākāsānañcāyatana, viññānañcāyatana, $\bar{a} k i n ̃ c a n ̃ \tilde{n} \bar{a} y a t a n a$, and nevasañ̃̄ānāsaññāyatana samāpatti. When mind transceds the fourth jhāna samāpatti, it goes to ākāsānañcāyatana samāpatti straight away; there is no ākāsānañcāyatana $j h a ̈ n a$. The same holds for the other three arupāvacara states. (I have used that incorrect terminology too, but I will try to make necessary revisions.)
- One can attain anāriya jhānā and samāpatti by cultivating two types of abhisañkhāra with avijjjā. Let us briefly address that.

## Anāriya Jhāna/Samāpatti Reached via "Avijjā Paccayā Saṅkhāra"

5. There are mainly three types of abhisañkhāra that come into play in the "avijjā paccayā sañkhāra" step in Paticca Samuppāda. Those three types of abhisañkhāra lead to rebirths among the 31 realms as follows:

- The worst type, apuññābhisañkhāra (apuñña abhisañkhāra,) leads to rebirths in the four lowest realms. Immoral deeds take place with apuññābhisañkhāra.
- The next higher level of puñ̃̃ābhisañkhāra (puñ̃na abhisañkhāra) leads to rebirths in the higher seven realms in kāma loka and the 16 realms in the rūpa loka. Those lead to rebirths in the human realm, and the six Deva realms in kāma loka involve moral deeds. Cultivation of rūpāvacara jhāna takes place via a particular type of puññābhisañkhāra.
- The third type of āneñjābhisañkhāra (āneñja abhisañkhāra) leads to rebirths in the highest four realms of this world belonging to the arūpa loka. Today, many textbooks label those as "higher jhānā," but they are samāpatti; see \#4 above. Cultivation of āneñjäbhisañkhāra leads to arūpāvacara samāpatti.
- In brief, engaging in apuñ̃n̄abhisañkhāra lead to rebirths with direct suffering. Engaging in puññābhisañkhāra or āneñjābhisañkhāra lead to rebirth in higher realms with less suffering but when such lives end one is back to "square one," i.e., to rebirths in lower realms. That is the endless "Samsāric journey." I recommend reading "Rebirths Take Place According to Abhisañkhāra" for details/insights.

6. Therefore, samādhi, jhāna and samāpatti can be attained by humans even when Buddha Dhamma is not present in the world.

- Our Bodhisatta, who became Buddha Gotama, learned to cultivate anāriya jhānā and samāpatti from two yogis, Ālārakālāma and Uddaka Rāmaputta. He quickly realized the unfruitfulness of such anāriya jhānā and samāpatti and left to strive alone.

## Sammā Samādhi Is Necessary to Attain Magga Phala

7. Sammā Samādhi is a unique Samādhi. One can get into Sammā Samādhi only after beginning to comprehend the Four Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa starting at the Sotāpanna Anugāmi stage of Nibbāna. That is when one realizes the futility and danger of remaining in the endless "Samsäric journey." When that "broad worldview" sinks in the mind, one becomes a Sotāpanna Anugāmi. It is like comprehending one plus one is two. No one will be able to persuade otherwise after that.

- Therefore, Sammā Samādhi REQUIRES an understanding of the Four Noble Truths/Paticca Samuppāda/Tilakkhaña.
- It is not necessary to have jhāna or samāpatti to "see that worldview" and to get to Sammā Samādhi/magga phala.
- One can get to Sammā Samādhi/magga phala ONLY by frrst getting to Sammā Ditṭhi (correct worldview) and then cultivating the Eightfold Noble Path to systematically disengage from the "sufferingfilled world."
- As we know, the first step in the eightfold path is to get to Sammā Ditt $h i$. Just with that "correct worldview" the possibility of future rebirths in the apāy $\bar{a}$ will cease.

## Arahants With and Without Jhāna

8. A Noble Person on the Noble Path may or may not attain various jhāna or samāpatti. That is why there is a wide range of Arahants.

- Those who attain Ariya jhāna early cultivate them methodically to nirodha samāpatti to become Arahants; they are Cetovimutta Arahants.
- But there are Paññāvimutta Arahants who had not cultivated jhāna but attained the Arahanthood in relatively short times. However, they also get to the fourth jhāna briefly at the moment of Arahant magga phala, but they need to practice $j h \bar{a} n a$ to get into $j h \bar{a} n a$ at will.
- Then there were Arahants like Ven. Cūlapanthaka and Minister Santati who were both Cetovimutta and Pannavimutta (i.e., Ubhatovimutta) Arahants. They attained all jhānās, samāpatti, and many kinds of iddhi (supernormal powers) at the moment of attaining Arahanthood within a very short time. They had not cultivated any jhāna-for example, Ven. Cūlapanthaka could not even memorize a single $g \bar{a} t h \bar{a}$ after trying hard for months. He had almost completed pāramit $\bar{a}$ in previous lives, but a strong kamma vipāka was blocking his progress. With Buddha's help, he was able to attain the Arahanthood in a day and simultaneously attained iddhi powers as well: "WebLink: suttacentral: Cūlapanthaka (Thag 10.4). "

## It Is Foolish to Strive for Anāriya Jhānā and Samāpatti

9. The point here is that one needs to focus on attaining magga phala by first getting to Sammā Ditṭhi, which automatically leads to the first stage of Sammā Samādhi. That REQUIRES learning the correct version of Buddha Dhamma from a Buddha or a true disciple of the Buddha, i.e., a Noble Person (Ariya.)

- If one has attained jhānalsamāpatti/iddhi in recent lives, those people may attain anāriya jhāna at any point, many of them even before getting to the Sotāpanna Anugāmi stage. Others will be able to cultivate Ariya jhāna/samāpatti once reaching the Anāgāmi stage when it becomes possible to remove kāma rāga permanently (not just suppress).
- However, there is no point in making an effort to attain anāriya jhānā/samāpatti/iddhi. Upon death, all those "attainments" will be gone, and Saṃsāric suffering will still be there if one has not attained any magga phala!
- We have attained the highest samāpatti many times over in the rebirth process that has no discernible beginning.
- That is why one must entirely focus on attaining the Sotāpanna Anugāmi stage. That attainment happens only once, yet enough to overcome unimaginable suffering in the four lowest realms (apāyās) PERMANENTLY.
- We will discuss the etymology of Sammā Samādhi, jhāna, and kasina in the upcoming posts.

### 6.1.2.2 <br> Jhāna, Jhāya, and Jhāyi - Different Meanings

June 23, 2022; Revised \#9 later in the same day; revised October 17, 2022
Jhāna, jhāya, and jhāyi are interrelated and can have different meanings depending on the context. In particular, it can refer to "contemplation/meditation in general" or "specific meditative states transcending the sensual realm," ie., "jhānic states."

## Jhāya - To Contemplate or Meditate

1. In the process of explaining the difference between Ariya (Buddhist) and anāriya (non-Buddhist) meditations, the Buddha gave an analogy in the "WebLink: suttacentral: Sandha Sutta (AN 11.9)." You can read the English translation in the above link. But let me briefly describe the analogy. (Note that in the topic of the Pāli version, "Sandha" is erroneously replaced by "Saddha.")

- In the days of the Buddha, specially trained horses were a major division of an army. Such horses are "thoroughbreds" ("assājānīyo.") There, "ass $\bar{a} "$ are horses, and "ajānīyo" means "thoroughbreds/special breed." They don't think much about the food and spend time training and thinking about it. At the beginning of the sutta, the Buddha tells Sandha, "Ājānīyajhāyitaì kho, sandha, jhāya" or "Sandha, meditate like a thoroughbred."
- In contrast, an inferior horse ("assakhaluñko") spends the whole day thinking about food: "Assakhaluñko hi, saddha, doniyā baddho' yavasaì yavasan'ti jhāyati" or "An inferior horse, tied up by the feeding trough, thinks all the time about eating: 'Fodder, fodder!" ("yava" means fodder or dried hay.)
- This sutta reveals one ordinary meaning of the word "jhāya" with the meaning of "to contemplate" because a horse can do that too.

2. So, the Buddha admonishes bhikkhu Sandha that he should meditate like a "thoroughbred horse" and not like an inferior horse.

- Thus, the word jhāyi referred to meditation (not merely thinking random thoughts) in the same sutta. That is the most common usage in the suttas.
- Then the Buddha points out that an anāriya yogi meditates by taking a worldly object (earth, water, fire, air, etc.) AND also with hidden defilements in mind. In contrast, Ariyas (Noble Persons) "don't meditate dependent on the earth, water, fire, and air. They don't meditate dependent on the dimension of infinite space, infinite consciousness, nothingness, or neither perception nor non-perception. They don't meditate dependent on this world or the other world. They don't meditate dependent on what is seen, heard, thought, known, attained, sought, or explored by the mind." to quote from the English translation in the above link.
- We will discuss that below.
- Note that $j h \bar{a} y a$ means "to meditate," jhāyi means "meditator," and $j h a ̄ n a$ refers to a specific meditative state. Samādhi is the general result of meditation, but as we will see, there are "immoral" or "micchā samādhi," but those never lead to jhāna. Both Ariya- and anāriya- meditations lead to jhāna, but they have different qualities. It is possible to reach Nibbāna with or without going through jhānic states.

## Types of Meditators ( $\mathbf{j} h \bar{a} \overline{\boldsymbol{l}} \overrightarrow{\boldsymbol{u}}$ )

3. "WebLink: suttacentral: Adhitthānahāravibhañga (Ne 17)" in the Tipitaka Commentary "Nettipararana" explains the types of meditators: "Jhāy $\overline{\bar{"}} \mathrm{t} i$ ekattatā. Tattha katamo jhāy $\overline{\mathbf{l}}$ ? Atthi sekkho jhāyī, atthi asekkho jhāyī, nevasekkhanāsekkho jhāȳ̄, ājāniyo jhāyī, assakhaluñko jhāyī, diṭ̣thuttaro jhāyī, taṇhuttaro jhāȳ̄, paññuttaro jhāyī. Ayaì vemattatā."

Translated: "Jhāyr" means to "meditate." What are the different types? Those who meditate can be Noble Persons in training (sekkho,) Noble Persons who completed training (Arahants or asekkho), and others (average humans or neither sekkho nor asekkho). Then some meditate like a "thoroughbred horse" (ājāniyo) and others like an "inferior horse" (assakhaluñko). We can also categorize based on the goal: to cleanse views (ditṭhuttaro,) dispel attachments (taṇhuttaro,) and cultivate pañ̃̄̄̄ (paññuttaro.) Those are the various types.

- The next paragraph describes various types of samādhi attained by those meditators (jhāy $\overline{\mathbf{l}}$ ): "Samādhī"ti ekattatā. Tattha katamo samādhi? Saraṇo samādhi, araṇo samādhi, savero samādhi, avero samādhi, sabyāpajjo samādhi, abyāpajjo samādhi, sappītiko samādhi, nippītiko samādhi, sāmiso samādhi, nirāmiso samādhi, sasañkhāro samādhi, asañkhāro samādhi, ekaìsabhāvito samādhi, ubhayamisabhāvito samādhi, ubhayato bhāvitabhāvano samādhi, savitakkasavicāro samādhi, avitakkavicāramatto samādhi, avitakkaavicāro samādhi, hānabhāgiyo samādhi, ṭhitibhāgiyo samādhi, visesabhāgiyo samādhi, nibbedhabhāgiyo samādhi, lokiyo samādhi, lokuttaro samādhi, micchāsamādhi, sammāsamādhi. Ayamं vemattatā."
- It will take the whole post to explain those. But I have highlighted the ones that we will be discussing. Lokiya samādhi is reached via any meditation unrelated to lokuttara samādhi (on the Noble Path.) Micchā samādhi is reached via immoral reflections, for example, by a master thief planning a robbery. Sammā samādhi can be two types, with the lokuttara category leading to Nibbāna. Note that jhāna is not explicitly cited here, but it is a particular type of samādhi that can be lokiya (anāriya) or lokuttara (Ariya.)

## Ariya and Anāriya Meditations

4. In two related suttas to the sutta in \#1 above, "WebLink: suttacentral: Saññā Sutta (AN 11.7)" and "WebLink: suttacentral: Manasikāra Sutta (AN 11.8)," the Buddha explained the difference between Ariya and anāriya meditations more clearly.

- In the first sutta, Ven. Ānanda asks the following question. See Ref. 1 for the Pāli quote that I will translate (I have modified the English translation from the link; you can compare the two translations). Let us start with the first part of the quote in Ref. 1.
"Would it be possible, Bhante, for a bhikkhu to get to samādhi (samādhipatiläbho) WITHOUT taking in the pathavisaññā of pathavi (neva pathaviyain pathavisaññ̄̄ assa)? (Note that "assa" here means 'to take in.")
- Here, Ven. Ānanda refers to using a kasina object made of clay (pathavi.) When a yogi focuses on a clay ball, his mind stops jumping to stray thoughts of greed, anger, or ignorance. That can lead to a calm mind, and depending on the person, it can even lead to anāriya jhāna.
- Then Ven. Ānanda asks the same question about using other types of kasiṇa objects: "na āpasmim $\bar{a} p o s a n ̃ n ̃ ̄ \bar{i}$ assa, na tejasmim tejosaññ̄ assa, na vāyasmim vāyosaññ̄ assa." Yogis typically use a bowl of water and fire to latch onto $\overline{\boldsymbol{a}}$ po sañña and tejo sañña .
- That last one on "taking in the vāyo sañ̃$\tilde{\boldsymbol{a}}$ refers to the breath meditation. So, it should be clear that $\bar{A} n a \overline{p a ̄ n a s a t i ~ i s ~ N O T ~ b r e a t h ~ m e d i a t i o n . ~ A l s o, ~ s e e ~ " S a n ̃ n ̃ a ̄ ~-~ W h a t ~ I t ~ R e a l l y ~ M e a n s . " ~}$

5. One could reach the fourth anāriya jhāna with those techniques. Once there, an anāriya yogi can get to the first $r \bar{u} p \bar{a}$ vacara samāpatti by focusing on the "infinite space." After getting there, he can move to the
next samāpatti by concentrating on the "infinite viññaña." In this way, he can proceed to the nevasañn̄ānāsaññāyatana samāpatti. Throughout that process, the yogi will focus on a lokiya object (belonging to this world); thus, all those are lokiya samādhi.

- Finally, Ven. Ānanda asks if a samādhi is possible WITHOUT focusing on anything in this world (that we perceive as humans: idhalokasañ $\tilde{n} \boldsymbol{a}$ ) or even in paraloka (as a gandhabba or beings in other realms.)
- Therefore, the question raised by Ven. Ānanda is, "Is it possible to get into a samādhi WITHOUT going through such a process?

## The focus of Ariya - Meditations

6. The Buddha says (Ref. 2) that there is such a meditation without taking in a sañ $\tilde{\boldsymbol{a}}$ of a "lokiya entity." But that is possible only for a Noble Person (Ariya) who has "seen Nibbāna," i.e., who has gotten to Sammā Samādhi. They can focus on that Nibbāna that they have SEEN (at their level or stage.) Of course, only an Arahant can contemplate the "ultimate release" that they reached.

- That is: " 'etamin santam etam pan̄̄̄tain, yadidam sabbasañkhārasamatho sabbūpadhipatininissaggo tanhākkhayo virāgo nirodho nibbānan'ti" OR "This is peaceful; this is excellent-that is, the stopping of all sankhāra, the letting go of all bonds to the rebirth process, the ending of craving, stopping of rebirth, cessation of the world, nibbāna." I have highlighted the deviations from the English translation in the link.
- That is the verse an Ariya recites/contemplates to reach samādhi. Some of those at or above the Anāgāmi stage may get to Ariya jhān̄̄̄ that way. Those below the Anāgāmi stage may get to anāriya $j h \bar{a} n \bar{a}$ that way. There is nothing wrong with that. It is good to cultivate even an anāriya jhān $\bar{a}$ AFTER attaining the SotāpannalAnugāmi.
- It is just that even the first Ariya jhānā is possible only after the Anāgāmi stage; see, "Possible Outcomes of Meditation - Samādhi, Jhāna, Magga Phala."
- The second sutta in \#4, "WebLink: suttacentral: Manasikāra Sutta (AN 11.8)," has the same explanation. It focuses on manasikāra instead of saññā.
- Arahants also cultivate samādhi, as mentioned in \#3 above. In particular, pañ̃̃̄̄vimutti Arahants may do that to reach Ariya jhānā so that they can have a "blissful experience in the present life." Let us look at another sutta to discuss that.

## Four Uses of Ariya Samādhi - Samādhibhāvanā Sutta

7. The "WebLink: suttacentral: Samādhibhāvanā Sutta (AN 4.41)" explains that samādhi bhāvanā is of four types:

- (i) for a blissful experience in the present life (dittthadhammasukhavihārāya or ditthadhamma sukha vihārāya, where "diṭthadhamma" means "in this life,")
(ii) for gaining knowledge and vision (ñānadassanappatiliābhāya),
(iii) for gaining mindfulness and awareness to cultivate Satipaṭthāna/Ānāpānasati (satisampajaññāya), and,
(iv) to attain Arahanthood via the ending of defilements (āsavānaì khayāya).
- Note that the usage of samādhi bhāvanā is in that order. However, occasionally, some get to the Arahant stage within a short time, like Ven. Culapanthaka or Minister Santati. In such a case, (i) comes last since they go through (ii), (iii), and (iv) quickly.
- Also, note that (i) above may or may not involve jhāna. It can be samādhi without jhāna.
- In (ii) through (iv,) one must engage in Vipassanā Bhāvanā to cultivate insight once getting to Samatha. See \#9 below.

## Critical to Understanding Nibbāna

8. We need to start by looking at the FUNDAMENTAL idea of Nibbāna.

- Even though relatively little suffering manifests in realms higher than the human realm, a "living being" spending most of the Saimsāric journey in the lowest four realms (apāyās) filled with suffering. Thus, the Buddha taught that this world of 31 realms is filled with suffering.
- "Full Nibbāna" (Parinibbāna or the "complete release from suffering") is attained at the death of an Arahant. That Arahant will not be reborn in any of the 31 realms.
- I must keep repeating those basics because many people have not grasped those ideas. I want to emphasize the foundation.

## Cultivating Vipassana

9. Thus, any meditation where the focus of the mind is a "worldly object" (a clay ball, a bowl of water, breath, etc.) It CAN NOT be a Buddhist meditation.

- Instead of contemplating worldly things, one MUST reflect on their unfruitful nature. That is vipassana $\bar{a}$ meditation (as explained in the WebLink: suttacentral: Ānāpānasati Sutta (MN 118) and even more detail in the "WebLink: suttacentral: Satipatthāna Sutta (MN 10)". We will discuss those.
- Suppose someone with magga phala likes to cultivate jhāna (with Samatha meditation.) In that case, they should contemplate the Nibbāna that they have experienced (at that level) as we discussed above: " 'etaì santaì etaì pan̄ītaì yadidaì sabbasañkhārasamatho sabbūpadhipaṭinissaggo tanhäkkhayo virāgo nirodho nibbānan'ti."
- While anāriya yogis get to Samatha (and anāriya jhāna) with the traditional kasiña and breath meditation (detailed in Visuddhimagga), Ariyas (Nobel Persons) attain Ariya jhāna with the above verse.
- Those who have not reached the Sotāpanna stage can get to Samatha samādhi by living a moral life and listening/reading about Dhamma concepts. That will calm the mind enough to cultivate vipassanā (insight meditation) on the Four Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa. There is no need to do kasina/breath meditations. See, "Sila, Samādhi, Paññā to Paññ̄a, Sila, Samādhi."

## "Jhāyi" Can Mean "To Burn"

10. Finally, there is another meaning of jhāyi. We can see that from the following verse in the "WebLink: suttacentral: Saminojana Sutta (SN 12.53): "Seyyathāpi, bhikkhave, telañca paṭicca vaṭtiñca paṭicca telappadīpo jhāyeyya."
That means: "Just like an oil lamp depended on oil and a wick to burn."

- That oil lamp will burn only if there is enough oil. When the oil runs out, the wick will burn quickly and extinguish.
- In the same way, when taṇhā ceases (tanhhā nirujjhati) there is no more fuel for the Samināric journey: "Taṇhānirodhā upādānanirodho" leads to bhava and jāti nirodha in the Paṭiloma Paṭicca Samuppāda. That is the end of rebirth and Nibbāna!

## References

1. 'Siyā nu kho, bhante, bhikkhuno tathārūpo samādhipaṭilābho yathā neva pathaviyaì pathavisaññ̄̄ assa, na āpasmim àposaññ̄ assa, na tejasmim tejosaññ̄ assa, na vāyasmim vāyosaññ̄ assa, na ākāsānañcāyatane ākāsānañcāyatanasaññ̄ assa, na viññānañcāyatane viññānañcāyatanasaññ̄̄ assa, na ākiñcañ̃̄̄ayatane ākiñcañ̃̄āyatanasaññ̄ assa, na nevasañn̄ānāsaññāyatane nevasaññānāsaññāyatanasaññ̄ assa, na idhaloke idhalokasaññ̄ assa, na

2. "Siyā, ānanda, bhikkhuno tathārūpo samādhipaṭilābho yathā neva pathaviyaì pathavisaññ̄̃ assa, na āpasmimं āposaññ̄ assa, ..

After completing that verse, the Buddha explains what a Noble Person focuses the mind on in the next verse: "Idhānanda, bhikkhu evamsaññī hoti: 'etamं santamं etain paṇītam, yadidam sabbasañkhārasamatho sabbūpadhipaṭinissaggo tanhākkhayo virāgo nirodho nibbānan'ti. ["It is peaceful, it is serene, the expelling of all sañkhāra, breaking of bonds, removing greed and hate; Nibbāna.'"]

### 6.1.3 Elephant in the Room 3 - Ānāpānasati

June 2, 2022
Ānāpānasati- Overview
Assāsa Passāsa - What Do They Mean?
Ānāpānasati Not About Breath - Icchānañgala Sutta
Mahārāhulovāda Sutta and Ānāpānasati

### 6.1.3.1 Ānāpānasati - Overview

June 2, 2022; revised June 5, 2020 (\#11 added); August 15, 2022; October 26, 2022
Evidence from the Tipitaka shows that $\bar{A} n \bar{a} p a \overline{n a s a t i ~ B h a ̄ v a n a ̄ ~ i s ~ n o t ~ b r e a t h ~ m e d i a t i o n . ~ T h e ~ f o r m e r ~ c a n ~ l e a d ~}$ to Nibbāna, while the latter cannot.

## Introduction

1. In the series on "Elephants in the Room," I discuss many blatant misinterpretations of the Tipitaka under three categories: "Word-for-Word Translation of the Tipiṭaka," "Ānāpānasati Bhāvanā," and "Tilakkhaṇa."

- I call these "Elephants in the Room" for the following reason. I have tried to point out many contradictions in current English translations of the Tipitaka. Those who have diligently followed this website are aware of these issues.
- However, I encountered strong opposition when I pointed out these issues at a well-known discussion forum. Anicca as impermanence and $\bar{A} n a \bar{p} \bar{n} a s a t i ~ B h a ̄ v a n a ̄ ~ a s ~ b r e a t h-m e d i t a t i o n ~ s e e m ~ t o ~ b e ~ i n g r a i n e d ~$ into the minds of many people. It is difficult for them to "remove the dark glasses" and "see the truth."

2. Some say, "I don't know enough Pāli to determine who has the correct interpretations, you or those wellestablished teachers." However, knowledge of Pāli is not necessary to see many contradictions.

- For example, see "Distortion of Pāli Keywords in Paticca Samuppāda." Even a child should be able to see such apparent contradictions!
- I understand that getting rid of firmly-embedded wrong views is not easy, especially when the current "Theravāda establishment" is behind such interpretations. I will do what I can to the best of my ability. (Of course, I learned these interpretations from the late Waharaka Thero.)
- It is a relief to see that some people have understood, as we can see from the comments in our discussion forum.

## First Elephant in the Room - Word-for-Word Translation of the Tipiṭaka

3. I have already posted under the "Word-for-Word Translation of the Tipitaka" category and will post more later.

- In this first post on "Ānāpānasati Bhāvanā," I will lay out a map for future posts. I have divided this subsection into several categories, as indicated below.
 I will be discussing the main verses of this sutta in future posts. Before that, I need to provide some background as laid out below. Note that in Pāli, the two words $\bar{A} n \bar{a} p \bar{a} n a$ and sati combine as "Ānāpānassati." Thus, you may see both Ānāpānasati and Ānāpānassati.
- I will be using the English translation in the above link for comparison. I chose this particular translation because it has the English and Pāli verses side-by-side [for ebook it is line-by-line], so it is easy for anyone to compare with my translation of a specific verse. Of course, most current English translations are very similar; for example, "WebLink: accesstoinsight.org: Ānāpānasati Sutta: Mindfulness of Breathing (MN 118.)."

## Second Elephant in the Room - $\bar{A} n \bar{a} p \bar{a} n a s a t i ~ B h a ̄ v a n a ̄ \bar{a}$ is Not Breath Meditation

4. The point that I will be making is the following. "Annāpānasati Bhāvan $\bar{a} "$ is NOT "Mindful of Breathing." Breath meditation is NOT a Buddhist meditation. Hindus practice breath meditation too.

- Some people try to cheat by saying $\bar{A} n \bar{a} p a \overline{n a s a t i ~ B h a ̄ v a n a ̄ ~ i s ~ t h e ~ f i r s t ~ s t e p ~ a s ~ a ~ S a m a t h a ~ B h a ̄ v a n a ̄, ~ a n d ~}$ then one needs to do "insight meditation." However, I will present evidence to show that $\bar{A} n \bar{a} p \bar{a} n a s a t i$ Bhāvanā, by itself, is all one needs to attain Arahanthood.
- Furthermore, one CAN NOT do the CORRECT insight mediation if one does not even understand that $\bar{A} n \bar{a} p \bar{a} n a s a t i ~ B h \bar{a} v a n \bar{a}$ is not breath meditation!
- The Buddha has clearly stated that if one completes the steps in $\bar{A} n \bar{a} p \bar{a} n a s a t i ~ B h \bar{a} v a n \bar{a}$, one will be fulfilling the steps in the Satipaṭthāna Bhāvanā. Satipaṭ! $\bar{a} n a$ Bhāvanā discusses the same steps in greater detail.
- An Introduction to Ānāpānasati is in posts \#5 through \#8 in "Bhāvanā (Meditation)." The following is an overview of topics in posts in the ""Elephant in the Room' 3 - Ānāpānasati"' subsection.

## Breath Not Mentioned in Ānāpāna Vagga in Saminutta Nikāya

5. There is a small collection of suttas in the $\bar{A} n \bar{a} p \bar{a} n a$ Vagga of Samyutta Nikāya, BEFORE the section on $\bar{A} n \bar{a} p \bar{a} n a s a t i$. That is to give an idea of what is involved in $\bar{A} n \bar{a} p \bar{a} n a$, which comes from "A$n a$ " + "āpāna," where two words mean "taking in (kusala)" and "discarding (akusala or defilements)."

- That section in the $\bar{A} n \bar{n} p \bar{a} n a \operatorname{Vagga}$ has several suttas starting with the "WebLink: suttacentral: Atthikamahapphala Sutta (SN 46.57)" and ending with the "WebLink: suttacentral: Ānāpāna Sutta (SN 46.66)."
- You can read the English translations in the above links and see that the word "breath" is NOT there!
- Instead, those suttas briefly describe some KEY CONCEPTS that one needs to understand to correctly "take in "and "discard" ( $\bar{A} n \bar{a} p \bar{a} n a)$ to cultivate $\bar{A} n \bar{a} p \bar{p} n a$ sati.

6. For example, the first sutta explains that one needs to understand how to cultivate "at!thika sañña." That is the "anicca or unfruitful" nature of this world. It is amusing to see that the English translation in the first link above translates "atṭhika saññ̄" as "perception of a skeleton"!

- Word-by-word translations can lead to such ridiculous statements.
- The word "attthi" can mean "bones." But the correct meaning in this context is not that, as I will explain later.
- Other suttas in that series briefly mention several types of meditations in Satipatthāna, and the series ends with "WebLink: suttacentral: Ānāpāna Sutta (SN 46.66)" which briefly states, "Bhikkhus when $\bar{A} n a \bar{p} a \overline{n a s a t i}$ is developed and cultivated it's very fruitful and beneficial.."

##  Arahanthood

7. There are twenty suttas in the $\bar{A} n \bar{a} p \bar{a} n a$ Saimyutta of Samiyutta Nikāya DIRECTLY stating that Ānāpānasati Bhāvanā - by itself - can lead to Arahanthood.

- The series starts with the "WebLink: suttacentral: Ekadhamma Sutta (SN 54.1)." Ekadhamma means "one dhamma," implying that this is all one needs to get to Arahanthood.
- The series ends with a short sutta stating that Ānāpānasati Bhāvanā will lead to the removal of all samiyojana, anusaya, and āsava. There is no question that it leads to Nibbāna! See, "WebLink: suttacentral: Āsavakkhaya Sutta (SN 54.20)."
- Thus, this series of suttas provides enough evidence by itself.
- Incredibly, the translator in the link (and other "well-known" teachers) did not realize this while they did these translations. As I keep saying, sutta translation has become a mechanical process. It is a dangerous practice. Many suttas with deeper meanings require detailed explanations. See, "Sutta Interpretation - Uddesa, Niddesa, Patiniddesa."

## 

8. The Buddha discussed the Ānāpānasati Bhāvanā in the "WebLink: suttacentral: Ānāpānassati Sutta (MN 118)." Let me make two quotes from the sutta that should be enough to make the case.
"Ānāpānassati, bhikkhave, bhāvitā bahulīkatā cattāro satipațthāne paripūreti."

- Translation: "Anāpānasati (Bhāvanā), when developed and cultivated, fulfills the four sections of the satipaṭthāna (Bhāvanā.)

## "Nāhaì, bhikkhave, mut!̣hassatissa asampajānassa ānāpānassatim vadāmi."

- Translation: "I do not teach this $\bar{A} n \bar{a} p a ̄ n a s a t i ~(B h a ̄ v a n a \bar{a})$ to those who do not have (sammā) sati."
- Anyone who has not understood the Four Noble Truths/PaticcaSamuppäda/Tilakkhaṇa would not have sammā sati.

The English translation in the above link translates that Pāli verse as: "There is no development of mindfulness of breathing for someone who is unmindful and lacks awareness, I say."

- As I have explained, it is not about "breathing in and out." Any person should be able to "mindfully breathe in and out"! The translator does not understand "sati" there is "Sammā Sati."

## Assāsa/Passāsa in Ānāpānasati Is not About the Breath but <br> Kusala/Akusala

9. How did those translators miss the above critical points? I am not quite sure. I cannot even imagine how ALL OF THEM missed such crucial verses.

- As you can see, the English translations in the above links do not contradict my statements. But from their manner of writing, it is clear that they did not grasp the meanings.
- They must have been intent on cranking out as many suttas as possible without really paying attention to check self-consistency.
- One possibility is the following. No one in recent years had understood the deeper meanings of assāsa and passāsa (in the context of cultivating the Eightfold Noble Path.) So, they mechanically used the ordinary meanings of inhaling and exhaling.
- There is no question that even breath meditation can lead to a calm mind. Yet, that will NOT lead to rāgakkhaya, dosakkhaya, mohakkhaya (i.e., Nibbāna.)

10. One word with two or more meanings (depending on the context) is common in all languages.

- Let us consider a simple example in English. "Turn right at the next junction" and "You are right" are perfectly correct statements. The word "right" has very different meanings in the two contexts.
- These translators of the Tipitaka suttas have not understood the meanings of assāsa and passāsa in cultivating the Eightfold Noble Path.

## $\bar{A} n a ̄ p a ̄ n a s s a t i k a t h \bar{a}$ - Detailed Explanation in Paṭisambhidāmagga

11. There is a detailed explanation of Ānāpānasati Bhāvanā in the Tipitaka commentary Patisambhidāmagga: "WebLink: suttacentral: Ps 1.3 Ānāpānassatikathā."

- One can write a book translating this detailed explanation!

## Summary

12. I hope I have given enough information to make the case without writing another post.

- But I will provide further details, even if not in the same order as above. Some sections above do not need further clarification.
- In the meantime, please post your comments/questions in the new thread that I opened in the discussion forum: "WebLink: PuredDhamma Forums: Posts on 'Elephants in the Room'."
- Please use that new thread to make comments/questions on the posts in the previous subsection, "WebLink: PuredDhamma Forums: Word-for-Word Translation of the Tipitaka."

### 6.1.3.2 Assāsa Passāsa - What Do They Mean?

June 8, 2022; revised August 18, 2022
In an ordinary sense, assāsa and passāsa mean inhaling and exhaling. However, the deeper meanings in the context of $\bar{A} n \bar{a} p a \overline{n a s a t i ~ B h a ̄ v a n a ~}$ are about purifying a mind by taking in morals and discarding immoral.

## $\bar{A} n a \bar{p} \bar{a} n a$ and Assāsa Passāsa

1. $\bar{A} n \bar{a} p a ̄ n a$ comes from "āna" + "āpāna," where the latter two words mean "take in/import" and "discard/export." Thus, in connection with the Ānāpānasati Bhāvanā, assāsa and passāsa represent taking in morals and discarding immoral.

- Cultivating (taking in) good morals and discarding immoral is the basis of Buddha Dhamma.
- Breathing in and breathing out are physical activities. How can that cleanse a mind?
- Yet, it can calm down the mind because when concentrating on the breath, the mind cannot wander around and start generating sensual, angry, or foolish thoughts. That is indeed a lower form of Samatha Bhāvanā. However, Ānāpānasati Bhāvanā is NOT a Samatha Bhāvanā, as we will see below.
- A better way to get to Samatha is to listen to a Dhamma discourse or read about a Dhamma concept.

## Words With Multiple Meanings

2. In any language, there are words with multiple meanings depending on the context.

- For example, in English language. the word, "interest" has very different meanings in the following two sentences: "We are paying a high interest on the loan" and "She has no interest in him."
- In the same way, the Pāli words assāsa and passāsa can mean very different things depending on the context.

## Mundane Meanings of Assāsa Passāsa

3. In some suttas, assāsa passāsa mean inhaling and exhaling. But most suttas convey a deeper meaning in the context of $\bar{A} n \bar{a} p a \bar{a} n a s a t i ~ B h \bar{a} v a n \bar{a}$. It is easy to figure out which meaning applies.

- For example, assāsapassāsā in the context of kāya sañkhāra refers to breathing in and out. The Buddha explains that in the "WebLink: suttacentral: Dutivakāmabh̄̄ Sutta (SN 41.6)." "Assāsapassāsā kho, gahapati, kāyasañkhāro, vitakkavicārā vacīsañkhāro, saññā ca vedanā ca cittasañkhāro"ti. In that verse, the Buddha says, "Assāsapassāsā means kāyasañkhāra."
- When asked why, the Buddha explained: "Assāsapassāsā kho, gahapati, kāyikā. Ete dhammā kāyappattibaddhā, tasmā assāsapassāsā kāyasañkhāro" i.e., "inhaling and exhaling is associated with bodily functions (kāyappaṭibaddhä), and that is why it is associated with kāya sañkhāra."
- The same definition of $k \bar{a} y a$ sañkhāra is in the "WebLink: suttacentral: Cūlavedalla Sutta (MN 44)."

4. The "WebLink: suttacentral: Anupubbanirodha Sutta (AN 9.31)" states:"catutthaim jhānamं samāpannassa assāsapassāsā niruddhā honti."

- Here, assāsa and passāsa again refer to the breath. That verse says: "Breathing ceases in the fourth jhāna."
- Two more suttas with the ordinary meanings for assāsa and passāsa: "WebLink: suttacentral: Sappa Sutta (SN 4.6)" and "WebLink: suttacentral: Mahāsaccaka Sutta (MN 36)."
- Now let us look at some suttas with the deeper meanings of assāsa and passāsa.

## Deeper Meanings - Assāsa and Parama Assāsa

5. Two suttas clearly illustrate the deeper meaning of "assāsa." The following is my translation of "WebLink: suttacentral: Assāsappatta Sutta (SN 38.5)" First, note that "patto" means "to get to a certain state." Here, "assāsappatto" means "someone who has got to assāsa" or, in the context of this sutta, "someone who started taking in lokuttara morals."
"Venerable Sāriputta, who is an assāsappatto? When a Bhikkhu truly understands the origin and ending of the six contact fields (phassāyatanāna) and their gratification, drawback, and escape, they have gained solace/relief by entering the Noble Eightfold Path."

The Pali verse: "Yato kho, āvuso, bhikkhu channaì phassāyatanānaì samudayañca atthañgamañca assādañca ādīnavañca nissaraṇañca yathābhūtain pajānāti, ettāvatā kho, āvuso, assāsappatto hotī" $t i$.

- Note: assāsappatto is a Sotāpanna/Sotāpanna Anugāmi and "pajānāti" means "understands."
- When asked how to get there, Ven. Sripuatta replies that it is the Noble Eightfold Path ("Ayameva kho, $\bar{a} v u s o$, ariyo aṭthañgiko maggo etassa assāsassa sacchikiriyāya, seyyathidaím-sammādiṭṭhi ... pe... sammāsamādhi.")
" (Also note that when the two words "assāsa" and "patto" are combined, it is pronounced as "assāsappatto.")

6. The "WebLink: suttacentral: Paramassāsappatta Sutta (SN 38.6)" completes the description by saying that at the Arahant stage one has completed the Noble Path and has gained the ultimate (parama) solace/relief.
 assādañca ādīnavañca nissaranañca yathābhūtamं viditvā anupādāvimutto hoti, ettāvatā kho, $\bar{a} v u s o, ~ p a r a m a s s a ̄ s a p p a t t o ~ h o t \bar{\imath} " t i$." Note: That means becoming an Arahant.

- Note: "viditva" means "experienced and verified" and that gets to "anupādāvimutto" or the "release from the Samsaric journey, i.e., the Arahanthood." In "paramassāsappatto" the word "parama" means "ultimate."
- Note: The English translation in the above link does not even translate those last critical verses in the two suttas! That is a clear illustration that the translator did not comprehend the importance of those verses.

7. In the "WebLink: suttacentral: Nakulapitu Sutta (AN 6.16)" the Buddha tells Nakulapitu Gahapati that his wife is an "assāsappatto" (i.e., a Sotapanna) whose advice he should take; see the end of the sutta.

- At the beginning of the "WebLink: suttacentral: Kalāra Sutta (SN 12.32)" bhikkhu Kalārakhattiyo asks Ven. Sāriputta: "Tena hāyasmā sāriputto imasmim dhammavinaye assāsamin patto"ti? That means, "Has Ven. Sāriputta found solace/relief in this teaching and training?"
- Venerable Sāriputta explains how one can get there, i.e., how to attain Nibbāna.

## One Becomes Assāsappatto by Cultivating the Noble Path

8. Both "WebLink: suttacentral: Assāsappatta Sutta (SN 38.5)" and "WebLink: suttacentral:
Paramassāsappatta Sutta (SN 38.6)" state that one becomes an "assāsappatto/paramassāsappatto" (Sotapanna Anugami/Arahant) by following the Noble Eightfold Path.

- In each sutta the following question is raised, "Katamo panāvuso, maggo katamā patipad $\bar{a}$, etassa assāsassa/paramassāsassa sacchikiriyāay""ti?" OR "Is there a path, is there a way to become a Sotapanna Anugami/Arahant."
- The reply was: "Ayameva kho, $\bar{a} v u s o$, ariyo atṭhañgiko maggo etassa assāsassa sacchikiriyāya, seyyathidaì-sammādiṭthi ...pe... sammāsamādhi." OR "Yes. It is the Noble Eightfold Path sammādiṭṭhi ...pe... sammāsamādhi."

## Ānāpānassati Sutta (MN 118)

9. Now, let us look at the "WebLink: suttacentral: Ānāpānassati Sutta (MN 118)" briefly to see the usage of the words assāsa and passāsa.

- The first usage of those words is in: "So satova assasati satova passasati."
- Note that the words "assa" and "passa" combined with "sati." Here, "sati" does not just mean to "fix the attention" but "Samma Sati" that comes with the comprehension of the Four Noble Truths.
- That verse means: "He contemplates (with Sammā Sati) what to take in, and what to discard (regarding an ārammaña.)"

10. The third verse below that: "'sabbakāyapatisamंved̄̄ assasissāmì'ti sikkhati,' 'sabbakāyapaṭisaìved̄̄ passasissām $\vec{\imath} t i \operatorname{sikkhati} . "$

- The phrase "assasissāmī’ti sikkhati" becomes apparent when written, "assa sissāmīti sikkhati" That means, "He trains by taking in what will be good for that training (purifying the mind)."
- In the same way, "passasissāmī'ti sikkhati" means "He trains by discarding what will be bad for that training (which is to purify the mind)."
- Those Verses in \#9 and \#10 are critical and appear many times throughout the sutta. We will discuss them in detail in an upcoming post.

## Aritṭha Sutta (SN 54.6) - Both Meanings

11. The incorrect version of $\bar{A} n \bar{a} p \bar{a} n a s s a t i$ was there even before the Buddha. In the WebLink: suttacentral: Arittha Sutta (SN 54.06), Bhikkhu Ariṭha told the Buddha that he practices Ānāpānassati as follows: "So satova assasissāmi, satova passasissāmi."

- In the above verse, Bhikkhu Ariṭ़ha meant, "I breathe in mindfully, breathe out mindfully." There is no "sikkhati" in this verse. Inhaling and exhaling does not lead to training on the Noble Path, i.e., removal of defilements from the mind." Furthermore, there is no role for "Samm $\bar{a}$ Sati" via "So satova assasati satova passasati" as in Ānāpānassati Sutta (MN 118); see \#9 above.

The Buddha told him the following. "..Atthes $\bar{a}$, aritṭha, $\bar{a} n \bar{a} p \bar{a} n a s s a t i, ~ n e s a ̄ ~ n a t t h \bar{i} t i ~ v a d a ̄ m i . ~ A p i ~ c a, ~$ aritṭha, yathā ānāpānassati vitthārena paripuṇ̣ā hoti tạ̣ suṇāhi, sādhukam manasi karohi; bhāsissāmỉti.

- Translated: "..There is that ānāpānassati, Aritṭha. I don't say that there isn't. But I will describe the real (yathā) ānāpānassati in detail, listen and pay close attention. I will speak."

Then the Buddha explains with the same verses from the Ānāpānassati Sutta (MN 118): "So satova assasati, satova passasati. Dīgham va assasanto 'd̄̄ghamं assasāmīti pajānāti ...pe... 'paṭinissaggānupassī assasissāmī’ti sikkhati, 'paṭinissaggānupassī passasissāmī'ti sikkhati. Evaì kho, ariṭtha, ānāpānassati vitthārena paripuṇ̣ā hotī"ti."

- Of course, this explanation is the uddesa version. We will discuss that in the niddesa (with more details) in an upcoming post.

## Sabbe Saìkhārā Anassāsik $\bar{a}$

12. Anassāsik $\bar{a}$ comes from $\boldsymbol{n a}+$ assāsik $\bar{a}$. Thus, "anassāsik $\vec{a} "$ is something that should not be taken in or associated with or cultivated because it can only be detrimental.

- The verse, "evai̇ anassāsikā, bhikkhave, sañkhārā" means, "Bhikkhus, you should not cultivate sañkhārā." There are several suttas with that verse. See, for example, "WebLink: suttacentral: Vepullapabbata Sutta (SN 15.20)." Some others are SN 22.96, AN 7.66, MN 76, MN 112, and DN 17.
- It is easy to see why. The Akusala-mūla Pațicca Samuppāda starts with, "avijjā paccayā sañkhāra" and ends with "bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkhadomanassupāyāsā sambhavan'ti. Evametassa kelavassa dukkhakkhandhassa samudayo hoti." OR to "whole mass of suffering."
- Of course, "sañkhāra" are many types that can bring vipāka to varying degrees. Apuñña abhisañkhāra (or apuññabhisaṅkhāra) can lead to birth in the apāyās. Puñña abhisañkhāra (or puññābhisañkhāra) leads to "good births" but still extends the rebirth process where future rebirths in the apāy $\bar{a} s$ are still possible. All sañkhāra generation stops at the death of an Arahant.

1. Lokuttara $=$ Loka + Uttara. Here Loka, means the five aggregates. Uttara means above, beyond or that which transcends. It is the supra mundane consciousness that enables one to transcend this world of mind body. [loka : 'world', denotes the 3 spheres of existence comprising the whole universe, i. e. (1) the sensuous world (kāma-loka), or the world of the 5 senses; (2) the fine-material world (rūpa-loka), corresponding to the 4 fine-material absorptions (s.jhāna 1-4); (3) the immaterial world (arūpa-loka), corresponding to the 4 immaterial absorptions (s.jhāna, 5-8). uttara : [adj.] higher, further; northern; over. (nt.), an answer; reply.

### 6.1.3.3 Ānāpānasati Not About Breath - Icchānañgala Sutta

## October 7, 2022; revised October 19, 2022 (\#10 added)

Icchānañgala Sutta - and many others — clearly illustrate that Ānāpānasati is not breath meditation.
"WebLink: suttacentral: Icchānanggala Sutta (SN 54.11)" is a short sutta. One can get a clear answer to whether $\bar{A} n \bar{a} p a \overline{n a s a t i}$ is breath meditation. I will translate the complete sutta so that there will be no ambiguity.

## Buddha Spending a Rainy Season (Vassā̄̄̄̄̄sa) in Seclusion

1. "Ekaṃ samayam bhagavā icchānañgale viharati icchānañgalavanasaṇde. Tatra kho bhagavā bhikkhū āmantesi: "icchāmahaṃ, bhikkhave, temāsaṃ paṭisall̄̄yituṃ. Nāmhi kenaci upasañkamitabbo, añ̃̃atra ekena piṇ̣dapātanīhārakenā"ti.
"Evaṃ, bhante"ti kho te bhikkhū bhagavato paṭissutvā nāssudha koci bhagavantaṃ upasañkamati, añ̃̃atra ekena piṇ̣dapātanīhārakena."

Translated: "On one occasion, the Blessed One was staying in Icchānanggala in the Icchānangala forest grove. He addressed the bhikkhus: "Bhikkhus, I wish to go into seclusion for three months. I am not to be approached by anyone except for the one who brings alms food."
"As you say, Bhante," the bhikkhus responded to him. And no one approached the Blessed One except the one who brought alms food.
2. "Atha kho bhagavā tassa temāsassa accayena paṭisallānā vuṭthito bhikkhū āmantesi: "sace kho, bhikkhave, aññatitthiyā paribbājakā evaṃ puccheyyuṃ: 'katamenāvuso, vihārena samaṇo gotamo vassāvāsaṃ bahulam vihāsīti, evaṃ puṭthā tumhe, bhikkhave, tesaṃ añ̃atitthiyānam paribbājakānaṃ evaṃ byākareyyātha: ‘ānāpānassatisamādhinā kho, $\bar{a} v u s o, ~ b h a g a v a ̄ ~ v a s s a ̄ v a ̄ s a m ̣ ~$ bahulam vihāsī’ti.

Translated: "Then the Blessed One, having emerged from seclusion after the passing of three months, addressed the bhikkhus: "Bhikkhus, if adherents of other sects ask you, 'How did Buddha Gotama spend the rains residence?' You should answer them in this way: 'It was with ānāpānasati samädhi that the Blessed One dwelled.'

## Buddha Spending Vassā $\bar{a} \bar{s} a$ in $\bar{A} n \bar{a} p a ̄ n a s a t i ~ S a m a ̄ d h i ~$

3. "Idhāham, bhikkhave, sato assasāmi, sato passasāmi. Dīgham assasanto 'dīgham assasāmī'ti pajānāmi, dīgham passasanto 'dīgham passasāmī'ti pajānāmi; rassaṃ assasanto 'rassaṃ assasāmìtti pajānāmi, rassaṃ passasanto 'rassaṃ passasāmīti pajānāmi; 'sabbakāyappaṭisaṃved̄̄ assasissāmī'ti pajānāmi ... pe ... 'paṭinissaggānupassī assasissāmī’ti pajānāmi, 'paṭinissaggānupassī passasissāmī̀ti pajānāmi."

The above verse (phrase) is the stock phrase describing $\bar{A} n \bar{a} p \bar{p} n a s a t i$ in the "WebLink: suttacentral: Ānäpānasati Sutta (MN 118)" EXCEPT for a critical difference. Let us look at the corresponding description in the Ānāpānasati Sutta (MN 118):
"So satova assasati satova passasati. Dīghaì vā assasanto 'dīghaì assasāmī'ti pajānāti, dīghaì vā passasanto ‘d̄̄ghaì passasāmī’ti pajānāti; rassam va assasanto 'rassam assasāmī'ti pajānāti, rassamं vā passasanto 'rassamं passasāmī’ti pajānāti; sabbakāyapatiisamंved̄̄ assasissāmī’ti sikkhati ... pe ...paṭinissaggānupassī assasissāmī'ti sikkhati, 'paṭinissaggānupassī passasissāmī'ti sikkhati."
4. I highlighted the words that are different in the two cases. Those in red denote Buddha's Ānāpānasati described in the Icchānañgala Sutta (SN 54.11). They are replaced by the ones in blue in the procedure followed by a bhikkhu in the Ānāpānasati Sutta (MN 118.)

- Also, ... pe ... indicates skipping the intervening part to keep the text short. The skipped sections include the sections of kāyānupassanā, vedanānupassanā, cittānupassanā, to the end of dhammānupassanā. That skipped section is a couple of pages long. The switch from pajānā$m i$ to sikkhati applies in all sections.

5. Other than the first-person usage for the Buddha (e.g., sato assasāmi) and the third-person for a bhikkhu (e.g., satova passasati), the main difference is in pajānāmi replacing sikkhati in kāyānupassanā through dhammānupassanā in the Ānāpānasati Sutta (MN 118.)

- The skipped sections include the four sections of $k \bar{a} y \bar{a} n u p a s s a n a \bar{a}$, vedanānupassanā, cittānupassan $\bar{a}$, to the end of dhammānupassanā. In kāyānupassanā, the verse "sabbakāyapatisamived $\bar{\imath}$ assasissāmī’ti sikkhati" for a bhikkhu is replaced by "sabbakāyappatisampvedī assasissāmī’ti pajānāmi" for the Buddha. Lastly, in dhammānupassanā, "paṭinissaggānupassī assasissāmī'ti sikkhati" for a bhikkhu is replaced by the verse "paṭinissaggānupassī assasissāmī'ti pajānāmi" for the Buddha.
- There, pajānāmi means "I know," and "sikkhati" means "(a bhikkhu) will train thus." In the Icchānañgala Sutta (SN 54.11), the Buddha recalls/reenacts the process for a "pleasant abiding," as stated in \#8 below, whereas a sekha bhikkhu would train that way, as indicated in \#7.
- Of course, the switching applies to all corresponding verses for vedanānupassanā and cittānupassanā, as pointed out in \#4.
- That distinction will become more apparent in \#7 and \#8 below.

## 

6. 'Yañhi taṃ, bhikkhave, sammā vadamāno vadeyya: 'ariyavihāro' itipi, 'brahmavihāro' itipi, 'tathāgatavihāro' itipi. Ānāpānassatisamādhim sammā vadamāno vadeyya: 'ariyavihāro' itipi, 'brahmavihāro' itipi, 'tathāgatavihāro' itipi."

Translated: "One can call that pleasant abiding of the Buddha a Noble dwelling, a Brahmā dwelling, a Tathāgata dwelling. The Ānāpānasati samādhi can be rightly called a Noble dwelling,' 'Brahmā dwelling,' or 'a Tathāgata dwelling.'

## A Trainee (Sekhā) Makes Progress With Ānāpānasati

7. "Ye te, bhikkhave, bhikkh $\bar{u}$ sekh $\bar{a}$ appattamānas $\bar{a}$ anuttaram yogakkhemam patthayamān $\bar{a}$ viharanti tesaṃ ānāpānassatisamādhi bhāvito bahulīkato āsavānaṃ khayāya saṃvattati."

Translated: "For those bhikkhus who are still trainees (sekhā) who have yet to attain the Arahanthship, cultivation of $\bar{A} n \bar{a} p a \overline{n a s a t i ~ s a m a ̄ d h i ~ l e a d s ~ t o ~ t h e ~ e n d i n g ~ o f ~ t h e ~} \bar{a} s a v \bar{a}$ (i.e., attaining Arahanthood)."

## A Buddha (or Arahant) Lives With Ānāpānasati for a Pleasant State of Mind

8. "Ye ca kho te, bhikkhave, bhikkhū arahanto khīnāsavā vusitavanto katakaraṇìyā ohitabhārā anuppattasadatthā parikkhīnabhavasaṃyojanā sammadañn̄̄̄vimuttā, tesam ānāpānassatisamādhi bhāvito bahulīkato diṭthadhammasukhavihārāya ceva saṃvattati satisampajaññāya ca."

Translated: "For those bhikkhus who are Arahants, who have irradicated defilements and have completed the Noble Path, $\bar{A} n \bar{a} p a ̄ n a s a t i ~ s a m a ̄ d h i ~ l e a d s ~ t o ~ a ~ p l e a s a n t ~ a b i d i n g ~ i n ~ t h i s ~ l i f e ~ t o g e t h e r ~ w i t h ~ m i n d f u l n e s s ~ \& ~$ alertness."

## Thus the Synonyms: Ariya Vihāra, Brahma Vihāra, Tathāgata Vihāra

9. 'Yañhi taṃ, bhikkhave, sammā vadamāno vadeyya: 'ariyavihāro' itipi, 'brahmavihāro' itipi, 'tathāgatavihāro' itipi. Ānāpānassatisamādhim sammā vadamāno vadeyya: 'ariyavihāro' itipi, 'brahmavihāro' itipi, 'tathāgatavihāro' itipī"'ti."

Translated: Therefore, "Ānāpānasati samādhi can be correctly called: 'Noble dwelling,' 'Brahmā dwelling,' 'Tathāgata dwelling.'

- Note: Brahma and Tathāgata can be (and have been) used for an Arahant and a Buddha, even though that is not standard usage. Brahma here does not mean one in a Brahma realm.
- That is the end of the Icchānañgala Sutta (SN 54.11).

10. If the Buddha (or an Arahant) has already discarded the opposites of the Noble Path Factors, why do they need to engage in Anapanasati?

- Because that provides relief to the mind.
- Even Arahants have "agitation of the mind" (NOT defilements) due to kamma vipaka. They also have bodily dukkha/sukha vedana due to kamma vipaka as everyone else.
- Several suttas state that contemplation of Tilakkhana is advised for all, including Arahants. See "WebLink: suttacentral: 16 results for ditthadhammasukhavihārāya."

## Kañkheyya Sutta Is Similar to Icchānañgala Sutta

11. "WebLink: suttacentral: Kañkhevva Sutta (SN 54.12)" is similar. The use of the term "sekho vihāro" there indicates the abiding of a trainee bhikkhu (sekha) engaging in Ānāpānasati in the beginning verse of that sutta.
"Ekaṃ samayam āyasmā lomasakambhiyo sakkesu viharati kapilavatthusmiṃ nigrodhārāme. Atha kho mahānāmo sakko yenāyasmā lomasakaṃbhiyo tenupasañkami; upasañkamitvā āyasmantam lomasakaṃbhiyam abhivādetvā ekamantaṃ nisīdi. Ekamantạ̣ nisinno kho mahānāmo sakko àyasmantaṃ lomasakaṃbhiyam etadavoca: "so eva nu kho, bhante, sekho vihāro so tathāgata vihāro, udāhu aññova sekho vihāro añño tathāgatavihāro "ti?"

Translated: "At one time, Venerable Lomasavangisa was staying in the land of the Sakyans, near Kapilavatthu in the Banyan Tree Monastery. Then Mahānāma the Sakyan went up to Venerable Lomasavangisa, bowed, sat down to one side, and said to him, "Bhante, is the meditation/abiding of a trainee (sekho vihāro) just the same as the meditation/abiding of an Arahant (tathāgata vihāro)? Or is the meditation/abiding of a trainee different from the meditation/abiding of an Arahant?"
12. "Na kho, āvuso mahānāma, sveva sekho vihāro, so tathāgatavihāro. Añño kho, āvuso mahānāma, sekho vihāro, añ̃no tathāgatavihāro. Ye te, āvuso mahānāma, bhikkhū sekhā appattamānasā anuttaraṃ yogakkhemaṃ patthayamānā viharanti, te pañca n̄̄varaṇe pahāya viharanti. Katame pañca? Kāmacchandanīvaraṇam pahāya viharanti, byāpādan̄̄varaṇaṃ ... pe ... thinamiddhanīvaraṇam ... uddhaccakukkuccan̄̄varaṇaṃ ... vicikicchānīvaraṇaṃ pahāya viharanti.

Yepi te, $\bar{a} v u s o ~ m a h a ̄ n a ̄ m a, ~ b h i k k h \bar{u} ~ s e k h a ̄ ~ a p p a t t a m a ̄ n a s a ̄ ~ a n u t t a r a m ~ y o g a k k h e m a m ~ p a t t h a y a m a ̄ n a ̄ ~$ viharanti, te ime pañca nīvaraṇe pahāya viharanti."

Translated: "Mahānāma, the meditation of a trainee and an Arahant are not the same; they are different. Those bhikkhūs who are trainees haven't attained Nibbāna; they strive to attain Nibbāna. They meditate, seeking to give up the five hindrances. What five? Kāmacchanda, byāpāda, thinamiddha, uddhaccakukkucca, vicikicchā."

- Another point is that sekha vihāra does not mean a meditation session. Instead, that is how a trainee bhikkhu LIVES.

## Cultivation of Ānāpānasati Fulfills Satipaṭthāna, Satta Bojjhañga

13. The rest of the suttas in that series, "WebLink: suttacentral: Pathamaānanda Sutta (SN 54.13)" through "WebLink: suttacentral: Āsavakkhava Sutta (SN 54.20)," describe how the cultivation of $\bar{A} n a ̄ p a ̄ n a s a t i$ will lead to the fulfillment of all requirements to get to Nibbāna or Arahanthood. More evidence is discussed in the post "Is Ānāpānasati Breath Meditation?"

- It is incredible to see those who have (mechanically) translated all those suttas did not realize the obvious statements in the suttas. Please read the English translations in the above links. But it is not just this translator. All English translators have translated without grasping the meanings. Were they not paying attention?
- All of them insist that A$n a \overline{p a ̄ n a s a t i ~ m e a n s ~ " b r e a t h ~ m e d i t a t i o n . " ~ A m a z i n g!~}$
- That is why I call this series "Elephants in the Room." It is like: a giant elephant is in a room, and someone is saying, "What elephant? No. There is no elephant here"! They can pretend to ignore the elephant until getting crushed by elephant. Such is the blinding nature of miccha ditṭhi.

### 6.1.3.4 Mahārāhulovāda Sutta and Ānāpānasati

October 28, 2022
Mahārāhulovāda Sutta provides Buddha's instructions to Ven. Rāhula for setting the background before starting the practice of $\bar{A} n \bar{a} p \bar{a} n a s a t i$ and his instructions on $\bar{A} n \bar{a} p \bar{a} n a s a t i$. It also explains the correct kasiña mediation.

## Buddha advises Ven Rāhula to Contemplate Any Rūpa Cannot be "Mine"

1. I will translate selected chronological verses from the "WebLink: suttacentral: Mahārāhulovāda Sutta (MN 62)." I will provide the meaning of verses and not word-by-word translations. If you read it carefully, you can grasp the more profound and actual meaning of Ānāpānasati.
"yaim kiñci, rāhula, rūpaím-atīt̄nāgatapaccuppannaiं ajjhattaì vā bahiddhā va olārikaím vā
 nesohamasmi, na meso attā'ti evametain yathābhūtamं sammappaññāya datthabban"ti."

- Translation: "Rāhula, any rūpa whatsoever - past, future, or present; internal or external; obvious or subtle; inferior or superior; far or near - any rūpa's fundamental nature (yathābhūta) needs to be seen with wisdom in this way: 'This is not mine, I am not this, this is not me (my essence)."

## Then Ven. Rāhula asked: "Rūpameva nu kho, bhagavā, rūpameva nu kho, sugatā"ti?"

- Translation: "Only contemplate on rūpa, Blessed One?"

The Buddha replied: "Rūpampi, rāhula, vedanāpi, rāhula, sañn̄āpi, rāhula, sañkhārāpi, rāhula, viññānampi, rāhulā"ti."

- Translation: "Rāhula, rūpa, and also vedanā, saññā, saǹkhārā, and viññāña."
- As we know, any sentient being can be described in terms of the five aggregates. First, one must understand that no "soul-like" permanent entity exists in any of those five. The Buddha was setting up the background for Ven. Rāhula to cultivate $\bar{A} n \bar{p} p a \overline{n a s a t i}$ by getting rid of sakkāya diṭthi.

## Advice of Ven. Sāriputta

2. Later in the day, Ven. Rāhula was meditating on the true nature (yathābhūta) of the five aggregates; Venerable Sāriputta approached and advised as follows: "ānāpānassatim, rāhula, bhāvanaì bhāvehi. Ānāpānassati, rāhula, bhāvanā bhāvitā bahulīkatā mahapphalā hoti mahānisamisa"ti."

Translation: "Rāhula, practice ānāpānassati. Rāhula, when ānāpānassati is practiced and cultivated, it will bring enormous benefits."

- Then in the evening, Ven. Rāhula approached the Blessed One, paid respects to him, and asked, "Bhante, how should I practice ānāpānasati that is of great benefit?"
- The Buddha first advised how to set up the background to cultivate annāpānasati. That is related to his instructions earlier in the day in \#1 above. Both are about getting rid of sakkāya dittthi.

## Buddha's Description of $\bar{A} n \bar{a} p \bar{a} n a s a t i$ - The Basis

3. I will skip the Pāli verses starting at the 8.1 mark: "WebLink: suttacentral: Mahārāhulovāda Sutta (MN 62)" and also only provide the essence of those verses to keep the post to a reasonable length. The following is Buddha's advice to Ven. Rāhula for first setting up the background to practice ānāpānassati.

- "Rāhula, think about the "hard components" that make up your physical body - hair, nails, teeth, skin, muscle, etc. - Rāhula, those are made of the earth element (pathavī dhātu).' It is the same earth element in your body as in any other external object. One should think about pathavī dhātu as follows: 'This is not mine, I am not this, this is not me (my essence).' When one has accurately seen that with wisdom, one becomes disenchanted with the earth element (and the body), and the mind becomes dispassionate towards the earth element (and the body).
- "Rāhula, there are "liquid components" that make up your physical body - such as bile, phlegm, pus, blood, sweat, etc. - are made of āpo dhātu. Whether āpo dhātu is internal or external, it is the same $\bar{a} p o d h \bar{a} t u$. It should be correctly seen with wisdom in this way: 'This is not mine, I am not this, this is not me (my essence).' When one has accurately seen that with wisdom, one becomes disenchanted with the $\bar{a} p o$ dhātu (and the body), and the mind becomes dispassionate towards $\bar{a} p o$ $d h \bar{a} t u$ (and the body).
- "Rāhula, what is the "heat element" (tejo dhātu)? It may be internal or external. Rāhula, the internal 'heat element" is that which keeps your body warm, that which leads to aging of the body, that which heats you when feverish, that which properly digests food and drink - Whether tejo dhātu is internal or external, it is the same tejo dhātu. One should think about tejo dhātu as follows: 'This is not mine, I am not this, this is not me (my essence).' When one has accurately seen that with wisdom, one becomes disenchanted with tejo dhātu (and the body), and the mind becomes dispassionate towards tejo dhātu (and the body).
- "Rāhula, what is the "air element" (vāyo dhātu)? Like the others, it may be internal or external. What is internal vāyo dhātu? Whatever internal personal component is experienced as air - such as upward air and downward air (through the body), the air in the abdomen, air moving along the limbs, inhalation, exhalation, etc. - Rāhula, this is internal vāyo dhātu. Whether vāyo dhātu is internal or external, it is the same vāyo dhātu. One should think about vāyo dhātu as follows: 'This is not mine, I am not this, this is not me (my essence).' When one has accurately seen that with wisdom, one becomes disenchanted with vāyo dhātu (and the body), and the mind becomes dispassionate towards vāyo $d h \bar{a} t u$ (and the body).
- "Rāhula, what is $\bar{a} k \bar{a} s a ~ d h a \bar{a} t u$ (space element)? It can be internal or external. What is the internal $\bar{a} k \bar{a} s a$ $d h \bar{a} t u$ ? There is space within your body - such as the ear cavity, the nose-cavity, the mouth, the gullet, the stomach, the rectum, or any other internal personal component that is experienced as space or spacious - this is internal $\bar{a} k \bar{a} s a d h \bar{a} t u$. Whether $\bar{a} k \bar{a} s a ~ d h \bar{a} t u$ is internal or external, it is the same $\bar{a} k \bar{a} s a$ dhātu. One should think about $\bar{a} k \bar{a} s a$ dhātu as follows: 'This is not mine, I am not this, this is not me (my essence).' When one has accurately seen that with wisdom, one becomes disenchanted with $\bar{a} k \bar{a} s a d h \bar{a} t u$ (and the body), and the mind becomes dispassionate towards $\bar{a} k \bar{a} s a d h a \bar{a} u$ (and the body).

4. The point is that our physical body is made of the same "basic elements" as any other person, tree, or stone. In the terminology of modern science, everything in this world is made of the same set of atoms and shares the same space.

- The only thing we don't share with anything else in the world is the (temporary) manomaya kāya (gandhabba.) Even then, the suddhäṭhaka are the same. The uniqueness is in the kammic energy that sustains the hadaya vatthu and the pasāda rūpa.
- That manomaya kāya arises with kammic energy that WE create in OUR javana citta! Of course, any manomaya kāya has a finite lifetime. When it dies (loses its embedded kammic energy), our minds grasp one of many seeds for another manomaya kāya.
- That process will stop ONLY WHEN a mind loses its tendency (anusaya/āsavalgati) to be attached to things in this world!
- That happens only when one understands that no "soul/atman" moves from life to life. That we, ourselves, create root causes and conditions via Akusala-mūla Paṭicca Samuppāda.

## Buddha's Prerequisites for $\bar{A} \boldsymbol{n} \bar{a} p \bar{a} n a s a t i$

5. What we discussed above has critical implications for the next steps that the Buddha recommended to Ven. Rāhula. There are two steps for cleansing a mind before start cultivating ānāpānasati.

- Follow a set of precepts (like the five or eight precepts), avoid immoral deeds and engage in moral deeds. People try to live with such "moral codes" because they want to avoid bad outcomes, such as "bad rebirths," and have good outcomes, such as "good rebirths."
- The second step is understanding why precepts are for one's benefit but are NOT ENOUGH to avoid future suffering. That means understanding that "working on getting good rebirths" WILL NOT stop future suffering. One must comprehend the Four Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa and realize that the only way to eliminate future suffering is to stop the rebirth process altogether.
- But that is a scary proposition for those who have not comprehended the Noble Truths about suffering. That is why the Buddha emphasized Ven. Rāhula that there is no "soul/ätman" like entity that can be designed as "me." However, that DOES NOT mean that we don't exist. We do exist, but no permanent entity goes from life to life. We suffer mightily in the rebirth process (especially when born in the apāyās) because of that ignorance about the fundamental nature of this world.
- That is why getting rid of sakkāya ditṭhi (the wrong view about a permanent "soul type" entity) MUST BE eliminated BEFORE PRACTICING ānāpānassati. Future lives (jāti) arise due to acting with avijjä, i.e., via the Paṭicca Samuppāda process starting with "avijjā paccayā sañkhāra."

## Buddha's Description of Ānāpānasati - Way to Cleanse the Mind

6. After explaining that all our desires and false expectations arise from the wrong view of an "everlasting soul-like entity," the Buddha explained several procedures for cleansing the mind of accumulated defilements and not accumulating more. That starts at the $\mathbf{1 3 . 1}$ mark.

- First, the Buddha described the correct version of "kasiña meditation." The version in Visuddhimagga using clay balls, water bowls, fires, etc. - is not in the Tipitaka. Here the point is that the "four great elements" (pathavi, āpo, tejo, vāyo) are inert and are not "bothered" by external influences. The mind starts generating defilements when attached to sensory inputs from worldly things made of those inert things.
"Rāhula, live as the earth does. When people put clean things or unclean things like excrement, urine, saliva, pus, or blood on the earth, the earth is not bothered, humiliated, or disgusted. Then sensations that arise whether pleasing or displeasing - will not dominate your mind."
"Rāhula, live as the water does. When people dispense clean things or unclean things like excrement, urine, saliva, pus, or blood in the water, the water is not bothered, humiliated, or disgusted. In the same way, Rāhula, when you are not bothered by praises or insults that others throw at you, your mind will not be perturbed."
'Rāhula, live like a fire. Rāhula, people throw clean and unclean things, like feces, urine, and spit, into fires.
But the fire is not bothered, humiliated, or disgusted. It burns them all. In the same way, Rāhula, when you learn to live with equanimity, pleasant and unpleasant contacts will not occupy your mind."
"Rāhula, learn to live like the wind. If the wind were to blow on clean things or unclean things like feces, urine, spit, etc., the wind would not be excited, horrified, repelled, and disgusted. It will get rid of all those in due time. In the same way, Rāhula, don't let external sensory contacts perturb the mind."
"Rāhula, learn to live like space ( $\bar{a} k \bar{a} s a ~ d h a \bar{a} u$ ). Just as space is not established anywhere, don't let sensory contacts take root in your mind."

7. Of course, those steps can be followed correctly only after comprehending the unfruitfui/dangerous nature of ALL realms in this world, not only the apāy $\bar{a} s$. This is why the Buddha said (in the "WebLink: suttacentral: Ānāpānassati Sutta (MN 118)') that he recommends ānāpānasati to only those with lokuttara Sammā Sati.
"Nāhaì, bhikkhave, muṭ! hassatissa asampajānassa ānāpānassatim vadāmi."

- Translation: "I do not teach this $\bar{A} n a \bar{p} \bar{n} a s a t i(B h \bar{a} v a n \bar{a})$ to those who do not have (sammā) sati."
- The meaning of "mutṭha" is quite evident in verse " Rūpaí disvā sati mutṭhä" or "When you see a sight (and attaches to it), mindfulness is lost" in "WebLink: suttacentral: Mālukyaputta Sutta (SN 35.95)".
- Anyone who has not understood the Four Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa would not have Sammā Sati.
- See "Ānāpānasati- Overview."

## Rest of the Background Required for $\bar{A} n \bar{a} p \bar{a} n a s a t i$

8. I have now discussed the above critical points up to marker 18.1: "WebLink: suttacentral: Mahārāhulovāda Sutta (MN 62)."

- The Buddha then advised Venerable Rāhula to contemplate that all sentient beings are trapped in this suffering-filled world. That would help cultivate mett $\bar{a}$, karuṇa, mudit $\bar{a}$, and $u p e k k h \bar{a}$.
- Then he again emphasized the need to contemplate the asubha and anicca nature of "this world" of 31 realms" (at marker 22.1.)
- Thus, up to marker 24.1, the Buddha described the background mindset required for cultivating $\bar{a} n \bar{p} p a ̄ n a s a t i$.
- In the remaining part of the Mahārāhulovāda Sutta, the Buddha repeated the critical steps in $\bar{a} \boldsymbol{n} \bar{a} p \bar{a} n a s a t i$. That is the last step in a three-step process to Arahanthood, as summarized next.

## Rest of the Mahārāhulovāda Sutta Repeats Key Steps in $\bar{A} n \bar{a} p \bar{a} n a s a t i$

9. As we have discussed repeatedly on this website, the way to Nibbāna has three critical steps.

- Cultivate the mundane path and remove the ten types of micchā ditthi. It would be impossible to cleanse a mind without getting rid of the first layer of wrong views.
- The second layer of wrong views is the mindset that future suffering can be eliminated by seeking births in Deva or Brahma realms. The uniqueness of Buddha's teachings is the following. Suffering is present at various levels in all the realms of this world, and until escaping (or transcending) this world, it will not be possible to stop the worst suffering in the apāyās in the future. Those wrong views (mainly sakk $\bar{a} y a$ dittthi) are removed at the Sotāpanna stage with lokuttara Sammā ditṭhi (comprehension of Four Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa. This is only a change of mindset, but it requires a dedicated effort.
- The third layer is to follow the vision (Noble Path) gained by cultivating the correct versions of Ānāpānasati (same as Satipatṭhāna.) That leads to Arahathood. But these days, people start with $\bar{A} n \bar{a} p \bar{q} n a s a t i$, incorrectly assuming that it is "breath mediation." One MUST attain the Sotāpanna stage BEFORE starting on the correct Ānāpānasati.

10. Up to marker 24.1, the "WebLink: suttacentral: Mahārāhulovāda Sutta (MN 62)." discussed completing the first two steps of $\# 9$ above. In the rest of the sutta, the Buddha outlined the critical steps in ānāpānasati, the same as in "WebLink: suttacentral: Ānāpānassati Sutta (MN 118)" and "WebLink: suttacentral: Satipatthāna Sutta (MN 10)."

- At marker 24.1, the description of ānāpānasati starts with the verse: "Ānāpānassatim, rāhula, bhāvanawin bhāvehi" meaning "Rāhula, cultivate ānāpānasati."
- That is followed by the standard verses in $\bar{A} n \bar{a} p \bar{a} n a s a t i / S a t i p a t ̣ t h a ̄ n a, ~ s t a r t i n g ~ w i t h ~ t h e ~ v e r s e, ~$ "Ānāpānassati hi te, rāhula, bhāvitā bahulīkatā mahapphalā hoti mahānisamisā" or "When $\bar{a} n \bar{a} p a \overline{n a s a t i} i$ is developed and cultivated, it will be of great benefit" followed by "Idha, rāhula, bhikkhu araññagato vā rukkhamūlagato vā suññāgāragato vā nisīdati pallañkaì ābhujitvā ujumi kāyaì panidhāya parimukhaim satim upatṭhapetvā."
- Now you should realize that the next verse, "So satova assasati satova passasati," is NOT about breathing in and out. For details, see "Elephant in the Room 3 - Ānāpānasati."
- There "assasati" is "assa sati" and "passasati" is "passa sati" It is true that "assāsa" and "passāsa" can mean "in breath" and "out breath." But here, the keyword "sati" means Sammā Sati on the Noble Path attained at the Sotäpanna stage.

## VII Three Levels of Practice

It is a good idea for anybody to read the first section, because the basic ideas and fundamentals are described in that section.
$\circ$ First Section: Moral Living and Fundamentals

- Subsection: The Basics
- "The Pale Blue Dot........"
- "The Law of Attraction, Habits (Gati), and Cravings (Āsavas)"
- "Habits, Goals, and Character (Gati)"
- "Wrong Views (Micchā Ditthi) - A Simpler Analysis"
- "First Noble Truth - A Simple Explanation of One Aspect"
- Subsection: Calming the Mind
- "Key to Calming the Mind - The Five Hindrances"
- "Solution to a Wandering Mind - Abandon Everything?"
- "Right Speech - How to avoid Accumulating Bad Kamma"
- "Three Kinds of Happiness - What is Nirāmisa Sukha?"
- "Need to Experience Suffering in Order to Understand It?"
- "Does Impermanence Lead to Suffering?"
- Subsection: Buddha Dhamma and Buddhism
- "A Buddhist or a Bhouddhaya?"
- "Where to Start on the Path?"
- "What Reincarnates? - Concept of a Lifestream"
- "Recent Evidence for Unbroken Memory Records (HSAM)"
- "Buddhism without Rebirth and Nibbāna?"
- Subsection: Dhamma Concepts
- "Kilesa - Relationship To Akusala, Kusala, And Puñña Kamma"

### 7.1.1 The Basics

"The Pale Blue Dot........."
"The Law of Attraction, Habits (Gati), and Cravings (Āsavas)"
"Habits, Goals, and Character (Gati)"
"Wrong Views (Micchā Ditthi) - A Simpler Analysis"
"Four Noble Truths: Recipe for Problem Solving"
"First Noble Truth - A Simple Explanation of One Aspect"
"Difference between a Wish and a Determination (Paramita)"

### 7.1.1.1 The Pale Blue Dot........

Revised March 2, 2020; August 28, 2022

1. Even if some of us are not thinking about a "wider world view" or "what happens after death," we all want a better world.

I thought of sharing this marvelous video from the late Dr. Carl Sagan:

## WebLink: YOUTUBE: Carl Sagan - Pale Blue Dot

2. When I read the writings of all those past scientists like Sagan, Feynman, Einstein, Bohm, Heisenberg, etc., I wonder how much more they could have accomplished spiritually if they had been exposed to pure Buddha Dhamma.

- Yet, I am still impressed by their pure reasoning and compassion for humanity; they were not just scientists with a narrow focus. They thought deeply about the "purpose of existence."

3. Even though science has revealed the unimaginable vastness of space, scientists think our universe is only 15 billion years old. However, each of us has an uncountable number of lives in the past. See "Origin of Life - There is No Traceable Origin." Not only is our place in the vast cosmos insignificantly small, but our existence of about 100 years (in this life) is also insignificantly small.

- Yet, out of countless beings that live on this Earth, we are the only species capable of forging our destiny.
- We must be mindful not only of the welfare of family and friends but of all other people and beings (seen and unseen).

4. Do you know why some actions are good and others bad? We may quote some ethical maxims or juggle with philosophical abstractions, but there is a simple explanation called nature. "Good is good because it leads to happiness and freedom of the heart. Bad is bad because it leads to suffering, and it feels bad."

- The Buddha said a moral deed (puñña kamma) is one that makes one's heart "pulsating with joy"; an immoral deed leads to a burdened heart.

5. Nature encourages morality and punishes immorality via its built-in reward-punishment system, which is none other than the laws of kamma. But the punishment is not immediate, so it is hard for people to make the connection.

- Even if the punishment in question comes a few lives later, this "time lag" is not that long since samisāra is "beginning-less" and "endless."

6. Humans innately know what is right and what is wrong. Most bad actions are committed with a mind that is not calm but is agitated. Therefore, we need to learn how to calm our minds: "Key to Calming the Mind The Five Hindrances."

- By the way, Dr. Sagan's books like "Pale Blue Dot: A Vision of the Human Future in Space," "The Varieties of Scientific Experience," and "Billions \& Billions: Thoughts on Life and Death at the Brink of the Millennium" are very informative. These are likely to be available in local public libraries.

Next, "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsava)",

### 7.1.1.2 The Law of Attraction, Habits, Character (Gati), and Cravings (Āsava)

Revised October 24, 2018; March 2, 2020; November 1, 2020; August 11, 2022

## The Law of Attraction

1. The saying, "Birds of a feather flock together," is true, and we can see that all around us.

- We can put people into various categories: sportsmen/sportswomen, thieves, politicians, murderers, churchgoers, environmentalists, liberals, conservatives, etc.
- In school, kids tend to get into different groups: those who play sports, like partying, nerds, geeks, etc.
- Of course, there may be some overlaps, but we can clearly see people tend to socialize with those with common interests, likings, etc.

## Those With Similar Character/Habits (Gati) Tend To Stay Together

2. This is a universal principle. A basic rule in chemistry is that "like molecules" stay together.

- We all know that oil and water do not mix. Those two molecules have very different properties (analogous to gati in people.) On the other hand, water molecules stay together happily since they all have the same properties. Same with oil.
- In people, there are "good gati" as well as "bad gati."
- Like water and oil, those with similar gati tend to "stick together." This is why it is essential to stay away from those with "bad gati" and to try to associate with those with "good gati."

3. Buddha Dhamma describes the laws of nature. So it is not surprising that Buddha Dhamma's law of attraction comes naturally. There are three keywords in Dhamma that are relevant. (1) Habits/character (gati with the " $t$ " pronounced "th," like in "three" or in Thailand), (2) cravings ( $\bar{a} s a v \bar{a}$,) and (3) Hidden cravings (anusaya.) See "Habits and Goals, and Character (Gati)."

- One's gati are closely related to one's hidden cravings (anusaya.) Such gati or anusaya "come to the surface" as cravings (āsava) when triggered by sensory input (ārammana.) For example,
an alcoholic does not crave drinking all the time. That "drunkard gati" remains hidden as anusaya until he sees an alcohol bottle or is invited to a drink by a friend.
- Some of these habits we take from life to life, see "Samsāric Habits, Character (Gati) and Cravings (Āsava)."
- However, it is possible to change even those deeply-ingrained bad gati. The key is to realize the bad consequences of "bad gati" and cultivate "good gati."

## Paṭicca Samuppāda Explains the Law of Attraction

4. The law of attraction can be explained with Patticca Samuppāda, the principle of cause and effect in Dhamma; see "Paticca Samuppāda - Introduction."

- "Pati + iccha" means associate or bind with something one likes. "sama + uppāda" means what results (uppāda) from that is something similar (sama) in kind. That association leads to an outcome of the same kind.
- If a child hangs out willingly and enthusiastically with others who like to work hard and enjoy getting good grades, they will continue on that path to success. The more a child willingly hangs out with a criminal gang, his mind becomes more attuned to criminal behavior and becomes a criminal capable of doing atrocious crimes.
- Thus, Buddha Dhamma says, "gati (character) attracts a similar gati." We will see this develop into profound meaning.

## Environment Plays a Key Role in Changing Gati

5. However, Dhamma says this law of attraction does not need to be fatalistic, i.e., one with bad habits/cravings does not have to go down a slippery slope. One CAN change those habits/cravings GRADUALLY and thus change one's character (gati).

However, a child is not capable of doing this on his/her own. That is why it is the parents' responsibility to direct the child:

- Parents can make a HUGE contribution in setting up good habits/cravings in a child starting from conception. The fetus felts the love and cares the parent feel towards each other. That is as important, perhaps more important than the food consumed by the mother. A child born into an environment of abuse or violence may develop life-long problems.
- As the child grows, the child's behavior and habits are influenced HUGELY by the parents, friends, and the school environment. It is the responsibility of the parents and teachers to guide the child.

6. When one becomes an adult, one has full control of one's life (in a mundane sense). Even if childhood was not good, and even if one has acquired a set of bad habits (or even samisäric habits that have molded one's character in fundamental ways), it is POSSIBLE to change them.

- One can use the same Pațicca Samuppāda principle to change direction.
- All one needs to do is change the "pati+ichcha" part, i.e., change one's likings or habits. Then "sama+uppāda" will happen automatically. That is nature's law. See, "Paticca Samuppāda."

## One Needs to See the Consequences of Bad Gati

7. First, one needs to convince one's mind that the current path will lead to a bad destiny. That is getting rid of avijjā in the "avijjā paccayā sañkhāra" step in Pațicca Samuppāda. One must contemplate the bad consequences of staying on the same wrong path. And one also needs to contemplate the benefits of cultivating good habits.

- For example, a smoker cannot just make a New Year resolution and stop smoking (a few can, but most cannot). Instead, it is better first to look at all the medical evidence.
- There is strong evidence that one could die early and may be burdened in old age with lung problems if one continues smoking. One could talk to someone who has given up smoking and listen to that person's "success story" or think about not seeing the annoyance of those around when one lights a cigarette, etc.

## Cultivating Good Gati

8. When one acquires "good habits" (initially slowly and with effort), one is attracted to people, settings, workplaces, and environments that further nurture and grow those habits, changing one's character. Thus, the process becomes self-feeding once started.

- The law of attraction is embedded in Pațicca Samuppāda: "pati+ichcha," leading to "sama+uppāda." Thus it is critical to develop a liking (chanda) and desire (citta) for what one wants to accomplish, to critically analyze the situation (vīmaimsā), and make an effort (viriya); see "The Four Bases of Mental Power (Cattāro Iddhipāda)." [vīmaimsā : 'investigation, inquiry, pondering', is one of the 4 roads to power (iddhi-pāda)]
- When one repeatedly engages in certain lifestyles and activities (good or bad), those become habits. In
 repeatedly and possibly over numerous rebirths, they get deeply embedded as deep-seated cravings (āsavā). Those gati (characters) also become "bhava" as well. Whatever that is liked becomes one's existence (bhava) or reality (in Sinhala, "ชอఎ๐Ъ ออ (thibena bhava)").
- When one has a certain character (gati), it becomes easy to get into the corresponding "state" or existence; this is one meaning of bhava. For example, one with a "drinking habit" is easy to be "born" in that state, i.e., just the sight of a bar may cause that person to get drunk. This is the concept extended in Buddha Dhamma. It is easy to be "born" with those characteristics in the new birth (uppatti bhava) or even in the present life (pavutti bhava). This is a bit deeper concept discussed in the Paticca Samuppāda section. See, for example, "Akusala-Mūla Paticca Samuppāda."

## Need to Have Patience

9. The problem many people run into is that they would like to change quickly, which does not normally happen. Initial progress could be slow. However, when one gets traction, the process speeds up. It is like trying to reverse the direction of a moving car. One needs to stop going in the wrong direction first. Even when one starts the car facing the right direction, it takes a little while to accelerate and ramp up the speed. See "Habits, Goals, and Character (Gati)" and the links there. Let us consider two examples:

- Suppose one wants to be a successful businessman. In that case, one should try to "build up" business people's habits: knowledge of the particular business, learning relevant skills, hard work, etc. THEN the law of attraction starts working and will automatically pull one to others with similar interests and environments or conditions.
- If a high-school kid wants to go to college, he/she should try to get into that mindset. Spending more time deciding what kinds of subjects to study and then getting "immersed" in them. The parent and teachers can make a big difference by encouraging and guiding on the correct path.
- If someone wants to attain "nirāmisa sukha" (see "Three Kinds of Happiness - What is Nirāmisa Sukha?'), one needs to spend some time and first learn the true Dhamma. As one learns, one gets motivated to learn more because one will start feeling the character's change (gati).

## Managing Gati is the First Step to Nibbāna

10. Finally, the law of attraction also works in the samisāric rebirth process.

- Many are reborn to the same families, same geographic locations, etc. (within the same "bhava.") See, "Bhava and Jãti - States of Existence and Births Therein."
- At the moment of death, one's mind automatically grasps a "matching birth" according to a specific kamma vipāka; however, habits and tendencies come into play too. One who has lived an immoral life is likely to get a similar outcome in the next life. Someone who "lives like an animal" is likely to be born an animal. One who lives like a "Deva" (a being devoid of hate) or a "Brahma" (a being devoid of greed and hate) is likely to reborn a Deva, Brahma.
- Thus by cultivating good habits and getting rid of bad habits, one CAN change the direction of one's current life (character) AND future lives too.
- The best way to do this is to be mindful all the time. See the bad consequences of bad actions and bad habits, avoid them; see the good consequences of good actions and good habits, and embrace them. At the fundamental level, this is the basis of $\bar{A} n \bar{a} p \bar{a} n a s a t i ~ a n d ~ S a t i p a t ̣ t h a ̄ n a ~ B h a ̄ v a n a ̄ ~(t a k i n g ~ i n ~ w h a t ~ i s ~$ good and getting rid of what is bad.) See " 9 . Key to Ānāpānasati - How to Change Habits and Character (Gati)."

11. Several books are available on the law of attraction and how one can use certain procedures to attain goals, build relationships, etc. The Buddha described those and more 2500 years ago.

## Next, "Habits, Goals, and Character (Gati),"...

### 7.1.1.3 Habits, Goals, and Character (Gati or Gathi)

## Revised November 26, 2018; revised June 6, 2020

1. As I mentioned before, Buddha Dhamma can be interpreted at three levels; see, "Foundation of Dhamma." But the key to making progress at ANY LEVEL is to get rid of bad habits and instill good habits because they mold one's character (gati) even though the rebirth process.

- The Pāli (and Sinhala) word for "character" is "gati" ( (๘ฬฺ).) One's character can be changed (for good or bad) via changing one's habits. These habits take deep roots when practiced over many lives, and become deep-seated cravings ("āsavas") that form one's character.
- Some habits are harmless. For example, some people have the habit of shaking their legs while sitting. It could be annoying to some, but it is not "morally wrong", i.e., it is not one of the ten defilements; see, "Ten Immoral Actions (Dasa Akusala)."
- But there are other habits, such as drinking, stealing, sexual misconduct, etc that are morally wrong. They belong to the ten defilements of dasa akusala. Generating greedy or hateful thoughts can be a bad habit too. Some have a tendency to easily "flare-up."
- Then there could some, like gambling, that could lead to immoral actions.
- There are good habits too. Giving, helping others, teaching, and being compassionate in general.

2. For someone at the highest level, the Sabbāsava Sutta explains how one can work towards Nibbāna in a systematic way by developing good habits ("gati") and removing āsavas; see "Key Points from the Sabbāsava Sutta" under "The Sotāpanna Stage."
3. Here we are going to look at it to see how those recommended steps can be used in the day-to-day life, i.e., to live a moral life. Those steps can be used to remove any bad habits. Some example are alcohol or drug use, smoking, and eating too much.

- They can also be used in achieving goals, say lose weight, getting rid of depression, or starting a new business. Achieving goals require building good habits.

4. A habit is something one gets used to by repeating it over and over. Good habits make a life easier to live with, and bad habits lead to bad results. Scientific studies have confirmed that our brains "can rewire its
connections" (plasticity of the brain), thus getting rid of bad habits and instilling good ones. The trick is to "stick to a set procedure." Many people give up before giving their brains enough time to "rewire"; this is why many "New Year resolutions" go unfulfilled.

- One way to remove bad habits is to look at the bad consequences of such habits; see, "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsavas)."
- In-depth analysis at, "How Habits are Formed and Broken - A Scientific View."

5. The seven steps in the Sabbāsava Sutta can be helpful for developing good habits for a moral life. These steps basically convince the mind of the benefits of good habits/downside of bad habits and set up a conducive environment.

The 7 steps in the Sabbāsava Sutta (interpreted conventionally or mundane or "padaparama" interpretation):

1. Cultivate an understanding. Learn all about the direct and indirect benefits, what is involved, the best way to go about achieving the goal, etc.
2. Be discipline. Avoid getting distracted by things that provide "temporary pleasures", like a drug addict thinking it is OK to "take a small puff" while working to be free of drugs.
3. Association are important. Associate with knowledgeable people who can help and get to know other helpful resources.
4. Patience and tolerance. (Maintain focus and not get "shaken off" by small inconveniences. Perseverance is critical.
5. Avoidance are important as associations. Dissociating with people who have negative attitudes and avoiding unsafe places, practices, etc.
6. Removal of hindrances. Suppress discouraging thoughts by contemplating on the long-term benefits of the project.
7. Bhāvanā or "immersing in the project." That means constantly thinking about the main objective and the ways to get there.
8. A good idea of the goal is needed first. One should not undertake a journey without learning about the destination and how to get there. It is a good idea to explore how it can be beneficial to oneself and others (family, friends, and even to society) too.

- Once the overview is done and the decision to undertake the project is made, all steps should be used as appropriate. For example, the first and last items on the above list (understanding and meditating) go hand-in-hand.

7. Those steps can be used by anyone to enhance the quality of life in general, a moral life with a "peace-ofmind." They are the sensible things to do.

- For example, an important decision for anyone should be to live in a good area not prone to crime, floods, etc.
- Going out at inappropriate times, in inappropriate places, is just 'asking for trouble."
- It is critical to avoid associating with immoral and also those with negative attitudes.
- If one carefully goes through the list, it will be clear why all those steps make common sense.

If you would like to read about how these habits develop into deep-seated sansāric habits or $\bar{a}$ savas, see, "Sansāric Habits, Character (Gati) and Cravings (Āsava)." Also, "The Four Bases of Mental Power (Cattāro Iddhipāda)," can be helpful in achieving goals.

Next, "Wrong Views (Micchā Ditthi) - A Simpler Analysis",

### 7.11.4 Wrong Views (Micchā Ditṭhi) - A Simpler Analysis

## Revised November 27, 2017; revised May 12, 2020 (\#6)

Micchā means wrong or incorrect and ditthi means views. Pronunciation:

## WebLink: Listen to the pronunciation of ditthi

Here it is about the wrong views about our world or our existence. It is the most basic reason why people cannot grasp the message of the Buddha, and that is unfortunate. We all are looking at the world through "colored glasses"; each one has his/her own set of beliefs or "dittthis," so we cannot see the real nature.

- Some facts about nature are hard to believe, and it took the efforts of many scientists to change two common wrong views (ditṭhis) that had been with the humans up to recently: that the Earth is flat and it is at the center of the universe.

1. These days, most of us believe that the Earth moves around the Sun. But it is quite clear that it goes against our experience, and the accepted views were the opposites even a few hundred years ago. We do not have any direct experience of the motion of the Earth, either its rotation around its own axis or in its orbit around the Sun. And we see ample evidence to the contrary, i.e., for the Sun rotating around the Earth, because we experience a sunrise and a sunset everyday!

- If one looks at the speeds involved it becomes even more harder to believe that the Earth is moving: The Earth moves around its axis at a speed of about $1,040.4$ miles/hour ( $1,674.4$ kilometer/hour or 465.1 meter/second) at the equator (and zero at the North and South Poles) and it moves along its orbit around the Sun at an average speed of about 67,062 miles/hour ( 107,300 kilometer/hour). Thus it is surprising that we have no direct perception of such movements.
- Of course, we do not feel it because everything around us is also doing exactly the same thing. When we travel in a car, we "feel the ride" because we can see the scenery passing by (and because the ride may not be smooth; luckily, the Earth is very smooth in its motions). It is the "relative motion" that we perceive. If two cars are moving in parallel with the same speed, passengers in each car see the other car to be stationary.
- However, after Galileo invented the telescope, people made more precision measurements of the planets and the heliocentric model was needed to explain all those new findings.

2. But there are many people who still believe that the Sun goes around the Earth! To quote a passage from the Wikipedia article, WebLink: WIKI: Geocentric model

- "..Morris Berman quotes survey results that show currently some $20 \%$ of the U.S. population believes that the sun goes around the Earth (geocentricism) rather than the Earth goes around the sun (heliocentricism), while a further 9\% claimed not to know. Polls conducted by Gallup in the 1990s found that $16 \%$ of Germans, $18 \%$ of Americans and $19 \%$ of Britons hold that the Sun revolves around the Earth. A study conducted in 2005 by Jon D. Miller of Northwestern University, an expert in the public understanding of science and technology, found that about $20 \%$, or one in five, of American adults believe that the Sun orbits the Earth. According to 2011 VTSIOM poll, $32 \%$ of Russians believe that the Sun orbits the Earth."
- And, there are even some who believe that the Earth is flat: WebLink: WIKI: Modern flat Earth societies

3. Thus sometimes it is very hard to get rid of certain "wrong views" because of our "experiences" and "gut feelings." Yet, if one hangs onto such wrong views (in the face of contrary evidence) one cannot get a correct world view. This is why we always need to "look at the big picture"; the "bigger the picture", the better it is. It is hard to see much details while walking on the ground, but one see a whole lot better looking down from a helicopter.

- Luckily, nowadays, we have the advantage of technology to confirm that the Earth is not flat and that it moves around the Sun.

4. Similarly, it is very hard for many people to believe that humans could be reborn as animals. One argument that was given in a book that refuted rebirth was that "..in that case, the human population should not be changing, but we see an increase of the human population over the past centuries." Apparently, the author did not even consider that a human could be born an animal. Again, it is matter of a very narrow world view. There are innumerable beings in this world and they can be born in not only in the animal and human realms, but 29 other realms that we cannot see!

- When Darwin presented his theory of evolution, it made a huge psychological impact on the society, which was not ready to accept that humans evolved from animals. It is said that Darwin did not publish his now-famous volume, On the Origin of Species by Means of Natural Selection, until 1859, more than 20 years after he had first formulated his theory because he knew that it would create an uproar.

5. The theory of evolution is only partially correct according to Buddha Dhamma; we will discuss this in detail in the future. When conditions for a birth in certain realm are satisfied, the nature has come up with many ways to make that birth take place.

- Accepting the fact that human can be BORN in the animal realm is an even more shocking thing to contemplate for many people. But we should not just go by our instincts, because the world is much more complex than we perceive with our limited senses.
- Even though we consider the life of an animal as "useless", life is the most important thing in the world even for the lowest worm. All living beings have craving to continue the life they have, regardless of how pathetic it appears to us. Our "smelly bodies" are said to be repulsive to the devas who have fine bodies that are free of diseases as well.

6. The Buddha said, "..bhikkhus, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans are many as the sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process." That statement appears to most people as an exaggeration. That quote is from the post, "How the Buddha Described the Chance of Rebirth in the Human Realm."

- But as described in that post, modern science is slowly proving that indeed the number of living beings, just in the animal realm, is unimaginably large. Comparatively, the human population of about 7 billion is negligibly small.
- There are more living beings in your backyard soil than the entire human population on Earth!

7. Of course we cannot see the beings in the other three lower realms. But, just because they are not amenable to our senses, we cannot say they do not exist.

- Human vision is restricted to an almost infinitesimal sliver of 400 to 700 nanometers in the wavelength spectrum. Our ears can detect only 20 to 20,000 Hertz audio frequencies. Other animals use their own "bands" above and below that. Human beings have one of the poorest senses of smell of all the organisms on Earth., etc; see the book, "The Meaning of Human Existence" by Edward O. Wilson, who is a leading biologist.
- Another way to think about this is to contemplate on the fact that there are hundreds of TV or radios broadcasts that can be "tapped into" by having a TV or a radio set to the right channel. Just because we cannot "see" those electromagnetic waves with our eyes, we cannot say they are not all around us. There are other living beings all around us with such fine bodies, we just cannot see them.
- We have only begun "see" other hidden parts of "our world" with the aid of science; see, "Expanding "Consciousness" by Using Technology."

8. Even though scientific progress has been impressive, it takes generations to move the "knowledge base" forward; see, "Dhamma and Science - Introduction."

- On the other hand, by PURIFYING the mind, one can discern EVERYTHING that is of importance within a lifetime; see, "Expanding "Consciousness" by Purifying the Mind," and the power of the mind in the posts starting with, "Power of the Human Mind - Introduction."
- That is how the Buddha knew about not only the existence of innumerable planetary systems in the universe (many other examples are discussed in other posts), but also about the fact that this life of about 100 years in insignificant in the rebirth process.
- And there is compelling evidence for rebirth; see, "Evidence for Rebirth."

9. Without the "correct view" of this world, we will be simply "groping in the dark." When one has only a narrow and blurred vision, one cannot move forward. If one believes that this is the only life we have, then one could be making bad decisions, that could affect one's future for billions of years to come.

- That is why it is worthwhile at least to examine the evidence of the "wider world view" of the Buddha, where both space and time are infinite. While modern science has confirmed the infinite extent of space, it has not yet "discovered" the fact that life does not end at physical death; it is just the end of one insignificantly small sliver of the time span of a sentient being.

10. Most people think the First Noble Truth is about suffering in the sense of just physical or mental suffering IN THIS LIFE; that is wrong. Those are RESULTS of past actions (kamma). But that suffering is NOT what the First Noble Truth is about; it is about the FUTURE suffering that CAN BE stopped.

- The First Noble Truth is about the suffering that is hidden. It is the unavoidable suffering for anyone in this cycle of rebirths, until one grasps the "correct world view."
- This is why the Buddha said, "my Dhamma has never been heard before." It is hard to grasp until one is willing to spend some time and examine the "bigger picture." One should not just go by one's instincts, but rather by the facts.

11. This is also why "samma ditthi" or "correct view" comes first in both versions of the Eightfold Path. Yes. There are two versions of the path: One is mundane (lokiya) and is easier to grasp. The other is transcendental (lokuttara) and requires the comprehension of Tilakkhaṇa or the Three Characteristics of this world, i.e., anicca, dukkha, anatta.

- Before trying to comprehend the Tilakkhaña, it is imperative that one follows the mundane eightfold path and removes all ten types of micch $\bar{a}$ ditt $t h i$; they are discussed in "Mahā Chattārī̄aka Sutta (Discourse on the Great Forty)."
- When one starts understanding the validity of laws of kamma (i.e., deeds have consequences), rebirth must be true, and there are other realms that we cannot see, one begins to embrace the mundane version of sammā ditṭhi.

12. With that samma ditthi, one realizes that it is not fruitful to: think immoral thoughts (micchā sañkappa), utter inappropriate speech (micch $\bar{a} v \bar{a} c \bar{a}$ ), do inappropriate things (micch $\bar{a}$ kammanta), live an immoral life ( micch $\bar{a} \bar{a} j \bar{\imath} v a$ ), to strive to achieve unfruitful things (micchā vāy $\bar{a} m a$ ), have an immoral mindfulness (micch $\bar{a}$ sati), and thus get into an immoral state (micchā samādhi).

- Even if we can "get away" from paying for misdeeds in this life, we will have to pay with interest in the future lives. Similarly, any good deeds will be rewarded in future lives, if not within this life itself.
- Thus, with correct views or Sammā Diṭthi, one will be automatically following the mundane eightfold path: sammā sañkappa, sammā vācā, sammā kammanta, sammā àjīva, sammā vāyāma, sammā sati, and thus get to sammā samādhi. It all starts with sammā ditthi, or the "correct views."

13. It is not a world view that is amenable to our "experience", because our sense faculties are limited as we discussed above. But as we make progress, our minds will become clear and we WILL be able to see for ourselves the true nature of this world.

- There is a lot of evidence that what the Buddha said about "the wider world" 2500 years ago are indeed true. We are lucky to be born at the time when efforts of many generations of scientists have confirmed many of his world views, and that should give us confidence (saddh $\bar{a}$ ) to take those views serious enough to spend some time examining the evidence. My goal is to present evidence from many aspects, because different people comprehend different aspects.

14. Such a critical evaluation itself could be enough to dispel any wrong views. It is like lifting of a fog and being able to see clearly. When the mind becomes pure, one does not need "evidence from science" to confirm the worldview of the Buddha.

- The lokuttara version of Sammā Ditṭhi (which requires the comprehension of Tilakkhaṇa to some extent) and the corresponding Noble Eightfold Path is discussed in other posts in the "Seeking Nibbāna" section. Also, see, "Buddha Dhamma - In a Chart" and the post referred to in that chart: "What is Unique in Buddha Dhamma?."

## Next, "Four Noble Truths: Recipe for Problem Solving", ...

### 7.1.1.5 Four Noble Truths: Recipe for Problem Solving

Pre-2016; re-written August 6, 2022; revised August 7, 2022
Problem solving can be reduced to four simple steps. That is the same approach the Buddha used in discovering the Four Noble Truths to solve the problem of suffering.

## Four Steps to Solving a Problem

1. When solving any problem, there are four steps:

- One needs to know the problem or even realize there is a problem.
- The reason or the cause for that problem (some may be superficial causes, but there are root causes).
- Knowing what result can be expected by solving the problem (there may be many possible outcomes depending on the approach).
- A procedure to systematically solve the problem based on the superficial or root causes.

Those were the same steps that our Bodhisatta used to attain Buddhahood.

## Figuring Out the Causes

2. Let us discuss an example. If a car would not start, the cause may not be clear to someone who does not have a technical background in automobiles, but a qualified technician will be able to find the cause quickly.

- He may find that it is a simple problem of some wires becoming loose in the ignition circuit, or it could be as bad as a problem with the engine itself.
- The solution to the problem will lead to being able to start the car.
- And the way to get there depends on the actual problem and going through the standard procedures to solve the problem. One could re-connect the loose wires if the problem is with a loose wire. If it is a failed engine, one could either replace the engine or fix it if it is a minor problem with the engine.

## Root Causes and Secondary Causes

3. Sometimes, there can be a temporary or a permanent solution.

- If we get a headache, In most cases, we would just take an aspirin or Tylenol, which would "fix it." But if the headache keeps returning, we may realize there could be a more serious root cause. Now we need to figure out why we are getting headaches frequently. First, we look at easy solutions. For example, if
we can connect the timing of the headaches to eating some specific food, we can stop eating that and see whether it goes away.
- If we cannot figure it out, and if the problem persists, we go to a specialist, in this case, a physician. The physician will ask a series of questions and may do a series of tests. The goal is to figure out the root cause that may not be obvious.
- Depending on the results of the diagnostic tests, the physician may find the root cause to be cancer. Then that cancer needs to be treated, etc. He will prescribe a method of treatment. If that root cause is removed, we would have removed recurring headaches.

4. There is an important difference between superficial causes and root causes. Superficial causes do not lead to serious problems. For example, if too many drinks taken by a person not used to alcohol causes a headache, which can be "fixed" by taking an aspirin. But some problems have root causes hard to see, like the one in \#3 above.

- It is interesting to note that root causes give the exact meaning of the Pāli term "mūlika hetu"; "mūla" is the root of a tree. Even if a tree is cut down, the tree may not be killed if the roots remain intact. It may still sprout new limbs and finally grow into a full-fledged tree.
- However, removing the deep roots of a tree will permanently kill the tree. Similarly, removing root causes will eradicate a persisting problem.

## Not Prudent to Apply Temporary Solutions

5. Most times, when a problem arises, we tend to do the most expedient thing to get it out of the way and move on. If the headache goes away until one gets through the day, one may decide just to take an aspirin and handle it daily like that.

- Even when the wife (or husband) says, "You have been taking aspirins almost every day for this many days. Why don't you see a doctor and see whether there is something else going on?" we may just continue with the "temporary fix" especially if we are busy.
- If that person was starting to develop cancer, postponing the "root cause" diagnosis could be a grave mistake. Cancer cells multiply rapidly and could spread to other body parts.
- Even though one could get temporary relief by taking aspirin daily (may be by gradually increasing the dose too), that is NOT the solution. The result in the short term could be temporary relief, but one is heading into a much more dangerous outcome.
- The ideal solution to the problem is not to temporarily be free from the headache but to be free from cancer!

## Suffering Associated with Existence

6. The Four Noble Truths handle the most critical problem of all: the suffering associated with existence.

- First, most of us are unaware that it cannot be handled with temporary solutions.
- For example, even if we don't suffer significantly in this life, there will be suffering in future lives. Some people do not realize that there is a rebirth process and that most rebirths are filled with unimaginable suffering. They are unaware that the problem is much more than just suffering in this life.

7. In complex situations, the root causes of a given problem will not be obvious if one does not have a sufficiently broad view of the situation. That means the ideal solution may not be obvious.

- When that happens, the problem leads to ever-increasing severity and may not be solvable. Therefore, postponing finding the root causes of a problem can be dangerous.
- In the example discussed in \#3 above, cancer may grow if one keeps postponing getting a good diagnosis by a qualified physician. It will be too late when cancer has spread through the body. Thus, and after some point, cancer may not be treatable.
- In the same way, our ability to grasp the deep teachings of the Buddha will decrease as we get old and our brains start deteriorating. Don't postpone this most critical task of learning Buddha Dhamma!

## The Solution to the Existence of Suffering Requires a Wider Worldview

8. That larger problem of existence can be "seen" only by the highly-purified mind of a Buddha. During the night of Enlightenment, the Buddha achieved three types of higher knowledge:
(i) Ability to recall one's past lives (pubbe nivāsānussati ñāna),
(ii) The ability to see any living being's cuti (end of bhava) and patisandhi (grasping of a new bhava). This is the cutūpapāta $\tilde{n} \bar{a} n a$.
(iii) The attainment of the Buddhahood with $\overline{\text { a }} \boldsymbol{s} \boldsymbol{a v a k k h a y a} \tilde{\boldsymbol{n}} \bar{a} n \boldsymbol{a}$. That involved grasping the Four Noble Truths and the Noble Eightfold Path to Nibbāna.

- Therefore, his worldview of a wider world with 31 realms and rebirth is NOT speculation. He could recall past lives, and he visited many other realms. Many suttas in the Tipitaka describe those recollections and visits. See "Buddhahood Controversies - Introduction."
- Of course, we have to believe that based on faith. Yet, that should not be blind faith: "Buddha Dhamma: Non-Perceivability and Self-Consistency."

## Focusing on This Life Yield Only Temporary Solutions

9. Of course, one can find temporary solutions by just fixing the superficial causes. Just like fixing a headache by taking an aspirin, one could find temporary happiness in this life by "trouble-shooting" each problem as it arises. That is the "rat race" most of us are engaged in.

- For example, most of our time is spent solving problems that pop up at the office or home. At the office, one is assigned a task to finish within a certain time. When finished, one gets another. That goes on until retirement!
- It is not that different at home. One must take care of the kids, house, cars, etc.
- At the end of this life, another WILL start. Then we do it all over again. There is no permanent solution to this short-sighted approach.
- But it could be much worse when future birth is in an apāya. That is when one will be helpless. The only way to avoid that possibility is to get to at least the Sotāpanna Anugāmi stage of Nibbāna.

## Only One Permanent Solution

10. Tackling superficial causes that we can readily see or discern is what we have been doing since the beginning-less time. Life after life, we just strive to "maintain things to our satisfaction," and at EACH time, we fail.

- Most times, we suffer trying to "get things going in the way we want," and by the time we achieve at least some success, our bodies start falling apart, so we will not be enjoying what we have gained with so much effort.
- Think carefully about any famous personality we believe has achieved their life goals. They all will have to leave behind their achievements at death. Furthermore, those things would not mean anything in their new life; they will have to start all over. The only things carried over to the new life are any good/bad habits or deeds they cultivated, not material gains.

## Root Causes of Saimsāric Suffering

11. If we understand where this never-ending process gets the required fuel from (i.e., the root cause for rebirths), then by ELIMINATING those causes, we can permanently solve the problem of perpetual suffering in the rebirth process.

- As long as we crave "mind-pleasing things" in this world by generating abhisañkhāra, rebirth ( $j \bar{a} t i)$ in this world is inevitable. Depending on the type of abhisañkhāra, rebirth may be in an apāya, human, Deva, or Brahma realm. But they all end up in old age and death.
- It is critical to realize that six root causes maintain this world for anyone: greed, hate, ignorance, and mundane versions of non-greed, non-hate, and non-ignorance. It is fairly easy to see how greed, hate, and ignorance can lead to rebirth in the $a p \bar{a} y \bar{a} s$.
- It is impossible to understand how mundane versions of non-greed, non-hate, and nonignorance can be bad until those "bad roots" of greed, hate, and ignorance are removed. An understanding of Pațicca Samuppāda is necessary to see the "hidden suffering" in apparently harmless sensory pleasures. See "Six Root Causes - Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna)."
- Thus, stated succinctly, the root cause of our suffering is not being able to "see" the hidden suffering in sensory pleasures.
- Not understanding that is $a v i j j \bar{a}$ or ignorance.

## Removal of the Root Causes

12. The third step is to see that the successful solution to this problem is the attainment of Nibbāna or stopping the rebirth process. This is probably the hardest step to latch on to because it requires eliminating the root of cravings (attachments.)

- We can see that "mind-pleasing things" bring us happiness. It is not easy to "see" the suffering hidden in that.
- The Buddha likened this to the case of an ox dragging a fully-loaded cart eagerly while its owner is holding a stack of hay on a pole in front of it. The ox has its mind set on reaching the stack of hay and does not even realize the heavy load it is pulling.
- A fish can see only the tasty worm but not the dangerous hook hidden inside. We are not that different from the fish, as the Buddha explained in the "WebLink: suttacentral: Balisa Sutta (SN 17.2)."
- It is only when one truly comprehends that "it is fruitless to struggle to find happiness in this world of 31 realms" that one attains the Sotāpanna stage.
- Thus, cravings for worldly things can ONLY be removed via wisdom (paññā) when one can accept the wider worldview discovered by the Buddha (rebirth process) and how abhisañkhāra (generated with $a v i j j \bar{a})$ leads to rebirths in various realms, i.e., understanding Paṭicca Samuppāda/Tilakkhaṇa. That understanding leads to the Sotāpanna stage. It is a change of one's worldview!

## Following the Path to Remove Future Suffering

13. The Buddha said that when one sees one Noble Truth, one sees all four. Thus at the attainment of the Sotāpanna stage, the way to Nibbāna also becomes clear.

- The process of removing the root causes of $a v i j j \bar{a}$ and tanhh $\bar{a}$ is the Fourth Noble Truth, the magga sacca, or the Truth of the Path, where "magga" is a path. And this path is eightfold, and it is the Noble Eightfold Path.
- The Path has to be followed systematically. The first step is to realize the "correct vision" or Samm $\bar{a}$ Ditṭhi to eliminate "san." A Sotāpanna has achieved this to a significant extent by comprehending anicca, dukkha, and anatta to a certain extent.

## The Four-Step Process Is Universal

14. Therefore, the four-step process stated in \#1 above is a basic principle that can be used to solve any problem. That means solving a mundane problem temporarily and providing a permanent solution to the ultimate problem of existence. That approach is based on the principle of cause and effect, the same one that Nature is based on.

- One could even find a somewhat longer-term solution by working towards a better rebirth. We must do that too, but always the goal MUST BE to remove all root causes.

## First Step - Understanding the Existence of the Problem

15. The key point that the Buddha was trying to make was that we do not realize that there is a "problem of existence." The first step in the four-step process is to realize the validity of the rebirth process. Since we cannot readily see the rebirth process, most of us focus on just this life.

- All we have been doing is to "take aspirins" as headaches resurfaced instead of finding a permanent solution to the "problem of never-ending headaches."
- In every life so far, what we have done has been to 'take aspirins" to try to solve problems temporarily as they inevitably come our way. The Buddha taught that one must address the root causes of Saimsāric suffering to remove any future suffering.
- This is the First Noble Truth of "dukkha sacca" (pronounced "dukkha sachcha.") It means "existence in this world of 31 realms is filled with suffering, and it is a never-ending process. But that can be overcome permanently".
- Therefore, the main goal must be Nibbāna. There is no other permanent solution!

## Nibbāna - Elimination of All Six Root Causes

16. Nibbāna does not have a cause. Eliminating all six root causes in \#11 leads to Nibbāna. All these are removed via pañña or wisdom. It is important to realize that wisdom means understanding the Four Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa.

- But for now, it suffices to say that the four lowest realms of this world are "maintained" via the "bad roots" of greed, hate, and ignorance. The remaining 31 realms are "supported" by (the mundane versions of) non-greed, non-hate, and non-ignorance, the so-called "good roots."
- This is why the Noble Eightfold Path is two-fold: the mundane (lokiya) Noble Eightfold Path must be followed first to avoid birth in the lowest four realms and cleanse the mind to a certain extent. But one could "fall back" in future lives unless one gets to the Sotāpanna Anugāmi stage.
- Then one follows the transcendental (lokuttara) Noble Eightfold Path to attain Nibbāna by fully cleansing the mind of all six roots. See "Mahā Cattārisaka Sutta (Discourse on the Great Forty)."

### 7.1.1.6 First Noble Truth - A Simple Explanation of One Aspect

1. One does not need to be a Buddhist or even heard about the Buddha to know what conventional "suffering" is. Anyone knows that getting sick, getting old, and dying is cause for suffering.

- But then the Buddha said, "these four Noble Truths are not known to the world until a Buddha describes them."
- Thus the Buddha was talking about a kind of suffering that ANYONE in this world is destined to have either now or in the future. He was mainly concerned with the LONG TERM suffering, in the future rebirth, and how to STOP that from taking place.

2. However, there are some sufferings in this very life that arise due to our current way of life, or what we do or think right now. In this post, I want to address such "SHORT TERM" sufferings that also can be AVOIDED.

- A significant part of our suffering comes from the mind. Whether one lives in a grand mansion or in a hut, this part of suffering is common to us all.
- And even some famous and rich people that we know could not bear this mental pain to such an extent that they committed suicide. From Elvis Presley and Marilyn Monroe to Whitney Houston and Robin Williams, there are many well-known cases; see, WebLink: WIKI: List of suicides for a long list that extends to the past.
- Suicide Prevention, see : WebLink: HELPGUIDE: Suicide Prevention

3. Obviously, one can have mostly everything that any one of us can only wish for (health, wealth, beauty, fame, etc), but still, suffer. One could get a glimpse of what the Buddha meant by suffering if one could contemplate on this issue, and that revelation itself could lead to the avoidance of that kind of suffering.

- We can get rid of a big part of suffering in the near future by controlling hate or displeasure towards other people. Even though the other party may have done something wrong to us, most of the suffering is inflicted by ourselves. This needs some contemplation to clarify.

4. Suppose I come to know that someone said a bad (and untrue) thing about me to others. The moment I hear this my mind gets agitated. And I could be spending the next hour or two or even the next day or two saying to myself and friends, "I cannot believe that so and so said this about me. Why would he do that?", and may be even be thinking about how to retaliate. All this time spent on such activity was a burden to the mind. I caused more suffering to myself by just dwelling on it, and by generating more hateful thoughts.

- I could have handled the situation better as following: If I know from past experience that he would not have said it without a reason, I need to talk to him and clarify the situation. If that failed or if I knew that he was "just that type of a person" I just need to stay away from him. We cannot control the behavior of other people. The best thing is to stay away from such people.
- Staying away from "bad company" is critical especially for children. It is imperative for the parents to make sure that their children stay away from bad friends.

5. Another thing that is related is not to try to spend too much of your time and energy to convince other people to see "things your way." For valid or invalid reasons, each person has a set of beliefs and convictions. I have realized that it causes unnecessary mental suffering to myself and others if I try hard to convince the other party of my own views. I have no right to say my views are better than the views of the others; I just explain things the way I see them.

- Even the Buddha did not try to even advice certain people, because they could have caused long-term harm for themselves by generating hateful thoughts of the Buddha.
- One has to realize that getting rid of ditt hi or wrong views is the first step in getting some "cooling down." It is true that palpable "cooling down" can be attained by getting rid of the worst wrong views; see, "Wrong Views (Micchā Ditthi) - A Simpler Analysis."

6. Then there is extreme greed, that could also lead to unnecessary suffering. Here one needs to make a distinction between two extremes: It is really necessary to avoid physical discomfort on one extreme. But trying to "acquire fancy things" for the sake of pride is the other extreme.

- We do need food, clothes, shelter, and medicine to avoid living a miserable life. Therefore, we need to make a decent living to provide such necessities for ourselves and our families.
- However, if we try to acquire, for example, a "bigger and fancy house", that could cause anxiety and even suffering especially one is stretching one's resources to achieve that "extra bit of happiness." That "extra bit of happiness" could become a nightmare in some cases, for example, if one loses employment or encounters an unexpected expense.

7. One does not need to feel bad about the wealth one has acquired legitimately and to use that wealth for one's comfort. One has already paid for that in the past (a good kamma vipāka). In the same way, if one is poor, one needs to understand two things per Buddha Dhamma: First, one is in that situation because of a past cause (bad kamma vipāka). Second, and more importantly, one can work oneself out of that situation, because kamma vipāka are not deterministic; see, "What is Kamma? - Is Everything Determined by Kamma?."
8. The key is to live within one's means and strive for a better living condition if one actually does not have enough for a comfortable living. There is so much of "peace of mind" in a simple life, even if one has a lot of wealth. Most people ruin their lives by trying to seek sense pleasures using money. That only gets one on a track that leads to seeking more and more such pleasures and eventually running out options.

- The sad thing is that they do not know there is so much "peace of mind" to be had just by living a simple life with less greed and less hate.

9. It is hard to fathom, but it is true that craving for valuable material things makes one's mind temporarily happy at times but perpetually burdened. This statement needs a lot of thought for clarification.

- The perceived happiness comes from the perceived "value" of the item by one's mind, and if that item is lost or damaged that can lead to much more suffering. Here is a hypothetical situation: A mother dies and her two daughters inherit a supposedly highly valued necklace. Each daughter wants it, and they get into arguments and both come to much mental suffering. Eventually, a wise elder suggests to sell the item and share the money. When they try to sell it, they find that it is of low quality and is really worthless. They had each inflicted so much suffering because of a "perceived value" for that necklace.

10. The real happiness is not having anything to worry about. That does not mean one needs to give away everything one has.

- Using things that are available to oneself and having a greedy mindset are two different things.
- One could be living in a mansion with a peace of mind knowing that all his/her wealth is not forever, and another could be living with a burdened mind in a hut with so much attachment to whatever little he/she has or with jealousy/hatred for what others have.
- On the other hand, one could be living in a mansion with a burdened mind and could even commit suicide, while a poor person who has learned Dhamma could be living in a hut with a peace of mind content with what he/she has and knowing that any hardship is just for a short time (in this life).
- The bottom line is that things happen due to causes, and by controlling our minds we have the power to initiate good causes (moral deeds) and to suppress bad causes (immoral deeds). Some will be effective for the short term and all will be effective for the long term.

Also see, "First Noble Truth is Suffering? Myths about Suffering."
Next, "Difference between a Wish and a Determination (Paramita)",

### 7.1.1.7 Difference between a Wish and a Determination (Parāmitā)

1. It is easy to just wish for things, but a real determination has a firm commitment attached to it. A determination is a wish accompanied by a plan to make the wish come true.

- One can drop a stone in water and can wish for it to come back up. That is NOT going to happen.
- Some goals (wishes) can be attained in this life: quitting smoking, passing an exam, getting a good job, etc. But still one has to make an effort, i.e., one has to act with determination to achieve the wish.

2. Other goals can take many lifetimes to attain. These are called "pāramita" (pronounced "pāramithă"). Depending on the goal, a parāmitā can take many, many lifetimes. It is said that to become a Buddha, one needs to have a firm commitment carried over billions of lives; that is a parāmitā. And it is not like that someone just makes a wish to become a Buddha; that "gati" or the "tendency" has to develop first over many lifetimes, initially starting with the habit of helping others and generally living a moral life.

- Buddha Dhamma is all about causes and effects. If one can understand the causes for something to happen, and then work to make such cause to materialize, the effects WILL follow.

3. We can see that there are many people - some even may not have heard about Buddha Dhamma making great efforts to help others even at the risk of their own lives. Those people have such sansāric habits and they do have goals, even if it may not be clear to them at all times. They are just driven by that sansāric habit. If they come across pure Dhamma by any chance, they may be able to focus their efforts accordingly.

- To become an Arahant one needs to make a commitment and maintain it over many, many lives. We all are likely to have made that commitment in one or more lives; of course, we do not know. And if we had made such a commitment and have worked on it over many lives, it may be possible to fulfill it in this very life. Even otherwise, we can make a real effort to maintain that "paramita" and strengthen it.
- Some make firm determinations to become a deva, a Brahma, an emperor, or just to be rich; there are millions of things that people wish for, and sometimes make firm determinations on. Some of them can come true in this lifetime itself, especially if that is a firm commitment coming from previous lives. Normally the word "parāmit $\bar{a}$ " is reserved for those commitments that target Nibbāna.

4. In physics, there is a simple law that says, "every action has a reaction." In Buddha Dhamma, there is an even more generalized law: when one keeps doing something, an invisible energy buildup occurs that will result in a kamma bhava (potential energy) that will bring about a result (even a birth) of a similar kind.

- During a lifetime, the brain will help achieve goals by rewiring neural connections in the brain when someone keeps trying to develop habits; see, "How Habits are Formed and Broken - A Scientific View."
- And such habits may be carried over future lives by embedding in one's kamma seeds (bīia); see, "Sansāric Habits, Character (Gati), and Cravings (Āsava)."

5. For example, if one keeps drinking heavily, it WILL become a habit; the brain's neural connections will get wired-up for it. If done long enough, it will get embedded in one's psyche (i.e., in kamma seeds), and one is likely to be matched up with a mother who has similar drinking habits, and then it is likely that habit to continue in that life too. It takes a determined effort to "unwire" those neural connections, more than just a wish.

- If one keeps doing activities that are suitable for a dog, one will increasingly act like a dog with such habits, and if that is kept up, eventually will be born a dog. It does not matter whether that person wished to be rich or powerful, what matters is what one habitually does. In his/her mind, one made that determination indirectly by acting accordingly.

6. In the same way, when one makes a determination to be "good", and starts helping out others, and start learning and living by Dhamma, one will be heading to "good births" whether one wishes or not. Then they become deeply-ingrained habits that are taken from birth to birth, and become "paramitas."

- Such dominant paramitas may manifest as one's character ("gathi"). As I mentioned previously, we can see such visible "gathi" in many people, regardless of their official religion or culture.

## 7. Thus habits cultivate character ("gathi"), and persistence of such strong character qualities or "gathi" through many rebirths develop into "paramitas."

- Especially in young children such "gathi" may manifest and then it will be easier to cultivate them. For example, in the post on "Evidence for Rebirth" there is a video of a child reciting complex sutt $\overline{\text { a }}$; if he was encouraged to follow that path, he could be able to attain a stage of Nibbāna in this very life. Similarly, a child with any kind of natural talent can be encouraged to cultivate it easily, because those are sansāric habits.

8. Breaking a bad habit takes time too. It is best to cultivate an opposing good habit, or at least a neutral one so that one has the option of doing something when the urge comes. For example, if one wants to quit smoking, one could start chewing gum instead.

- Both in developing a good habit or breaking a bad habit, one is bound to break the trend once in a while. A child learning to walk will fall many times. That is why one needs to have the perseverance to get back up with a renewed determination.

Whether one is making a determination on a mundane goal or to attain a stage of Nibbāna, the posts "The Four Bases of Mental Power (Cattāro Iddhipāda)," "The Law Attraction," and "Habits, Goals, and Character (Gati)" could provide helpful information.

### 7.1.2 Calming the Mind

"Key to Calming the Mind - The Five Hindrances"<br>"Solution to a Wandering Mind - Abandon Everything?"<br>"Right Speech - How to avoid Accumulating Bad Kamma"<br>"Three Kinds of Happiness - What is Nirāmisa Sukha?"<br>"Learning Buddha Dhamma Leads to Nirāmisa Sukha"<br>"Need to Experience Suffering in Order to Understand It?"<br>"Does Impermanence Lead to Suffering?"

### 7.1.2.1 Key to Calming the Mind - The Five Hindrances

Revised August 2, 2016; November 25, 2018; September 9, 2019; February 23, 2021; August 25, 2021; re-written July 10, 2022

A wandering mind is an unhappy mind! The conclusion of an article in the prestigious journal "Science" which, using real-time input from 5000 people worldwide, confirmed what the Buddha said 2500 years ago; see, WebLink: A wandering mind is an unhappy mind-Science-Killingsworth-2010.

## Mundane Ways to Calm a Mind

1. The easiest way to calm a mind is to focus it on a neutral object. There is only one thought arising at a time. So if one can keep the mind focused on something neutral, those unwanted thoughts cannot come back. Several techniques are available. Let us discuss a few below.

- Especially when one gets angry, just stopping and counting to ten at least slows down the javana (or the impulse) from running wildly. Do not let unwanted thoughts take over. They multiply very quickly, and then things get out of control; for a more in-depth discussion, see "Javana of a Citta - Root of Mental Power."
- Taking a few deep breaths helps too. Or, in an angry situation, visualizing a Buddha statue and thinking about its serenity helps also.

2. A popular meditation technique to calm the mind is "breath meditation." Go to a quiet place (less bright and less noisy place), sit in a chair comfortably, and concentrate on the in-and-out breath. Most people can feel the breath at the tip of the nose or on the lips. If not, one can be aware of the falling of the chest or abdomen. Just fix the mind on any of these and do not let it move to some other thought. Initially, it may be hard, but with practice, it becomes easy. That is a crude form of Samatha meditation.

- However, those are just "tricks" to get a temporary solution. Just like a restless child is bound to throw a tantrum again, any relief from "breath meditation" is only fleeting.

## Buddhist Way to Calm a Mind

3. Even Samatha meditation becomes easier if one lives a moral life. One must at least obey the conventional five precepts of not killing other beings, stealing, lying, engaging in sexual misconduct, or using excessive amounts of alcohol. If one can further abstain from harsh speech slandering, and vain talk, that makes it even better, see, "Ten Immoral Actions - Dasa Akusala," and "Punna Kamma - Dāna, Sīla, Bhāvanā."

- One must be aware of those precepts 24 hours a day. They are not rituals to be obeyed. One follows them to purify one's mind. Don't worry if a precept gets broken once in a while. Such occurrences will become less and less with time.

4. The reason that the mind becomes agitated easily is because of the "gunk" that we have in our minds (they go by various names like kilesa, anusaya, "bad gati," or mental impurities). All this "gunk" is there due to greed, hate, and ignorance.

- If a mind is free from greed, hate, and ignorance (that is easily said than done), then the mind will be very calm, and nothing in the outside world can perturb that mind; see " 2 . The Basics in Meditation" and " $\underline{\text {. }}$ The Second Level - Key to Purify the Mind" for details.

5. In a simile, the Buddha compared a calm mind to a clear, calm lake that made the surroundings serene. That lake could become an undesirable eyesore, if one or more of the following happens. (i) A dark-colored dye is in the water, (ii) The lake has boiling water, (iii) Water is covered with moss, (iv) the Lake is perturbed by wind, and (v) Water is turbid and muddy.

## Pañca Nīvaraṇa - Root Causes for an Agitated Mind

6. Similarly, a peaceful mind will become polluted due to five hindrances (pañca nīvaraṇa). They are called " $n \bar{v} v a r a n a "$ because they cover the mind from seeing right from wrong. They are kāmacchanda, vyāpāda, thīna-middha, uddhacca-kukkucca, and vicikicchā.

- One cannot see the bottom of a lake if any of the above five factors are present. Similarly, the mind loses its capacity to "see things clearly" if those hindrances are there.

## Kāmacchanda - Main Culprit

7. Craving sensory pleasures (kāmacchanda) is like a dark dye. Kāmacchanda ("kāma" + "ichcha" + "anda" means blinded by sense desires).

- Note that there is an adopted convention to write Pāli with the English alphabet. Thus, "c" represents the "ch" sound and "icca" is pronounced, as "ichcha." See, "Tipitaka English" Convention Adopted by Early European Scholars - Part 1."
- Here "kāma" means indulging in conscious thoughts about the five sense faculties that belong to the kāma loka: eye, ear, nose, tongue, and the body; "ichcha" is desire, and "anda" is for blind.
- The attraction for something becomes so strong that one's complete attention is on that object. The mind can lose control over what is sensible and what is not rational (or immoral).

## Vyāpāda - Worse Than Kāmacchanda

8. Extreme hate (vayāpāda or vyāpāda) is like boiling water. We all have seen people who are so enraged that they are out of control.

- One could become "animal-like," and one who develops such character ("gati") could end up in hell (apāya).
- Vayāpāda ("vayā"+"pāda") means traveling downward (in the 31 realms): "vaya" is destruction and "pāda" means "(walking) towards."
- But vyāpāda arises because of $k \bar{a} m a c c h a n d a$.

## Thina Middha - Disinterest in Buddha Dhamma Due to Incomprehension of Basic Concepts

9. Thina middha ("frozen mind") is like moss covering the water. Sleepiness is just a symptom of it. It is a dull mind that has not been exposed to Dhamma.

- When one learns Dhamma, one's mind gets energized. Those meditators who fall asleep during meditation can get rid of that problem by learning pure Dhamma.
- This is why I started a new series of posts: "Basic Framework of Buddha Dhamma."

## Uddhacca kukkucca - Worse Than Either Uddhacca or Kukkucca

10. Uddhacca-kukkucca (customarily translated as restlessness and brooding), arises because of highmindedness (uddhacca) and low-mindedness (kukkucca); in most cases, because of the high-mindedness, one tends to DO lowly things.

- "Uddhacca" is "high-mindedness" (high regard for oneself) which can be at various levels and completely removed only at the Arahant stage. "Киккисcа" is the tendency to do lowly things such as mistreating others. It goes away probably at the Sotāpanna stage. Those are two separate cetasika: "Cetasika (Mental Factors)"
- Note that both words have "acca" (pronounced "achcha") which means "to overboard/to excess." One with uddhacca goes overboard with "high regard for oneself" and one with kukkucca tends to go to extremes in engaging in "lowly deeds" (" $k u$.")
- When they arise together, "uddhacca-kukkucca" is one of the five nivaraṇa that "covers a mind" and prevents "seeing the true nature of the world." Here, one tends to do "lowly things" based on highmindedness, power, etc. After the Sotāpanna stage, only uddhacca remains as a cetasika. It fades with higher magga phala and goes away only at the Arahant stage.

## Vicikicch $\bar{a}$ - No Faith Because of Incomprehension of Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa

11. With vicikicch $\bar{a}$, one tends to do stupid things because of ignorance of the true nature of this world. It comes from " $v i$ " is twisted, "ca" (pronounced "cha") is thoughts, and "icch $\vec{a} "$ or cravings.

- For example, the tendency to do immoral actions to get one's wants comes from vicikicchā. One does not know or does not care about the adverse consequences of such activities. Thus vicikicch $\bar{a}$ is compared to muddy water. [kicca: [nt.] duty; work; service; that which should be done.]
- One must get rid of both the ten types of micchā dițthi and comprehend Tilakkhaṇa to some extent. That means having a good idea about the real nature (anicca, dukkha, and anatta) of this world. That helps REMOVE the vicikicchā nīvaraṇa.

## A Simile (Analogy)

12. In another simile, the Buddha compared the five hindrances (pañca n̄̄varana) to the darkness that keeps one from seeing true nature. For example, a furious person cannot see the damage to the other person and oneself. At least at that moment, hate and anger blind that person.

- A mind "blinded" by the five hindrances can keep on adding "more bad stuff" even without realizing it. If you take a glass of muddy water and add more mud to it, you cannot see much difference. On the other hand, if you take a glass of clean water, you can see the presence of even a bit of dirt.
- Thus when the mind is free of the five hindrances, one can easily see if any evil thoughts come to the mind. Then it is easy to contemplate the possible adverse consequences of such ideas and remove them. That will keep the mind from becoming perturbed. A mind free of the five hindrances is calm and peaceful.
- That is why one should listen to discourses or read Dhamma posts, preferably when the mind is calm. Then one can absorb more.
- More on pañca nīvaraṇa in "Pañca Nīvarana and Sensual Pleasures (Kāma Rāga)."

## Mundane Meditations - Good Start

13. It is good to practice mundane Samatha meditation for short times. That allows one to have a peaceful state of mind during that time. But it does not remove any defilements (i.e., the underlying root causes). Ariya meditation leads to the gradual removal of evils; see, "Bhāvanā (Meditation)."

- These hindrances are the results of bad habits ("gati") we have developed over many lives. They have become deep-seated cravings ("āsav $\vec{a} "$ ), which remain with us as mental impurities (kilesa). When one starts on Ariya meditation, such as bad habits, desires, and mental impurities will decrease. In the simile we talked about initially, the water in that lake will become pure by removing the dye, boiling water, moss, wind, and mud. Similarly, the lake becomes calm and serene again in the absence of those ROOT CAUSES.
- The hindrances of thina-middha and vicikicchā go away at the Sotāpanna stage. Those of kāmacchanda, vyāpāda, and uddhacca-kukkucca reduce to kāma rāga, patigha, and uddhacca. At this stage, the remaining three are no longer nīvaraña. Kāma rāga and patigha lessen at the Sakad $\bar{a} g \bar{m} m \bar{l}$ stage and disappear at the Anāgāmi stage. Uddhacca goes away only at the Arahant stage.
- Progressive lessening of the five hindrances can bring the mind to a stable, peaceful state over time. That happens even before the Sotāpanna stage. Then one could feel the increase of the nirāmisa sukha that it brings; see, "Three Kinds of Happiness - What is Nirāmisa Sukha?."

Next, "Solution to a Wandering Mind - Abandon Everything?",

### 7.1.2.2 Solution to a Wandering Mind - Abandon Everything?

Our minds become agitated when we see, hear, smell, taste, touch, or just think about something that we really like or really dislike. Those are called thought objects (ārammaṇa in Pāli or aramuna in Sinhala). If the thought object is to our liking, our mind starts the "wheeling process" on how to own it or at least to enjoy it for a while; if the thought object is something we dislike, the same "wheeling process" takes off on trying to figure out how to get rid of it; see, "Nibbāna - Is It Difficult to Understand?."

Living in a busy society, we are bombarded with multiple thought objects continuously. Of course, it can be reduced by going to a quiet place, where there are fewer EXTERNAL objects that could give rise to multiple
thoughts; many people do that to find a "bit of peace." Better yet, we can go to a meditation retreat where we focus the mind on the breath for example, and get a wonderful calmness.

But the problem is that peacefulness, the calmness of the mind goes away when we get back to the "normal life" with normal distractions (multiple thought objects). Is it possible to have a "peace of mind" without going to seclusion?

To understand what actually happens in our minds, let us think about the following case:

1. If you go to a stream, disturb the sediment at the bottom until the water gets dirty, you can fill a glass with that dirty water. It looks brown when stirred well.
2. Now if you set the glass on a table and let it sit there undisturbed, in a little while the dirt will drop to the bottom and the water will become clear.
3. If you stir it again with a stick, the water will be brown again; this is analogous to a thought object that is of great interest to us. BUT if you try to stir it with a thread, it will not get stirred; the thread is too weak to stir it. Similarly, we are not disturbed by a thought object that is of no interest to us.
4. If you now take a fine strainer, remove the dirt from that water, and put it back in the same glass, it will now be clear. Now, if you stir it as much as you want even with a stick, the water will never become brown.
5. We all have "sediments" (or deep-seated cravings or " $\bar{a} s a v \vec{a}$ ") in our minds that have been brewing/accumulating due to sansāric habits ("gati"); see, "Habits and Goals." Each one has a set of different "sediments" or different habits, i.e., one tends to like certain things AND also dislikes certain other things.
6. So, what happens is when we see something that we like OR dislike, our "sediments" get disturbed. How much it gets disturbed depends on how strongly we like OR dislike it.

- A strong disturbance may be the sight of a person you really like OR really dislike. But if it is something that does not interest you, it will be like stirring with a thread.

7. During the day, we have innumerable "inputs" coming in through the six senses; these stir up the sediments ("āsavas") inside us and bring out the five hindrances.

- Our minds are constantly agitated, but we may not even realize it because this is the "baseline state" that we have been used to. But we can at least suppress these five hindrances and make the mind calm; see, "Key to Calming the Mind - The Five Hindrances."

8. What you are doing in Samatha meditation (focusing the mind on the breath) is to let those sediments settle down. You feel peaceful. This is why you don't get the same results consistently. Some days your mind may be especially perturbed by something.
9. This is why people feel great at the end of a long meditation retreat. All the sediments are well-settled.

- But after coming back and getting back to regular routine, all external disturbances are back and the quality of that experience slowly wears out. It may be lost completely if one keeps practicing at home.

10. However, an Arahant has removed all the sediments. Even if an Arahant is exposed to any type of sensua/hateful situation, his/her mind will not be disturbed:

- A male Arahant will not be seduced by the most beautifil woman in the world; he will not have any hatefil feelings towards a person who just cut off his arm.
- So, an Arahant is like a pure glass of water that does not have any sediments at the bottom.

11. We don't have to become Arahants to improve the quality of our lives. What we can do is to try to get rid of some of the bad habits that are not good in the long term anyway:

- For example, if we really dislike someone, we can start cultivating Metta (loving-kindness) for that person in our mind first. Whenever angry thoughts about the person come to the mind, try to counter that; think about something wonderful or peaceful instead.
- If we have a craving for alcohol, tasty but unhealthy food, etc, think about the possible bad results, and again try to steer the mind to something else, some other activity.

Of course, this needs to be done gradually. People who make New Year's resolutions sometimes abandon them because they try to just "give up" something in one big step. The mind does not like that; it likes to change only when it actually experiences the benefits of changing the habit.
12. Finally, living a simple, moral life (following the five precepts), goes a long way to reduce such bad habits, and to have a peaceful mind in the midst of all "possible distractions."

- Simple yet powerful guidelines to achieve a peaceful state of mind are discussed in a step-by-step process in "Living Dhamma."

Thus it is all about cleaning up one's defilements (bad habits) INSIDE, i.e., in one's mind; see, "1. Introduction to Buddhist Meditation." Once that is done for all defilements, no outside influence can affect one's composure (see \#10 above). One CAN even attain that ultimate stage while staying in the real world.

## Next, "Right Speech - How to Avoid Accumulating Kamma."

### 7.12.3 Right Speech - How to Avoid Accumulating Kamma

## Revised May 27, 2018; January 2, 2020

1. The fourth precept of the five precepts for a moral life is right speech. Most people literally take it to mean "not lying."

- But since we know that intention (cetana $\bar{a}$ ) is at the root of deciding whether an action is right or wrong, we always need to be careful about what we intend to achieve by what we say.
- The correct meaning of "lying" is not to utter speech with "bad intentions" to hurt others or to deceive others.

2. If one does a wrong deed, one may be able to deny it in a statement worded in such way as to conform to legality.

- Yet it is registered as false speech in one's own mind, and thus one is not able to escape the kammic consequences.

3. Ven. Ayya Khema, in her book, "Visible Here and Now" (p. 53), has nicely summarized what right speech is NOT:

- If you know something that is not helpful and is untrue, then do not say it
- If you know something that might be helpful, but is untrue, do not say it
- If you know something that is not helpful and is true, do not speak about it
- If you know something that is helpful and is true, then find the right time to say it

4. If you carefully examine the above four statements, they say to prevent from lying, gossiping, and hate or vain speech; these are the four ways one can accumulate immoral kamma with speech (see, "Ten Immoral Actions - Dasa Akusala").

- Let us look at some of the examples from the Tipitaka on how the Buddha himself handled some situations.

5. When the Buddha was at the Jetavanārāmaya for many years, there lived a butcher Cunda "pig killer" right next door. When some bhikkhus suggested to the Buddha that he should preach the Dhamma to Cunda, and get him to understand the consequences of his actions.

- But the Buddha explained that if he were to go there and try to do that, Cunda would only generate hateful thoughts (patigha) Cunda's mind about the Buddha. Thus Cunda will commit an even worse kamma.
- So, we need to be tactful about our speech.

6. On the other hand, the Buddha walked a long distance to get to Angulimāla just before he was to kill his own mother.

- Anggulimāla had killed almost thousand people, but that was on the prompting of his teacher, who was trying to get Angulimāla into trouble. That morning, the Buddha saw what was about to happen and knew that he would be able to convince Angulimāla of the bad consequences of his actions. Añgulimāla became an Arahant in a few weeks. See, "Account of Angulimāla - Many Insights to Buddha Dhamma."

7. In the case of the wanderer Vacchagotta asking the Buddha about whether there is a "self" or "no-self", the Buddha just remained silent.

- After Vacchagotta left, Buddha's personal attendant, Ven. Ānanda asked him why Buddha did not explain the concept that it is not correct to say "there is no soul" or "there is a soul" (because there is only an ever-changing lifestream) to Vacchagotta. The Buddha told Ānanda that he did not think Vacchagotta was mentally capable at that time to understand the concept, and that he did not want to confuse him. See the post, "What Reincarnates? - Concept of a Lifestream" for the correct explanation.

8. The Buddha was endowed with that capability to see other people's mental status. We do not have that capability. So, we need to use our own judgment.
9. Lying to another human being (with "bad intentions") may have even worse consequences (depending on the particular case) than killing a being of a lower realm. In some cases, lying may lead to physical harm or even death for others.

- The kammic effects of such offenses depends on the status of the being in question and the consequences of the particular action. For example, killing an Arahant or one's own parents is a much worse crime than killing a normal human, and killing any human is much worse than killing any animal; see, "How to Evaluate Weights of Different Kammas."

10. During the Nazi terror in Germany, many Germans "lied" to the Nazis that they were not hiding Jews in their houses; of course the intention was to save human lives, and thus it was the right thing to do. They acquired good kamma for protecting lives.

- We need to realize that "lying" - as meant in as "musāvāda" in the five precepts - really means the "intention" involved: "Mus $\vec{a} "$ means "wrong or incompatible with morals" and "vāda" means "speech"; see, "Details of Kamma - Intention, Who Is Affected, Kamma Patha."
- Therefore, even though they were literally lying, their intention was not a "musāvāda," but actually a "good deed."

Next, "Learning Buddha Dhamma Leads to Nirāmisa Sukha",

### 7.1.2.4 Three Kinds of Happiness - What is Nirāmisa Sukha?

Revised October 29, 2019; re-written October 13, 2022

## Introduction

1. There are three kinds of happiness (sukha): (i) sensual pleasures (āmisa sukha), (ii) jhānic (nirāmisa sukha) pleasures, and (iii) Nibbānic (nirāmisatara) sukha.

- Similarly, three types of joy (pīti): joy due to (i) sensual pleasures (āmisa pīti), (ii) jhānic (nirāmisa pīti) pleasures, and (iii) Nibbānic (nirāmisatara pīti). This
- Note: Sukha is a vedana arising in mind due to bodily feelings (kayika vedanā.) Pīti is a different cetasika arising in mind due to any type of experience. The Nibbānic versions arise in the mind of a living Arahant. After Parinibbāna, we cannot speak about the vedanā or pīti of that Arahant since that Arahant will not be reborn in this world.
- Those are explained in the "WebLink: suttacentral: Nirāmisa Sutta (SN 36.31)."

## What is $\overline{A m i s a}$ ?

2. A$m i s a$ means material; "āmisa dāna" is the offering of material things. Thus $\bar{a} m i s a$ sukha is the pleasure that arises in the mind while enjoying sensory inputs. We are familiar with sensory delights. Indulging in sensory pleasures is all we know to be providing happiness. We want to see beautiful pictures of people, hear soothing music, taste good food, etc.

- The drawback of sensory pleasures is that the experience lasts only during that particular sensory event. For example, the satisfaction goes away as soon as we finish eating. Also, we could not keep eating even if we wanted to. We will get sick of it soon enough, no matter how good the food is.
- The same is true for any other sensory pleasure. One cannot keep listening to music or watching movies for too long at a stretch.
- However, craving any sensory pleasure comes back after a while. It is never permanently satisfying.

## Jhānic Pleasures - Nirāmisa Sukha

3. People who have been doing Samatha meditation (for example, breath or kasina) know that it gives a pleasure different from any sensory pleasure. That nirāmisa sukha transcends the āmisa sukha and is also longer-lasting.

- One could meditate for hours (especially if one gets into a jhānic state) and can enjoy it as long as one wants. Furthermore, even after the session, the calming effect is there. It gives a sense of peacefulness that can last for hours.
- If one dies while in a jhānic state, one will be born in the corresponding Brahma world (either in the rūpa loka or in the arūpa loka depending on the jhānic state). However, a birth in one of the lowest four realms is not ruled out in the future.
- The ability to get into jhānic states could be lost even in this lifetime if one commits an evil kamma or indulges heavily in sense pleasures.
- Jhānic states are attained via TEMPORARY blocking the evils of greed and hate from the mind by focusing the mind on a neutral object such as breath, rising and falling of the stomach, or a kasina object, for example.

## Nirāmisatara Sukha

4. The addition of "tara" (meaning "ultimate") elevates nirāmisa sukha to a state with even less agitation of the mind. The nirāmisatara sukha is more stable even compared to jhānic pleasures. It starts even before the first stage of Nibbāna, the Sotāpanna stage.

- Nirāmisa is the opposite of the $\bar{a} m i s a$ that we mentioned earlier. Thus nirāmisatara sukha does not arise due to material things. Nirāmisatara sukha is purely mental and arises from dissociation from the
stressful material world. It is a relief sensation rather than an enjoyment. Imagine the feeling when a pulsating headache goes away. It is a sense of calm and peacefulmess.
- In other words, worldly stresses diminish as the nirāmisa sukha grows.
- The nirāmisatara sukha of a Sotāpanna (or above) is permanent. The Sotāpanna status is never lost, even through future lives. However, physical suffering may still arise due to kamma vipāka.

## Three Types of Pīti - Similar to Sukha

5. As mentioned in \#1 above, pīti and sukha are different cetasika (mental factors.) Pīti is "joy that arises in mind," and sukha is a type of vedanā that also arises in mind.

- Details in "Nirāmisa Sukha".

## Permanent Happiness

6. The ultimate nirāmisatara sukha is reached at the Arahant. Of course, the complete absence of suffering is reached at the Parinibbāna of an Arahant. See "WebLink: suttacentral: Nibbānasukha Sutta (AN 9.34)."

- Upon attaining Nibbāna (i.e., Arahanthood), there is nothing else to do. An Arahant who has developed higher $j h \bar{a} n \bar{a}$ can even experience the complete Nibbānic pleasure (saññ̄ vedayita nirodha samāpatti) at will (up to seven days at a time.) The death of Arahant results in permanent Nibbāna, i.e., complete release from suffering or Parinibbāna.
- To emphasize, Parinibbāna is not a "place" with happiness. Instead, it is the complete absence of ANY suffering.
- The four Nibbānic states result via PERMANENT removal of greed, hate, and ignorance in four stages. That involves insight (vipassana $\bar{a}$ ) meditation, most importantly, on the three characteristics of existence: anicca, dukkha, and anatta.
- Even before the Sotāpanna stage, one can start feeling the nirāmisa sukha by systematically removing greed, hate, and ignorance; see "How to Taste Nibbāna."

### 7.1.2.5 Learning Buddha Dhamma Leads to Nirāmisa Sukha

## Revised April 26, 2020

1. It is good to hear from those who have been able to "get to a peaceful state of mind" by reading posts at this site. This is nothing but early stages of Nibbāna or "niveema" or "cooling down", and is also called the "nirāmisa sukha." That is a characteristic of "pure Dhamma" and I cannot take any credit for it. This post explains how it happens.

- In other posts, I have discussed why "formal meditation" is not required to attain the Sotāpanna stage; see, for example, "What is the only Akusala Removed by a Sotāpanna?." Here would like to discuss how this "nirāmisa sukha" arises when one reads (or listens) to the true Dhamma, and how that can take one all the way to the Sotāpanna stage.
- Before that, I need to point out that the "Search" box on the top right can be very useful in navigating the site when one is looking for specific information. Avoid writing sentences or even phrases, but just enter keywords. One could narrow down the number of posts that come up by adding more relevant keywords.
- By the way, the "Search" box on the top right is very good for finding relevant posts on keywords.
- If you have questions or comments, it is best to make a comment at the discussion forum: "Forums."

2. Our minds are under stress constantly due to its tendency to know everything that is going on not only at the physical vicinity, but also things that happened in the past or one's hopes for the future.

- That tendency intensifies when we have excessively greedy or hateful thoughts; these two are called $k \bar{a} m a c c h a n d a$ (strong greed) and $v y \bar{a} p \bar{a} d a$ (strong hate), the two key elements of the five hindrances that "cover our minds." The other three hindrances are basically due to those and also due to our ignorance of how nature operates.
- Think about how "you were on fire" when you got either excessively angry or excessively greedy or lustful.
- When one reads (or listens) attentively to anything of interest, all those hindrances are REDUCED. However, depending on what type of material it is, this suppression may not be very effective. For example, if one is reading a scientific or geography paper, they may be reduced, but if one reading a pornographic novel or listening to rap music, they may actually increase.
- If one is reading Dhamma that is not true Dhamma (or for that matter, any type of religious materia), it will still reduce those five hindrances because that material will not induce any greedy or hateful thoughts.

3. However, there is a big difference in reading (or listening to) true Buddha Dhamma. This is, of course, something one can verify for oneself (as many have).

- Listening or reading true Dhamma elevates the "preethi" (or "pitit") cetasika making one joyful, which in turn makes the body "light", causes physical calmness, and lead to samādhi: "pīti manassa kayo passadati, passadi kayo sukhantiyati, sukhino samadhiyati."
- We will discuss this at a deeper level, in Abhidhamma, where we will discuss how various "mind made rūpa" like lahutā (lightness), Mudutā (Elasticity), and Kammaññat $\bar{a}$ (weildiness) can make one's body "light" or "heavy" depending on the mental status; see, "Rūpa (Material Form) - Table." For example, they are related to the cetasika like kāyapassaddhi (tranquility of mental body); cittapassaddhi (tranquility of consciousness); see, \#6 of "Cetasika (Mental Factors)."
- And this samādhi is attained via the suppression of ALL FIVE hindrances; it is commonly called "Samatha." One does not need to do a special "Samatha Bhāvanā" (like the breath meditation) to calm the mind. If one pays enough attention and gets absorbed in the subject matter while listening to a desanā or reading Dhamma, one could even attain the Sotāpanna stage.

4. This is the samādhi (or feeling of well-being) one feels when reading (or listening) to true Dhamma. It is also called the early stages of "nirāmisa sukha"; see the chart, "Nirāmisa Sukha - In a Chart." It can be printed for reference while reading this post.

- "Nirāmisa sukha," by definition, can be experienced only after one hears the true message of the Buddha: anicca, dukkha, anatta, even though some sense of calm can also be experienced when focusing on any religious activity in general where the difference between what is moral and what is immoral is taught.
- True nirāmisa sukha can be experienced only when one starts seeing a glimpse of the "true nature of this world" and becomes a "Sotāpanna Anugami," i.e., one on the way to become a Sotāpanna. This means one is exposed to the true meaning of existence in this world of 31 realms: anicca, dukkha, anatta. Now, one has the POTENTIAL to become a Sotāpanna.
- When one strives and comprehends the key message of the Buddha that seeking lasting happiness cannot be realized by staying in this beginningless rebirth process, one attains the Sotāpanna stage. Then one can "see" the path to Nibbāna and proceed on one's own. One has removed an "Earth-equivalent of defilements" through Sammā Ditṭhi; this is called "dassanena pahathabba," i.e., "removing defilements via true vision or wisdom"; see, "What is the Only Akusala Removed by a Sotāpanna?."
- Higher stages of Nibbāna normally need formal meditation techniques. The most comprehensive is given in the Mahā Satipatṭhāna Sutta. However, the early parts of the Mahā Satipatthāna Sutta, especially the Kāyānupassana a section, is geared towards help attaining the Sotāpanna stage.

5. The key difference between a person following the mundane Eightfold Path and the Noble Eightfold Path is the following: One on the mundane path avoids immoral activities because one is afraid of their consequences. However, a Sotāpanna avoids dasa akusala because he/she has seen the FRUITLESSNESS of such immoral activities.

- For example, "What is the point of lying to make money, if that cannot provide one with lasting happiness?" That can be applied to any of the 7 immoral activities done by speech and the body. And that is due to the cleansing of the mind and reduction of the 3 akusala done by the mind, where the one of them (niyata micchā diṭ!hi) has now been permanently REMOVED; see, "Ten Immoral Actions (Dasa Akusala)."
- Thus the moral behavior ("silla" or "seela") of a Sotāpanna comes from within, and it is called the "Ariyakāntha Seela." It is unshakeable and remains in future lives.
- Just like someone who has really learned algebra instinctively knows how to solve a previously-unsolved algebra problem, a Sotāpanna instinctively avoids doing dasa akusala of "apāyagām̄̄ strength", i.e., those actions that lead to birth in the ap $\bar{a} y \bar{a}$. (On the other hand, a person who has only memorized how to solve a few algebra problems can only solve those; he/she is likely to make mistakes in dealing with previously un-encountered problems).
- Once one sees a glimpse of Sammā Ditthi, one can cultivate it further; also the other seven components of the Noble Eightfold Path (Sammā Sañkappa, Sammā Vaca, etc) automatically follow.

6. During the time of the Buddha, many people attained the Sotāpanna stage during the first discourse they listened to. Attaining higher stages of Nibbāna could take more formal meditation by cultivating the basics that one has just grasped.

- Visaka attained the Sotāpanna stage at 7 years of age, and could not attain any higher stages until death. King Bimbisara also died as a Sotāpanna. Yet they are guaranteed to attain full Nibbāna within 7 bhava.
- Upatissa and Kolita attained the Sotāpanna stage while listening to a single verse; it took them a few days to attain the Arahant stage. They, of course, became the two chief disciples of the Buddha, Ven. Sariputta and Ven. Moggallana.
- Thus, formal meditation is normally needed to attain the higher stages of Nibbāna above the Sotāpanna stage. Of course, there are exceptions, like Bahiya Daruchiriya, who attained the Arahantship straightaway while listening to a verse uttered by the Buddha.

7. Whenever one become restless (the uddhacca kukkucca hindrance becoming strong) and get the urge to "go watch a movie" or "stop by a friend's house", one could try reading (listening to) Dhamma. Similarly, if one gets bored and lethargic (thina middha hindrance becoming strong), try the same; ditto for when one is struggling to figure out "how to proceed on a key decision" due to the vicikicchā hindrance.

- The "preethi" or joyfulness that arises with samādhi WILL keep all those hindrances down, especially the thina middha. This is the real test of one's ability to get to samādhi. If the state of samādhi is at a significant level, one should be able to follow the procedure in \#7 above and "not fall asleep" even right after a good meal when one usually gets sleepy.

8. Even though learning Dhamma, in general, will lead to the above-discussed effects, comprehending anicca, dukkha, anatta WILL make a big difference. However, that may take more reading and comprehension of the wider world view of the Buddha: how kamma operates, 31 realms of existence, the rebirth process, paticca samuppāda, etc.

- It is not possible even to suggest which order of topics to choose, because each person is different. And it is imperative that one should not rush through them. Gradual, steady progress is better than getting the hopes high and feeling depressed if things do not proceed fast enough.
- What I would suggest, in general, is to first focus on the concepts that one starts understanding easily and slowly expand the "knowledge base" by reading on other relevant links.
- Also, it is a good idea to go back and read some key posts that one has not read for a while. One may grasp more content from the same post when reading at a later time because what is learned in the meantime could expose deeper meanings. I know this by experience. This is the uniqueness of Buddha Dhamma; the learning never ends, rather it just intensifies with added evidence.
- It will stop being a "chore" and will become joyful as one learns more and more. The more one learns the more energized one will become.

9. Even though it may not seem to be a 'big deal', understanding anicca (or cultivating the anicca sañña $\bar{a}$ ) will make a huge change in one's progress, after one gains some understanding of the basic concepts like rebirth and kamma.

- I had struggled intensely for 3-4 years and made an enormous advance in listening to one discourse on anicca, dukkha, anatta. But of course, I had learned a lot of background material by that time and had given a lot of thought to various concepts.
- Still, by knowing what things are really important could make things easier for someone just starting out, or has been "on the wrong path."
－My hope is that many will be able to attain at least the first stage of Nibbāna much more quickly than I did．

## 7．1．2．6 How to Taste Nibbāna

## Revised November 24，2018；April 26， 2020

1．Elsewhere on the site，I have described Nibbāna in a deeper sense．But we can look at the early stages of Nibbāna in a simple way．
－In Sinhala language（spoken in Sri Lanka），Nibbāna is also called＂nivana＂or＂niveema＂（3ી己刃刃）．This means＂cooling down．＂As one moves towards Nibbāna，one feels cooling down，a sense of well－being．

2．Do you remember the last time when you got really mad？How did that feel？You get hot．Whole－body becomes hot and agitated．Blood pressure goes up and the face becomes dark because the blood becomes dark．By the way，this is clear evidence that the mind can affect the body．
－This＂burning up＂is called＂tāpa＂in Pāli（ $>3$ in Sinhala），and is due to greed，hate，and ignorance． ＂Ātāpi＂means the opposite，＂cooling down via getting rid of those defilements．＂This is what is meant by ＂ātāpi sampajāno＂in the Satipaṭthāna sutta；see，＂Mahā Satipatthāna Sutta．＂
－When someone can get to the＂ātāpi sampajāno＂state，one feels calm and＂cooled down＂；see， ＂Kāyānupassanā－The Section on Habits（Sampajānapabba）．＂

3．Do you remember how you felt when you made someone happy，either via a good deed or word？You cooled down；felt good．Didn＇t you feel the opposite of when you got mad？
－When one acts with greed，＂heating up＂still happens，may be to a lesser extent than when one is angry． As a kid，when I was stealing something，I felt heated and uncomfortable．
－The same is true when one acts with ignorance too．One is not certain whether that is the right thing to do；the mind goes back and forth：is this right or wrong？should I do it or not？This is called＂vicikicch $\vec{a}$＂ in Pāli．Because one does not really know，one is not certain，one becomes anxious，and the body gets heated up．

4．Thus，when one gives up acting with hate，greed，or ignorance，one becomes less agitated，at ease，with a sense of peacefulness．This is an early sense of what Nibbāna is．
－As one can see the benefits of cooling down，one will avoid actions done with hate，greed，and ignorance．And one will be looking forward to doing actions of goodwill，generosity，and mindfulness．
－Avoiding greed，hate，and ignorance is the same as avoiding dasa akusala．
5．Also，note the state of thoughts（citta）in the two opposing situations．When one acts with the defilements， thoughts run wildly；they come fast and they are energetic．The＂javana＂（impulsive power）of thought is high when acting with a defilement．
－On the other hand，thoughts run more smoothly and the javana（impulsive power）of a given thought is calm when acting benevolently，with kindness，with generosity，and with mindfulness；they are powerful too，but only in making one calm．Thus one can experience a taste of Nibbāna or＂cooling down＂even at the very early stages of the Path．

6．Now，one could get to TEMPORARY cooling down by not letting thoughts run wildly．The easiest to do is to keep the mind on a single focus．This can be done by focusing the mind on a religious symbol or just on the breath．Thus this＇temporary relief＇is felt by people of any religion when they contemplate a religious symbol with faith，or by doing＂breath meditation＂or mundane＂Ānāpānasati＂meditation．
－However，the only way to achieve permanent sense relief is to REMOVE greed，hate，and ignorance gradually by cleansing one＇s mind．This is done by＂taking in＂（ana）of good thoughts，speech，and actions，and＂getting rid of＂（apāna）defiled thoughts，speech，and actions．This is the Buddha＇s
$\bar{a} n \bar{a} p \bar{a} n a$ meditation that can lead to PERMANENT happiness. See, "Is Ānāpānasati Breath Meditation?"

- When one does this correct "ānāpāna" consistently, one's bad habits ("gati") will be gradually removed and good habits ("gati") will be cultivated.
- When one has removed the defilements to a significant extent, then this relief becomes permanent and will not reduce from that state even in future births. This first stage of Nibbāna is called the Sotāpanna stage. A Sotāpanna is guaranteed not to be reborn in the apāy $\bar{a}$ or the four lowest realms; he/she has removed all "gati" suitable for beings in the apāyā. See, "Gati to Bhava to Jāti- Ours to Control."

7. However, it is impossible to remove greed and hate just by sheer will power, i.e., forcefully. For example, one cannot get rid of greed even by giving away one's wealth; if that is done without understanding, then it could lead to remorse and hate.

- Rather, getting rid of greed and hate comes AUTOMATICALLY as one understands the worldview of the Buddha: that we cannot maintain anything to our satisfaction in the LONG RUN. This worldview is embedded in the Three Characteristics of "this world" or anicca, dukkha, anatta.
- Not knowing the Three Characteristics is the ignorance or $a v i j j \bar{a}$.
- Even before comprehending the Three Characteristics, one needs to reduce total ignorance (moha) to the avijjā level by getting rid of the 10 types of micchā ditt hi; see, "Micchā Ditthi, Gandhabba, and Sotāpanna Stage."

8. This is why Sammā Ditṭhi or "correct world view" comes first in the Noble Eightfold Path. When one comprehends the true nature of "this world", one's mind will AUTOMATICALLY start rejecting thoughts, words, and actions through greed and hate.

- Then Sammā Ditṭhi (correct vision) will automatically lead to Sammā Sañkappa (fruitful thoughts), Sammā Vācā (fruitful speech), Sammā Kammanta (fruitful actions), Sammā $\bar{j} j \bar{\imath} v a$ (livelihood), Sammā Vāyāma (efforts in those), Sammā Sati (moral mindset) and then will culminate in Sammā Samādhi (peaceful state of mind). This Sammā Samādhi is permanent for a Sotāpanna.
- Thus it is clear that such a samādhi cannot be attained with breath meditation or any other way of "focusing attention" on one thought object.
- Purification of the mind is the key, and that comes first through reading, listening, and comprehending the true and pure Dhamma.

9. As one follows the Noble Eightfold Path of the Buddha, one can EXPERIENCE a sense of well-being called nirämisa sukha which is different from the sense pleasures; see, "Three Kinds of Happiness - What is Nirāmisa Sukha?."

- If you did experience a sense of well-being just by reading this post, that is a good start. That sense of well being will only grow as the understanding gets deeper. I have gone through this process myself and that is what I am trying to convey to others.

10. September 22, 2016: I have started a new section: "Living Dhamma," where an experience-based process of practicing Buddha Dhamma (Buddhism) is discussed with English discourses (desanā). Nibbāna can be experienced at various levels, one needs to experience the earlier stages of nirāmisa sukha first.

Next, "Need to Experience Suffering in Order to Understand it?", ..
A deeper analysis of Nibbāna at "Nibbāna."

### 7.1.2.7 Need to Experience Suffering in Order to Understand it?

Revised August 18, 2016; Revised February 4, 2017; April 26, 2020

1. It is a common misconception that one needs to experience harsh suffering in order to understand what the Buddha meant by the First Noble Truth, that there is "suffering in this world."

- Thus, especially in the days of the Buddha, some people deliberately lived a miserable life, thinking that it will help understand suffering. They subjected their bodies to various forms of discomfort and even torture.
- This is actually one extreme that the Buddha said NOT to follow: "atta kilamathānu yoga," or subjecting oneself to unnecessary suffering. Closest English translations would be "an ascetic life", where one forcefully abstains from any comforts.

2. The Buddha never encouraged anyone to deliberately undergo suffering. The suffering that the Buddha talked about is hidden and is about future suffering in this life and in future lives. There are two kinds of "hidden suffering" that the Buddha revealed to the world:

- One is the very harsh suffering in the rebirth process (when one is born in the lowest four realms or the apāyā).
- The other is the "incessant distress" that we all undergo even without realizing it: "Anicca - The Incessant Distress ("Pilana")."
- Anyone, rich or poor, undergoes this latter type of suffering in this life. The Buddha pointed out that one could discover this type of hidden suffering and remove it too: "Starting on the Path Even without Belief in Rebirth"and other posts in the "Living Dhamma" section.

3. If one needs to suffer more to attain Nibbāna, then those who are in the $a p \bar{a} y \bar{a}$ would be the first attain Nibbāna! Most of the suffering is experienced when one is born in the apāy $\bar{a}$ or the lower four realms, see, "The Grand Unified Theory of Dhamma."

- In order to actually realize the true suffering, whether in this life or in the lower four realms, one needs to contemplate (bhāvanā) with a healthy body and a clear mind.
- If one is hungry, one CANNOT understand the causes of suffering; rather one will be generating hateful thoughts. The same is true for all four necessities of life: food, shelter, clothing, and medicine. We NEED those things to survive.
- What we should NOT do is to over-indulge in any of the above four necessities of life. That is the other extreme that the Buddha said to avoid: "kāma sukallikānu yoga," or to over-indulge in sense pleasures, i.e., to live a hedonistic life.

4. It is commonly said that the Buddha advocated the "middle ground", i.e., to avoid both an ascetic life (with self-induced suffering) or a hedonistic (over-indulgent) life. That is true, but there is more to it.
There is a deeper meaning to "majjima paṭipadā." The way to a peaceful existence (or to Nibbāna) is to get rid of greed, hate, AND ignorance. The two extremes that we talked about above do involve hate or at least patigha or "friction" (when subjecting oneself to suffering) and greed (indulging in excessive sense pleasures).

- Just because one stays away from those two extremes does not necessarily mean one is on the "correct path." The Path is not just a "middle ground" between those two extremes.
- The key is to learn Dhamma and to systematically reduce greed, hate, and ignorance.
- Of course, living a life away from the two extremes is conducive - even necessary - to learn Dhamma and to gradually remove defilements from the mind.

5. In between those two extremes, one needs to avoid being influenced by an "intoxicated mind." In between the above two extremes, people also act in improper ways intoxicated by power, beauty, position, (book) knowledge, lineage, etc as well as by alcohol and drugs. This is due to avijjā or ignorance.

- Thus, "majjihma patipada" really means to follow a simple lifestyle without veering to the extremes.
- Thus majjhima patipadā is to follow a lifestyle that avoids the corruption of the mind by excess attachments to sense pleasures. On the hand, there is no need to subject one's body to unnecessary hardships either.

6. In summary, the Buddha recommended a "common sense" comfortable, but simple, life that is conducive to meditation. Here meditation (Bhāvanā) is not necessarily "formal meditation." The Buddha said, "bhāvanāya bahulīkataya," or "contemplate as often as possible." [bahulīkata :[pp. of bahulikaroti] took up seriously; increased. (adj.), practised frequently.]

- One also needs to be avoiding immoral actions, speech, or thoughts as much as possible, and actually cultivate moral actions, speech, and thoughts. That helps suppress the five hindrances (pañcan̄̄varaṇa) and have a peaceful state of mind, i.e., one could start experiencing the nirāmisa sukha that arises due to a "more pure state of mind."

7. One can be contemplating the nature of the world as one goes through daily chores. Another aspect of this is the ability to calm the mind; see, "Key to Calming the Mind."

- A bigger picture implied here is that we need to educate our children so that they can find good employment and thus be able to live without having to worry about those four necessities of life. As they grow up, we need to educate them in Dhamma (how to live a moral life) too, but not at the expense of them getting a good education.

8. Suffering is NOT the Noble truth on Suffering, i.e., Dukha (feeling of suffering) is NOT dukkha sacca (the Noble Truth that suffering can be stopped from arising); sacca pronounced "sachcha" and means "truth."

- The Noble Truth of dukkha sacca is about comprehending how suffering ARISES due to greed, hate, and ignorance (of this fact). One can understand that -and take steps to avoid future suffering - by learning Dhamma: anicca, dukkha, anatta, paticca samuppāda, etc.
- The Buddha said, "This Dhamma is unlike anything that the world has ever seen." The actual suffering is hidden WITHIN the apparent enjoyments. Also see, "The Incessant Distress (Peleema") - Key to Dukkha Sacca."
- For another description of majjhima patipadā, see, "Dhammacakkappavattana Sutta."

Next, "What is Unique in Buddha Dhamma?", .........

### 7.1.2.8 Does Impermanence Lead to Suffering?

Revised April 26, 2020; June 7, 2020; August 23, 2022
The following INCORRECT statements are in frequent use in most books in both Mahāyāna and current texts on Theravāda:

1. "We suffer because our bodies are impermanent; they are subject to decay and death."
2. "We suffer because those things we get attached to are impermanent."
3. "If something is impermanent, that leads to suffering."
4. "Since everything in this world is impermanent, everything is suffering", etc.

Is there a direct correlation between impermanence and suffering? Let us examine those statements.

1. "We suffer because our bodies are impermanent; they are subject to decay (aging), illness, and death."

- We indeed suffer because OUR bodies are impermanent and are subject to decay (aging), illness, and death. But if it is an enemy, do we suffer when that enemy gets sick or die? We suffer if someone we

LIKE gets ill or dies, but it is cause for celebration for most people when someone they dislike gets ill or dies.

- The suffering/happiness is directly proportional to the attachment/dislike we have for that person. Suffering due to the loss of one's child is more compared to the loss of a distant relative. Happiness due to Bin Laden's death was higher compared to the death of an unknown terrorist. (For a follower of Bin Laden, his death would have led to suffering).

Suffering arises when things do not proceed as we like. It is human nature to want loved ones to be unharmed and enemies to come to harm. When either does not happen, that leads to suffering. That is what anicca means: the inability to maintain things to our liking.

## 2. "We suffer because those things we get attached to are impermanent."

- Many things in this world cause us suffering because they will not stay in the same condition or are destroyed. That is true.
- But many other "permanent" things in this world (at least relative to our lifetime of 100 years) are associated with suffering. If one has an illness that becomes "permanent" would that not lead to more suffering?
- A gold necklace is not impermanent, i.e., it will last for thousands of years. But the woman who owns one may be robbed of it, and in the process, could get hurt too. She could not "maintain that necklace as she desired."

If ANYTHING causes us suffering, that is only because we cannot maintain it to our satisfaction, oru liking.

## 3. "If something is impermanent, that leads to suffering."

The following is the conventional (incorrect) translation of Buddha's words: "yad aniccaim taín dukkhamं," i.e., "if something is not permanent, that leads to suffering." But the correct translation is, "if something cannot be maintained to our liking, that leads to suffering." Let us consider some examples:

- If we have a headache, and if it is not permanent (i.e., it goes away), does that cause suffering? No. However, if the headache becomes permanent, that will lead to suffering.
- If we come down with cancer, wouldn't it cause happiness if it becomes impermanent?, i.e., if it goes away?
- If a relative (we do not like) comes to stay with us, would it lead to happiness if the stay becomes permanent or impermanent? Of course, it will cause us happiness if the stay is not permanent and the person leaves.

## 4. "Since everything in this world is impermanent, everything is suffering."

The Buddha never said everything in this world leads to suffering. If it is obvious that everything is suffering, then everyone will be looking to attain Nibbāna as soon as possible. The reality is that there are sensory pleasures in this world. Most people do not understand why one should go to all this trouble to "give up all these pleasures and seek Nibbāna."

- Looking at the "big picture" of the 31 realms in this world, there are many realms where suffering is much less. See "The Grand Unified Theory of Dhamma."
- But there is unimaginable suffering in the lowest four realms, and we need to avoid that. Even though there are 31 realms, MOST LIVING BEINGS ( $99.99 \%+$ ) are in the lowest four realms.
- Thus what is true is that this samisāric journey is filled with UNIMAGINABLE suffering. However, one cannot see that unless one learns true Dhamma.
- Even in this life, there is much suffering, especially as one age. The suffering is highest close to death if the death is due to an ailment. If one enjoys sex, that ability to enjoy sex will fade away as one gets old. It
does not matter how much money one has. Even our taste buds will not give us the same enjoyment from foods as we get old. All our sense faculties will start performing less and less as we get old. That is anicca. We cannot maintain things to our satisfaction in the long run.
- Even if we are born in a higher realm with much happiness, that existence cannot be maintained. One day, that life will be over, and one WILL end up in a lower realm at some point, and then it will be very hard to get out of there. That is anicca.
- Furthermore, if the cause of suffering is impermanence, then it cannot be eliminated, see, "Would Nibbāna be Possible if Impermanence is the Cause of Suffering?."
In Pāli (or in Sinhala), the word "icca" (pronounced "ichcha") means liking. Thus anicca (pronounced "anichcha") means not to like.

## Correct Interpretations

5. Therefore, the correct translation of "yad aniccain taï dukkhaï" is "if something cannot be maintained to our satisfaction, that leads to suffering." As the Buddha stated, you can take any example you like and verify that it is a universal principle, an unchanging characteristic of this world.

- See "Anicca - Inability to Keep What We Like" for details.

6. Without understanding the three characteristics of "this world," it is impossible to grasp the Buddha's message. Those three characteristics are anicca, dukkha, and anatta. Here anatta is pronounced "anaththa." These are the words in the Tipitaka written more than 2000 years ago, in 29 BCE.

- The problem started when these words were translated to Sanskrit as anitya, dukha, and anātma; this started probably as far back as the first or second century CE.
" Then those Sanskrit words were translated to English as impermanence, suffering, and "no-self." The two worst translations are impermanence and "no-self." See, "Misinterpretation of Anicca and Anatta by Early European Scholars."
- Those two Sanskrit words, anitya and anātma, are being used by many in Sri Lanka today as Sinhala words representing the translations of the "Pāli words", anicca and anatta. Furthermore, the Pāli word nicca (pronounced "nichcha") was translated to Sanskrit as "nitya" (pronounced "nithya") which means "permanent." The Pāli word nicca means "something can be maintained to one's satisfaction and, thus, is fruitful [subha]."
- However, nicca, anicca, and anatta are "old Sinhala" words with entirely different meanings than nitya, anitya, and anātma. Those words are not commonly used today, but when explained, a Sinhalaspeaking person can understand the real meaning. Indeed old ladies in villages in Sri Lanka still say "ane aniccan" ( (\%చ0 \% \&

7. The Buddha stated that those three characteristics, anicca, dukkha, and anatta, are related:
"yad aniccain taì dukkhaì, taì dukkhaì tad anatt $\bar{a} "$, or,
"if something is not nicca, dukha arises, and because of that, one becomes helpless [anatta]."

- In the long-term, not realizing the anicca nature leads to rebirths in the four lower realms (apāyā.)

8. As mentioned above, as one gets old or gets disabled, these three characteristics will be easier to see for oneself; but then it would be too late because the mind gets weaker as we get old. One needs to learn Dhamma BEFORE the mind (and the body) become weak. Here is a video that shows this clearly (of course, we all will go through such changes as we grow old):

WebLink: RANKER: Celebrities Who Have Aged the Worst

Also, see "Anicca, Dukkha, Anatta - Wrong Interpretations," and "Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?" for more details.

### 7.1.3.1 What is Unique in Buddha Dhamma?

Revised November 16, 2019; August 28, 2022; updated with new chart October 15, 2022

## All Religions Are the Same?

1. When I hear the frequent statement, "all religions are the same, $\backslash$ they teach you how to live a moral life," I cringe. That is because I think about all those unaware of the Buddha's actual message. In particular, this is the mindset of those who follow "secular Buddhism."

- Most religions indeed teach how to live a moral life. And there is also evidence that atheists may be as moral as religious people are; see "WebLink: Morality in everyday life-Science-2014-Hofmann."
- However, Buddha Dhamma goes beyond that. The Buddha said, no matter how well we live this life that will not help us in the long term, in the rebirth process.
- Yet, even to understand the message of the Buddha, one must live a moral life first.

## Two Paths Described by the Buddha

2. I have made a chart to illustrate the two types of Eightfold Paths explained by the Buddha:

This chart can be viewed in a separate panel by clicking on "Buddha Dhamma - In a Chart" and printed for reference. There are a few key things that need explanation first:

- The "mundane Eightfold Path" is depicted by the set of boxes in red, starting with "mundane samm $\bar{a}$ diṭthi." The next box depicts mundane versions of samma $\operatorname{sañkappa,~sammā,~vācā,~and~sammā~}$ kammanta." Which means "think, speak, and act morally to avoid bad outcomes/seek good outcomes" and so on until "mundane sammā samādhi."
- Most of these steps (not all) are in other religions and conventional or secular "Buddhism." They describe how to live a moral life. Most other religions aim to gain a (permanent) heavenly life at death.
- In the current distorted versions of "Buddhism," the joys of heavenly lives are highlighted. Sometimes one is encouraged to "enjoy such heavenly lives" before attaining Nibbāna. They don't understand the "anicca nature" of any realm in this world, i.e., they don't comprehend the Four Noble Truths. See "Paticca Samuppāda, Tilakkhana, Four Noble Truths."

## What Is a "Good Birth"?

3. This misconception in "Buddhism" arises because the rarity of a "good rebirth" has not been comprehended; see "How the Buddha Described the Chance of Rebirth in the Human Realm." This is why the Buddha said, "no happiness can be found anywhere in the 31 realms" (the true meaning of anicca).

- Even if a heavenly rebirth is attained in the next life, a future rebirth in the four lowest realms ( $a p \bar{a} \bar{y} \bar{a}$ ) cannot be avoided without attaining the Sotāpanna stage of Nibbāna. A phrase used by some bhikkhus in Sri Lanka goes as, "May you attain Nibbāna at the time of the Buddha Maitreya (next Buddha)." Why not attain Nibbāna in this life? Who is going to give guarantees that one will be born human during the time of the Buddha Maitreya? Everyone should use this rare opportunity to be human, to strive now!
- Until one comprehends anicca, dukkha, and anatta, one always values future happiness in permanent heaven (most religions) OR temporary happiness in heavenly worlds (traditional "Buddhists"). The difference between a traditional "Buddhist" and a Bhauddhaya is discussed in "A Buddhist or a Bhauddhaya?."
- One starts on the transcendental (lokuttara) or the Noble Eightfold Path when one comprehends the dangers of the rebirth process and BECOMES a Sotāpanna.
- When one is trying to attain that understanding, one is called a Sotāpanna magga anugāmi; see "Sotāpanna Anugāmi and a Sotāpanna."

## Two Eightfold Paths

4. In the "Mahā Cattārisaka Sutta (Discourse on the Great Forty)," the Buddha discussed that one must first follow the mundane eightfold path. That will remove the ten types of wrong views (micchā ditṭhi) listed in \#3 of that post. After that, one needs to comprehend the Tilakkhaṇa (anicca, dukkha, anatta) to some extent to start on the Noble Eightfold Path.

- Thus, one starts on the Noble Eightfold Path starting with lokuttara (transcendental) sammā ditthi of a Sotāpanna (set of blue boxes in the chart). One has seen a "glimpse of Nibbāna," i.e., one KNOWS that permanent happiness is not possible anywhere in the 31 realms and that whatever effort one makes to achieve such happiness is like chasing a mirage.

5. Note the difference in the box next to "samma diṭthi" in the two cases. In the mundane path, "samm $\bar{a}$ sañkappa, samm $\bar{a} v \bar{a} c \bar{a}$, sammā kammanta" are "moral thoughts, speech, and actions" intended to avoid bad outcomes and to seek good outcomes.

- In the Noble path, "sammā sañkappa, samm $\bar{a} v \bar{a} c \bar{a}, \operatorname{samma}$ kammanta" are "thoughts, speech, and actions" intended to stop the rebirth process. One does not do immoral things because there is "no point" in doing such things. One knows that such things are unfruitful and dangerous in the long run.
- And one becomes more compassionate towards all living beings (not just humans) because one can see that each living being suffers because of ignorance of the Buddha's key message. One also realizes that one needs to fulfill obligations to others to "pay back old debts"; one is bound to the rebirth process not only via cravings for worldly things but also via unpaid debts from previous lives.

## Noble Eightfold Path

65. The decision to become a Sotāpanna magga anugāmi (the path to the Sotāpanna stage) can be made anytime after getting to the "red boxes," i.e., while one is on the mundane Eightfold Path.

- In a way, a Sotāpanna magga anugāmi is a Bhauddhaya in the real sense. See "A Buddhist or a Bhauddhaya?" Even though not in the Tipiṭaka, sometimes the word "Cūla Sotāpanna" (pronounced "chūla Sotāpanna") is also used to describe the same person.
- The key is comprehending the "true nature of this world of 31 realms," Buddha described. That says it is impossible to achieve/maintain anything that can be kept to one's satisfaction (anicca.) Thus one gets to suffer (dukkha), and thus, one is truly helpless in the rebirth process (anatta). This realization is like lifting a heavy load that one has been carrying, the first taste of Nibbāna.

7. This "change of mindset" for a Sotāpanna is PERMANENT, i.e., it will not change even in future rebirths. One has attained an "unbreakable" level of confidence (saddh $\bar{a})$ in the Buddha, Dhamma, and Sañgha.

- And a Sotāpanna can follow the rest of the seven steps in the Noble Eightfold Path even without help from others. Thus one will attain the following three stages of Nibbāna (Sakadāgāmī, Anāgāmī, Arahant) successively by following those steps.

## Mundane Eightfold Path

8. In the Mahā Cattārīsaka Sutta, the Buddha outlined how one needs first to follow the mundane ("lokiya") Eightfold Path; see "Mahā Cattārīsaka Sutta (Discourse on the Great Forty)." This is the first NECESSARY step to eliminate the worst kinds of "gunk" that have been built up over countless past lives.

- The unique message of the Buddha has been hidden for hundreds of years. What is conventionally practiced today is just this mundane Eightfold Path. This is what we call "Buddhism" today.
- That superficial or "secular" Buddhism is not that different from what is advised by most other religions. Thus, it is easier for people to resonate with the mundane concepts in "Buddhism." Sammā Ditthi, for example, is considered the "correct vision" of "how to live a moral life."
- Of course, that is the first necessary step. That will help one to be able to experience the benefits of moral behavior (even in this life as a "nirāmisa sukha"; see "How to Taste Nibbāna") and then comprehend anicca, dukkha, and anatta, and embark on the Noble Eightfold Path to seek permanent happiness or Nibbāna.

Next, "A Buddhist or a Bhauddhaya?",

### 7.1.3.2 A Buddhist or a Bhauddhayā?

Revised August 18, 2016; revised April 25, 2019; April 22, 2022; re-written September 12, 2022

## Buddhism Versus Buddha Dhamma

1. The terms "Buddhism" and "Buddhist" were invented by English, French, and German historians in the nineteenth century when they frst came across Buddha Dhamma in India, Sri Lanka, and other Asian countries. The Pāli word for a Buddhist is "Upāsaka," and the Sinhala word is Bhauddhayā.

- The discovery of the "Asoka pillars" in India was followed by the discovery of the Pāli literature on Buddha Dhamma in Sri Lanka and other countries such as Burma and Thailand (together with translated Chinese Āgama scripts); of course, there were no practicing "Buddhists" or any Buddhist literature in India.
- See "Historical Background" for details.

## Buddha Dhamma - Ending of Future Suffering

2. Here are two key points that should be the basis for defining the terms:

- Up to that time, it was "Buddha Dhamma" or the "Dhamma or Teachings of the Buddha."
- The word Buddha comes from "bhava" + "uddha"; here, "bhava" means "existence (in the 31 realms)," and "uddha" means "removal." Therefore, Buddha is one who figured out how to stop the rebirth process and thus end future suffering. Every birth ends in old age and death; there are no exceptions.
- And a person who diligently followed the Path advised by the Buddha was called a "Bhauddhay $\bar{a} "(=b h a v a+u d d h a+y \bar{a}=$ one who strives to stop the rebirth process, i.e., to stop suffering).
- Thus, if religion is defined as "faith-based salvation," Buddha Dhamma is not a religion. It is a new worldview that can lead to stopping future suffering. Faith in that new vision will grow as one's understanding improves.

## Bhauddhay $\bar{a}$ and Up $\bar{a} s a k a$

 word for a lay Buddhist is "Upāsaka." Both words are being used in the Sinhala language today.

- The word upāsaka probably came from "upa" + "āsava" + "khaya," where those words mean "stay close to," "defilements," and "eliminate" or "wear away."
- Thus, it means someone who stays close to the goal of eliminating defilements (lobha, dosa, and moha) leading to Nibbāna. Hence both words have the same meaning.

## Most Adherents Today Are "Secular Buddhists"

4. When I hear the common statement, "all religions are the same; they teach you how to live a MORAL LIFE," I cringe. I think about all those people unaware of the Buddha's actual message. In particular, those who follow "secular Buddhism" have not realized the true value of Buddha Dhamma.

- Most people today have been exposed just to bits and pieces of Buddha Dhamma. Many do not believe in rebirth and are happy to be called "secular Buddhists." See "WebLink: en.wikipedia.org: Secular Buddhism."
- They are happy to follow the precepts of moral conduct, do breath meditation to relieve the stresses of modern life, and see where that leads them; see the discussion at "WebLing: PureDhammaForums: Goenka's Vipassana."
- That is a perfectly good starting point. But Buddha Dhamma is much deeper and can lead to a state without suffering, i.e., Nibbāna; see, "Nibbāna." Also, see "Buddhism without Rebirth and Nibbāna?"
- In addition, it is the best way to learn about this world. I have spent over ten years of my life to learning Buddha Dhamma, and I am still learning! It is an exhilarating experience.

## Misconceptions of Secular Buddhists

5. Each person understands Buddha Dhamma differently, mainly based on the level of exposure to "correct Dhamma." Most people have the following misconceptions:
i. Buddha Dhamma provides temporary relief (version of nirāmisa sukha) from mental stress (as in breath meditation).
ii. Some others believe mediation will help alleviate suffering from physical ailments.

- While (i) is correct, it is only a minor benefit. The main benefit is to stop future suffering in the rebirth process.
- Those who believe in (ii) turn to Buddhism too late, but better late than never! It is easier to grasp the worldview of the Buddha when the body and the mind are in good condition, i.e., when one is healthy and the mind is alert.

## Hidden Suffering in the Rebirth Process

6. The main message of the Buddha goes beyond "living a moral life." He pointed out two forms of hidden suffering that average humans are not aware of:
i. That incessant distress or agitation we all feel in $\# 5$ above arises due to greed, hate, and ignorance (of moral values first, then the ignorance of the true nature of this world at a deeper level.)
ii. Immoral deeds we commit due to these greedy, hateful, or ignorant mindsets will lead to much higher forms of suffering in future rebirths (especially when born in animals and other lower realms).

## Buddha Dhamma Is the Ultimate Science

7. In world religions, faith in religion is mostly "blind faith." Buddha Dhamma is more of a science than a religion. For example, one does not need to believe in rebirth with blind faith. There are two avenues to explore.
i. There is mounting evidence for rebirth; see "Evidence for Rebirth" and "Near-Death Experiences (NDE): Brain Is Not the Mind."
ii. Even more importantly, the worldview of the Buddha is self-consistent with rebirth among 31 realms of existence built-in. See "Origin of Life."

- However, those new to Buddhism need to start gradually. It is good to read "Starting on the Path without Belief in Rebirth" and "Is It Necessary for a Buddhist to Eliminate Sensual Desires?" frrst.

8. Closely related to rebirth is the fact that we can be reborn among 31 realms of existence. Thus, in addition to the human and animal realms, there are 29 more realms that we are not aware of.

- Thus, the "wider worldview" of the Buddha can be briefly summarized as follows:
(i.) Any living being will be reborn among the 31 realms,
(ii.) Most rebirths are in the lowest four realms, and one of those is the animal realm (that is why the rebirth process has more suffering)
(iii) Rebirth process happens naturally according to kamma accumulated via good/bad deeds.
- The first step to be released from that future suffering is to learn the wider worldview of the Buddha. This website is dedicated to explaining the Buddha's worldview.

## One Becomes a Bhauddhayā/Upāsaka by Learning Buddha's Worldview

9. There are no rituals to become either a "secular Buddhist" or a Bhauddhay $\bar{a}$. As one becomes convinced of the Buddha's worldview and starts seeing the truth of the "wider worldview," one becomes a better Buddhist or a Bhauddhayā.

- As one becomes a Buddhist/Bhauddhayā, his/her personality may start changing without forcefully changing it. That is because one starts seeing the world differently and reacting to outside events differently. It is all about changing perceptions about "this world," i.e., it is all mental.
- Because of this, one cannot become a Bhauddhayā or even a good Buddhist by just following rituals. One becomes a good Buddhist/Bhauddhayā by attempting to comprehend the message of the Buddha and by experiencing the benefits as one progresses.

## Making Gradual Progress

10. "Dhamma will guide and protect one who lives by Dhamma" ("Dhammo ha ve rakkhati Dhammacāri.') If one starts becoming a Buddhist/Bhauddhayā, one will be able to see the changes in oneself as time goes by (others will start noticing after a bit longer). One's likings and associations are the first to change.

- A Bhauddhayā/Upāsaka starts to realize the futility of staying anywhere in the 31 realms and will eventually attain the first stage of Nibbāna, i.e., become a Sotāpanna.
- A Sotāpanna would be automatically released from future births in the apāyās or the four lowest realms, including the animal realm.
- How that happens is described in other sections of the site, especially in the section "Sotāpanna Stage of Nibbāna."
- Another key point the Buddha made was no "soul-like" entity moves from birth to birth. Future births occur due to causes and conditions as described in Paticca Samuppāda. See "What Reincarnates? Concept of a Lifestream."
- The main teachings of the Buddha are embedded in "Paticca Samuppāda, Tilakkhana, Four Noble Truths."

## Summary

11. Many people (especially those new to Buddhism/Buddha Dhamma) waste time by plunging headlong into reading deep suttas. That is like trying to learn mathematics without understanding addition/subtraction.

- One MUST first understand the "new vision" presented to the world by the Buddha; it is previously unknown to the world. It follows the same principle of causality followed by modern science. The Buddha's version is Paticca Samuppāda. It explains in detail how future rebirths occur due to one's mindset and actions. Suttas on Paticca Samuppāda start with the "WebLink: suttacentral: Paticcasamuppāda Sutta (SN 12.1)."
- Another key point I did not discuss above is the importance of living a moral life. It is easier to grasp the deep Dhamma with a cleansed mind with less greed, hate/anger, and ignorance (of moral values); see "Sila, Samādhi, Paññā to Pañ̃̃̄̄, Sila, Samādhi." Thus, starting as a "secular Buddhist" is perfectly fine.

### 7.1.3.3 Where to Start on the Path?

This is a very important post. Please read the post through without clicking on any link first, in order to get the main idea that I am trying to convey. You may want to re-read the post several times, clicking on the links to find out more as you digest the key points. Actually, this is true of all the posts: It is better to read through a given post first to get the main idea, and then to look into the details provided by the links as needed.

- Anyone reading this website has been exposed to Buddha Dhamma in the past; by "past" I mean beginning-less time. Each of us have been "living" and "dying" innumerable times, in most of the 31 realms of existence; see, "The Grand Unified Theory of Dhamma." Even though a Buddha appears in the world after very long times, there have been innumerable Buddhas too. Some of you may not believe this, and that is fine. It may make sense later on.

Each of us has listened to a Buddha delivering a discourse, attained the highest $j h \bar{a} n \bar{a}$, and also been born in the animal and niraya (the lowest realm) too. Our character and habits may have changed from "good" to "bad" many times over. Infinite time is very hard to grasp with the mind; see, "Sansāric Time Scale," and "Infinity - How Big is it?." Also, you may want to read the excellent book, "The Beginning of Infinity" by David Deutsch (2011) IF you are interested in a "scientific opinion"; actually, the descriptions are very similar in both cases in the sense that many things that sound implausible are not scientifically implausible, and in fact are necessary to explain the scientific data.

- As in this life, it is easy to remember relatively recent events in the sansāric journey. Those who can remember past lives, remember only the past one or few lives; see, "Evidence for Rebirth." The "habits" and "tendencies" that we have are the ones that we have had in the recent rebirths.
- Therefore, for some people, it may be easier to get into a jhāna (or to have a good meditative experience) just because they have had that experience in more recent lives; for another person, it may be harder just because that person may not have had that experience for very many births in the recent past.

One should not be discouraged if one's understanding of Dhamma or "meditation experience" seems to be different from what one hears from others. The important thing is to first determine where one is in the relative scale of things and start at the right place. Most times there is no correlation between this evaluation and one's "book knowledge" either.

One could use the basic guidelines provided by the Buddha. There are five stages starting with dana and ending with nekkhamma:

- Dana (giving, generosity, caring for others' well being).
- Sīla (moral conduct).
- Sagga (literally heaven, but meaning calm and peaceful mind).
- Ädeenava (seeing the fruitlessness and the danger of the 31 realms or the rebirth process).
- Nekkhamma (losing attachment to "things" in the 31 realms, and working diligently towards Nibbāna), which in turn leads to nissarana (stop this suffering-filled rebirth process) and thus Nibbāna.

These are not clear-cut steps, but are guidelines.

1. Most people, irrespective of the religion, are generous and enjoy giving. Just like silla below, dana induces happiness in oneself.
2. In Pāli it is silla (pronounced "seela"); in Sinhala it is "seelaya" ("sisil" means cooling down and "laya" means heart, so cooled heart), and thus is a bit more explanatory.

- Any act that makes one's heart to cool down is an act of silla, i.e., it is moral conduct.
- When we act with compassion, say give a meal to someone hungry or help out an elderly person to cross the street, it makes our heart cool down. On the other hand, when we do something immoral or inappropriate, our heart gets agitated and the heart rate goes up, and the whole body heats up; also see, "How to Taste Nibbāna."
- It is the same compassion, extended to other living beings as well, that makes up the basis of the five precepts: avoiding any act that is harmful to any living being; see, "The Five Precepts - What the Buddha Meant by Them."
- The humans are at a much higher "consciousness level" compared to animals, so we need to pay special attention not to even hurt the feelings of another human being; see, "How to Evaluate Weights of Different Kamma." It is a good habit also to cultivate metta (loving kindness) to all beings; see, 'Kamma, Debt, and Meditation."

3. When one gets to the Sagga stage, it is relatively easy to calm the mind. One starts feeling the nirāmisa sukha (see, "Three Kinds of Happiness - What is Nirāmisa Sukha?") or the happiness of "cooling down" by voluntarily "giving up" (and sharing with others) things that one used to be quite possessive of. It is very subtle. One cannot just start giving everything that one owns; that will only lead to patigha or internal friction. In addition, one has responsibilities and debts to pay; see, "Kamma, Debt, and Meditation."

- Different people get "agitated" due to different "triggers." This is because we have very different sansāric habits: things we really like and things we really dislike; there are several posts on these habits and
"āsavas." It is a good idea to make a self-assessment, figure out the "bad triggers" and make an effort to remove them.
- For example, if one has an "explosive temper" it is a good idea to make an effort to restraint oneself and also to do metta bhāvana $\overline{\text { a }}$. It is important to realize that the anger is within oneself; it is not in an outside person or thing. I could get mad by thinking about person A, but there are many other people who have loving thoughts about the same person A. Same with greed, it is inside of us, not outside. These all originate from our sansāric likes and dislikes.

4. While it is hard for some to even start thinking about the 'bigger picture" of the 31 realms, and the possible suffering in future rebirths, some others may have thought about this "in the recent past in the sansāric rebirths", and thus may be motivated to explore more.
5. The last stage is for those who have "seen the big picture" and the dangers of staying "in this world of 31 realms", or at least have some inkling of it. When one starts feeling the nirāmisa sukha strongly, and also start seeing the suffering to come in the lower realms, giving up the rebirth process becomes an urgent need, instead of being anxious about "giving up rebirth." Again, this cannot be forced. One will feel it when one's mind is ready.

- This website has posts that could be helpful in any of the above categories. One needs to look around and find the suitable topics; even though I have tried to put posts into different categories, there may be posts suitable for anyone in any category.
- My intention is to add material at all different levels, mainly up to the Sotāpanna stage of Nibbāna. I hope that will help a wide spectrum of people and also illustrate that Buddha Dhamma describes the ultimate natural laws not only about our human world, but of all existence. Buddha Dhamma is not just a philosophical theory; one can actually experience the improvement in one's quality of life as one follows the Path.

September 13, 2016: I recently started a new section, "Living Dhamma" detailing a step-by-step process on how to get started on the Path. One could get started even without belief in rebirth or the existence of 31 realms. There we start by looking at the (hidden) suffering experienced in this life and how to eliminate it.

### 7.1.3.4 Recent Evidence for Unbroken Memory Records (HSAM)

## Revised October 6, 2018; May 18, 2020; August 27, 2022

1. A normal human can remember some "significant events" even from the early days of this life. And these memories are not just a "summary," but we recall a significant event in detail. It is like playing back a videotape. We recall the scene with pictures, sounds, the background, everything. Just recall some past events, and one can verify that for oneself.

- Many cases of "memories from past lives" are reported mostly by children. But there are also accounts by some adults under hypnosis; see "Evidence for Rebirth."
- There is scientific evidence that our memory records are kept in minute detail and can be accessed at a moment's notice. Such "detailed records" are "nāmagotta" in Buddha Dhamma. See "Where Are Memories Stored? - Viññāna Dhātu" and "Nāma Loka and Rupa Loka - Two Parts of Our World."
- However, an average human can recall only a small fraction of past events.

2. Strong evidence is beginning to emerge that there is a "complete record" of one's past (in this life) just like a videotape. These studies started with Jill Price, who contacted a team of scientists in the early 2000s about her ability to recall anything from 1974 onwards. Here is a video of her with Diane Sawyer on an ABC News program:

## WebLink: YOUTUBE: The woman that never forgets

3. Note that she says she can "see" what happened that day. It is not like she is recalling a "summary" or the gist of what happened. She can recall the whole episode in detail. Even the day and date come out effortlessly.

- A team of scientists has studied her for five years and published a paper providing their findings: A Case of Unusual Autobiographical Remembering-Parker-2006
- She has written a book about her experience: "The Woman Who Can’t Forget", by Jill Price (2009).
- Jill Price's story led more people to come forward with their experiences, and ten more such individuals have been studied in detail recently: WebLink: Behavioral and neuroantomical investigation-LePort2012.

4. These individuals have "highly superior autobiographical memory," or HSAM. According to those two papers above, they are not any smarter than average people,. The ability to recall their past much more extensively is a "puñ̃̄̄a iddhi" of a special kamma vipāka in Buddha Dhamma. They can focus on any date in the past and "watch" what happened. Then they can say what the weather was like, who they were with, whether any significant world event took place that day, etc.

- This phenomenon is also known as Hyperthymesia; see, WebLink: WIKI: Hyperthymesia. Several other cases of HSAM are mentioned here.

5. Scientists believe that our memories are "stored" in the brain and synapses between neurons. I firmly believe that they will be proven wrong. This research is still in its infancy, but there has been an explosion of activity within the past 15 years.

- While it is true that synaptic wiring is responsible for habit formation (see "How Habits are Formed and Broken - A Scientific View"), it is a stretch to assume that "video-like recordings" of all past events are somehow embedded in neural connections!
- People without HSAM have false memories (or no memories) of past incidents that were insignificant to them. But their memories about significant/traumatic memories are astoundingly accurate.

6. There are a couple of key significant facts that come out of these studies on HSAM subjects:

- They can instantly access a "time slot" from many years back that is arbitrarily chosen by someone else. They "re-visit" that time slot and describe, in real-time, what took place in detail.
- Since it has been confirmed in 11 subjects, it is not a "random event."
- It is a stretch to assume that all such details for over 20 years can be stored in biological membranes that regenerate change continuously.
- It is not a matter of being able to remember. Jill Price describes extensively that it is hard for her to remember any "learning material"; she was an average student.
- Rather, it is a matter of having a "correctly wired" brain to access the "video recorder-like" memory stream in viññāṇa dhātu. It is not something one can develop by studying hard.

7. In Buddha Dhamma, the life of a sentient being is not restricted to the current life. As described in the previous post ("What Reincarnates? - Concept of a Lifestream"), any given sentient being has been born an uncountable number of times, with no "traceable beginning."

- And a record of each of those lives is kept intact in the "mind plane" and can be accessed to different degrees by different people.
- And people who develop abhiñ̃̃̄̄ powers via $j h \bar{a} n \bar{a}$ (need to get to at least the fourth $j h \bar{a} n a$ ) can develop Jill Price's capabilities and more; they can go back hundreds to thousands to billions of years depending on the level achieved.

8. According to Buddha Dhamma, the brain is just like a computer that helps extract these memory records from the "mind plane." The mechanism is similar to a television extracting a broadcast signal; I will write a post on this later.

- These memory records are called "nāmagotta" (pronounced "nāma goththā") and they go back for eons and eons, and even a Buddha cannot see a beginning; see "Memory, Brain, Mind, Nāma Loka, Kamma Bhava, Kamma Vipāka."
- We can recall only bits and pieces even during this life because our minds are covered by the five hindrances (pañca n̄̄varaṇa); see "Key to Calming the Mind - The Five Hindrances."
- Ancient yogis who could get to the eighth jhāna could see all past lives in the present eon or kappa. But the Buddha could see numerous eons within a short time.
- This is why it is mostly children who can remember past lives. As they grow up their minds get "contaminated" more and more, and these memories are lost. And those cases are different from the HSAM subjects.
- It appears that those individuals with HSAM have some of the capabilities of those who have developed abhiñ $\bar{n} \bar{a}$ powers. Since those with HSAM have been reported to have somewhat different brain structures, it will be interesting to see whether those with abhiñ $\tilde{n} \bar{a}$ powers have similar brain structures as people with HSAM. I believe that it is a matter of the brain wiring to be able to "receive" more information from the "mind plane."

9. Here is a video on the amazing accounts of a few people with memory capabilities.

Superhuman Geniuses (Extraordinary People Documentary):
WebLink: youtube: Superhuman Geniuses (Extraordinary People Documentary)

- More than anything else, they confirm the fact that memories are held intact in the mano loka or the "mind plane"; see, "The Amazing Mind - Critical Role of Nāmagotta (Memories)."
- The brain is the interface between the base of the mind (hadaya vatthu) and mano loka; see, "Brain Interface between Mind and Body." It is just that a few people's brains can do better in recalling those memories compared to others.

## Next, "Buddhism without Rebirth and Nibbāna?",

### 7.1.3.5 Buddhism without Rebirth and Nibbāna?

## Revised August 18, 2016; February 14, 2020

I participated in several internet forums on "Buddhism" over 2013 and a part of 2014. One thing that clearly stands out is the fact that there are many people who like Buddhism, but they cannot understand what the big deal is about rebirth, and they cannot comprehend what Nibbāna is. Thinking is: Why can't we have Buddhism without rebirth (because I do not believe in rebirth) and Nibbāna (because that seems to be too complicated)?

## They are turned off by the concept of rebirth and are mystified by the concept of Nibbāna.

- Rebirth. I think that the first issue lies in the fact that most major religions are based on three levels of existence: This life, and one of two eternal stages of life thereafter; committed to either heaven or hell for eternity based on what one does in this life. That model is very simple. Buddha's 31 realms of existence with many "unseen beings" seems to be far fetched. Also, the possibility of being reborn as an animal is an abhorrent thought similar to the one people had about "evolving from the monkeys" before the theory of evolution.
- Nibbāna. The second issue has become a problem mainly because of Mahāyāna doctrines. Mahāyāna sect arose basically out of the philosophical analyses of Nibbāna by Nagarjuna, Asanga and other

Mahāyāna forefathers. They could not understand the concept of Nibbāna or what happens to an Arahant when the Arahant dies. So, they came up with concepts like suñyata (suññatā) or emptiness; see, "What is Suñyata or Suñ̃aata (Emptiness)."

1. There are two co-existing facets of Buddha Dhamma:

- The Buddha said, "This Dhamma is unlike anything that the world has ever seen." It really needs a paradigm change to get into the "new perspective about this world view of the Buddha." One needs to be able to put aside all preconceived notions to understand the core message.
- However, the Buddha also said, "My Dhamma is good in the beginning, good in the middle, and good at the end." There is something to be gained from Buddha Dhamma for people who just came to know about it. This is why I have separated posts into three categories on the site.
- In Bhikkhu Bodhi's book, "In the Buddha's Words", there is a chapter on "The Happiness Visible in this Present Life", where Buddha's discourses to those who did not have aspiration to attain Nibbāna but were interested in pursuing moral lives, are described.
- The concepts such as rebirth and Nibbāna are paradigm-changing concepts. But as one follows what one understands, these concepts will become clear; I have summarized these two concepts below. But it will take much more effort and reading many more posts if one is really interested in understanding Buddha Dhamma.

2. For those who do not believe in rebirth, there is a simple way to get started without having to believe in the rebirth process. I strongly suggest the following post: "Starting on the Path Even without Belief in Rebirth."
3. However, at the end - If one is to benefit fully from Buddha Dhamma - one needs to understand its core message. And that core message is that this life is only but an insignificant time in the cycle of rebirths that we have been on from eternity, and that "our world" is much more complex than we see with 31 realms instead of the two (human and animal realms) that we see. Even more significantly, the suffering in many of the lower realms of existence is much worse than that in the human or even the animal realm.

- That is a LOT of things to accept as a basis. But we are fortunate compared to those who lived even a hundred years ago. Because now we have EVIDENCE to back up this wider world view of the Buddha; see, "Dhamma and Science - Introduction."
- And both major Mahāyāna sects as well as Theravāda Buddhism believe in rebirth and the concept of Nibbāna. All Buddhists (except the type of Stephen Batchelor, who has written some popular books on Buddhism) believe in rebirth and Nibbāna. I have seen the label "secular Buddhism" being used to describe those who like other aspects of Buddhism (basically moral living and meditation), but not necessarily rebirth and/or Nibbāna.
- Thus a Buddhist not believing in rebirth/Nibbāna is an oxymoron. The Pāli or Sinhala word for Buddhist is "Bhauddhaya" meaning "a person trying the stop the rebirth process" ("Bhava+uddha"). One meaning of Buddha Dhamma is "path or method of removing bhava and thus stopping the rebirth process." Buddha means, "one who has removed bhava (and attained Nibbāna)."
- However, There is no need to forcefully accept rebirth, which gives rise to sansāric suffering. One can start at a point where one can actually experience the other type of hidden suffering in this life that most people can locate and remove: "Starting on the Path Even without Belief in Rebirth."

4. Therefore, one can be a "secular Buddhist"; that could be an intermediate state before becoming a Buddhist. We just need to get the concepts clear. Since there is no formal established way to declare oneself a "Buddhist" (or a need to do that), it is really in one's own mind whether one is a Buddhist or not. The Buddha clearly stated that each person is at his/her own level of understanding. And there is no need to pretend; what one believes is what it is. The critical thing is to make sure one is fully informed.

- One does not become a Buddhist by reciting the precepts. One becomes a Buddhist gradually as the mind embraces the world view of the Buddha and realizes that the real happiness is attained by
comprehending the true nature of this world: anicca, dukkha, anatta, and eventually by stopping the rebirth process.

5. In the mean time, it is important to realize that certain wrong views are bound to have adverse consequences according to Buddha Dhamma. Established (firm) view that there is no rebirth process is one included in micch $\bar{a}$ dittthi, which is one of the (strong) dasa akusala, that makes a birth in the apāy $\bar{a}$ (four lowest realms of existence) possible. It is not necessary to firmly believe in rebirth, one should at least leave that as a possibility. What is critical is not to have niyata (established) micchā dittthi.

- Faith in Buddha Dhamma is different from that in other religions; belief in rebirth or Nibbāna are not tenets. One either believes in them or one does not; see, "Is Buddha Dhamma (Buddhism) a Religion?." One MAY change one's view after looking at the facts, and especially if one can experience the release from one kind of suffering; see, "Starting on the Path Even without Belief in Rebirth"

6. Finally, it will take a real effort to sort through all different versions of "Buddhism" that are out there. Over two thousand five hundred years, just like now, people have tried to "mold" Buddha Dhamma to a form to their liking, and that is why we have so many versions. But when that is done, the uniqueness, the real message, gets lost. We need to keep intact this unique message, with the understanding that not everyone comprehends it right away.

- The key is to discard any version or aspect that does not provide a consistent picture. Buddha Dhamma describe the laws of nature, and there cannot be any inconsistencies. That is what I try to do with this website. If you see something inconsistent on the website, please let me know.
- I use the Tipiṭaka (Pāli Canon) as the basis. It was written down over two thousand years ago (by Arahants who had experienced Nibbāna), and is the oldest document encompassing the three main teachings: Suttā, Vinaya, and Abhidhamma.
- I have documented the flaws in both Mahāyāna and (to a lesser extent) in current Theravāda books by pointing out the inconsistencies with the Tipitaka. Also, I show that everything is self-consistent, which is the scientific basis to illustrate the validity of a theory. Newton's theory on gravity had to be modified because they were not consistent with finer measurements.
- It does not matter what we believe personally. We need to find the true laws of nature that the Buddha discovered. Laws of nature, like gravity or laws of motion, do not care about what we believe; see, "Why it is Critical to Find the Pure Buddha Dhamma."
- Buddha Dhamma (in its pure form) has withstood all tests to date; see, "Dhamma and Science Introduction." Both current Mahāyāna and Theravāda teachings need to be revised back to the original. It can be proven that there are self-contradictions within both sects in addition to contradictions with the teachings of the Buddha. I have a series of posts that point out these "problem areas" starting with, "Key Problems with Mahāyāna Teachings."

Having established that rebirth and Nibbāna are the "lifeblood" of Buddha Dhamma, now we can turn to the next question: What evidence is there to "prove" rebirth? What is the big deal about Nibbāna, which sounds so esoteric?

## A. REBIRTH

I have summarized some of the existing evidence for rebirth; see, "Evidence for Rebirth." I am not sure what will qualify for "proof", but one thing is very clear: A strong case can be made for it. There is evidence from many different areas, and that are consistent with the Buddha's other teachings, for example, the existence of a manomaya kāya; see, "Manomaya Kāya and Physical Body."

- If a person can believe even a SINGLE piece of evidence presented there, it is not possible to explain that without accepting that there is a link between such two lives. Since there is no physical connection between the two lives (that existed many miles apart), the connection must be outside the physical realm, i.e., the mental energy. There is new evidence from "quantum entanglement" that is consistent with the
presumption that everything in this world is inter-connected; see, "Quantum Entanglement - We Are All Connected."
- However, one can actually verify the rebirth process by developing abhiñña powers via developing the fourth jhāna. One can then "see" one's previous lives; see, "Power of the Human Mind - Introduction" and the follow up posts. And there are some who have developed such abhiñ̃̃̄̄ powers, and this number can be expected to grow. When a significant number of people can verify the rebirth process, it will be accepted. Today, not everyone has traveled outside one's own country. But everyone accepts that all those countries exist, because they believe the accounts of those who have made visits.
- And recent evidence confirm that there is indeed an unbroken memory record, at least in this life; see, "Recent Evidence for Unbroken Memory Records (HSAM)."

## B. NIBBĀNA

1. "Bāna" in Pāli and Sinhala means "bondage"; thus Nibbāna means becoming free of bondage (to this world). We are bound to the unending cycle of rebirths via ten fetters called "sanyojana = "san+yojana"; see, "What is "San"? Meaning of Sansāra (or Samsāra)"; yojana means bond. Samyojana rhymes like called samyojana and that is normally written.

- The ten samiyojana are removed via the four stages of Nibbāna: three at the Sotāpanna stage, two reduced at the Sakad $\bar{a} g \bar{a} m \bar{\imath}$ stage and removed at the $A n \bar{a} g \bar{a} m \bar{\imath}$ stage, and the remaining five removed at the Arahant stage.
- Removal of the ten samyojana also removes greed, hate, and ignorance from our minds; the nirāmisa sukha increases step-wise at each of the four stages, and the "cooling down" or "nivana" becomes complete; see, "How to Taste Nibbāna." There are many synonyms for Nibbāna, and nivana (or niveema) is one of them. The Sanskrit name "nirvana" does not convey any of these meanings.

2. When the mind becomes pure, a being is simply not reborn anywhere in the 31 realms. The mind has attained full release, and unconditioned happiness called nirāmisa sukha. Thus Nibbāna is stopping the rebirth process; the suffering stops. it is as simple as that. That mind cannot grasp even a fine form of a material body (which is subject to decay and death) anywhere in "the 31 realms." The mind becomes free of a body that is subject to decay and death (suffering). That is Nibbāna.

- The Nibbānic experience cannot be described by the terminology of "this world"; it is transcendental or "lokuttara," beyond "this world"; see, "Nibbāna "Exists", but Not in This World."
- Also, all we can say about what happens to an Arahant at his/her death is that he/she will not be reborn in "this world" of 31 realms. There is no more suffering. The mind is free of bondage to a physical body that leads to so much suffering.
- Many people say, "What suffering? I do not feel that much suffering." But the real suffering is in the lowest four realms; that is why the complete picture of 31 realms of existence is important. Furthermore, there is much suffering that is masked, especially when one is young. As one gets old, it is inevitable that one will start experience suffering at a higher degree, and then face death. Here is a video that illustrates this point:

## WebLink: YOUTUBE: Aging Stars of the Golden Age

3. However, the point is NOT to get depressed about this inevitability. Some people get depressed thinking about old age, and try to "give up" everything to follow the Path of the Buddha.

- It is not even possible for someone who is not familiar with Buddha Dhamma to start working on attaining Arahanthood straight away, and it is not advised either. It needs to be done with understanding. As one follows the Path, and learns Dhamma, one could start feeling early stages of Nibbānic pleasure (nirāmisa sukha) and thus will start having fact-based faith on concepts like rebirth and Nibbāna: see, "Three Kinds of Happiness - What is Nirāmisa Sukha?."
- Have you seen any depressed Buddhist monks? They have given up the worldly pleasures voluntarily, NOT with the mindset of a depressed person. Depression leads to hate; true "giving up" is done with wisdom.

This is only a summary. All these are described in detail with supporting evidence at this website. The key point is that EVERYTHING we observe, all we experience CAN be explained with the complete "world view" of the Buddha of which rebirth and Nibbāna are essential foundations.

One does not need to know all that if all one needs is a peace of mind. One could follow the basic guidelines for a moral life that the Buddha provided. However, his key message was that this 100year life can be only be compared to a "drop of water in a huge ocean" that is the cycle of rebirths filled with suffering. Thus one should at least critically examine the evidence to see whether that message needs to be taken seriously.

### 7.1.3.6 "Self" and "no-self": A Simple Analysis - Do We Always Act with Avijjā?

October 23, 2015; revised August 14, 2019; July 30, 2022
I like to address two comments that I recently received. Questions such as these bring out significant issues that help clarify fundamental concepts.
***
First comment (by Mr. Alexander Ausweger):
Premises:
(1) The number of rebirths of a single sentient being before now is infinite.
(2) The probability of becoming an Arahant in one life-phase (from birth to death) is minuscule but not zero. (The possible probability-values range from 0 to 1 as usual in probability theory).

Conclusion: In an infinite number of rebirths, the probability of reaching Arahantship would be one, which means that everyone would already have left samisāra.

Conclusion: Since we are still here, one of the premises must be wrong.
***
Second comment (by Mr. Chamila Wickramasinghe):
"....in akusala-mūla Pațicca Samuppāda, since "avijjā anusaya" is remaining for a person below the Arahant stage, is there not a single "citta-kshana" (or citta) that arises without avijjā? .."

```
***
```

There is a perception of well-defined "self" embedded in both the above comments. That there is "a well-defined sentient being" that goes through a cycle of rebirths. Since we use names to label a person, that automatically gives the impression of a non-changing "self." Thus it is a bit hard to remove this "sense of a self" from our minds.

- The other side of this issue is the common misconception that "anatta" means "no-self." That is correct in a strict sense. However, there is a sense of a "self" until one attains Arahanthood. The other meaning of "anatta" is "being helpless" and "subject to suffering" as long as one has the perception of a "self."
- That is why the Buddha said it is wrong to believe that there is a "self." It is also incorrect to think that "there is no self." That is a bit difficult to comprehend at first; that is why the Buddha said, "My Dhamma has never been known to the world...". So we will discuss some examples to clarify why both these views are incorrect.

Let us first discuss the First comment. The answer to the second comment will become apparent during that discussion.

1. The critical issue brought out by the first comment is the first premise: By assuming that "there is a single sentient being..." we are distorting the actual reality. That says there is a "soul" or "self." To assign an absolute identity, there must be something unchanging in it.

- Now, let us discuss HOW the Buddha explained that the above premise is incorrect.
- At the time of the Buddha, many believed in a "ātma" or a "soul" or a "self." When asked what is a "person" is unique to give that absolute identity, some said it was one's body ( $r \bar{u} p a$ ). Others said either one's feelings (vedanā), one's perceptions (saññā), one's actions (sañkhāra), one's thoughts (viññāna), or some combinations of the above five. However, we are not talking about pañcakkhandha here, i.e., not rūpakkhandha etc. I will write a series of posts later to clarify the difference.
- There is nothing else that can be called "one's own."

2. The Buddha explained in detail why none of the above remains the same in a "given person." Let us take a simple example to understand the basic idea. Let us consider person A when entering and leaving high school.

- Did any of the five categories (rūpa, vedanā, saññ̄a, sañkhāra, viññ̄ạna) remain the same at those two instances of time, several years apart? Person A would have grown and will not have the same body. At the time of his leaving high school, most of his primary thoughts (vedanā, sañ̃̄̄̄, sañkhāra, viññāna) are on getting a job or entering a university. Those would be very different from the time he entered high school.

3. Now we can reduce the time interval to the end of his first year at high school. All of the above arguments still hold. "He" would have changed in all five of the above characteristics that define "him."

- We can keep reducing the time interval for that person. When we think about this carefully, we can see that even his physical body would have changed a little by the time he got to the school from home. Of course, all his "metal properties" keep changing moment-to-moment.
- To see a "significant change" over a long period, we need to look at time intervals several months apart. But when we keep narrowing down the time interval, we can see that all five characteristics of that person keep changing even moment-to-moment.
- When a person enters a room, walks to the other side, and leaves the room through the back door, is it the "same person" who left? Which of the above five characteristics would have remained the same?
- Once we start contemplating it, it is easy to see that all four of our mental characteristics keep changing moment-to-moment. It is a bit harder to "see" that our bodies change moment-to-moment, but the above argument logically extends to smaller and smaller time intervals. That is why it is called "seeing with wisdom."
- Furthermore, modern science indeed shows how fast our bodies change. Every few months, most cells in our bodies get completely REPLACED. We have a "new body" every year!
- Still, this is NOT the same as saying EVERY SINGLE suddhatṭhaka (smallest material unit) in a body is re-made moment-to-moment. See, "Does any Object (Rūpa) Last only 17 Thought Moments?." However, at least SOME OF THE CELLS in a body of trillions of cells will change even moment-tomoment. Please re-read and understand the enormous difference. Also, see "Human Life - A Mental Base (Gandhabba) and a Material Base (Cell)."
- This way of "seeing" with wisdom (instead of "seeing" with the eyes) is what the Buddha called "cakkhumं udapādi.." or "seeing with dhamma eye..." Unless we do this, when we look at a person, we automatically get the perception (sañ̃̃̄ $\bar{a}$ ) of a "non-changing self," say John Smith.

4. We assign a name to a person and talk about, say, a "John Smith." But we can see there was nothing common about John Smith at various points in his life. A newborn baby looks different when grown to be a young person; with more time, the older adult will appear very different.

- However, we also should not go to the other extreme and say that "there is no such person called John Smith." How can we say that, either? We can talk to John Smith and see him actively engaging in various activities, etc. That is the other extreme of "no-soul" or "no-self."
- That is why the Buddha rejected both "self" and "no-self" as reality.
- We need to use the terminology of a person named John Smith to be able to communicate. Even the Buddha talked about "his previous lives." But we must remember that there is nothing to be called an "unchanging person."
- A "person" can acquire a "new identity" within moments. We have talked about several people who attained Arahanthood within a few minutes. Even these days, we have heard about people who have drastically changed their character within a few months. Of course, we can gain or lose significant weight in a month and change our appearance.

5. The absolute truth (paramattha) is that all our mental phenomena CAN change moment-to-moment. Some of this mental activity arise due to avijjā and can lead to significant changes even in real-time; see, "Idappaccayatā Paticca Samuppāda."

- While using conventional terminology (vohāra), we need to keep in mind that the absolute reality (paramattha) is that the "state of existence" changes moment-to-moment.
- Our physical bodies (and any material form or a sañkhata) change with time. Some change fast (a fruit fly lives a few days; thus, it goes from birth to ripe age to being dead in a few days), but others change slower (a tortoise lives about 200 years).

6. Thus "a person," in absolute reality, CAN change for better or worse even moment-to-moment, according to Paṭicca Samuppāda.

- A kusala Paṭicca Samuppāda cycle starts with "kusala-mūla paccayā sañkhāra"; see, "Kusala-Mūla Paticca Samuppāda."
- An akusala-mūla Pațicca Samuppāda cycle starts with "avijjā paccayā sañkhāra"; see, "AkusalaMūla Paticca Samuppāda" and "Idappaccayatā Paticca Samuppāda."
- But most of the time, we do things that are neither kusala nor akusala.
- Thus avijjā is not there ALL THE TIME, even for a normal human being. Avijjā is triggered when a desirable/undesirable sense input tempts one.

7. Now we can address the second comment. Yes. The avijjā anusaya is there with anyone who has not attained the Arahant stage of Nibbāna. But not all thoughts (citta) arise due to avijjā, and there are many levels of $a v i j j \bar{a}$ when it appears.

- Anusaya means our cravings and habits (that we have acquired through avijja) that lie underneath the surface, waiting for a trigger to surface.
- Thus $a v i j j \bar{a}$ itself is not something that is there all the time. An average human being acts without $a v i j j \bar{a}$ most of the time. Only when one does something with greed, dislike, or without a full understanding of the situation does one takes action with avijj $\bar{a}$.
- Avijj $\bar{a}$ is triggered by a sensory input that is either pleasing or displeasing to our mind. Whether a given "trigger" will set off avijj $\bar{a}$ will depend on one's gati (gathi) and anusaya; see, "Āsava, Anusaya,
and Gati (Gathi)," "Sansāric Habits, Character (Gati), and Cravings (Āsava)," and "Gati to Bhava to Jāti - Ours to Control."
- Thus it is not correct to say that an average human is an entity with avijjā. There is no such "fixed living being," i.e., one with "self." The only things associated with "a person" are his/her gati and anusaya; these keep changing too.

8. Even when $a v i j j \bar{a}$ arises, it can occur at many levels ranging from moha (totally covered mind) to not knowing the Four Noble Truths. In that latter case, one may do moral acts (puññābhi sañkhāra) but expect meritorious results. Here also, the akusala-mūla PS cycle operates but will lead to good births within the 31 realms.

- The kusala-mūla PS cycle operates only when one acts meritoriously without any future expectations in return, i.e., without avijjā. That happens when one becomes an Ariya or a Noble Person. An Ariya knows that it is unfruitful to strive for anything in this world. An Ariya below the Arahant stage may act with $a v i j j \bar{a}$ at lower levels (i.e., would not have moha).
- But in most cases, we disregard what we see, hear, etc. Unless one becomes interested in something, avijjā does not arise.
- Thus $a v i j j \bar{a}$ is something that is not there all the time for any person. The avijj $\bar{a}$ anusaya gets triggered by sensory input.

9. Getting back to the first comment, instead of saying either "a person exists" or "a person does not exist," the Buddha said the a living being exists moment-to-moment. We cannot deny that a people exists; but there is nothing absolute about "a person." Instead, "a person" continually changes; we conventionally call a person "John Smith," etc.

- Another way to say the same thing is to say that "a living being" exists in a given state until the cause (and conditions) that give rise to that existence exist. Once root causes are changed, that existence will change to a new one. For example, if a human starts doing things that animals usually do, then that person will likely get an animal birth after death.

10. We can get more insight into both comments by considering what happens when one attains Arahanthood.

- One attains the Arahanthood when one loses avijjā anusaya; see the links in \#7. When that happens, $a v i j j \bar{a}$ will not get triggered by ANY sense input. There is no "upādāna" for any likes/dislikes. Thus at death, there in no "sama uppada" (birth of similar characteristics) corresponding to "paticca" (whatever one willingly attaches to).
- But the kammic energy that fueled the present life is still there. So, just a rock thrown by someone will stay up until the energy given to it is exhausted, and the Arahant will live until the kammic energy for his/her life is exhausted. Still, he/she will not be tempted by any sensory input, since there is no āsava/anusaya left.
- An Arahant will experience all sense inputs just like any other human being but will not generate any likes/dislikes. And since he/she is likely to have many kamma vipāka left, he/she could also experience pains and aches or even worse. The Buddha himself suffered from some ailments, and Ven. Mahā Moggallāna was beaten to death.
- It is the FUTURE SUFFERING that is removed at the Arahant stage. Since there is no rebirth, there is no future suffering. The mind is forever released from the material body that CAN AND WILL impart suffering to those who remain in the samisāra, the cycle of rebirths.

## Dhamma Concepts

"The Four Bases of Mental Power (Cattāro Iddhipāda)"
"Why is it Necessary to Learn Key Pāli Words?"

### 7.14.1 Kilesa - Relationship to Akusala, Kusala, and Puñña Kamma

## August 27, 2022 (revised \#7 later)

Note: The current post replaces an old post "Kusala and Akusala Kamma, Puñña and Pāpa Kamma."
Kilesa means defilements hidden in the mind. They can be expressed in terms of anusaya, samyojana, āsava, or asobhana cetasika.

## Pāli Word Analysis (Pada Nirutti)

1. We can get an idea of various terms by looking at the Pāli roots of those words. Knowing how Pāli terms originated ("pada nirutti") provides insight.

- Kusala comes from "ku" +" sala," where "ku" refers to "kunu" or kilesa or evils, and "sala" means "to get rid of."
- Akusala is the opposite of kusala. It will accumulate kilesa or evils. See "Ten Immoral Actions (Dasa Akusala)."
- Kamma is an action with kammic consequences.
- Kiriya is an action without kammic consequences. For example, brushing teeth is a kiriya.

## What Are Kilesa (Defilements)?

2. This is a crucial term hardly discussed. These defilements are not "stored" anywhere. They are not in the brain. They are associated with the hadaya vatthu (seat of the mind.) Those defilements (kilesa) can be represented differently; for example, by ten types of samiyojana or seven types of anusaya.

- "WebLink: suttacentral: Yuganaddha Sutta (AN 4.170)" states that removing all types of anusaya and samyoojana leads to Nibbāna.
- A Sotāpanna would have removed two types of anusaya and three samiyojana. As a Sotāpanna progresses on the Noble Path, defilements diminish at each higher stage. Thus, an Arahant is free of all kilesa.
- Also, see "Conditions for the Four Stages of Nibbāna."

## Kilesa - Strengthened by Akusala Kamma and Eliminated by Kusala Kamma

3. We can see that akusala kamma strengthens one's defilements. An akusala kamma will create kammic energy that feeds hidden defilements (anusaya/samyojana) and sustains the rebirth process.

- A kusala kamma will help reduce AND remove anusaya/samiyojana. Thus, kusala kamma will cleanse a mind and will lead to Nibbāna.

## Pāpa Kamma and Kusala Kamma

4. A pāpa kamma is a worse form of akusala kamma that will lead to rebirth in the apāyās. Pāpa in Pāli and Sinhala means "evil" or "sinful" actions that are obvious: Killing of a human or routine killing of animals, raping, and niyata micchā ditthi are some examples of pāpa kammā.

- A puñña kamma is the opposite of papa kamma and will lead to rebirth in the "good realms" at or above the human realm. The word "pиñ̃a" is related to joy. The Sinhala word "pina" (Зß)) is associated with "pinaveema" ((ช)తోல) or "making one's heart joyful." Therefore, a puñna kamma is an action that makes one's heart filled with joy.
- The critical point is that while a kusala kamma will help reduce AND remove anusaya/samyojana, a puñña kamma can only reduce them but NOT remove those defilements. That is the difference between kusala kamma and puñña kamma we discuss now.

## Difference Between Puñña Kammā and Kusala Kamma

## 5. There is a critical difference between puñ̃̃a kamma and kusala kamma.

- A puñna kamma is a meritorious/good action that CAN lead to rebirth in the higher realms. But it DOES NOT lead to Nibbāna. Therefore, puññābhisañkhāra associated with a puñña kamma contribute to the "avijjā paccayā sañkhāra" step in Akusala-mūla Paṭicca Samuppāda. As we know, Akusala-mūla PS leads to rebirths in good and bad realms.
- The goal of a Buddhist is to attain Nibbāna and stop the rebirth process. That requires the Kusala-mūla PS process, which starts with "kusala-mūla paccayā sañkhāra." Thus, avijjā in the Akusala-mūla PS is replaced by "kusala-mūla" in Kusala-mūla PS. One can do kusala kamma only by engaging in Kusala-mūla PS.
- Therefore, to switch from avijjā to "kusala-mūla" requires dispelling avijjā by comprehending the dangers of the rebirth process, as explained in the First Noble Truth/Paticca Samuppäda/Tilakkhaṇa.
- Average humans fear Nibbāna because they do not see the dangers of remaining in the rebirth process. See "Basic Framework of Buddha Dhamma."

## Puñña kamma Can Become Kusala kamma

6. When one starts comprehending the dangers of rebirth, some puñ̃̃a kamma will automatically become kusala kamma. The difference is one's understanding of the true nature of this world. Let us take an example to illustrate this point.

- Offering food to bhikkhus is a puñ̃̃a kamma for an average human. Even though one may not specifically wish for a "good kamma vipāka" in terms of future wealth or a good rebirth, such an expectation is there even without knowing it. That is part of the anusayalsamyojana.
- When one starts seeing the dangers of remaining in the rebirth process at the Sotāpanna stage, that leads to the removal of ditthi anusaya (together with three samyojana of sakkāya dittthi, vicikicchā, and sīlabbata parāmāsa.) Thus, the above puñ̃̃a kamma may become a kusala kamma for that person; it will help remove the remaining defilements (anusayalsamyojana.)
- Since most people may not be certain about whether they have attained the Sotāpanna Anugāmi stage (or higher), it is best to cultivate "good kamma." They will "branch out" to puñna kamma or kusala kamma based on their comprehension of the Four Nobel Truths/Pațicca Samuppāda/Tilakkhaṇa.
- When one gets to the Arahant stage, there are no more anusaya/samyojana to remove, i.e., an Arahant does not do either puñña kamma or kusala kamma. All "good deeds" by an Arahant are kiriya without kammic consequences.

## Average Humans Engage Only in Puñ̃̃a Kamma, Akusala Kamma, Pāpa Kamma

7. Until a Buddha is born, no one would have a clear idea about (i) the rebirth process, (ii) that most rebirths are in the $a p \bar{a} y \bar{a} s$, and (iii) how to stop that rebirth process. Other yogis or religions teach about the rebirth process, but no one but a Buddha can teach how to stop the rebirth process by cleansing the mind.

- Most religions teach how to live a moral life. They teach how to engage in puñña kamma. But even those who try their best are tempted by sensory pleasures and spontaneously engage in pāpa kamma.
- Only by understanding the Four Noble Truths and following the Noble Eightfold Path can one automatically stop such temptations. and engage in kusala kamma.
- Both pāpa kamma and puñña kamma fall into the category of akusala kamma that maintain the rebirth process with the Akusala-mūla Paticca Samuppāda starting with "avijjā paccayā (abhi) sañkhāra." Those abhisañkhāra include puññābhisaǹkhāra involved in puñ̃̃a kamma. See "Sañkhāra - Many Meanings." It is critical to understand various types of abhisañkhāra.

8. Therefore, living a moral life (and engaging in puñ̃̃a kamma) is not enough to stop future suffering in the rebirth process.

- That is stated clearly in the "WebLink: suttacentral: Sabhiva Sutta (KN Snp 3.6):
"Kosāni viceyya kevalāni, "Having investigated all possibilities of rebirth, Dibbain mānusakañcaHeavenly, human, even the Brahma-realms, brahmakosaim; One is truly freed only when free of all of them,
Sabbakosamūlabandhanā That requires cultivating "kusala." pamutto,
Kusalo tādi pavuccate tathattā."

## Engaging in Kusala Kamma Starts at the Sotāpanna Anugāmi Stage

9. No one is even aware of kusala kamma until comprehending the Four Nobel Truths/Paṭicca Samuppāda/Tilakkhana.

- Many try to evade suffering by engaging in moral deeds, cultivating $j h a \bar{a} n a$, etc. Those can lead to temporary relief when born in the good realms. But until the rebirth process is stopped (at Parinibbāna), suffering does not stop.
- The "WebLink: suttacentral: Anusaya Sutta (SN 18.21)" states the key to attaining Nibbāna is to realize that nothing in the five aggregates (rūpa, vedanā, sañ̃̄̄̄, sañkhāra, viññāna) can be considered to be "mine." That is the same as getting rid of sakkāya dittthi. See "Sakkāya Ditthi - Wrong View of "Me" and "Mine."
- The Buddha defined Nibbāna as "rāgakkhayo dosakkhayo mohakkhayo-idaì vuccati nibbānan" $t i$ " OR "the ending of greed, hate, and delusion/ignorance "-is called Nibbāna." See, for example, "WebLink: suttacentral: Nibbānapañhā Sutta (SN 38.1)."
- Thus, the result of the step-by-step removal of the ten samyojana/seven types of anusaya, etc., is equivalent to the elimination of $r \bar{a} g a$, dosa, and moha.

## Summary

10. Akusala kammā cultivate defilements; pāpa kammā are the strongest kind of akusala that lead to rebirth in the $a p \bar{a} y \bar{a} s$.

- Puñña kammā are the opposites of pāpa kammā and lead to rebirths in the "good realms" at or above the human realm.
- Kusala kamma leading Nibbāna can be done only by those on the Noble Eightfold Path.
- Starting on the Noble Eightfold Path requires comprehension of "Paticca Samuppāda, Tilakkhana, Four Noble Truths."
- An Arahant does only kiriyā (actions without kammic consequences.)

11. Defilements (kilesa) in mind can be described in different ways: anusaya and samyojana are two good "indicators."

- Those who have not yet reached the Sotāpanna Anugāmi stage have kilesa in various strengths. Their strengths keep changing but are never eliminated until starting on the Noble Eightfold Path at the Sotāpanna Anugāmi stage. All defilements are absent only in Arahant's mind.
- Living beings spend most of their samisāric journey in the apāyās. Even when a "good birth" takes place, it has a finite lifetime, and after that, rebirth in an apāya is inevitable unless one gets to the Sotāpanna Anugāmi stage.
- Thus, the only way to stop future suffering is to comprehend the Four Nobel Truths/Paticca Samuppāda/Tilakkhaṇa and start on the Noble Eightfold Path. See "Paticca Samuppāda, Tilakkhana, Four Noble Truths."

12. More information on kilesa (in terms of cetasika) at "What Are Kilesa (Mental Impurities)? Connection to Cetasika" and "Cetasika - Connection to Gati."

- Further details on different types of kamma in "Six Root Causes - Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna)."

### 7.14.2 Ten Immoral Actions (Dasa Akusala)

Revised October 6, 2016; November 24, 2017; March 9, 2020; December 12, 2020; July 20, 2022

## Dasa Akusala Connected to Sañkhāra

1. One can do immoral acts with the body, speech, and mind (leading to $k \bar{a} y a, v a c \overline{1}$, and mano sañkhāra); see, "Sañkhāra, Kamma, Kamma Bīja, Kamma Vipāka." Mano sañkhāra arise first automatically, according to one's gati and the specific ārammaṇa. Then some of them lead to vacī and $k \bar{a} y a$ sañkhāra, and that is when they become abhisañkhāra (strong kamma.) Thus the way to reduce all bad sañkhāra is to get control over bad vacī and kāya sañkhāra. See "Correct Meaning of Vacī Sañkhāra."

As we know "Paticca Samuppāda" processes leading to suffering start with "avijjā paccayā sañkhāra." This means we do dasa akusala because we generate sañkhāra due to avijj $\bar{a}$ (not fully comprehending the Four Noble Truths.)

These are ten immoral acts (dasa akusala). They divide into three categories, as follows:
Three mano sañkhāra (immoral acts done with the mind):

1. Abhijj $\bar{a}[A b h i j j h \bar{a}]$ (covetousness; greed for other's belongings)
2. Vyāpāda (ill-will, hatred)

## 3. Micchā Ditṭhi (wrong views)

Four vacī sañkhāra (immoral acts done with speech):
4. Musāvāda (Lying)
5. Pisuñāvācā (slandering)
6. Parusāvācā [Pharusāvācā] (harsh speech)
7. Sampappalāpa (frivolous talk)

Three $k \bar{a} y a$ sañkhāra (immoral acts done with the body):
8. Pāṇātipātā (killing)
9. Adinnādāna (taking what is not given)
10. Kāmesu micchācāra (not just sexual misconduct, but also excessive of sensory pleasures)

## Dasa Akusala Expand to Forty

2. In Buddha Dhamma (i.e., in nature,) it is always one's intention that matters. Based on that, each dasa akusala expands to $\mathbf{4 0}$. For example, it is not only stealing by oneself that matters. Also, getting someone else to steal, helping another's act, and praising such action by another are included.

- In another example, regarding micchā dittthi, the following also count. Propagating micchā ditthi to others, encouraging another to cultivate micch $\bar{a}$ diṭthi (say, for instance, that the rebirth process is not valid,) or praising such practices.
- That is how ten dasa akusala expand to forty.
- There are ten suttā in the Kammapathavagga of the Anguttara Nikāya that lists those "four divisions" for each of the dasa akusala, AN 4.264 through AN 4.273. English translations of those start with: "WebLink: suttacentral: 264. Killing Living Creatures." You can click the "next" arrow at the bottom of the webpage to get to all ten suttā.
- As one starts avoiding more and more of these forty actions, one will start feeling the early stages of Nibbāna or "nivana," i.e, cooling down of the mind. The constant stress and excited-ness of the mind will gradually ease. Also, see "Root of All Suffering - Ten Immoral Actions."

## A Sotāpanna Is Free of Only Micchā Ditṭhi

3. First of all, it is essential to realize that only Arahant is free from doing any of these. Even a Sotāpanna may commit some of these at least once in a while. There are six things that a Sotāpanna is incapable of: killing a mother or father, killing an Arahant, injuring a Buddha, knowingly causing a schism in San̈gha, and having micchā diṭthi or wrong views.

- Thus, anyone below the Sotāpanna stage could break dasa akusala. Even a Sotāpanna has completely removed only micchā ditṭhi. A Sotāpanna would not WILLINGLY commit any of the dasa akusala, but some COULD happen, except for those six mentioned above; see, "Key to Sotāpanna Stage - Ditthi and Vicikicchā."
- It is essential to realize that one needs to AVOID them if possible. It becomes easier as one learns Dhamma to see the benefits of avoiding them.
- However, a Sotāpanna has reduced lobha (extreme greed, especially for other's belongings) and dosa (hate) to reduced levels of rāga (craving for sense pleasures) and patigha (friction or tendency to get upset or angry); see "Lobha, Dosa, Moha versus Rāga, Patigha, Avijiā."

## Two Categories of Micchā Ditṭhi

4. The first category is the ten types of micchā ditth (wrong views) discussed in \#5 below.

- The deeper level of micchā ditṭhi is not comprehending the essential characteristics of "this world" of 31 realms; see "The Grand Unified Theory of Dhamma" and "Wrong Views (Micchā Ditthi) - A Simpler Analysis."
- Because of the ignorance of the complete world view, one is likely to have the following three main wrong world views. (i) Everything has sprung without a cause (ahetuka ditthi). (ii) Good and bad produce no effect (akiriya ditṭhi). (iii) There is no afterlife (natthika dițthi).
- A common form of micch $\bar{a}$ dittthi is to assume that if one obeys the five precepts, then one will be exempt from birth in the apa $\bar{a} \bar{a}$. That belief itself can lead to the birth in the ap $\bar{a} y \bar{a}$; see "The Five Precepts - What the Buddha Meant by Them."

5. If one has such wrong worldviews, one is likely to commit immoral acts. They will have kamma vipāka leading to rebirth in the ap $\bar{a} y \bar{a}$ (the lowest four realms,) i.e., in future rebirths. There are ten such specific wrong views or micchā ditthi (sometimes just called ditthi):

- (1) No kammic benefits in giving, (2) no need to pay back debts (for what others have done for you), (3) no benefits of respecting Noble Ones and also yogis with abhiñ̃̃̄ powers, (4) kamma do not have vipāka, no kammic benefits of taking care of (5) mother and (6) father, (7) this world does not exist ("natthi ayam̀ loko"), (8) Paralowa does not exist ("natthi paro loko"), (9) there are no opapātika birth (instant full-formed birth), (10) there are no Noble Ones and yogis exist who can see past lives. [WebLink: suttacentral: AN 3.117. Vipattisampadāsutta - Distress and Attainment Sutta '(1) natthi
 vipāko, (7) natthi ayamं loko, (8) natthi paro loko, (5) natthi mātā, (6) natthi pitā, (9) natthi satt $\bar{a}$ opapātikā, (10) natthi loke samaṇabrāhmaṇā sammaggatā sammāpaṭipannā ye imañca lokaim parañca lokaì sayaì abhiññā sacchikatvā pavedent $\vec{\imath}$ ]
- For explanations on (7)-(10), see "Micchā Ditthi, Gandhabba, and Sotāpanna Stage."
- In particular, para loka is where a gandhabba lives in-between consecutive births with a physical human bodies; see "Hidden World of the Gandhabba: Netherworld (Para loka)."

## Niyata Micchā Ditṭhi

6. What is akusala is to hold "niyata micchā ditṭhi" or "established wrong views," i.e., one is not even prepared to consider, say, that there is a rebirth process. Thus, if one has unwavering doubts about any of the ten categories in the above paragraph, one has established wrong views (niyata micchā dittthi). Such wrong views can lead to actions with kamma vipāka responsible for births in the apāy $\bar{a}$.

- The critical point is that when one has established wrong views, one looks at the world differently without realizing that there are consequences for one's actions. One would not be aware of that without a Buddha explaining the world's true nature. That includes the validity of the rebirth process, life in other realms, an uncountable number of planetary systems like the Earth, etc.
- As scientists are finding out, there are many things in nature that we do not experience/understand. For example, scientists can only account for $4 \%$ of the mass of the universe; they cannot account for the rest (Google "dark matter" or "dark energy"). Thus one needs to keep an open mind and learn more Dhamma to see whether all these make sense.

7. The only akusala completely removed by a Sotāpanna is the micchā ditthi; see, "What is the only Akusala Removed by a Sotāpanna?."

- As explained there, an unimaginably huge amount of defilements is removed at the Sotāpanna stage, just via getting rid of micchā ditt!hi, mainly through the comprehension of anicca, dukkha, and anatta.

## Only a Buddha Knows All About This World

8. A lot of you may be thinking "How do I know all this is true? Is there any evidence for the existence of rūpa/arūpa lokā, apāyā (hell), or spontaneous birth?. "

- There are many things we do not know about "this world." We cannot rely on just science to verify/confirm these. Only within the last 100 years or so has science has accepted that our world is bigger than a few galaxies (now science has confirmed that there are billions of galaxies). Whereas the Buddha stated that cakkavāla (star systems or planetary systems) come into existence all the time, science has confirmed that only within the past 100 years; see, "Dhamma and Science - Introduction."
- Furthermore, the newest findings (yet unconfirmed) in string theory indicate that we live in an 11dimension world, not the 4-dimension world that we experience. For a look at different dimensions, see, "Consciousness Dependence on Number of Dimensions." Thus, more of Buddha's teachings will be confirmed with time.

9. It is easy to see that all immoral deeds start with mano sañkhāra (bad thoughts) in mind. Any of the vacī sañkhāra (speech) or kāya sañkhāra (bodily actions) are done with greed, hate, or not knowing the true nature of the world (ignorance). In particular, the basis for moral behavior comes from the correct worldview. Let us examine this below:

- The fact that there is no discernible beginning to conscious life (see "Samssāric Time Scale, Buddhist Cosmology, and the Big Bang Theory") means all of us have been going through this rebirth process for an unimaginably long time. Thus we have been born in most of the 31 realms of existence. Not only that, we have been born innumerable times in EACH of those realms (except those reserved for the Anāgāmīs).
- The above fact means each sentient being had been related to any other sentient being at some point in this long samisāra (or saysāra, rebirth process). The Buddha said, "it is difficult to find ANY sentient being that was not your father, mother, or a sibling at some point in this long samisära." Infinity is a hard concept to grasp; see "Infinity - How Big Is It?."
- An interesting book that talks about such hard to grasp ideas (in science) involving infinity is, "The Beginning of Infinity: Explanations That Transform the World" by David Deutsch.
- Therefore, humans and ALL sentient beings are connected/related. This is why it is wrong to kill any living being, steal from anyone, verbally abuse anyone, etc. Those are the foundations of morality. This is WHY it is not good to do any of the ten immoral acts.

## The Intention is An Important Factor

10. The Buddha said, "Cetanāhaì, bhikkhave, kammaì vadami," i.e., "Bhikkhus, I say that kamma is the intention involved." We always need to look at the intention to pinpoint whether or what kind of kamma was committed.

- For example, if someone shoots a dog attacking a child, one's intention here is to save the child. On the other hand, if someone is shooting a dog for "target practice," there is no excuse. The life of a human is million-fold more precious than an animal's; see "How to Evaluate Weights of Different Kamma."
- Sometimes it is impossible to judge the kammic consequences just by looking at the particular act. Only the person committing the act will know whether it is a good or bad intention. Thus normally it is not wise to judge other people's actions.
- If it is a mano sañkhāra (bad thoughts), the only person who even knows about that is the one who is committing it.

11. In many cases, it is possible for others to "see" when one is committing vacī or kāya sañkhāra. But not always. Disciplinary actions against a child by a parent may appear to be kāya sañkhāra (spanking) or vac̄ sañkhāra (verbal threats), but the parent is likely to have good intentions for the child in most cases.

Also, in many cases, no person can advise another on what to do when conflicting issues are involved. Is it OK to steal some food to feed one's kids when they are crying in hunger? Is it OK to spank a child when the child is misbehaving? Only the parent can make that decision based on the circumstances.

Also see, "Details of Kamma - Intention, Who Is Affected, Kamma Patha." This post was updated on February 21, 2018, and provides a simple two-step process to evaluate a given situation.

## Relative Weights of Kamma

12. One critical problem many people have is trying hard to avoid actions with relatively small kammic consequences while unknowingly doing things with stronger kammic consequences. Let us take an example: Suppose we have a large tank of water that is losing water due to many holes at the bottom. Some holes are pinholes, some are a little larger, and a few holes are big and lose water fast. One would want to plug those large holes first. Then one would fix the medium-size holes. The smallest or the pin holes are the last to be fixed.

- The relative weights of ten immoral acts are not easy to quantify. However, we can see that kāya sañkhāra have higher "kammic potential" compared to vacī sañkhāra if they are directed to the same living being; hurting someone physically is worse than verbal abuse.
- Another example: Say someone has hateful thoughts about a particular person all day. That could be worse than just saying something to that person and "getting the load off the mind." However, even that is not necessary. The best solution is to develop mettā (loving-kindness) towards that person and eliminate those hateful thoughts. We always must realize that we all are trapped in this constant struggle to find happiness in a world that is not set up to provide lasting happiness; see, "Anicca, Dukkha, Anatta Wrong Interpretations."

13. Kammic consequences also depend strongly on the "consciousness level" of the living being against whom the immoral act was committed.

- Killing a human will have far stronger consequences compared to killing an animal. This is discussed in the essay, "How to Evaluate Weights of Different Kamma."

14. Dasa akusala and relative weights of different kamma are discussed in the following desanā:

WebLink: Download "Ten Immoral Actions (Dasa Akusala)"

- This desana is in the post, "Root of All Suffering - Ten Immoral Actions," where you can find the relevant posts mentioned.

### 7.1.4.3 Puñña Kamma - Dāna, Sīla, Bhāvanā

Revised March 24, 2016; September 14, 2017; major revision with title change April 27, 2018; edited February 14, 2021; December 21, 2021; May 27, 2022; August 27, 2022

1. Here we discuss the ten types of puñña kamma (doing meritorious deeds). These are in three groups: dāna, sīla, and bhāvanā.

- Those are essential for progress in one's mundane eightfold path.
- One must cultivate the mundane path and remove the ten types of micch $\bar{a}$ ditt thi before being able to comprehend the Tilakkhaṇa and start on the Noble Eightfold Path; see "Buddha Dhamma - In a Chart."

2. A previous post discussed the differences between kusala/akusala kamma and puñña/pāpa kamma : "Kilesa - Relationship To Akusala, Kusala, And Puñ̃̃a Kamma."

- For details on the ten types of akusala kamma, see "Ten Immoral Actions (Dasa Akusala)."
- The ten types of kusala kamma are just the avoidance of akusala kamma.

3. As discussed in the above two posts, kusala kammā (getting rid of rāga, dosa, and moha) eventually leads to Nibbāna. However, puñna kamma (meritorious actions) help set the background to attain Nibbāna and are thus critically important.

- One needs to do both. However, the ability to do kusala kammā is vastly improved when one starts comprehending Tilakkhaṇa; see, "Anicca, Dukkha, Anatta."
- Puñña kammā lead to rebirths in "good realms." Furthermore, one will be born with long life, good health, comfort, and wealth ( $\bar{a} y u$, vaṇna, sukha, bala) to be able to comprehend Tilakkhaṇa and pursue Nibbāna with ease. The following Dhammapada verse emphasizes that:
"Abhivādanasīlissa, niccam̀ vuḍ̣hāpacāyino;

Cattāro dhammā vaḍ̣hanti, àyu vaṇno sukhamं balaim."

- $\overline{A y u}$, vanna, sukha, and bala mean the length of life, health, happiness, and strength. [vanna : [m.] colour; appearance; colour of the skin; sort; caste; a letter; quality.]

These ten meritorious actions (puñña kamma) are divided into three groups: dāna (generosity), sīla (moral behavior), and bhāvanā (meditation).

## Puñna Kamma - Dāna, Sīla, Bhāvanā

4. The ten types of puñña kammā are:
5. Dāna (giving)
6. Transfer of merits to others (pattidāna)
7. Rejoicing (accepting or participating) in other's merits (pattānumodanā̄)
8. Sïla (morality), i.e., observing 5, 8, or 10 precepts
9. Reverence to elders and holy persons (apacayana)
10. Pay homage to religious places, take care of such places, etc (veyyāvacca)
11. Meditation (bhāvanā)
12. Listening to Dhamma discourses (Dhamma savana)
13. Teaching Dhamma (Dhamma desana)
10.Correcting one's wrong views, especially on kamma (dițthijukamma)

- The first three belong to the Dāna (Generosity) group, the next three belong to the Sīla (morality) group and the last four to the Bhāvana (Meditation) group.
- On the last one, see, "What is Kamma? - Is Everything Determined by Kamma?."

5. Therefore, dāna, sīla, and $\bar{b} \bar{a} v a n a \bar{a}$ constitute the "base" of a life of a moral person.

- "Dāna group" helps one overcome one's greed (lobha).
- "Silla group" helps to remove hate (dosa) from one's mind.
- "Bhāvanā group" helps to remove ignorance (moha) from the mind by learning Dhamma and getting rid of the wrong views (micchā ditt

6. Since Nibbāna is removing greed, hate, and ignorance from one's mind, it is clear how these ten actions pave the way for Nibbāna. As one engages in these activities more and more, one can experience the "cooling down" or "niveema"; see "How to Taste Nibbāna."

- In the silla group of activities, one starts by observing the five precepts, i.e., abstaining from killing living beings intentionally, stealing, sexual misconduct, lying, and getting intoxicated. This last one usually involves intoxication with alcohol or drugs, but it also includes money, beauty, power, position, etc.

7. It is always a good idea to keep in mind why these are moral actions: Because they help purify one's mind:

- To avoid breaking the five precepts, most people abstain from drinking but do not hesitate to show off their wealth, beauty, power, etc.; they are "drunk" too.
- Others pay a lot of attention not to lying, but do not hesitate to gossip, slander, or verbally abuse others.
- Also, one should realize that human life has much more weight than animal life; see "How to Evaluate Weights of Different Kamma."
- Most of all, the tenth is the most potent one that most people neglect to consider. Having established wrong views (niyata micchā ditṭhi) can lead to frequent immoral actions. Thus, one needs to understand this clearly; see "Ten Immoral Actions (Dasa Akusala)."

8. This is why learning Dhamma is prominent in the bhāvanā section. As one keeps learning deeper concepts of Dhamma, wrong views will gradually fade. It is not enough to say, "I will not have these views anymore," even though making such a determination is good. The mind needs to see evidence to get rid of the wrong views. When one starts on the Path, the feeling of the nirāmisa sukha will make it easier to remove wrong views; see, "Three Kinds of Happiness - What is Nirāmisa Sukha?."

## The High Value of Puñ̃̃a Kamma Done with Understanding

9. If one performs a wholesome deed with the knowledge of kamma and its effects and anicca, dukkha, and anatta, then the wholesome roots will be associated with understanding. Then one's actions will be based on all three wholesome roots: non-greed, non-hate, and non-delusion. So three-root (tihetuka or "ti" + "hetu") wholesome kamma is acquired.

- On the other hand, performing a wholesome deed without knowing the laws of kammā will dilute its effects on future outcomes (vipāka.) Then one's intention will not have wisdom or pañ̃̃̄a (true nondelusion) but only the two roots of non-greed and non-hate. So two-root (dvihetuka = "dvi"+ "hetu") kamma is acquired. These are less meritorious compared to the three-root (tihetuka) kamma.

10. A detailed discussion can be found in "A Simple Way to Enhance Merits (Kusala) and Avoid Demerits (Akusala)." We will discuss these effects in detail in the Abhidhamma section too.

- But it is essential to realize that the strength of the kamma vipāka for a given meritorious act will vary depending on the level of understanding. For example, just writing a check to charity will have some results. But more substantial results will materialize if it was done with a good understanding of the laws of kamma.

11. To engage in this superior kamma, one should consider the moral action in advance. After the deed, one should reflect on it and contemplate it. Furthermore, one can gain more merits by doing a puñña anumodana or pattidāna (transfer of merits to others, \#2 kusala kamma above) because this amounts to paying off sansāric debts; see, "Kamma, Debt, and Meditation."

- On the other hand, if one feels lazy, reluctant, jealous, or stingy before a moral action such as giving charity and regrets doing the moral action afterward, then the moral volition of giving to charity will be
surrounded by other unwholesome intentions (cetanā). Consequently, its results will be weaker. The wholesome kamma acquired, in this case, is inferior.

Thus the importance of learning Dhamma in grasping such details and realizing the full benefits of one's meritorious actions. It is interesting to see how all these details "fit into the big picture"; see "The Importance of Purifying the Mind."

Next, "The Five Precepts - What the Buddha Meant by Them", ...

### 7.1.4.4 Details of Kamma - Intention, Who Is Affected, Kamma Patha

July 24, 2022
We discuss several factors that determine the strength of a kamma, including intention, who is affected, and how a kamma becomes a kamma patha.

## Cetanā in Kamma Is Different from Cetanā Cetasika

1. In the "WebLink: suttacentral: Nibbedhika Sutta (AN 6.63)" (toward the end), the Buddha said, "cetanāhain, bhikkhave, kammaì vadāmi." Thus, what determines the type of kammā is the cetana or the "intention."

- Did the Buddha refer to the cetan $\bar{a}$ cetasika in the above verse? No, because the cetana cetasika in is in EVERY citta. I introduced cetasika in "Cetasika (Mental Factors)" and have discussed some aspects of them in the "Citta and Cetasika" section.
- It is not necessary to review those posts. The point here is that the cetana cetasika is in ANY citta, including vipāka citta. Therefore, not all citta arise with an "intention of getting something done."
- For example, vipāka citta only brings in an ārammaṇa. In such cases, we see, hear, taste, smell, touch something, or recall a past event. There is no "intention" of doing something with such vipāka cittās.

## Intention Leads to Kamma Generation

2. We can see the following from that key verse in \#1 above. Cetanā, in that verse, is connected to the kamma generation!

- The meaning becomes more apparent with the following verse in the sutta: "Cetayitvā kammaim karoti -kāyena vācāya manasā," meaning "After making an intention, one takes action (kamma)-by way of body, speech, and mind."
- Thus, one acts with intention ONLY AFTER an ārammaṇa comes to the mind first. One decides how to respond to a sensory input that just came in as a kamma vipāka. The intention depends on the type of action one chooses to take.
- For example, upon seeing an enemy, one may decide to say something harsh to that person.

3. Note that we are not talking about neutral actions like walking to the kitchen to get a glass of water. In Buddha Dhamma, the discussions are about how we do puñ̃̃a/kusala kamma or apuñña/akusala kamma that can lead to good or bad vipāka in the future.

- Thus, the "intention" involves puñña/kusala kamma or apuñña/akusala kamma. Based on that, we can see that the critical point is whether "good cetasika," like compassion, or "bad cetasika," like greed or anger, arises in the mind.
- Cetanā cetasika combines the cumulative effect of many cetasika that come into play. "The "intention" comes from the types of cetasika "incorporated by the cetan $\bar{a}$ cetasika" based on one's gati."

## Connection to Gati/Anusaya

4. The "intention" in committing an akusala kammā is one of the dasa akusala. That intention arises BECAUSE OF one's gati. A particular set of cetasika will arise automatically according to one's gati (pronounced "gathi.") Of course, gati is closely related to one's anusaya.

- When committing an akusala kammā, a set of four universal cetasika always comes into play. Those are moha (ignorance), Ahirika (shamelessness), Anottapa (fearlessness in the wrong), and uddhacca (restlessness or agitation.)
- Other "akusala cetasika," like lobha, diṭthi, vicikicchā, etc., may also be present depending on the situation and the person committing the act; see "Cetasika - Connection to Gati." For example, one may lie about something because of greed (lobha); another person may tell the same lie because of hate (dosa.) The consequences are worse for the latter.
- When committing an akusala/apuñ̃̃a kamma, the intention is to do one (or more) of the dasa akusala. Thus cetana cetasika is not the "intention." The "intention" depends on how the cetana cetasika incorporates one's gati/anusaya when it "prepares" a citta in response to ārammaṇa.
- Kusala/puñña kammā work the same way. Here the "intention" is to commit one or more kusala/puñña kammā, and here a set of moral (or sobhana) cetasika come into play.

5. From \#4, it may appear that we don't have control over the response to an ārammaña. But \#4 only describes the initial "automatic response" to an ārammaṇa with mano sañkhāra.

- However, we can change that automatic response when we start generating vacī and kāya sañkhāra. If we are mindful, we can catch ourselves starting to engage in a bad kamma and stop it. See "Correct Meaning of Vacī Sañkhāra."
- Suppose we instead keep generating bad vacī and kāya sañkhāra (by going along with bad gati/anusaya). In that case, we will strengthen that bad kamma by strengthening our expectation, i.e., "kamma viññāṇa" that arose based on that ārammaṇa.

## Connection to Kamma Viññāna and Rebirth

6. In the "WebLink: suttacentral: Cetana $\operatorname{Sutta}$ (SN 12.38)," we get further clarification on how this "intention" relates to our "future expectations" that manifest as "kamma viññāna."
"Yañca, bhikkhave, ceteti yañca pakappeti yañca anuseti, ārammaṇametaì hoti viññānassa ṭhitiyā.
Ārammaṇe sati patitṭhā viññānassa hoti.
Tasmim patiṭthite viññāne virūlhe āyatim punabbhavābhinibbatti hoti."

## Translated:

"Bhikkhus, what you intend or plan, and what you have underlying tendencies (anusaya) for, become a support for the kamma viññāna.
When one focuses on an ārammaṇa (with an expectation/intention), kamma viññāna becomes established.
When that viñ̃āạa is established and grows, that can bring rebirth into a new state of existence in the future."

- That is what I mentioned in \#1 above. For an intention/expectation to arise, an ārammana must first bring in sensory input. For greedy anticipation for a particular food to occur, one must either taste that food or the memory of consuming that food must come to mind first.
- Then we start thinking, speaking, and acting about how to get more of it to eat. The more we do, the more that "kamma viññāṇa" will grow ("sañkhāra paccaya viññāna" in Paṭicca Samuppāda.)
- Growing the "kamma viññāna" is the same as "growing the strength of the kamma." Such sañkhāra are abhisañkhāra!
- That is how we accumulate kamma with intention (cetanā.)

## Strength of Kamma

7. There are two key factors to be remembered in evaluating how to assess the relative strength of a kamma:
(i) Which of the dasa akusala is the intention? For example, it could be taking a life, stealing, or harsh speech. As we see, the relative strengths decrease in that order. Who is affected is not involved in this step. The "cetanā" in "cetanāhamं, bhikkhave, kammaì vadāmi", is just which dasa akusala is in one's mind.
(ii) Then the strength of the kammā vipāka will also depend on the "level of consciousness" or "status" of the living beings affected by that kamm $\bar{a}$. For example, killing a human will bring stronger kamma vipāka than killing an animal.

## Some Examples

8. In the case of a person killing a bunch of people with a bomb, his intention (cetana $\bar{a}$ ) is to kill. Thus the dasa akusala involved is "pānātipāt $\bar{a}$," that of taking a life.

- Now to the second step. He may not even know who got killed. By some coincidence, if the bomb killed a parent of the killer, then he would have done an ānantariya p $\bar{a} p a$ kamm $\bar{a}$. If an Arahant died, the same. If a Sotāpanna died, it would not be a ānantariya kammā but still be equivalent to killing thousands of ordinary humans.
- So, it is essential to understand that "cetan $\vec{a}$ " is which of dasa akusala are in one's mind while committing a kamm $\bar{a}$. It could be more than one. In the case of the bomber, there is micch $\bar{a}$ ditṭhi and likely greed also, in addition to "pān̄ātipātā."
- One can analyze various situations with the two steps in \#7 above.

9. Let us consider some prominent examples from the Tipitaka.

- Ascetic Siddhartha had to endure such hardships for six years to attain the Buddhahood because he had said some insulting things regarding the Buddha Kassapa in his previous life. At that time, Siddhartha was a wealthy person named Jotipala and had a friend called Gatikara who listened to desanas from Buddha Kassapa and became an Anägāmi. Gatikara tried to persuade Jotipala to go and listen to Buddha Kassapa, but Jotipala kept refusing, saying, "I do not want to go and listen to the bald monk."
- That kamma forced ascetic Siddhartha to undergo such hardships before attaining the Buddhahood. That is a clear example that one DOES NOT NEED TO KNOW that one is insulting a Buddha to accumulate the corresponding kamma vipāka.
- Eleven more such kamma vipāka brought adverse effects to the Buddha Gotama even after attaining the Buddhahood. Three of those were for bad kammā committed against Pacceka Buddhas. It is especially not possible to recognize a Pacceka Buddha as such because they appear during times when a Samm $\bar{a}$ Sambuddha (like Buddha Gotama) is not present, and they cannot teach Dhamma to others.
- Therefore, NOT KNOWING the status of the person (to whom the wrongful act was directed) is not an excuse. These are not rules made up by the Buddha, and the Buddha himself was not immune from those laws. Kammic laws are Nature's laws, just like laws of gravity; a Buddha just discovers them.
- Kamma/kamma vipāka is a complex subject. Let us consider one more aspect of a "completed kamma" or "kamma patha."

## Kamma and Kamma Patha

10. A given akusala kamma takes four stages to be "completed."

- For example, in the case of taking a life, the following are the four steps:
(i) one must think that it is alive,
(ii) one must have the intention to kill that being,
(iii) making a plan
(iv) executing the plan to kill
(v) the living being ends up dead.
- Upon completing all five steps, that kamma becomes a "kamma with maximum strength" or a kamma patha.
- As the number of completed steps keeps increasing, the severity of the vipāka will increase. When all are complete, a kamma becomes a kammā patha, and the kammā vipāka will be the strongest possible.
- When we walk on grass, we may unintentionally kill many small insects. But since the "intention" is not there, none of the five factors will come to play. If someone hits a toy snake intending to kill, only the last factor will not be fulfilled.

11. Let us consider another example of the four steps that constitute a kamma patha involving lying/deceiving (musāvāda.)

- (i) there must be a person(s) to be deceived,
(ii) one must have the intention to deceive that person(s),
(iii) makes plans
(iv) carries out the deception,
(v) that person (and possibly others not even intended) suffer due to that deception.
- I have been trying to find a Tipitaka reference for these "five factors." Please comment in the discussion forum if you know.
- If all factors are completed, the "kammic energy" will be optimized, and it becomes a "janaka kamma," possibly leading to rebirth in a bad realm. If only some factors are completed, such a kamma can bring $v i p a ̄ k a$ during a lifetime.

## Dasa Akusala Expand to Forty

12. In Buddha Dhamma, it is always one's intention that matters. Based on that, each dasa akusala expands to 40. For example, the following four are inclusive in pan $\bar{a} t i p \bar{a} t \bar{a}$ :
(i) Taking life by oneself
(ii) Getting someone else to kill
(iii) Helping another to kill
(iv) Praising a killing by another

- There are ten suttā in the Kammapathavagga of the Anguttara Nikāya that lists those "four divisions" for each of the dasa akusala, AN 4.264 through AN 4.273. The first sutta is "WebLink: suttacentral: Killing Living Creatures (AN 4.264)." You can click the "next" arrow at the bottom of the webpage to get to all ten suttā.
- In another example, regarding micchā ditṭhi, the following also count. Propagating micchā dittthi to others, encouraging another to cultivate micch $\bar{a}$ ditṭhi (say, for instance, that the rebirth process is not valid), or praising such practices.
- That is how ten dasa akusala expand to forty.
- As one starts avoiding more and more of these forty actions, one will start feeling the early stages of Nibbāna or "nivana," i..e, cooling down the mind.

## Complexity of Life

13. Buddha has taught us how to understand why different living beings are born that way and why people are born with wide-ranging health, wealth, beauty, etc.

- One time a Brahmin asked about how that happens. The Buddha's description is in the "WebLink: suttacentral: Cūlakammavibhañga Sutta (MN 135.)."
- Also, see "Complexity of Life and the Way to Seek 'Good Rebirths'."

### 7.1.4.5 The Five Precepts - What the Buddha Meant by Them

## Revised December 23, 2020

1. The five or eight precepts, of course with different meanings, were there before the Buddha. It is said that on the day the future Buddha, Prince Siddharttha (Siddhārtha in Sanskrit), was born, his mother had observed the eight precepts.

- Ancient kings banned the so-called five immoral acts in order to maintain a peaceful society. These were: killing (of probably other people), stealing, sexual misbehavior, lying, and getting intoxicated.
- The vedic Brahmins expanded these to include the killing of animals. They also expanded to eight precepts which enabled them to attain mundane $j h \bar{a} n \bar{a}$.
- By the way, except those referring to the God, the Ten Commandments in Christianity also identify many of these "immoral acts."

2. Just like he did with many existing terminologies at that time (kamma, the four great elements of pathavī, $\bar{a} p o$, tejo, vāyo, etc.), the Buddha adopted these precepts, but re-defined what he meant by them. (In fact, those concepts originated with Buddha Kassapa, who lived a long time before Buddha Gotama. The true meanings of many concepts were lost by the time of Buddha Gotama.)

- In Buddha Dhamma, all possible immoral acts are included in the dasa akusala; see "Ten Immoral Actions (Dasa Akusala)."
- Therefore, all those are in the five precepts too. When one truly understands Buddha Dhamma, i.e., the nature of this world as embodied in anicca, dukkha, and anatta, one sees that these precepts come out naturally from the nature's laws. At that stage, one's mind automatically rejects all dasa akusala, and thus the five precepts are automatically obeyed; one does not even have to think about them.

3. For one embarking on the Path prescribed by the Buddha, the conventional five precepts (killing other beings intentionally, stealing, sexual misconduct, lying, and intoxication) are a good start.

- Furthermore, one needs to recite the five precepts, understanding that it is not a promise, but one's intends to do the utmost (otherwise, the act will itself be a musāvāda or a lie). This is because anyone other than an Arahant is bound to break some of them per their true meanings.
- But as one proceeds on the Path and experiences the benefits (peace of mind or the early stages of nirämisa sukha), one should try to expand the scope of those five precepts from the conventional meanings. This can be done systematically: when one truly understands the meanings of anicca, dukkha, anatta, AND that our existence does not end with this life, one begins to have a deeper insight.
- When that happens, the precepts are not followed as a ritual or a set of rules. Rather, one realizes that there is no other moral way to live.

4. For example, when one realizes that one has been an animal or worse in previous lives, one stops thinking of animals as "mere things" that exist for our pleasure. Furthermore, understanding the laws of kamma, i.e., taking any life has consequences will make one re-think of just wantonly taking another life.

- But some people go to extremes. They start treating animal life on the same level as human life and then freak out when they have to clear a spider web in cleaning their house. Inevitably, we will unintentionally kill many small creatures while walking on the ground or even boiling some water. So, one need to get a sense of the relative weights of kamma; see, "How to Evaluate Weights of Different Kamma?."
- What needs to be avoided first is those "pleasure killings" like fishing, hunting, etc.

5. Stealing is not merely acted like shop lifting, but also includes gains by immoral means. To live a functional society, we have to do transactions with each other. We need to make sure we do not take advantage of another person and becoming "morally indebted" to that person.

- Vinaya rules ("vi" + "naya" where "naya" is debt and Vinaya is becoming free debts) in Buddha Dhamma setup for the monks show how to live their lives by properly paying back for the sustenance they get from the laypeople.
- When the Buddha said to test any act or concept with "Dhamma and Vinaya," he meant that the concept needs to be consistent with Paṭicca Samuppāda (cause and effect) and also consistent with "rāga vinaya, dosa vinaya, and moha vinaya," i.e., not getting into debt via greed, hate, and ignorance.
- If we gain from someone by unjust means, we will have to pay that debt if not in this life, but in future lives; see, "Kamma, Debt, and Meditation."

6. The third precept, "kāmesu micchācārā veramaṇī sikkhāpadaim samādiyāmī", is commonly translated as "avoiding sexual misconduct." But "kāma" is not just sexual activity. "Kāma" includes all sense pleasures that are available in the kāma loka. And "micchācārā" (pronounced "michchāchārā") means "misbehavior" in the sense of "going to extremes." Thus the real meaning is not to over-indulge in sense pleasures.

- In fact, excessive drinking, gambling, etc., are included in this precept.
- We have to use all our five physical senses to live in this world. But we need to have restraints to not abuse them to the extent that we will hurt ourselves or others. Even a simple example of over-eating leads to health problems, which will hurt not only oneself but the whole family.
- The first three precepts include all three akusala kamma done with the body.

7. The fourth precept on musāvāda (lying) in Buddha Dhamma includes all abuses done in my speech, including harsh speech, slandering, and gossip which WILL harm oneself and others.

- Thus the fourth precept encompasses all four akusala kamma done with speech.

8. The fifth is a big one that is almost always misinterpreted. If it included just drinking, it would have been, "surāmeraya veramaṇī......." That was probably the original verse.

But in Buddha Dhamma it is, "surāmeraya majjapamā daṭthānā veramaṇī sikkhāpadam......."
In the word, "sur $\vec{a} ", ~ " r \vec{a} "$ means "rāga" or excess greed. Thus "sur $\vec{a} "$ means with excess greed; "meraya" is delicious. "Majja" means intoxication and "majjapama"" is getting delayed via intoxication, and "datṭhāna" means that mindset. Of course, "veramaṇ̄̄ sikkhāpadaim samādiyām $\vec{\imath}$ " means "I decide to avoid doing such things willingly."

Thus it should be interpreted as, "avoid the mindset of getting intoxicated by alcohol, drugs, money, power, etc.," anything that can make you "fall behind":

- All this happens in one's mind. One gets intoxicated with greedy thoughts, and when one does not get one's way with them, one generates hate. And all this happens because one does not understand the true nature of this world, i.e., one has micchā dittthi or wrong views.
- To put it another way, one should be careful not to get intoxicated by the five sense inputs or "kāma assäda"; see, "What is "Kāma"? It is not Just Sex."
- One believes that either, (i) one's actions will not have future consequences, and (ii) therefore, one needs to think about how to get what one wants (because there are so many tempting things out there to be had!); one does not realize all that is temporary.
- Thus in order to really obey the fifth precept, one needs to start working on one's mind. All three akusala kamma done with the mind are included in this fifth precept; see, "Ten Immoral Actions (Dasa Akusala)."

9. The following scenario is given as an example to illustrate the futility of blindly following precepts. Many people live their entire lives without intentionally killing, stealing, engaging in sexual misconduct, lying, or getting intoxicated. But their minds are burdened with greed, hate, or ignorance. Depending on the state of their minds, they may not even get a human birth next time around.

- There is this story about an older woman who followed those conventional five precepts to the letter. Even though she was poor, she was greedy and kept all her money under her pillow. She was reborn as a louse (plural lice) on that pillow, because of her attachment to that money in the pillow.
- And if keeping those precepts will take one to Nibbāna, then a cow or a horse living in isolation will be certain to attain Nibbāna. They do not kill, steal, lie, or get intoxicated, and if their owners do not have any other animal of that kind, then there is no chance of sexually misbehaving either.
- It is all about purifying one's mind. A pure mind gains wisdom, and will not allow any harmful action by speech or by deed. Such a mind is not burdened, but has "cooled down"; that is the happiness of Nibbāna.

10. The path to Nibbāna starts with the mundane Eightfold Path with sīla, samādhi, pañ̃ñ in that order. Then, one will comprehend the Noble Truths/Tilakkhanal Paṭicca Samuppāda and become a Sotāpanna Anugāmi. That is when one starts on the lokuttara or Noble Eightfold Path with lokuttara Sammā Diṭthi. Now the sequence shifts to pañ̃̃̄̄, sīla, samādhi with wisdom (paññā) in front. See, "Sīla, Samādhi, Pannā to Pannā, Silla, Samādhi."

- A key step in completing the mundane Eightfold Path is to get rid of the wrong views (micchā diṭthi), as explained in that post. Another is to understand that kamma is not deterministic.
- A brahmin by the name of Niganṭanāṭaputta in the days of the Buddha was preaching that everything happens due to kamma. He advised his followers to refrain from breaking the five precepts because, INEVITABLY such deeds lead to the birth in the $a p \bar{a} y \bar{a}$. He also preached that if someone did not break even a single precept, that person would NOT be born in the apāy $\bar{a}$ in the next birth.
- The Buddha said that both were wrong. We have done both good and bad kamma in our previous lives, and the next birth will be determined by the relative strengths of those and what we do in this life. For example, Angulimāla, who killed nearly 1000 people, attained the Arahantship in a week. And Buddha gave examples of those who lived a perfectly moral life, but were born in the apāyā, because they had bad kamma vipāka from previous lives. For details, see, "WebLink: suttacentral: Mahā Kammavibhañga Sutta (MN 136)."
- Furthermore, the Buddha said that if someone dies with such misconceptions, that is miccha ditt $t h i$, and one WILL BE born in the apāy $\bar{a}$ just BECAUSE OF that micch $\bar{a}$ dittthi. It is critically important to figure out this point. I meet many people (even Buddhists) who say, 'I have not done anything bad to anyone; therefore, I do not think anything bad will happen to me." That is a miccha dittthi. The only way to guarantee that one will be exempt from birth in the ap $\bar{a} y \bar{a}$ is to attain the Sotāpanna stage of Nibbāna.

### 7.1.4.6 What is Kamma? - Is Everything Determined by Kamma?

Revised January 28, 2020; June 7, 2022 (\#2)

## Things Happen Due to Causes and Conditions

1. A key concept in Buddha Dhamma is cause and effect. Nothing happens without a cause or a reason.

- But even if root causes are there, we can stop them from bringing their results by blocking the CONDITIONS for them to come to fruition (a seed has the potential to bring about a tree, but for that to happen the seed must be given a fertile soil, water, and sunlight).
- That is explained with simple terms in, "Working of Kammā - Critical Role of Conditions."
- That is why in Paticcca Samuppāda, "paccayä" does NOT mean "it will happen"; see, "What Does "Paccayā" Mean in Paticca Samuppāda?."

## Nature's Laws - Dhamma Niyāma

2. Nature enforces this cause and effect via niyāma dhamma (dhammaniyāmatā or dhammatā.) It comes from niyama (meaning "fixed.")

- Some Commentaries describe "five types of niyāma dhamma": kamma niyama, citta niyama, utu niyama, bïja (or bija), and dhamma niyama. However, I have not found any such description in the Tipitaka.
- Everything happens according to Paṭicca Samuppāda. The "WebLink: suttacentral: Paccaya Sutta (SN (12.20)" explains the word dhammaniyāmatā:
"Katamo ca, bhikkhave, paṭiccasamuppādo? Jātipaccayā, bhikkhave, jarāmaraṇaim. Uppādā vā tathāgatānaì anuppādā vā tathāgatānaì, thitāva sā dhātu dhammaṭ̣hitatā dhammaniyāmatā idappaccayatā."
- There is a discourse by Waharaka Thero which addresses this issue about the "five dhammat $\bar{a}$ ". For the benefit of those who can understand the Sinhala language here is the link: "WebLink: waharaka.com:

3. First of all, there are actions by individuals that lead to harmful consequences right away. If one jumps from a tall building, one is bound to get hurt or worse. That is a result of dhamma niyāma (law of gravitation is a dhamma niyāma,) which is cause and effect. Paṭicca Samuppāda is the ultimate dhamma niyāma. It explains how and under what conditions kamma vipāka produces results.

- When something appears in this world, it does not stay the same. It changes in unexpected ways (viparināma) and is eventually destroyed. Thus anything in the world (a sañkhata [sankata in Sinhala]) is subjected to the utu niyāma. Whatever results that kamma vipāka may bring in, they will also eventually go away.
- Bīja (or bīja) niyāma is not relevant to the workings of the plant seeds, as some books explain. It dictates how kamma bīja (seeds) lead to their fruits (vipāka). A "puñña kamma seed" or a "good seed" will always produce excellent results, and a "pāpa kamma seed" or a "bad seed" will generate a bad result. A Sotāpanna would have made all those kamma seeds, that make it possible to have rebirths in the $a p \bar{a} y \bar{a}$, to be ineffective. Thus a Sotāpanna will NEVER be born in the $a p \bar{a} y \bar{a}$.
- Citta niyama involves laws associated with the working of the complex mind, and that can affect kamma vipāka in a significant way. For example, by purifying the mind, one can attain the Sotāpanna stage and thus make INEFFECTIVE all those kamma seeds that could lead to birth in the ap $\bar{a} y \bar{a}$.
- Kamma vipāka are the root causes for all that happens in this world, but their effects can be altered and even stopped by exploiting the other laws of nature. That is what a Buddha discovers when he attains Enlightenment. All kamma vipāka are made ineffective at reaching full Nibbāna or the Arahanthood.

The main point here is that most bad consequences can be avoided by understanding Dhamma, living a moral life, and being mindful (yoniso manasikāra).

## We Have Done Many Good and Bad Kamma in Our Past Lives

4. In this beginning-less long journey of rebirths called saysāra (or sainsāra,) each of us has done an uncountable number of both good and bad things. When we do a good or an immoral act, the kammic energy associated with that act gives rise to a seed, called a kamma seed. It is energy (not a material thing) that stays with our minds until it gets a chance to come to fruition. An apple seed will not germinate and grow into an apple tree until the right conditions (soil, water, sunlight, etc.) appear. In the same way, all our kamma seeds lie in waiting for the right conditions to appear. If we allow such "conditions," we will have to experience the result of that kamma or kamma vipāka at that time.

- Our kamma seeds (kamma bīja) are subjected to the bīja niyāma mentioned above. In either case, a seed gives rise to a plant or a vipāka according to the type of seed. Someone, who did something terrible that only an animal would do, will pay for that may be with a birth in the animal realm; someone who did an act of generosity may get rewarded accordingly.

## Conditions Must be Right to Bring Vipāka of Past Kamma

5. We can keep an apple seed (for example) in a dry, cool place for a long time. Some seeds have been kept intact for thousands of years. It will not germinate until we plant it in fertile soil and provide water and sunlight. In the same way, a kamma seed (good or bad) can lay dormant for a long time until conditions become right for it to germinate. We all have accumulated numerous kamma seeds over these repeated rebirths. What we need to do is to provide conditions for good kamma seeds to germinate and NOT allow conditions for bad ones to germinate.

- Thus kamma is the act, AND kamma vipāka is the result of that act. But since the right conditions need to appear for a kamma seed to "germinate," the vipāka may not come until later in the same life, next life, or even many lives later.
- That is why it is not easy for people to see that their actions will have consequences. Kamma niyāma is not the only law that is in effect; there are four more as mentioned above, and they all work together. It is a very intricate network. In particular, because there is a citta niyāma (principle of thoughts), we also have some control over kamma vipāka. We cannot change any of the five niyāma, but we can OVERCOME a cause (a power) due to a niyāma by building an opposing force.

## Being Aware of the Conditions Is Key

6. We can take many steps to suppress the bad kamma vipāka coming to fruition and ALSO to get good kamma vipāka to come to fruition. As emphasized above, we all have an unlimited number of both good and bad kamma vipāka waiting to bear fruit. Rather than giving in to bad vipāka and saying "what to do, this is my kamma," we can find ways to suppress those. And rather than saying, "I must not have done any good kamma, and this is my fate," we can probe and locate those hidden good kamma seeds and cultivate them. Let us consider some examples:

- If one does not take care of one's physical body, it may become fertile ground for many bad kamma vipāka to come to fruition. If we eat healthily and exercise, the body will not be vulnerable to ailments or injuries.
- The brain needs good food and exercise too. A healthy body and mind exercises such as solving problems, even word puzzles, keep the brain in good condition. But the best is meditation, and vipassanā or insight meditation is better than Samatha meditation. For example, even if one's family has a history of Alzheimer's disease, one can avoid getting by keeping the brain active and healthy.

## Outcome Can be Changed - Environment And Associations Are Critical

7. One may be born into poverty because of a past kamma vipāka that came to fruition at the death of the previous life. But this is NOT a reason to give up. Any person has an unlimited number of good kamma vipāka waiting to come to fruition. Indeed, birth to a poor family did not set up optimum conditions. But one has control over the citta niyāma mentioned at the beginning (see, "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsavas)'"). One could use one's mind to overcome this condition and cultivate the background to achieve success.

- That is why the environment is critical to anyone. One needs to surround oneself with optimistic, moral people, who will help cultivate the good qualities that lie dormant. At the same time, one needs to avoid "bad company" that could pull one in the wrong direction. It is not that any person is intrinsically good or bad. Rather, at any given phase of life or even through most of this life, some people may be displaying their "bad habits" that have come to the forefront. One will be affected negatively by associating such people.
- The environment is CRITICAL for young children starting from the time of conception. Even the fetus in the womb is affected by the environment. For example, a loving mother and father showing affection to each other positively affect the baby. When the mother is being abused by the father it will be a negative effect.
- It is critical to have a nurturing environment within the family, and also in the school. A significant part of an individual's character is molded by the first 10-15 years of life. That is the time they can acquire habits and once established, it will take a lot of effort to change them. The parents must instill good habits: moral behavior, eating well, exercising, associating with good friends, avoiding bad friends, studying well, etc.

## "Wearing Out" Some Kamma Seeds

## 8. It is also possible to remove many of one's bad kamma seeds.

- When we acquire a "bad kamma seed," we get indebted to another being. In the same way that one can be debt-free by paying off existing loans, one can "payback" old debts accumulated in the cycle of rebirths. That can be done by "transferring merits" when one does good deeds, and also by doing the Ariya Mettā Bhāvanā. See, "Transfer of Merits (Pattidana)- How Does That Happen?" and "5. Ariya Metta Bhāvanā (Loving Kindness Meditation)."

## Laws of Kamma Are Complex

9. The world is VERY complicated. Because all those five niyama are acting simultaneously to enforce the "cause and effect," it is not possible to sort through each event in isolation and say, "this is THE reason for this particular event." There could be a dominant cause in some cases, but most times, it is a combination of several, and most of those are from the past.

- The main thing we have remember is that each action by us will have consequences (law of kamma). There is nowhere to hide. Even if we can fool law enforcement sometimes, nature cannot be fooled.
- We need to make a concerted effort to get rid of bad habits and acquire and cultivate good habits. A habit can snowball into a saysāric habit, good or bad (related to the law of citta and law of bīja). The environment is an essential factor in getting rid of bad habits and acquiring/cultivating good habits.
- We need to be constantly aware that there are zillions of kamma bīja (good and bad) waiting to germinate. We should not provide conditions for "bad seeds" to grow. Thus we should avoid bad
company, bad environment, etc. We must also provide conditions for "good seeds" to germinate (i.e., study well, provide the necessary requirements to get a promotion or a job, and learn and practice Dhamma). I am sure you can apply these principles to your own life; each one is different.
- Then some things happen due to random events: floods, hurricanes, earthquakes, etc. These come under utu niyama or circumstances that occur due to physical causes in the environment. When those happen, thousands of apparently "unconnected" people may be affected the same way. Again, this is partly due to the incredible number of kamma we have accumulated in this beginning-less rebirth process. There is ALWAYS something from the deep past that is going to MATCH any circumstance.

## Nibbāna Attained via Removing Upādāna (and Taṇhā)

10. Finally, there is a misconception out there that one needs to get rid of all kamma (more accurately kamma vipāka) to attain Nibbāna. That is entirely false. One reaches Nibbāna via removing deep-seated cravings, called $\bar{a} s a v \bar{a}$; see, "The Way to Nibbāna - Removal of Āsavas." More details at "Difference Between Tanhā and Upādāna."

- Another way to say the same thing is to say one needs to remove lobha, dosa, and moha or the defilements in mind.
- However, one could remove most of one's bad kamma vipāka via cultivating Ariya Mettā Bhāvanā; see, \#8 above.

Some of the main concepts are discussed further in the "Sanjkhāra, Kamma, Kamma Bīja, Kamma Vipāka," "Habits and Goals," "Sansāric Habits and Āsavas," "The Way to Nibbāna - Removal of Āsavas," and other related posts.

### 7.1.4.7 How to Evaluate Weights of Different Kamma

## Revised February 21, 2018

In the previous essay, "Ten Immoral Acts (Dasa Akusala)," we looked at the ten different types of acts that will have bad kammic consequences.

1. First of all, the most potent of all is micchā dittthi. The only akusala completely removed by a Sotāpanna is the micchā ditṭhi and in doing that he/she removes an unimaginably huge amount of defilements; see, "What is the only Akusala Removed by a Sotāpanna?."

- One critical problem many people have is that they try hard to avoid actions with relatively small kammic consequences, while unknowingly doing things that have stronger kammic consequences. Let us take an example: Suppose we have a large tank of water which is losing water due to many holes at the bottom. Some holes are pin holes, some are a little larger, and there are a few holes that are big and losing water fast. Obviously, one would want to plug those large holes first. Then one would fix the medium-size holes and those pin holes are the last to be fixed.

2. We can see that many akusala are with "acts" that are directed towards other beings, whether it is done bodily, verbally, or just by thought. In principle, a being could be in any one of the 31 realms (see, "The Grand Unified Theory of Dhamma").
3. The severity of the consequence of any misdeed (ie., kamma vipāka) involving another living being depends strongly on the "level of existence" of the living being from lowest level of realm 1 (niraya) to the highest at the 31st realm (fourth arūpa loka); Any "Ariya" or a Noble Person (who has attained one of the four stages of Nibbāna), are at the highest levels regardless of the realm. A hurtful word against an Ariya carries thousand-fold bad kamma vipāka compared to killing thousand ants.

- See, "Details of Kamma - Intention, Who Is Affected, Kamma Patha." This post has been updated on February 21, 2018, and provides a simple two-step process to evaluate a given situation.

4. It is difficult to identify whether a given human is just an immoral human or an Arahant by just looking at that person. Human realm is unique in many ways.

Thus, we can try to sort out the kammic consequences of a given immoral act on the 'level of consciousness" of the being that act was directed to:

- Regardless of the realm, the highest four levels are Arahant, Anāgāmī, Sakadāgāmī, and Sotāpanna. Humans can attain all four levels.
- Out of the 31 realms we can directly experience only the human and animal realms. Thus, normally we need only to evaluate how our actions affect other humans AND animals.
- Since any animal is inferior to any human, we need to pay special attention to how we interact with other human beings.
- In particular, it is not possible to judge whether a given human has attained a Nibbānic state. Even by directing hurtful words to an Ariya (one who has attained at least the Sotāpanna stage), one could be acquiring thousand-fold more bad kammic potential compared to doing the same to a normal human.
- In some cases, even the person in question may not know that he/she is a Sotāpanna. There may be "jäti Sotāpannas," i.e., those who had attained the Sotāpanna stage in a previous life and thus born as a Sotāpanna, and may not realize it.
- Thus we need to be very careful with dealing with fellow humans in particular.

5. When we say killing is immoral it is implicit that killing is taking the life of any living being. But killing a human has a kammic consequence that is much higher compared to killing an animal. Killing a Sotāpanna has a even more drastic consequences, Sakadāgāmī even higher, Anāgām̄ even higher, and killing an Arahant will have the highest, and is of the strongest kind at par with killing a parent (an annantariya kamma that will cause the very next birth in an apāya).
6. Similarly other immoral acts will have consequences depending on the "consciousness level" of the living being. It is not a matter of one particular living being is "better" than another.

- Rather it is a matter of how valuable that "level" is, and how difficult it is to attain that "level." One has been born a human because of the merits one has acquired in previous lives; it is extremely difficult to get a human birth as we will discuss in a separate post; see, "How the Buddha Described the Chance of Rebirth in the Human Realm."
- One becomes a Sotāpanna by cultivating moral behavior and by purifying one's mind; thus a life of a Sotāpanna is much more valuable compared to a normal human being.

7. Even among humans who have not attained any Nibbānic state, there are "different levels of consciousness": One who has more wisdom (pañña) is at a higher level than one with less wisdom.

- Here wisdom does not mean book knowledge, but knowledge of Dhamma; understanding of the true nature of "this world", or anicca, dukkha, anatta. Thus the possibility of that person attaining a Nibbānic stage is more likely, compared to one who has less wisdom.

8. Another important thing is not to worry about things that one does not have any control over. Everyday, we kill so many small animals unintentionally: stepping on them while walking, cleaning the yard, cleaning the house, and even while boiling water.

- We need to remember that "kamma is intention." We are not boiling water to kill any unseen life forms, rather we boil water to make sure we do not get sick by drinking contaminated water.

9. It is not even possible to live "in this world" without harming other beings unintentionally, even though we may be aware that our acts may lead to the destruction of many life forms.

- Once a bhikkhu who had developed abhiññā powers was getting ready to drink a glass of water, and with his ability to "see" finer things saw that there were numerous microscopic beings in the water glass. He tried to filter them out, but they were too small. The Buddha then explained to him that it is not possible to live without doing things that are necessary to sustain one's life.
- In another example, suppose one has a wound; if left alone it could lead to one's death. Thus one needs to apply medication to the wound. However, that wound is infested with numerous microscopic living beings, and they will be killed by the medication.
- Walking on the ground (especially grass) kills many insects; but we cannot live our lives without going places. What matters is our INTENTION. When one is walking, there is no intention of killing living beings.

10. What we need to do is to be careful not to do any harm to even the smallest of the creatures with a hateful or greedy mind. It is the intention, or the state of the mind, that counts.

- There is this story about an old woman who was very careful about not breaking the five precepts. But she was extremely greedy; she was quite stingy, did not give much to charity, and kept all her money under her pillow. Because of that greed, she was born a peta (a hungry ghost).
- It is relatively easy to keep the five precepts. What is harder is to purify one's mind of greedy, hateful, and ignorant thoughts. This is what needs to accomplished in true "ānāpānasati bhāvanā"; see, "․ What is Ānāpāna?."
- Even though we may not be greedy or hateful in this life, we may have acquired such bad kamma in previous lives. This is why the Buddha said even if one lives morally in this life that does not guarantee a good rebirth unless one has attained the Sotāpanna stage of Nibbāna; see, "Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire."
- Buddha Dhamma is all about the mind. Purifying the mind is the key, not just to follow set rules. Just following precepts will not be enough.

11. Finally, it is important to remember that hate is worse than greed. Excessive hateful actions lead to rebirth in the lowest realm, the niraya. Excess greed lead to rebirth mainly as petas (hungry ghosts).

- Mixture of hate and greed lead to rebirth in all four lowest realms, the apāy $\bar{a}$. Even if one does not carry over the hateful or greedy thoughts to speech or bodily actions, they still count especially if one thinks about them most of the time.
- This is why it is important to develop good meditation habits; see, "Bhāvanā (Meditation)." A mind free of hate and greed becomes less agitated and peacefuil; then it leads to wisdom (paññ̄ $\overline{\text { }}$ ).

More details on weights of different kamma at: 12 . Key Factors to be Considered when "Meditating" for the Sotāpanna Stage. Also see, "What is Kamma? - Is Everything Determined by Kamma?."

### 7.1.4.8 Account of Angulimāla - Many Insights to Buddha Dhamma

February 17, 2019; revised March 7, 2020

## Introduction

1. Angulimāla had killed 999 people but was able to attain the Arahanthood within a few weeks after meeting the Buddha. His life story can help us understand how and why even vipāka for such highly immoral deeds can be overcome.

- Even though the laws of kamma play an important role in Buddha Dhamma, one can overcome the consequences of such highly immoral actions. That is by comprehending the more fundamental principle
of causality: one can bypass all such kamma vipāka (all future suffering) by getting rid of avijjāa and $\tanh \bar{a}$ (the root causes).
- The following two posts also discuss kamma and kamma vipāka: "What is Kamma? - Is Everything Determined by Kamma?" and "How to Evaluate Weights of Different Kamma."

2. I highly-recommend a good account of the life story of Angulimāla here: "WebLink: accesstoinsight.org: Angulimāla - A Murderer's Road to Sainthood."

- Reading that account first will help with the discussion below.

## Brief Summary of Angulimāla's Life

3. To summarize the critical points in the story of Angulimāla:

- He was called Ahimsaka ("Harmless") as a boy and was an excellent student. He was the best in class at the premier learning institute of that day in Takkasila (Taxila). His peers were jealous and tried to convince the teacher that Ahimsaka was plotting to take his job.
- The teacher finally believed those false accusations and came up with a way to get Ahimsaka killed. When Ahumsaka finished his studies and asked how he can pay for his education, the teacher said: "You must bring me a thousand human little fingers of the right hand."
- That is how Ahimsika became a killer and came to be known as "Angulimāla", because he started wearing some of those cut fingers in a garland around his neck.

4. Angulimāla had killed 999 people and was about to kill his mother to get the last finge when the Buddha intervened.

- The quick-witted Angulimāla was able to comprehend a few verses that the Buddha uttered and asked the Buddha to ordain him right there.
- Ven. Anggulimāla became an Arahant soon afterwards.
- Later on, the Buddha reminded Ven. Angulimāla that he had now been "born" a Āriya (Noble Person), even though he had killed so many people when he was a murderer. This concept of changing "bhava" even during a given existence discussed below.

## First Observation - Importance of Gati and Environment

5. The first thing we can see is that obedient and well-behaved Ahimsika became a murderer because of his teacher's influence. External influences (family, friends, etc.) can be a crucial factor in changing one's gati (pronounced "gathi") loosely translated as "character." (Note that Pāli words are written not in "standard English," but with an adopted "Tipiṭaka English" convention. See, ""Tipitaka English" Convention Adopted by Early European Scholars - Part 1" and "Tipitaka English" Convention Adopted by Early European Scholars - Part 2")

- This is why parents must always be on the lookout on what kind of friends a child has. Friends can be a considerable influence on a child.
- This is also true for adults. One must get away from those who pull in wrong directions, and make new associations along "good directions."
- Gati are discussed in many posts at this site. One can find a list of relevant posts by entering "gati" in the "Search" box on top right.

## Second Observation - There is no "unchanging self"

6. The second thing we can see is that there is no "unchanging self."

- Harmless Ahimsika became a violent murderer in Anggulimāla and killed almost 1000 people.
- Then that violent Angulimāla the murderer, became a Noble Person within a short time after meeting the Buddha and within weeks Ven. Angulimāla became an Arahant too!

7. In the "bigger picture" of the "three lok $\vec{a}$ " and " 31 realms," we saw that the "lifestream of any living being" can change from "good to bad", "bad to good", "good to bad again," etc. an uncountable times in the beginning-less rebirth process.

- We all have been in the highest brahma realm and the lowest apāya too. But we all have spent most of that time in the suffering-filled $a p \bar{a} y \bar{a}$.
- The only way get out of this "ceaseless wandering in the rebirth process (saysāra or saimsāra)" is to become an Arahant, as Ven. Angulimāla did.
- The first step is to attain the Sotāpanna stage be free of at least the four lowest realms (apāyā).

## Third Observation - There is a Causal Link ("Sort of a Self")

## 8. However, as we discussed in the previous post, it is not possible to say that "there is no-self" either.

- Nothing happens without a reason or a cause (at least one, but usually many causes).
- A human is reborn an animal or a brahma due to a reason. There is a CONNECTION between two adjacent "bhava" or existences.
- Ahimsika did not become Angulimāla without causes. One cause was the influence of his peers on the teacher. Then Ahimsaka blindly followed the instructions of the teacher.
- But then all that was reversed due to the influence of the Buddha.

9. That is why it is also incorrect to say, "there is no-self." There is a always a "self" - living at least momentarily - that is responsible for how that "self" evolves in the future.

- But that "changing self" can and will change between "good' and 'bad" based on many factors. Key factors are self's deeds and external influences on that "self" at any given time.

## Fourth Observation - Two Types of "Bhava" or Existence

10. Another critical point is that one could be born in a "temporary bhava" or "temporary existence" DURING this life. As we saw, Angulimāla switched "temporary bhava" from an innocent boy to a murderer, and back to an Arahant!

- For example, a person who drinks habitually is not drunk all the time. He is in a "drunken bhava" or "drunken existence" while he is intoxicated. The next day he is sober and would not be in a "drunken bhava" until he drinks again.
- In the same way, one is in an "angry bhava" when she gets angry. But after the anger subsides, she is not in that "existence" or "bhava" anymore.
- Temporary bhava (or transient existences) explained via "Idappaccayatā Pațicca Samuppāda" processes (those operate during a given life) . Even though only one type of Paṭicca Samuppāda is presented in the textbooks today, there are different types.

11. When one habitually gets into such a "temporary bhava" repeatedly, then that becomes a cultivated gati or habit/character.

- In that case, it could lead to a new "upapatti bhava" (or "bhava associated with rebirth") too. For example, when one gets angry all the time and then one day kills a another human, that could lead to rebirth in an apāya. That is a "more permanent bhava" that can last a long time.
- That is the more common Paṭicca Samuppāda cycle, i.e., the "upapatti Paticca Samuppāda."
- The section on "Paticca Samuppāda" is a must-read.

## Fifth Observation - Going Back and Forth in the Rebirth Process

12. So, there could be some period in the rebirth process where one mostly does "good deeds", cultivates "good gati," and thus gets "good bhava" and therefore "good births" ( $j \bar{a} t i$ ). We discussed the difference between bhava and $j \bar{a} t i$ in the post: "Bhava and Jāti - States of Existence and Births Therein."

- Then, one's gati may change to "bad gati," especially when one comes under "bad influences and associates." In that case, one may start on a "downward path" and eventually one's gati will become harmful to the extent that one will get a "bad bhava."
- We can see such examples around us. We all have seen good children becoming drug addicts and then becoming even murderers due to bad associations. The opposite happens too, when a violent person may change those bad gati and become a "good citizen" under right influences.
- That is what we all have been doing (going back and forth between good and bad existences,) in this beginning-less rebirth process.

## Sixth Observation - Angulimāla's Realization

13. When Angulimāla was chasing the Buddha and could not get even close to the Buddha. To quote from the account referenced above, Angulimāla stopped and called "Stop, monk! Stop, monk!"
"I have stopped, Angulimāla. You stop, too."

- That got Angulimāla to thinking, and he started asking why the Buddha - while still walking — said that he had stopped. The Buddha explained that he had stopped his samsäric wandering (rebirth process) and had overcome all suffering.
- That is when Añgulimāla gained insight and became Ven. Añgulimāla.

14. Therefore, the critical point to understand is that it is NOT ENOUGH just to do "good deeds," even though that is a must.

- One MUST take another step and realize that we have been trapped in this rebirth process filled with (mostly) suffering due to two reasons.
- Let us briefly discuss those two CRITICAL points.

## Seventh Observation - The Critical Discovery of the Buddha

15. First, until a Buddha comes to the world (meaning a human attains the Buddhahood by purifying the mind to the greatest extent), humans are unaware of the "wider world view" with "three types of lok $\vec{a}$ " and 31 realms.

- Even though one could be occasionally born in "good realms" at or above the human realm, beings are reborn mostly in the lowest four realms ( $a p \bar{a} y \bar{a}$ ) due to misdeeds done in seeking sense pleasures.
- Of course, there is suffering in any realm, but it is less in higher realms.
- Therefore, most of the rebirths lead to much suffering. That is the essence of the First Noble Truth.

16. Secondly, until a Buddha comes to the world, it is not known hot to escape from this endless rebirth process filled with suffering.

- There have been, and there will always be teachers who realize that misdeeds lead to unfortunate rebirths and good deeds lead to good rebirths, and teach that to others.
- But it is only a Buddha that can figure out that doing good deeds is not enough. One needs to see the anicca nature of this world of 31 realms. That means even if one gets a rebirth in the highest realm with long lifetimes of billions of years, one will end up in despair and eventual death.
- Then one gets back to the same cycle of rebirths, where one will inevitably do evil deeds (due to cravings or sense temptations) and will be born in the apayy $\bar{a}$.

## Eighth Observation - The Root Cause for Suffering

17. Therefore, the key is to realize that one needs to REMOVE the tendency to be tempted by sense desires.

- One needs to "see" that anicca nature, i.e., it is a waste of time to seek happiness in this world. That will sooner or later lead to rebirth in the ap $\bar{y} y \bar{a}(d u k k h a)$. Therefore, in the end, one will become helpless (anatta), when born in an apāya.
- It is not possible to forcefully suppress cravings under "strong sense temptations." When one sees the "anicca nature," cravings are automatically removed (in four stages of Nibbāna).
- That is the Second Noble Truth, the cause of future suffering.

## Ninth Observation - The Way to Nibbāna

18. Once the "big picture" of the 31 realms - together with how one WILL BE born among them due to one's actions (kamma) - is understood, one would have removed the ten types of micchā ditthi.

- That is because that "complete picture" requires the rebirth process, laws of kamma, etc.

19. Then one can begin to understand the "unfulfilling and dangerous nature of the wider world of 31 realms" or the "anicca nature."

- That "anicca nature" explains how "dukkha" or suffering arises, and one will become helpless (anatta) in the rebirth process. Those are three main characteristics (anicca, dukkha, anatta) that are called Tilakkhana (and they are inter-related).
- That is when one attains the Sotāpanna stage of Nibbāna.

20. That is why anicca has nothing to do with "impermanence," and "anatta" has nothing to do with a "self" or a "non-self."

- That knowledge about Tilakkhaṇa or the "true nature of this world" is available only in Buddha Dhamma.
- Until a Buddha comes to this world and DISCOVERS that "bigger picture," no one will be able to see that "bigger picture." Thus humans are unaware of the dangers in remaining in this cycle of rebirths filled with suffering.

## Tenth Observation - Kamma Vipāka Will be Effective Until Death of an Arahant

21. Even though Ven. Angulimāla had attained the Arahanthood, he was getting injured by "stone-throwers" regularly. Most of the time, those stones were not directed at him, but he was getting hit accidentally.

- As described in the above essay, "with blood running from his injured head, with his bowl broken, and with his patchwork robe torn, the venerable Angulimāla went to the Blessed One. The Blessed One saw him coming, and he told him: "Bear it, brāhmanā, bear it, brāhmanā! You have experienced here and now the ripening of kamma whose ripening you might have experienced in hell over many a year, many a century, many a millennium."
- If Angulimāla died without being saved by the Buddha, he would have suffered in the apāyā for an unimaginable time!

22. As we had discussed before, even a Buddha cannot avoid some of kamma vipāka. The physical body in this life arose due past kamma, and many aspects associated with that body cannot be changed.

- At the death of the physical body, there are no more rebirths anywhere in the 31 realms. Then, there is no way for any kamma vipāka to materialize (come to fruition). That is why the physical death of an Arahant is called "Parinibbāna" or "complete Nibbāna."
- There will be absolutely no suffering after the Parinibbāna.

23. Therefore, we can see that there are many insights in the accounts of notable personalities in the Tipitiaka. They are all consistent with the core teachings.

### 7.1.4.9 The Four Bases of Mental Power (Cattāro Iddhipāda)

I used to have this post titled, "The Four Factors of Accomplishment." I changed it because those words do not do justice to these four mental qualities. They are called satara Iddhipāda in Pāli or Sinhala, meaning factors that are critical to accomplishing any goal, whether mundane or transcendental.

- Iddhi is conventionally taken to mean "magical" powers. Those yogis who could see things that are far away, hear sounds that are far away, read minds of others, etc., were supposed to have iddhi powers. They acquired those powers by harnessing the power of these four factors to KEEP THEIR DEFILEMENTS SUPPRESSED.
- When one works towards attaining Nibbāna, one can use the same factors to REMOVE defilements from the mind.
- One could use the same factors to attain mundane goals, such as achieving financial independence, excelling in academics or a sport, improving health, etc.

They are chanda (liking, but close to an obsession), citta (thoughts), viriya (effort), and vīmaimsā (analysis). Chanda is NOT greed, it is the determination to attain a goal.

- Any innovator, business person, scientist, architect, in fact anyone who is an expert at his/her occupation, knows these factors are critical, even though they may not have thought about them.

1. One needs to have an liking (more like an obsessed liking) for the project; this is called chanda which we can translate as liking. It is not greed, but pure in quality and grows to become a life goal.
2. When one has this "obsession", one keeps thinking about it all the time. When one gets up at night to go to the bathroom, one thinks about it; it is the first thing that comes to mind when one wakes up. This is called citta; we will call it thought or contemplation.
3. Thus one makes one's best efforts (viriya) to achieve the goal. This is what makes swimmers get up early morning to do laps, a scientist/innovator forgets about his/her meal, an innovator stays awake thinking about how to make improvements to his products, etc.
4. One is always on the lookout for any faults or possible improvements in current efforts. If the concepts involved do not make sense, one is always looking for a better explanation, a better way to make something, etc. This is reasoning/investigating (vīmaimsā).

- These factors are mutually supportive of each other. Because of this, once getting started (slowly), they can lead to explosive growth; these factors feed on each other, and the project becomes selfsustaining. This is called exponential growth. Thus it is hard to calculate the time taken to finish the project by linear extrapolation.
- The same is true for someone starting on the Path. Initially, it takes time to absorb the concepts. But IF THE CONCEPTS ARE CORRECT (i.e., no contradictions), then progress is made very quickly. The principle of paticca samuppāda starts working and one will be attracting resources that will help in ways
one would not have even thought about; see, "The Law of Attraction, Habits (Gati), and Cravings (Āsavas)."

I know this by experience both as a scientist and now as a follower of the Path. After working for over four years, up until 2013, I had made only slow, steady progress on the Path. But I progressed enough that I kept looking for better explanations, discarding many things on the way. Since the middle of 2013, the growth exploded. That is when, just by the law of attraction (see, "The Law of Attraction, Habits (Gati), and Cravings (Āsavas)') I came across the pure Dhamma.

- By the way, this is process the Buddha called bhāvanā (meditation). One keeps contemplating, clarifying, investigating, etc. it all the time, i.e., "Asevitaya, bhavithaya, bahuleekathaya, ......"
- One can be meditating in all four postures: sitting, standing, walking, and lying down (on a bed). Of course one can concentrate better sitting down in one of the more formal sitting postures.

## Deeper Meanings when Cultivating the Noble Eightfold Path

See, "Javana of a Citta - The Root of Mental Power" for an anlysis based on Abhidhamma.

1. Chanda (cha + anda, where "cha" is mind and "anda" is "anduma" or clothes) means wrapping one's mind with appropriate "attire", which here means sammā vaca, sammā kammanta, and sammā ajiva. This is what fuels the "liking" for Nibbāna with increased nirāmisa sukha.

- By the way, a different meaning of "anda" (blind) is implied when chanda is used in "kāmachanda" (= "kāma" + "cha" + "anda"), i.e., mind blinded by kāma or sense pleasures.

2. Citta here means the mindset to attain Nibbāna.
3. However, even if one has liking and mindset on attaining Nibbāna, one needs to make an effort or viriya.
4. Even if one is exerting effort, it needs to be directed in the right direction. Thus one needs vīmaims $\bar{a}$ (investigation/reasoning) to comprehend anicca, dukkha, anatta, and to get to sammā ditṭhi.
5. "Iddhi" means "grow", and "pada" means "headed direction." Thus with iddhipada one is accelerating in the direction that one sets one's mind. Thus all four factors of chanda, citta, viriya, vīmaimsā need to be there.

### 7.1.4.1 Why is it Necessary to Learn Key Pāli Words?

## Original written before October 23, 2015; Revised March 4, 2017; October 8, 2018

I had not given this issue much thought until someone at an online forum pointed out in 2014 that I was using too many Pāli words and it was difficult to understand the meaning of those terms. This is an important point that has two aspects:

- In the Arana Vibhanga sutta (MN 130), the Buddha advised bhikkhus to explain the Dhamma by providing the MEANINGS and not to emphasize a given language. As long as one comprehends the concept, it does not matter what language is used.
- On the other hand, we need to have a way to transmit the key foundational words for future generations without distorting the meaning of such words. And it is difficult to find suitable words in other languages for keywords like anicca, anatta, and paticca samuppāda.
- I have explained the meaning of any Pāli term I use. But for a first-time reader, this could be a legitimate issue. Please use the "Search" button on the top right to locate relevant posts for any keyword. There is a "Pāli Glossary (A-K) and Pāli Glossary (L-Z)" too.

1. Buddha Dhamma is the most complex theory in the world; it encompasses all of nature's laws. Even though its basic premises are not hard to grasp, if one needs to dig deeper, one needs to spend some time "learning the basics", or the "fundamental ideas involved."

- Think about it this way: Can one learn algebra without knowing arithmetic?
- The key is to learn the basic ideas well, words like anicca, anatta, bhava, etc. It is said that one could understand the Buddha's message about existence just by comprehending anicca (which will lead to an understanding of dukkha and anatta), and that is true.
- But that is not possible if anicca is translated into English as just one word: impermanence. The Pāli word anicca means much more than just impermanence. So, it is better for the word anicca and to learn what is meant by that word.
- Viññāna is another word like that. It should not be be translated just as "consciousness"; it is much more complex; see, "Viññāna - What It Really Means."

2. There is another aspect too. If one learns the basic concepts in addition/subtraction or even quantum mechanics, it does not matter what language one uses to learn it. The key is to get the IDEA, not just learn the words. One can learn addition/subtraction or quantum mechanics in ANY language, not by memorizing words but by understanding the key concepts.

- When a child learns how to add/subtract, he/she has to learn the basic multiplication table and the procedures on how to use that knowledge in handling big numbers. After that he/she can solve any arbitrary problem involving big numbers.
- In the same way, one needs to get the IDEAS embodied in some key Pāli words because many of those Pāli words CANNOT be directly translated into other languages: They are highly condensed, each word packed with deep meanings.
- In quantum mechanics, the word "quantum" embodies the subject; regardless of the language one uses, one knows what a quantum is. In the same way, one needs to know what "anicca" is. There is no other word for it in English.
- Once one UNDERSTANDS the meaning of a certain key Pāli word, then one may even be able to find a suitable word in any language to keep it in mind. There is no need to memorize Pāli words for the sake of memorizing. It is similar to learning any concept.
- We just should not change the original Pāli words in the Tipitaka. That is the "blueprint" that needs to be transmitted intact so that Buddha's original message will be kept intact.

3. Let us first examine the reasons why Pāli is a special language.

- The Buddha delivered his discourses in Mäghadhi language; a version of that language suitable for memorization (Pāli) was used to SUMMARIZE those suttā. For example, Dhamma Cakka Pavattana Sutta was delivered to the five ascetics overnight. How many pages would it take to write all that down? Yet, it was condensed into a few pages.
- In the old days, suttā were orally transmitted generation-to-generation, and that was the other reason to condense it into a special form like a poem that is easy to remember and recite. The origin of the word "Pali" comes from that particular way of organization of the words.

4. Therefore, it may take several words in a different language to express the meaning of some Pāli words like anicca, anatta, bhava, etc. Pațicca samuppāda is another whole phrase that is best kept intact and just learn what is meant by that phrase; see, "Paticca Samuppāda - "Pati+ichcha" + "Sama+uppāda"."

- Thus most Pāli words are impossible to be translated word-by-word to other languages. There is a system to glean the true meanings of the suttā as well as the deep subject of paticca samuppāda; see, "Sutta Interpretation - Uddesa, Niddesa, Patiniddesa."
- This is the reason that many commentaries were written in the old days to explain the meaning of keywords and phrases; see, "Preservation of Dhamma" for details.
- Unfortunately, most of those original commentaries (Sinhala Attakathā) cannot be found today, except for three; see the above post.

5. Most of the problems we have today are due to such "word by word" translation of suttā into other languages.

- The most visible and disastrous translations are the translation of the words anicca and anatta into Sanskrit as anitya and anātma; these words were then ADOPTED in the Sinhala language to express the meaning of anicca and anatta. Then within the last two hundred or so years, those Sanskrit words were directly translated to English and now have become established to mean "impermanence" and "noself"; see, "Misinterpretation of Anicca and Anatta by Early European Scholars."
- Incorrect translation of just those words have kept the message of the Buddha hidden for over fifteen hundred years. It is not an accident that there have not been that many Arahants during that time.
- For the correct meanings of these words, see, "Anicca, Dukkha, Anatta - Wrong Interpretations" and the follow-up post.

6. In fact, it is said that one can reach the Sotāpanna stage by just comprehending the true meanings of anicca, dukkha, anatta, the three characteristics of the world. These three words have embodied in them a very broad message. Whole sutta were delivered to describe what was meant by those words! It is WRONG and DISASTROUS to just translate them as impermanence, suffering, and "no-self."

- But if one wishes, and knows the correct interpretations, one can dig much deeper to unimaginable depths. For example, there is a process involving 9 steps where a given citta starts off as a pure (pabhasvara) citta and gets "contaminated" before getting to the viññānakkhandha stage within within a billionth of a second!
- Those are discussed in detail, for example, "Amazingly Fast Time Evolution of a Thought (Citta)" and "Pabhassara Citta, Radiant Mind, and Bhavañga."
- However, there is no need to go to that depth for most people (and many will not have enough time to do that anyway, but there could be a few who would really enjoy it).
- I just want everyone to appreciate Buddha Dhamma for what it is, and to help remove many misconceptions that are out there today.

7. To summarize, I cannot emphasize enough the importance of UNDERSTANDING the meanings of key Pāli words. It may take some time to truly grasp those meanings. I keep revising those key posts, whenever a better way to express an idea comes to mind or when someone else points out a better way to express it.

- Experience is a key factor in understanding. The word "elephant" may not mean anything to someone who does not understand English. But if it is shown to him what an elephant looks like, then he can associate the word "elephant" with the big animal.
- In the same way, it is important to UNDERSTAND what anicca means, by using one's experience: for example, we cannot maintain even our body the way we would like for the LONG TERM, etc. Then you look at others, especially those who are even older than us, or those who died of old age, and realize that it is true. Then you think about anything in this world, and realize that it is true, i.e., we cannot maintain ANYTHING in this world to our satisfaction, and that is anicca.
- Also see, "Saññā - What It Really Means."

8. The following is a table with some key Pāli words and links to a few posts that describe what those words mean. More posts probably can be found by using the "Search" button on the top right.

### 7.1.5 Buddha Dhamma and Morality

"Origin of Morality (and Immorality) in Buddhism"
"Is Eating Meat an Akusala Kamma (Immoral Deed)?"
"Do Things Just Happen? - The Hidden Causes"
"Craving for Pornography - How to Reduce the Tendency"

### 7.1.5.1 Origin of Morality (and Immorality) in Buddhism

1. Morality and immorality are both built-in to nature. A human can choose to become moral or immoral. This is because a human has a mind that can grasp right from wrong; on the other hand, an animal does not have a developed mind that can sort out good deeds from the bad most of the time.
2. In Buddha Dhamma, which describes nature's laws, the foundation of the moral code is the set of ten moral actions (dasa kusala), which are to avoid the ten immoral actions (dasa akusala); see, "Ten Immoral Actions (Dasa Akusala)" and the follow-up post.
3. If one does not follow this fundamental moral code, one becomes indebted to other humans and also to the nature (which means all living beings, from which we "see" only a small fraction) in general. In this life as well as in previous lives, we have become indebted to other beings.

- Thus getting out of that debt, as well not to get into new debts, is also a part of the moral code in Buddha Dhamma; see, "Kamma, Debt, and Meditation" for more details.
- This is in the "vinaya pitaka" of the Tipitaka; it is also described in the suttā in the sutta piṭaka. The third section of the Tipitaka, Abhidhamma, describes the ten moral/immoral actions in depth.

4. Now let us see how most of our conventional moral code(s), comes from these two foundational aspects of Buddha Dhamma.

- Of the ten immoral actions three are done with body: killing, stealing, and sexual misconduct. The basic difference with "conventional code" is that killing of animals is not considered immoral in many societies.
- There are four immoral actions done with speech: lying, slandering, harsh speech, and frivolous talk, of which the latter is not taken seriously as immoral in most cases; but one can experience the benefits of avoiding it for oneself.
- Those seven immoral actions and speech ARISE due to the three kinds of immoral thoughts: greed for other's belongings, ill will or hatred, and established wrong views (lobha, dosa, moha). In a way the last one is the root cause for all other nine, because one would not violate any of them if one knew the true nature of the "wider world" (of 31 realms of existence and the rebirth process therein): that it is unfruitful to engage in any of those nine immoral actions (called "avijj $\bar{a} "$ " or ignorance).

5. Then there is the other aspects of morality that comes from abstaining from getting into new debt and paying off old debts (from the vinaya).

- As one can easily see, giving (dana) in general is an excellent way of "paying off debt." Since we do not know who we have becomes indebted to in this long cycle of rebirths, giving can be to anyone, including animals. For animals, the best giving is of course abstain from killing; not to take their lives. Even though they cannot think like us, they do have feelings.
- This point of "being debt free" incorporate many of our "conventional moral actions": helping out others, being considerate to others, etc.
- A big part of this is also making sure to fulfil one's responsibilities. All our associations have, at the root, "long term debts" in play even though we do not realize it. The biggest debts are those to our families and especially to children (and parents in return).
- We constantly benefit from the actions of innumerable others living in this complex society; we depend on each other for survival. Our food, energy needs, infrastructure needs, are hard to sort out. The best way to pay off such debts is to do "one's own part", honestly doing one's own job and being a "good citizen."

6. But the most important thing is to understand the true nature of this "wider world." When one has that understanding it will become automatic to follow the moral code. One does not have to make an effort, because one's mind clearly sees what is right and what is wrong. There are then such meritorious actions (puñña kriya), which cultivate the "moral code behavior" and also purifies the mind; see, "Punna Kamma Dāna, Sīla, Bhāvanā."

- The goal of this website is to clarify how people engage in immoral actions because their inability to REALLY understand the true nature of this "wider world" (anicca, dukkha, anatta) and thus to help get rid of such wrong views.
- If one understood the "long term consequences" (and unfruitfuiness) of acting with extreme greed and hate, then one becomes automatically moral.

7. Finally, morality is not a one street. Unfortunately, the nature has both morality and immorality built-in. Even though we think, "how one can do a highly immoral act like killing another human and have a peace of mind?", there are some who do ENJOY such acts. People like Hitler and Pol pot, as well as serial killers, are good examples. They PLAN and carry out such vicious deeds with pleasure.

- Thus the nature, at least on the surface (because the consequences are hidden and time-delayed), is neutral on the matter of morality and immorality. One can go the moral route or the immoral route. Humans have the ability to sort out which route is the correct one. However, it is not easy for children to figure that out. This is why the guidance of the parents and teachers is CRITICAL to point a child in the right direction.

### 7.1.5.2 Is Eating Meat an Akusala Kamma (Immoral Deed)?

## Published before October 23, 2015; revised October 19, 2016; February 16, 2018

Note added June 2, 2016: I decided to revise this post because I received comments from a few people who thought it could encourage people to eat meat. My intention was not that, but merely to point out that there are much worse things people ordinarily do even without thinking twice. It is best to avoid eating meat out of compassion for animals.

1. The Buddha spent a lot of his time dispelling "bатипи matha" or "superficial concepts about morality" adhered to by the vedic brahmins of that day.

- It is unfortunate to see that many current "Buddhists" are practicing the same "bamunu matha." We have gone a full circle and are back to status that the Buddha tried very hard to change.
- The reason is that we humans have the tendency to judge everything by how we perceive them with our five physical senses, on outward appearances. There is more to nature than what we see (ditta), hear (suta), taste (rasa) and smell (muta), and perceive (vinnata). The whole point of the appearance of a Buddha in this world is to show us that the truth is much deeper, and we need to "see" with pañ $\tilde{n} \bar{a}$ (wisdom). This will become clear as one learns Dhamma.
- Thus the Buddha advised us to go beyond that and to "see the reality" by always paying attention to his "pubbe ananussutesu dhammesu....", or "'dhamma that has never been heard before...." Therefore, let us analyze this matter using his "cause and effect" doctrine, and not the absolute, fatalistic doctrine of kamma; see, "What is Kamma? Is Everything Determined by Kamma?."
- Thus, sometimes, the outward appearance of morality could be nothing but micchā dittthi. Some people try to attain Nibbāna by following rituals, and this is actually one micch $\bar{a}$ dittthi one needs to get rid of (silabbata paramasa) before attaining the Sotāpanna stage.
- Misconception of categorizing "eating meat" as an akusala kamma is a micchā ditthi too. Since there is ample evidence in the Tipitaka that the Buddha himself accepted meat prepared under certain conditions (see \#9 below), are these people saying that the Buddha himself committed an akusala kamma?

2. In the "WebLink: suttacentral: Amagandha Sutta (Sutta Nipata 2.2)", the Buddha explained to a brahmin why engaging in dasa akusala, and NOT eating "properly prepared" meat is a duccarita (immoral deed). If one kills an animal to get the meat, then it is not "properly prepared."

Pāli verse:
"Pāṇātipāto vadhachedabandhanam,
Theyyaì musāvādo nikativañcanāni ca;
Ajjhenakuttaì paradārasevanā,
Esāmagandho na hi maìsabhojanam.
Here is one verse from the WebLink: suttacentral: English translation:
"Taking life, torture, mutilation too, binding, stealing, telling lies, and fraud; deceit, adultery, and studying crooked views: this is carrion-stench, not the eating of meat."
3. Devadatta, who tried to kill the Buddha and thereby to "become a Buddha", first tried to split the Buddha Säsana by proposing "five strict conditions for the bhikkhus to obey." His intent was to show that he was "more moral" than the Buddha.

- Devadatta demanded that the Buddha accede to the following five rules for the monks: they should dwell all their lives in the forest, live entirely on alms obtained by begging, wear only robes made of discarded rags, dwell at the foot of a tree, and abstain from eating meat.
- The Buddha replied that Buddha Dhamma does not advocate a "path of rituals" (vatha). Instead one attains Nibbāna by cleansing one's mind and moral behavior follows automatically. This is what is mean by, "sanvarattena silan," or "when one sees the futility of 'san' via comprehension of anicca, dukkha, anatta, moral behavior or 'silla' is realized automatically"; see, "What is "San"? Meaning of Sansāra (or Samisāra)."
- On the other hand, there are people who are genuinely repulsed by the thoughts of animals living under harsh conditions and being killed in animal farms and have voluntarily given up meat eating, and that is good. In fact, as one gains pañ̃̃̄̄ (wisdom), one's craving for many sensually pleasurable things, not just meat, automatically diminishes.
- The craving for excess sense pleasures diminish automatically when one starts feeling the nirāmisa sukha and realizes that that is much more calming and long lasting to the mind than any sense pleasure that is brief, see, "Three Kinds of Happiness - What is Nirämisa Sukha?."
- But the point is that pañña (wisdom) comes through understanding the true nature, and not being persuaded via untruths.

4. In the Jivaka sutta, the Buddha states that bhikkhus can accept meat, " when it is not seen or heard or suspected that an animal has been purposely slaughtered for that offering." I also found out recently that the custom those days was to use "pavatta mānsa" for bhikkhus which means the meat was from animals killed by other animals in the forest (lions and tigers normally eat only parts of an animal and leave the rest which people then recover for food).

- However, the Buddha prohibited bhikkhus from eating the flesh of human, elephant, horse, dog, cat, lion, tiger, leopard, bear, hyenas. This was done for various reasons and the chief among them is that they are not suitable for human consumption.
- Just like some vegetations are toxic, some meats can have harmful effects. Other than that, meat of a dead animal is no different from corn or wheat; they are all made out of satara mahā bhūta: pathavi, $\bar{a} p o$, tejo, vāyo.
- Once the mind leaves the physical body, the body becomes inert like a log. What is immoral is to end the life of a living being willfully or to aid in such acts; once that deed is done, what is left is no different than a log of wood.
- However, this is not to say that the Buddha advocated eating meat. It is actually better for the body to eat less meat and more vegetables and fruits. In general, we eat much more food than necessary, and that leads to many health problems starting with obesity.

5. The key point is that EATING MEAT or ANYTHING ELSE if done with greed, then that is an akusala kamma done with the mind: abhijjā [abhijjhā] or strong greed.
6. Then there are people who say, "if we all eat meat, that encourages other people to operate animal farms and kill animals; therefore, we should not eat meat." For those who are bothered by such thoughts, it is better not to eat meat for the peace of mind. I actually have cut down a lot just out of compassion. But we also need to examine the REASONS for some acts to be categorized as akusala kamma.

- Don't farmers use pesticides to kill uncountable number of living beings when they cultivate rice, wheat, vegetables, for our consumption? With the above logic, aren't we encouraging farmers to kill all those insects by eating basically any food that we buy at the supermarket?
- These are the true "musavāda" ("musa" means "incorrect" and "vāda" means "debate"), i.e., trying to win an argument by using false premises. They appear to make sense on the surface, but when you examine carefully, they have no substance.
- We have to be really careful about having such "micchā ditțhi," because niyata micchā diṭthi can lead to rebirth in the apayy $\bar{a}$. There are many such false beliefs that appear "harmless" but count as micch $\bar{a}$ ditt thi (not knowing the true nature of things), and that is another reason why it has been hard for people to attain the Sotāpanna stage.
- The bottom line is that it is better not to eat meat especially if that bothers one's conscience. But for those who don't have that problem, there are probably other bad acts one needs to worry about first; see, "How to Evaluate Weights of Different Kamma."

7. There will always be people who engage in immoral acts and make a livelihood from that. We cannot force others to be moral; we can only point out what is moral and what is immoral. It is up to each person to decide, and understand that, "what one sows, one will reap."

- As I mentioned before, there was a "pig butcher" Chunda Sukara, who ran his butcher shop right next to Veluwanaramaya, where the Buddha resided for many years. Even at the time of the Buddha some questioned why the Buddha did not try to "save him." If he did that, Chunda Sukara would have generated hateful thoughts about the Buddha and would have ended up in an even worse apāya, as explained by the Buddha. Thus one needs to think deeper than just go by "outward appearances."
- On the other hand, we should point out the bad consequences of raising animals under unfathomably harsh conditions in animal farms, and killing animals with unimaginably cruel ways (see \#10 below). Even though animals have much lower levels of "consciousness", they feel pain same as us. Still, we need to get rid of the "wrong sañ̃ $\bar{a}$ " that eating meat (which is like any other food made of the satara mahā bhūta), is equivalent to eating "an animal." Once the animal is dead, the dead body is inert; the gandhabba has left that "inert shell"; see, "Ghost in the Machine - Synonym for the Manomaya Kāya?."
- In Sri Lanka, and probably in many Buddhist countries, there are many movements to "rescue cows and other animals from the butcher." They consider this act as an "abhaya dana," which they interpret as "giving back the life or saving the life of that animal."

8. First, let us examine WHY a cow is born a cow in the first place. A cow is called a "harak $\bar{a} "$ in Sinhala, which comes from "hara" meaning "the essence or what is good", and "kā" meaning "eat or destroy." Thus one is born a cow due to a "cow sankhara," i.e., one had done acts that led to hardships for people. We know many people who do immoral acts that destroy other human lives or at least lead to hardships for other people; those people are bound to be born cows, pigs, and other animals and "pay back those debts."

- Even though we may save the life of a cow by paying off the butcher, that cow will go through many such "cow lives" until the kammic energy of that "cow bhava" is spent and during that time will be subjected to numerous killings. This may sound harsh, but that is the reality.
- Instead of "trying to save existing cows", which is a futile task as we saw above, what we SHOULD do is to try to prevent even a single HUMAN from becoming a cow in future lives. Once one gets a "cow bhava" one will be born in that bhava multiple times; see, "Bhava and Jāti - States of Existence and Births Therein." What we can do is to try get as many people as possible to be EXPOSED to true Dhamma.
- Thus even though we should not try to prevent people from rescuing such animals (saving a life is always good), we need to educate people about the misconceptions on relative merits of different deeds.

9. In that context, let us see what is really meant by "abhaya dana." "Bhaya" means "fear" and "abhaya" means preventing one from a dreadful outcome; of course "dāna" means "giving." Thus "abhaya dana" means giving the gift of removing one's fright.

- One should be dreadful about the suffering one could undergo in the four apāyā (four lowest realms of existence), animal realm being one. If one can motivate a single human to contemplate on that, that itself will be much more meritorious than "saving" millions cows; of course, as we saw above a "saved cow" is not truly saved; it will pay its debts somehow or other.
- Yet, imagine the number of cow, pig, ... lives that one could save if one can point another human being toward becoming a Sotāpanna: that person will NEVER be born in any of the four apāyā. That could be an uncountable number of lives saved by "saving a SINGLE human." That is the true "abhaya dana," and that may not even cost any money.

10. The key point here is that a cow (or any other animal) cannot be "saved" by making it comprehend Dhamma. And, there is no way to "shorten the time of existence" or in this case the duration of the "cow bhava." the It just has to wait until the kammic energy for that existence to run out through however many "cow lives."

- But a human can comprehend Dhamma and could change the type of existence, and say for example become a brahma. Furthermore, one could attain the Sotāpanna stage and be freed from the apāyā, and may even attain the Arahanthood stage.
- So, there is a HUGE difference in saving an animal life versus a human life.
- Still I am not discouraging anyone from saving an animal. I am just saying that there are better ways to utilize resources and try to help out humans. We never kill a bug or a fly that occasionally gets in our house. We have a "bug catcher cup" that we use to catch it and throw outside; trap the thing in the cup, slide a cardboard piece underneath slowly and carry to the door.

11. I need to also point out that the Buddha himself ate meat when offered under the conditions given in \#3 above. In fact, the last meal of the Buddha was a "pork dish" which was especially made to alleviate the pain that the Buddha had with ulcer-like ailment.

- In this context, let us discuss another misconception about that "last meal." After the meal, the Buddha asked the remainder of the meal not be consumed by any human, and to be buried. Some say this was because of a "contamination problem with that meal" which led to a discomfort of the Buddha. If there was a problem with the dish, the Buddha would have seen it beforehand.
- The reason that the Buddha asked the remainder of the meal to thrown away was simply because that meal was a special meal just like the first meal of milk rice offered to him at the time of the attainment of the Buddhahood. Such meals can be digested only by a Buddha. Devas and brahmā infuse highly potent nutrients into such meals; the Buddha was sustained for 7 weeks with that single meal of milk rice.

12. Finally, the suffering of the animals is real, and this is one form of sansäric suffering that the

Buddha referred to. If you have nerves made out of steel, you can watch the gruesome acts that occur in some animal farms, see the full movie "Earthlings" at the following site (Warning: These scenes are highly disturbing to the mind, especially after about 10-15 minutes): "Nationearth.com"

- We should not hesitate to point out the bad consequences of raising animals under unfathomably harsh conditions in animal farms, and killing animals in unimaginably cruel ways.
- As I pointed out above, animals are bound to "reap what they already sowed in their past lives." Nature always finds a way to impart kamma vipāka. But the problem is that humans volunteer to carry out those punishments, and in turn, generate much future suffering for themselves.
- Thus the only tragic that CAN BE AVOIDED is the creation of similar outcomes (in future births) for current humans who engage in such activities.
- In any case, we cannot force morality on others. We can only point out the dangers and help enact and enforce laws to forbid such unconscionable activities; such efforts have led to making cockfighting illegal in the United States.

Next, "Do Things Just Happen? - The Hidden Causes", ..

### 7.1.5.3 Do Things Just Happen? - The Hidden Causes

October 30, 2015

Just like in science, Buddha Dhamma is based on cause and effect. Nothing happens without a cause (or more accurately multiple causes). But some of the causes are hidden and can be revealed only a Buddha with the perfect mind. By learning his Dhamma, we can figure out many such important and relevant causes that affect us.

1. There are many instances when we face a traumatic situation, and the first thing comes to our mind is "Why is this happening to me? What have I done to deserve this?."

- And when we encounter good fortune (say landing a good job or winning a lottery), we are overjoyed: "my luck has finally turned around."
- Both those conclusions are wrong. Nothing happens in this world without a cause (usually there are multiple causes). Things DO NOT just happen. Nature does not work that way. In science, we always look at the underlying causes to explain material phenomena.
- A scientific theory is not even taken seriously unless it can provide evidence to support the theory, i.e., to illustrate "cause and effect." Buddha Dhamma is based on "cause and effect."

2. The "cause and effect" of inert objects is easy to see and verify. Scientists can accurately land a spaceship on the Moon because they can take into account all the causes and effects that would be relevant to the flight of the spaceship. All scientific progress is made due to the "apparent" causes and effects.

- We can even predict/control the behavior of plants. By making suitable conditions for their growth, farmers can reap good harvests. Even when things do not work out with farming, we know the reasons (drought, too much rain, etc).
- Thus we can verify the applicability of "cause and effect" when dealing with inert matter and vegetation. The causes are not hidden.
- This principle is also known as "action and reaction" in physics. Every action has an equal and opposite reaction. Laws of kamma are more complex, but it is the same basic principle. You cannot expect to do something and assume that it has no consequences.

3. Unlike material phenomena that involve dead and inert matter, each sentient living being has a "history that goes back into the deep past" (a tree is living, but not sentient, i.e., it cannot think).

- Therefore, for each sentient being, there could be causes that lie in the deep past. We just cannot see them (if we develop abhiñ̃̃̄a powers, we could see some).
- This is why it is hard for many people to grasp the concept of kamma. When we look around us, we may not see the "law of kamma" working. While a pious peasant may be living in a hut, a drug lord seems to be enjoying life. Yet, in the long run, the laws of kamma work: that pious peasant may be reborn to enjoy a good life, while the drug lord may suffer for a long time to come in future births.
- The present birth started due to past causes. It will proceed until that kammic power is exhausted. What we should be mainly worried about is the next life.
- All deeds have their consequences. As Nietzsche (1882) said, "..Lightening and thunder require time, the light of the stars require time, deeds require time even after they are done, before they can be seen and heard..."

4. Then people ask: "But where is the evidence for that?." The (indirect) evidence is all around us. We just do not take time to analyze what we see. Our tendency is to take things at the face value, without bothering to analyze a bit deeper; see, "Wrong Views (Micchā Ditthi) - A Simpler Analysis."

- When we look around we see that some people are rich, some are poor; some die within a few months, but there are others live to old age; some are healthy and vibrant, others are sick most of the time, etc. All these happen now due to causes from past lives.
- What are the causes for all those and much more varieties of life that we see all around us? Many more are discussed in, "Vagaries of Life and the Way to Seek Good Rebirths."

5. Laws of kamma are nothing but "causes and effects." Moral behavior leads to good results either in this life OR in future lives. Immoral behavior leads to bad results, including bad rebirths.

- However, kamma is nondeterministic, i.e., a cause does not inevitably lead to a result; see, "What is Kamma? - Is Everything Determined by Kamma?." By acting with mindfulness, one can avoid many possible bad kamma vipāka, and also make conditions for good kamma vipāka to come to fruition.
- Actually, without a Buddha in the world, a normal human cannot figure out these things on his/her own. But luckily, some evidence is coming from modern science due to the efforts of thousands of scientists over the past few hundred years.
- Many "wrong views" that people used to have in the old days have been corrected by science. Actually, those helped confirm what the Buddha taught 2500 years ago; see, "Dhamma and Science."

6. Our ancestors could not explain many natural phenomena like earthquakes, volcano eruptions, floods, etc and attributed those to "the fury of the Gods." Even to date, whenever we don't understand something, our tendency is to attribute that to a supernatural being and "fill that gap"; this tendency is called, "God of the gaps."

- But advances in science are slowly but surely closing those gaps, that exist with regard to the workings of the MATERIAL WORLD. Those are due to natural causes.

7. However, there ARE gaps in our knowledge base that CANNOT be closed by the current approach of science. These are to explain the workings of the human mind or consciousness.

- Most theologians of today are correct in saying that mind cannot arise from matter; it does not make sense to say that a human with feelings and perceptions can just "arise" out of inert matter.
- However, there is no need to "fill that gap" with God either. The Buddha described in detail the workings of the human mind, which is separate from the working of the material world; see, "Is Buddha Dhamma (Buddhism) a Religion?."
- The "cause and effect" for the mind to arise is described by patticca samuppāda, but before that can start making sense, one needs to understand the basics of Buddha Dhamma discussed in the "Key Dhamma Concepts" section on the top menu.

8. Another effect that cannot be explained by current science is the "sense of fulfilment" one gets by giving to the poor. If one takes a totally materialistic view, it is not possible to see ANY benefits in giving.

- There was a wealthy brahmin at the time of the Buddha, who was very much against giving. He explained to others why giving can only lead to a loss by actually doing a demonstration: He took a sack of rice and started giving portions to those who gathered. At the end the sack was empty and he said, "look, this is what happens when you give. You lose what you have."
- The Buddha explained that the brahmin was unable to see the benefits in giving even in this life (sense of joy), because of his wrong views, and thus there was no way he could see the benefits in future lives. The brahmin died and was born a dog at the same house. It is a long story and I may get to it in a future post.
- The key point here is that there are many things that cannot be explained by just what we see with our eyes. Cause and effect is not readily apparent when it involves the mind. Furthermore, benefits of giving are not proportional to the value of the things given, but the state of the mind of the giver.

9. But more than anything else, the truth of what the Buddha taught can be experienced. When one follows the path recommended by the Buddha one can feel and experience the results in this life itself.

- Just by reading and understanding Dhamma concepts one's mind can become calm and peaceful; see, "Key to Calming the Mind - The Five Hindrances." I encourage everyone to peruse through different sections at the site and read first whatever seem to make sense or relevant to what one is looking for.
- For example, one of the key issues that led people to believe in a supernatural being was how morality can be there without such a being. But the Buddha taught that morality and immorality are both built into nature; see, "Origin of Morality (and Immorality) in Buddhism."
- It could be surprising to many. But Buddha Dhamma can explain ANY phenomenon, whether material or mind-based. Everything happens due to causes, even though some may be hidden from a normal human's sense faculties. By purifying one's mind, one can have a better understanding of how the nature operates; see, "The Importance of Purifying the Mind."
- October 18, 2016: A new post explains this in more detail: "Micca Ditṭhi - Connection to Hethu Phala (Cause and Effect)."

### 7.1.5.4 Craving for Pornography - How to Reduce the Tendency

March 4, 2016; revised January 22, 2020; June 20, 2022; June 25, 2022
Craving pornography is fundamentally the same as any other sensual pleasure, but it could lead to serious crimes if not controlled. One must first abstain from activities harmful to oneself or others.

## Introduction

1. Of course, engaging in sexual activities with one's spouse is not a problem for even a Sotāpanna. It is when one gets to the $A n \bar{a} g \bar{a} m \bar{l}$ stage that one AUTOMATICALLY loses the sexual urge; see, "The Cooling Down Process (Nibbāna) - How Root Causes are Removed" and "Is It Necessary for a Buddhist to Eliminate Sensual Desires?."

- Cravings for ordinary sensory pleasures (sexual or otherwise) CANNOT be removed by sheer will power, just like darkness cannot be removed by being willing for light. Darkness can be gotten rid of only by bringing in light.
- Sense desires can be cleansed only by "cleansing the mind," i.e., by contemplating the real (anicca) nature of the world. In simple words, that means seeing the bad consequences of strong cravings for sensory pleasures. As we discuss below, that understanding comes through learning Dhamma and getting rid of the extreme activities first.
- Even a Sotāpanna has only "seen" the futility of sense pleasures; he/she has not "experienced" the benefits of NOT DESIRING sense pleasures; see the posts in the "Sotāpanna Stage of Nibbāna."

## The Bigger Picture

2. We have had an uncountable number of rebirths so far simply because we cannot comprehend the consequences of attaching to sense pleasures and also because we become angry when we don't get what we desire.

- Those objects that we desire so much will lose their appeal over time. Sense pleasures, sexual or otherwise, are short-lived. Even if one can have access to sense pleasures, the ABILITY to enjoy them WILL decrease with time. That is something that people typically do not realize.
- The attitude of most people is, "I need to enjoy them to the fullest while I can." But one needs to stay away from extreme behaviors at least. Learning Dhamma will help to avoid future suffering; one must start as soon as possible. When we get old, we lose not only the ability to enjoy such pleasures but also the ability to comprehend Dhamma (because our brains degrade with time).
WebLink: YOUTUBE: Changes: Young to Old

3. Fundamentally, craving sex-related activities are not any different from craving other sense pleasures. Each person has samisāric habits (gati) for some specific set of sense pleasure(s).

- Some have an excess craving to eat tasty foods, some like gossiping about others, some want to go hunting, etc., and some may have the desire for sexual pleasure, and it is usually a combination of several. Each person has a unique set, and that changes with time too.
- The danger with such habits is that under extreme conditions, they could lead to worse actions. Sexual tendencies could especially become problematic. We all have heard about cases where "good citizens" committed rape when prevailing conditions led them to "lose control."
- More on the subject at, "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsava)" and posts therein.

## Contemplate on Adverse Consequences

4. The critical and first thing to do is to get rid of those habits that can bring harm to others. A Sotāpanna in inherently incapable of doing such extreme actions because his/her mind has clearly grasped the consequences of such actions. Focusing on sexual urges, one MUST NOT DO certain things: rape and having relationships with children, or others' spouses are prominent examples.

- Learning Dhamma helps through all stages of "rehabilitation." Learning the adverse consequences of extreme habits such as those mentioned above is one way to convince the mind (i.e., subconscious viññāna) to voluntarily give up those habits.
- The Buddha said, "don't do things to others that one would not like to be done to oneself." Always try to pause a moment and contemplate the consequences of any harsh action. That is the basis of Kāyānupassanā in Satipaṭthāna meditation; see, "Mahā Satipatthāna Sutta."

## Learning and Following Buddha Dhamma Will Help

5. It is also important to realize that one cannot remove the basic tendencies for ordinary sense pleasures by sheer willpower alone. Trying to do that could bring more harm (stress) than benefits.

- The key is to train the mind to grasp the harmful future consequences of extreme habits and desires (gati), whether it is due to excess craving for sex or the tendency to get mad at the slightest provocation. These are all habits that most likely originated in many lives back.
- We either develop new habits via repeated use or more likely re-energize and further cultivate old habits from previous lives.
- The following links discuss how to change one's gati: "9. Key to Ānāpānasati - How to Change Habits and Character (Gati)" and "How Habits are Formed and Broken - A Scientific View," among others. One could type gati or habits in the Search button on the top right and get a list of relevant posts.

## The validity of the Rebirth Process - Actions Have Consequences

6. The other important thing to realize is that one does not NEED TO get rid of less-severe cravings for sense pleasures (sexual or otherwise) at once. The key is to do it gradually. It is better to say, "realization will sink in gradually as one learns Dhamma or the true nature of this world."

- The Buddha gave the following simile: When one is cultivating a field, all one needs to do is to follow the procedures that will optimize bringing a good harvest. One needs to prepare the soil, plant healthy seeds, and then keep weeds out. One must also provide water and nutrients regularly. There is no point in watching the plants throughout the day to see whether they are growing or to worry about them. They will grow and yield a good harvest if one does one's part.
- In the same way, one needs first to understand the basic broader world view, i.e., that we are spending a relatively short time in this life and move from life to life-based on causes that we create (based on how we live). The post on dasa akusala (ten defilements) is a guide: "Ten Immoral Actions (Dasa Akusala)."

7. Here is a list of critical things that is comparable to getting the soil ready to plant the seeds:

- One needs to first understand, at least to some extent, the long-term nature of our lives far beyond our deaths. Many people believe that it all ends with this life. What if that is not correct? One needs to make sure, because the answer to that question may have consequences for billions and trillions of years to come.
- Also, do things happen, or do they arise due to CAUSES? The principle of causality (cause and effect) is the basis of science. Things ALWAYS occur due to (multiple) causes. People don't just get born out of nothing. Previous causes led to the birth of a human being (or any other living being). The Buddha said these causes are the kamma, what we have done in the past.
- There are certain principles or laws that Nature follows. Scientists can explain most of the things that happen to inert objects: If one throws up a stone, we can even calculate its path on the way back to the ground. The reason that it falls to the ground is that the Earth is pulling it down; that is the cause for it to fall. Like that, EACH AND EVERY EVENT has a reason. Events based on mental causes typically are complex and not easy to sort out).

## Consequences in the Rebirth Process

8. After making some progress, one needs to contemplate the implications of over-indulgences: (1) They are short-lived. When one's ability to enjoy them goes away, one gets depressed, (2) Such over-indulgences build corresponding character or "gati," and one's future births are according to one's gati.

- Another samisāric gati is the tendency to get angry at the slightest provocation. Here also, one needs to think about the adverse consequences of that behavior.
- In both cases, the harmful consequences are two-fold: The short-term result is that one gets stressed out shortly after responding to the "urge" and getting temporary relief.
- The more adverse long-term consequences are worse. Each time one does it, the habit strengthens. Furthermore, depending on the action, one may cultivate animal gati (when blinded by extreme sense pleasures) or niraya gati (when blinded by rage).

9. There is a reason that one is born human and another is born an animal. A human-born had done a wholesome kamma that deserved being born human. Furthermore, that kamma was possible because that person tended to do that type of deed. This tendency to do certain things depends on one's "gati."

- If a human displays "animal gati" or does things that animals do (do whatever one feels like doing without any consideration for others, have sex indiscriminately, etc.), then it is likely that he/she will be born an animal in the future.
- On the other hand, if a human displays kindness, can even tolerate others' bad behavior, etc., then he/she has deva or Brahma "gati," then he/she is likely to be born a deva, Brahma, or a human, in future lives.
- In the language of Paticca Samuppāda, "jāti" is according to "bhava," "bhava" according to "upādāna," "upādāna" according to "taṇhā," i.e., "what one likes to do or has a craving for." Thus if one likes to do what dogs usually do, then a future " $j \bar{a} t i$ " or birth as a dog is hard to avoid. That is true for any other kind of birth.

## Buddha's Middle Way

10. Thus whether it is a sexual craving or any other craving for sensory pleasure, we need to be careful first to avoid any extreme behavior. One cannot jump from the bottom of the ladder to the top; one has to climb step-by-step. Get rid of the worst habits first and move up on the ladder.

- The one who was born an animal was likely to have engaged in activities suitable for an animal; some of the sexual activities shown in pornographic movies are suitable only for animals. One does such extreme deeds due to a reason, i.e., one has tendencies or gati to do such acts. They do not change much unless one willfully tries to change them. Getting rid of such extreme behavior is the first step. The sooner done is better.
- Then one can tackle less severe problems. Always thinking about tasty foods and overeating is as bad as the tendency to watch adult movies habitually. They are both bad habits that need to be broken gradually, with an understanding of the consequences. Of course, pornography has different categories; one tends to watch "extreme" pornography when one has extreme habits.
- A living being can significantly change its "gati" only as a human. An animal is not capable of any significant change of character, even though some of its habits can be changed if trained by a human. Even for devas and Brahmā, it is hard to improve their gati unless they had attained the Sotāpanna stage of Nibbāna as a human.

## Summary

11. In summary, one MUST stop the most harmful acts (which could lead to rebirth in the lowest four realms or the $a p \bar{a} y \bar{a})$ by any means possible using sheer will power. However, less harmful acts will reduce over time. One needs to follow a systematic procedure as outlined in the links given in \# 4 and \#5 above.

- Learning Dhamma can reduce the tendency to engage in any immoral or unwise activities in the long run. In this regard it is essential to understand the different levels of greed and hate; see, "Sorting out Some Key Pāli Terms (Tanhā, Lobha, Dosa, Moha, etc.)" and, in particular the post, "Lobha, Dosa, Moha versus Raga, Patigha, Avijiã."
- The section on "Assāda, Ādinava, Nissarana" provides more advanced analyses, especially for those who are at least on the way to becoming a Sotāpanna, i.e., a Sotāpanna magga anugāmi.

### 7.2.1 Sansāric Habits, Character (Gati), and Cravings (Āsava)

## Revised December 7, 2016

Our character (gati), behavior, and cravings (āsava) sometimes have causes from past lives. It is easier to break bad habits when one understands causes and consequences.

- In the "Moral Living" section, we discussed how to get rid of bad habits, incorporate good habits, and thus achieve goals; see, "Habits, Goals, and Character (Gati)." We saw that one's behavioral patterns or habits can form one's character (gati). Here we will see that some of these habits are not formed in this life, but may have origins in previous lives. In a way, these are only "discernible things" we carry from life-to-life; see, "What Reincarnates? - Concept of a Lifestream."

1. Habits ("gati" in Pāli and Sinhala) are acquired by the repeated use. Habits can be neutral (one can make a habit of start brushing teeth on the top left), good (exercising at a scheduled time), bad (smoking).

- The more one can stick to a set habit, that habit becomes more ingrained in the mind. Riding a bike or learning to drive is a habit to learn. Initially it is hard, but once the habit is formed it is done almost automatically; it becomes an ingrained "gati."

2. Bad habits can be stopped by making a conscious effort to disrupt the habit. Initially this takes a lot of effort, and that is why assessing the consequences and convincing the mind of the dangers of a bad habit is important at the very beginning.

- Replacing a bad habit with a good (at least less harmful) habit is also important. Instead of smoking, one could chew on a chewing gum when one gets the urge.

3. Habits also help mold the character (gati) of a person. We see very different qualities of character among people: kind and malicious, calm and agitated, thoughtful and easily-excitable, etc. It is easy to see that people with "bad character qualities" are those with one or more prominent bad habits.

- But the good news is that no one is "inherently bad." There are causes (reasons) for a person to have bad habits/character, and once those causes are removed one becomes a person with good habits/character.
- The best example is Angulimāla, who lived during the time of the Buddha and killed close to thousand people. The Buddha was able to show him the consequences of his behavior and he was able to attain the Arahantship within a few weeks!

5. It is not only humans that display such personal characteristics; animals have them too. Some dogs are vicious while others are adorable; some are more loyal than others, etc.

- These are habits/character (gati) that have been molded over multiple lives; but most character (gati) CHANGES happen only during a human life, because human mind is the most capable of CHANGING habits. Animals, for example, are more like robots (not completely).

6. Bad habits are formed via bad judgements arising from a defiled mind that is covered by the five hindrances. And bad habits lead to actions that further strengthen those same habits.

- Once a certain bad "gati" becomes established it can even lead to a birth with that "gati," i.e, will be destined for "dugati" (du + gati) which is another name for the apāy $\bar{a}$ (the four lowest realms). for example, someone who behaves and acts like an animal could well be reborn an animal.
- The cycle needs to be broken to stop this self-feeding process. But as long as the hindrances are there, it is likely that sooner or later new bad habits will be formed.

7. Those beings that are in the ap $\bar{a} y \bar{a}$ can be put in to four major categories according to the proportions of greed and hate that are in their sansāric "gati" (of course ignorance is in all of them) :

- Pretas [Sanskrit], petas [Pāli], i.e., hungry ghosts, have "greedy" gati.
- Those in the lowest realm, niraya (hell), have gati dominated by hate.
- Animals have "gati" with both greed and hate. Therefore, the Pāli (or Sinhala) word for animals is "thirisan" (="thiri"'"'san" or three defilements). Remember that ignorance is there always.
- Those in the asura ("a"+"sūra", where " a " means "not" and "sūra" means proficient or capable; thus asura means those who depend on others, and are lazy) realm have the habit of doing as least as possible and exploit others' hard work.

8. Similarly, one who cultivates good habits is destined for a "good" rebirth (sugati $=$ su + gati), i.e., human realm or above. For example, one who does not indulge in sense pleasures and cultivates compassion and loving kindness could be reborn in the Brahma realms where there is relatively less suffering, and mostly jhānic pleasures.

- Devas (realms 6-11) are full of compassion and do not have hateful thoughts. But they like to enjoy sense pleasures.
- Brahma (realms 12-31) do not have either greed or hate.
- Humans (realms 5) COULD have all three. However, the unique aspect of the human realm is the ability to purify one's own mind and REMOVE all three, and become an Arahant (attain Nibbāna). This is done by following the Noble Eightfold Path and removing all "bad habits" one has.

Of course, Devas and Brahmā both have ignorance, and thus could be reborn in any realm when they die (unless they had attained the Sotāpanna stage).
9. Once ingrained in the mind, habits can be carried over repeated rebirths, from life to life. One who is easily tempted by alcohol is likely to have had that habit in the previous lives.

- One who forms that habit in this life (even if he did not have it before), is likely to carry it over to the next life. Similarly, one who cultivates generosity in this life is likely to have that habit in the next life as well.

10. If those bad habits keep building up life after life, they get fermented and solidified and thus will become deeply embedded in one's psyche. We all carry deeply ingrained sansäric habits associated with one or
more of defilements. These are called mental fermentations or deeply embedded cravings ("āsava"
in Pāli or Sinhala).

- Some gati and āsava lay hidden (sleeping), and are called "anusaya." With a strong enough "trigger" an ingrained anusaya can be brought to the surface. Anusaya are the hardest to get rid of.
- When one continually acts in ways to strengthen one's gati (character), that makes the corres ponding āsava and anusaya even stronger.

11. Thus it is clear why breaking bad habits is critically important, not only for the benefit of this life, but also for future lives.

Next, "Complexity of Life and the Way to Seek "Good Rebirths"",
If you would like to read about how these āsavas can be removed, see, "The Way to Nibbāna - Removal of Āsavas."
7.2.2 Complexity of Life and the Way to Seek "Good Rebirths"

Revised May 18, 2017; March 14, 2020; July 3, 2022; July 24, 2022

## Introduction

1. Everything we see around us can be roughly put into three categories: lifeless matter, plant life, and sentient beings (i.e., life with consciousness). Scientists have been most successful in explaining the behavior of inert matter, at least on the macroscopic scale.

- For example, a rocket can be launched with high precision to land on a given spot on the Moon.
- However, complexity increases when going to biological matter without consciousness (plants).
- Complexity is highest for sentient beings.

## Complexity of Life

2. The behavior of a sentient being is almost impossible to predict with any kind of precision. This is because the working of a mind with 89 types of citta (thoughts) and 52 types of cetasika (mental properties) is very complex; see "The Grand Unified Theory of Dhamma" and the posts in the "Abhidhamma" section.

- However, the Buddha has taught us how to understand why different living beings are born that way and why people are born with wide-ranging health, wealth, beauty, etc.
- Laws of kamma can explain such phenomena that involve conscious minds.

3. When we look around, we see that animals generally encounter more suffering than humans. Even among people, the range of suffering is enormous. Then some people seem to be enjoying life without showing signs of suffering.

- Also, some are born rich, healthy, beautiful, etc. others are born in poverty, handicapped, ugly, etc.
- As discussed above, people's character also lies in a very broad spectrum.
- Furthermore, the "fortunes" of a given person could change drastically in a relatively short time. One could go from being penniless to riches or the other way around quickly.
- When we look at animals, some pets get treated even better than some humans, while others live under horrible conditions. They also have a wide range of personal characteristics.

## The Complexity of Life - Buddhist Explanation

4. Such apparent vagaries of life have perfectly good explanations in Buddha Dhamma. However, there are no simple one-to-one correspondences compared to the comparatively simpler rules that are available for tracking the behavior of macroscopic inert objects.

- One time a Brahmin asked about how that happens. The Buddha's description is in the "WebLink: suttacentral: Cūlakammavibhañga Sutta (MN 135.)."

5. The behavior of (macroscopic) inert matter can be explained in terms of simpler cause and effect. If one knows the current conditions, one can predict the future using scientifically-found natural laws (the law of gravitation or laws of relativity).

- However, even this is beginning to change with the advent of quantum mechanics; we are now beginning to probe the realm where matter merges with the mind. See, for example, "Origin of Life" and "Dhamma and Science."

6. Similarly, the behavior of life can be explained in terms of kamma vipāka (results of one's actions) together with habits ("gati") and āsava; see "Sansāric Habits and Āsavas." However, unlike cause and effect regarding inter matter, the behavior of life is much more complex because the MIND IS COMPLEX, see "The Grand Unified Theory of Dhamma."

- There are many causes (innumerable kamma vipāka and numerous types of habits and āsava) leading to many effects, versus just one or few causes leading to one or more effects.
- This is discussed in many suttā, but a good start is the "WebLink: suttacentral: Cūla Kamma Vibhañga Sutta (MN 135)." That site gives translations in several languages, but as with most websites, translations of some key Pāli words may not be accurate.

## Good and Bad Kamma Bring Corresponding Vipāka

7. In general, good habits and good kamma vipāka lead to rebirth in realms at or above the human realm. We need to ensure not to commit any akusala (unwholesome) kamma that could lead to rebirth in the four lower realms (apayy $\bar{a}$ ) and to engage in meritorious actions.

- Another is to realize that āsava (mental fermentations or deeply embedded cravings) could lead to spontaneous actions (in a rage or a sudden mental weakness). Maintaining good habits, removing bad habits, and acting with generosity, kindness, and wisdom help clean up the deeply embedded $\bar{a} s a v a$. That will help prevent such actions impulsively.

## Meditation Is Contemplation

8. Any meditation (Samatha, Mett $\bar{a}$, and Vipassan $\bar{a}$ ) will also be helpfil. Just contemplating good thoughts and suppressing bad thoughts as they arise throughout the day is also meditation (this was the original definition of Bhāvanā).

Next, "How to Avoid Birth in the Apāyā."

### 7.2.3 How to Avoid Birth in the Apāyā

## Revised July 3, 2022

1. There are five heinous kamma (acts) that GUARANTEE a rebirth in the lowest four realms (apāy $\bar{a}$ ) in the very next birth. These are called the pañca annantariya kamma or five acts that will bring a bad birth without "a gap" (unlike many kamma vipāka can come to fruition in later lives, i.e., their results are seen only later in samisāra). These five are:

- Killing one's mother
- Killing one's father
- Killing an Arahant
- Causing an injury to a Buddha
- Causing schism in the Sangha (the monastic order)

2. The next level is "niyata micchā dițthi" or "an established wrong world view" (which means one is not even willing to consider the possibility that one could be wrong in holding onto such views) that will cause one to be born in the $a p \bar{a} y \bar{a}$ at some point in samisāra. This means that one with these false views could be reborn in the apāya in the next life or any future life. There are eight such views: [niyata : [adj.] sure; certain; constant.]

- No such thing as, (1) mother, (2) father, (3) Buddha, (4) rebirth, (5) kamma vipāka, (6) opapātika birth (instant full-formed birth), and the existence of (7) ap $\bar{a} y \bar{a}$, and (8) rūpa loka/arūpa loka. For explanations on (6)-(8), see, "The Grand Unified Theory of Dhamma."

3. Thus the possibility of a birth in the $a p \bar{a} y \bar{a}$ in any future birth is there until all established (unshakable) wrong views (niyata micchā ditthi) are rejected by one's mind. We all have committed both good and bad kamma in the past lives that we are not aware of, thus any of those could cause a birth anywhere in the 31 realms.
4. It is important to remember that those false views cannot be just memorized and pretended to be discarded. The mind needs to be convinced that those are indeed false views. This is why it is important to examine the world view of the Buddha. These are the key concepts discussed in the top menus, especially, "What is Buddha Dhamma?" and "Key Dhamma Concepts."
5. The only guaranteed way to stay out of the $a p \bar{a} y \bar{a}$ (the four lowest realms) in ANY future life is to become a Sotāpanna Anugāmi/Sotāpanna.

## What Happens at the Sotāpanna Stage?

1. As I keep repeating, the Buddha is just the messenger. He discovered the true nature of this world. First of all, this world is much more complex than we perceive. In order to understand how to remove suffering, one has to understand the causes, and that requires a complete picture of "this world" (see, "What is Buddha Dhamma?" and in particular, "The Grand Unified Theory of Dhamma") and also why it is not possible to remove suffering without understanding the Three Characteristics of "this world" (see, "Key Dhamma Concepts" and in particular, "Anicca, Dukkha, Anatta - Wrong Interpretations").
2. When one "sees" the true nature of "this world", the mind will automatically give up those false views mentioned in the above section (\#2). This is why it is first important to learn Dhamma first. No one, regardless of one's high intellect, can discover the complete set of nature's laws other than a Buddha.
3. From the discussion so far, it is clear what needs to be done to reach the Sotāpanna stage. All that is needed is to carefully examine the world view of the Buddha as mentioned in \#1 in this section. One needs to understand the "vision", and to become "dassanena sampanno" or "one with a clear vision." This is why "dassanena pahātabba" or "removal by vision" is listed as \#1 item in the seven items required to attain Nibbāna in the Sabbasava Sutta; see, "Key Points in the Sabbasava Sutta" in "The Sotāpanna Stage."
4. Thus essentially all that happens at reaching the Sotāpanna stage is to get a clear world view. Now one has understood the true nature of this world, and thus "knows" that it is not possible to achieve lasting happiness anywhere in the 31 realms. One may not have removed any $\bar{a} s a v \bar{a}$ other than the diṭthāsava (ditthi āsava). Thus one still may have kāmāsava, bhavāsava, and avijjāsava, i.e., one still may have greed, hatred, and ignorance even though parts of all three have been permanently been removed by the clear vision. How the $\bar{a} s a v \bar{a}$ are formed starting with habits is discussed in the "Habits and Goals," "Sansāric Habits and Āsavas," and "The Way to Nibbāna - Removal of Āsavā" sections in that order.
5. Therefore, even though one may have greed, hate, and ignorance left, one knows what they are. And one knows how to remove them.

- After attaining the Sotāpanna stage one does not need a teacher. One knows what needs to be done. As one gets rid of the remaining $\bar{a} s a v \bar{a}$, the vision becomes clearer, and $a v i j j \bar{a}$ is removed completely (with all four $\bar{a} s a v \bar{a}[k \bar{a} m a \overline{s a v a, ~ b h a v a ̄ s a v a, ~ d i t t ̣ h a ̄ s a v a, ~ a n d ~ a v i j j a ̄ s a v a]) ~ o n l y ~ a t ~ t h e ~ A r a h a n t h o o d . ~}$

Next, "How the Buddha Described the Chance of Rebirth in the Human Realm", .......

### 7.2.4 Rebirth - Connection to Suffering in the First Noble Truth

June 8, 2021; revised August 7, 2022

## [This topic replaces the old topic "How the Buddha Described the Chance of Rebirth in the Human Realm."]

Rebirth in the lowest four realms is responsible for the "long-term suffering" that the Buddha pointed out in the First Noble Truth. Even though there is less suffering in the higher realms, most rebirths are in the lower realms. That is why there is NET suffering the rebirth process by a huge margin.

## Living a Moral Life Is Not Enough

1. Many believe that if we live a "good, moral life," a human rebirth or rebirth in higher deva worlds is guaranteed. That is a misconception. Even if we do not accumulate a new bad kamma in this life, we may have accumulated uncountable bad kamma in our past lives. That is why it isn't easy to get a human existence (bhava).

- Evidence for rebirth is in "Evidence for Rebirth." Rebirth can occur not only as a human but in any of the 31 realms. Most suffering in the cycle of rebirth occurs in the lowest four realms: niraya (hell), asura, animal, and peta. Of those four, only the animal realm is visible to us. They are collectively called the apāyās.
- Getting a "human existence (bhava)" is rare. But once one grasps a human bhava, one could be born ( $\bar{a} t i$ ) many times as a human until the kammic energy for that human bhava is exhausted. That is why children can recall past lives. In between consecutive human births, that lifestream exists in the nether world or "para loka" as a gandhabba with a subtle body; see, "Hidden World of the Gandhabba: Netherworld (Para Loka)."
- The 31 realms of existence are described in "The Grand Unified Theory of Dhamma."

## Most Rebirths Are in the Four Lowest Realms

2. Starting with the "WebLink: suttacentral: Nakhasikhā Sutta (56.51)" there are about 80 suttās in the Samiyutta Nikāya 56 that describe the chance of rebirths in good realms (human and above) compared to those in the lowest four realms.

- Here is the English translation at Sutta Central: "WebLink: suttacentral: A Fingernail (SN 56.51)." You can go through the whole series there.
- Those suttās specifically state the rarity of rebirth in a "good realm" and the common occurrence of rebirths in bad realms. Many suttās specifically state that for a sentient being in any realm, rebirths will be mostly in the niraya (hell), animal (tiracchāna), hungry-ghost (peta) realms; see SN 56.102 through SN 56. 131.
- Another version of the Nakhasikhā Sutta is in Samiyutta Nikāya 20, summarized below.
- Before that, it is good to emphasize the difference between a human bhava and births with a human body (jāti) within that human bhava.

## Human Bhava Is Rare - But It Can Last a Long Time

3. Some people ask the following question: If human birth is so rare, why do rebirth accounts indicate human rebirth only after a few years of death? The answer lies in the fact that a human bhava is rare.

- When a sentient being is born a human, that "human bhava" has a specific kammic energy, say several thousand years worth. In that case, the person may be born ( $j \bar{a} t i)$ with a human body many times. In between, that human lives with only a manomaya kāya (i.e., as a gandhabba.)
- For example, if a Deva dies and gets a human bhava, then at the cuti-patisandhi moment, a human gandhabba is born into human bhava. After some time, that gandhabba gets into a womb, and a human baby is born. When that human grows old and dies, there is still much more time left in the human bhava. Thus, the gandhabba comes out of that dead body and waits for another womb. See "Bhava and Jāti States of Existence and Births Therein" and "Cuti-Patisandhi - An Abhidhamma Description."
- In most other realms (i.e., Deva, Brahma), there is only one $j \bar{a} t i$ within that bhava. Multiple $j \bar{a} t i$ within a bhava is common in the human and animal realms.
- It isn't easy to get a human bhava, but once in a human bhava, one can be born tens or even hundreds of times as a human. A given animal may be reborn thousands or even millions of times in that animal realm to exhaust that kammic energy.
- Of course, we cannot see realms other than the human and animal realms. We can easily discern the rarity of human bhava by comparing the number of humans to the number of animals. While there are only about 8 billion humans, there are multiple trillions of ants alone! But modern science has shown that billions of microscopic sentient beings live in a single human body. Let us discuss that next.

## The abundance of Animal Life Compared to Human Life

4. Even though the similes given in the suttās below may seem out of proportion with the realities, there are not. Modern science has given a boost to Buddha Dhamma by making many things clear. Ordinary humans were unaware of the existence of innumerable microscopic living beings until the invention of the microscope in the 1500s. In 1676, Van Leeuwenhoek reported the discovery of micro-organisms. He observed numerous tiny living beings in a glass of water, see, https://en.wikipedia.org/wiki/Microscope

Here is a short video showing countless such microscopic creatures:

## WebLink: youtube: There are as many creatures on your body as there are people on Earth

- If you go out and dig some dirt, there could be millions of living organisms. There may be a few humans in a household, but possibly billions or even trillions of microscopic living beings. The oceans cover twothirds of the Earth's surface, and living creatures are much more densely packed. And there are beings in other 29 realms that we cannot see. Seven billion or so humans in this world are indeed a thumb-full compared to countless living creatures associated with the Earth (as the Buddha stated in the Nakhasikha Sutta; see below).
- Uncountable sentient beings are living in the water. One can actually "see" such microscopic beings in a glass of water if one develops abhiñ̃̃̄̄ powers; see "Power of the Human Mind - introduction." One time, a bhikkhu who had developed abhiñ̃ñ $\bar{a}$ skills but had not becomes an Arahant saw the presence of a large number of microscopic beings in a glass of water. He tried to filter them out but was unsuccessful and became distraught. The Buddha told him that "it is not possible to live in this world without harming other beings. It is necessary to live this life to attain Nibbāna" and to drink the water. The INTENTION is to quench the thirst; see "How to Evaluate Weights of Different Kamma."
- Modern science has confirmed that millions of living beings are on a single human body (and any other large animal). Scientists have used sophisticated instruments to see such microscopic creatures. See, "There are as Many Creatures on your Body as there are People on Earth!."
- Now, let us briefly discuss a few of the suttās mentioned in \#2 above.

## The Rarity of Human Existence

5. As mentioned in \#2 above, the WebLink: suttacentral: Nakhasikha Sutta (SN 20.2) provides a good analogy of rare human existence. We have that opportunity, and we should not waste it.

## Translation:

At Sāvatthī. Then the Buddha, picking up a little bit of sand on his fingernail, addressed the bhikkhus: "What do you think, bhikkhus? Which is more: the little bit of sand on my fingernail or this great Earth?"
"Bhante, the great earth is far more. The little bit of sand on your fingernail is tiny. Compared to the great Earth, those cannot be compared or even imagined; it is not even a significant fraction."
"In the same way, bhikkhus, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans, are many as the sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process."
6. Another favorite sutta of mine is the WebLink: suttacentral: Dutiyachiggalayuga Sutta (SN 56.48).

## Translation:

"Bhikkhus, suppose that this great Earth had become one mass of water, and a man would throw a yoke with a single hole upon it. An easterly stream would move it eastward. A westerly stream would move it westward; a northerly flow would move it northward. A southerly stream would move it southward.

There was a blind turtle that would come to the surface once every hundred years. What do you think, bhikkhus, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?"
"It would be a rare occurrence, Bhante, that the blind turtle, coming to the surface once every hundred years, would insert its neck into that yoke with a single hole."
"So too, bhikkhus, how extremely rare that one is born a human.
You have this rare chance now, bhikkhus, to be not only born a human but be born while a Tathāgata has arisen in the world. While the Dhamma and Discipline proclaimed by the Tathägata shine in the world.

Therefore, bhikkhus, you should strive without delay to understand the following. 'This is suffering (dukkha). This is the cause of suffering (dukkha samudaya). This is how that cause can be removed (dukkha nirodhaya). And this is the way leading to the cessation of suffering (dukkha nirodha gāmini patipadā).""

- The other related issue is that this rebirth process will not stop until one truly comprehends the FACT that existence in this world of 31 realms is not only unfruitful, but also DANGEROUS. That is the "anicca nature" in Tilakkhana.
- This rebirth process has no "discernible beginning," as stated by the Buddha. We have suffered mightily, and this is the opportunity for a rare human life to end that suffering.

## Unimaginable Length of the Rebirth Process

7. There are 20 suttās in Saimyutta Nikāya 15 (SN 15.1 through SN 15. 20) that provide various analogies to describe the length of the rebirth process. Let us look at the WebLink: suttacentral: Assu Sutta (SN 15.3).

## Translation:

First, the Buddha made the famous statement: "Anamataggoyam bhikkhave, samsaro pubbā koti na pannāyati avijjā nivārananam sattānam taṇhā-samyojananam sandhāvatam samsāratam."

- Translated: "Bhikkhus, this rebirth process has no discernible (na pannāyati) beginning. Beings whose minds are covered by ignorance and are bound to this rebirth process with bonds of craving."

The rest of the sutta is as follows:
"What do you think, bhikkhus: Which is greater, the tears you have shed while trapped in this rebirth process or the water in the four great oceans? (crying because of being born into a bad birth or separated from loved ones in good births)."
"As we understand the Dhamma taught to us by the Bhante, the tears we have shed while trapped in this beginning-less rebirth process is greater than the waters in the four great oceans."
"Excellent, bhikkhus. It is good that you thus understand the Dhamma taught by me. That is the larger: the tears you have shed while trapped in this beginning-less rebirth process - not the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a mother? The tears you have shed over the death of a mother while trapped in this beginning-less rebirth process are greater than the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a father, death of a brother, death of a sister, death of a son, death of a daughter, loss of relatives, or loss of wealth. The tears you have shed over diseases while trapped in this beginning-less rebirth process would fill the four vast oceans.

Why is that? The beginning of this rebirth process is not discernible."

- In another analogy in SN 15.13 , the blood from uncountable times when one is killed while born a specific animal (deer or cow, for example) is more than the water in the four oceans.

## Summary

1. As pointed out in those 20 suttās (SN 15.1 through SN 15. 20), Buddha used many analogies to describe the unimaginable length of the rebirth process (Sainsāra): it is infinite. There is no discernible beginning to "sentient life." The principle of Causality dictates that there can be no "beginning."

- Infinity is hard to comprehend. Scientists have only recently realized this; see "Infinity - How Big Is It?" and "Origin of Life - There is No Traceable Origin."
- Many scientists are discussing these "hard to fathom" ideas about infinity. Of course, they are unaware of Buddha's teachings. See, for example, "The Beginning of Infinity" by David Deutsch (2011).

2. The other suttās discussed in \#2 above emphasize that it is rare to be born a human, Deva, or Brahma in this rebirth process.
3. Therefore, each of us has spent MOST of that time in the suffering-filled lowest four realms (apāy $\bar{a} s$.) Even though the realms at and above the human realms have much less suffering than the apāyās, the time spent in those higher realms would have been insignificant.

- This is why it is unwise to seek rebirths in higher realms. Even though the lifetime in a Deva/Brahma realm can be many millions of years, that is INSIGNIFICANT compared to the time spent in the apāy $\bar{a} s$ over the long run.
- We CANNOT avoid births in the lower realms as long as we do not comprehend these facts (Noble Truths) about this world. The deeper one's understanding is, the clearer it becomes. Then one's tanh $\bar{a}$ and upādāna for "worldly pleasures" will AUTOMATICALLY diminish and disappear. That CAN NOT be forced.

4. That is the suffering addressed in the First Noble Truth (the truth about suffering or "dukkha sacca.") The Second Noble Truth is about the causes of that suffering (the truth about "dukkha samudaya.") The Third Noble Truth says we can stop future suffering by eliminating those causes (the truth about "dukkha nirodhaya."). The Fourth Noble Truth is the way to achieve that goal (the truth about "dukkha nirodha gāmini patipadā.")

- Most human beings head to the apāyās because they are unaware of the ten immoral actions; see "Ten Immoral Actions - Dasa Akusala" and "How to Evaluate Weights of Different Kamma." It is also essential to know the baseline procedure to avoid such immoral actions and cultivate moral behavior; see, "Punna Kamma - Dāna, Sīla, Bhāvanā."

### 7.2.4.1

## How the Buddha Described the Chance of Rebirth in the Human Realm

Revised May 5, 2017, August 24, 2017; October 30, 2018; February 29, 2020; June 3, 2021
Many people believe that if we live a "good, moral life," a human rebirth or rebirth in higher deva worlds is guaranteed. That is a misconception. Even if we do not accumulate a single new bad kamma in this life, we may have accumulated many bad kamma in past lives. That is why it isn'st easy to get a human existence (bhava).

- Evidence for rebirth is at "Evidence for Rebirth." Rebirth can occur not only as a human but in any of the 31 realms. Most suffering in the cycle of rebirth occurs in the lowest four realms: niraya (hell), asura, animal, and peta realms. Of those four, only the animal realm is visible to us. They are collectively called the $a p \bar{a} y \bar{a}$.
- Getting a "human existence (bhava)" is rare. But once one grasps a human bhava, one could be born ( $j \bar{a} t i$ ) many times as a human until the kammic energy for that human bhava is exhausted. That is why children can recall past lives. In between consecutive human births, that lifestream exists in the nether world or "para loka" as a gandhabba with a subtle body; see, "Hidden World of the Gandhabba: Netherworld (Paraloka)"
- The 31 realms of existence described in "The Grand Unified Theory of Dhamma."

## 1. From the Nakhasikha Sutta (SN 20.2):

## Pāli version: WebLink: suttacentral: Nakhasikha Sutta (SN 20.2):

## Translation:

At Sāvatthī. Then the Buddha, picking up a little bit of sand on his fingernail, addressed the bhikkhus: "What do you think, bhikkhus? Which is more: the little bit of sand on my fingernail, or this great Earth?"
"Bhante, the great earth is far more. The little bit of sand on your fingernail is tiny. Compared to the great Earth, those cannot be compared or even imagined; it is not even a significant fraction."
"In the same way, bhikkhus, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans are many as the sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process."

Let us make two points clear regarding the above simile of the Buddha:

1. When a being gets a human life, that "human bhava" has a specific kammic energy associated with it, say 1000 years worth. In that case, the person may be born a few times with a human body (this is the difference between "bhava" and "jāti"). The cuti-patisandhi transition to a new "bhava" happens at the end of 1000 years; see, "Bhava and Jāti - States of Existence and Births Therein"" and "Cuti-Patisandhi - An Abhidhamma Description."

- Therefore, the human bhava may not end at the death of the physical body. Switching to a new bhava (as a Deva, animal, etc.) happens at the cuti-patisandhi moment when the kammic energy for the human bhava runs out. Until then, a human exists either with a physical body or just the mental body (gandhabba.) See the above-mentioned posts.
- It isn't easy to get a human bhava, but once in a human bhava, one can be born tens or even hundreds of times as a human. A given animal may be reborn thousands or even millions of times in that animal realm to exhaust that kammic energy.

2. Even though the above simile may seem to be out-of-proportion with the realities, it is not. That is why modern science has given a boost to Buddha Dhamma by making many things clear. Ordinary humans were not aware of the existence of innumerable microscopic living beings until the invention of the microscope in the 1500 s. In 1676, Van Leeuwenhoek reported the discovery of micro-organisms. He observed numerous tiny living beings in a glass of water; see, WebLink: WIKI: Microscope
Here is a short video showing countless such microscopic creatures:
WebLink: Live in a water drop @,TSRlab

- If you go out and dig a bit of dirt, there could be millions of living organisms there. There may be a few humans in a household, but possibly billions or even trillions of microscopic living beings. The oceans cover two-thirds of the Earth's surface, and the living creatures there are much more densely packed. And there are beings in other 29 realms that we cannot see. Seven billion or so humans in this world are indeed a thumb-full compared to countless living creatures associated with the Earth. Thus, as in many cases, modern science has helped verify Buddha's words.
- Some of these realms could be in other dimensions; see, "Consciousness Dependence on Number of Dimensions." In string theory, scientists say there could be ten dimensions instead of the three that we experience.
- However, one can actually "see" beings in other dimensions and microscopic beings in a glass of water if one develops abhiñ̃̄̄a powers; see "Power of the Human Mind - Introduction" and the follow-up posts. One time, a bhikkhu who had developed abhiññ̄a skills but had not becomes an Arahant saw the presence of a large number of microscopic beings in a glass of water. He tried to filter them out but was unsuccessful and became distraught. The Buddha told him that "it is not possible to live in this world without harming other beings. It is necessary to live this life to attain Nibbāna" and to drink the water. The INTENTION there is to quench the thirst; see "How to Evaluate Weights of Different Kamma."
- Modern science has found out that there are millions of living beings on a single human body (and any other large animal). They have used sophisticated instruments to see microscopic creatures. See, "There are as Many Creatures on your Body as there are People on Earth!."

Thus modern science has shown that the human population is negligible compared to just the animal populations (including microscopic beings). And we can experience only two realms (animal and human) compared to the 31 realms that the Buddha described.

## 2. Dutiyachiggalayuga Sutta (SN 56.48)

Pāli version: WebLink: suttacentral: Dutiyachiggalayuga Sutta (SN 56.48)

## Translation:

"Bhikkhus, suppose that this great Earth had become one mass of water, and a man would throw a yoke with a single hole upon it. An easterly stream would move it eastward. A westerly stream would move it westward; a northerly flow would move it northward. A southerly stream would move it southward.

There was a blind turtle that would come to the surface once every hundred years. What do you think, bhikkhus, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?"
'It would be a rare occurrence, Bhante, that the blind turtle, coming to the surface once every hundred years, would insert its neck into that yoke with a single hole."
"So too, bhikkhus, how extremely rare that one is born a human.
You have this rare chance now, bhikkhus, to be not only born a human but be born while a Tathāgata has arisen in the world. While the Dhamma and Discipline proclaimed by the Tathägata shines in the world.

Therefore, bhikkhus, you should strive without delay to understand the following. 'This is suffering (dukkha). This is the cause of suffering (dukkha samudaya). This is how that cause can be removed (dukkha nirodhaya). And this is the way leading to the cessation of suffering (dukkha nirodha gāmini pattipadā)."

- Many scientists are now discussing these "hard to fathom" ideas about infinity. Of course, they are unaware of Buddha's teachings. See, for example, "The Beginning of Infinity" by David Deutsch (2011).
- Most human beings head to the apāyā because they are not aware of the ten immoral actions; see, "Ten Immoral Actions - Dasa Akusala" and "How to Evaluate Weights of Different Kamma." It is also essential to know the baseline procedure to avoid such immoral actions and to cultivate moral behavior; see, "Puñña Kamma - Dāna, Sīla, Bhāvanā."

However, when a living being acquires a human bhava or human existence, that can last a long time (many hundreds to many thousands of years). Within that human bhava, there will be multiple human births; see, "Bhava and Jāti - States of Existence and Births Therein."

## 3. Assu Sutta (SN 15.3)

Pāli version and translation at WebLink: suttacentral: Assu Sutta (SN 15.3)

## Translation:

First, the Buddha made the famous statement: "Anamataggoyam bhikkhave, samisāro. Pubbā koṭi na

- Translated: "Bhikkhus, this rebirth process has no discernible (na paññāyati) beginning. Beings whose minds are covered by ignorance and are bound to this rebirth process with bonds of craving."

The rest of the sutta is as follows:
"What do you think, bhikkhus: Which is greater, the tears you have shed while trapped in this rebirth process or the water in the four great oceans? (Crying because of being born into a bad birth or being separated from loved ones in good births)"
"As we understand the Dhamma taught to us by the Bhante, the tears we have shed while trapped in this beginning-less rebirth process is greater than the waters in the four great oceans."
"Excellent, bhikkhus. It is good that you thus understand the Dhamma taught by me. That is the larger: the tears you have shed while trapped in this beginning-less rebirth process - not the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a mother. The tears you have shed over the death of a mother while trapped in this beginning-less rebirth process are greater than the water in the four vast oceans.

Long have you (repeatedly) experienced the death of a father, death of a brother, death of a sister, death of a son, death of a daughter, loss of relatives, or loss of wealth. The tears you have shed over diseases while trapped in this beginning-less rebirth process would fill the four vast oceans.

Why is that? The beginning of this rebirth process is not discernible."

The Buddha many other analogies to describe how long the rebirth process is: it is infinite. In another analogy, the blood from uncountable times where one is killed while born a specific animal (deer or cow, for example) is more than the water in the four oceans.

- Infinity is a hard to comprehend. Scientists have only recently realized this; see, "Infinity - How Big Is It? "
- In fact, there are many suttā in the "WebLink: suttacentral: Anamatagga Samiyutta (SN 15)," "WebLink: suttacentral: Opamma Samyutta (SN20)," and the "WebLink: suttacentral: Sacca Saimyutta (SN 56)" SN 56.31 through SN 56.70 of the Saminutta Nikāya provides many more similes/descriptions to illustrate the beginning-less rebirth process, during which an infinite amount of time has passed.
- In the above, I presented only three out of about 70 such suttā in SN 15, SN 20, and SN 56. They all provide analogies to show how rare human birth is.

```
Next, "Kamma, Debt, and Meditation"
```

### 7.2.4.2 Nakhasikha Sutta (SN 22.97 SN 56.51 SN 13.1 SN 20.2)

"At one time the Buddha, showing them some dust which he had taken upon the tip of his finger-nail, addressed the disciples thus: 'If, O Bhikkhus, these few grains of dust upon my finger-nail and all the dust in the universe were compared in quantity, which would you say was less, and which more?' The disciples replied: 'Lord, the dust on your finger- nail is less, and that of the universe is more. Surely, Lord, the dust on your finger-nail is not worthy of mention in comparison with the dust of the universe.' Then the Buddha continued; 'Even so, Bhikkhus, those who are reborn in the abodes of men and Devas whence they have expired, are very few even as the few grains of dust on my finger-nail; and those who are reborn in the four realms of misery are exceedingly many, even as the dust of the great universe. Again, those who have expired from the four miserable worlds and are reborn in the abodes of men and Devas are few even as the grains of dust on my finger-nail; and those who are repeatedly reborn in the four miserable worlds are innumerable, even as the grains of dust of the great universe."

What has just been said is the substance of the Nakhasikha Sutta. But, to say nothing of the beings of all the four realms of misery, the creatures that inhabit the four great oceans alone will suffice to make evident how great is the evil of Vinipatana-gati, that is, the dispersion, the variety of possible kinds of existence after death.

## Saṁyutta Nikāya 22

## 10. Pupphavagga

## 97. Nakhasikhāsutta

Sāvatthinidānam.. Ekamantam nisinno kho so bhikkhu bhagavantam etadavoca: "atthi nu kho, bhante, kiñci rūpam் yam̉ rūpam் niccam் dhuvamं sassatamं aviparịā̄madhammam̉ sassatisamam tatheva ṭhassati? Atthi nu kho, bhante, kāci vedanā yā vedanā niccā dhuvā sassatā aviparịāmadhammā sassatisamam tatheva ṭhassatì? Atthi nu kho, bhante, kāci saññā ... pe ... keci sañkhārā, ye sañkhārā niccā dhuvā sassatā aviparịāāmadhammā sassatisamam tatheva ṭhassanti? Atthi nu kho, bhante, kiñci viññāṇam, yam viññāṇam niccam dhuvamं sassatam avipariṇāmadhammamं sassatisamam tatheva ṭhassati'tit? 'Natthi kho, bhikkhu, kiñci rūpaṁ, yam̉ rūpam் niccamं dhuvam̉ sassatam avipariṇāmadhammam̉ sassatisamam tatheva ṭhassati. ## 47. Yoke with a Hole (1)

"Bhikkhus, suppose a man would throw a yoke with a single hole into the great ocean, and there was a blind turtle which would come to the surface once every hundred years. What do you think, bhikkhus, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?"
"If it would ever do so, venerable sir, it would be only after a very long time."
"Sooner, I say, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole than the fool who has gone once to the nether world would regain the human state. For what reason? Because here, bhikkhus, there is no conduct guided by the Dhamma, no righteous conduct, no wholesome activity, no meritorious activity. Here there prevails mutual devouring, the devouring of the weak. For what reason? Because, bhikkhus, they have not seen the Four Noble Truths. What four? The noble truth of suffering ... the noble truth of the way leading to the cessation of suffering.
'Therefore, bhikkhus, an exertion should be made to understand: 'This is suffering.' ... An exertion should be made to understand: 'This is the way leading to the cessation of suffering.'"

Samiyutta Nikāya 56
Connected Discourses on the Truths

## 48. Yoke with a Hole (2)

"Bhikkhus, suppose that this great earth had become one mass of water, and a man would throw a yoke with a single hole upon it. An easterly wind would drive it westward; a westerly wind would drive it eastward; a northerly wind would drive it southward; a southerly wind would drive it northward. There was a blind turtle which would come to the surface once every hundred years. What do you think, bhikkhus, would that blind turtle, coming to the surface once every hundred years, insert its neck into that yoke with a single hole?"
"It would be by chance, venerable sir, that that blind turtle, coming to the surface once every hundred years, would insert its neck into that yoke with a single hole."
"So too, bhikkhus, it is by chance that one obtains the human state; by chance that a Tathāgata, an Arahant, a Perfectly Enlightened One arises in the world; by chance that the Dhamma and Discipline proclaimed by the Tathāgata shines in the world.
'You have obtained that human state, bhikkhus; a Tathāgata, an Arahant, a Perfectly Enlightened One has arisen in the world; the Dhamma and Discipline proclaimed by the Tathāgata shines in the world.
'Therefore, bhikkhus, an exertion should be made to understand: 'This is suffering.'... An exertion should be made to understand: 'This is the way leading to the cessation of suffering.""

### 7.2.5 <br> Kamma, Debt, and Meditation

## Revised April 7, 2016; September 4, 2019

1. "This world" of 31 realms is very complex; see, "The Grand Unified Theory of Dhamma." Nothing happens due to a single cause, and nothing happens just by itself: Multiple causes lead to multiple effects.
2. In a perfect world, everyone will share everything equally, and everyone will be happy. But people are born with different levels of not only wealth but also different levels of health, physical appearance, capabilities, etc. These are the results of kamma (good and bad) accrued over very long periods in the past.
3. No one has everything "just right." So, we try to get what we don't have or like to have. Every time we crave for something and try to acquire those things by immoral means, knowingly or unknowingly we get into debt.

- When those akusala kamma (immoral deeds) involves another living being, we get into some kind "sansāric relationship" with that being; this is how we have friends, family, AND enemies. These things do not happen by chance.

4. NOTHING in this world happens by chance. Everything happens due to a cause, a reason. But since results (vipāka) can materialize later, even in future lives, we cannot see this "cause and effect" in most cases. When we do something harmful to another being we become indebted to that being; that debt will have to be paid with interest that is many many times over. Thinks about the following:

- When we get a loan, we have to pay back the loan with interest. If we promise to pay back and do not fulfill that commitment, we will have to pay it with interest sometime in the future. Imagine how much interest we would have to pay on a $\$ 1000$ loan at $6 \%$ interest over, say just 200 years, which is insignificant in the sansāric time scale. You can use the " 72 rule." That means if you do not make any monthly payments, the amount you have to pay will double every ( $72 /$ interest rate) years. In this case, it will double every 12 years. It will double again in another 12 years, i.e., after 24 years you will have to pay $\$ 4000$. After only 40 years, the amount will be $\$ 10,000$. Only after 200 years it will a billion dollars!
- Can you imagine how much money we may have to pay to settle even small that we took a long, long time ago?
- We have to pay back not only monetary transactions. Imagine how much would it cost to bring up a child, as a mother does? It is unimaginable over long times.
- When we have such debts, nature has set up many ways to pay off such debts. Many times the same group of people is born to the same families, paying back "old debts." Or one may become a servant for another.
- Many relationships that we have in this life arise from "long-term debt" from many lives in the past. For example, people are born in the same family, same community, or same geographical locations, for many, many lives. That is for just paying back debts and for claiming old debts. In Sinhala, relationships are called "sanbandha" (="san" + "bandha" where "san" is defilement (sañkhāra), and "bandha" is a connection; thus connection due to sañkhāra). Sometimes old creditors come back even in the form of annoying mosquitoes, ants, bugs, etc.
- Now if one takes another's life, one may have to sacrifice one's own life many times over. That is scary stuff, but we need to know that our actions will have consequences.

5. Instead of paying off such "old debts" that way, there is another way to pay back old debts. When one does a good deed, one could transfer the merits of that good deed to old creditors called "pattidāna" (this is commonly called "pиñ̃̃a anumodana"; see, "Transfer of Merits (Pattidāna)- How Does It Happen?").
6. In this beginning-less saìs āra, we have been indebted to unbelievably many beings. Thus we transfer the merits to all beings. We think in our mind, "May the merits of this good deed be shared by all beings."

- If one does this genuinely, it will be quite beneficial in the long term. The Buddha said that this is the most efficient way to pay back old debts. However, one needs to do this with sincerity, truly understanding the suffering caused by one's actions to others.living

7. One could accrue good merits not only by good deeds but also with insight meditation. The Buddha stated that if one cultivates vipassana meditation on anicca, dukkha, anatta, that leads many more merits compared to even donations or giving. After the meditation session, one transfers the merits to all beings.

- The nice thing is that one does not "lose any merits" either. Giving merits itself is meritorious. Also, one should forgive old debts from other beings. The mind is very powerful. If done with right intention, also these thoughts will have beneficial consequences for oneself and other living beings.

8. Therefore, we must try to alleviate the kamma vipāka from past kamma by using the mentioned methods above. But the main purpose of such methods is actually to purify one's mind.

- We can pay off past debts gradually this way. However, bigger chunks are paid off by attaining Sotāpanna, Sakadāgāmī, Anāgāmī, and Arahant stages of Nibbāna. (Actually, the Buddha has said that if one does the Ariya mett $\bar{a}$ meditation frequently, one could pay off the debts associated with the kāma loka (first 11 realms). See, " 5 . Ariya Mettā Bhāvanā (Loving Kindness Meditation)."
- When one attains the Sotāpanna stage, all those kamma vipāka that could have given rebirth in the lowest four realms (apāyā) become nullified. When one reaches the Arahanthood, only those kamma vipāka that get a chance to come to fruition during the remaining time in that life will be paid off. Since there is no more rebirth, all remaining kamma vipāka do not get a chance to come to fruition.

9. The first step in purifying one's mind is to avoid dasa akusala; see, "Ten Immoral Action (Dasa Akusala)." One does not need to try to do all at once (especially for those who are new to Buddha Dhamma).

- It is a life journey, and one can start slowly. First, trying to avoid bad actions, and then do things that can be done without much stress. See the posts in the "Bhāvanā (Meditation)" section and in particular, "ِ. The Basics in Meditation."
- There is no one watching, and only you know what your intentions are: whether they are moral or immoral.
- You will feel the benefits in terms of a less-stressed mind over time. It takes time, especially in the beginning. Then it will accelerate when one starts seeing the benefits. When one starts understanding that micchā ditt hi (wrong views) play a big role in one's tendency to do some immoral acts will automatically reduce. see, "Wrong Views (Micchā Ditthi) - A Simpler Analysis."

10. The Buddha said one could become indebted in four ways:

- Engaging in dasa akusala (10 unwholesome actions).
- Getting someone else to do such acts.
- Helping another in carrying out such acts.
- Praising someone who is doing such acts.

Thus one can become indebted in 40 ways. By avoiding all that will make one joyful (adhimokko or sense of well being). That will give impetus to accelerate one's efforts. Also, see, "Habits and Goals," and "The Four Bases of Mental Power (Cattāro Iddhipāda)."

Another more in-depth analysis at, "Difference Between Giving up Valuables and Losing Interest in Worthless",

### 7.2.6 How do we Decide which View is Wrong View (Diṭ̣hi)?

## Revised July 3, 2022

More than $99 \%$ of one's immoral acts have their causes in micchā ditṭhi (wrong views); see, "What is the only Akusala Removed by a Sotāpanna?." Thus, it is critical to understand what wrong views are.

- A simpler, yet fundamental, analysis of wrong views can be found in, "Wrong Views (Micchā Ditthi) - A Simpler Analysis."

1. We all have our views about different things: politics, religions, sports, lifestyles, etc. And most times it is fun to talk about and debate whose views are the correct ones. But each one of us has views based on limited knowledge about only a fraction of "this world."

- A good way to figure out whether one view is better than another is to see whether that view provides more insight AND has more explanatory power about the world.
- In fact, that is the only way. Because anybody can just say, "my view is better than yours."

2. When I refer to "ditthi" or wrong views, these are the wrong views per Buddha. It must be noted that "ditṭhi" means views, but in Pāli literature it has been common to call "micch $\bar{a}$ ditthi" (pronounced "michch $\overrightarrow{\boldsymbol{a}}$ ") or wrong views as just "ditthi." It is critical to have the "right views" because otherwise we may be taking wrong decisions, and that could have very bad outcomes for billions of years to come. In order to make the right decisions we need to "see the whole picture" or the world view of the Buddha.

- Of course, one is entitled to have his own views. It is just that according to Buddha Dhamma certain views are not only wrong, but could lead to disastrous outcomes, and those are micchā ditthi. One either accepts this fact or rejects it. It is a good idea to look at the "big picture" of the Buddha and THEN decide whether it makes sense or not. First, let us see why one should even go through this exercise of looking at the big picture.

3. When one does not have a clear overall picture, one makes bad decisions. For example, a fish does not see the string or the hook, only sees the worm, and gets into trouble. If it saw the whole picture, with the string and the hook, it may realize that there is something wrong and would not try to grab the worm. If it saw the man standing on land holding the pole, that would have been another clue; but the fish can only see its "domain." Just like that we can only see "our domain" within the wider 31 realms, and we do not see the level of suffering in other lower realms.

- We are inherently incapable of seeing the "whole picture" because our sense faculties are formed by our kamma to be aware of only a part of whole existence; you may get an idea of what I am referring to in the post, "Consciousness Dependence on Number of Dimensions." Therefore, no matter how smart each of us is, we cannot even imagine this whole picture by ourselves. It takes a very special, very pure mind to see the whole picture, the mind of a Buddha; see, "Power of the Human Mind - Introduction," and follow-up posts.

4. The Buddha described this in the parable of the "elephant and the six blind men." Each blind man is feeling or exploring a different part of the elephant and comes up with his view of what an elephant is: The one examining the tail says the elephant is like a rope, one examining a leg says the elephant is like a pillar, etc.

- The person holding the tail is certain that the elephant is like a rope "because I know what I experience; you cannot tell me it is not like a rope." He just does not realize that he is experiencing only part of the whole elephant.

5. Until a Buddha comes to this world, any human can only see a very small part of the whole picture. Like the little girl in the video being able to see the whole elephant, only a Buddha can see the whole picture of our true existence.

- Mathematician Kurt Gödel proved this mathematically in his Incompleteness Theorem, which says that it is not possible to discover the complete truth of a closed system within that system; see, "Gödel's Incompleteness Theorem." Thus science will NEVER be able to discover a COMPLETE set of laws about nature. It can only uncover parts and the parts that have been discovered are totally consistent with Buddha Dhamma.

6. According to the Buddha, ditṭhis are like that: some people say there is a rebirth process, and some say not. Some say when we die we will either go to hell or heaven. Some say, things really exist in a permanent way, and others say it is all a mirage. All these are dittthis because none of these fit the WHOLE PICTURE. None of these can explain the vagaries of life; see, "Complexity of Life and the Way to Seek "Good Rebirths"."

- For example, we can only see two of the 31 realms of existence: animal and human realms. We are not aware that most beings are trapped in the lowest four realms where there is much more suffering than we can see in the human and animal realms. We do not realize that our immoral actions from this life, AND from our past lives (that we are not aware of) could give us rebirth in those lower four realms; this is the "laws of kamma" another part of the "big picture." There is evidence for rebirth; see, "Evidence for Rebirth."

7. Buddha Dhamma cannot be fully understood without having learned of that "big picture" from a Buddha or from a person who has learned the correct version of it. Now, since the Buddha is not here and there are many versions of Buddha Dhamma, the question is how do we figure out which version to believe. The Buddha gave a solution to this problem: Find the version that satisfies the following conditions:

- All aspects should be consistent with the Suttā and Vinaya (and thus Abhidhamma); these were transmitted orally for about 500 years and then written down in the Pāli Tipiṭaka about 2000 years ago (Pāli Tipitaka).
- And all three descriptions in the Tipitaka (Sutta, Vinaya, Abhidhamma) must be consistent with each other.

8. This second requirement is there to catch any mistakes made in the (especially oral) transmission from the time of the Buddha. It must be kept in mind that all three sets were formulated for easy oral transmission. I know several suttā by heart which I learned when I was little; they have been formulated to be easily remembered. And there were different groups of Bhikkhus assigned the responsibility for different sections during the time of oral transmission. Also see, "Preservation of the Dhamma."
9. In a series of posts I have provided evidence that many versions of "Buddhism" being practiced today do not pass the above tests. All Mahāyāna versions are in blatant contradiction to the teachings in the Tipiṭaka, and some key concepts taught in Theravāda are also inconsistent with Tipitaka; see, "Why is it Critical to Find the Pure Buddha Dhamma?," and the follow-up posts.

- Once one finds the key Dhamma concepts that are self-consistent, then one can easily figure out what is ditṭhi and what is not. If anyone can point out anything on this website that is not internally consistent, I would appreciate it. Because my goal is genuine: to find and document the original teachings of the Buddha.

10. Thus it is important to realize that ditthi is an established view (a view one is not even willing to rethink) about the world, that is inconsistent with Buddha Dhamma. Let us take a few examples:

- Two good examples are the two views of 'there is a self" and "there is no self"; see, "Ditthi (Wrong Views), Sammā Ditthi (Good/Correct Views)." Both are wrong views according to the Buddha: there is only an ever-changing lifestream that progresses according to cause and effect (Paticca Samuppāda); see, "What Reincarnates? - Concept of a Lifestream."
- Another ditthi many people have is that there is no rebirth process, or that there is a rebirth process but we will never be born as an animal because we have not done anything bad in this life. It is just a belief, there are no supporting evidence to back that up. On the other hand, the rebirth process involving all 31 realms and the natural law of kamma, together with Paticca Samuppāda, and other key concepts like Tilakkhana can explain EVERYTHING that we experience. What needs to be understood is that ALL THOSE PIECES MUST BE THERE to complete the whole picture.

11. Just like a blind man holding onto a leg of the elephant and saying "This is what I experience and the elephant is like a pillar. I know what I experience, and I am right", we hold onto ditthis that are inconsistent with the nature's laws. Once one hears the message of a Buddha, one should at least examine the credibility of that message by looking at the evidence he presented. Ultimately, one has to make the decision to accept Buddha's message or not. This is why no one can lead anyone else to salvation. It is all in one's own mind.

- Let me give an example of how limited our worldview had been even two hundred years ago. People believed that Earth was the only planet with the Sun going around the Earth. So, when the Buddha said there are innumerable world systems with other Suns and Moons, people thought that was a loony idea. There are many such ditthis that have been proven to be wrong by science over the past hundred years or so; see, "Dhamma and Science - Introduction."

12. Some of the views we have are deeply ingrained, and not easy to get rid of. The main thing is NOT to take a firm stand on things that the Buddha called dittthi and say, "I know this to be true, and only this to be true" and to cling to them. Even a Sotāpanna may not be fully convinced that, for example, there is a arūpa loka, but he/she has not ruled that out, i.e., does not have a ditṭhi. Only an Arahant has "complete" Sammā Ditṭhi.

- As one learns pure Dhamma, one will have more and more confidence in the world view of the Buddha and will get rid of the wrong views. Since the mind cannot be forced to accept anything, this "change of vision" comes only through learning the pure Dhamma and through the enhanced life experience, which means purifying the mind; see, "The Importance of Purifying the MInd."
- We cannot pick and choose parts of Buddha Dhamma that we like if we want to reap the full benefits. Of course one could decide to "live with" parts of Dhamma that one is comfortable with. The Buddha said to accept his teachings only if they make sense. To make sense though, one needs to look at the whole picture too. Otherwise, it will be like a blind man examining only the leg of an elephant and saying it really feels like a pillar.

13. Ditthi is one of 14 akusala cetasika and one of the ten kilesa; see, "Ten Immoral Actions (Dasa Akusala)," and "Ditthi (Wrong Views), Sammā Ditthi (Good/Correct Views)." Ditt thi have been described in many ways by the Buddha. At the Sotāpanna stage, those ditṭhis that could lead to rebirth in the apāy $\bar{a}$ (sakkāya ditṭhi, vicikicchā, sīlabbata parāmāsa) are permanently removed; see, "Akusala Citta - How a Sotāpanna Avoids Apāyagāmi Cittas."

- Thus it is important to realize that the Sotāpanna stage CANNOT be reached until niyata micch $\bar{a}$ dittthi or ESTABLISHED wrong views are removed. For example, one should not hold on to a firm belief that there is no rebirth process; one should at least keep an open mind.
- Stated most succinctly, micchā ditṭhi is the wrong perception of nicca, sukha, atta, i.e., things can be maintained to one's satisfaction, thus lasting happiness is possible, and thus it is fruitful to stay in this world of 31 realms. One attains the first stage of Sammā ditṭhi when one comprehends anicca, dukkha, and anatta to a certain extent at the Sotāpanna stage.

14. The Buddha said his Dhamma is hard to understand, and it is not like anything that anyone taught before, except for another Buddha: It is "Pubbe ananussutesu Dhammesu," "A Dhamma that has not been heard before." This is why the Buddha worried just after the Enlightenment whether he will be able to teach this difficult Dhamma to normal human beings. It takes a real effort to glean the message of the Buddha. [Pubbe
ananussutesu Dhammesu：see WebLink：suttacentral：Dhammacakkappavattana Sutta（SN56．11） ananussuta：a．［an－anussuta］未聞的，未曾聞的，不隨聞的．］
－Most of us have different types of dittthis；see，＂Why Do People Enjoy Immoral Deeds？－Ditthi Is Key．＂
－For a description of the ten micchā dittthi，see，＂Three Kinds of Ditthi，Eightfold Paths，and Samādhi．＂

## 7．2．7 Three Kinds of Ditṭhi，Eightfold Paths，and Samādhi

Buddha Dhamma explains how three kinds of worldviews lead to three types of samādhi（basically mindset） via three different paths．All these are discussed in detail in other posts，but here we summarize them．You can use the Search box on top right to find relevant posts．

1．Have you ever wondered how some people have any＂peace of mind＂while engaging in abominable actions day in and day out？It is easier to excuse someone who commits a bad act in a＂moment of fury＂，i．e， when such action was not pre－planned（and the common law accommodates for that）．
－But some people（think Hitler，Pol Pot in Cambodia）plan evil acts for years，and they seem to thrive doing it；they do not feel any remorse；rather they enjoy what they do．This is because just like facilitating a journey towards Nibbāna for someone who embarks on the Noble Eightfold Path，the nature also lets someone go in the opposite direction too．＂Dhammo ha ve rakkhati dhammacari＂applies to both kinds of＂Dhamma．＂
－Dhamma is what one＂bears．＂If one＂carries good Dhamma＂，one will be guided in the＂good direction＂ by nature．In the same way，one who＂carries bad Dhamma＂will be guided in the opposite direction． Both can get into＂samādhi＂doing it．

2．Samādhi（＂sama＂＋＂adhi＂where＂sama＂means＂same＂and＂adhi＂means＂dominance＂）means the object becomes the priority and the mind gets focused on it；as we discussed in many posts，when the mind becomes focused on one object（ärammana），no matter what the object is，the ekaggata cetasika takes over and make the mind latched＂on to it．＂
－When the minds gets to samādhi，the mind feels calm because it is stopped from jumping back and forth among many thought objects（ārammaṇa）．
－This is how one gets to not only samādhi but also anāriya jhāna（a jhāna is a deeper state of absorption or samādhi）using breath meditation，just by focusing the mind on the breath．
－Thus，a master thief gets to micch $\bar{a}$ samādhi when intently focusing on the plan of a grand robbery in minute details．Not only does he get a joy out of it，his mind helps him work out the fine details；but someone with micchā samādhi can never get into a jhāna．
－It does not matter what the focus is，nature helps get it done if one really sets his／her mind to it．This is why＂Dhammo ha ve rakkati dhammacari＂can work in any situation．The human mind is very powerful，but it can be used in all three directions．

3．However，that does not change the fact that outcomes of＂bad actions＂will ALWAYS be bad in the long run．This is a universal law called＂bīja niyama＂which is one of five natures＇primary laws called ＂niyama＂（＂niyama＂in Pāli or Sinhala means＂fixed＂，＂unchangeable＂）；even though most times it is pronounced＂niyāma＂，the correct pronunciation is＂niyama．＂
－Bad kamma result in＂bad kamma bīja＂which will ONLY bear＂bad fruits＂；also，the consequences will be proportional to the＂size＂of the kamma bïja（kamma seed）．And the same holds true for good kamma seeds．

4．Now，when someone gets on the＂wrong track＂mostly through bad associates or bad environment，one has the＂ten types of micch $\bar{a}$ dittthi＂，and one could get into the＂micch $\bar{a}$ eightfold path．＂The ten types of micchā diṭthi are：

1. giving (dana) has no merits,
2. being grateful and responding in kind (for what others have done for oneself) has no merits,
3. respecting and making offerings to those with higher virtues has no merits,
4. what we enjoy/suffer in this life is not due to kamma vipāka but they "just happen",
5. this world does not exist, there are no other worlds than the one we can experience,
6. when one dies it is not possible to be born in para loka (netherworld),
7. mother is not a special person,
8. father is not a special person,
9. there are no instantaneous (opapathika) births,
10. there are no samanabrahmana (basically Ariy $\bar{a}$ or yogis) who have cultivated their minds to be free of defilements and thus can can see other realms and previous births.

- See, "Hidden World of the Gandhabba: Netherworld (Paraloka)" for a discussion on para loka.

5. When one has unshakeable or niyata micch $\bar{a}$ ditṭhi one gets on the micch $\overline{\boldsymbol{a}}$ eightfold path; now one's mind is

- Since these factors feed on each other, once one gets into micchā eightfold path, it is difficult to break out of it. The key is micch $\bar{a}$ dittthi: "Wrong vision" is hard to break, when it is continually being reinforced by wrong speech, actions, etc. Thus it is inevitable that one keeps strengthening one's "bad gathi" or behavior. Then it is increasingly easier to get to "micchā samādhi."

6. The Buddha said that Sammā Ditṭhi is two-fold: there is a mundane (lokiya) Sammā Ditthi and an Ariya Sammā Diṭṭhi. When one has mundane Sammā Ditṭhi, one rejects the ten types of micchā diṭthi mentioned above, and one strives to be born in human or higher realms. One knows that bad actions will lead to birth in the apāy $\bar{a}$ (lowest four realms).

- Thus one with mundane samma ditṭhi will develop mundane versions of sammā sankappa (good thoughts), samm $\bar{a}$ vaca (abstain from lying, gossiping, etc), samm $\bar{a}$ kammanta (engages only in moral acts), and so on and then it is easier for one to get to mundane samm $\bar{a}$ sama $\bar{a} d h i$. This is the mundane sammā eightfold path.
- However, while someone following the micchā eightfold path cannot attain any jhāna, one on the mundane sammā eightfold path can attain anāriya jhāna; see, "Power of the Human Mind - Anariya Jhāna."

7. The critical difference between mundane sammā ditthi and Ariya Samm $\bar{a}$ Ditt hi is that while one with mundane samma ditthi rejects immoral behavior based on one's fear of rebirth in the apāy $\bar{a}$ and one's hope for rebirth in comfort-filled deva or brahma worlds (or even because it makes one feels good about the act), one ATTAINS Ariya Sammā Diṭthi when one comprehends anicca, dukkha, anatta at least to a significant extent, i.e., one becomes a Sotāpanna.

- Thus one starts on the Path by following the mundane sammā eightfold path, and at some point enters the Ariya Sammā Eightfold Path when attaining the Sotāpanna stage.
- At that stage, one's mind automatically rejects immoral acts because one's mind sees the futility as well as the danger of such acts. What is the point of having some sense pleasure if it lasts only a short time AND could lead to much misery in the future for long times?

8. The critical point is that when one becomes a Sotāpanna, one's mind (and the brain) will be changed so that one will not act even impulsively, let alone capable of pre-planning an act that could yield rebirth in the apāyā.

- Scientists do confirm that there are significant changes in the brain just due to breath meditation alone; see, "Truine Brain: How the Mind Rewires the Brain via Meditation/Habits."
- Such future brain studies on people engaged in the correct $\bar{a} n a ̄ p a ̄ n a ~ m e d i t a t i o n ~ c a n ~ b e ~ e x p e c t e d ~ t o ~ y i e l d ~$ profound changes in a brain when a person attains the Sotāpanna stage.

9. Thus one becomes a Sotāpanna (enter the stream) from the mundane sammā ditṭhi stage by comprehending the true nature of the world (i.e., it is fruitless to be born ANYWHERE in the 31 realms) by learning the meanings of anicca, dukkha, anatta from a Buddha (who discovers them), or from a true disciple of the Buddha.

- Once one becomes a Sotāpanna, the Path to Nibbāna becomes clear, and one does not need any more help. One will cultivate the next six steps and get to Ariya Sammā Samādhi and to the Arahant stage of Nibbāna.

10. I need to re-emphasize the difference between "living a moral life" which is promoted by most of world's major religions, and the emphasize on "purifying the mind" and "comprehending the true nature of the wider world of 31 realms" in Buddha Dhamma.

- One needs to approach this extra step first by being "moral", i.e., by following the mundane samm $\bar{a}$ eightfold path and getting rid of some of the five hindrances. Then one's mind is purified to an extent to be able to "see through the fog of ignorance" and comprehend anicca, dukkha, anatta.
- Buddha's message about the "suffering hidden in the midst of apparent sense pleasures" is indeed a "Dhamma that has never been known." It could be contrary to one's instincts, because all we have known from the beginningless time is about enjoying the sense pleasures.

Note: The three kinds of eightfold paths, micch $\bar{a}$ diṭthi, and micch $\bar{a} s a m \bar{a} d h i$ are described in the Mah $\bar{a}$ Chattareesaka Sutta; see, "Mahā Cattārīsaka Sutta (Discourse on the Great Forty)."

## Implications of the Rebirth Process in Daily Life and in Society

## Revised August 23, 2022

1. Unless one develops abhiñ̃̃̄a powers via meditation, the rebirth process cannot be "proven" with certainty. Yet, mounting evidence for it cannot be ignored either, see "Evidence for Rebirth."

- Putting that question aside, let us look at some mundane implications IF the rebirth process, as described by the Buddha, is correct.

2. The first thing to realize is how short this life of 100 years or so is. It is unimaginably small. Scientists say that our universe has been there for about 14 BILLION years. But the Buddha taught that life has no beginning. Either way, 100 years is a blip in the cosmic time scale.

- Looking at world history, most calamities of war could have been prevented if people understood how short this life is. Where are those emperors and kings today who sacrificed so many human lives to capture another country or to maintain their powers?
- Because of their atrocities, they are most likely to be in the lowest of the apayy $\bar{a}$.
- For the briefest time of enjoyment and power, they accumulated so much bad kamma to spend billions of years in total misery.
- What significance would race, color, ethnicity, religion, beauty, money, etc., have in one's actions if one understood that all those are not only temporary, but one could be on the other side in the next life? This is a topic that is worth contemplating a lot.

3. Let us take the struggle between the Palestinians and the Israelis because it is making headlines these days; one could take any other conflict. According to Buddha Dhamma, two effects come to play here.

- One in either camp will develop a mindset to hate the other side, take revenge for some action, etc. If they have any kammic energy for the human "bhava," they will come back to the same place with matching "gati," looking for revenge; see, "Paticca Samuppāda - "Pati + ichcha" + "Sama + uppada."
- The other aspect is for any bad action one does in such a conflict is going to have consequences RELATED to that act. When person A kills or harms another person B, A becomes indebted to B. One way to "pay back this debt" is for B to be born as a child to A; see, "Kamma, Debt, and Meditation." Isn't that the biggest irony of all? A Palestinian (Israeli) becoming the child of an Israeli (Palestinian)?
- Either way, the conflict will continue for a long time unless both sides realize the folly of it all.
- This is true for many other conflicts that have been going on for generations. Most of the characters involved have likely been the same. They are too much "involved" in the conflict and cannot free their minds from it.

4. Let us take another example of a slave owner in the old days. That person made a lot of wealth by exploiting those slaves, but for how long? At most 100 years. Where are those slave owners now? They would either be in one of the lowest four realms OR could be a slave himself somewhere, possibly to a former slave.

- It is easy to extend this analysis to many other cases; it is a good idea to contemplate such things. It makes one understand the true meanings of anicca, dukkha, and anatta. That is unfruitful to do immoral things to achieve a brief moment of sensory pleasure, where the consequences can play out for much longer in a future birth.

5. Yet we strive for a quarter of our lives to go through the basic educational process (which is the only part that makes any sense in the long term) and the rest of our life to "accumulate things and prestige."

- We do not stop and think about how the last years of our life will be, let alone about future lives. By the time we get to such accomplishments, our senses start degrading. No matter how much money we have, we will never be able to maintain our physical appearance or the level of sensory pleasures to our liking.

```
WebLink: YOUTUBE: Done Got Old
```

- The problem is that we are too busy to contemplate such issues because we are in a frantic struggle to "make money for survival." Whatever vacation time we get, we would not want to spend that time for contemplation. Instead, we go on a trip or do some such activity to "enjoy ourselves." But when one returns from a vacation, it feels like one needs another to recover from those hectic activities.

6. There is another reason that people do not want to even think about such things; it could be depressing. But I can say with conviction that once one understands the "true nature of this world," it WILL lead to a peaceful state of mind. It will also be easier to get into samādhi and $j h \bar{a} n \bar{a}$.

- The reason is that as one understands anicca, dukkha, and anatta (the futility of doing immoral things to gain sensory satisfaction in a world that is INHERENTLY not setup for that), one GRADUALLY loses attachment to worldly things, and this makes the mind peacefui; this is the root cause of nirāmisa sukha; see, "Three Kinds of Happiness - What is Nirāmisa Sukha?."
- Nibbāna or "Nivana" or "cooling down" is not like any sensory pleasure. Rather, it is a relief. A good analogy is the following: suppose someone has a migraine headache; then the day that headache disappears, that person will get a HUGE sense of relief. It is not a sensory pleasure but a feeling of wellbeing that is hard to express.

7. I can give one example to make this point. Many people who start understanding anicca, dukkha, and anatta, realize that they do not watch TV or go to entertainment events as much as they used to. This is not something they do deliberately, it just happens. They would rather enjoy a meditation session at home or $\mathrm{read} /$ listen to Dhamma. It may be already happening to some of you.

- The mind cannot be forced. It just takes the better path, but the mind has to be exposed to the better, correct path. This is why giving true Dhamma is the best giving.

## What Does Buddha Dhamma Say about Creator, Satan, Angels, and Demons?

Revised February 20, 2019; August 21, 2019; April 24, 2022; August 28, 2022

## Unseen Beings

1. While the concept of a Creator God is absent in Buddha Dhamma (Buddhism), some living beings fit into some conventional ideas on satan, angels, and demons, such as "Seth" and "Ramtha." Since some readers may not be familiar with "Seth" and "Ramtha," let me first provide some background.

- Jane Roberts wrote a series of popular books based on "Seth," a being who could "possess" her body with her permission and spoke to her husband about various things about the world; see, for example, "Seth Speaks" by Jane Roberts (1994). Seth commented on diverse issues and made many predictions too. I am not sure how those "predictions" worked out, but I am sure the success rate must be no better than any human making such predictions.
- Then there is "Ramtha," who speaks through J. Z. knight; see, for example, "Ramtha -The White Book" by J. Z. Knight (2005). He is very benevolent, providing honest advice on living a better life. As I understand, there is a significant following for Ramtha.

## Creator God and Other Unseen Beings

2. Therefore, there are two issues (or concepts) to be discussed:

- First, there is the predominant belief in a "Creator God" in many religions. That concept is, of course, in direct contradiction with not only Buddha Dhamma but also with modern science. The principle of Causality is the basis of both Buddha Dhamma and modern science. There must be a cause(s) for every effect.
- On the other hand, modern science does not believe in "unseen beings." Science does not attempt to tackle phenomena not measurable with physical instruments. However, the Buddha taught that there are numerous "unseen living beings."
- We will discuss both the concept of a creator and also possible influence of unseen living beings.

## Can there be a Creator God?

3. In my early stages of learning about other religions, I read various books such as "Mere Christianity" by C. S. Lewis and "The Language of God" by Francis Collins (2007).

- They attempt to provide a "case for the Creator God." See my review, "The Language of God" by Francis Collins."

4. As I understand, one reason for those two authors to believe in a Creator is the existence of Moral law. How can we know and feel the truth of the Moral laws unless God instilled those in us?

- On the other side, both authors struggled with the issue of Satan (or Devil) and why there is suffering.
- Why would God allow the existence of Satan and the associated immoral behavior by people? The main conclusion was that God chose to give man free will, and man abused it. But why didn't God create a perfect man?
- Lewis, in particular, worried about the existence of suffering. Why would God allow that?

## One Is One's Own Creator!

5. Now, let us see what Buddha Dhamma says about those two issues:

- Of course, in Buddha Dhamma, there is no Creator. Everything happens due to (multiple) causes. By definition, there is no first cause (i.e., a Creator). The "world" has existed as far as one (with supernormal powers or abhiñ̃̄ $\bar{a}$ ) can see; for details, see "The Grand Unified Theory of Dhamma."
- In a way, one is one's Creator! The basic idea of Paticca Samuppāda is that one creates one's future lives via one's actions; see the reference in \#6 on Pațicca Samuppāda.
- Even people without abhiññā powers can remember one or a few past lives; see, "Evidence for Rebirth." In some exceptional cases, some can recall multiple past lives under hypnosis; see the book "Many Lives, Many Masters" by Brian Weiss, a psychotherapist.

## Good and Bad Co-exist

6. In Buddha Dhamma, "the good" and "the bad" in this world are all built into nature's laws. Any sentient being experiences "the world" with its sense faculties, and that experience comes in the form of thoughts (citta).

- Based on those sense inputs AND one's gati AT THAT TIME, one generates various "good" and "bad" responses. These responses manifest as thoughts, but we may act on them through speech and bodily actions.
- There are 52 mental factors (cetasika) that include both "good" characteristics (such as kindness, generosity, fear, and shame of wrong, etc.) and "bad" traits (such as greed, hate, shamelessness and fearlessness of wrongdoing, etc.). See "Abhidhamma" and "Tables and Summaries" sections.
- Until one becomes one of the "attha purisa puggala" (eight Noble Persons), one WILL have both good and bad gati. Those can lead to rebirths in the "good realms" and the apāyā, respectively.
- One overcomes the engagement with the rebirth process by comprehending the Four Noble Truths/Paṭicca Samuppāda/Tilakkahaṇa. See "Paticca Samuppāda, Tilakkhana, Four Noble Truths."

7. Thus, there is no "Creator God" or a "Satan." Each person acts of their own free will and commits moral or immoral acts. What a person today is the "cumulative result" of all one's actions in the deep past. These manifest as our character (or "gati" or "gathi") or samisāric habits (or "āsavas"). Many posts on this issue on the site, starting with "Habits, Goals, and Character (Gati)."

- And these gati and āsavas are in constant flux; thus, one could be a murderer one day, but then through sheer willpower, can decide to be a "better person."
- There is no "soul" or a fixed "self." One cannot say there is "no-self" either, because one's "gati" or "āsava" are unique characteristics and are "one's own"; see, "What Reincarnates? - The Concept of a Lifestream."

8. And no one else can make that change but oneself. Even the Buddha can only show how to change, i.e., how to change these "gati" and the "āsavas" for the better. When one follows that path, one can feel the "cooling down" or 'niveema" or the nirāmisa sukha. That is the real goal of Buddhist meditation; see "1. Introduction to Buddhist Meditation."

- The "moral code" comes naturally out of this big picture. One can lead a peaceful life by practicing "dasa kusala" (ten moral acts) and avoiding "dasa akusala" (ten immoral acts); see "Ten Immoral Actions (Dasa Akusala)" and the follow up post.

## Demons and Angels

9. Let us also briefly discuss "demons" and "angels" (or other gods). Most Creator-based religions have such entities. And they are supposed to be able to influence humans. Are there beings like that according to Buddha Dhamma?

- Yes. In Buddha Dhamma, the world is much more complicated than with just demons and angels. We can see and experience only two realms (human and animal) out of 31 possible realms in this world; see "The Grand Unified Theory of Dhamma."
- If someone develops $a b h i n ̃ \tilde{n} \bar{a}$ powers (see "Power of the Human Mind - Introduction" and follow-up posts), depending on the level attained, one could "see" some or many of these other beings. Some people can do this at present.

10. However, even the majority of people with abhiñ $\tilde{n} \bar{a}$ power can only "see" some inhabitants in the lowest 11 realms or "kāma loka." That includes the six deva loka with "less dense" bodies than ours.

- The beings in the rūpa loka and the arūpa loka have "bodies" even less dense than those in the deva realms, and it is even more difficult to "see" them.
- According to the Buddha Dhamma, the six realms in the deva loka are closest to a "heaven." Those beings have bodies free from physical illnesses, and there is much more happiness there than in the human world. And they have long lifetimes. However, any being in any higher realm can end up in the lowest four planes (ap $\bar{a} y \bar{a})$ in the future unless they reach at least the Sotāpanna stage of Nibbāna.

11. Some of these beings can communicate with humans with or without abhiññā powers. Some of these beings are benevolent, and others are evil. As pointed out in the posts on "gati"," a being communicates typically with a human with a similar "gati" or character.

- Thus an evil/malevolent being (we could say "a demon") typically tries to communicate with a human with similar lousy character. They may try to impress the human and get their agenda fulfilled.
- A benevolent being (we could say "an angel" or "a god") is usually a deva from the six deva realms. They like to help out people with good character but do not try to communicate directly. Typically, the person may not even know about it.

12. Therefore, many such beings like to "show off" and genuinely try to help people live better lives. But those beings themselves are "travelers of sainsāra" who happen to have a good birth for a more extended period.

- Then some beings are evil or with bad intentions. I am unaware of prominent cases like those mentioned in \#1 above. However, there are many reports on "hearing voices" and even committing crimes based on the instructions through such voices.

## Law of Attraction

13. Those beings with bad intentions cannot influence us if our mindsets are NOT COMPATIBLE with theirs. That is a crucial point to understand! See "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsavas)."

- One is ALWAYS responsible for one's actions. If an "unseen evil being" influences one, that is also due to one's lack of morality (one has cultivated bad " $\mathrm{gati}{ }^{6}$ ).
- As in common law, ignorance of Nature's laws is not an excuse.
- The reason for being trapped in this suffering-filled rebirth process is simple. We had not been able to understand Nature's laws. Only a Buddha can understand those, and we should be thankful that we live in a time when that message is still available.
- We must learn Dhamma, eliminate bad gati, and cultivate good gati. That will pave the way to becoming a Noble Person and thus be free of all future suffering!

14. There is an exception, though. Sometimes a kamma vipāka can allow one to be influenced by a "malevolent being" even if one is living a moral life.

- That is normally due to an "unfulfilled debt" from a previous life. See "Kamma, Debt, and Meditation."
- In such a case, it is a good idea to make offerings to the bhikkhus and those who are in need and ask any such beings to accept the merits. The cultivation of Metta Bhāvanā is another. See "Transfer of Merits (Pattidāna) - How Does it Happen?."

## It Is a Complex World

15. This world is very complex, and we perceive only a tiny part. But the point is that there is no place anywhere in the $\mathbf{3 1}$ realms that can provide permanent happiness.

- There is no point in pursuing such demons or angels. They are in the same predicament, or worse, compared to us. Those benevolent beings will help us, even without seeking help, if they see us as good.
- As humans, we have the unique advantage of learning the truth about the dangers of this rebirth process (sainsāra) and working towards getting out of it by seeking Nibbāna or "cooling down." That was THE message of the Buddha.

## Paṭisandhi Citta - How the Next Life is Determined According to Gati

## Revised September 7, 2016; revised \#2 on March 15, 2018; September 7, 2019

1. The transition of a lifestream from one existence (bhava) to another takes place during the last citta vithi of the present bhava. For example, when a human is reborn an animal or a deva. For a fundamental description of this process, see, "Cuti-Patisandhi - An Abhidhamma Description."

- But here let us look at how different types of kamma, as well as one's "gati" (pronounced "gathi"), lead to corresponding rebirths in different realms.

2. As discussed in "Akusala Citta and Akusala Vipāka Citta," all ten types of akusala kamma are done with 12 types of akusala citta.

- Only those five akusala cittā with wrong views (micchā ditṭhi) or vicikicchā can lead to rebirth in the apāy $\bar{a}$ (four lower realms). Those akusala cittā lead to just one pațisandhi vipāka citta, and it is called the "akusala vipāka upekkhā santīraṇa citta." That is the type of citta $\bar{a}$ that comes to the mind of the dying person destined for the apāy $\bar{a}$.
- The two dislike-rooted (patigha) cittā do not arise at the Anāgāmi stage. The remaining five akusala cittā do not occur only in Arahants; see, "Akusala Citta and Akusala Vipāka Citta."

3. That one pattisandhi citta can lead to rebirth in an uncountable number of "bhava" in the four lowest realms. In the animal realm itself, there is an uncountable number of varieties.

- Thus what determines the actual "place of birth" in the four lowest realms is one's "gati." Once the fate is determined to be born in one of the four lowest realms due to an akusala kamma, the next step for nature is to match "gati to gati." A greedy person is likely to be matched with a birth in the peta realm (hungry ghosts). A vicious person is expected to be destined to the hell (niraya); see, "How Character (Gati) Leads to Bhava and Jāti."

4. Now let us look at how rebirth takes place according to one's kusala kamma. The merits of a kusala kamma are ENHANCED when done without moha, i.e., without micchā ditṭhi (or with at least mundane sammā ditthi). That is discussed in the post, "A Simple way to Enhance Merits (Kusala) and Avoid Demerits (Akusala)."

- Thus out of the eight mahā kusala kamma (great meritorious actions), four are done with knowledge. They, of course also hace alobha and adosa, i.e., generosity and loving-kindness. Since they have all three kusala roots, they are "tihetuka" births ("thi" means three and "hethu" means roots). They lead to the best kind of rebirths. Those are "tihetuka patisandhi" or "rebirth with three roots."
- The other four mahā kusala kammā have generosity and loving-kindness, but without mundane or lokuttara sammā diṭthi. Thus the resulting kamma vipāka lead to "dvihethuka paṭisandhi" or "rebirth
with two roots." They also point to birth in the realms 5 through 11 (i.e., in the human and deva realms), but they will have less kammic power for that birth.

5. It is only those with tihetuka pattisandhi who can attain magga phala and attain Ariya jhānā in this life. Those with "dvihetuka patisandhi" lack in necessary wisdom (but this is NOT book-knowledge); they can make progress and acquire the essential merits to have a future tihetuka patisandhi. But it is impossible to say who has a tihetuka or dvihetuka patisandhi; only a Buddha is capable of that.

- There is one more pațisandhi citta that is possible from a lower grade mahā kusala kamma. That is a kamma done without knowledge and with less enthusiasm. It involves a kusala vipāka upekkhā santīrana citta, and is a "rebirth with no good roots." That is an "ahetuka patisandhi." Note that here even though there are two roots present technically, they are very weak due to the absence of enthusiasm. For example, some people participate in exemplary work just because others do it, or because they did not have a choice.
- Such an "ahetuka patisandhi" can leads to births only in the human or the lowest deva realm. Such a birth is comparatively easy to recognize (but not always). People with ahetuka patisandhi have low IQ, could be blind or deaf at birth,. Or they are severely handicapped in other ways.
- However, such deficiencies COULD occur due to problems encountered in the womb (if the mother is a drug addict or had an ailment during the pregnancy). That is why, in some cases, we see people with the above characteristics, but are smart. They are not born with an ahetuka patisandhi and could learn Dhamma and attain $j h a \bar{n} \bar{a}$.

6. Thus we see that there is only one pattisandhi citta due to the ten akusala kamma (from 12 akusala citta). There are nine possible patisandhi citta due to the eight mahā kusala kamma.

- The remaining patisandhi citta lead to rebirth in the Brahma loka (16 rūpa loka and four arūpa loka). These rise due to jhānic states: rebirth in the rūpa loka are due to the five $r \bar{u} p a j h a \bar{a} \bar{a}$ and rebirth in the four arūpa loka are due to the four arūpa jhānā.

7. Therefore, only 19 patisandhi citta that lead to rebirth anywhere in the $\mathbf{3 1}$ realms. As we have discussed, there is an uncountable number of species (we ourselves can see numerous animal species). What differentiates different species is the "gati." You can see that each species has its own "character": Even within a given species, there are differences in "gati." If you look at dogs, there are some who are vicious, and then there are cuddly ones (poodles).

- In the days of the Buddha, when someone dies, relatives of the deceased usually ask the Buddha "what the $j \bar{a} t i$ is, and what the gati is" for the new birth. These days we don't have the Buddha to clarify that for us. But we can sort of guess what "gati" we have and make sure to change them for the better.
- When one attains the Sotāpanna stage, any "gati" matching those in the apāyā is permanently removed. That means hate, greed, ignorance at the highest levels.
- At the Sakadāgāmī stage, one's liking to a "dense body" to enjoy sense pleasures is no longer there. Such a "dense body" is one that can get diseases. Thus a Sakadāgāmī is never born in human or lower realms where sickness and body aches are a fact of life.
- Then at the $A n \bar{a} g \bar{a} m \bar{\imath}$ stage, one loses cravings for enjoying pleasures with the nose, tongue, and the body. Then one can find matching "gati" only in the rūpa and arūpa loka.
- At the Arahant stage, one loses the craving for any sensory pleasure associated with even a trace of solid matter. At that stage, the mind attains the true freedom; no more "gati" left.

### 7.3 Seeking Nibbāna

1. This section is for those who are interested not merely in pursuing a good life or seeking better lives in future births. Other religions can also provide guidance for those goals to a certain extent. The uniqueness in the Buddha's message is that there is perpetual suffering in the unending cycle of rebirths in "this world", the root causes for that suffering, that there is possible release from that suffering (Nibbāna), and there is a way to attain Nibbāna.
2. The first stage of attaining Nibbāna is the Sotāpanna (Stream Entry) stage. In order to reach this stage, one needs to have a complete understanding of Buddha Dhamma (or the laws of nature). Since only a Buddha can discover these laws, it is not possible for anyone (no matter how intelligent) to discover these laws by oneself.
3. Once the Sotāpanna stage is attained, one knows what to do next. Thus there is no need to get further information from anywhere else. My goal with this site is to provide necessary information to attain the Sotāpanna stage.

Sotāpanna Stage of Nibbāna subsection has a number of posts describing the Sotāpanna stage.

### 7.3.1 Atṭha Purisa Puggalā - Eight Noble Persons

March 4, 2019; revised \#9 on March 6, 2019; October 5, 2019 (\#11)major revision August 29, 2022

## Introduction

1. Many suttā describe various characteristics of Ațtha Purisa Puggalā or Ariyā (eight Noble Persons: Sotāpanna Anugāmi through Arahant). See "Sotāpanna Anugāmi - No More Births in the Apāyā." We will discuss some key features in this post, especially regarding the maximum time taken to attain Arahanthood.

- There are likely several ways Noble Persons are defined in the Tipitaka. Here we will start by considering a categorization based on the state of development of pañca indriya in a set of suttā in Saìyutta Nikāya 48.
- The "WebLink: suttacentral: Suddhika Sutta (SN 48.1)" states what the pañca indriya are: Saddh $\bar{a}$ indriya, vīriyiya indriya, sati indriya, samādhi indriya, pañ̃̃ā indriya.

2. The "WebLink: suttacentral: Pathama Vibhañga Sutta (SN 48.9)" explains what those five indriya are. I will just provide a short translation to get the idea.

- Saddhā indriya is optimized when one truly realizes the truth of the virtues of the Buddha (itipi so bhagava...": "That Blessed One is an Arahant, perfectly enlightened, accomplished in true knowledge and conduct, perfectly purified, knower of the wider world (of 31 realms), unsurpassed in virtue, teacher of devas, Brahmā, and humans, the Enlightened One, the Blessed One." This is about the Buddha as a person AND even more importantly, the comprehension of the concept of Buddha as "bhava uddha"; see, "Supreme Qualities of Buddha, Dhamma, Sangha." [Buddha = bhava + uddha: one who figured out how to stop existences (bhava) from arising. uddha is rooting out]
- Viriya indriya represents one's effort in cultivating kusala and discarding akusala.
- Sati indriya represents one's ability to be mindful of one's thoughts, speech, and actions.
- Samādhi indriya indicates one's ability to focus on Nibbāna and to get to samādhi.
- Paññā indriya represents one's comprehension of the Four Noble Truths about sam̈sāric suffering.

## Categorization Based on Pañca Indriya

3. WebLink: suttacentral: Dutiyasañkhitta Sutta (SN 48.13) states, "Imesam kho, bhikkhave, pañcannain indriyānawin samattā paripūrattā arahain hoti, tato mudutarehi anāgām̄̄ hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi dhammānusārī hoti, tato mudutarehi saddhānusārī hoti. Iti kho, bhikkhave, indriyavemattatā phalavemattatā hoti, phalavemattatā puggalavemattatā"ti.

- Translated: "Bhikkhus, one who has fulfilled pañca indriya is an Arahant; one who has developed them to lesser levels are Anāgāmī, Sakadāgāmi, Sotāpanna, Dhammānusāri, and Sadhhānusāri. Bhikkhus, that is how different levels of indriya development determine the level of progress."
- As we know, Dhammānusāri and Saddhānusāri are Sotāpanna Anugāmis.

## Two Kinds of Sotāpanna Anugāmi

4. There are 10 sutt $\bar{a}$ in the "WebLink: suttacentral: Okkantika Sainyutta (SN 25)" that focus only on the two kinds of Sotāpanna Anugāmis: Dhammānusāri and Saddhānusāri. These are important because they emphasize the need to comprehend the anicca nature of the five aggregates (pañcakkhandha).
"WebLink: suttacentral: Cakkhu Sutta (SN 25.1)" states: "Cakkhumं, bhikkhave, aniccain viparināmi añ̃athābhāvi; sotain aniccam viparināmi aññathābhāvi; sota..ghānami.. jivhā .. kāyo .. mano anicco viparinām̄̄ aññathābhāvı̄. Yo, bhikkhave, ime dhamme evaì saddahati adhimuccati-ayaì vuccati saddhānusārī, okkanto sammattaniyāmaì, sappurisabhūmim okkanto, vītivatto puthujjanabhūmim; abhabbo taì kammaì kātuí, yaí kammaí katvā nirayaì vā tiracchānayonim vā pettivisayamं vā upapajjeyya; abhabbo ca tāva kālaím kātum yāva na sotāpattiphalaì sacchikaroti."

- Translated: "Bhikkhus, the eye is of anicca nature, bound to be destroyed, and is subject to unexpected change during its existence." The ear... nose... tongue... body... mind... Bhikkhus, one who has conviction and belief that these phenomena are this way is called a faith-follower (Saddhānusāri): one who has entered the Noble Path (sammattaniyāma), has entered the plane of integrity (sappurisabhūmi), has transcended the plane of the run-of-the-mill (puthujjanabhūmi). He cannot do any deed by which he might be reborn in hell, in the animal womb, or in the realm of hungry shades. He is incapable of passing away (from this Ariya birth) until he has realized Sotāpatti phala.
- Then the same verse is repeated for the Dhammānusāri with the following replacement for the part marked in red above for the Saddhānusāri: "one who, after pondering with insight, has accepted that these phenomena are this way is called a Dhamma-follower (Dhammānusāri).

## Maximum of Seven More Bhava For a Sotāpanna and Seven More Ariya bhava For a Sotāpanna Anugāmi

5. It is important to realize from \#4 above that a Sotāpanna Anugāmi will never "die" from the Ariya birth, and that no time limit is given. Only upon getting to the Sotāpanna stage will one have a limited number of births; see below.

- However, a Sotāpanna Anugāmi will have only 7 more Ariya bhava left (Sotāpanna, Sakadāgāmi Anugāmi, Sakadāgāmi, Anāgāmī Anugāmi, Anāgāmī, Arahant Anugāmi, and Arahant).
- Thus, it appears that is what is stated in the Ratana Sutta as, "Na te bhavain atthamamādiyanti" (7 types of Ariya Bhava left) for eight types of Noble Persons (Ariyā).

6. The other nine suttā in the "WebLink: suttacentral: Okkantika Sairyutta (SN 25)" go through the same descriptions for Dhammānusāri and Saddhānusāri in terms of the six types each of rūpa, viññāna, samphassa, samphassajā vedanā, rūpasañn̄a, rūpasañcetanā, rūpatanh $\bar{a}$, dhātu, and the five types of khandha (i.e., pañcakkhandha).

## Time Limits for other Noble Persons to Attain Arahanthood

7. The time limits for the other Noble Persons are given in the "WebLink: suttacentral: Saupādisesa Sutta (AN 9.12)."

- There are five kinds of Anāgāmis (see \#10 below), and they all have overcome the first five samyojana of sakkāya diṭthi, vicikicchā, and sīlabbata parāmāsa, kāma rāga, paṭigha.
- Some of them will be born in a Brahma realm reserved for the Anāgāmis, will remove the remaining samiyojana of rūpa rāga, arūpa rāga, māna, uddhacca, avijjā, and attain Parinibbāna there.
- Others would have already removed two more samyojana of rūpa rāga and arūpa rāga, and thus will not be born in any realm, and thus will remain in the gandhabba state until the kammic energy runs out. This is called antarāparinibbāna ("Parinibbāna in between realms"). This was discussed at the forum: "WebLink: Pure Dhamma Forum: Antara Parinibbāna."

8. Then there is the Noble Person with the Sakādāgāmī phala (including those Anāgāmi Anugāmis). "WebLink: suttacentral: Saupādisesa Sutta (AN 9.12)" states that, "So tiṇnà் sam̀yojanānaì parikkhayā rāgadosamohānaì tanuttā sakadāgāmī hoti, sakideva imaí lokaì āgantvā dukkhassantà̇ karoti."

- Translated: "With the ending of three fetters (samiyojanā), and the weakening of greed, hate, and delusion, a Sakādāgāmī will come back to this world only once to deva realms."

## Three Types of Sotāpanna

9. Then there are three types of Sotāpanna:
"So tiṇ̣aì sam̀yojanānaì parikkhayā ekabī̀jī hoti, ekaminyeva mānusakain bhavain nibbattetvā dukkhassantam karoti."
"So tiṇnam samyojanānaín parikkhayā kolañkolo hoti, dve vā tīni vā kulāni sandhāvitvā saminaritvā dukkhassantam karoti."
AND "So tiṇ̣ám samiyojanānamं parikkhayā sattakkhattuparamo hoti, sattakkhattuparamaím deve ca manusse ca sandhāvitvā samisaritvā dukkhassantaì karoti."

## Translated:

"With the ending of three samiyojanā, an ekabījī will be reborn just one time in human existence (bhava), then make an end of suffering."
"With the ending of three samyojanā, a kolañkolo will be two or three bhava then make an end of suffering."
"With the ending of three samyojanā, a sattakkhattuparamo has most seven bhava among devas and humans and then make an end of suffering."

- The fact that they are all Sotāpannas becomes clear in \#10 below.
- It is also important to note that there is no mention in this sutta of the Sotāpanna Anugāmis. This sutta is about those who have "seen" Nibbāna. A Sotāpanna Anugāmi - in the language of Abhidhamma - has only transcended the "anāriya" level and made it to the "gotrabu" stage. In the future, they will attain the Sotāpanna stage when they get to the magga and phala citta. See the end of the post, "Citta Vithi - Processing of Sense Inputs," where magga phala citta vīthi is discussed.

## Summary in Puggalapañanatti

10. The above descriptions are confirmed by "WebLink: suttacentral: Ekakapuggalapaññatti" in Abhidhamma, where 54 types of persons are listed. We will mention just those categories that are of interest here.

- Katamo ca puggalo sammāsambuddho? Idhekacco puggalo pubbe ananussutesu dhammesu sāmaì saccāni abhisambujjhati; tattha ca sabbaññutaì pāpuṇāti, balesu ca vasībhāvaìm-ayaì vuccati puggalo "sammāsambuddho."
- Katamo ca puggalo paccekasambuddho? Idhekacco puggalo pubbe ananussutesu dhammesu sāmaì saccāni abhisambujjhati; na ca tattha sabbaññutaì pāpunāti, na ca balesu vasībhāvaínayaì vuccati puggalo "paccekasambuddho."

The rest belong to two categories: "Atṭha ariyapuggalā ariyā. Avasesā puggalā anariyā."

## Here are the 8 Noble Persons or ariyā (attha ariyapuggalā):

Tinṇaí sam̀yojanānamं pahānāya paṭipanno puggalo sotāpattiphalasacchikiriyāya paṭipanno (Sotāpanna Anugāmi). Yassa puggalassa tīni samyojanāni pahīnāni-ayaì vuccati puggalo "sotāpanno."

Kāmarāgabyāpādānaì tanubhāvāya patipanno puggalo sakadāgāmiphalasacchikiriyāya paṭipanno. Yassa puggalassa kāmarāgabyāpādā tanubhūt̄̄-ayamं vuccati puggalo "sakadāgāmī."

Kāmarāgabyāpādānaì anavasesappahānāya paṭipanno puggalo anāgāmiphalasacchikiriyāya patipanno. Yassa puggalassa kāmarāgabyāpādā anavasesā pahīnā-ayaỉ vuccati puggalo "anāgāmī."

Rūparāgaarūparāgamānauddhaccaavijjāya anavasesappahānāya pațipanno puggalo arahattaphalasacchikiriyāya paṭipanno. Yassa puggalassa rūparāgo arūparāgo māno uddhaccaì avijjā anavasesā pahīn̄̄-ayaì vuccati puggalo "arahā."

Sotāpanna Anugāmis fall into 2 categories:
Yassa puggalassa sotāpattiphalasacchikiriyāya patipannassa paññindriyaì adhimattaí hoti, paññāvāhim paññāpubbañgamaí ariyamaggaì bhāveti-ayaí vuccati puggalo "dhammānusārī."

Yassa puggalassa sotāpattiphalasacchikiriyāya paṭipannassa saddhindriyaì adhimattaì hoti, saddhāvāhim saddhāpubbañgamaì ariyamaggaì bhāveti-ayaì vuccati puggalo "saddhānusārī."

- Note that there is no time limit given for a dhammānusārī and a saddhānusārī.

Sotāpannas fall into 3 categories:

Idhekacco puggalo tiṇ̣am samyojanānaì parikkhayā sotāpanno hoti avinipātadhammo niyato sambodhiparāyano. So sattakkhattum deve ca mānuse ca sandhāvitvā samisaritvā dukkhassantaì karoti- ayaì vuccati puggalo "sattakkhattuparamo."

Idhekacco puggalo tị̣nam samyojanānam parikkhayā sotāpanno hoti avinipātadhammo niyato sambodhiparāyano. So dve vā tīni vā kulāni sandhāvitvā saìsaritvā dukkhassantaì karoti-ayaì vuccati puggalo "kolamkolo."

Idhekacco puggalo tiṇnaì sam̀yojanānaì parikkhayā sotāpanno hoti avinipātadhammo niyato sambodhiparāyano. So ekainyeva mānusakain bhavaì nibbattetvā dukkhassantaim karoti-ayaì vuccati puggalo "ekabījī."

- Here, a sattakkhattuparamo seems to have seven "births" (jāti) or "bhava" among the humans and devas. It is not clear whether it is seven $j \bar{a} t i$ or bhava.
- A kolamkolo seems to have two or three births (kula means born into a certain caste or clan); but it is possible that it could mean two or three bhava.
- An ekabījī has one bhava as a human.

Anāgāmis fall into five categories and they have essentially one existence after death as a human, either born in a Brahma realm or the gandhabba state; see \#7 above (I will just state the categories):
antarāparinibbāȳ̄, upahaccaparinibbāȳ̄, asañkhāraparinibbāȳ̄, sasañkhāraparinibbāȳ̄, uddhamisoto akaniṭ̣hagām̄̄.

Arahants fall into two categories they, of course, are not reborn (I will just state the categories):
ubhatobhāgavimutto, paññ̄āvimutto.

## Sotāpanna Anugāmi - At Least a Trace of Understanding of Tilakkhaṇa

11. "WebLink: suttacentral: Alagaddūpama Sutta (MN 22)" also provides similar information and provides another description of Sotāpanna Anugāmis. At the end of the sutta, it describes the types of Noble Persons as above, and at the very end states, "Evaì svākkhāte, bhikkhave, mayā dhamme uttāne vivate pakāsite chinnapilotike yesam mayi saddhāmattaim pemamattaí sabbe te saggaparāyanā"ti."

- Translated: "those who have even a trace of faith and liking for me (saddhāmattaí pemamattain; mattaì means a "trace"), are all headed for deva realms (saggaparāyanā)."
- When one has removed the ten types of micchā ditṭhi, and starts comprehending Tilakkhaṇa, one becomes a Sotāpanna Anugāmi. They are also released from the apāyā. See, "Sotāpanna Anugāmi No More Births in the Apāyā."

## Arahanthood - Not Annihilation But End of Suffering

12. There is also this important verse towards the end of the "WebLink: suttacentral: Alagaddūpama Sutta (MN 22)": "Yathā cāhaí na, bhikkhave, yathā cāhaiं na vadāmi, tathā mai̇ te bhonto samaṇabrāhmaṇā asatā tucchā musā abhūtena abbhācikkhanti: 'venayiko samaño gotamo, sato sattassa ucchedain vināsam vibhavain paññāpetīti. Pubbe cāhaim, bhikkhave, etarahi ca dukkhañceva paññāpemi, dukkhassa ca nirodhain."

- Translated: "..Bhikkhus, I have been baselessly, vainly, falsely, and wrongly misrepresented by some recluses and brahmins thus: 'The recluse Gotama leads people astray; he teaches the annihilation, the destruction, the extermination of an existing being.' ..Bhikkhus, both formerly and now what I teach is suffering and the cessation of suffering."
- Many people today have this wrong perception. It could arise until one gets at least to the Sotāpanna Anugāmi stage and starts removing Sakkāya Ditṭhi. It is the belief that there is an "existing person" that
can enjoy things the world has to offer. They do not realize that there is much more suffering in this world. Even though there are short-lived pleasures, there is unimaginable suffering especially in the rebirth process.
- It is only at the Arahant stage that the perception of a "me" (asmi māna) goes away; see, "Sakkāya Ditthi is Personality (Me) View?."

13. Different types of persons are listed in the "WebLink:suttacentral: Ekakapuggalapaññatti" of the "WebLink:suttacentral: Puggalapaññatti" in Abhidhamma.

### 7.3.2 Āsava, Anusaya, and Gati (Gathi)

Revised March 31, 2017; August 26, 2017; October 7, 2019; re-written on October 28, 2020; revised August 6, 2022

## $\bar{A} \boldsymbol{A} a v a$ Removal Is Nibbāna

1. Nibbāna is reached by "āsavakkhaya" or removing āsava (cravings). As we will see below, that involves removing anusaya (hidden defilements) by removing bad gati (character/habits.)

- We will tie up a series of posts that I have posted on gati and $\bar{a} s a v a$ with this post. See, "Habits and Goals, and Character (Gati)," "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsava)," "Samsāric Habits, Character (Gati), Cravings (Āsava)."
- Finding English translations for some of the Päli words that the Buddha used is difficult. But the key is to grasp what is meant by those terms. Once the idea sinks in, that is all that matters. One could even just use the Pāli term and KNOW what it means. It is like learning the meaning of the word "dollar" or "car." Different languages use the same words, but everybody understands what those words mean.

## $\overline{A s} a v a$ Come Up Due to Anusaya

2. Anusaya is usually translated as "latent tendencies" or "mental fermentations." Āsava is the cravings. The word "gati" is hardly mentioned in current texts but is a critical concept in Buddha Dhamma.

- Anusaya is indeed "mental fermentations" that lie deep down in us. That is comparable to mud sitting at the bottom of a glass of water.
- If that glass of water is disturbed with a straw, some of that mud comes to the surface. That is like āsava bubbling up when we are disturbed by a strong sensory event. We display our real character/habits or gati (gathi) when that happens.
- In other words, some gati and āsava lay hidden (sleeping) and are called "anusaya." With a strong enough "trigger," an ingrained anusaya can be brought to the surface. Anusaya are the hardest to get rid of.

## Pada Nirutti for Anusaya and Āsava

3. In both Pāli and Sinhala, "saya" means a storage place: "jalāsaya" means a water reservoir; "āmāsaya" means the stomach where the food we eat goes; "gabbāsaya" is the womb where the unborn baby is kept and nurtured until it is ready to come out, etc. [pada: [nt.] foot; foot-step; a word; position; place; reason; cause; a line of stanza; the final rest. nirutti : [f.] language; philology; explanation of words, grammatical analysis, etymological interpretation; pronunciation, dialect, way of speaking, expression.]

- "Saya" also means "sleeping" (as in "sayanaya" or चs๘bc in Sinhala). "Anu" indicates "food" or "defilements" in most cases. Therefore, "anusaya" means "sleeping" or "in storage" with some dominant characteristics.
- When they are disturbed by an ārammaṇa (a sensory input), they come to the surface as "āsava" or "cravings/likings." The word ārammaṇa is explained in detail in "Chachakka Sutta - Six Types of Vipāka Viññāna."
- As mentioned above, $\bar{a} s a v a$ are four main types. Within each class, there can be an infinite variety. For example, "kāmāsava" will include āsava for sense inputs coming through five physical senses with an endless variety.

## Anusaya Awakened By Triggers (ATrammana)

4. When such a trigger awakens an "anusaya," it is out as an "āsava," and one will display it through actions. Then, we also say one has that type of cravings or "gati." These triggers are ārammaṇa; See "Vipāka Vedanā and "Samphassa jā Vedanā" in a Sensory Event."

- For example, seeing a beautiful woman matching "his gati" could trigger kāmāsava in a calm person. He may get agitated upon seeing that woman. But he may not be "triggered" by seeing another woman, even if beautiful. That is a bit complex, but I am sure we all know this to be true.
- And if he keeps thinking about that woman, that anusaya will ferment and grow (condense). Thus the name "mental fermentations."
- How much one gets "agitated" depends on one's āsava and sensory input strength. Rapes, for example, occur when both are strong.

## An Analogy for Anusaya

5. Anusaya is like active gun powder in a matchstick. The matchstick is harmless by itself and will cause no fire. But the POTENTIAL to create a fire is there.

- When the matchstick strikes a rough surface, the heat generated causes the gun powder to ignite and create fire.
- Similarly, a robust sensory input can "awaken" and "fire up" the sleeping anusaya.
- One's gati becomes strong with repeated use, and one's āsava depends on both anusaya and gati.
- An Arahant has removed all types of anusaya, gati, and hence $\bar{a} s a v a$. No matter how strong a sensory input comes in, he/she will not be "triggered" by it. A matchstick with no active gun powder cannot catch fire, no matter how hard a march strikes.
- An Arahant may still have gati devoid of defilements. They are just habits without kammic consequences. For example, there is an account in the Tipitaka of a young Arahant who tended to jump over mud puddles.

## Seven Types of Anusaya

6. There are 7 types of anusaya: ditthannusaya (wrong views), vicikicchānusaya (tendency to do the unwise), kāmarāgaanusaya (temptation for sense pleasures), patigha anusaya (temptation for hatred), bhvarāganusaya (craving for existence), mānanusaya (sense of "me"), and avijjānusaya (ignorance); see, for example, "WebLink: suttacentral: Dutiva Anusaya Sutta (AN 7.12)."

- There are four broad categories of āsava: Ditṭhāsava, Kamāsava, Bhavāsava, and Avijjāsava; see, "WebLink: suttacentral: Āsava Sutta (AN 6.58)."

## Four Types of $\overline{A s} \boldsymbol{s} \boldsymbol{v a}$

7. $\bar{A} s a v a$ are four main types: diṭthāsava (ditthi āsava), kāmāsava (kāma āsava), bhavāsava (bhava $\bar{a} s a v a)$, and avijjāsava (avijjā āsava).

- Ditṭhāsava is the craving or attachment to wrong views. That is why sometimes it is hard to accept or even consider other viewpoints. Again, there are views on numerous topics: religion, philosophy, politics, and combinations thereof. Comprehension of anicca, dukkha, and anatta automatically leads to getting rid of ditṭhāsava.
- Kāmāsava induces a craving for indulging in sensory pleasures via the five physical senses. Within this broad category. Each person will have their cravings-some like music more than food, food more than reading, etc. The combinations are endless.
- Bhavāsava is craving for existence. No matter where in the 31 realms one is born, one always wants to live. Again there are many possibilities. Most prefer kāma loka with all five senses. Some who enjoy $j h a \overline{n i c}$ pleasures may prefer birth in an arūpa loka with just the mind, etc.
- Avijjāsava is the root cause for all āsavas: not knowing the real nature of this world, i.e., not comprehending anicca, dukkha, anatta, and thus not understanding the Four Noble Truths.

## Relationship Between $\overline{A s} a v a$ and Anusaya

8. The seven types of anusaya can give rise to four types of āsava.

- Dițthānusaya and vicikicchānusaya give rise to diṭthāsava.
- Kāmarāganusaya and patighanusaya lead to kāmāsava.
- Bhvarāganusaya gives rise to bhavāsava.
- Avijjānusaya and mānanusaya lead to avijjāsava.
- One cannot REMOVE the other three āsava until one removes diṭthāsava at the Sotāpanna stage.

## Kāmāsava Is Absent In Rūpa and Arūpa Loka

9. What type of āsava "can be triggered to come up" depends on the bhava one is in.

- In kāma loka, all āsava are "in play," i.e., can be triggered by a sense event.
- In rūpa or arūpa Brahma loka, kāmāsava remain dormant since there are no enticing ārammaṇa in Brahma realms. But unless one is an Anāgāmi, one still has kāmāsava, and that will "come into play" when one is reborn in kāma loka.
- Thus, one will not have kāma anusaya bubbling up when in rūpa or arūpa realms. Therefore, one will also not display any "kāma gati" that one has while in rūpa/arūpa realms.

## Human Bhava - Ability to Remove All Anusaya

10. As a given sentient being traverses the "saimsāra" or the "rebirth process," one makes transitions from "bhava to bhava," but within a given human (or animal) bhava, one may be born numerous times as a human (or the same animal); see, "Bhava and Jāti - States of Existence and Births Therein."

- Through all these, the physical appearance will change drastically, especially when bhava is changed. Thus, it transitions from being a deva to a human or a human to a dog. There is no resemblance to a continued "soul."
- However, our anusaya remains with us through the samisāric journey. Of course, anusaya can change during a given bhava. Most changes in anusaya occur during human bhava. A human can even remove all anusaya and attain Nibbāna.

11. That is another reason why the Buddha rejected both "self" and "no-self." What character or quality is displayed in a given bhava could be very different from another bhava. On the other hand, an ever-changing set of anusaya remains with a given lifestream.

- I call a lifestream a "dynamic self": "What Reincarnates? - Concept of a Lifestream."
- Now let us examine the roots of the words anusaya and $\bar{a} s a v a$ (āsaya); "āsava" is a synonym for "āsaya."

## Removal of Āsava and Anusaya

12. These seven types of anusaya and four āsavas go away step-by-step as one goes through the four stages of Nibbāna.

- A Sotāpanna has removed Dițthāsava. Kamāsava is lessened at the Sakadāgāmi stage and removed at the Anāgāmi stage. The other two reduce at each stage also and go away only at the Arahant stage.
- When anusaya and gati go away, then, of course, āsava disappears without a trace. One will not crave anything. One is then unperturbed by anything. That is the ultimate state of "cooling" or Nibbāna.

## Gati (Character/Habits) Related to Āsava and Anusaya

13. Gati denotes a mixture of one's character and habits. Of course, one's character depends on one's gati and vice versa.

- It should be evident that our character (gati) is related to anusaya and āsava.
- All three, āsava, anusaya, and gati, reinforce each other. One has a particular type of character because of the set of āsava and anusaya he/she has. On the other hand, none of the three will change unless one's character and habits change. That change is WILLFUL.
- And there is the fourth parameter of habits (called "gathi purudu" in Sinhala), which lies at the very bottom of the hierarchy. Some people talk rough, even when they are not mad. It is just a habit.
- Getting rid of bad habits and cultivating good habits is the first step in controlling one's āsava (temptations) and eventually getting rid of anusaya.
- "Immoral gati" due to anusaya makes the akusala-mūla Pațicca Samuppāda take place and creates "bhava" for the sansāric process. These "immoral gati" are the "san gati" in "tinṇam sañgati phasso"; see, "Tanhā - How We Attach Via Greed, Hate, and Ignorance."

## Removal of Bad Gati and Cultivating Good Gati

14. There are two critical aspects in dealing with changing one's habits:

- One needs to be mindful of bad habits' negative and positive consequences of good practices. That is Satipaṭthāna.
- And, one needs to avoid bad habits WILLFULLY and WILLFULLY engage in ethical and moral practices. That is $\bar{A} n \bar{a} p a \overline{n a}$.
- One would engage in all those activities in Satipatthāna/Ānāpāna.
- One can use the "search" box on the top right to find relevant posts on Satipaṭthāna and Ānāpāna. A practical, systematic way to do both is discussed in the "Living Dhamma" section.

15. That is the path advocated by the Buddha. One could proceed a little on the Path and achieve a "sense of peace." One could go further to make the future lives better, or one could go all the way and remove all four āsava, thus attaining the Arahantship.

- That is why "āsavakkhaya ñāna" or the "way to remove $\bar{a} s a v a "$ is the critical knowledge that the Buddha developed on attaining Buddhahood. And that knowledge is in the Four Noble Truths, and the way to achieve "āsavakkhaya" is the Noble Eightfold Path.

## Bigger Picture

16. We are fortunate to live in a time when science provides further evidence and ways to understand this process. There is a series of posts in the 'Dhamma and Science" section starting with, "Truine Brain - How the Mind Rewires the Brain via Meditation/Habits" and in the "Meditation" section starting with "Key to ānāpānasati - How to Change Habits and Character (Gati)."

- Finally, where are these anusaya in "storage"? They are in the kamma bhava, the nāma loka or the "immaterial world."
- We have two "worlds": one is the rūpa loka that we access with our five physical senses. The other is the above-mentioned nāma loka.
- The nāma loka has our memories or nāma gotta and anusaya related to kamma bija. This "immaterial world" is accessed with the mana indriya. Details at "Our Two Worlds - Rūpa Loka and Nāma Loka" and "What are Dhamma? - A Deeper Analysis."

### 7.3.3 The Way to Nibbāna - Removal of Āsavā

Revised November 19, 2018; February 11, 2020; August 7, 2022; October 14, 2022 (\#10)

## Introduction

1. The night the Buddha attained the Buddhahood, three unique pieces of knowledge (tivijj $\bar{a}$ ) arose in him, namely:

- The unique vision with which he was able to recollect innumerable former human existences (pubbenivāsānussati ñāna.)
- The ability to see beings passing away and reborn according to their kamma (cutupapāda ñāna.)
- The unique vision to see how to eliminate all kilesa (āsava) or defilements (āsavakkhaya ñāna.)

## Asavakkhaya Nāṇa

2. With the attainment of the $\bar{a} s a v a k k h a y a ~ n ̃ a ̄ n a$, ascetic Siddhartha became Buddha Gotama. That was the final step in purifying the mind. That was the fruit of all his efforts, the Path to attaining Nibbāna for any being. Āsavakkhaya ( $\bar{a} s a v a+k h a y a ~=~ c u t t i n g ~ o f f ~ a l l ~ t h e ~ \overline{a s a v a ~} \bar{a}$ or mental fermentations). Thus
 generate any defilement.
 association with." Thus those habits ("gati") that one keeps associating with come even closer. As one continues and feeds those habits through successive rebirths, they become āsavā. See, "Āsava, Anusaya, and Gati (Gathi)."

- Āsava (in Pāli, Sinhala, and Sanskrit) also means a distillation to get an extract or essence. Some medicinal concoctions are fermented by keeping a mixture of ingredients underground for many months.
- We have cultivated (or fermented) some habits ("gati") over innumerable lives, and that is why they are hard to remove. Only through learning pure Dhamma and persistence in one's efforts can one break such bad habits and thus eventually remove $\bar{a} s a v a$. There are four types of $\bar{a} s a v a$, each is associated with a corresponding bad habit.

## Connection to Paṭicca Samuppāda

3. The doctrine of Paticca Samuppāda, which has twelve factors, namely, avijjā, sañkhāra, viñ̃̄āna, nāmarūpa, saḷāyatana, phassa, vedanā, taṇhā, upādāna, bhava, jāti, jarā-maraṇa became clear to him.

- Going over this Doctrine of Paticca Samuppāda in forward and reverse order repeatedly, he attained the Eightfold Noble Path, Ariya Magga, which is also known as Yathābhūta Ñānadassana.

4. Pațicca Samuppāda clarifies how ignorant beings accumulate defilements (and $\bar{a} s a v \bar{a}$ ), and get trapped in the round of rebirths (saysāra.) Those $\bar{a} s a v \bar{a}$ are generated and fermented via repeated use of bad habits ("gati").

- The Noble Eightfold Path is the way to remove those "gati" (and thus āsava) from a mind.

## Four Stages of Nibbāna Related to the Four $\bar{A} s a v \bar{a}$

5. We all have four significant types of $\bar{a} s a v \bar{a}$, even though there are uncountable minor varieties:

- Diṭthāsava (diṭthi āsava) is the category that is due to all kinds of false beliefs (micchā dittthi): for example, if someone does not believe in rebirth, there may be cravings such as "I need to enjoy life to the fullest before I die."
- Kāmāsava (kāma āsava) is associated with craving sensory pleasures.
- Bhavāsava (bhava āsava) is the craving for a particular kind of existence, say as a human, deva, or Brahma. Any living being, in any realm, craves for life to live.
- Avijjāsava (avijjāāsava) is all cravings that arise due to ignorance. That is the ignorance of the Noble Truth of Suffering (which is NOT merely suffering itself) and the other Noble Truths.

6. The four types of $\bar{a} s a v \bar{a}$ go away step-by-step as one proceeds on the Path. One can reduce them even before the Sotāpanna stage, but those reductions may not hold in future lives.

- When one attains the Sotāpanna stage, all four types of āsavā that could trigger "apāyagāmi" actions go away from one's mind, i.e., one will never be reborn in the four lowest realms. Ditṭhāsava (those due to wrong views) disappear entirely.
- At the Sakadāgāmi stage, kāmāsava and bhavāsava reduce, and a Sakadāgāmi will be born only as a deva or above in future lives; avijjāsava also reduces.
- Kāmāsava completely goes away at the Anāgāmi stage. Thus one will never be reborn in the kāma loka (including the deva realm) again. Bhavāsava and avijjāsava also reduce.
- Bhavāsava and avijjāsava disappear without a trace at the Arahant stage. Thus āsavakkhaya becomes complete.

Removal of $\bar{a} s a v a \bar{a}$ starts with the removal of bad habits and cultivating good habits; see "Habits and Goals," "The Law of Attraction, Habits, Character (Gati), and Cravings (Āsavas)," and "Sansāric Habits and Āsavas."

## Is there a Connection Between Nibbāna and Kamma?

7. Many incorrectly believe that "one needs to deplete all kamma vipāka" to attain Nibbāna. First, kamma vipāka are the results of previous actions (either in this life or in previous lives.) Those are kammic energies created and wear away (slowly) only with time. Thus, even an Arahant would still have all such kamma vipāka waiting to bear fruit.

- None of such kamma vipāka can bring rebirth to an Arahant, as explained in \#10 below.
- However, they can bring vipāka to any physical body until its death. Even the Buddha experienced back pains and was injured by Devadatta. There were eleven such kamma vipāka that he experienced. Those were unavoidably strong kamma for insulting a Buddha in a previous life.

## Reducing Bad Kamma Vipāka

8. Mettā Bhāvanā can remove some of the kammic power associated with the previous kamma. However, some kamma bīja or kamma seeds (both good and bad) due to the past kamma may still be there at the time of the attainment of Nibbāna. See " 5 . Ariya Metta Bhāvana (Loving Kindness Meditation)."

- To get rid of a kamma seed associated with a given kamma, the other party related to that kamma seed needs to be able to receive the merits of Metta Bhāvana . That person must have a state of mind with alobha, adosa, and amoha. But some of those beings may be trapped in the niraya for long times and may not even have a moment of "relief" to receive such merits. That concept is discussed in "Transfer of Merits (Pattidana) - How Does it Happen?."

## "Everything Happens Due to Kamma" is a Misconception

9. "Everything happens due to kamma" is a misconception. That is a Vedic concept, and is not in Buddha Dhamma; see, "Sañkhāra, Kamma, Kamma Bīja, Kamma Vipāka."

- We can reduce many previous kamma from bringing their fruits (vipāka) by acting with mindfulness/foresight. Kammic energies cannot bring their vipāka if suitable conditions are not there. For details: "Anantara and Samanantara Paccayā."
- For example, an apple seed has the potential to give rise to an apple tree. However, it will not germinate until we plant it in fertile soil and provide water and sunlight. In the same way, a kamma seed (good or bad) can lay dormant for a long time until conditions become suitable for it to germinate.
- Thus, if we act with mindfulness (not to set up conditions for possible bad kamma vipāka to bear fruit,) we can avoid many kamma vipāka. For example, going to a bad neighborhood at night could have bad consequences because a bad neighborhood is a fertile ground for bad vipāka to bear fruit.

## How an Arahant Avoids Rebirth?

10. What happens is the following. Since an Arahant has removed all $\bar{a} s a v \bar{a}$, the "vedana paccaya $\bar{a} \tanh \bar{a} \vec{a}$ " step in Paticca samuppāda will not take place. Thus, the akusala-mūla Pațicca samuppāda will NOT operate for an Arahant. Furthermore, since there are no akusala to get rid of, kusala-mūla Paṭicca Samuppāda will also not operate.

- When an Arahant dies, there is no "bhava" grasped by the mind. Therefore there is no " $j \bar{a} t i$ " or birth.
- Thus an Arahant could have many unspent kamma bïja (both good and bad) left, but his/her mind has lost the craving (āsava) to grasp any of them.

Next, "Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?",

## Kaṇha (Dark) and Sukka (Bright) Kamma and Kammakkhaya

June 11, 2018; revised January 21, 2019; July 26, 2020; August 27, 2022

## Kaṇha/Sukka Kamma Same as Pāpa/Puñña Kamma

1. Kaṇha (dark), sukka (bright), and kammakkhayāya kamma are important terms discussed briefly in the Kukkuravatika sutta (in the niddesa version). In this post, we will clarify these terms before discussing that sutta in the second post published today, "Kukkuravatika Sutta (Majihima Nikāya 57) Kammakkhaya." June 19, 2018: Siebe has sent me more suttā from Ańguttara Nikāya that discusses these terms: AN 4.232- AN 4.238. Thanks, Siebe!

- Kanha and sukka kamma are nothing but pāpa and puñña kamma discussed in the post, "Kilesa Relationship To Akusala, Kusala, And Puñña Kamma."
- Kaṇha means "dark" and refers to pāpa (or bad) kamma; sukka means "bright" or "white" and refers to puñña (or good) kamma. The King of Gods is named "Sakka" because he is engaged in sukka (puñña) kamma.
- Both are different from kusala kamma. Intention plays a significant role here; see, "Kamma, Sañkhāra, and Abhisañkhāra - What Is "Intention"?"
- This post is critical for understanding the concept of Nibbāna, so I am posting it in the "Seeking Nibbāna" subsection.

## Kammakkhayāya Kamma Same as Kusala Kamma

2. The term kammakkhayāya kamma means the same as kusala kamma.

- Kammakkhayāya kamma means "kamma that will lead to nullify or overcome the effects of existing kamma vipāka." It is important to note that we cannot take the literal meaning of "kammakkhaya" as "removing kammalkamma vipāka."
- Note the difference between the words kammakkhayāya and kammakkhaya.
- The Kammakkhaya stage is reached by purifying one's mind by doing "Kammakkhayāya kamma," or kamma that leads to kammakkhaya. These are the same as kusala kamma.

## Kammakkhaya Means Cultivating Paññā

3. With a kamma done, its energy will be there for a long time until naturally worn out. But one can REMOVE the CONDITIONS under which that kamma can bring its vipäka. That is what is meant by "kammakkhaya."

- For example, Añgulimāla killed 999 people. Those actions created kamma bīja (energies that could bring appropriate vipāka), and some of those energies may still be out there.
- However, within a couple of weeks of meeting the Buddha, Angulimāla attained Arahanthood. At that point, Ven. Angulimala's mind became pure and would not EVER make suitable conditions for such kamma bïja to be "germinated."
- Just like seeds kept in a cool, dry place for millions of years will eventually become "duds" (will no longer germinate), Angulimala's kamma bïja will one day become real duds.
- Even though Ven. Angulimala's kamma bïja were potent (active) when he died, they could not be "germinated in his mind" at his death (i.e., at the cuti-patisandhi moment). Therefore, they had become "effectively duds." That is what is meant by "kammakkhaya."

## Without Upādāna Kamma Bīja Cannot Bring a New Bhava

4. One's mind is where various kamma bīja germinate. It is fair to say that ANY average human will have many kamma bīja suitable to bring rebirth in the apāy $\bar{a}$ from previous lives, if not from this life. But just having such kamma vipāka does not necessarily mean they will bring vipäka.

- The key here is that a purified mind (like Ven. Angulimala's) will not grasp (upādāna) bad kamma vipāka. Of course, his physical body endured kamma vipāka until death.

Let me take a different analogy to see why a purified mind will not grasp kamma būja. Visualize the mind being a ball with a hook attached to it. The size of the hook is proportional to how corrupt or defiled the mind is.
And we can think about kamma bīja as rings of various sizes: rings of a wide variety of sizes ranging from very tiny to large (representing small to large kamma bīja that can bring kamma $v i p a ̄ k a)$.

- We will keep returning to this analogy in the future, so please ensure it is understood. That will make it easier to comprehend many other concepts like āsava, anusaya, and gati.

## Upādāna is Like a Hook

5. Imagine a highly defiled mind (i.e., with a large hook attached to it.) Also, imagine an area with many kamma bīja of various magnitudes (many rings of different sizes).

- The hook is likely to pick up a ring of similar size: it cannot pick up small rings, and it cannot pick up too large rings.
- In the same way, a highly-defiled mind will pick up a large kamma bïja, and a less-defiled mind will pick up only a smaller kamma bïja.
- That is the same as saying that one's mind will grasp a bhava (kamma bī̀ja) that matches one's gati. One who has killed other humans will grasp a bhava in the hell (niraya) corresponding to a "large ring." It will not grasp a bhava in the human or deva realms, which would be too small to be entangled in the large hook (highly defiled mind).
- That is also what is meant by "changing CONDITIONS in one's mind, in \#3 above. A fully-purified mind will have no "mental hooks"; that mind's conditions have changed.

6. What happens when one follows the Noble Path of the Buddha is that one's "mental hook" will get smaller in size, in this analogy. That means growing pañña.

- One does this by doing kusala kamma. Kusala means removing defilements from one's mind ("ku" + "sala," where " $k u$ " is defilements and "sala" means "removal").
- A kusala kamma does not directly affect the existing bad or good kamma bïja. A kusala kamma only purifies the mind, and in the present analogy, "wear out (or shrink) the mental hook" can grasp various good and bad kamma bïja rings.
- Therefore, kammakkhaya means shrinking of the mental hook in this analogy.
- By the way, the biggest akusala kamma is micchā ditt

## Reduction of Upädāna

7. Even before reaching the Sotāpanna Anugāmi stage, one's mental hook may keep decreasing size, but not that significantly. Of course, the kamma bïja or rings will remain almost the same.

- When one attains the Sotāpanna stage, the mental hook will become drastically smaller in one thoughtmoment (at the Sotāpanna phala moment), just by comprehending the unfruitful and dangerous nature of this world, in particular the dangers in the $a p \bar{a} y \bar{a}$.
- One's avijja will drop by orders of magnitude. That is a difficult point to understand for many. But that can be experienced. One may not realize it at that time, but one can see the change within days or weeks by comparing one's change in behavior.
- The mind of a Sotāpanna will no longer be able to catch large rings corresponding to potent kamma $b \bar{j} a$ that can give rebirth in the $a p \bar{a} y \bar{a}$.
- One becomes a Sotāpanna by removing the second layer of micchā dittthi via comprehension of Tilakkhaṇa.

8. As one goes through the Sakad $\bar{a} g \bar{a} m \bar{u}$, and $A n a \bar{a} \bar{a} m \bar{u} \bar{~}$ stages, the mental hook will shrink in size. At the Arahant phala stage, the hook will disappear with avijija wholly removed, and pañ $\tilde{a} \bar{a}$ (wisdom) peaked.

- So, you can see that "kammakkhaya" does not mean getting rid of kamma bīja. One is just reducing one's āsava (or gati); thus one's mind will not grasp "bad bhava" corresponding to large kamma bïja.
- In the case of Ven. Angulimāla, all his rings (including those large ones for killing people), were there at the time of his death. It is just that his mind got purified, and the "mental hook" disappeared. His mind could not grasp any bhava in the 31 realms at his death.
- Therefore, wearing the "mental hook" is the same as reducing āsava and anusaya and getting rid of gati. As one keeps doing that, at one point, the "mental hook" will disappear (and lead to āsavakkhaya or Arahanthood).

## Kusala Kammā Do Not Remove Existing Kamma Bīja

9. Khammakkhayāya kamma (or kamma that lead to kammakkhaya) or kusala kamma do not directly remove existing kamma bij$a$. They lead to a state of mind where existing kamma bija are UNABLE to bring vipāka. That is a VERY IMPORTANT point to understand. Please come back and read this post as many times as needed to comprehend this point (and ask questions at the discussion forum).

- This is based on "Anantara and Samanantara Paccaya."
- As one keeps doing kusala kamma, one's wisdom (pañ̃̃̄ $\bar{a}$ ) will grow and become increasingly capable of comprehending the true nature of this world (the unsatisfactory nature) or Tilakkhana. That will lead to kammakkhaya in four stages of Nibbāna.
- Kammakkhaya via kusala kamma will lead to the shrinking of the "mental hook" ( $\bar{a}$ sava/anusaya/gati) and therefore more and more kamma büja (rings in our analogy) will become "effectively duds"; see \#4 and \#5 above.
- In terms of our analogy, the following happens. Even though all the "rings" are still there, more and more of them will not get "entangled" in the shrinking "hook."

10. Therefore, kammakkhaya happens at various levels.

- Those that can bring rebirths in the apāyā become "effectively duds" at the Sotāpanna stage. At this stage, one's mind has clearly understood the dangers of akusala kamma that can lead to rebirth in the apāyā. It is a "drastic change in one's mindset," a different "world view."
- Those that can bring rebirths in the human realm become "effectively duds" at the Sakadāgāmī stage. One would not doubt that "owning stuff that gives sense pleasures" is unnecessary and dangerous.
- Those that can bring rebirths anywhere in kāma loka become "effectively duds" at the Anāgāmī stage. Now, one knows "deep inside" that sense pleasures ARE dangerous.
- Those that can bring rebirths anywhere in 31 realms become "effectively duds" at the Arahant stage.

## Puñña and Pāpa Kamma

11. Now, let us look at the meanings of puñ̃a and pāpa kamma. To clarify what puñña (sukka) kamma and pāpa (kaṇha) kamma are, we need to understand how births in various realms arise.

- There are six roots causes that give rise to bhava (and therefore $j \bar{a} t i$ ) in the 31 realms: lobha (greed), dosa (hate), moha (ignorance), and alobha (non-greed), adosa (non-hate), amoha (without ignorance).

It is important to note that amoha does not mean pañ $\tilde{n} \bar{a}$ (wisdom); it just means one is acting without being foolish or morally blind.

- When one acts with any combination of the three "bad roots" (lobha, dosa, moha), one is doing pāpa kamma. They are also called kanha ("dark") kamma. Only asobhana cetasika (bad or dark mental factors) can arise in these thoughts. They are also akusala kamma. These lead to births in the apāyā (dugati).
- When one acts with any combination of the three "good roots" (alobha, adosa, amoha), one is doing puñ̃a kamma. They are also called sukka ("bright") kamma. Only sobhana cetasika (good or bright mental factors) can arise in these thoughts. These lead to births in the "good realms (sugati) until one attains Arahanthood.
- A purified mind of an Arahant would have maximized sobhana cetasika, including pañña (wisdom). Then one would not grasp any bhava at the cuti-patisandhi moment, since one has fully comprehended the futility of any existence in the 31 realms.

12. Now, puñ̃̃a (sukka) kamma generate "good kamma bïja" that can give rise to rebirths in the good realms (at and above the human realm). They also can bring "good vipāka" during a lifetime.

- Pāpa (kaṇha) kamma generate "bad kamma bïja" that can give rise to rebirths in the bad realms (those below the human realm, i.e., apāy $\bar{a}$ ). They also can bring "bad vipāka" during a lifetime.
- As we discussed in the post, "Kilesa - Relationship To Akusala, Kusala, And Puñña Kamma," there are also kamma (or actions) that lead to both pāpa (kaṇha) and puñña (sukka) kamma bïja. The Buddha called them "kanhasukka" kamma and their vipāka "kanhasukka vipāka" in the Kukkuravatika sutta. Such "kanhasukka vipāka" give rise to both good and bad vipāka in some realms (human, deva, and vinipata realms), see, "Kukkuravatika Sutta (Majihima Nikāya 57) - Kammakkhaya."
- An example is when one prevents a snake from catching a frog. One is doing a puñ̃̃a kamma by saving a frog's life, but one is also doing a pāpa kamma by preventing the snake from its meal.

## Kusala/Puñña Kamma Not Possible in $A p \bar{a} y \bar{a}$

13. Another critical point to understand is that one will not be able to do any kusala kamma and wear out the "mental hook" when is born in the apāyā (beings in the four realms of the ap $\bar{a} y \bar{a}$ are incapable of doing kusala kamma and are hardly capable of doing puñña kamma too).

- This is why it is important to do puñna kamma and stay away from pāpa kamma. This is critically important to be born in a good realm and to work towards Nibbāna.
- It is important to contemplate and understand this. Even though puñña (sukka) kamma leads to rebirth, that will be in a "good realm" where one can work towards Nibbāna, i.e., do kusala kamma and wear out the "mental hook."
- Furthermore, puñ̃̃a kamma sets the necessary background (āyu, vaṇna, sukha, bala, paññā; see, "Two Versions of 37 Factors of Enlightenment"). Not all in the human realm have those: if one is born extremely poor, unhealthy, etc., one will not have the right mindset to comprehend Dhamma.

14. The above explanation is a condensed (niddesa) version of the Kukkuravatika Sutta (MN 57). A patiniddesa or a detailed analysis is realized by this post AND the accompanying post, "Kukkuravatika Sutta (Majjhima Nikāya 57) - Kammakkhaya."

- For an explanation of niddesa and patiniddesa, see "Sutta Interpretation - Uddesa, Niddesa, Patiniddesa."

### 7.3.5 Dasa Samyojana - Bonds in Rebirth Process

August 6, 2017; revised February 14, 2018; February 10, 2020; May 24, 2022; August 7, 2022

## Samyojana Are Bonds in The Rebirth Process

1. Samyojana (or sayyojana) is translated into English as "fetters," which is not bad. Even though "fetter" is not commonly used, it means "a chain used to restrain or bind someone."

- Dasa samiyojana are the ten "chains" or "bonds" that bind one to the rebirth process (with samsāric bonds.)
- For example, as long as the first three samyojana are there, the possibility of rebirths in the four lowest realms (apāyās) will be there.

2. Samiyojana comes from the three roots ("san," "yo," and "ja" respectively, meaning "defilements," "bind," and "birth"). It can be pronounced either as "sanyojana" or, as is the common practice with many words involving "san," as "samiyojana."

- Therefore, samyojana means "bonds that bind one to "san" and thus keep one in the rebirth process; see, "What is "San"? Meaning of Sansāra (or Samsāra)."
- When one systematically breaks these bonds - in four stages - one makes irreversible progress to Nibbāna (release from all suffering).
- For an explanation of many words with the root "san," see "List of "San" Words and Other Pāli Roots."

## Root Cause Is Craving

3. The "WebLink: suttacentral: Samyojana Sutta (SN 41.1)" clearly states that there is "san" or "craving (chanda rāga)" MUST be involved in samyojana: "Evameva kho, bhante, na cakkhu rūpānaì saìyojanaì, na rūpā cakkhussa saìyojanaì; yañca tattha tadubhayaì paṭicca uppajjati chandarāgo taì tattha samiyojanaì..."

Translated: "samiyojana arise not due to eyes just seeing objects ( $r \bar{u} p a$ ), but due to craving that arises due to that seeing..."

## Cravings Are Uncontrollable Due to Wrong Views

4. Many people do not realize that there is an essential step BEFORE one can start tackling dasa samyojana. This step is necessary to enter the Noble Path and break those bonds to the rebirth process. That is to get rid of the ten types of micchā ditthi (wrong views) about the world that we live in. See, "Micchā Ditthi, gandhabba, and Sotāpanna Stage."

- This essential pre-requisite or the pre-condition to "enter the Noble Path" was explicitly discussed by the Buddha in the "Mahā Cattārisaka Sutta (Discourse on the Great Forty)."
- The reason is that unless one believes in the laws of kamma and the rebirth process, there is no way one can start working towards Nibbāna (to be released from the suffering-filled rebirth process).
- Striving to attain Nibbāna without belief in the rebirth process is useless. By definition, Nibbāna is the release from the rebirth process. Most people confuse Nibbāna with temporary relief from "day-today stresses of life."
- There are different ways to understand Nibbāna; see "Nibbāna."

## Need to Have a "Wider World View"

5. Buddha Dhamma is different from any other religion or philosophy. One first needs to understand the message of the Buddha before one can start on the Path prescribed by him. Many people waste time blindly pursuing things that have nothing to do with the Noble Path to Nibbāna.

- To understand the key message of the Buddha, one needs to realize that our world is much more complicated than seen by our eyes. One needs to 'see' with wisdom. This wisdom or "pañ̃̄$\vec{a}$ " can be cultivated only in steps, with an increasingly pure mind. Which means less greed, hate, and ignorance of the true nature of this world.
- In the early stage, when one is trying to get rid of the ten types of micchā dittthi, one may need to stay away from dasa akusala with determination. That may involve even going to the extent of sticking to a set of rituals (saying I WILL NOT break the five precepts).
- However, by abstaining from immoral actions and speech (pāpa kamma), one should be able to get rid of the ten types of micch $\bar{a}$ ditṭhi. Those are the "big eight" in " 3 . The Second Level - Key to Purify the Mind" in the Meditation section.
- At that stage, one's mind is clear enough (i.e., paññ̄a has grown enough) to start grasping the Tilakkhaṇa (anicca, dukkha, anatta). Of course, it is necessary to understand the correct interpretations: "Anicca, Dukkha, Anatta."

## Sammā Ditṭhi Comes First

6. The first step in the Noble Eightfold Path is "Sammā Ditṭhi," which is not "something to be done." It is a vision or a "new way of looking at how our world works."

- This new way of looking at the world is through the world view that emerges from what is embedded in anicca, dukkha, anatta. That is how one breaks the first three samyojana of sakkāya ditṭhi, vicikicch $\bar{a}$, and sīlabbata parāmāsa.

7. One has to break those bonds in one's mind. One gains sammā ditthi - the correct view to becoming free of 'san' - by comprehending the true nature of this world of 31 realms.

Anicca - nothing in this world can bring permanent happiness in the long run.
Dukkha - despite our struggles, we will be subjected to much more suffering than pleasures if we remain in rebirth.

Anatta - therefore, one is truly helpless in this struggle to attain "something of the essence in this world." That is just an illusion.

## Our Tendency to Value Worthless Worldly Things

8. When one values a particular object, one can spend an extraordinary effort to get it. An average human has many things in this world (a beautiful/handsome partner, lovely house, nice car, etc.) that are very valuable.

- Many people are willing to commit murder, robbery, lying, cheating, etc. Then they get into trouble in two ways: If society catches them, they will pay consequences like going to jail. Even if they manage to avoid "getting caught," there is no way to prevent kamma vipāka, i.e., those actions will bring much harsher punishments in this life or future lives.
- By comprehending the ten types of micchā ditthi, one will be able to see that one will have to pay for immoral actions without exception and that depending on the severity of the activities, one may suffer for millions of years in the four lower realms (apāy $\bar{a}$ ). This first step of getting rid of the ten types of micch $\bar{a}$ ditthi will be quite beneficial in preventing one from getting into trouble.

9. However, grasping the Tilakkhaña will eliminate an even more potent type of wrong vision or micch $\bar{a}$ ditthi about this world, i.e., that there is NOTHING in this world that will bring a level of permanent happiness.

- When one first starts comprehending anicca and realizes a glimpse of this truth, one may still not be reasonably certain of the truth of that. But one will be compelled to believe that "it is not WORTH to commit strong bad kamma that COULD lead to rebirth in the ap $\bar{a} y \bar{a}$ (intense greed and strong hate).
- At this beginning stage on the Noble Path, one could see the dangers of being born in the apa $\bar{a} y \bar{a}$, and one's mind will AUTOMATICALLY start rejecting such actions. That does not happen by sheer willpower. The mind needs to see that with wisdom. In the Abhidhamma language, the "votthapana citt $\bar{a} "$ in a citta vith $h$ will make that decision within a billionth of a second.

## Sotāpanna stage Realized With That "Correct Vision"

10. So, it is essential to understand that getting rid of the first three samyojana involves nothing else but comprehending the anicca nature.

- In other words, at this stage, one will lose a significant fraction of HOW MUCH VALUE one will place on ANY MATERIAL THING in this world. For example, there is NOTHING in this world that is worth killing another human being via pre-planning with hate in mind.
- At this stage, one is a Sotāpanna Anugāmi, and one will get to the Sotāpanna stage without a doubt. One has become one of the eight types of Nobles (Ariyā); see "Sotāpanna Magga Anugāmi and a Sotāpanna."

11. Therefore, getting a release from rebirth in the $a p \bar{a} y \bar{a}$ depends on grasping the dangers of specific highlyimmoral actions that are not worth doing because NOTHING in this world can be that valuable. Put another way, nothing in this world is worth taking the risk of paying back with a rebirth in the ap $\bar{a} y \bar{a}$.

- The Buddha characterized dukkha as "dukkham bhayatthena," i.e., "dukha is another name for danger." We should be afraid of committing new kammā leading to future suffering. Any suffering that one feels now is due to past $\mathrm{kamm} \bar{a}$.
- We have control over the CAUSES that lead to future suffering. Those are the immoral kamma $\bar{a}$ we do seeking sensory pleasures.
- We can stop future suffering by comprehending how different types of kammā (i.e., abhisañkhāra) lead to births in various realms. That means comprehending Paṭicca Samuppāda.

## Removal of Kāma Rāga Comes At Higher Stages of Nibbāna

12. The next step towards Nibbāna involves getting rid of two more bonds or samyojana, i.e., kāma rāga and patigha. That is done in the Sakadāgāmī stage and the $A n \bar{a} g \bar{a} m \bar{\imath}$ stage.

- In a way, these two bonds are harder to break because all through this beginning-less rebirth process, we have spent probably $99 \%$ of the time in the kāma loka. We are so attached to sense pleasures (kāma rāga) that it is almost impossible for an average human to grasp the anicca nature in kāma loka.
- As we discussed above, it is easier to see the adverse consequences of highly-immoral actions that could lead to rebirth in the $a p \bar{a} y \bar{a}$. And it is also easier to see the dangers of birth in the $a p \bar{a} y \bar{a}$ (the Buddha has described such unimaginable suffering in many suttā; see, for example, "WebLink: suttacentral: Devaduta Sutta (Majjhima Nikāya 130)."

## Apāyagāmī Deeds Are Done With Wrong Views

13. It is harder for an average human to see that things we value highly are not only worthless but dangerous.

That is because they can lead to future suffering via kamma vipāka.

- Most "moral people" believe that if one lives a moral life without harming others, then one will not be subjected to suffering in the future. Even if one had comprehended Tilakkhana to a level of a Sotāpanna, that could still be the impression.
- That is why Buddha's foremost female lay disciple Visākā attained the Sotāpanna stage at age seven and went on to marry and have 22 children. If Visāka had understood the consequences of kāma rāga, she would not have done that.

## My Experience

14. Therefore, getting rid of the samiyojana of kāma rāga (attachment to sensual pleasures) is much more challenging. That is why it took me over three years to START comprehending the worthlessness of sense pleasures AND the dangers of being attracted to sense desires.

- Even though I knew the criteria for one to become an $A n \bar{a} g \bar{a} m \bar{l}$, I did not realize that I would have to "see the dangers" in staying in the kāma loka, to strive for it.
- I had written about the importance of removing kāma rāga in the following section: "Assāda, Ādinnava, Nissarana - Introduction." Those posts were written before October 2015 and have been since revised.

15. I had known the "theory" part of it. But I had not cultivated my pañña or wisdom enough to see the possible dangers of sense pleasures!

- It needed a trigger for my mind to finally realize the "worthlessness" and "dangers" of REMAINING in the kāma loka. I will write more about how it got triggered, but I am still working on trying to see the dangers of sense pleasures and thereby making a convincing case that all we perceive as "pleasures" in the human and deva realms are, in fact, CAUSES for future suffering.
- The point here is that one needs to keep striving as long as it takes for the mind to come to a stage to be "triggered" by some event (mine was not a significant event). As long as one keeps striving, it is bound to happen. It came as a shock to me. But I will discuss those details in another post (I am not there yet anyway).

## Difference Between Magga Phala and Jhāna

16. By the way, it is becoming clearer to me about the difference between magga phala and jhāna. While $j h a ̄ n a$ can help, jhānā are not NEEDED to attain magga phala. It is sīla, samādhi, pañña, and NOT sīla, $j h a ̄ n a, ~ p a \tilde{n} \tilde{n} \bar{a}$. I will write about this in detail, but many people seem discouraged that they cannot get to jhāna.

- There may be people with magga phala and without any jhāna; with anāriya jhāna and without magga phala; and also with anāriya jhāna and with magga phala. Those with Ariya jhāna MUST be at least an $A n \bar{a} g \bar{a} m \bar{l}$, i.e., one who has REMOVED kāma rāga completely.
- The problem is that it is virtually impossible to distinguish between Ariya and anāriya jhāna. One thing is quite clear: One cannot attain Ariya first jhāna without REMOVING (ucceda pahāna, not just vikkhambana pahāna) of kāma rāga, i.e., kāma anusaya must be removed, not only suppressed.
- But the "jhānic effect" is the same in both cases. The body and the mind have very similar sensations.
- If a Sotāpanna can get into the first Ariya jhāna, then he/she will never be born in the human world again. But we know that a Sotāpanna can be reborn in the human realm. Thus a Sotāpanna would not have the first Ariya jhāna. Whatever jhānā that I had were not Ariya jhāna.
- I slowly reached this conclusion over time; see "Difference Between Jhāna and Stages of Nibbāna." Information in that relatively recent post is correct. I had forgotten to update the old posts. Another point is that it is Sammā Samādhi (not necessarily jhāna) that takes one to Sammā Nāna and Sammā Vimutti to become an Arahant in the Noble Path.

## Stopping Rebirths in Kāma Loka

17. Let us get back to the main discussion. Once one overcomes those two samiyojana of kāma rāga and paṭigha, one will be free of rebirths anywhere in the käma loka (lowest 11 realms, including the human and deva realms).

- Only then can one be said to become healthy (not subject to illnesses) and free of the three sets of senses of smell, taste, and body touches. It is only the human body that is subject to diseases. A Sakadāgāmī would not be reborn in the human realm and thus free of diseases.
- When one attains the Sakadāgāmī stage by REDUCING kāma rāga and paṭigha, one could be born only in the deva realms of the käma loka. At this stage, one would have lost the desire to OWN objects that bring sense pleasures (vatthu kāma), but has not yet lost the URGE TO ENJOY sense pleasures.
- As one progresses, the two bonds of kāma rāga and patigha will be completely broken. One will attain the Anāgāmī stage, never to be born in any realm of kāma loka.

## Breaking Bonds to Rūpa loka and Arūpa Loka

18. An $\operatorname{An} \bar{a} g \bar{a} m \bar{m}$ would still be bound to the rebirth process via five more bonds or saimyojana: rūpa rāga, arūpa rāga, māna, uddhacca, avijjā.

- The first five types of samyojana are called orambhāgiya-samyojana or "lower bonds." The higher five are called uddhambhāgiya-samyojana or "higher bonds."
- If a person has removed the first seven samiyojana but still has the last three of māna_uddhacca, amd avijjā, one's mental body (gandhabba) would come out of the dead body at death. One will be in that state until the kammic energy for the human bhava is exhausted. Parinibbāna will happen at the cutipaṭisandhi moment since one has lost upādāna for all 31 realms and thus cannot be born anywhere. So, the gandhabba would be in the antarā Parinibbāna state. That is presumed to have happened to Waharaka Thero; see "Parinibbāna of Waharaka Thero."
- As one progresses to higher stages, it becomes harder to remove the higher bonds (from the perspective of lower levels). As we saw, it is easier for an average human to understand the dangers of the ap $\bar{a} y \bar{a}$ but harder to see the dangers of kāma loka. One cannot even imagine the dangers of ru$p a$ and arūpa loka. One has to proceed step-by-step.
- When an Anāgāmī removes rūpa rāga, they will be never again born in any realm in the rūpa loka. Similarly, removing the samyojana of arūpa rāga would make one free of birth in the arūpa loka.

## There Is No Safe Realm Anywhere In The Thirty-One Realms

19. Once, the Buddha saw that a Bhikkhu had started 'taking it easy" after attaining the $A n \bar{a} g \bar{a} m \bar{\imath}$ stage and asked him why he was not striving hard as he used to. The Bhikkhu replied that he had reached the Anāgāmi stage and thus thought that he was out of danger.

- The Buddha asked him to consider the following. If one had touched feces and had just wiped it off, one might not see it anymore. But wouldn't that remaining traces still smell bad? The Bhikkhu realized that one would not be free of ALL suffering until one is released fully from all 31 realms. It is harder to see the dangers at finer levels until something makes one aware of such "hard-to-see" dangers.
- Whichever stage we are "stuck at," we should continue the effort without getting complacent. Results will follow (possibly triggered by some unexpected event).
- Sometimes such triggers lead to moments of "insights" ("ahā" moments) directly leading to magga phala. There are many such examples in the Tipitaka.

## Summary

20. Finally, the ten samyojana are removed via different methods:

- Sakkāya ditṭhi, vicikicchā, and sīlabbata parāmāsa are removed via "correct vision" or "correct understanding." And that happens when one is listening to a desana $\bar{a}$ by an Ariya or a Noble Person.
- Kāma rāga and paṭigha are removed via meditation.
- The five higher samyojana are removed with wisdom (paññā).

### 7.3.6 The Cooling Down Process (Nibbāna) - How the Root Causes are Removed

Revised June 25, 2020 (\#1 and \#2 revised); May 28, 2022; August 31, 2022

## Introduction

1. The rebirth process (and suffering) continues because of the six root causes: lobha, dosa, moha, alobha, adosa, and amoha. Even though we may have bouts of happiness, we suffer much more than imaginable in the rebirth process because of these six causes.

- If there are six root causes, why did the Buddha say, "rāgakkhayo Nibbanan, dosakkhayo Nibbanan, Mohakkhayo Nibbanan"? Why are there only three causes to be removed to attain Nibbāna? (By the way, lobha is a stronger form of rāga, and thus rāgakkhaya means removing lobha).
- While lobha, dosa, and moha lead to rebirths in the apāyās (or 'bad realms, including the animal realm,) mundane versions of alobha, adosa, and amoha lead to rebirths in the "good realms."
- However, one must overcome rebirth in ALL realms to be guaranteed no rebirths in the apāy $\bar{a}$. See "Six Root Causes - Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna)."
- Furthermore, one needs to cultivate alobha, adosa, and amoha to get started on the process of removing lobha, dosa, and moha.
- As wisdom (pañ̃ña) grows, lobha, dosa, and moha (as well as mundane versions of alobha, adosa, and amoha) will fade away gradually, and one will get to Nibbāna (where suffering is absent.)

## Noble Truths, Paticca Samuppāda, Tilakkhaṇa - Interrelated

2. Buddha Dhamma is about eliminating suffering associated with the rebirth process. Before following the Noble Eightfold Path, one must understand the First Noble Truth. See "Buddha Dhamma - Noble Truths, Paticca Samuppāda, Tilakkhana."

- Once one comprehends Tilakkhana, one would have a deeper level of alobha, adosa, and amoha.
- A Sotāpanna starts on the Noble Eightfold Path with that more profound level of alobha, adosa, and amoha. Wisdom (pañña $\bar{a}$ ) peaks at the Arahant stage. At that point, one would not be seeking rebirth anywhere in the 31 realms with lobha, dosa, and moha OR alobha, adosa, or amoha.
- See, "Sila, Samādhi, Paññā to Pañ̃̄̄ā, Sila, Samādhi" and "Buddha Dhamma - In a Chart" and references therein.
- Here is another way to see it. When one is on the mundane path, their level of amoha is not complete. That amoha still has avijj $\bar{a}$ or the "ignorance of the Noble Truths." That is the same as having sakkāya ditṭhi goes away. At the Sotāpanna stage, sakkāya diṭthi goes away by comprehending the Four Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa.

## Lobha is Extreme Greed

3. Lobha is the extreme of greed.("lo" + "bha" where "lo" is for the lokaya or world and "bha" is for "bihiveema" (arise or establish) is the main reason how the material world is created and sustained with greed.

- Because of lobha, kāmacchanda (one of the five hindrances) arises. One "loses one's mind" when acting with kāmacchanda which comes from "kāma" + "icca" + "anda" where "ichcha" means liking and "anda" is becoming blind. Thus, kāmacchanda means blinded by attachment to sensual pleasures.
- When blinded by kāmacchanda and when obstacles arise in the way, one develops dosa or dvesa ("dvi"+"vesa" or second manifestation of greed; see "Pāli Glossary (A-K) and Pāli Glossary (L-Z)" for the pronunciation key), i.e., hate for whatever gets in one's way.
- And one has lobha because one cannot see the truth about this world, i.e., because one has moha: Moha comes from "muva" + "h $\vec{a} "$ or literally "closed mouth." The analogy is that if there is a vessel whose mouth or opening is closed, one cannot see what is inside. Thus when one has moha, one is ignorant about the true nature of this world, and thus acts blindly and foolishly, based on outward appearances.

## Total Ignorance (Moha) is the Root Cause

4. One who has not heard about the Buddha's worldview is likely to act with moha and, thus, has both lobha and dosa.

- However, many people do not have strong versions of lōbha, dōsa, and mōha. Most "moral people" have avijja, a milder version of moha, as discussed in \#2 above.
- They will likely carry over such habits (gati) compatible with alobha, adosa, and amoha. ANYONE is likely to have been exposed to Buddha Dhamma sometime in the deep past. But the more time lag there is, one will likely lose those qualities.
- It is clear that if and when one has kāmacchanda (strong cravings for sensual pleasures), one may be tempted to do immoral deeds. We all have had kāmacchanda taking over, anyone can remember cases where "the ability to reason out" got lost, at least for a brief time.

## Lobha (Greed) Leads to Dosa (Anger/Hate)

5. Long-lasting hateful situations (dosa) arise because of kāmacchanda. If something gets in the way of one's sensual pleasures, one can become angry/hateful.

- That is why dosa (or dvesa) is the second manifestation of greed. At this extreme, dosa brings out the second of the five hindrances, vyāpāda. This word comes from " $v \bar{a} y a "+" p \bar{a} d a$ ", where " $v \bar{a} y a$ " means decline and "pāda" means to "walk towards." Thus vyāpāda means one is on a (morally) declining path.
- When one gets extremely angry, one again loses control, which could be even worse than kämacchanda; one can kill another human being in a moment of rage. When one habitually gets angry, one could be in a state of $v y \bar{a} p \bar{a} d a$ for longer times, becoming a "normal" state of affairs i.e., becoming a "gati." We can see people get into the "vyāpāda mode" during (political) debates on television or during arguments.
- All five hindrances arise from not seeing the futility of craving or hate. This "getting attached to things in this world" via greed and hatred is called taṇh $\bar{a}$; see "Tanh̄̄ - How We Attach Via Greed, Hate, and Ignorance"

## Avijjā and Taṇhā Go Together

6. Avijjā (ignorance) and tanhh $\bar{a}$ feed off each other, but it is $a v i j j \bar{a}$ that one needs to tackle first. That is because unless one's mind sees the dangers hidden behind tanh $\bar{a}$, it is not possible to reduce taṇh $\bar{a}$.

- When one starts learning Dhamma, one begins to understand the nature of the broader world of 31 realms: Living beings move from birth to birth; they suffer mightily in the lowest four realms.
- All actions have consequences. In the long run, it does not make sense to act immorally to satisfy one's immediate urges (that is the concept of anicca; see, "Anicca, Dukkha, Anatta - Wrong Interpretations," and follow-up posts.)

## Lobha and Dosa Permanently Reduced with Sammā Diṭthi

7. Most people make the mistake of trying to get rid of greed and hate, either wilfully or with 'breath meditation." That is NOT POSSIBLE. One needs to engage in the correct version of "ānāpāna" meditation; see, "6. Ānāpānasati Bhāvanā (Introduction)."

- As long as one has a wrong worldview and does not see the danger in having thoughts of excess greed and hate, it is not possible to FORCIBLY get rid of greed and hatred; see, "Difference Between Giving Up Valuables and Losing Interest in Worthless."
- That is why Sammā Dittthi, or the correct worldview, comes first in the Noble Eightfold Path.
- After comprehending the Four Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa, there is no need to suppress lobha and dosa. That will happen automatically due to wisdom (pañ̃̃ā.)

## Progress After Comprehending the Four Noble Truths/Paṭicca Samuppāda/Tilakkhana

8. When one attains the Sotāpanna stage, one's lobha is reduced to the kāma rāga level, and dosa reduced to the patigha level PERMANENTLY; That also leads to the removal of the other hindrances. Paṭigha is a lower strength of vyāpāda: "pati"" + "gha" means bonding via friction or dislike; thus, taṇhā can arise due to patigha. [pati means bonding; gha means friction of dislike.]

- One can see now why a Sotāpanna is incapable of doing extremely immoral acts that can result in a birth in the four lowest realms (ap $\bar{a} y \bar{a})$; one has removed vicikicch $\bar{a}$ hindrance permanently, and one always acts with mindfulness. This higher level of Samma Ditthi or the correct worldview is deeply ingrained in their minds, even in a future birth, that will not change. But one can still act with greed and hate to a certain extent.

9. When one attains the next level of Nibbāna, the Sakadāgāmī level, one permanently REDUCES kāma rāga and patigha.Because of this advancement, one will never be reborn in a realm where the physical body can be subjected to ailments, diseases, and old age. Thus, one will be reborn above the human realm, which is the fiffh realm.
10. At the $A n a \bar{a} \bar{a} m \bar{\imath}$ stage, $k \bar{a} m a$ rāga and patigha will not arise in mind. Thus by the Anāgāmī stage, one has completely removed any form of dosa, the second root cause. One does not get angry or hateful under any circumstance, and the dosa cetasika will be absent. Since kāma rāga also goes away, now one has no desire to be born in any realm in the kāma loka, including the deva worlds.

- Thus an Anāgāmī has only rūpa rāga and arūpa rāga. That is mainly due to the desire of an Anāgām $\bar{l}$ to listen (and read) and contemplate Dhamma concepts; there is no desire left for sense pleasures. Thus the lobha cetasika is reduced to a very low level.
- As for the moha cetasika, only a low strength remains as avijjā.

## Progress in Terms of the Ten Samyojana

11. There are ten samyojana (or Sainsāric bonds) keep us bound to the rebirth process. Out of the ten sam̀yojana or sanyoga ("san" + "yoga" or bound via "san"), sakkāya diṭthi, vicikicchā, sīlabbata parāmāsa (all due to strong avijjā) are removed at the Sotāpanna stage.

- That is an important point: One just needs to comprehend the true nature of this world via understanding anicca, dukkha, and anatta (Tilakkhanna) to become a Sotāpanna.
- Just with this understanding, one removes kāmacchanda, vyāpāda, and vicikicchā. That is why a Sotāpanna is said to be "one with the vision" or "dassanena sampanno."
- Once, the Buddha took a bit of soil to his fingernail and asked the bhikkhus, "if all the soil on this Earth can be compared to the defilements one needs to get rid of, a Sotāpanna has left in him/her only an amount compared to this bit of soil on my fingernail."
- That may sound astounding to some. But it is critical to understand that most heinous immoral acts are done because of one not having Sammā Diṭthi at least to a significant level.
- Of the remaining sanyojana (sanyoga), kāma rāga and paṭigha are reduced at the Sakadāgāmī stage, and removed at the Anāgāmì stage. The rest of the sanyoga (rūpa rāga, arūpa rāga, māna, $u d d h a c c a$, and avijjā) go away at the Arahant stage.

## Progress in Terms of Abandoning "Denser Realms"

12. As the attachment to sensual pleasures from "dense matter" decreases, rebirth in the "denser worlds" is progressively eliminated.

- At the Sotāpanna stage, the coarse forms of suffering in the lowest four realms stop. After the Sakad $\bar{a} g \bar{a} m \bar{\imath}$ stage, rebirths do not occur even in the human realm, where physical pain and diseases prevail. An Anāgāmī is born only in the suddhāvāsa rūpa loka, where there are only subtle bodies allowing vision, hearing, and mind only. An Arahant will never be reborn anywhere in the 31 realms which have "some connection to matter"; see, "What Are Rūpa? (Relation to Nibbāna)." [Suddhā̄$\overline{\boldsymbol{v}} \overline{\mathrm{a}} \boldsymbol{a} \overline{\boldsymbol{a}}$ : The "Pure Abodes"; a name given to a group of Brahma-worlds - the five highest Rūpa worlds consisting of Avihā, Atappā, Sudassā, Sudassī and Akanitthā.]
- Thus at the passing away of an Arahant, the mind is released from any attachment to the material world consisting of the 31 realms; no more suffering from physical pains, mental pains, or death. One has attained Nibbāna or the "deathless state."
- That is a summary. See "Body Types in 31 Realms - Importance of Manomaya Kaya."

## Citta Analysis

13. Another way to analyze the steps to Nibbāna is to look at how the 12 akusala citta ceases to arise stage by stage. See, "Akusala Citta - How a Sotāpanna Avoids Apāyagāmi Citta."

- Therefore, the four stages of Nibbāna can be characterized in different ways. With the number of samiyojanā left, "density of matter," types of akusala citta, and many other ways. They are all interrelated and self-consistent.

### 7.3.7 Why is Correct Interpretation of Anicca, Dukkha, Anattā so Important?

## Revised March 14, 2021

One cannot strive for the Sotāpanna stage without understanding the true meanings of the three characteristics of nature: anicca, dukkha, anatta. The correct meaning of anicca, dukkha, anatta are explained under the top menu, "Key Dhamma Concepts."

1. Anicca, dukkha, anatta describe the true nature of "this world" of 31 realms; see, "The Grand Unified Theory of Dhamma." Nowhere in the 31 realms can one maintain anything to one's satisfaction over the long term (anicca); thus one gets depressed, unfulfilled, and distraught (suffering or dukkha is the net result). Thus one becomes helpless (anatta).
2. A good analogy is someone attempting to fill a leaky vessel at home by carrying water to it from a nearby river. He makes a trip back from the river, fills the vessel, and is glad to see that it got filled halfway. But
soon enough, he sees that water is running out and thus needs to make another trip to the river to bring more water.

- If he spent a bit of time examining the vessel, he would have discovered the leak and could have fixed it. We are too much involved in the struggle to maintain illusory happiness. We do not take enough time to contemplate whether it makes sense to struggle against a system that is INHERENTLY unsuitable for providing lasting happiness.

3. Before retirement, I was basically working seven days a week. I had deadlines to meet and responsibilities to fulfill, and there was no time even to think whether I should take some time off and contemplate the sensibility of such a hectic life.

- Whatever vacation time that I had, I wanted to plan a "relaxing vacation." But I did not realize that I was spending more time planning the vacation and then spent whatever energy that I had on sightseeing. When I got back from the vacation, I was exhausted from the trip itself. The early retirement decision was the best decision that I ever made in my life.

4. If this existence is inherently flawed in the sense that it is not capable of sustaining stability, then all the struggles that we make are in vain. The Buddha discovered that everything in "this world" changes (see "The Grand Unified Theory of Dhamma'). It is INHERENTLY impossible to achieve lasting happiness.

- Now the question is, how do we know whether this axiom in Dhamma is correct? This is where it takes a bit of time to look at the evidence. I have done a lot of work within the past several years, and hopefully, this website will help you cut down on that research.
Actually, scientists also now acknowledge that the universe is "running down." We need to constantly spend energy to keep chaos and instability out of the way to maintain some stability (in Buddha Dhamma, this is called "sañkhāra dukkha"); see, "Second Law of Thermodynamics is Part of Anicca!."

5. After looking at the evidence, if one decides to spend a bit more time carefully examining the three characteristics (anicca, dukkha, anatta), one may see that there is some truth that will set one off on the Dhamma Path.

- If there is nothing substantial or long-lasting to be had by harming other living beings, stealing from them, lying to them, indulging in excess sense pleasures, or not being intoxicated with power, money, or position, one's life will automatically change for the better.
- The five precepts or eight precepts are NOT to be just mechanically followed. The mind needs to SEE the benefit of following them.

6. This is why one MUST spend some time examining the evidence for the Buddha Dhamma's validity. The first stage of Nibbāna, the Sotāpanna stage, is attained just with the clear understanding of the true nature of "this world," i.e., anicca, dukkha, anatta.

- When one realizes the futility of the struggle for long-lasting happiness in a world that is inherently not capable of providing it, one will automatically start moving away from clinging to "things in this world." For example, one will say to oneself, "what is the point of stealing this from another person? Can longlasting happiness can be gained? Rather my mind will be in an agitated state if I do that."
- There is no need to force oneself to obey the precepts. Moral behavior (sila) will automatically follow the true understanding of anicca, dukkha, anatta. Then, when one starts feeling a bit of nirāmisa sukha, there is no turning back, because one can see for oneself the benefits of moral life.

7. Thus Sammā Ditthi (san $+m a+$ ditṭhi $=$ vision to get rid of defilements) is none other than the true comprehension of the three characteristics: anicca, dukkha, anatta.

- When one gains a bit of Sammā Ditthi (vision), it will try to prevent one from having defiled thoughts (micchā sañkappa), uttering false speech (micch $\bar{a} v \bar{a} c \bar{a})$, doing wrong things (micchā kammanta), pursuing wrong lifestyles (micchā ajjīva). One will also make efforts (Sammā vāyāma) to be on the

Path, which will lead to be constantly be mindful (Sammā Sati), thus leading to Sammā Samādhi (peaceful and focused state of mind).

- But it is important to see the distinction between just "good speech" and Sammā Vācā. That is to be understood in the context of anicca, dukkha, anatta. One abstains from "wrong speech" not merely because one does not want to face bad consequences. One abstains from it because one can ALSO see the futility in it. The same holds for all eight. This is worth a lot of contemplation.
- This is why the Buddha said, "Dhammo ha ve rakkhati dhamma cāri," or, "once one sees the Dhamma, Dhamma will guide, protect, and direct."
- Thus, gaining Sammā Dittthi via contemplating anicca, dukkha, anatta will automatically direct one on the Noble Eightfold Path. This is why removing micchā ditthi via a true understanding of anicca, dukkha, anatta is so important.

7. When one proceeds in this manner, one will attain the Sotāpanna stage of Nibbāna, as these three basic concepts take hold in mind. At that point, the mind will automatically reject doing things that will result in rebirth in the lower four realms.

- Those are the four greed-based cittā that arise due to micchā ditthi (wrong vision), and the delusionbased citta that arises due to defiled viññāna (vicikicchā). This is why a Sotāpanna is prevented from rebirth in the lower four realms forever; see, "Akusala Citta- How a Sotāpanna Avoids Apayagami Citta."

8. When one attains the Sotāpanna stage, one may still have greed, hate, and delusion left in him/her. But a Sotāpanna KNOWS about them and KNOWS how to get rid of them. Then it is just a matter of time before getting rid of those defilements and attaining the other three stages, culminating in ultimate peace and permanent happiness, Nibbāna.
```
Next, "The Sotāpanna Stage", ......
```

### 7.3.8 How to Cultivate the Noble Eightfold Path starting with Anicca, Dukkha, Anatta

Anicca, dukkha, anatta describe the true nature of this world with 31 realms. Thus one needs to comprehend these "three characteristics of nature" in order to "see" the path to Nibbāna before starting to follow it.

1. Before one starts on a journey one needs to decide why one should take the journey, exactly where one is going to, and the correct path towards that destination. Thus it is worthwhile to examine why the Buddha said our goal should be to move away from this world towards Nibbāna, why he said that, why one should believe that to be true, and what the correct path towards that goal is. The Buddha himself recommended that approach:

- One starts on the Noble Eightfold Path with Sammā Dittthi, which means the needed "vision" on why, what to expect at the end, and an idea about the path to achieve it.
- Out of the twelve akusala cittā, five are permanently removed when one attains the Sotāpanna stage: the four greedy cittā that arise with wrong view ("dittthi sahagatha"), and the delusion citta based on vicikicchā. All five of these citt $\bar{a}$ arise because one does not know the true nature of the world; all kamma that lead one to rebirth in the ap $\bar{a} y \bar{a}$ are done with these five citt $\bar{a}$. Thus when they are removed by partially completing Sammā Ditṭhi at the Sotāpanna stage, one is permanently prevented from accumulating kamma that destines one to a rebirth in the lowest four realms (ap $\bar{a} y \bar{a}$ ).
- Furthermore, any such apāyagāmī kamma seeds previously accumulated are prevented from proving a potent enough nimitta at the moment of death; thus birth in the apāyā is automatically prevented.
- Looking at it from another angle, out of the 10 samyojanas (those that binds one to samsāra), three are removed at the Sotāpanna stage: sathkaya ditṭhi (the idea that all actions one does with the six sense bases to achieve amisa sukha are beneficial), vicikicchā (distorted mindset), and silabbata paramasa (the idea that Nibbāna can be attained just by following precepts, without purifying one's mind). All three are due to not having Sammā Ditthi, or not knowing the true nature of the world: anicca, dukkha, anatta.
- In the Sabbasava Sutta, there are seven recommended methods for removing defilements for anyone starting on the Path. The first item on the list describes how one can get rid of a bulk of defilements just with correct vision of "this world", i.e., "dassanena pahathabba"; this is what was discussed above.
- Once one understands the true nature of "this world" and understands how to remove the rest of the defilements, then the other six steps are taken, of which "bhavanaya pahathabba" (i.e., removal by meditation) comes last. Today, most people start meditating without clearly understanding what to meditate about.

2. Thus, first one needs to understand why we need to escape from "this world."

- The three characteristics of "this world" (see, "Anicca, Dukkha, Anatta") tell us that we can NEVER achieve AND maintain whatever we desire (characteristic of anicca), thus we mostly end up with suffering (dukkha), and thus one is not in control and becomes helpless (anatta). The Buddha merely DISCOVERED this true nature of the world. Many people take Buddha Dhamma to be pessimistic, but Buddha was just a messenger.
- Moreover, the Buddha gave us an optimistic message too. For those who are willing to examine the true nature of the world, there is a better version of happiness that comes from moving away from "this world", i.e., by voluntarily giving up craving for things in this world. This is the nirāmisa sukha of Nibbāna (see, "Three Kinds of Happiness - What is Nirāmisa Sukha?), which increases as one starts on the Path and becomes complete and PERMANENT at the Arahant stage. Even if one does not get to the first stage of Nibbāna, the Sotāpanna stage, one could experience this nirāmisa sukha, and may help shorten the path to Nibbāna in the upcoming lives.

3. Therefore it is CRITICAL to understand anicca, dukkha, anatta, before we proceed further here. If you have not done so, please spend some time critically examining and contemplating on these concepts described under many posts on this website, in particular, "Anicca, Dukkha, Anatta," "The Grand Unified Theory of Dhamma" and the links following that on "Sansāric Time Scale," and "Evidence for Rebirth," and "Why is Correct Interpretation of Anicca. Dukkha, Anatta so Important?." It may be even helpful for many to scan through many other posts before reading those posts.

- That is a lot of reading. But "this world" of 31 realms is very complex. Please keep re-reading all posts until you understand the message. Most of these concepts have been hidden for thousand years, and have been badly distorted, especially anicca and anatta. Think about the fact that all biological matter is constituted from just four bases of DNA, and all computer codes are based on two units, $\mathbf{0}$ and 1 . Thus, one could see how complex the "whole existence" with 31 realms is when there are 28 types of $r \bar{u} p a, 89$ types of citt $\bar{a}$ and 52 types of cetasikas are involved!

4. The main conclusion from anicca, dukkha, anatta is "asarattena anatta," i.e., "anatta in the sense of it is fruitless to crave for anything in this world." Thus the Buddha said, "anissitoca viharathi, na ca kinci loke upadiyathi," i.e., "There is nothing in this world that is fruitful, there is nothing to be craved."

- People "behave badly" in order to "get what they perceive to be valuable." All immoral acts are done to "get what we want." We crave for something and greed arise, and then when we don't get what we wish for, we get angry and hate arises. We first think bad thoughts (mano sañkhāra), then follow through with bad words (vacī sañkhāra), and bodily action (kaya sañkhāra). We do all this because we do not have an understanding of the true nature of the world, i.e., anicca, dukkha, anatta, and related facts: knowledge of the rebirth in a wider world of 31 realms with suffering. Thus we do all other bad acts with established wrong views (niyata micchā ditṭhi); see, "Ten Immoral Actions (Dasa Akusala)."

5. Now let us see what happens when one starts learning the true nature of the world including anicca, dukkha, anatta, and ALSO the consequences of immoral actions: Then one thinks, "Is it worthwhile to steal from someone to get what I want, which in the end will do me more harm than good (because those will not provide any permanent happiness, AND one has to pay the price of an immoral action if not in this life but in upcoming lives?)."

- Same for any other immoral act: to hurt someone by, uttering false, slandering, harsh, or frivolous speech; stealing, killing, or engaging in sexual misconduct (hurting other parties involved). AND all those start with covetousness, ill-will, and all those are done because of established false views that fruitful things can be had in this world by hurting others without any bad consequences for oneself.

6. Thus when one is about to think of doing such a bad deed or having bad thoughts, this "clear vision" or samm $\bar{a}$ ditṭhi will help get rid of such thoughts and instead think, "this person is in the same boat, struggling to survive in a world setup for failure." Thus instead of bad thoughts one will have thoughts of fellowship and compassion for other beings.

- Also one will be working to learn more Dhamma and will be constantly thinking about Dhamma concepts like anicca, dukkha, anatta; the joy from deeper understanding will provide incentive to dig deeper on concepts that are not clear. Thus Sammā Ditṭhi leads to the next step in the Noble Eightfold Path: Sammā Sañkappa.

7. With such a mindset one will avoid the four forms of bad speech (lying, slandering, vicious talk, vain talk), because one realizes that such acts will only lead to loss of peace of mind as well as hurting others. Thus one will start living with Sammā Vaca; also see, "Right Speech - How to Avoid Accumulating Kamma."
8. Similarly, one will clearly see that there is no point in engaging in immoral bodily acts (killing, stealing, and sexual misconduct) in order to get some temporary satisfaction, which in the end will come back to haunt oneself with magnified bad consequences. This will AUTOMATICALLY guide one to act in a moral fashion, i.e., one will have Sammā Kammanta.
9. In standard texts, it says one will not undertake the five lifestyles that are to be avoided:
(a) Dealing and killing animals for meat trade.
(b) Dealing in poisons.
(c) Dealing in weapons and arms.
(d) Dealing in slave trade and prostitution.
(e) Dealing in intoxicants or liquors and drugs.

- Sammā ajiva is more than that. Thus one's lifestyle will automatically change to not only moral living, but also to avoid any kind of act which will be harmful to oneself and/or others. One will take care of one's responsibilities towards one's family and the society, because otherwise one will get in deeper debt, and will not have the mindset to contemplate; see, "Kamma, Debt, and Meditation."
- Following the Path is much more than just abandoning everything and becoming a bhikkhu or just following some guidelines or precepts. It needs to be done with wisdom gained through learning Dhamma. This is Samma ajiva.

10. As one feels the benefits of such a lifestyle, one will start feeling the nirāmisa sukha (see, "Three Kinds of Happiness - What is Nirāmisa Sukha?)." Then one will be motivated to stay on that Path, and also to learn more about the Buddha Dhamma and to contemplate more on the Three Characteristics (one is said to have a complete understanding of anicca, dukkha, anatta only when one reaches the Arahanthood or full NIbbana). This renewed effort is Sammā Vayama.
11. The above six factors will make one's mind purified and one will start "seeing" better. One will start working with "yoniso manasikara" (clear vision). It is more than clear thinking; even a master thief plans his work with clear thinking (on the wrong side).

- Here what it means is one always looks at any issue with anicca, dukkha, anatta in the mind: that it is not possible to maintain things to our satisfaction in the long run; that the more we attach either via greed or hate, the more we will suffer; that it is unwise to do immoral things for temporary happiness to become helpless at the end. This is Samma $\operatorname{Sati}$.

12. When one starts meditating (and this does not have to be last; one can start slowly from the beginning), one will be easily able to get to Sammā Samādhi, focused attention (ekaggata). The more one proceeds on the Path (i.e., the more the mind becomes purified), easier samādhi starts to grow in oneself;; one starts feeling a "lightness" even when not doing formal meditation.

- If one works on developing $j h \bar{a} n \bar{a}$, one will be able to get to Ariya jhānā. Whether one will be using meditation on the Three Characteristics, Satipatthāna, or any other other type of meditation, that will eventually lead to the four levels of Nibbāna.

13. It is important to realize that "Samma" in all these eight steps means "san" (adding things to perpetuate the suffering/rebirth process) + "ma" (remove or get rid of). Thus Sammā Ditṭhi is the vision (anicca, dukkha, anatta) that helps removing "san"; Sammā Sañkappa are the thoughts that help remove 'san"; Sammā Vācā is the kind of speech that helps remove 'san," etc.

- Thus, one adheres to the eight steps through the UNDERSTANDING of anicca, dukkha, anatta, and not merely for the sake of following some guidelines or precepts. One understands the futility of continuing this rebirth process.

Next, "Akusala Citta - How a Sotāpanna Avoids Apayagami Citta",

### 7.3.9 Difference Between Giving Up Valuables and Losing Interest in Worthless

1. As long as one considers something to be valuable, it is not easy to give it up, It does not matter what ANYONE ELSE says. One will go to much effort and expense to make sure it stays with oneself.

- But if one's own mind sees that something is useless and worthless, then what is the point of keeping it? One will gladly get rid of it.
- One's perception of the "world out there" and "what is valuable and what is not" depends on one's mind. Even though we look at a pile of feces with disgust, a dog or a pig may eat it with relish. And a dog does not have any cravings for gold or money.
- While some people gain pleasure by torturing animals, most are disgusted by such acts. It depends on the level of understanding. A purified mind will see things in a better perspective.

2. The common thinking about Buddhism goes like this: "The Buddha said that this rebirth process is full of suffering, and to stop the rebirth process we need to give up everything in this world to detach from it. But that is not easy to do. I like the stuff that I have and I enjoy life. May be I can attain Nibbāna in a future life."

- That is not a correct interpretation of what the Buddha said. The Buddha did say that "this rebirth process is full of suffering." He never asked anyone to give up anything that they had. His only advice was "learn the true nature of this wider world of 31 realms that is characterized by anicca, dukkha, anatta and realize the dangers in staying in it."
- If one truly understood the true nature of the world one's own mind will see the futility of hanging onto worldly things. Nekkhamma or "giving up" is not done forcibly, IT JUST HAPPENS when one comprehends the true nature of "this world."

3. If one understands the above few paragraphs, then one knows more about Buddha Dhamma compared to $90 \%$ of the "Buddhists." Even many Theravāda bhikkhus say, "May you attain Nibbāna after enjoying future lives in Deva realms", or "May you have much worldly pleasures and attain Nibbāna when the next

Buddha [Maitreya (Sanskrit), Metteyya (Pāli), Maithree (Sinhala)] appears in the world." They apparently do not comprehend the dangers in staying in the rebirth process.

- This is in sharp contrast with Buddha Gotama's last words, "appamadena sampadeta" or "strive diligently and comprehend "san" (and attain Nibbāna)", because this rebirth process is wrought with unimaginable dangers. Even if we live perfectly moral lives, we do not know what kind of kamma that we have done in past lives, and thus there is no way to guarantee a good rebirth unless one attains the Sotāpanna stage and makes those worst kamma bïja ineffective.
- This life of about 100 years is just a "blink of an eye" compared to trillions of years in future lives (unless one attains Nibbāna); but it is also unimaginably precious because we very rarely get a chance to be born human and most living beings are in the lowest four realms; see, "Rebirth - Connection to Suffering in the First Noble Truth."

4. Buddha Dhamma is all about PURIFYING one's mind so that the mind can grasp the true nature of this world. The only actions one needs to take are to live a moral life, gradually adhere to a lifestyle that avoids the ten defilements (dasa akusala), AND learn Dhamma, in particular truly understand anicca, dukkha, anatta. Everything else will fall into place.

- When one purifies one's mind, it becomes clear that the things that one believes to be valuable are not valuable at all, AND such cravings can bring so much suffering in the future. But one cannot take that advice coming from even a Buddha and act on it forcibly; ONE'S MIND HAS TO SEE IT.
- One may take many precautions to safeguard a "gem" that one thinks has much value. But if the gem is assessed by an expert and is found to be worthless, then one will no longer have the same "attachment" for the "gem" and may throw it away. But until the perception is there in the mind that the "gem" is valuable, one will not part with it.

5. There is another aspect of this forcibly giving up. In addition to the fact that one will be under stress if one tries to do that, one may be accumulating bad kamma vipāka if one acts irresponsibly. For example, if one decides that he needs to become a bhikkhu and abandons his kids and wife, that is an unwise thing to do.

- We have to act mindfully and with wisdom, making sure that we do not hurt ourselves, our families, or anyone else. Buddha Dhamma is all about the mind, and not about mechanically doing meaningless rituals. As we discussed in several posts, it is the intention and the enthusiasm for doing good, that really matters.
- One can progress all the way up to the $A n \bar{a} g \bar{a} m \bar{l}$ stage of Nibbāna as a "householder", i.e., while fulfilling one's responsibilities as a husband/wife, parent, etc. While one should certainly give to charity, one needs to make sure that there is enough left to support one's family. And it is not possible to contemplate or meditate if one has to worry about the next meal or a place to stay.

6. As one makes progress, giving up will happen automatically at the level of one's understanding, and as needed. One does not have to make plans in advance about what to give up or anything like that: "Dhammo ha ve rakkati dhamma cari", or "Dhamma will guide and protect those who follow the Path." As the mind becomes clear of the hindrances, one will make better decisions, and will not hurt anyone in the process.
7. About 20 years after the Buddha attained Enlightenment, he had to start adding "vinaya rules" for the bhikkhus. When Buddha Dhamma started flourishing, many unscrupulous people started to enroll as bhikkhus to enjoy "a good life." The Buddha admonished that such bhikkhus accumulate much bad kamma by getting indebted to those people who make offerings out of saddhā.

- Vinaya ("vi"+"naya" where "naya" means debt) means stay free of debts. The bhikkhus can do that by diligently pursuing Nibbāna and also by explaining Dhamma to those people, while making sure not to abuse their privileged life where they are honored for these very acts.

8. Getting to debt is bad for lay people too. All our current responsibilities have their origins in the past where we became indebted to others. It may take a while to comprehend this, but we are really paying off debts to
even our kids. And if we do not do a good job of it, we WILL have to do it in future lives. Any other relationship is the same way; see, "Kamma, Debt, and Meditation."

- One time a bhikkhu started sharing his food from the alms round with his parents, and other bhikkhus complained to the Buddha. The Buddha asked why he did that he said his parents had become beggars and that is why he did that. The Buddha praised that Bhikkhu and officially endorsed it as a vinaya rule, that bhikkhus can take care of their parents if the need arose. Even as a Bhikkhu, one is obliged to take care of one's parents.

9. When someone gets help from another, it is the obligation of the receiver to show his/her gratitude for that kindly act, by doing a pattidana or "giving merits" to that person; see, "Transfer of Merits (Pattidana) - How does it Happen?." If the receiver becomes able to pay back in kind, that should be done too.

- When we deal with people in everyday life, we are engaged in paying back debts even unknowingly. Thus it is a good idea to fulfil one's responsibilities to the best of one's ability. This applies to most everyday things we do. Our employment responsibilities needs to be done to the best of our ability. When we do not fulfil our responsibilities anywhere, we stay indebted and accumulate more debt with interest.
- When doing transactions, we need to make sure that everyone is compensated adequately; otherwise, such debts will have to be paid in the future. Again, intention and the "state of mind" are key factors: We may be able to fool other people, but we cannot fool our own minds.
- We have enemies because we have had conflicts with them before. And someone has to break that vicious cycle. This is why the Dhammapada verse, "na hi verena verani...." says: "Hatred never ceases through hatred, but through love alone they cease." This is an eternal law.

10. Beings in the lower four realms DO NOT HAVE an advanced mental state to affect their future even short term, i.e., in this life; they are simply paying off debts and paying for their immoral acts in the past . They just "go with the flow" spending kammic energy that has been accumulated; unless they are fortunate to receive the benefits of a "good kamma beeja" from the past (when they were in higher worlds) at the time of death, they are stuck in the lower realms.

- On the other hand, HUMANS CAN totally change their future, within this lifetime (mundane progress), but also affect the future lives: If one wants to avoid the niraya (hell) one needs to remove the causes that could cause rebirth in niraya, i.e., deep hate. If one wants to avoid rebirth as a hungry ghost (peta loka), then one need to remove causes for that, i.e., excessive greed. If one does not want to be reborn an animal one needs to remove both greed and hate. To avoid birth as an asura, one needs to take care of oneself, and not depend on others.

11. Buddha Dhamma is a complete theory on existence. EVERYTHING can be explained in a systematic way. If everyone can grasp the basic message of the Buddha, our world will be much safer place.

- When a tree is growing all we need to do is to water it, provide nutrients, and generally take care of it; the fruits from the tree will come out naturally. No amount of praying or wishing is going to get the tree to give more fruits. In the same way, when we follow the Path correctly, everything else will "fall into place." There is no need to pray or to make wishes or do anything else.
- This world, for all its drawbacks, plays by the rules. Things just do not happen; they happen due to causes. When one understands the causes for bad outcomes, one can work to stop such causes and make sure bad outcomes NOT TO ARISE in the future; this is the meaning of the "nirodha" (="nir" + "udā," where "nir" is stop and "udă" is arising; thus "stop from arising").

12. The real message of the Buddha is that spending one's whole life in making mundane progress is really insignificant in the sansäric time scale; why spend all that time to achieve a high status, earn a billion dollars, or anything else mundane if one has to leave all that behind within $\mathbf{1 0 0}$ years? We have done this over and over countless times. This rebirth process can run into many more trillions of years into the future and this larger world of 31 realms is wrought with unimaginable dangers.

- The ultimate solution is to stop the rebirth process (eliminate causes for future rebirths), and to release the mind from the material body that leads to much suffering.
- Thus the key message of the Buddha was to "attain the suffering-free Nibbāna by eliminating the causes for rebirth: greed, hate, and ignorance."
- But that message itself can only be grasped via purifying one's mind to a certain extent by learning about the true nature of the wider world of existence: anicca, dukkha, anatta.

### 7.4.1 The Sotāpanna Stage

Revised February 24, 2020; August 15, 2020; major revision October 21, 201
It is imperative to learn the correct Dhamma from an Ariya to attain the Sotāpanna stage (one of the four requirements). See, "Four Conditions for Attaining Sotāpanna Magga/Phala." We will discuss an analogy for the Sotāpanna stage in that regard. We will briefly discuss Sabbāsava Sutta to show the importance of removing wrong views to get to the Sotāpanna stage.

## Upaddha Sutta (SN 45.2) - Need to Know the Correct Buddha Dhamma From a Noble Friend

1. According to the "WebLink: suttacentral: Upaddha Sutta (SN 45.2)" once, Ven. Ananda told the Buddha that he thinks half ("upaḍ̣hamidamं..") of the factors contributing someone getting to Nibbāna (by completing the brahmacariya) can be attributed to association with a Noble Friend (kalyānamittā.) Here, "kalyāna" means to "help remove defilements," and "mitta"" is a friend.

- But the Buddha explains that not just half, but the FULL contribution ("sakalamevidaim..") comes from a kalyānamittatā. Of course, the Buddha is the best kalyānamittā.
- The reason is clear. Buddha $\mathbb{D}$ hamma is never known to the world until discovered by a Buddha. An average human can learn about it ONLY from a Buddha or a true disciple of a Buddha who has also understood that Dhamma.
- However, the guidance is REQUIRED only to understand this "new worldview" that has never been known to the world. That means once getting to the Sotāpanna stage, a human would understand the Eightfold Noble Path and how to follow it to bet to the Arahanthood.
- That is why getting to the Sotāpanna stage is the same as getting to lokuttara Sammā Diṭthi, not just mundane Sammā Dittthi. Mundane Sammā Ditt thi would enable one to live a "moral life." In contrast, lokuttara Sammā Diṭthi enables one to attain Nibbāna. See, "
- Just by understanding the "new worldview," a large number of defilements (āsava/anusaya) are removed from the mind and that is referred to as "dassanā pahātabbä" (removal with vision) in the Sabbāsava Sutta (see below.)
- We can use the following mundane analogy to help explain the above idea.

## An Analogy for Sammā Ditṭhi (attaining the Sotāpanna Stage)

2. Suppose a man $(\mathrm{X})$ lives in an area usually full of sense pleasures. But there are occasional flooding, droughts, and also Earthquakes. When such calamities occur, he gets distraught, and thus, his mind is not at ease most of the time.

- Yet, he has accumulated some wealth, and he believes that "everything will be OK" in the long run in the back of his mind.

3. Then, one day, an old friend (who has been on travel for many years) comes back and tells him that the reason he left was to find a better place to live. The friend says that he did some research and found out that this land is inherently unstable, and within several years, an Earthquake will destroy this area.

- Furthermore, he says that he found a very prosperous place and that there are no worries about flooding, drought, or Earthquakes. But it is a long journey to that place.

4. X tells the friend that he had heard about such beautiful places from other people before. He had followed them at times, but every time came back after trekking for some time because he could not see any benefit. Plus, he says, "how do I know what you say is right? I know that everything is not perfect here, but can you show evidence for your theory that there will be a big Earthquake? Also, how can I believe you that this place you found is so wonderful?"
5. The friend shows him all the evidence that he had gathered why this area is unsuitable for living in the long run. He also shows evidence about the prosperity of the new place and also describes the travel path.

- The evidence is compelling, and X decides to follow the friend's advice and see what happens. That is analogous to becoming a Sotāpanna Magga Anugāmi.

6. X spends a lot of time reading about and contemplating all the evidence. Then he begins to realize that what the friend is saying is true. He decides to take an exploratory trip and makes suitable preparations, as suggested by the friend.

- Once in a while, he wonders whether all these preparations will be a waste of time. But as he keeps on assessing the evidence, he becomes more and more convinced that he needs to take that trip.

7. Then X starts on the trip and is encouraged by seeing some "landmarks" that the friend told him. Even though once in a while he thinks about all the "pleasures" he could have had if he stayed home, these "landmarks" encourage him to go further and then reaches one of the four "major stopovers" that the friend mentioned.

- At a certain point on the way, he becomes fully convinced about his friend's conclusions. Now there is no going back for him. That is like getting to the Sotāpanna stage.

## The Way to the Sotāpanna Stage

8. The key here is that without knowing about the Buddha's world view (31 realms of existence and the suffering in the four lower realms, see "The Grand Unified Theory of Dhamma"), one does not comprehend the "samsaäric suffering." Most suffering incurs when one is born in any of the four lowest realms. That is important because it is possible that (especially young and wealthy people) may not experience that much physical and mental suffering. And to have faith in the Buddha's worldview, one needs to spend some time examining the evidence for it.
9. When one sees why it is not fruitful to stay in "this world" of 31 realms, they have understood the true nature, the three characteristics anicca, dukkha, anatta, of "this world."

- Sammā Ditṭhi is the realization that there is nothing "substantial" to be had by staying in "this world." This clear vision concludes that there is no point in doing immoral things (those that cause rebirth in the four lower realms).

10. We strive to gain or own "things" in this world because we perceive that we can achieve happiness eventually; this is sakkāya ditṭhi or sathkāya ditṭhi (both "Sakka" and "sath" mean "good" or fruitful, and "kāya" means "kriya" or actions. Dittthi means views. Thus, sakkāya ditṭhi is our wrong idea that our efforts to acquire "things" or "seek happiness" are beneficial and fruitful.

- When one truly understands anicca, dukkha, anatta, this wrong view goes away. One realizes that nothing we do can lead to permanent happiness "in this world."

11. Furthermore, for one who has seen anicca, dukkha, anatta, the mind does not allow serious wrongdoings (vici+ ki+icca $=$ liking for wrong actions or things) that could lead to birth in the lower four realms.

- There is no doubt regarding the "world vision" that they realized. Thus vicikicchā, or the liking for unfruitful and harmful actions, is removed at the Sotāpanna stage.

12. Therefore, one needs to contemplate the true nature of the world. It is done by purifying the mind and cannot be done just by following certain rituals, such as just obeying precepts on certain days.

- Thus the idea of "silabbata parāmāsa" or "Nibbāna can be attained by following rituals" goes away at the Sotāpanna stage. One realizes what the Buddha said by "samivaraṭthena silam.."
- Unbreakable "sill" (or moral behavior) comes with the correct vision/view. That must be monitored at ALL TIMES, not by "observing precepts" for a day or several days.

13. For one who has become "dassanā sampanno" (one with clear vision), the mindset changes not by following formal procedures. The change of perspective comes by understanding the futility of breaking any precepts or wrongdoings. Even if one does a wrong act, he would immediately realize it and avoid it in the future.
14. This is not to discourage people from observing precepts as a formality. Even mechanically observing those precepts is good to do. It is also a good habit to instill in children. It is customary in Buddhist countries for whole families to go to the temple and observe "pañca sīla" (five precepts) or "aṭthañgika sìla" (eight precepts) on Poya (Full Moon) days.

## Key Points from the Sabbāsava Sutta (MN 2)

15. The key to attaining Nibbāna is to remove the $\bar{a} s a v \bar{a}$ (residue from the fermentation of immoral thoughts/habits over many samsāric births). In the Sabbāsava Sutta, the Buddha listed seven steps to remove the $\bar{a} s a v \bar{a}$ and to purify the mind, thus paving the way to Nibbāna. The seven steps are:
16. Removal by clear vision ("dassana pahātabbā," where dassana is vision and pahātabba $\bar{a}$ is removal). That is a clear understanding of anicca, dukkha, anatta.
17. Removal by the restrained use of the sense faculties ("saimvarā pahātabbā," where samivara is the disciplined use of the sense faculties: not to over-indulge in the senses).
18. Removal by good associations ("patisevanā pahātabbā," where sevana is an association: for example, with good friends and good deeds).
19. Removal by tolerance and patience ("adhivāsanā pahātabbā"). For example, even if tempted to steal because one is hungry, one should contemplate the consequences of stealing. There are ways to earn a living.
20. Removal by staying clear of "bad influences and environments" ("parivajjanā pahātabbā"). One needs to avoid bad friends, unwise locations for a living (due to floods, bad neighbors, etc.), avoid inappropriate times to go out, etc.
21. Removal by getting rid of certain things ("vinodanā pahātabbā"). One needs to get rid of immoral thoughts that come to mind, such as excessive sensory pleasure, hate, etc.
22. Removal by meditation ("bhāvanā pahātabb̄""). When one has a clear vision in \#1, it becomes apparent what to contemplate.

The clear vision is the first on the list. One should not undertake a journey without knowing the reason for the journey. Furthermore, one needs to understand how to get to the destination.

- In the same way, having a clear vision of the Buddha's worldview is a prerequisite for starting on the Noble Path. What is Nibbāna and how to get there? See, "Paticca Samuppāda, Tilakkhana, Four Noble Truths."
- There are four types of $\bar{a} s a v \bar{a}: k \bar{a} m a \overline{s a v a ~(c r a v i n g ~ f o r ~ s e n s e ~ p l e a s u r e s), ~ d i t ̣ t h a ̄ s a v a ~(c r a v i n g s ~ d u e ~ t o ~}$ wrong views), bhavāsava (craving for existence), and avijjāsava (cravings due to ignorance).

16. A Sotāpanna removes the diṭthāsava through clear vision. Once one understood the true nature of "this world" by contemplating anicca, dukkha, anatta, one would not commit any immoral acts to gain anything
in "this world." See, "Anicca, Dukkha, Anatta." That alone saves one from future rebirths in the lower four realms.

- A Sotāpanna still has the other three $\bar{a} s a v \bar{a}$ left. Those are removed mainly by the meditation on the Satta Bojjhañga (seven Bojjhañga.)
- After attaining the Sotāpanna stage, one sees the Path to Nibbāna (and how to MEDITATE to get to Nibbāna.) That is "bh $\bar{a} v a n \bar{a} p a h \bar{a} t a b b \bar{a} "$ " in \#7 above. Then he diligently follows the Path and reaches the following three stages, culminating in Nibbāna.
- As one can see, the other five steps (\#2 through \#6) listed in the Sabbāsava Sutta are common sense things to do AT ANY TIME. They make sense at any stage. Anyone can use those steps to enhance the quality of life and remove any bad habits-for example, alcohol/ drug use or even overeating can be bad for health.

## A Sotāpanna Knows "What to Meditate On"

17. Many people start "meditating" even before understanding "what to meditate on." Of course, if one is doing "breath meditation," there is nothing to learn. It is an insult to the Buddha. Buddha's meditations help one to stop future suffering from arising. For that, one must first realize the unfruitfuilness/danger in remaining in this world (via the rebirth process.) See, "Paticca Samuppāda, Tilakkhana, Four Noble Truths."

- The Mahā Satipatṭhāna Sutta covers all seven steps in \#15 above in a somewhat different fashion. The correct $\bar{A} n \bar{a} p \bar{a} n a s a t i ~ b h a \bar{a} v a n \bar{a}$ (not the breath meditation version) covers those in a general way.
- As stated in the "WebLink: suttacentral: Ānāpānassati Sutta (MN 118)": "Evamं bhāvitā kho, bhikkhave, ānāpānassati evaì bahulīkatā cattāro satipaṭthāne paripūreti" or "Bhikkhus, that is

- Can "breath meditation" fulfill the Satipațthāna Bhāvanā? One needs to be a Sotāpanna to properly cultivate Ānāpānassati or Satipaṭthāna Bhāvanā (i.e., to have optimum results.)

## Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire

## Revised August 5, 2022

Attaining the first stage of Nibbāna (Sotāpanna stage) will remove suffering in the apāyā forever, which could be more than billions or even trillions of years. This is not an exaggeration since we have been in this rebirth process from an untraceable beginning; see "Evidence for Rebirth." Thus any achievement in this life of 100 years is no match.

- Most people think that Buddha Dhamma is a pessimistic "religion." It is neither a religion nor a pessimistic one. Let us discuss these two issues a bit first.
- In the "WebLink: suttacentral: Cakkavattirāja Sutta (SN 55.1)" the Buddha stated that a Noble Person (above the Sotāpanna Anugāmi stage) is better than an emperor ruling the whole Earth (rāj $\bar{a}$ cakkavattī.) Let us discuss what that would be so.

1. Buddha Dhamma describes the true nature of "this world," which is far more complex than most people think.

- A religion promises that if one abides by its tenets/doctrine and lives this life accordingly, one will be rewarded accordingly. In most religions, one is promised birth in heaven for eternity if this is kept.
- But a basic tenet in Buddha Dhamma is that this life of about 100 years is just a blip compared to the countless lives one has had in the past. Even if we live a perfect life during these 100 years, that does not guarantee anything about our future lives because we may have done kamma in PREVIOUS LIVES that could give rebirth in even the lowest four realms, the ap $\bar{a} y \bar{a}$, including the niraya (hell).
- The only way to GUARANTEE that one will NOT be reborn in the $a p \bar{a} y \bar{a}$ is to negate the causes (lobha, dosa, moha) that could give opportunities for all such bad kamma vipāka to come to fruition. And that is possible only via attaining the Sotāpanna stage. Even though attaining the Arahant stage of Nibbāna via complete removal of lobha, dosa, and moha (and thus the ten sanyojana or fetters) will do that too, attaining the Sotāpanna stage does not require all that. It just requires one to comprehend anicca, dukkha, and anatta to the extent that only three sanyojana (fetters) are removed.
- Removal of three (or ten) sanyojana cannot be achieved via following set rules/precepts. One needs to purify one's mind so that the true nature (anicca, dukkha, anatta) of this complex world of 31 realms is understood. That is why Buddha Dhamma is not a religion per standard definition.
- On the other hand, if one just wants to take what is helpful to lead to moral life and use Buddha Dhamma as a religion, there is nothing wrong with that. That would be much better than living an immoral life. Dhamma will become clearer as one proceeds, providing the incentive to "dig deeper."

2. Now to the second issue: Because the Buddha emphasized the "suffering in this world," many think Buddha Dhamma is pessimistic. The Buddha did not say that this current life is necessarily filled with suffering (even though it has more suffering than people realize); rather, most suffering is encountered in the lowest four realms of the 31 realms. Thus, this reality of suffering is to be understood in the context of this wider world view. The Buddha just discovered the true nature of the (more complex) world.

- Furthermore, he showed how to be free from this inevitable suffering in future births and to attain permanent happiness, Nibbāna.

3. Please re-read the above material on those two key points. It is important to look at this "wider world view" when assessing what we should strive for in this life. This analysis leads to a whole new perspective if there is evidence to believe the "wider world view" of the Buddha with repeated rebirths in 31 realms, including the four $a p \bar{a} y \bar{a}$ with unimaginable suffering.

- Does it make sense to spend 60 years of an 80-100 year life to accumulate wealth and fame if one is to lose most of one's sensory enjoyments over the last few decades (and possibly have a major disease or memory loss)?
- Does it make sense to accrue unimaginable suffering in the apāyā in future births by committing any of the dasa akusala (ten defilements) to make money, get a promotion, live in a big house, get a prestigious position, etc. (for less than 100 years)?
- The realities of old age, disease, and death hold for a king, emperor, billionaire, or famous film star just the same as for an average person. In old age, all these achievements become a mental burden because one constantly thinks about the "good old days" and become depressed about not being able to enjoy the sensory pleasures just because the whole sensory system is breaking down.
- Here is a video that summarizes what I tried to explain the above paragraph :

## WebLink: YOUTUBE: Aging Stars of the Golden Age

4. And this predicament is true for ANY being in ANY realm unless at least the Sotāpanna stage is attained. A deva or a Brahma could enjoy millions of years of pleasurable lives but WILL end up in the apa $\bar{y} \bar{a}$ at some point in the future unless at least the Sotāpanna stage of Nibbāna is attained. There are several incidents mentioned in the Tipitaka where the Buddha emphasized how important is the Sotāpanna stage compared to any existence in the 31 realms:

- One time the Buddha was crossing a paddy field with 500 bhikkhus where many cattle were grazing and smiled. A Buddha (or an Arahant) does not smile frequently, so Ven. Ānanda asked the Buddha why he smiled. The Buddha said, " each one of these has been the king of the devas at some in the past." Ven. Ānanda asked why that was a reason to smile. Then the Buddha said, "All these 500 bhikkhus, who are Sotāpannas or above, will never be born an animal. That is why I smiled."
- Another time the Buddha and Ven. Ānanda was walking and saw a piglet by the roadside, and the Buddha again smiled. Asked why, he said, "This piglet had been a princess in a life way back; she cultivated anāriya jhānā, attained the highest (eighth) jhāna, and had abhiñña powers. She was born in the highest Brahma world, but now she is just an animal. On the other hand, those who have attained the Sotāpanna stage in my sāsana will never be born in the apāyā." See "WebLink: tipitaka.net Dhammapada Verses 338 to 343 ." (Note that the background story uses "sow" for "piglet.")

5. Many people do not believe in rebirth. But having a belief will not help if it is a wrong view. Considering the possible dire consequences IF one gets this world view wrong, it makes a lot of sense to spend some time and critically examine the evidence for rebirth in particular (see "Evidence for Rebirth") and the wider worldview of the 31 realms in general (see, "The Grand Unified Theory of Dhamma").
6. The niyata micchā dittthi (established wrong views) is one of the stronger ones of the dasa akusala that could lead to birth in the apāyā; the key word there is "niyata," or "established," ie., one firmly believes, for example, that there is no rebirth process. One could avoid this by at least having an open mind and NOT ruling out those possibilities. Even a Sotāpanna may not be truly convinced of some aspects of the wider world view (but not rebirth): for example, he/she may not have any strong conviction on the existence of deva worlds or may not even think about such matters.

- Another point to consider is how the standard world views have changed since the Buddha revealed his Dhamma about a complex world with no discernible beginning. Philosophers since that time (Socrates was a contemporary of the Buddha) put forth many world views that have been discarded one by one: WebLink: WIKI: Astronomy and cosmology
- Within the past 100 years, the Buddha's world view has gained much support from science and that pace is accelerating with the new string theories and quantum mechanics. With all these impressive advances science has made, it cannot account for $96 \%$ of the universe's mass; see WebLink: NASA: Dark Energy, Dark Matter and WebLink: WIKI: Dark matter. This is because there is so much that we cannot "see" with our eyes or even with the current scientific instruments; see, "Consciousness Dependence on Number of Dimensions."
- There are good reasons to believe that science will reveal more of these currently hidden aspects of the universe in the future. Just imagine that even a hundred years ago, scientists believed that the universe had only a few galaxies and was stable. Now we know that there are billions of galaxies in our universe, that there could be numerous universes, and all those are not stable, i.e., they are born and will perish in the future.
- Until recently, humans also had the wrong impression that the Earth is a special place in the universe. But now we know it is an insignificant "speck of dust" in a vast universe; see the video in "The Grand Unified Theory of Dhamma."

7. Please spend some quiet time contemplating these issues. These posts are not for reading pleasure; these are issues that have far more serious consequences than making a billion dollars. Some of my friends tell me I should "tone down" the content because the "realities of the world turn many people off."

But my goal is not to have a huge readership. Rather, if I could convey the Buddha's true message to even a few people, I would have accomplished my goal. There is ONLY ONE set of natural laws, and we cannot alter them, just like we cannot alter the laws of motion: If a car is headed to a brick wall, the car needs to be stopped, or the consequences will not be good. Let me give a few examples of how the Buddha assessed this situation:

- Some brahmins complained to the Buddha that he was not spending enough time debating them but would spend a lot of time with even a few of his disciples. The Buddha asked this question: "Suppose a farmer has three paddy fields: one is extremely productive, another is OK but requires considerably more time to yield a good harvest, and the third field is of such a poor condition it is impossible to get any harvest. Which field would the farmer put his efforts on? He will take care of the most productive field, disregard the third field, and spend whatever extra time he has on the second field. It is the same way
with me. I want to help those interested and capable of learning my Dhamma. Debating with those who have closed minds is a waste of time." See, "WebLink: suttacentral: Khettūpama Sutta (SN 42.7)."
- One day the Buddha and Ven. Ānanda walked for many miles to a village to deliver a discourse. Everybody gathered, and the Buddha sat there for a couple of hours without starting the discourse. Finally, a farmer who had lost a cow and was out in the forest looking for it found the cow, went home, took a bath, ate, and came hurrying to the event. The Buddha started the discourse right after he came in. When they were walking back after the discourse, Ven. Ānanda asked the Buddha why he kept everyone waiting until that one farmer came in. The Buddha said, "Ānanda, I walked all this way to give the discourse because of that farmer. I saw that he was capable of grasping the Dhamma, and he did attain the Sotāpanna stage."

8. The Buddha said, "This Dhamma is different from anything the world has ever seen." And that is true. It takes time to grasp the complexity of this world, much of which is hidden from us (and only a Buddha is capable of finding them; see "Dhamma and Science - Introduction"). There is no need to rush and embrace everything; one needs to spend time contemplating the validity of Buddha Dhamma.

- There are many introductory but critical posts in the "Moral Living and Fundamentals" section. That section is more about the basic concepts of Buddha Dhamma. I would encourage even those familiar with "Buddhism" to peruse that section because, without the correct basics, one cannot grasp more advanced concepts. And I am certain that $90 \%$ of "Buddhists" are not even aware of some of these basic concepts. Please comment on anything at this site and don't hesitate to point out incorrect concepts.

9. We can, in a way, compare this situation with the situation a parent faces with a teenager. The teenager wants to go out and have a good time with friends. But the parent says, "do not just think about the immediate pleasures. If you do not study well and get good grades at school, you will not have a good job when you grow up."

- It is the same here. We are trapped in a "rat race" to keep up with day-to-day pleasures and activities. The Buddha's message is that there is a much longer time to think about.
- This life is just a drop of water compared to the huge ocean that is the sansāric journey of rebirths. It is imperative to take some time and contemplate the "bigger picture." We may not get another chance of a human birth for millions or billions of years; this is NOT an exaggeration.

10. But the best part of the Buddha's message, which has been lost for over a thousand years, is that the nirāmisa sukha is better than any sensory pleasures. We are under the illusion that sense pleasures are to be pursued. If one can taste the happiness from staying away from sense pleasures, one will NEVER value the sense pleasures. Those who have experienced even anāriya jhānic experiences will have some idea of such nirämisa sukha.

- It is a feeling of huge release more than a pleasure in consuming tasty food, for example. And it is not temporary, especially if one can get to the Sotāpanna stage. Then that "base level" of relief is never lost, even in future births.
- When one starts on the Path by comprehending anicca, dukkha, and anatta, the sense of peacefulness, the release from stresses, is felt; that gives an incentive to stay on the Path even before attaining the Sotāpanna stage.
- The best part is the realization that one will never be born in the $a p \bar{a} y \bar{a}$. Any king, emperor, or billionaire, is not assured of that; on the contrary, the efforts to attain such temporary status may CAUSE one to be born in the $a p \bar{a} y \bar{a}$ if one engaged in dasa akusala to attain them.
- As Carl Sagan pointed out in the video in "The Pale Blue Dot........"," it is worthwhile to contemplate, "where are all those kings and emperors who gained fame through the suffering of so many people?." They will likely be in an apāya suffering for millions of years.

### 7.4.3 Myths about the Sotāpanna Stage

## Revised September 7, 2016; \#6 revised on December 2, 2016; September 28, 2018

There are many myths and misconceptions on who a Sotāpanna is, and what needs to be done to become a Sotāpanna. Here we discuss some of these misconceptions.

1. When I was growing up in Sri Lanka, I was under the impression that a Sotāpanna could fly through the air, and an Arahant could vanish and reappear as he/she wished. These were the "mythical" status assigned to Sotäpannas and Arahants. I guess that is due to the fact that such attainments are perceived these days to be impossible to be attained on the one hand and also a clear idea of what those attainments mean has been lost.

- One is unlikely to identify a Sotāpanna or even an Arahant if one has even been associating with that person.
- It is true that the attainment of even the Sotāpanna stage is not a trivial matter. And one cannot expect it to be trivial; see, "Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire."
- A Sotāpanna is incapable of doing only six things: Killing mother, killing mother, killing an Arahant, injure a Buddha, Sañgha bheda (teaching adhamma as Buddha Dhamma), having niyata micchā diṭthi; see, "WebLink: suttacentral: Bahudhātuka sutta (MN 115)."

2. The attainment of supernormal powers such as flying through the air or to vanish and reappear is possible even by developing anāriya jhāna . Most of such attainments are lost at death (even though the ability to get them back will be easier if one is reborn human again).

- Attainment of various stages of Nibbāna are accomplished by cleansing one's mind and it has nothing to do with developing supernormal powers. Even though it will be much easier for an Arahant or a Sotāpanna to develop such powers, by the time one attains such levels of purity of the mind they are not enamored anymore with such supernormal powers. Most of the Arahants who had supernormal powers at the time of the Buddha had developed those before encountering Buddha Dhamma. For example, Ven. Sāriputta and Ven. Moggalana were vedic brahmins who had developed all anāriya jhānā and already possessed such powers before they met the Buddha.

3. Various stages of Nibbāna are attained by systematically removing the 12 types of akusala citta (immoral thoughts) or, put it in a different way, by removing the ten samyojana. There are other ways to describe those conditions too; see, "Conditions for the Four Stages of Nibbāna."

- The Sotāpanna stage is reached via removing the four lobha citta that are based on micchā dittthi (wrong vision), and the moha citta of vicikicch $\bar{a}$. It is important to note that the remaining 7 akusala citta including the two dosa-mūla citta are still with a Sotāpanna.
- The four lobha cittiā that a Sotāpanna removes are the ones that are responsible for vyāpāda, which is the strong version of anger that makes one eligible for rebirth in the $a p \bar{a} y \bar{a}$; see, "Akusala Citta How a Sotāpanna Avoids Apayagami Citta." The two dosa-mūla citta, which gives rise to milder versions of anger, are removed only that the $A n a \bar{a} \bar{a} m \bar{\imath}$ stage.
- Furthermore, kāma rāga (craving for sensual pleasures) is included in the other four lobha-mūla citta that are "ditṭhi vippayutta" or "not associated with wrong views." Thus craving for sensual pleasures is also removed only at the Anāgāmī stage.
- Therefore, attaining the Sotāpanna stage - while not trivial - is not as hard as many people think if one has a tihetuke upapatti. However, it is not possible to determine who has tihetuka or
 cannot attain magga phala or Ariya jhāna in this life, but still can make progress towards Nibbāna; see, "Patisandhi Citta - How the Next Life is Determined According to Gati."
- On the other hand, many people are focused on trying to get rid of the perception of "self." That is not something that can forced; it just HAPPENS at the Arahant stage. It is not possible to make that perception go away before that.

4. Turning to another myth, NO ONE ELSE can discern what magga phala one has attained: Sotāpanna or a higher stage of Nibbāna. Only a Buddha has that capability. Let me give an example to illustrate this point:

- One time, Ven. Sāriputta was giving instructions to a bhikkhu. The Buddha came along and told Ven. Sarputta that the bhikkhu had already attained the Arahantship and thus there is no need to give instructions to him. It turned out that the bhikkhu in question did not say anything to Ven. Sāriputta out of respect for him.
- Now, Ven. Sāriputta is only second to the Buddha in this Buddha Sāsana. He and Ven. Moggallāna were the two chief disciples: Ven. Sāriputta was second in knowledge to the Buddha and Ven. Moggallāna was second in psychic powers to the Buddha.
- Thus, if Ven. Sāriputta was not able to discern whether that bhikkhu was an Arahant, it is NOT possible for anyone living today to determine the stage of Nibbāna (Sotāpanna, Sakadāgāmī, Anāgāmī, Arahant) of any other person.
- One could be of any race or even religion and still be a jāti Sotāpanna (and, even that person may not be aware of it). If one had attained the Sotāpanna stage in previous life, he could in principle, be born anywhere in human or deva realms. Buddha Dhamma describes nature's laws; it applies to everyone the same way.
- Those people who attained various stages of Nibbāna during the early years had different religious beliefs. They sat down to listen to the Buddha and by the time the discourse was over, they had attained various stages of Nibbāna. Some people came to debate the Buddha and left as Sotāpannas. One does not need to formally become a "Buddhist" to realize the true nature of "this world."

5. This is why one has to be very careful when dealing with other humans, and not to offend anyone intentionally. It is very important to have at least some knowledge of the different weights of kamma; see, "How to Evaluate Different Weights of Kamma."

- Some people worry about inadvertently killing insects while cleaning the house, but do not think twice about saying a lie or a hurffil thing to a human. That is getting things backwards.
- The severity of the kamma depends on the "level of the being" that it is directed at. It is EXTREMELY difficult to get a human life; thus a human life could be millions times worth compared to any animal life. A Sotāpanna is at a more than thousand-fold higher level compared to a normal human, and the subsequent levels are even higher.
- There is no being in the 31 realms that is at a higher level compared to an Arahant. That is why killing an Arahant is a Anantariya pāpa kamma, i.e., it will bring extremely bad vipāka in the very next life. And it is not possible to say whether a given person is an Arahant by looking at that person, or even associating with him/her for a short time.

6. How does one discern whether one has attained, say, the Sotāpanna stage?

- A Sotāpanna does not attain Ariya jhānā coincident with the phala moment. There one's "lineage" (gotra) is changed from a normal human to a Sotāpanna at the gotrabu citta. A similar citta $v \bar{t} h i$ runs in attaining a $j h \bar{a} n a$, but in a jhāna one's lineage is changed only to a jhānic state at the gotrabu moment; see, "Citta Vithi - Processing of Sense Inputs."
- However, if one who just became a Sotāpanna had developed any anāriya jhāna previously, then that $j h a ̄ n a$ could be easily converted to an Ariya jhāna with some practice. Unlike an anāriya jhāna, an Ariya jhāna cannot be broken even if one forcefully tries to generate a sensual/hateful thought. Thus, for someone who has had jhānic experiences this may be a clue.
- Also, if one can get into the fourth Ariya jhāna, that means one is at least a Sotāpanna; probably an Anāgāmū.
- Another way is to contemplate whether one is capable of doing any acts that could lead to rebirth in the ap $\bar{a} y \bar{a}$ (the four lowest realms). If one has ingrained characteristics or habits (gathi) of an animal, then it is likely that person will be born animal of that character. If one has extreme hate, and is capable of plotting to bring harm to other people, then that person may be destined to the niraya. If one does not have any of such extreme greed, hate, and ignorance, then one may be free of the $a p \bar{a} y \bar{a}$, i.e., one is likely to be a Sotāpanna.
- However, unless one is subjected to extreme pressures, it may not be possible to discern whether one has removed such "apāyagāmī gathi." It is easier to live a moral life when one has enough resources and when nothing unexpected happens. But there are instances when perfectly "moral people" commit murders in a moment of rage.
- The Sotāpanna stage is attained purely via attaining Sammā Ditthi, and removing 5 of the 12 possible akusala citt $\bar{a}: 4$ lobha citt $\bar{a}$ associated with micchā ditṭhi and the vicikicchā citta that arises out out ignorance of the true nature of "this world." All these 5 citta are removed via just comprehending anicca, dukkha, anatta to a certain extent; see, "Akusala Citta - How a Sotāpanna Avoids Apayagami Cittas."
- Thus if one has any ESTABLISHED (niyata) wrong views (see, "Ten Immoral Actions (Dasa Akusala) ${ }^{\prime}$ ), then it is unlikely that one is a Sotāpanna. Attaining the Sotāpanna stage is not possible until one sees the "unfrutiful nature" of existence anywhere in the 31 realms; and that is not possible if one has ruled out rebirth or the existence of other realms; see, "Ten Immoral Actions (Dasa Akusala)."
- Also see, "How Does One Know whether the Sotāpanna Stage is Reached?" for more details.

7. Many people believe it is necessary to meditate a lot to attain the Sotāpanna stage. While it is beneficial to meditate, one can in principle be a Sotāpanna without doing any FORMAL meditation. I have given some examples from the time of the Buddha in \#4 above; however, such cases are rare these days.

- There are basically two steps to get rid of lobha, dosa, moha or to attain Nibbāna: "Dassanena pahathabba" (removal by vision or the "ability to see") comes first; that is what is necessary to attain the Sotāpanna stage.
- However, in order to accomplish "Dassanena pahathabba" or "to see clearly", one needs to realize what the Buddha meant by "suffering", which comes in two types. This is described in detail - starting with the first type of suffering that can be eliminated in THIS LIFE - in the "Living Dhamma" section.
- Various stages of Nibbāna are attained as lobha, dosa, moha are removed in stages. One attains the Sotāpanna stage via "dassanena pahathabba" ie., one removes those 5 akusala cittā associated with "wrong views" via discerning the true nature of "this world of 31 realms", i.e., anicca, dukkha, anatta.
- Then, a Sotāpanna can remove the remaining 7 akusala citta in three stages via meditation, i.e., "bhavanaya pahathabba" and attain the higher stages Nibbāna.
- Of course, it is good to meditate before the Sotāpanna stage; it will be beneficial to calm the mind and to contemplate on anicca, dukkha, anatta. But the "bhāvan $\bar{a}$ " or meditation that is needed for the Sotāpanna stage cannot be restricted to formal meditation because moral conduct or "sīla" sets the necessary environment for the mind to "clearly see" by reducing pancanivarana; see, "Living Dhamma."

Next, "Why a Sotāpanna is better off than any King, Emperor, or a Billionaire",

### 7.4.4 Sotāpanna Anugāmi and a Sotāpanna

Revised July 27, 2017; January 15, 2018; September 22, 2018; September 26, 2018; February 3, 2019; February 13, 2019; January 28, 2020; April 13, 2020; August 11, 2021; July 18, 2022 (\#5 added)

Here we discuss the difference between a Sotāpanna and one striving for the Sotāpanna stage. The latter is on the right path (a Sotāpanna Anugāmi).

## Who Belongs to the Sañgha

1. The word sangha nowadays refers to the bhikkhus. Yet Sangha is "say" + "gha," or those who have either gotten rid of or are on the way to getting rid of "say." By that definition, one does not have to be a bhikkhu to belong to the sañgha; see, "What is "San"? Meaning of Sansāra or Samisāra."

In the salutation to the sañgha, they are referred to as "attha purisa puggalā." See. "Supreme Qualities of Buddha, Dhamma, Sañgha." Here, "attha" is eight, "purisa" does not mean male, but one with higher virtues and "puggalä" is a person. Thus there are eight types of people belonging to the sañgha. Who are the eight?

- There are four who have started on the Noble Path/fulfilled the conditions for the four stages of Nibbāna: Sotāpanna Anugāmi, Sotāpanna, Sakadāgāmi Anugāmi, Sakadāgāmi, Anāgāmi Anugāmi, Anāgāmi, Arahant Anugāmi, and Arahant. Four of those are in the Anugāmi stages (working toward a given stage,) and the other four have reached their respective stage.
- A special kamma and kamma vipāka happens for Noble kammä (efforts toward a given stage.) Once "what needs to be done" is fulfilled, the vipāka follows in the next citta within a second. Thus when one gets into the Sotāpanna magga citta, for example, one receives the Sotāpanna phala in the next citta. Thus one becomes a Sotāpanna in two consecutive thought moments.
- However, when one starts grasping the Tilakkhana (anicca, dukkha, anatta), one becomes a Sotāpanna Anugami (one on the way to attaining the Sotāpanna stage). Thus one becomes free of the apāyā. In later commentaries, they are also called "Cūla Sotāpanna" or a "junior Sotāpanna."

## Abhidhamma Explanation

2. The citta vīthi for a magga phala is discussed at the end of the post, "Citta Vithi - Processing of Sense Inputs":

B B B "BC BU MD P U A G Pa Fr Fr" B B B
[(B) Upaccheda (Arrest Bhavañga), (MD) Manodvāra Āvajjana (Mind Averting), (P) Parikamma (Preparation), (U) Upacāra (Close Proximity), (A) Anuloma (Conformity), (G) Gotrabu (Change of Lineage), (Pa) Path (magga), and (Fr) Fruit (phala).
$\bar{a}$ vajjana : 'advertence' of the mind towards the object, forms the first stage in the process of consciousness (s.viññaña-kicca). If an object of the 5 physical senses is concerned, it is called 'five-door advertence' (pañca dvārāvajjana); in the case of a mental object, 'mind-door advertence' (manodvārāvajjana).
parikamma: [nt.] arrangement; preparation; preliminary action; plastering.
upacāra : [m.] neighbourhood; preparative or preliminary action.]

- A Sotāpanna Anugāmi is getting closer to the "change of lineage" or G. The earlier stages of P, U, A, may be reached gradually. Once that level of comprehension is complete, one makes that transition (G), completes the lokuttara kamma, and immediately receives the phala.
- In a strict sense, it may be better to call one a Sotāpanna Magga Anugāmi (one trying to get to the magga citta) rather than Sotāpanna Anugāmi.
- The eight Noble Persons (Ariyā) are listed in the "WebLink: suttacentral: Pathama Puggala Sutta (AN 8.59)" and in "WebLink: suttacentral: Puggala Sutta (AN 9.9)." In both suttā, Sotāpanna Anugāmi is listed as "sotāpatti phala sacchikiriyāya pațipanno." One on the way to become an Anāgāmi is "anāgāmi phala sacchikiriyāya paṭipanno," etc. In the second sutta, a average human is a "puthujjano."

## The Eight Noble Persons

3. Thus it is clear that "attha purisa puggalā" consists of the eight Ariyā (Noble Persons) listed in \#1. They are Sotāpanna Anugāmi, Sotāpanna, Sakadāgāmī Anugāmi, Sakadāgāmī, Anāgāmī Anugāmi, Anāgāmī, Arahant Anugāmi, and Arahant.

- A critical point to note is the change from being an "average human" (puthujjana) to the Noble Person (Ariya) status. That transition happens at the "gotrabu" ("gotra" is the clan or lineage) before the Sotāpanna magga/phala transition. See the "Citta Vīthi for Attainment of Magga Phala" section at the end of the post, "Citta Vithi - Processing of Sense Inputs." Also, see "Sotāpanna Anugāmi - No More Births in the Apāyā."
- The types of $\bar{a} s a v \bar{a}$ eliminated at each stage are discussed at "The Way to Nibbāna - Removal of Āsavā."
- How lobha, dosa, moha, and also the ten fetters (samyojana) removed at each stage are discussed in "Relinquishing Defilements via Three Rounds and Four Stages."
- Both a Sotāpanna Anugāmi and a Sotāpanna would have "Sotāpatti Anga - The Four Qualities of a Sotāpanna."

## The Stages of Magga Phala

4. A Sotāpanna Anugāmi/Sotāpanna is someone who has seen Nibbāna, not the full Nibbāna, but a glimpse of it. One becomes a Sotāpanna Anugāmi when one removes avijjā (ignorance) about the actual status of affairs in "this world of 31 realms"; see \#5 below. With that understanding, their mind is purified to the extent that it will not allow them to do an immoral act that could lead to a birth in the four lower worlds (apāy $\bar{a})$. Not only that, but one will also not "latch onto" a kamma vipāka resulting from such a robust immoral act in the past. Thus, an Ariya above Sotāpanna Anugāmi will never be born in an apāya again.

The other three stages have similar "demarcation thresholds."

- A Sakadāgāmī will never again be born in the human or lower four realms. They can still be born in the deva worlds (i.e., in kāma loka.) But those devas do not have "flesh and blood" bodies that lead to physical discomforts and diseases. In the deva loka, beings have subtle bodies that are not subject to old age and diseases.
- An Anāgāmī has overcome any desire to be born anywhere in the kāma loka, i.e., the 11 lowest realms. They have no kāma rāga (desire for sense pleasures) or paṭigha (hate).
- An Arahant has no desire to be born anywhere in the 31 realms and thus will never be reborn "in this world." They have attained full Nibbāna, full release.

5. Subsection 1.1.55. Āsavakkhayañānaniddesa (toward the end of the "WebLink: suttacentral: 1.1. Ñānakath $\bar{a}$ (Ps 1.1)" section) of the Tipitaka Commentary "Pațisambhidāmagga" describes three types of $\tilde{n} \bar{a} n a$ attained on the way to the Arahanthood: "Anaññātañnassāmītindriyaì kati ṭānāni gacchati, anñ̄indriyam̀ kati ṭhānāni gacchati, aññātāvindriyaì kati ṭhānāni gacchati? Anaññātañnassāmītindriyam ekà̀ ṭhānaì gacchati-sotāpattimaggaì. Añ̃̃indriyamं cha ṭhānāni gacchati-sotāpattiphalaì, sakadāgāmimaggaì, sakadāgāmiphalaì, anāgāmimaggaì, anāgāmiphalaì, arahattamaggaì. Añ̃̄̄̄tāvindriyam ekaì ṭhānaì gacchati-arahattaphalaì."

- It says the following. The first ñaña is Anaññātañnassāmītindriya attained at the Sōtapanna Anugāmi stage. The second one, Añ̃nindriya, is attained and optimized at the intermediate six stages (sotāpattiphala through arahattamagga.) The third one, Añ̃̄ātāvindriya, is attained at the Arahant phala moment.
- Thus, something definitive occurs when one gets to the Sōtapanna Anugāmi stage.

## It Is a Step-by-Step Process

6. One must first hear the Buddha's real message before one can fulfill the conditions to attain the Sotāpanna stage. Thus, they need to go beyond the mundane eightfold path; see "Buddha Dhamma - In a Chart."

- In particular, a Sotāpanna Anugāmi (or Sotāpanna Magga Anugāmika or Sotāpanna Magga Anugāmi) has heard about anicca, dukkha, anatta (Tilakkhana), or the "true nature of this world with 31 realms." Of course, those concepts must come from a Noble Person who has grasped the basic idea.
- That is why the association with a "kalyāṇa mitta" or "kalyāṇa mitra" (basically a "Noble friend," i.e., an Ariya) is a pre-condition for attaining the Sotāpanna stage; see, "Four Conditions for Attaining Sotāpanna Magga/Phala."
- Once attaining the Sotāpanna anugāmi, one becomes a Noble Person (one of the atttha purisa puggala), and thus is free from the apāy $\bar{a}$, see "Sotāpanna Anugāmi - No More Births in the Apāyāa."

## Difference Between Sotāpanna Magga Anugāmi and a Sotāpanna

7. Let us take a simile to see this "demarcation" between Sotāpanna Magga Anugāmi and a Sotāpanna.

- Suppose that a precious treasure is known to be at the peak of a mountain. But it is not generally known where that mountain is. That is pretty much the status of Buddha Dhamma today. Most people know that it is valuable but they do not know what the correct version among the many different versions put forth today.
- As the Buddha said in his first sermon, "my Dhamma has not been known to the world before." Thus one needs a Buddha or a true disciple of Buddha to show them what Nibbāna is and how to get to the Sotāpanna stage. That is an essential and critical point.
- Suppose someone gets directions to the correct mountain with the treasure. Then they know which country to go to and which geographic location in that country the mountain is. This person is like one on the path to becoming a Sotāpanna, i.e., a Sotāpanna Magga Anugāmi. They know exactly where to go and have a detailed map. And they have to get it from a Buddha or a true disciple of a Buddha. A true disciple has at least seen the mountain (a Sotāpanna), if not been to the top (an Arahant).
- Now they make the journey to the country and region where the mountain is. On the way there, they can verify the landmarks given by the "friend" (an Ariya). Similarly, a Sotāpanna Magga Anugāmi spends time contemplating the newly learned concepts of anicca, dukkha, anatta, Paticca Samuppāda, etc.
- Thus, with confidence, the person gets closer and closer to the mountain and starts seeing the mountain at some point. At that point, the person has "crossed the boundary" to become a Sotāpanna. They have seen a glimpse of Nibbāna for the first time. Now they can complete the journey without any help, even if the physical map is lost (i.e., even in a future life).

## An Analogy

8. Going back to the simile of the mountain with treasure, different versions of "Buddhism" identify the mountain as being in different geographic locations. So people travel long distances and much effort to reach various mountains. All these are in remote places, and the journey is hard.

- Many people are wasting their time and effort targeting the "wrong mountain." So, how does one know which "mountain" or version to pick? That is why it takes effort to weed out the wrong/incompatible versions of Buddha Dhamma; see, "Why is it Critical to Find the Pure Buddha Dhamma?."

## Grasping the Anicca (Unfruitful) Nature of This World

9. In technical terms, one gets to the Sotāpanna magga/phala when one understands anicca, dukkha, and anatta (the three characteristics of this world or Tilakkhana) to a minimum level, where one begins to realize that there is nothing in "this world" that can provide meaningful and unconditioned happiness.

- When one comprehends anicca, dukkha, and anatta to the extent that one can "see" this concept, one is said to have the "anuloma ñäna." Here, "anu" means "through the understanding of Tilakkhana," "lo" means "craving for worldly things," and " $m a$ " means "removal," and thus "anuloma" means "removal of craving for worldly things to some extent via the comprehension of Tilakkhana."
- We came across "anu" also in "anupassanā"; see, "4. What do all these Different Meditation Techniques Mean?." In a previous post, I also discussed how "lobha" comes from "lo" + "bha" or "immersed in craving for worldly things."
- Thus it makes a huge difference if one incorrectly interprets anicca as "impermanence" and anatta as "no-self"; see, "Anicca, Dukkha, Anatta - Wrong Interpretations."

10. Suffering is prevalent in the lower four realms (apa$y \bar{a})$. We can see at least one of those, the animal realm. Let us discuss one way to contemplate anicca, dukkha, and anatta using an example from this life.

- When young, it seems like one can get anything one wants by working hard. But we all have seen how our parents, grandparents, or even famous people spent their old age suffering from various ailments, and finally dying helplessly.
- They may have "accomplished" many things. But they spend their whole lives working hard to achieve those, and then they have to leave it all behind.
- One may have a beautifil body when young, but for how long? We can see how that old movie star ages now. Some of them commit suicide because it is depressing to remember the "good old days" when one had all the attention in the world, but now it all seems to be slipping away.
- That is anicca and anatta. No matter how much we try, whatever we gain in this world lasts only a short time (in the sansäric time scale), and one becomes helpless in the long run. At some point, one realizes this and becomes distraught.

## One Creates One's Own Future Suffering

11. When one comprehends the true nature of this world, such sad thoughts do not arise. People who follow the Path and even those who have wisdom from previous lives (gati) can realize that "all things in this world" are subjected to this arising/destruction process. Beings come to existence and die. But those existence are "created" by oneself. See, "Origin of Life - One Creates One's Own Future Lives."

- That understanding itself leads to ease of mind. A stronger version of this "ease of mind" is the "anuloma khanti" that one experiences when attaining the "anuloma ñana" (pronounced "anuloma gnana"). [anulomikāya khantiȳ samannāgata (being of gentle and forbearing disposition)]
- The key to attaining the "anuloma ñāna" is to realize the fleeting nature of anything in this world. The next post discusses this.

## Anuloma Nāạa and Sammatta Niyāma

12. With the "anuloma ñāna," one realizes that permanently getting rid of suffering is impossible anywhere in the 31 realms. It can be achieved only by attaining Nibbāna. By this time, one has felt the nirämisa sukha, and thus one needs to cultivate, "etaim santaim etaim paṇitam...." the release one has felt, and the value of Nibbāna. Then one truly embarks on the Noble Eightfold Path and is said to get to "sammatta niyāma" and to Sotāpanna phala. [""etaì santaì etai் pan̄̄̀taì yadidamं sabbasañkhārasamatho sabbūpadhipaținissaggo taṇhākkhayo virāgo nirodho Nibbānan'ti." WebLink: suttacentral: AN 9.36: Jhānasutta, WebLink: suttacentral: AN 10.6 : Samādhisutta, WebLink: suttacentral: AN 3.32 : Ānandasutta, WebLink: suttacentral: AN 11.8 : Manasikārasutta, WebLink: suttacentral: AN 11.7 : Saññāsutta, WebLink:
suttacentral: AN 10.60 : Girimānandasutta] [It is peaceful, it is serene, the expelling of all sañkhāra, breaking of bonds, removing greed and hate; Nibbāna] [sammatta: [abstr. fr. samm $\bar{a}]$ the 'state of rightness', are the 8 links of the 8 -fold Path.]

- Therefore, it is critical to realize BOTH the unfruitful nature of this world with "anuloma $\tilde{n} a \overline{n a}$," AND to realize the value and cooling down due to Nibbāna, i.e., "sammatta niyāma."
- Further details in the post, "Anuloma Khanti and Sammattaniyāma - Pre-requisites for a Sotāpanna."

13. Thus it is critical to understand that Nibbāna is "nicca, sukha, atta," after realizing that this world is "anicca, dukkha, anatta." A Sotāpanna has understood both.

- Anything in this world (except nāmagotta) is a sañkhata, i.e., it comes into being due to causes, stays in existence for a time, and then inevitably is destroyed. The arising of a sankhata is called " $u d a y a$ " in Pāli, and the destruction is called "vaya." Thus, "udayavaya ñāna" is the knowledge about that process.
- Nibbāna is the only asañkhata. Removal of all causes leads to Nibbāna.
- Many people have even attained the Arahanthood without actually having heard about these terms like "udayavaya" or "anuloma." Thus it is imperative to realize that just reading about these concepts does not get one anywhere. One needs to "see" the Tilakkhaṇa or the unfruitfulness of craving for sañkhata (through sañkhāra) by true meditation or contemplation.
- Thus a Sotāpanna has the udayavaya (sometimes called udayabbaya) ñāna; see, "Udayavaya Ñāna."

Next, "Four Conditions for Attaining Sotāpanna Magga/Phala",

### 7.4.5 Sotāpanna Anugāmi - No More Births in the Apāyā

## February 11, 2019; revised February 12, 2019; September 4, 2019; April 12, 2020; major revision August 29, 2022

A human who attains a magga phala will never be reborn in an apāya (one of the four lowest realms). An Arahant will not be reborn in any realm. An Anāgāmī will be reborn only in a Brahma realm. A Sakadāgāmī is born only in a deva realm. A Sotāpanna only in deva or human realm. A Sotāpanna Anugàmi is also free of the apa$y \bar{a}$. Here, we discuss the evidence from the Tipitaka that is indeed the case.

## Eight Types of Noble Persons

1. The "WebLink: suttacentral: Patipanna Sutta (SN 48.18)" describes the eight types of Noble Persons:
"Pañcimāni, bhikkhave, indriyāni. Katamāni pañca? Saddhindriyamं ... pe ... paññindriyaìm-imāni kho, bhikkhave, pañcindriyāni. Imesaì kho, bhikkhave, pañcannaì indriyānaì samattā paripūrattā arahamं hoti, tato mudutarehi arahattaphalasacchikiriyāya patipanno hoti, tato mudutarehi anāgām̄̄ hoti, tato mudutarehi anāgāmiphalasacchikiriyāya paṭipanno hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sakadāgāmiphalasacchikiriyāya paṭipanno hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi sotāpattiphalasacchikiriyāya pațipanno hoti. Yassa kho, bhikkhave, imāni pañcindriyāni sabbena sabbaì sabbathā sabbaì natthi, tamahaì 'bāhiro puthujjanapakkhe ṭhito'ti vadāmī"ti.

## Translated:

"Bhikkhus, there are five indriya (faculties): Saddhindriya, vīriyindriya, satindriya, samādhindriya, pañnindriya. Someone who has fully cultivated them is Arahant. One who developed them less is an Arahant Anugāmi. One who has even less is an Anāgāmī,.. Anāgāmī Anugāmī, ..Sakadāgāmī, ... Sakadāgāmī Anugāmi, ...Sotāpanna, ...Sotāpanna Anugāmi. Those who have not yet begun to cultivate the five faculties are ignorant humans (puthujjanabhūmiim) who are unaware of the true nature (Tilakkhaṇa).

- One on the way to becoming an Anāgāmī is "anāgāmī phala sacchikiriyāya pațipanno," etc. One on the way to become a Sotāpanna (or Sotāpanna Anugāmi) is "sotāpattiphalasacchikiriyāya patipanno."
- The eight Noble Persons (Ariyā) are also listed in other suttā too including "WebLink: suttacentral: Pathama Puggala Sutta (AN 8.59)" and in "WebLink: suttacentral: Puggala Sutta (AN 9.9)."

## Sotāpanna Anugāmi is Dhammānusārī or Saddhānusārī

2. An important way of classification of the Noble Persons (Ariy $\bar{a}$ ) relevant to our topic is given in the "WebLink: suttacentral: Tativasankhita Sutta (SN 48.14)":
"Pañcimāni, bhikkhave, indriyāni. Katamāni pañca? Saddhindriyamं ... pe ... paññindriyaìm-imāni kho, bhikkhave, pañcindriyāni. Imesamं kho, bhikkhave, pañcannaì indriyānaỉ samattā paripūrattā arahamं hoti, tato mudutarehi anāgāmī hoti, tato mudutarehi sakadāgāmī hoti, tato mudutarehi sotāpanno hoti, tato mudutarehi dhammānusārī hoti, tato mudutarehi saddhānusārī hoti. Iti kho, bhikkhave, paripūraì paripūrakārī ārādheti, padesaì padesakārī ārādheti. 'Avañjhāni tvevāham், bhikkhave, pañcindriyānı̄̀ti vadām $\vec{\imath} t t i$.

## Translated:

"Bhikkhus, there are five indriya: Saddhindriya, vīriyindriya, satindriya, samādhindriya, paññindriya. One who has fully cultivated them is an Arahant. One who developed them less is an Anāgāmī,.. Sakadāgāmī, ...Sotāpanna, ..dhammānusārī, ...saddhānusār̄̄, ."
3. From \#1 and \#2 above, we can see that a Sotāpanna Anugāmi is either a dhammānusārī or a saddhānusārī.

- This is confirmed in the following sutta, which also confirms that one MUST start comprehending the anicca nature to become a Sotāpanna Anugāmi.

## More on Dhammānusārī or Saddhānusārī

## 4. From the "WebLink: suttacentral: Cakkhu Sutta (SN 25.1)":

"Cakkhumं, bhikkhave, aniccam viparin̄āmi añnathābhāvi; sotaì aniccam viparināmi añ̃athābhāvi; ghānaì aniccaì viparin̄āmi añnathābhāvi; jivhā aniccā vipariṇāmi añnathābhāvī; $k \bar{a} y o$ anicco vipariṇāmi aññathābhāvi; mano anicco vipariṇāmī añnathābhāvī. Yo, bhikkhave, ime dhamme evaì saddahati adhimuccati-ayaì vuccati saddhānusārī, okkanto sammattaniyāmaím, sappurisabhūmim okkanto, vītivatto puthujjanabhūmimं; abhabbo tai் kammai் kātu்̇, yai் kammaï katvā nirayaì vā tiracchānayonim vā pettivisayaì vā upapajjeyya; abhabbo catāva kālaì kātumं yāva na sotāpattiphalaì sacchikaroti.

Yassa kho, bhikkhave, ime dhammā evai் paññāya mattaso nijjhānai் khamanti, ayamं vuccati: 'dhammānusārī, okkanto sammattaniyāmaì, sappurisabhūmim okkanto, vītivatto puthujjanabhūmim; abhabbo taì kammaì kātum, yaì kammaì katvā nirayaì vā tiracchānayonim vā pettivisayam va upapajjeyya; abhabbo ca tāva kālain kātumin yāva na sotāpattiphalam sacchikaroti'.

Yo, bhikkhave, ime dhamme evaï pajānāti evaï passati, ayaì vuccati: 'sotāpanno avinipātadhammo niyato sambodhiparāyano'"ti.

## Translated:

"Bhikkhus, cakkhu is of anicca nature, will cease to exist and is subject to unexpected change during its existence (same for sota, ghāna, jivhā, kāyo, mano).

- One who belives these phenomena are this way is called a faith-follower (saddhānusār $\bar{r}$ ). $\mathrm{He} / \mathrm{She}$ has entered the Noble plane (sammattaniyāmaì), has entered the realm of Noble Persons (sappurisabhūmimi), and transcended the realm of the humans who are unaware of the true nature (puthujjanabhūmim). He is incapable of doing any deed by which he might be reborn in hell, in the animal womb, or in the realm of hungry ghosts. A saddhānusār $\bar{\imath} \bar{i}$ is incapable of dying (separating) from that Noble birth until he realizes the Sotappanna stage (and thus eventually gets to the Arahant stage).

After pondering with wisdom, one who has accepted that these phenomena are this way is called a Dhamma-follower (dhammānusār $\bar{\imath}$ )..." (The rest is the same as for a saddhānusār $\overline{\mathrm{I}}$ ).

One who knows and sees that these phenomena are this way is called a Sotāpanna. He is never again to be born in the $a p \bar{a} y \bar{a}$, headed for the Arahanthood."

- Notes that 11 suttā (AN 25.1 through AN 25.10) state the same in various ways.

## Sotāpanna Anugāmi Would Not "Die" From Ariya Birth

5. Therefore, from the above sutt $\bar{a}$, we can make the following deductions:

- A Sotāpanna is never again to be born in the apāyā and is headed for Arahanthood.
- A Sotāpanna Anugāmi is either a dhammānusārī or a saddhānusārī.
- In \#4 above: "A saddhānusārī (or a dhammānusārī) is incapable of "dying" (separating) from that Noble birth until he realizes the Sotāpanna stage." That does not mean a Sotāpanna Anugāmi will attain the Sotāpanna stage within that lifetime. Once "born as a Noble Person" one will not die from that Noble birth, i.e., one WILL get to the Arahant stage without ever getting a rebirth in the apāyā.
- So, a Sotāpanna Anugāmi may be born many times a human until getting to the Sotāpanna stage (may even have many human bhava, each with many human $j \bar{a} t i)$.
- Once getting to the Sotāpanna stage, there would be only seven maximum number of "bhava" left, within which one WILL attain the Arahant stage.

## Who Have Avecca Pasāda?

6. Another sutta that provides more information is "WebLink: suttacentral: Pathamasaranānisakka Sutta (SN 55.24)." It is a long sutta, and a reasonably good translation at, "WebLink: accesstoinsight.org: Sarakāni Sutta: Sarakāni (Who Took to Drink)."

Here are the relevant verses, which again describe the types of Noble Persons:
(1). 'Mahānāma, take the case of a person endowed with unwavering devotion (avecca pasāda) to the Buddha (heva kho buddhe aveccappasādena samannägato hoti,) the Dhamma, the Sangha, and has attained the Arahanthood. By the destruction of defilements he has gained release through wisdom, in this very life. The man is entirely released from the hell-state, from rebirth as an animal. He is free from the $a p \bar{a} y \bar{a}$.
(2). "Take the case of another man. He has unwavering devotion (avecca pasäda) to the Buddha, the Dhamma, and the Sañgha. He has wisdom but has not yet gained full release, but has destroyed the five lower samiyojana (an Anāgāmi). Upon death, he will be reborn spontaneously in a Brahma realm where he will attain Nibbāna without returning from that world. That man is also entirely released from the $a p \bar{a} y \bar{a}$.
(3). "Take the case of another man. He has unwavering devotion (avecca pasāda) to the Buddha, the Dhamma, and the Sañgha. He has wisdom, but has not yet gained release. By destroying the first three samimojana $a n d$ weakening kāma rāga, patigha, and avijja, he is a Once-returner
(Sakad $\bar{a} g \bar{a} m \overline{\boldsymbol{u}}$ ), who will return once more to this $k \bar{a} m a$ loka. That man is entirely freed from the apāyā.
(4). "Take the case of another man. He is endowed with unwavering devotion (avecca pasäda) to the Buddha, the Dhamma, and the Sangha. He has the wisdom but has not gained release. By destroying three fetters, he is a Stream-Winner (Sotāpanna), not subject to rebirth in apāyā, assured of Nibbāna. That man is entirely freed from the apāy $\bar{a}$.

## Sotāpanna Anugāmi Does Not Have Avecca Pasāda

(5). 'Take the case of another man. He does not have unwavering devotion (avecca pasāda) to the Buddha (na heva kho buddhe aveccappasādena samannägato hoti,) the Dhamma, the Sañgha. He has not yet gained wisdom and has not gained release. But he has the following things to some extent: the faculty of faith, energy, mindfulness, concentration, wisdom (saddhā indriya, viriya indriya, sati indriya, samādhi indriya, paññā indriya). He understands with insight, at least moderately, the dhamma of the Tathāgata. That man does not go to apāyā.
(6). "Take the case of another man. He does not have unwavering devotion (avecca pasäda) to the Buddha, the Dhamma, or the Sañgha. He is not joyous and swift in wisdom and has not gained release. But he has the following things to some extent: the faculty of faith, energy, mindfulness, concentration, and wisdom (saddhā indriya, viriya indriya, sati indriya, samādhi indriya, pañ̃̄̄̄ indriya). He understands with insight, at least slightly, the dhamma of the Tathāgata.. He too will not go to the apāy $\bar{a}$.

## Sotāpanna Anugāmī is Also Free of $A p \bar{a} y \bar{a}$

## 7. Note that in \#6 above, for each of the four magga phala:

"Ayampi kho, mahānāma, puggalo parimutto nirayā parimutto tiracchānayoniyā parimutto pettivisayā parimutto apāyaduggativinipātā."
"..That man is entirely free... from the apāya."

- For the last two types (Sotāpanna Anugāmi):
"Ayampi kho, mahānāma, puggalo agantā nirayamं agantā tiracchānayonimं agantā pettivisayamं agantā apāyaí duggatim vinipātaì."
"..That man does not go to the apāyā."
- Taken together with the statements in the sutt $\bar{a}$ discussed above, that means the following. A Sotāpanna Anugāmi is also effectively released permanently from the apāy $\bar{a}$.

## What is Avecca Pasāda?

8. A key phrase in many of the suttā is avecca pasāda. It is frequently translated as "unwavering devotion," as in the above translation. But it has a deeper meaning.

- Pasāda means a combination of 'trust, faith, reverence."
- That comes when one understands the deeper meanings in Buddha Dhamma. In particular, when one starts comprehending Tilakkhaṇa, one can begin to see the unfruitfulness AND danger in trying to seek happiness in this world of 31 realms.
- Then one starts losing cravings ("ava" + "icca") for worldly things. We remember that anicca is "na icca"; see, "Anicca - True Meaning." [avecca :[adv.] certainly; definitely; absolutely; perfectly; having known.]
- Therefore, avecca pasāda or "unwavering faith" is connected to realizing the anicca nature or the "unsatisfactory nature" of worldly things. That craving for worldly things leads to suffering (dukkha). And that in the end, leads to one becoming helpless (anatta), especially when born in the ap $\bar{a} y \bar{a}$.
- One establishes avecca pasāda or "unwavering faith" in the Buddha, Dhamma, and Sanggha, when one starts to comprehend Tilakkhaṇa.

## Four qualities of a Sotāpanna

9. Four qualities of a Sotāpanna are in all suttā in the WebLink: suttacentral: Sotāpatti Sainyutta (SN 55.1 $\sim 55.74)$ of the Saimyutta Nikāya (SN). The "WebLink: suttacentral: Brahmacarivogadha Sutta (SN 55.2)" has a concise statement about the qualities or qualifications of a Sotāpanna.
"Catūhi, bhikkhave, dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo.

Katamehi catūhi? Idha, bhikkhave, ariyasāvako buddhe aveccappasādena samannāgato hoti: 'itipi so bhagavā arahaì sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro purisadammasārathi satthā devamanussānaì buddho bhagavā'ti. Dhamme ... pe ... sañghe ... pe ... ariyakantehi sīlehi samannāgato hoti akhaṇ̣ehi ... pe ... samādhisam̀vattanikehi. Imehi kho, bhikkhave, catūhi dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo"ti.

## Translated:

A Sotāpanna, never again to be born in the $a p \bar{a} y \bar{a}$, has acquired four qualities:
(1). He has avecca pasāda in the Buddha, i.e., he understands the following verse. "Itipi so bhagav $\bar{a}$ arahaì sammāsambuddho vijjācaranasampanno sugato lokavidū anuttaro purisadammasārathi satthā devamanussānaì buddho bhagavā'ti."
(2). He has avecca pasāda in the Dhamma, i.e., he understands the following verse. "Svākkhāto bhagavatā dhammo sandiṭthiko akāliko ehipassiko opaneyyiko paccattaim veditabbo viñ̃̄̄̄h $\begin{gathered}t i . " ~\end{gathered}$
(3). He has avecca pasāda in the Sangha, i.e., he understands the following verse. "Suppatipanno bhagavato sāvakasañgho, ujuppaṭipanno bhagavato sāvakasañgho, ñāyappatipanno bhagavato sāvakasañgho, sāmīcippaṭipanno bhagavato sāvakasañgho, yadidaí-cattāri purisayugāni atṭha purisapuggalā, esa bhagavato sāvakasañgho āhuneyyo pāhuneyyo dakkhineyyo añjalikaraṇīyo anuttaramं puññakkhettaì lokassā’ti."
(4). He has the Ariyakantha sīla of the noble ones. It comes with penetrating wisdom and is unbreakable. It leads to samādhi.,
"Ariyakantehi sīlehi samannāgato hoti akhaṇ̣dehi acchiddehi asabalehi akammāsehi bhujissehi viññuppasatthehi aparāmatṭhehi samādhisamंvattanikehi."
"Ariyakantehi [with agreeable to the Ariyā] sīlehi [with ethical conduct] samannāgato [endowed with] [endowed with noble's ethical conduct] hoti akhandehi [unbroken] acchiddehi [impeccable or faultless] asabalehi [spotless] akammāsehi [unmarred] bhujissehi [liberating] viññuppasatthehi [praised by sensible people] aparāmaṭ!hehi [not mistaken] samādhisaïvattanikehi."

## Recital Is Not Enough

10. We note that those first three verses are the same as those in the supreme qualities of the Buddha, Dhamma, and Sañgha; see, "Supreme Qualities of Buddha, Dhamma, Sañgha."

- Therefore, those verses are not just for recitation. They must be recited with UNDERSTANDING before any serious meditation session.
- From \#4 and \#5 above, we see that one gets a "Noble birth" when attaining the Sotāpanna Anugāmi stage. A Sotāpanna Anugāmi is one of the "attha purisa puggalā."

The four qualities of a Sotāpanna are discussed in "Sotāpatti Añga - The Four Qualities of a Sotāpanna." [añga : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

### 7.4.6 Four Conditions for Attaining Sotāpanna Magga/Phala

Revised March 22, 2016; Revised on September 22, 2017, June 28, 2019; November 4, 2021; November 25, 2021 (\#3); September 17, 2022

1. In many suttā, including WebLink: suttacentral: Sotāpattiphala Sutta (SN 55.55) and WebLink: suttacentral: Dutiva Sariputta Sutta (SN 55.5), the four requirements for someone to attain the Sotāpanna stage of Nibbāna are stated: "Cattārome, bhikkhave, dhammā bhāvitā bahulīkatā sotāpattiphalasacchikiriyāya samंvattanti. Katame cattāro? Sappurisasamisevo, saddhammassavanaì, yonisomanasikāro, dhammānudhammappatipatti."

- Association with "sappurisa (sath + purisa or "Noble friend," i.e., an Ariya)," sometimes called a "Weblink: en.wikipedia.org: kalyāna mittā" ("Kalyāna Mitra" in Sanskrit.)
- Listening to Dhamma discourses (while reading is enough to get to the Sotāpanna Anugāmi stage, listening is necessary to attain the Sotāpanna stage, see \#3 below).
- Act with Yoniso manasikāra (basic idea of anicca, dukkha, anatta, and Pațicca Samuppāda).
- Dhammanudhamma patipadā (following the Noble Path, which is beyond the mundane path; see, "What is Unique in Buddha Dhamma?."

When someone starts fulfilling the above conditions one becomes a Sotāpanna magga anugāmi (or Sotāpanna magga anugāmika); see, "Sotāpanna Anugāmi and a Sotāpanna."

- During this process, one removes three of the ten samyojana (or sanyojana or "mental bonds"). The ten bonds are those that bind one to the cycle of rebirth; see, "Relinquishing Defilements via Three Rounds and Four Stages."

2. It is imperative to understand what the Buddha meant by "my Dhamma has not been known to the world." Most people follow what they deem to be "Buddhism." I strongly advise reading the following posts and spending some time thinking about this issue:
"What is Buddha Dhamma?"
"Buddha Dhamma - In a Chart" and the discussion at "What is Unique in Buddha Dhamma?."

- As discussed in those posts, one becomes a Sotāpanna magga anugāmi after progressing on the mundane (lokiya) eightfold path. That is when one embarks on the Noble Eightfold Path.
- As I pointed out in many posts, one on the mundane path abstains from immoral deeds out of fear of bad outcomes. But when one starts comprehending Tilakkhana (anicca, dukkha, anatta), one starts avoiding such deeds because one sees the futility of such acts. What is the point in hurting others to acquire sensory pleasures that, in the end, do not provide any lasting happiness?

3. November 25, 2021: Previously, I had stated that one could learn about Tilakkhaṇa by reading these days. That is still true, and one could become a Sotāpanna anugāmi by listening or reading.

- I just listened to a recorded desanā by the Waharaka Thēro. This desanā is quite comprehensive and provides a detailed description of a sotadvāra citta vithi that is REQUIRED for attaining the Sotāpanna phala. It explains that a Sotāpanna anugāmi attains the Sotāpanna stage only while listening to a desanā by an Ariya (a Noble person, i.e., one with at least the Sotāpanna stage).
- A Sotadvāra citta vīthi of an Ariya (during a desanā) has the necessary javana power to act as a trigger. I am trying to find a Tipitaka reference, and I would appreciate receiving it from anyone who has that information. I will edit this post to include that reference when I see it.
- The javana power in such a sotadvāra citta vīthi is necessary to fulfill the requirement of saddhammassavanaiं (saddhamma + savanaim or "listening to Dhamma") as one condition, as in \#1 above. It is a deep analysis; I will try to write it when enough background material is covered.
- Here is the desanā in Sinhala language:

##  

- There is still an open question of whether a recorded desan $\bar{a}$ would fulfill the condition. In a separate desanā Waharaka Thēro has mentioned that listening to a recorded desana $\bar{a}$ should count, per his opinion.
- However, even if a Sotāpanna Anugāmi does not get to the Sotāpanna stage in this life, he/she WILL attain the Sotāpanna phala in a future life. A Sotāpanna Anugāmi is a Noble Person and is free of the apāyā; see, "Sotāpanna Anugāmi - No More Births in the Apāyā."

4. When one contemplates the above, one first needs to find out WHY the Buddha said: "this wider world of 31 realms" has much suffering. Sensory pleasures keep us bound to the kāma loka and often to the four $a p \bar{a} y \bar{a}$. That is the First Noble Truth.

- The Buddha also said that if one comprehends the First Noble Truth, one will automatically understand the other three. That essential vision or the first inkling of "Sammā Ditt hhi" is critical.
- One gets on the Noble Eightfold Path with a rough idea about this vision, i.e., anicca, dukkha, and anatta. Now one is a Sotāpanna Magga Anugāmi. As one comprehends these fundamental characteristics of our world while listening to a desanā by an Ariya, one will get to the Sotāpanna stage by attaining the Sotāpanna magga and Sotāpanna phala virtually simultaneously (in the same citta vīthi); see, "Sotāpanna Anugāmi and a Sotāpanna."
- When one gets to the Sotāpanna stage, one comprehends the First Noble Truth, and thus all four Noble Truths to some extent; one has "seen" Nibbāna. Now, one does not need any help to get to Nibbāna (to "fully experience it") because one sees the whole Path and knows how to get there.

5. With that in mind, it is easier to grasp why the Buddha emphasized the importance of those four conditions. First, since Buddha's message is unique, it has to come from a Buddha or "someone whose knowledge traces back to the Buddha." The following is an analogy given in the suttā.
6. The Buddha can be compared to a great tree, standing tall and firm. All other humans are like "climbers" that need a tree to "climb up." Such climbers do not have strong enough stems, so they cannot stand erect on their own. They need the support of another plant or a stick to stand. Those plants are called climbers. Climbers have tendrils to hold the supporting plant or a post. Following are some examples.

- Let us think of a forest with numerous climbers but only one tree and no other supports such as sticks. The only way for a climber to "climb up"would be to get hold of that tree.
- Only climbers close to the tree can get hold of it and climb. But now others can get hold of them and climb too. Thus, as more and more climbers start climbing, the "access area" grows.
- Therefore, if we can find a climber climbing up, we can ALWAYS trace it back to the original tree. In the same way, an Ariya or a Noble person (a Sotāpanna, Sakadāgāmī, Anāgām̄̄, or Arahant) can ALWAYS be traced back in lineage to the Buddha.
- Because the message is unique, it has to come from the Buddha himself or someone whose lineage is traceable to the Buddha. One cannot attain even the Sotäpanna stage without hearing the correct message. Someone aspiring to become an Ariya MUST hear that Dhamma from another Ariya; see "Buddha Dhamma - In a Chart."

7. Now, we can see the logic of the first two conditions. One has to learn Dhamma (the correct version), AND thus it has to come from an Ariya (Noble) person.

- The phrase "kalyāna miträ" is Sanskrit; in Pāli it is "kalyāna mitt $\vec{a} "$ (pronounced "miththā"), for "a friend who helps to remove defilements" ("kāla" is for "dirty" or "blackish" as in "dirty water" and "na" is for "removing").
- Many people take "kalyāna mitrā" to be a "good friend" in the conventional sense. But it is more than just "good"; one needs to know the message of the Buddha to convey it to others.
- And, of course, one has listened to this correct message or read about it and then GRASP it.

8. One time, Ven. Ānanda, who was the personal assistant to the Buddha for many years, in the end, approached the Buddha and said, "Bhante (Venerable Sir), I have been thinking that the future of the Buddha Sāsana (doctrine) must be dependent at least $50 \%$ on the kalyāṇa mittā." [kalyānamittā]

- The Buddha replied, "Ānanda, do not say that. The Buddha Sāsana will depend 100\% on the kalyāna mittā." Now we can see why. [WebLink: suttacentral: Samyutta Nikāya 3.18 Good Friends Kalyānamittasutta ]
- If that lineage breaks, then that is the end of the Buddha Sāsana. The words may still be there, but there will be no one to explain the true meanings of the keywords, including anicca, dukkha, and anatta.
- However, the Buddha has stated that his Buddha Sāsana will be there for 5000 years, so we are only halfway through. There would be periods of "famine" within which Ariyā would be few. But there will also be times when Buddha Sāsana will shine with numerous Ariyā in the world.
- The key here is once-in-a-while, a "jāti Sotāpanna" is born who has fulfilled his pāramitā to bring back the message of the Buddha-like Venerable Mahinda about 600 years after the Buddha. They are not only $j \bar{a} t i$ Sotāpannā, but have the "paṭisambhidā $\tilde{n} \bar{a} n a "$ " to figure out the true meanings of key Pāli words, such as anicca, dukkha, anatta, and Paticca Samuppāda.
- I believe this is such a time. It is still too early to discuss the details, but there many Ariyā in Sri Lanka and even in other countries, thanks in large part to Waharaka Thero: "Parinibbāna of Waharaka Thero."
- Many "climbers" worldwide have already started "climbing up." I am encouraged by emails from many reading this website on their joy in comprehending the "pure Dhamma."

9. The third condition is to "act with yoniso manasikāra." Here "yoni" means "origin," "so" means "oneself," and "manasikāra" here means "with this in mind."

- The Vibhangapakarana (Book 2, p. 234) explains ayoniso manasikāra as "perceiving anicca as nicca, dukkha as sukha, and anatta as atta." Thus acting with yoniso manasikāra requires comprehending anicca, dukkha, anatta.
- To state that briefly, if one believes that things in this world can provide happiness in the long run, then one acts with ayoniso manasikāra. To act with yoniso manasikāra is to see the unfruitfulness of these struggles to attain something that is not attainable, and thus to work diligently towards at least the Sotāpanna stage because this life is so short.
- But a more direct can be seen when one can see the "origins of various births or jāti" (i.e., rebirths). "Yoni" in Pāli and Sinhala means the birth canal; thus, yoniso manasikāra means the "understanding of origins": One with yoniso manasikāra knows the causes that lead to births in various realms, i.e., "bhava" and "jāti" are according to one’s gati; see, "Gati to Bhava to Jāti - Ours to Control."
- With that understanding, one will be motivated to cultivate "gati" to make good decisions, either automatically or by contemplating them. In other words, one can make better judgements about morality and act with pañña (wisdom).
- Even more importantly, one will automatically avoid those deeds that can lead to rebirth in the apa $\bar{a} \bar{a}$.
- Thus "Yoniso manasikāra" has a deeper meaning than just "appropriate attention." In particular, a Sotāpanna comprehends "pati + icca" leads to "sama+uppada"; see, "Paticca Samuppāda "Pati+ichcha"+"Sama+uppāda."

10. When meeting the first three conditions, one is set to fulfill the fourth, "dhammanudhamma patipadā." Here "dhammanudhamma" is "dhamma + anu + Dhamma" where "anu" means "according to." The second "Dhamma" is the Buddha Dhamma; the first is the "dhamma" that one follows. "Patipad $\vec{a} "$ is "procedure." Thus it means following the procedures in the correct and pure Buddha Dhamma.

- When one learns the true Dhamma from an Ariya (Noble) person, one begins to comprehend:
(i). what is meant by suffering (dukkha),
(ii). that suffering arises due to the anicca nature, and thus
(iii). one does not have any refuge anywhere in the 31 realms (anatta).
- Then one realizes that to seek the only refuge (att $\bar{a}$ ) of Nibbāna, one needs to act with yoniso manasikāra and follow the "dhammanudhamma patipadā."
- There is a series of four suttas, starting with the WebLink: suttacentral: Anudhamma Sutta (SN 22.39).
- Those sutta describe dhammanudhamma patipadā as living with a clear vision of the anicca, dukkha, and anatta nature of the pañcakkhandha (rūpa, vedanā, sañ̃n̄a, sañkhāra, viññāna).

11. As pointed out in "What is Unique in Buddha Dhamma?," dhammanudhamma patipadā or the 'Dhamma Path" starts with mundane sammā ditṭhi, or how to sort out immoral from moral. Then one gets
rid of the moha (deep delusion) that covers the mind, and the mind will be ready to grasp anicca, dukkha, and anatta.

- The second stage or the Sotāpanna phala moment, will result at some point.

12. Let us take an example to illustrate this concept.

One does not intentionally cut oneself, because one can see its harm. In the same way, moral people stay away from immoral acts because they can see the consequences of such wrong actions.

- We can thus see why it is comparatively easy to get on the mundane eightfold path.

13. The lokuttara eightfold Path is harder to see. One has to learn it from a Buddha or a true disciple of the Buddha.

- If someone enjoys tasty food laced with poison, digesting and bringing out its harmful effects will take time. So everyone is enjoying the food and having a good time.
- And then someone says, "this food has poison; the more delicious the food is, the more poisonous it is."
- Most people ignore that message. They cannot comprehend why this person is "trying to ruin the party." But a few people ask for more information and try to find out whether what this person is saying is true or not.
- Like that it is hard for most people to take the "long-term perspective" and investigate whether it is true that "it is not only fruitless but also dangerous" to be attached to the sensory pleasures of this world.

14. It is hard in the beginning to grasp this message. Even when one starts seeing the message (as one gets to the Sotāpanna magga anugāmi stage), initially it is hard to instill discipline. A good analogy here is that it is harder to resist scratching an itch, even though one may realize that it is not a good idea because one will make that a wound. The tendency is to "enjoy the scratching." In the same way, even when one starts seeing the dangers of the rebirth process, initially it is still hard to resist the sensory pleasure.

- The solution is to "put some ointment in the itch to calm it down"; in the same way, one can calm down the strong urges by reading/listening and contemplating Dhamma (thinking about consequences).
- And one should initially focus on the "big itches," and not try to take care of all "minor itches." As one gets relief from the "major itches" one can see the benefits and is motivated to follow the same procedure for other "itches" as well. Similarly, following the Path (especially the Sotāpanna magga anugāmi stage) is a gradual process. One needs to tackle the "bigger offenses" or get rid of the "worst habits (gati)" first.

Of course, one needs to have removed micchā ditthi even to become a Sotāpanna Anugāmi: "Micchā Ditthi, Gandhabba, and Sotāpanna Stage."

Next, "How Does One Know whether the Sotāpanna Stage is Reached?",

### 7.4.7 Sotāpatti Anga - The Four Qualities of a Sotāpanna

July 8, 2018; revised May 04, 2022; September 17, 2022; re-written September 18, 2022
Sotāpatti anga, or the four qualities of a Sotāpanna, are discussed in many suttas in the "Sotāpatti Samyutta" of the Saminutta Nikāya.

## Introduction

1. There are over 70 suttā in the "Sotāpatti Saminutta" that repeatedly state the four "characteristics/qualities" (Sotāpatti añga) that one can use to determine whether one has attained the Sotāpanna stage of Nibbāna. The series of suttā start with "WebLink: suttacentral: Cakkavattirāja Sutta (SN 55.1)." [añga : [nt.] 1. a constituent part; 2. a limb; 3. quality.]

- I was surprised to see that these four qualities of a Sotāpanna have not been discussed much in the current literature.
- Knowing them can help determine whether one has attained the Sotāpanna stage.

## Sotāpatti Ańga Associated With a Sotāpanna

2. The four qualities (or characteristics) of a Sotāpanna - who has attained the Sotāpanna phala - must not be confused with the four conditions that must be fulfilled to get to the Sotāpanna stage.

- Those four conditions can be found in "Four Conditions for Attaining Sotāpanna Magga/Phala."
- Those four conditions to attain the Sotāpanna stage are also called Sotāpatti añga sometimes; see, for example, "WebLink: suttacentral: Dutivasāriputta Sutta (SN 55.5)." On the other hand, the four qualities of a Sotāpanna are also listed as Sotāpatti añga in the "WebLink: suttacentral: Nandivasakka Sutta (SN 55.40)."
- Therefore, one must pay attention to which context the term Sotāpatti añga is used: whether to refer to the four conditions or the four qualities.

3. The four qualities of a Sotāpanna are stated succinctly in the "WebLink: suttacentral: Brahmacariyogadha Sutta (SN 55.2)." The Buddha asks: "Catūhi, bhikkhave, dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyaṇo. Katamehi catūhi?"

Translated: "Bhikkhus, the ariyasāvaka Sotāpanna, free of the apāyā, has four qualities. Which four?"
Then the Buddha gives the answer: "Idha, bhikkhave, ariyasāvako buddhe aveccappasādena samannāgato hoti: 'itipi so bhagavā arahaì sammāsambuddho vijjācaraṇasampanno sugato lokavid̄̄ anuttaro purisadammasārathi satthā devamanussānaì buddho bhagavātti. dhamme aveccappasādena samannāgato hoti... pe ... sañghe aveccappasādena samannāgato hoti... pe ... ariyakantehi sīlehi samannāgato hoti akhaṇ̣dehi ... pe ... samādhisam்vattanikehi. Imehi kho, bhikkhave, catūhi dhammehi samannāgato ariyasāvako sotāpanno hoti avinipātadhammo niyato sambodhiparāyano"ti. [Four Qualities in Bold Orange Colour.]

Translated: "A Sotāpanna has reverence/faith (pasāda) in the Buddha, Dhamma, Sangha, that comes via losing deep-rooted cravings for things in this world (avecca). He is thus established in the ariyakānta sīla (moral conduct of the Noble Persons) that cannot be broken to make him/her do apāyagāmi actions $(\mathrm{kamma})$. These are the four defining characteristics of a Sotāpanna free of the apāyā." $[\boldsymbol{a v e c c a}=a v a$ (to overcome) $+i c c a$ (liking or craving)]

- First, we note that the "Supreme Qualities of Buddha, Dhamma, Sangha" are listed in this sutta. Only the nine qualities of the Buddha are listed above in red. In the full sutta, the qualities of the Dhamma and Sañgha are also fully listed.

## Aveccappasāda and Ariyakānta Sīla

4. To fully understand this description of a Sotāpanna, we need to understand the meanings of two keywords: aveccappasāda and ariyakānta sīla.

- I have not seen aveccappasäda discussed in English texts; where it is mentioned, it is described as "unwavering confidence."
- But the reason for that unwavering confidence is itself hidden in that word. That is called "pada nirutti," (in the Sinhala language, "pada nirukti"), i.e., the word's meaning is in the word itself. Let us discuss that hidden meaning now.

## Ariyakānta Sīla = Unwavering Moral Conduct

5. Average humans - who are not yet Ariy $\bar{a}$ - highly value sensory pleasures. Most are even willing to do immoral actions to get more sensory pleasures. Even those "moral people" are addicted to enjoying sensory pleasures attainable by moral means without hurting others.

- However, that "moral conduct" is not guaranteed to hold. Even the most moral person WILL BE tempted to do an apāyagāmi action under sufficiently "enticing" or "tempting" conditions.
- When such a strong sensory input (temptation) comes, one who has not comprehended Tilakkhaṇa (in particular the anicca nature) WILL commit an apāyagāmi action at some point (in a future life, if not in this life).
- The "Unwavering/Unshakeable moral conduct" starts to grow as a Sotāpanna Anugāmi and is firmly established in a Sotāpanna.

6. It is impossible to have "Unwavering/Unshakeable moral conduct" until one comprehends how future suffering arises, i.e., Four Noble Truths/Paṭicca Samuppāda/Tilakkhaṇa. See "Paticca Samuppāda, Tilakkhana, Four Noble Truths."

- This is hard for many even to believe. They think their morality cannot be "broken." However, we hear such "moral people" committing heinous acts that we never thought they were capable of now and then. The "unbreakable morality" can be attained only by seeing the unfruitfulness/dangers in sensory pleasures.
- This is the uniqueness of Buddha Dhamma: It is possible to make one's mind NEVER to commit an apāyagāmi action (at the Sotāpanna stage) and NEVER commit a single dasa akusala at the Arahant stage.

7. Thus, a Sotāpanna's moral conduct is unbreakable FOREVER, even through future births. No matter how tempting the external sensory input is, a Sotāpanna will NEVER do an apāyagāmi action (kamma). No willpower is needed to enforce it. That mind has fully grasped the futility/danger in such actions.

- This unbreakable moral conduct of a Sotāpanna is called "ariyakānta sila." Kānta ("ka" $+" a n t a$ ") is the "cooled mindset" achieved via removing the two extremes ("anta") the Buddha rejected: excess sensory pleasures and excess hardship or extreme austerity.
- Ariyakānta sīla is established only in Ariyā, who have comprehended this unique message of the Buddha about how suffering arises in this wider world of 31 realms and how that future suffering can be stopped and a permanent state without suffering (Nibbāna) can be attained.
- Furthermore, the Pāli (and Sinhala) word for a vehicle is "riya", and the stopping of "riya" (sampāric vehicle/journey) is called "Ariya." One who has taken the wheels off the vehicle for the samsāric journey is called an "Ariya." See \#13 of "Nibbāna - Is it Difficult to Understand?" Buddha ("bhava uddha") has the same meaning: "A Buddhist or a Bhauddhayā?"

## Buddha's "Wider Worldview with Rebirth Process" Must be Understood

8. Without a Buddha explaining to us, it will be impossible to comprehend the widespread suffering in the wider world of 31 realms by ourselves.

- How many of us have watched (and enjoyed) television programs where a deer is eaten alive by a tiger? How painful is that experience for the deer? How much pain will a fish feel, dangling by a hook that pierced its mouth and unable to breathe?
- Our minds are programmed to think that animals are not living beings who can feel pain. But ALL living beings experience pain, perception (recognition), and many other mental qualities.
- In the Abhidhamma language, feelings (vedanā) and perception (sañ̃̃ā) are UNIVERSAL mental factors (cetasika) that arise with ALL thoughts of ANY living being.
- Suffering is everywhere. If we pay attention, we can see so much suffering, even among humans. We are unaware of much of the suffering in the wider world of the 31 realms. There is unimaginable suffering in the other three lowest realms and the animal realm.

## Step-by-Step Process - Prerequisites

9. However, the reasons (or causes) for such suffering cannot be understood without investigating (and then being convinced of) the laws of kamma that REQUIRES the rebirth process.

- This is why one cannot comprehend the deeper aspects of Buddha Dhamma without first getting rid of the ten types of micchā ditṭhi or the wrong views about this world of 31 realms.
- One who has not removed the ten types of micch $\bar{a}$ ditṭhi will have avijj $\bar{a}$ at the highest level, which is called moha. Therefore, even a prestigious scientist can have moha; it has nothing to do with "book knowledge." When one gets rid of those, one gets down to the avijja level; see, "Lobha, Dosa, Moha versus Raga, Patigha, Avijijā."

10. Once getting rid of the ten types of micchā dittthi, one can start to "see" (not with eyes, but with wisdom) that the real cause for suffering is tanh $\bar{a}$ (getting attached) that arises due to icc $\bar{a}$ (our liking for sensory pleasures). Furthermore, tanh $\bar{a}$ has origins in "icc $\bar{a} "$ or cravings.

- Again, this is the uniqueness of Buddha Dhamma. Whereas a normal human cannot imagine a "happy existence" without sense pleasures, an Ariy $\bar{a}$ sees the opposite: unfruitfulness and dangers in sense pleasures.
- The key to comprehending the dukkha sacca (First Noble Truth) and Tilakkhana is to see the suffering that is hidden sense pleasures. The worst kind of suffering arises when one does immoral things to access sense pleasures; that is what a Sotäpanna first realizes.
- Note: In both "icca" and "avecca" (or anywhere), the letter "c" is pronounced with the "ch" sound: ""Tipitaka English" Convention Adopted by Early European Scholars - Part 1."

## Nirāmisa Sukha and Aveccappasāda

11. When one starts to realize the truth at the Sotāpanna Anugāmi stage, one starts experiencing a different kind of "happiness," which is the nirāmisa sukha.

- The real cause of this nirāmisa sukha is the abstinence from sensory pleasures. Again, this is hard to explain and needs to be experienced.
- With that comes the realization of the value of a Buddha, unbreakable faith in him and a reverence for him. This is called aveccappasäda in the Buddha.

## Aveccappasāda = Ava Icca Pasāda

12. Now, we can see the true meaning of aveccappasāda: "ava" means to overcome, and iccā is liking or craving. These two words, when combined, rhyme as "avecca." Now, "pasāda" is reverence/faith. When the two words "avecca" and "pasāda" are combined, it rhymes as "aveccappasāda."

- It must be a truly exceptional person to discover such an unimaginable cause for the suffering in this world, and to find the way out of that suffering (by removing tanh $\bar{a}$ or"icc $\bar{a} "$ for worldly pleasures).
- This unbreakable faith/reverence for the Buddha comes from comprehending the dangers of "icc $\vec{a} "$ for worldly pleasures: "Buddhe aveccappasāda."

13. Of course, one will simultaneously have "Dhamme aveccappasäda," unshakeable faith in the Dhamma, the teachings of the Buddha, that allowed one to be free of the $a p \bar{a} y \bar{a}$.

- Furthermore, one will not be able to learn this unique Dhamma of the Buddha without the Sañgha, those Ariyā who have transmitted the true and pure Dhamma up to now. One could spend a lifetime learning "fake Dhamma" and will not be able to grasp the message of the Buddha. We are fortunate to learn the correct Buddha Dhamma, only because of the Sañgha, who have faithfuilly and correctly transmitted the Tipitaka over all these years.
- That realization leads to "San்ghe aveccappasāda," reverence/faith in the San̈gha.

## Sañgha and Bhikkhu

14. It is important to note that bhikkhus are not necessarily included in the Sangha. Only those eight Noble Persons (attha purisa puggala) are included in Sañgha; see "Supreme Qualities of Buddha, Dhamma, Sañgha."

- However, bhikkhus should always be treated with respect. They represent the Buddha Sāsana.
- As I understand, even a lay $A n a \bar{a} g a \overline{m i}$ should bow to any bhikkhu.

## "Seeing Anicca Nature" Is to Understand Paṭicca Samuppāda

15. The Buddha described two sets of Paṭicca Samuppāda (PS) for a reason. One set (different versions of Akusala-mūla PS) describes the origin of the world or the origin of suffering. The other one describes Kusala-mūla PS for the stopping of suffering.

- Comprehending the "Udayavaya Ñanna" means understanding those two processes. "Udaya" is the "arising (of world/suffering)" or the anuloma (forward) PS. "WebLink: suttacentral: Pathamabodhi Sutta (Ud 1.1)" "Vaya" is the "stopping of that process" or the patiloma (reverse) PS process. "WebLink: suttacentral: Dutivabodhi Sutta (Ud 1.2)"
- ANYTHING in this world can be stopped from arising. That means NOTHING in this world has any essence. They can only bring more suffering. Thus, one only becomes helpless (in the long run) if one pursues "worldly pleasures" with abhisañkhāra.
- The above two lists summarizes the anicca, dukkha, and anatta nature! That "seeing" or Sammā Dittthi comes just by comprehending the "wider worldview" of the Buddha. Details at "Worldview of the Buddha."

## Ariyakānta Sīla and Aveccappasāda Realized via Sammā Diṭthi

16. A Sotāpanna has the "unique vision" or Sammā Diṭthi in the Noble Eightfold Path. A Sotāpanna has seen the ultimate truth about this world. That is the "previously unheard" Dhamma of the Buddha.

- Thus, when a Sotāpanna comprehends this "hidden truth" about the real nature of this world, he/she will begin to see the danger of getting attached to sensory pleasures.
- That "drastic change in vision" will automatically generate faith and reverence in the Buddha, Dhamma, and the Sañgha, thereby generating aveccappasäda for them.
- This is why the Buddha, Dhamma, and the Sañgha are called the Triple Gems and are worthy of homage; see "Supreme Qualities of Buddha, Dhamma, Sañgha."
- However, a Sotāpanna cannot avoid normal sensory pleasures. Most live married lives. Only at the Anāgāmi stage will one give up the desire for sensory pleasures. See, "Vipallāsa (Ditthi, Saññā, Citta) Affect Sanikhāra."

### 7.4.8 Sammā Ditṭhi - Realization, Not Memorization

May 13, 2018; revised June 20, 2020; September 4, 2022

1. Sammā Ditṭhi (or comprehension of Tilakkhana) is the necessary first step to start on the Noble Eightfold Path. If one has gained Sammā Ditṭhi (i.e., if one is a Sotāpanna/Sotāpanna Anugāmi), one would have understood the Four Noble Truths and can "see" (not with eyes, but with pañña $\bar{a}$ the path to Nibbāna:

- One has "seen" that there would be much suffering in future lives (especially in the $a p \bar{a} y \bar{a}$ ), if one gets too attached to worldly things by assuming that they can provide lasting happiness (this is the comprehension of the anicca nature).
- The reason for such future suffering is immoral actions, speech, and conscious thinking ( $k \bar{a} y a$ and $v a c \bar{\imath}$ sañkhāra done with ignorance or avijjā). This is why the first step in Paticca Samuppāda is "avijja paccayā sañkhāra."
- One can stop future suffering from arising by controlling one's $k \bar{a} y a$ and vacī sañkhāra or staying away from dasa akusala.
- And the way or path to accomplish that is the Noble Eightfold Path.

Those are the Four Noble Truths.
2. We can analyze it differently by first discussing Nibbāna and Sotāpanna.

- The "WebLink: suttacentral: Nibbānapañhā Sutta (SN 38.1)" clearly describes Nibbāna as, "..ragakkhayo, dosakkhayo, mohakkhayo - idam vuccati nibbānanti." [SN 38.1 Nibbānapañhāsutta] That means Nibbāna is attained via removing greed, hate/anger, and ignorance from one's mind.
- However, the step-by-step procedure to attain Nibbāna involves four steps, which remove seven types of anusaya or mental fermentations that contaminate a mind. That will lead to the stopping of the four types of āsava; see, "The Way to Nibbāna - Removal of Āsavā": Diṭthāsava, kāmāsava, bhavāsava, and avijjāsava.

3. It is important to understand what anusaya or mental fermentations are, how they accumulate, and how they lead to grasping a new bhava at the moment of death.

- Let us take an example. When one keeps doing immoral things based on greed (hurting others, stealing, sexually misbehaving, etc. in order to satisfy that greed), then one's mind accumulates "anusaya of greedy type." "Mental fermentations" is a good translation for anusaya; it implies that the longer one keeps them, the more they get rotten.
- Another way to say that is to say one is cultivating "greedy gati."
- This can be compared to adding rotten things to a pool of water. Contamination gets worse with time. Still, the dirt may settle down at the bottom of the pool, and the water may look relatively clean.
- However, when the water in disturbed, say by stirring with a long stick, some contaminants will come to the surface; that is anusaya. How much comes to the surface (as āsava or cravings/temptations) depends on how hard the water is stirred, i.e., how strong the sense input is. Furthermore, even a slight stirring can bring dirt up to the surface if there is a lot of dirt.

4. Anusaya or mental fermentations are like mud at the bottom of the pool. When a mind has built up a lot of anusaya accumulating deep inside, it is easier for them to come to the surface (i.e., for cravings to come to the mind) when one receives a corresponding sensory input (seeing an attractive person, for example). This is asava or cravings. So, how one automatically responds in a given situation depends on those three parameters (gati, anusaya, āsava), which are interconnected: "Āsava, Anusaya, and Gati (Gathi)."

- Removal of the seven types of anusaya [dittthi, vicikicchā, kāma rāga, patigha, bhava rāga, māna, $a v i j j \bar{a}]$ (the same as removing corresponding gati) leads to the stopping of the four types of $\bar{a} s a v a$; see "Conditions for the Four Stages of Nibbāna."

5. The most important of the four āsava [kāmāsava, bhavāsava, ditṭhāsava, avijjāsava] is the ditṭthi anusaya. All other āsava are influenced by the wrong views one has. With the removal of ditṭthi anusaya at the Sotāpanna stage, $99+\%$ of all "mental junk" or "mental fermentations" disappear from the mind.

- This is why the Buddha said that a Sotāpanna had removed defilements comparable to the soil on the whole Earth. The remaining defilement due to all other types of anusaya is comparable to the amount of soil picked up by one's thumb.
- Therefore, one needs to get a clear idea of what is meant by Nibbāna and to see why that necessarily means getting out of the rebirth process. The rebirth process is filled with so much suffering in the apayy $\bar{a}$. The Buddha said that any given living being spends most of the rebirth process in the apāy $\bar{a}$.

6. Therefore, the first, and most important step towards attaining Nibbāna is to remove dittthi anusaya that builds up over time due to wrong views, at which time three types of samyojana are also removed; see, "Conditions for the Four Stages of Nibbāna":

- The removal of diṭthi anusaya leads to the removal of ditṭhāsava and "vicikicchā anusaya."
- Simultaneously, the three samiyojana (sakkāya diṭthi, vicikicchā, sīlabbata parāmāsa) disappear.
- We will discuss these in the next post.
- They are all removed by the "right vision." It is called "dassanena pahātabbă" or "removal via right vision."

7. The hardest part to understand is what is meant by the "right vision." We have discussed at length on this website that it involves the comprehension of Tilakkhana (anicca, dukkha, anatta): That one cannot achieve long-lasting happiness by pursuing enticing things in this world, that one will be subjected to suffering in the long run if one does that, and therefore, such an approach will lead to one becoming helpless (especially when one is reborn in the apāyā).

- That is the basic "right vision" that must REGISTER in one's mind. The truth of that needs to accepted by the mind.
- Just reading about this, and memorizing it is not enough.

8. Let us take an example to illustrate this point. Some people do not believe in rebirth. That is a "wrong ditthi" or "wrong vision" according to the Buddha. But if one's mind does not see that rebirth must be valid, just reading about it will not change that impression in that mind.

- One should look at the evidence for rebirth with an open mind; see, "Evidence for Rebirth." One should contemplate that nothing happens without causes, i.e., kamm $\bar{a}$ will have vipāka. That in turn leads to the conclusion that rebirth must be valid.
- This is why getting rid of the ten types of micch $\bar{a}$ dittthi MUST happen before one can comprehend Tilakkhaṇa and become Sotāpanna. The Buddha discussed this in the "Mahā Chattārisaka Sutta (Discourse on the Great Forty)."

9. One issue that I do not quite understand is that some people do not believe in rebirth but want to attain the Sotāpanna stage and even the Arahant stage! Don't they realize the contradiction?

- By definition, one wants to attain the Sotāpanna stage to avoid births in the $a p \bar{a} y \bar{a}$. So, if one does not believe in rebirth, why does one believe that it is possible to be born in the apayy $\bar{a}$ ?
- We must also remember that even those who believe in rebirth have been in this rebirth for a time that has no traceable beginning. Therefore, we must have also held such wrong views in the past. It is not easy to get rid of these ten types of micchā dittthi.

10. In any case, we still need more clarification on what happens when one truly comprehends Tilakkhaña.

- I think one good analogy is if one is wearing - say, blue-tinted glasses - all the time, then no matter how hard one tries, one WILL see the world see white objects as blue and other objects also distorted to appear with different colors.
- Removing a ditṭhi (or wrong vision) is like taking off those tinted glasses. It happens when one's mind comes to a certain stage of understanding. This is cultivating pañ̃̃ $\bar{a}$ (wisdom).
- The only way to remove those "tinted glasses" is to contemplate Buddha's teachings and engage in puñña/kusala kammā, providing the conditions for the mind to comprehend those teachings.

11. A key factor that most people disregard is how much of a difference it can make in one's mindset when one stays away from dasa akusala and engages actively in kusala/puñña kammā. One's mind becomes clear and sharp, one will be able to comprehend deeper concepts easily; see, "Kilesa - Relationship To Akusala, Kusala, And Puñ̃na Kamma."

- Then one will be able to get rid of the ten types of micchā dittchi and then make the transition to the Noble Path by starting to comprehend Tilakkhaṇa; see, "Sila, Samādhi, Paññā to Paññā, sila, Samādhi."
- Comprehending Tilakkhaṇa is different than learning mundane subjects like geometry or even mathematics. It can be difficult or relatively easier depending on how much "preparations" (dāna, sila, $b h \bar{a} v a n a \bar{a}$ ) one has made in this life and also in previous lives; see, "Puñña Kamma - Dāna, Sila, Bhāvanā" and "Kilesa - Relationship To Akusala, Kusala, And Puñña Kamma."

12. As we discussed above, the key step in getting to the "right view" is for one's mind to see the truth in the world view of the Buddha: That our world is much more complex than what we experience with our senses. That there are more realms of existence, that suffering is worst in those $a p \bar{a} y \bar{a}$, and that unless we get rid of "apāyagāmi gati" one can end up in the apāy $\bar{a}$.

- Those "apāyagāmi gati" are closely related to ditṭhāsava, which arise and accumulate due to ignorance of the Buddha's worldview or the real nature of the world (Tilakkhana).
- Furthermore, at the dying moment, the mind can grasp such an apāyagāmi sense input (ārammaṇa).
- As we have discussed before, those things happen AUTOMATICALLY, based on one's gati (āsava). That is an important point to understand. Unless one is a Sotāpanna, those possibilities cannot be ruled out.

13. Another related key issue is the following. It does not matter not how many bad kamm $\bar{a} b \bar{i} j a$ have been accumulated. Rather what is important is whether one's mind will grasp a bhava (upādāna) in a given realm. That depends only on the level of pañ̃̃ $\bar{a}$ (wisdom) one has cultivated and THEREFORE what kind of gati one has.

- It DOES NOT matter how many $k a m m a \bar{a} b \bar{j} j a$ suitable to give rebirth in the $a p \bar{a} y \bar{a}$ are there. If one has removed "apāyagāmi gati" by cultivating pañña to the Sotāpanna stage, then one's mind would not grasp such bhava.
- If one's mind has removed all gati that can lead to rebirth in any realm, then one's mind would not be able to grasp any bhava, and thus one would attain Parinibbāna at the dying moment.
- For example, Angulimāla killed 999 people but was able to attain Arahanthood within a week or so. Bad kammā bīja that he generated were still there, but his mind would not grasp (upādāna) them. See "Account of Añgulimāla - Many Insights to Buddha Dhamma."

14. When one gets to Sammā Diṭthi (i.e., when one becomes at least a Sotāpanna Anugāmi), one's gati have changed permanently. Since the next birth is according to one's gati, one will not be born into a family with micchā dittthi. This is how it is guaranteed that one will have only seven more bhava left.

- One may grasp Tilakkhana by focusing on one of them. But that will lead to comprehension of all three, and even more characteristics like the asubha (unfruitful) nature. They are all interrelated.
- Of course, there are different levels of Sammā Ditṭhi and it will be completed only at the Arahant stage.

15. Finally, there is no need to worry about whether one has attained a certain stage of Nibbāna. One should concentrate on following the Path. The Buddha said that if one follows Satipatṭhāna, one will attain at the least $A n \bar{a} g \bar{a} m \bar{l}$ stage within seven years (some earlier.) Of course, one must have a tihetuka birth.

- If one does not have a tihetuka pațisandhi, the effort will not go waste but will help attain Nibbāna in future life. See "Patisandhi Citta - How the Next Life is Determined According to Gati."
- He said that if a farmer plants seeds and takes good care of those plants, they will provide a good harvest. It is pointless to check every day to see whether the harvest is ready. It will happen in due time.

### 7.4.9 How Does One Know whether the Sotāpanna Stage is Reached?

## Revised March 23, 2017; May 15, 2018; September 22, 2018; August 12, 2019; February 11, 2020; July 3, 2022; August 5, 2022; October 9, 2022

One can determine for oneself whether one has attained the Sotāpanna stage. It becomes clear that one has removed the characteristics (gati) suitable to be born in the four lowest realms (apāyā).

## Sotāpanna Is the First Goal

1. The most precious thing sought by a Bhauddhayā (or a practicing Buddhist) is the Sotāpanna stage of Nibbāna; see, "Why a Sotāpanna is better off than any King, Emperor, or a Billionaire."

- It is Arahanthood that is the ultimate goal. A Sotāpanna will become an Arahanthood within seven bhava.
- Seven bhava is many more than seven births because, within a given bhava, there can be many births. See "Bhava and Jāti - States of Existence and Births Therein."
- Thus it is essential to know how to figure out whether one has attained that stage. Other than that person himselfherself, only a Buddha can say whether a given person has achieved magga phala; see, "Myths about the Sotāpanna Stage."
- As we discussed in that post, even Ven. Sāriputta (who was only second to the Buddha in Dhamma knowledge) could not do that. Some people claim they know whether another person has attained the Sotāpanna stage (and make money doing that).

2. A Sotāpanna has seen the way to Nibbāna. He/she still has more work to do, but can see a glimpse of Nibbāna from afar. The way to Nibbāna has become apparent.

- In another post, I described a simile. A traveler, looking for a particular mountain to get to the top can finally see an outline of it at a distance. He/she still has to travel to the mountain's base and climb up. Most of the hard work was to find the location of that mountain and get close to it. See, "Sotāpanna Anugāmi and a Sotāpanna" and "The Sotāpanna Stage."

## Nibbāna Is the Stopping of the Rebirth Process

3. In Buddha Dhamma, the ultimate goal is to stop the rebirth process anywhere in the 31 realms of this world. That corresponds to realizing that there is only suffering to be had by staying in this rebirth process. In particular, one has to comprehend the danger of rebirths in the lowest four realms (apayy $\bar{a}$.)

- The ONLY WAY to come to this realization is to comprehend the true nature of this world of 31 realms: anicca, dukkha, and anatta. And those do not mean impermanence, suffering, and "no-self"; see, "Anicca, Dukkha, Anatta - Wrong Interpretations."
- Instead, it is to realize the unfruitfulness of striving to reach the mirage of happiness in this world of 31 realms and thus convince oneself that one is truly helpless in this cycle of rebirths.
- Therefore, one must work diligently to stop future suffering by "giving up cravings for things in this world" and strive to reach the only oasis in this desert of the cycle of rebirths or Nibbāna. That is to release the mind from the burdens of the material world.

## Comprehension of Tilakkhana will change one's outlook on life

4. Once that idea sinks in, one's attitude, behavior, and outlook on life will change forever.

- Let us take an example. Once a child learns the way to add two numbers, there is no way that the child will ever forget that. There will be no second guessing. If an adult, even a teacher, tells that child that "two plus three is six," there is no way that that child will ever agree.
- Attaining the Sotāpanna stage is like that. Deep down, one will KNOW the dangers of the rebirth process. Any happiness, whether due to health, wealth, or fame, is of NO VALUE in the long term. He /she has truly understood the value of the Buddha Dhamma and that faith (based on understanding) will prevail through future rebirths.
- That is not a "magical effect." A living being is a continuous flow of kammic energy; see "What Reincarnates? - Concept of a Lifestream." Thus what happens at the Sotāpanna phala moment is to change the "gati" of that lifestream irrevocably. One would have permanently shed any "gati" suitable for a hell-being (with gati of strong hate), a peta (intense greed), an asura (freeloading mentality), or an animal (a mixture of all those; "tirisan" or all three "san").
- One way to assess is to see how much of one's such "gati" have changed for the better. (Throughout working towards the Sotāpanna stage). One should be able to see significant changes. For discussions on "gati" (or "gathi"), please use the "Search" box on the top right.

## "Seeing" the True Nature of This World

5. Let us take another example. When we look in a mirror and see our image, we KNOW that it is not another person or oneself but merely an image. We don't need to think twice to realize that.

- But have you seen a dog barking at its reflection in a mirror or the water? A dog thinks it is another dog and barks at it. A dog would not know the reality of a reflection.
- In the same way, an average human thinks very highly of his/her material wealth. One is willing to "do whatever it takes" to possess such material things, titles, recognition, etc.
- But a Sotāpanna would instinctively know the unfruitfulness of such struggles. They may still enjoy sensory pleasures (and thus may still like to eat tasty food or engage in sexual activity, for example). However, they will not willingly go to extremes, such as engaging in sexual misconduct, having affairs outside the marriage, or being excessively greedy and exploiting others.
- A Sotāpanna has reduced lobha to kāma rāga and dosa (or dvesha) to pațigha. In other words, greed or hate that was due to total covering of mind by the five hindrances would reduce to "attachments" and "dislikes"; see, "Lobha, Dosa, Moha versus Raga, Patigha, Avijjaj."
- The most important thing is that he/she will NEVER do an immoral deed strong enough to lead to rebirth in the lowest four realms [Niraya, Tiracchāna-yoni, Peta-yoni, and Asura-yoni], i.e., an apāyagāmi deed. We all KNOW that our reflection in a mirror is not real and thus will not try to talk to that reflection. Similarly, a Sotāpanna INSTINCTIVELY avoids doing anything that is profoundly immoral. $\mathrm{He} /$ she does not need to think about the consequences of such acts, etc. The mind will automatically block such actions.

## Jhāna Can Be a Distraction

6. One could be a Sotāpanna (or even an Arahant) without being able to get to any jhāna beforehand. Many people in the time of the Buddha attained Arahanthood upon listening to a desanā. Upacara and anuloma samādhi are sufficient for one to get to the Sotāpanna stage. Also, jhāna and magga phala are two different things; see, "Samādhi, Jhāna (Dhyāna), Magga Phala."

- That becomes clear when we look at the possible rebirths of a Sotāpanna. A Sotāpanna could be reborn at or above the human realm.
- But if one has attained the first anāriya jhāna, one WILL be born in the Brahma realm. Thus a Sotāpanna with even an anāriya jhānā WILL NOT be reborn as a human.
- By the way, if one is not a Sotāpanna but has attained anāriya jhānā, he/she will also be born in a Brahma realm. But the difference is that he/she is not free from rebirths in even the lowest four realms.
- What I described above is consistent with the extension of 89 cittā to 121 . The "additional 40 cittt $\vec{a}$ " come about when attaining the four stages of Nibbāna for people at various (anāriya) jhāna levels; see, "The 89 (121) Types of Citta." However, these are technical details that may not concern most people. I just wanted to show consistency.

## Ariya and Anāriya Jhāna Experiences Are the Same

7. We also need to keep in mind that the jhānic experience is the same for anāriya jhānā as for_Ariya $j h \bar{a} n \bar{a}$. They are mental states of the rūpāvacara and arūpāvacara realms; they still belong to this world of 31 planes. However, subtle differences exist due to anusaya being present in anāriya jhāna. See \#8, \#10, etc. in "Tapussa Sutta (AN 9.41)- Akuppā Cētōvimutti."

- There were yogis even before the Buddha who could attain anāriya jhānā to the eighth and also cultivated abhiññā powers. Ceto vimutti (or ceto vimukthi) with anāriya jhānā is not the same as magga phala with paññ̄a vimutti. In the former, defilements are suppressed. In the latter, they have been removed.
- Of course, having even anāriya jhānā makes it easier to do vipassanā (comprehend anicca, dukkha, and anatta) and attain magga phala.

## Ariya and Anāriya Jhāna Are Very Different in Essence

8. Just SUPPRESSION of akusala thoughts and craving for sensual pleasures (kāma rāga) can lead to anariya jhāna.

- On the other hand, attaining Ariya jhāna requires removing craving (anusaya) for sensual pleasures (kāma rāga). Thus one needs to be an Anāgāmi to attain even the first Ariya jhāna. See "Possible Outcomes of Meditation - Samādhi, Jhāna, Magga Phala."
- Here is a desanā from the Waharaka Thero describing the difference between jhāna and magga phala (it is in Sinhala, but I have extracted the essence in this post for others):

WebLink: Listen to Waharaka Thero - Difference between Magga Phala and Jhāna in Sinhala

## Changes One Can See For Oneself

9. Even before reaching the Sotāpanna stage, one will notice changes in one's behavior and attitude towards other humans and all living beings. All of those will gradually change as one starts following the Path.

- But there will be significant changes after attaining the Sotāpanna stage. That change may not be noticeable in a day. It could take weeks or a few months to see some critical differences in one's lifestyle when one looks back.
- The tendency to get together with a lot of people will reduce. One will spend more time learning Dhamma and contemplating concepts that are still not entirely clear. Finding more about the real nature of this world is immensely enjoyable.
- One will also start noticing things that one has not noticed before. One will see clear instances of people's "self-induced" suffering as they try to enjoy life by "partying harder" but only get exhausted.
- The only concrete way to be convinced of the Sotāpanna stage is to make sure that the three samiyojana of sakkāya ditṭhi, vicikicchā, and silabbata parāmāsa are absent. See, "Sakkāya Ditthi is Personality (Me) View?."

Should One Declare One's Attainments?
10. Then there is this question. Is it appropriate or even allowed by the Buddha for someone to declare the magga phala one has attained?

- What is stated in the Tipitaka is the following. If one declares that one has a certain magga phala falsely intending to gain respect, money, publicity, etc., that is a bad kamma. A conventional bhikkhu becomes "pārājika," loses the priesthood automatically, and thus could be born in the niraya for doing that.
- Declaration of a magga phala is not banned. "A person attaining the Sotāpanna stage may declare it if he/she wishes to do so," in particular for the benefit of others. In the "WebLink: suttacentral: Mahāa Parinibbāna Sutta (DN 16)," "Katamo ca so, ānanda, dhammādāso dhammapariyāyo, yena samannāgato ariyasāvako ākañkhamāno attanāva attānaì byākareyya: 'khīnanirayomhi khīnatiracchānayoni khịnapettivisayo khīn̄pāayaduggativinipāto, sotāpannohamasmi avinipātadhammo niyato sambodhiparāyaṇo 'ti."
- The same verse ("A noble disciple who has this may declare of themselves: 'I have finished with rebirth in hell, the animal realm, and the ghost realm. I am a stream-enterer! I'm not liable to be reborn in the lower realms and am bound for the final release-Nibbāna") appears in a series of four suttas (SN 55.7 through SN 55.10); see, for example, "WebLink: suttacentral: Pathamagiñjakāvasatha Sutta (SN 55.8)."
- Most people who attain magga phala do not declare it; it is not a bragging point. It is the same with $j h \bar{a} n \bar{a}$. Many people start off developing $j h \bar{a} n \bar{a}$ to attain supermundane (abhiñña $\bar{a}$ ) powers, but once they get there, they have already seen the fruitlessness of even those powers.
- In particular, when one develops abhiñ̃̃̄̄ powers to be able to see previous lives, one becomes so disgusted with what one (and others) have gone through in past lives. One does not seek to look back much further.

## Tipiṭaka Examples/Accounts

11. Now, let us discuss some episodes from the Tipitaka to clarify some of the above points.

- Visākhā (one of the chief female lay disciples of the Buddha) had attained the Sotāpanna stage at a young age. But she remained at that stage even without developing any jhānā or higher magga phala until death at age 120. The Buddha stated that she would be reborn as a Deva many times (as I remember 11 times).
- Similarly, the wealthy businessman Anāthapiṇ̣ika, who built the beautiful and expensive monastery Jetavanaramaya, attained the Sotāpanna stage upon hearing his first desanā from the Buddha. He died and was reborn in the Tusita realm (one of the six deva worlds). Since those deva worlds also belong to the kāma loka, it is clear that he never attained an Ariya jhāna.
- Mahānāma was a wealthy person who was related to Prince Siddhartha's family. The Buddha told him that he had attained the Sotäpanna stage. However, when engaging in his business activities, he often got frustrated and angry with his servants and yelled at them. After such an episode of outburst, he would think, "if I am still able to become angry like this, I must not have attained the Sotāpanna stage yet." So, he would see the Buddha, explain what happened, and ask whether the Buddha was sure about the declaration. He still had doubts about his attainment of the Sotāpanna stage until the Buddha confirmed it for the third time; see "WebLink: suttacentral: Pathama Mahānāma Sutta (SN 55.21)."
- The key is that there is a difference between hate (dosa) and getting angry (patigha); paṭigha is removed only at the $A n \bar{a} g \bar{a} m \bar{c}$ stage.

## More Accounts From Tipiṭaka

12. Then there was the Sarakāni brahmin, who also belonged to a "high caste." He used to consume alcohol and get drunk regularly. His relatives, who were vedic brahmins, disowned him from their lot, saying he was unworthy to be one of them. He also attained the Sotāpanna stage, but could not give up the habit of drinking even after achieving that. When he died, Mahānāma (mentioned above) asked the Buddha where

Sarakāni was reborn. The Buddha said Sarakāni had attained the Sotāpanna stage and had been reborn as a deva. Sarakāni's relatives laughed out loud contemptuously upon hearing this and declared, "if Sarakāni was a Sotāpanna, then we all should be Arahants." When Mahānāma reported this back to the Buddha, the Buddha said those ignorant brahmins would go by outward appearances. That description is in the "WebLink: suttacentral: Pathamasaranānisakka Sutta (SN 55. 24)."

- Of course, that episode does not imply that one could keep doing immoral activities and still attain the Sotāpanna stage. What we need to understand is that drinking alcohol by itself is not one of the dasa akusala (ten immoral actions), but heavy consumption could lead to it. Sarakāni probably continued with his long-time habit to some extent, but was unlikely to have "got drunk." A Sotāpanna removes only strong greed (lobha). Käma rāga or attachment to sense pleasures is removed only at the Anāgāmī stage.
- In the Mahanama sutta (delivered to Mahanama mentioned above), the Buddha described the sila (moral conduct) of a Sotāpanna: "panatipata pativirato hoti, adinnādāna pativirato hoti, kamesu miccacara pativirato hoti, musāvāda pativirato hoti, surameraya majjapama dattana pativirato hoti." It is essential to realize the deep meanings of the "five precepts"; see "The Five Precepts - What the Buddha Meant by Them."
- In the above, "pativirato hoti" does not mean "will not" but rather "will not do with liking." After all, a Sotāpanna (unless had attained Ariya jhānā) is not yet released from the higher realms of the kāma loka, only from the lowest four realms.

## Asmi Māna Removed Only at the Arahant Stage

13. Some people try to remove the sense of "me" or the sense of "self" to get to the Sotāpanna stage, but that is removed only at the Arahant stage.

- As long as one is bound to the 31 realms, a sense of "self" will be there. These "gati" are removed in stages, starting with "gati" suitable for rebirth in the ap $\bar{y} \bar{a} \bar{a}$, as discussed in \#4 above. Even an $A n a \bar{a} \bar{a} m \bar{\imath}$ has a sense of "self" left, though most of his/her attachments for sense pleasures would not be there. One cannot pass a college exam without having graduated from high school.
- One has to advance systematically through stages; see "The Way to Nibbāna - Removal of Āsavā" and "Conditions for the Four Stages of Nibbāna."
- As long as one is bound to the 31 realms or "this material world," it is not correct to say there is a "self" or there is "no-self"; they are both wrong and extreme views; see, "Anicca, Dukkha, Anatta."
- Any meditation with the wrong concepts of anicca, dukkha, or anatta "will not grow." One should be able to "feel" one's understanding "grow" if one is doing the correct types of meditation; see, "13. Kammattana (Recitations) for the Sotāpanna Stage."

## Only a Buddha Can Know Another Person's Attainments

14. Finally, only a Buddha could discern whether another person has attained magga phala. However, many instances of people declaring their attainments by themselves when that declaration helped a noble purpose.

- All those who participated in the first four Buddhist Councils (Dhamma Sañgāyanā) were Arahants, according to the Tipitaka. Thus all those many thousands of Arahants who attended those four Sañgāyanā must have declared the Arahantship by themselves.
- Ven. Ānanda attained the Arahantship just the night before the first Buddhist Councils (Sañgāyanā.) He came to the Council by air (with abhiñña powers) and entered the hall through the keyhole. He did that to dispel doubts from the other Arahant's minds about his attainment.
- There are only a few instances of Arahants or even the Buddha performing such supernormal acts. It was essential to remove any doubts of others about the Arahantship of Ven. Ānanda because of the critical role he played at the First Sañgāyanā.

7.4.10 Assāda, Ādīnava, Nissaraṇa

October 1, 2017

- Assāda, Ādīnava, Nissarana - Introduction
- How Perceived Pleasures (Assāda) lead to Dukkha
- Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha
- Vedanā (Feelings) Arise in Two Ways
- Feelings: Sukha, Dukha, Somanassa, and Domanassa
- What is "Kāma"? It is not Just Sex (Topic moved to Paticca Samuppāda $=>$ Patticca Samuppāda Essential Concepts)
- Kāma Assāda Start with Phassa Paccayā Vedanā or Samphassa Ja Vedanā

7.4.10. Assāda, Ādīnava, Nissaraṇa - Introduction

November 1, 2017, revised May 25, 2022

1. This subsection replaces the old subsection, "Āsvāda (Mind-Made Pleasures), Ādeenava [ādīnava] (Bad Outcomes), Nissaraṇa (Relinquish)." I had used Sinhala terms in that series without realizing it. Also, I have basically re-written some of the posts - including the Introduction - to have a logical flow.

- Furthermore, this subsection was under "Paticca Samuppāda." I have now moved it to the "Sotāpanna Stage," where it is more appropriate.
- Here is the pronunciation of the three words: "WebLink: Assāda, Ādinava, Nissarana."

2. There are two main categories of "pleasures" that one experiences: (i) Those arising due to kamma $\boldsymbol{v i p a} \boldsymbol{k} \boldsymbol{k}$, and (ii) mind-made "pleasures" where we keep generating more vacī sañkhāra (thinking/talking to ourselves in our minds) recalling such an experience of the first kind.

- For example, eating a piece of cake generates a "good feeling" via the taste itself. That belongs to the first category. This is a kamma vipāka and there are "no new kamma generated"; see, "Avyākata Paticca Samuppāda for Vipāka Viññāna."
- But if we get "attached to that taste" and start thinking about how good it is and crave for more, now we are generating vacī sañkhāra (thinking/talking to ourselves about how good it is), then we are generating "new kamma." This second type is called assā$d a(\bar{a} s v \bar{a} d a$ in Sinhala). [assāda : [m.] taste; enjoyment; satisfaction.]

3. Therefore, assāda are basically "mind-made pleasures," i.e., only those in the second category.

- Those of the first type arise AUTOMATICALLY due to sensory inputs. They arise due to our kamma vipāka/gati via mano sañkhāra. Mano sañkhāra are defined as vedanā, sañ̃n̄a which arise in each and every citta.
- Based on those initial feelings, we are also likely to start generating vacī sañkhāra (talking to ourselves, which is defined as vitakka/vicāra, then actual speech) and then even generate kāya sañkhāra (bodily
actions）．We HAVE CONTROL over vacī and kāya sañkhāra，and that is the key to changing our defiled gati．
－It is important to realize that vacī saṅkhāra are associated with speech and also＂talking to ourselves＂： ＂Correct Meaning of Vacī Sankhara．＂

4．There is nothing we can do to stop the first kind．For example，even an Arahant WILL feel the＂tastiness＂ of sugar or a nice meal（or saltiness of salt or unpleasantness of some medications／foods，etc）．But he／she WILL NOT become attached to that taste and crave for more．
－It is this craving and the subsequent conscious thinking about it（vacī sañkhāra）that is called assāda， and that is what is bad because that will extend the samsäric journey filled with suffering as we will discuss in detail in this subsection．
－So，it is important to distinguish between the AUTOMATIC generation of mano sañkhāra（due to vipäka）and the CONSCIOUS generation of vacī and kāya sañkhāra：＂How Are Gati and Kilesa Incorporated into Thoughts？．＂

5．It is those CONSCIOUS generation of vacī and kāya sañkhāra that contribute to future suffering（and also lead to tāpa or＂heat＂in mind right now）：＂Suffering in This Life－Role of Mental Impurities．＂
－We＂get addicted＂to things like drugs，alcohol，and even over－eating by constantly thinking about them． We tend to recall past experiences and create in our minds such future experiences．This is generating vacī sañkhāra（talking to ourselves）．Then we start talking and doing things accordingly．
－This is how we strengthen＂old bad habits＂and even develop＂new bad habits＂or gati．These habits or gati could be samisāric gati or new ones．
－There are many posts on the site on＂gati＂（or habits／character）．A simple explanation is in＂The Law of Attraction，Habits，Character（Gati），and Cravings（Āsavas），＂and there is a scientific explanation too： ＂How Habits are Formed and Broken－A Scientific View．＂
－This important concept of gati is not discussed in current Theravāda literature，but it can explain many other concepts．

6．The more we enjoy such＂mind－made pleasures＂or assāda，the more established those associated gati become．For example，a drug user／alcoholic is constantly thinking about either past experiences or the next， and is＂building up＂that gati．Then it will become increasingly difficult to be drug／alcohol free．
－There is an even worse consequence too：that gati becomes what one craves／thinks about and will become operational in paticca samuppāda via＂upādāna paccayā bhava．＂One can start a PS cycle just in mind by thinking about getting drunk via initiating vacī sañkhāra and generating＂bhava or existence of a drunkard．＂Then of course one will follow－up with actual drinking，which is done via $k \bar{a} y a$ sañkhāra．Soon enough one will end up an alcoholic．
－Therefore，ādīnava means＂bad consequences or dangers．＂In this case，what we perceive as＂mental pleasures＂（assāda）WILL have bad consequences both in this life and in future lives：In the above example，one is likely to be matched with an＂alcoholic mother＂in the next birth，and be born an alcoholic．［ādīnava：［m．］disadvantage．過患（danger），患難（trials and tribulations），過失（negligence），危難（distress）．］

7．This is another way to express the First Noble Truth．What a normal person thinks as ＂somanassa＂（＂suva＂＋＂manasa＂or＂good feelings in the mind＂）CAN actually be the cause for FUTURE suffering，but ONLY IF one gets attached，as discussed above．
－Note the difference between consuming tasty food and getting attached to it；seeing a nice picture and getting attached to it；hearing nice music and getting attached to it，etc．

- Getting to that point of being able to experience "taste things" without getting attached to them is not easy; that is not attained fully until the Anāgāmī stage. It requires more learning and contemplation (Satipaṭ! hāna bhāvanā).
- However, to first get to the Sotāpanna stage, one needs at least to "see with wisdom" that assāda does lead to $\bar{a} d \bar{n} n a v a$; when that understanding sinks in, that will prevent one from committing apāyagāmi $\boldsymbol{k a m m a}$, i.e., one's mind will get rid of the coarse level of assäda. This subsection can help gain that "vision."

8. When one fully understands the bad consequences (ādinava) of these mind-made pleasures (assāda), that means one has understood the First Noble Truth as well as the causes for it, how to eliminate those causes, and the way to do it, i.e., all four Noble Truths.

- That leads to the cessation of the samsāric journey, and that is called nissarana (end of "carana" or journey ("nis" + "charana," which rhymes as "nissaraṇa"). [nissarana : (nt.) 1. going out; departure; 2. escape.]
- But it is a step-by-step process that starts with the Sotāpanna Anugāmi stage and culminates at the Arahant stage.

9. It will take several posts to explain the above in detail. However, understanding them will help with pațicca samuppāda cycles and also with Satipaṭthāna/Ānāpāna bhāvanā.

- The first few subsections of the "Living Dhamma" section has all the fundamentals that are needed to help understand this subsection. The posts mentioned in \#3 and \#4 are especially important ones.
- Assāda is related to āsava and anusaya too, as well as gati (pronounced gathi) as we mentioned above. There are many posts on those key concepts on the site, and a couple was listed in \#4 above. One could use the "Search" button on the top right to locate relevant posts.
- In the following, we will discuss a couple of more examples of assāda, ādīnava and nissaraṇa in simple terms.

10. We know many things that provide instant gratification but are harmful in the long term. A good example is smoking. A smoker gets an enjoyment with smoking. Furthermore, he/she wants it to be repeated again and again, and that is assäda. But it has been proven without a doubt that long-term smoking causes many health problems including cancer.

- Even though smoking has decreased over the years, many people still who smoke. I had a older friend who smoked heavily; I asked him why he would keep doing it since he knew about the bad consequences. He said the habit had been ingrained, and it was hard to break it. Many years ago, he died because of his bad habit. The last several years of his life were spent in hospitals, with parts of his lungs removed piece-by-piece, and eventually, he was on oxygen most of the time.
- Of course he finally gave up smoking when he was about to be hospitalized. It was too late by the time he clearly saw the "ädinava" (when he actually experienced the bad consequences). The damage had been done.

11. However, his children clearly saw what he went through and understood that smoking might provide temporary enjoyment (assāda), but is bound to bring about bad consequences (ādinava). Thus they stayed away from smoking (nissaraṇa).

- This is the key point that we will prove to be valid for ANY sense of pleasure in the end. But do not worry; we do not have to (and cannot effectively) give up anything without understanding. In fact, such forced "giving up" will only lead to more stress. Our minds will automatically avoid more and more "bad things" as we keep learning Dhamma.
- There are a few more "relatively easy to see" examples of "assāda, ādīnava, nissaraṇa," even before we get to the deeper analysis in the next post.
- Craving for tasty foods is another very clear example. Most of us cannot "see" the bad consequences of overindulging in eating, and as a consequence we have a obesity problem in most countries. This has resulted in many health problems for those people and has led to increased healthcare costs for all. Still, many people are beginning to see the truth of "assāda, ādīnava, nissaraṇa" of overeating.
- Heavy drinking, use of drugs, and association with bad friends are relatively "easy to see" examples.

12. However, we can systematically understand the "root causes" for ALL such problems by using the guidelines provided by the Buddha. Once we understand the actual root causes, at least some of us can think through and avoid not only such "mundane problems", but start seeing even more long-term benefits: It is the same line of reasoning that eventually leads to the four stages of Nibbāna.

- Thus even though Buddha Dhamma is focused on "eliminating the long-term suffering", it can also help reduce some of the "short-term suffering" too.
- As a clear example of this, one can always examine the health of Buddhist monks. On average, they are much healthier than the "householders" in any of the Buddhist countries. They do not smoke and do not overeat.
- And one can clearly see their "joy in heart" and the calmness of their minds even though they have very few possessions and do not seek gratification in many sense pleasures that others value so highly.

13. This last point is worth thinking about some more. If one thinks deeply enough, one can see that even some common "sense pleasures" are not that different from the pleasure one gets by inhaling a drug. They give a highly enjoyable "burst of pleasure", but inevitably lead to bad outcomes, even short term. One can get a hangover with a bad headache due to excess drinking, and in the case of overeating, one can feel the "discomfort" right away.

- We seek such sense pleasures because we don't realize the value of just having a calm, peaceful state of mind. One does not understand the value of a "neutral mind" (which is called upekkhā), unless one can experience it. It is like getting rid of a headache that one has had for a long time. We do not realize the "incessant stress" that is with us, until we reduce it.
- Our minds are constantly under stress seeking sense pleasures. That is what we all had been doing in countless previous births too. That is why it is hard to recognize any negative consequences.

14. In the Sambhodhi Vagga of the Anguttara Nikāya, there are several suttā on assāda, ādīnava, nissarana. The "WebLink: suttacentral: Pubbeva Sambodha Sutta (AN 3.103)" provides a succinct statement on what they are:
"..ko nu kho loke assādo, ko ādīnavo, kim nissaranan'ti? Tassa mayhamं, bhikkhave, etadahosi: 'yaì kho lokam paticca uppajjati sukhaì somanassaì, ayaì loke assādo. Yaì loko anicco dukkho viparināmadhammo, ayaì loke ādīnavo. Yo loke chandarāgavinayo chandarāgappahānaìm, idaì loke nissaraṇan'ti..."

Translated: "..What are assāda, ādīnava, and nissaraṇa in this world? If one gets attached (paṭicca) to sukha/somanassa, that is assāda. That gives rise to the dhammā (the seeds for future suffering, because these are really "kamma seeds") with anicca, dukkha, and viparināma nature, which is called ādīnava. Arising of such dhamma can be stopped by constraining the tendency to indulge in sense pleasures (chandarāgavinayo), and thus getting rid of the craving for sense pleasures (chandarāgappahānaì)..."

- It is to be noted that sukha is "bodily pleasure" and somanassa is "mind pleasure." We will discuss this highly condensed verse in the upcoming posts.
- In that sutta, the Buddha says that he was unable to attain the Buddhahood until he realized the need to see the dangers in sense attachments, and to work diligently to get rid of such cravings for sense pleasures.
- It is important to note that dhammā are really kamma seeds that lead to future vipāka; see, "What are rūpa? - Dhamma are rūpa too!" and "What are Dhamma? - A Deeper Analysis."

12. Many other suttā that discuss these three key concepts. In particular, "WebLink: suttacentral: Assāda Sutta (AN 6.112)" is notable since it ties assāda diṭthi to anicca saññā:
‘"'Tayome, bhikkhave, dhammā. Katame tayo? Assādadiṭthi, attānudiṭthi, micchādiṭthi. Ime kho, bhikkhave, tayo dhammā. Imesaì kho, bhikkhave, tiṇnaì dhammānaì pahānāya tayo dhammā bhāvetabbā. Katame tayo? Assādadiṭthiyā pahānāya aniccasañña bhāvetabbā, attānudittthiyā pahānāya anattasañn̄ā bhāvetabbā, micchāditṭhiyā pahānāya sammādiṭthi bhāvetabbā. Imesamं kho, bhikkhave, tiṇ̣am dhammānam pahānāya ime tayo dhammā bhāvetabbā"ti."

- Or, contemplation of anicca sañ̃̄̄̄a leads to the removal of assāda dittthi.
- This is because the mind-made pleasures (assāda) are based on the wrong perception of nicca sañ̃̄ $\bar{a}$, i.e., that those sense experiences are real and fruitful.

### 7.4.10. How Perceived Pleasures (Assāda) lead to Dukkha

March 11, 2016; revised October 31, 2017; February 10, 2020

1. The essence of the Buddha Dhamma is that what we PERCEIVE to be enjoyment (assāda) is actually the CAUSE of FUTURE SUFFERING; that is called ādinava (or dangers) of assāda. But that understanding comes in stages. This is a subtle point to understand, and requires some cleansing of the mind to "see." Grasping the essence of Buddha Dhamma requires a concentrated mind.

- At a minimum, one should read these posts when the mind is calm. That will make a huge difference in comprehending Dhamma. Most people (especially those who come to this site) are not "immoral", but the state of mind can change. Even an excited mind cannot grasp deep Dhamma. I discussed this in a few of my very first posts two years ago; see, for example, "The Importance of Purifying the Mind."
- This is why I highly recommend everyone to read the first several posts in the meditation section starting with " 1 . Introduction to Buddhist Meditation."
- Most people new to Buddha Dhamma (Buddhism), start at the wrong place: "Do I really need to give up all these sense pleasures?." The answer is no. One will voluntarily give up things that one will be convinced to be dangerous or at least unfruitful. Nirāmisa sukha comes from this understanding.

2. The key here is to understand that "bhava" and "jāti" are according to one's gati. That is because "bhava" arises via "upādāna" and upādāna means what one likes or enjoys; see, "Paticca Samuppāda "Pati+ichcha"+"Sama+uppāda"."

- Bhava means "potential to bring about existence" and that existence is according what one craves for (upādāna), not what one wishes for. Upādāna means things that one is AUTOMATICALLY attracted to. At least the initial reaction is automatic, and that is what counts at the cuti-patisandhi moment; see below.
- If one craves for sensual pleasures in the kāma loka, then it is hard to avoid a bhava and j $\bar{a} t i$ in the kāma loka.
- More importantly, if one is seeking sense pleasures and is willing to do things that can be done only with "animal gati," "pretha gati," "asura gati," or "niraya gati," then no matter how much one wishes, one cannot avoid birth in those realms.
- One cannot fool one's mind. One has to see the dangers in the lowest four realms to cultivate the desire and drive to be free of them.

3. The four lowest realms are collectively called the "ap $\bar{a} y \bar{a}$." Those who are destined to go to ap $\bar{a} y a$ have "dugati." The word "dugati" comes from "du" + "gati" or immoral habits (character).

- On the other hand, those who have moral character have "sugati," which means good ("su") gati.
- Sometimes the apāy $\bar{a}$ themselves are also called dugati, and the higher realms are called sugati.
- A given person could have both sugati as well as dugati. One becomes the Sotāpanna when the possibility for dugati to surface (i.e., anusaya) is permanently removed.

4. It is hard to see the true anicca nature of the higher realms, i.e., in sugati (for example in the deva realm), until one is free of the lowest four realms. Most of us perceive deva realms to be full of happiness. Until one's mind is purified to at least the level of a Sotāpanna it is hard to comprehend the futility of a birth in the deva realms.

- But the animal and human realms have enough visible suffering for us to be motivated.
- One cannot even imagine to comprehend the anicca nature of rūpa loka or arūpa loka until one is free of kāma loka, including the deva loka.
- This is why COMPREHENDING Dhamma at each level is the essential. It is a step-by-step process.

5. In the Dhamma Cakka Pavattana Sutta, the Buddha described three rounds of bondage (tiprivattaya); see, "Dhammacakkappavattana Sutta." Getting through those three walls is done via four stages of Nibbāna (Sotāpanna, Sakadāgāmī, Anāgāmī, Arahant).

- At each stage, one gains wisdom (ñāna) to " see further", i.e., the anicca nature of higher realms. Thus one has to make progress systematically. This process is analogous to the following example. Let us visualize a person wearing glasses that have been covered with four layers of a dark, but see-through, film. One could see through a single layer of the film, but when all four layers are on, one is virtually blind.
- A normal human without exposure to pure Dhamma is like a person wearing those glasses covered with all four layers. $\mathrm{He} /$ she could just barely see the immediate surroundings, but not much else. Such a person would only be concerned with the immediate surrounding, and will not be able to see any dangers existing not too far away.

6. When exposed to Buddha Dhamma for the first time, it is like bringing in more light. Even with the dark glasses, one can see a bit more clearly, and that is enough for most people to get interested and learn more.

- When one learns about the various aspects of Dhamma, one can see evidence that there is a much bigger hidden world out there, and at some point one could comprehend the dangers of rebirth in the ap $\bar{a} y \bar{a}$. That stage can be compared to one layer of those dark films coming off. It is the attainment of the Sotāpanna stage. This is a big step since pañcanīvarana (those five factors that cover the mind) are permanently removed.
- Now, one can see much better, and thus has the ability to start comprehending the dangers of the higher realms in the kāma loka, i.e., the human realm and the deva realms. First one comprehends the dangers of sense pleasures associated with the human realm and when that happens one attains the Sakadāgāmi stage (one will never again be born in the human realm), and the second film comes off.
- In two more stages (Anāgāmī and Arahant), the remaining two films come off and one will be able to clearly see the true nature of this world only at the Arahant stage.
- Thus, it is useless to try to grasp everything at once or to try to give up "normal" sense pleasures forcefully. However, it is imperative to give up those extreme (immoral) behaviors (gati) to be free from dugati (apāyā).

7. The main problem is that some people go to extremes in seeking sense pleasures. They are willing to steal, lie, and even commit murder to acquire wealth, status, or titles. All those are perceived to lead to higher sense pleasures.

- But in doing so, one will be cultivating gati suitable for rebirth in the apāy $\bar{a}$, i.e., dugati.
- One may enjoy such sense pleasures for maximum of 100 years or so. But when one is born in the $a p \bar{a} y \bar{a}$ it is very difficult to get out. One could be trapped there for billions of years to come. This is the danger that many do not see.
- This is the difference a Buddha makes. In the absence of a Buddha in the world, humans are unaware of the existence of these other 29 realms, and in particular, the four lowest realms.

8. Those akusala kamma that makes one to be eligible to be born in the $a p \bar{a} y \bar{a}$ have a special name: $p \bar{a} p a$ kamma. I guess the closest English translation would be "akusala kamma of the worst kinds."

- As I have discussed in a previous post, there is a huge difference between lobha and rāga, dosa and patigha, and moha and avijjā: "Lobha, Dosa, Moha versus Raga, Patigha, Avijjā.".
- Pāpa kamma are done with lobha, dosa, and moha, the stronger versions of greed, hate, and ignorance.
- When one attains the Sotāpanna stage one is left with the milder versions of rāga, patigha, and avijj $\bar{a}$. It basically means a Sotāpanna still likes to enjoy sense pleasures, but not at the expense of others.
- A Sotāpanna is inherently incapable of doing anything that normally would qualify one to be born in the apāy $\bar{a}$. Even under extreme pressure, a Sotāpanna would not be compelled to such pāpa kamma.

9. I have done analyses to show that such pāpa kamma are done because one has micchā ditthi. When one has micch $\bar{a}$ ditṭhi, one has the hidden ability (anusaya) to generate "ditṭhi sampayutta citta" and those are strongest of the 8 lobha citta; see, for example, "Akusala Citta - How a Sotāpanna Avoids Apayagami Citta."

- Thus it is very important to understand what micchā ditthi is. One can use the Search box to find many relevant posts, but here is a simple explanation: "Wrong Views (Micchā Ditthi) - A Simpler Analysis."

10. Another issue to think about is which factor dominates the determination of the next bhava and thus jathi (birth): kamma vipāka (seeds) from the past OR one's gati right now.

- We all have done both highly meritorious deeds and highly immoral deeds in the past. Those cannot be eliminated easily. But the critical point is that unless one "willingly grasp" any one of those kamma seeds at the cuti-patisandhi moment at the end of the current bhava, those kamma seeds cannot bring about a new bhava.
- When one attains the Sotāpanna stage, one permanently loses "gati suitable for the apāyā," i.e., one loses "upādāna" for bhava in the lowest four realms. Thus even though we may have potent kamma seeds for such bhava, they CANNOT be grasped at the cuti-patisandhi moment.
- At the Arahant stage, one loses "upādāna" for bhava in all 31 realms, even though he/she may have even an uncountable number of kamma seeds from the past.
- This is why Angulimāla, who killed 999 people, was able to attain the Arahanthood within 7 days. He lost craving for rebirth anywhere in the 31 realms. See, "Account of Angulimāla - Many Insights to Buddha Dhamma."
- We just need to get rid of gathi suitable to be reborn in the lowest four realms to become a Sotāpanna. That is the critical and first step.

11. To repeat: Avoiding immoral behavior and actively engaging in moral behavior is not only for the prevention of creating bad kamma seeds or for creating good kamma seeds, but for changing our bad gati.

- The more critical end result we are looking for is to change our mindset, our gati. That starts with first getting rid of dugati. For most people, it is easy to see the dangers of the apāy $\bar{a}$.
- When we lose dugati suitable for rebirth in the ap $\bar{a} y \bar{a}$, we will not grasp such a bhava at the cutipatisandhi moment.
- Until we lose both kinds of gati at the Arahant stage, we NEED TO cultivate sugati so that we will grasp only such a "good bhava" at the cuti-patisandhi moment.

12. Once one gets rid of dugati, one advances to the next stage automatically. It is hard to see the bad consequences of "kāma gati" (sense pleasures that keep one bound to kāma loka), until one is free of the "apāya gati" or dugati.

- In the same way, it is hard to see the anicca nature of "rūpa and arūpa loka gati" (jhānic pleasures that keep one bound to $r \bar{u} p a$ and arūpa loka), until one is free of the "kāma gati."
- This is why it is totally useless to meditate on things like 'there is no self' or 'there is no 'me'." The feeling of a self (or more correctly the samyojana of "māna") is removed only at the Arahant stage, which is infinitely far away compared to losing dugati.
- The perception of a "self" is going to be there as long as one craves for at least a trace of anything in the 31 realms. This is another point that needs a lot of contemplation. The critical point to understand is that it is unfruitful/dangerous to commit immoral actions to enjoy assāda or "mind-made pleasures."

### 7.4.10. Kāma Guna, Kāma, Kāma Rāga, Kāmaccfanda

November 9, 2017; revised September 3, 2019; October 5, 2019

## Introduction

1. It is essential to understand the meaning of each term. The "defilement level" increases in the given order from kāma to kāmacchanda.

- Pronunciation of the terms: WebLink: Pronunciation of kāma guna to kāmacchanda

2. In $k a \overline{m a}$ loka, we experience five types of physical sense inputs: pictures (rūpa rūpa), sounds, smells, tastes, and body touches. There are inherent "qualities" for each of these called "kāma guna." Those are common to all of us in kāma loka. They also depend on "bhava" and thus differ from humans to each type of animal; see below.
[ $\boldsymbol{k} \overline{\boldsymbol{a} m a}$ : may denote: 1. subjective sensuality, 'sense-desire'; 2. objective sensuality, the five sense-objects.
kāma-guna : 'characteristics \{cords (or strands)\} of sensuality'.]

- For example, all of us experience the sourness of lemon or sweetness of sugar (there may be defects in some people due to kamma vipāka).
- We all experience the unpleasantness of thunder or the pleasantness of music.
- While there could be minor differences, all humans experience the same basic "qualities" or 'kāma guṇa" through the five physical senses. Even when one becomes an Arahant, that will not change.

## Realms in Kāma Loka and Two Brahma Lokā

3. The 31 realms naturally exist to provide different levels of kamma vipāka according to the (abhi) sañkhāra done in previous lives (mainly in the human realm).

- The lowest four realms in $k \bar{a} m a$ loka ( $a p \bar{a} y \bar{a})$ have conditions that induce excessive suffering. Higher two realms in kāma loka have rūpa rūpa, sadda, gandha, rasa, and pottabba that provide increasingly higher levels of "pleasures."
- The rūpavācara brahma realms have rūpavācara jhānic pleasures; those brahmā had given up kāma rāga and had cultivated rūpavācara jhānā in previous human lives.
- Those in arūpavācara brahma realms had given up both kāma rāga and rūpa rāga, and had cultivated arūpavācara jhāna in previous human lives.
- That is why kāma guṇa is absent in both rūpavācara and arūpavācara brahma realms. Those who are born in those realms had given up sense pleasures for jhānic pleasures.

## What Are Kāma Guna?

4. Therefore, there are pleasing things in our kāma loka (human realm) that naturally arise to provide sense pleasures. That is because "human bhava" is a "good bhava." Even more sensory pleasures are naturally available in deva realms.

- Thus, as humans, we are naturally exposed to those "kāma guna." We are naturally "exposed to" sense objects that are "pleasing" to the five physical senses. Of course, deva are exposed to even stronger kāma guṇa.
- Thus, if one has not comprehended the Tilakkhaṇa then it is natural to attach to such "pleasurable things." One perceives that things in this world - especially those things with kāma guna - can provide long-term happiness. But in reality, such cravings lead to suffering because those "pleasures" are not sustainable. Furthermore, those things with kāma guṇa motivate people to immoral deeds to get access to them.

## Kāma Rāga - Attachment to Kāma Guṇa via Sañkappa Rāga

5. Now, if a person gets attached to those sensory inputs with kāma guna, and starts generating sensual thoughts (i.e. vacī sà̉khāra) that leads to "kāma" or kāma rāga. Generating sensual thoughts is also called sañkappa rāga (creating sañkappa that lead to samisāric journey). A sutta reference is in $\# 15$ below.

- Engaging in sañkappa rāga (i.e., thinking greedy thoughts about such sense pleasures) means generating vacī sañkhāra. That is then likely to lead to kāya sañkhāra, too (start engaging in related physical activities.)
- That can happen to any average human. It can happen to a lesser extent to a Sotāpanna. That next step of intentionally generating sensual thoughts happens with kāma rāga. That will again reduce at the Sakadāgāmi stage and stopped only at the Anāgāmi stage. [kāma-rāga : 'sensuous lust', one of the ten fetters (samiyojana, q.v.)]
- The removal of kāma rāga cannot be forces. Kāma rāga will naturally reduce when cultivating $\bar{A} n a ̈ p a ̄ n a$ and Satipaṭthāna.

6. An Anāgāmī has removed kāma rāga, but still has kāma, i.e., likes them somewhat.

- However, kāma of an Anāgāmi is not strong enough to lead to rebirth in the kāma loka. In other words, an Anāgāmī will not generate abhisañkhāra (strong sañkhāra) for things with kāma guṇa (for example would have no desire to engage in sex).
- In the Abhidhammic language, an Anāgāmī has removed four greed-based cittā associated with wrong views. There are still "four greed-based citttā dissociated with wrong views" left. But they have lost much of the potency to move from kāma to kāma rāga level; see \#3 of, "Akusala Citta and Akusala Vipāka Citta."
- It is only at the Arahant stage that $k \bar{a} m a$ is absent completely.

## Kāmacchanda - Being Blinded by Kāma Rāga

7. If not willfully controlled, kāma rāga can intensify to a point where one is capable of committing immoral deeds (hurting others or oneself.) One starts losing control when kāma rāga elevates to the kāmacchanda level, the highest. [kämacchanda :'sensuous desire', one of the 5 hindrances (nīvaraṇa, q.v.); attachment to sensual pleasure.]

- That can happen to anyone below the Sotāpanna stage, i.e., one can be "blinded" by $k \bar{a} m a$, resulting in kāmacchanda ("kāma" + "icca" + "andha," where icca is liking, and andha is blind, and thus "blinded by the craving for $k \bar{a} m a$ ").
- Whether an average human will generate kāma, kāma rāga, or kāmacchanda depends on the strength of the sensory input and also on prevalent conditions. For example, if one's mindset becomes degraded due to alcohol consumption, and one sees an attractive woman in an isolated setting, things could get out-of-control with kāmacchanda.

## Kämacchanda Leads to Rebirth in the $A p \bar{a} y \bar{a}$

## 8. Immoral actions done with k $\bar{a} m a c c h a n d a$ could lead to rebirth in the $a p \bar{a} y \bar{a}$.

- Only kāma rāga - not kāmacchanda - can be arise in a Sotāpanna. Thus he/she is released from the apāy $\bar{a}$, but not from kāma loka. A Sotāpanna is incapable of committing an "apāyagāmi deed" in order to satisfy any kind of sensory pleasure.
- I hope you get the basic idea. The above reasoning applies to any of the five physical sense inputs.

## Some Examples for Clarification

9. We can clarify with some examples. Sugar has a "kāma guna" of sweetness for humans; that holds for everyone from an average person to an Arahant.

- A beautiful woman will be seen as such by anyone from an average person to an Arahant.
- An average person may generate $k \bar{a} m a$ to $k a \overline{m a c c h a n d a}$ for that woman.
- A Sotāpanna may generate kāma to kāma rāga.
- An Anāgāmī may generate just kāma. But there is no "kāma rāga anusaya" left in him to go beyond that.
- But an Arahant will not generate kāma either.

10. The sight of such a woman is a kamma vipāka. For anyone (from an average person to an Arahant), still living in the human realm will see that she is beautiful.

- If one gets "interested" one generates kāma sañkappa or vacī sañkhāra; see, "Correct Meaning of Vacī Sañkhāra." Then it could lead to kāya sañkhāra, i.e., turn one's head to looks at her again with kāma rāga or kāmacchanda, that is a new kamma.
- A Sotāpanna still has "kāma rāga anusaya," and that is why he/she will return to the kāma loka. $\mathrm{He} /$ she can be born as a human or deva in the future.
- A Sakadāgāmī is in between the Sotāpanna and Anāgāmī stages. He/she will be reborn only in the deva realms.
- Of course, an Anāgāmī will not be reborn anywhere in the kāma loka. since there is no kāma rāga left.

## Different Types of Kāma Guṇa for Different Existences

11. Anyone born in the human realm will have similar "kāma guna" because they had cultivated corresponding "human sañkhāra." We all like same things, and any variations we do have are due the variations in those main sañkhāra types.

- However, "kāma guna" of animals can be much more different compared to humans. There are also many variations among animals.
- Pigs eat very unpleasing things, including feces. Tigers or lions like to eat raw meat. Cows don't like meat but like grass. The variations are quite apparent. Again those correspond to sankhāra that they had cultivated as humans. Furthermore, each bhava (and $j \bar{a} t i)$ corresponds to such sañkhāra via paṭicca samuppāda. Some of you may be able to see that, but we will discuss this later.
- In brahma realms, things with kāma guṇa are absent. They were born in those realms because they had preferred and cultivated jhānic pleasures, instead of craving for sensual pleasures.

12. In that regard, we just keep in mind for now that (abhi)sañkhāra generated by humans have high javana power, and thus lead to various "bhava" and jāti. Animals cannot generate such citta with high javana power because of their unfortunate birth. That is an important point. Animals just pay for past kamma until that kammic power is exhausted; see, "Javana of a Citta - The Root of Mental Power."

- Even most devas enjoy their kāma and "go with the flow," and enjoy them (while they can.) Brahmā too enjoy jhānic pleasures that come with their birth.
- It is only those devas/brahmā that had become at least Sotāpanna that would be motivated to strive for magga phala.

## Only abhisañkhāra Lead to Future Rebirths

13. Therefore, it is mostly humans who can cultivate abhisañkhāra (of both types) and thus make conditions for future "good births or bad births." That is a critical point in the Agganna Sutta.

- All the animals that we see were humans in the beginning. Those with "bad gathi" that had been generated via "bad abhisañkhāra" in their deep past, were reborn as various types of animals as the Earth evolved, and conditions for animal life appeared.
- An introduction to Aggañña Sutta is at "Buddhism and Evolution - Aggañña Sutta (DN 27)."

## Five Kinds of Kāma Guna

14. Now let us briefly discuss a key sutta that is relevant. The "WebLink: suttacentral: Nibbedhika Sutta (AN 6.63)" lists the five kāma guṇa:
"..Pañcime, bhikkhave, kāmaguñā-cakkhuviññeyy $\bar{a}$ rūpa itṭha kantā manāpa piyarūp $\bar{a}$ kāmūpasaimhitā rajanīyā, sotaviññeyyā saddā ... ghānaviññeyyā gandhā ... jivhāviññeyyā rasā ... kāyaviññeyyā phoṭthabbā iṭṭhā kantā manāpā piyarūpā kāmūpasamihitā rajanīyā. Api ca kho, bhikkhave, nete kāmā kāmagun̄̄̄.."

Translated: "..Bhikkhus, there are five types with characteristics of sensuality (kāma guṇa). Which five? Forms are cognizable via the eye-agreeable, pleasing, charming, likable, desire-inducing, enticing. Sounds are cognizable via the ear. Aromas are cognizable via the nose. Flavors are cognizable via the tongue. Body sensations are cognizable via the body-agreeable, pleasing, charming, likable, desire-inducing, enticing. But, Bhikkhus, these are not sensuality (kāma)..."

- I have translated "guṇa" as "characteristics," but "qualities" would work too.

## Kāma Different From Kāma Guṇa

15. Then the next verse of the sutta says what $\boldsymbol{k} \overline{\boldsymbol{a} m a}$ is: "Sañkappa rāgo purisassa kāmo, Nete kāmā yāni citrāni loke..."

Translated: "a person's $k \bar{a} m a$ is getting attached and thinking about (sañkappa rāga) those pleasing things in this world (citrani loke)." Those beautiful things are not kāma." Here, "citrāni loke" means "a world full of delightfiul things."

To emphasize: There are many pleasing, desire-inducing, enticing things in the kāma loka. Just experiencing them is not $k \bar{a} m a$. One who has understood the real nature does not get attached to them. But those who do not yet understand the real anicca nature of things in the kāma loka, value them highly. They crave them, and get a satisfaction (kāma assāda) by thinking about them (generating kāma sañkappa or vacī sañkhāra); that is kāma.

- It is essential to realize that conscious thinking or "talking to oneself" is vacī sañkhāra; see, "Correct Meaning of Vacī Sañkhāra." Thus, one who does that has sañkappa räga.
- Such vacī sañkhāra can then lead to kāya sañkhāra, whereby one takes actions to fulfill such desires (if one has kāma rāga anusaya).
- Some people go one step further and commit akusala kamma to fulfill such desires (then it becomes kāmacchanda).

## Saṅkappa Rāga Is kāma

16. Therefore, anyone in the kāma loka will experience kāma guṇa. It is a natural outcome of being in the kāma loka. It is the tendency to think about them on a regular basis and enjoy that with sañkappa rāga that elevates to $k \bar{a} m a$. A higher level of $k \bar{a} m a$ is $k \bar{a} m a$ rāga.

- And giving up that craving comes only with an understanding of the true nature (the anicca, dukkha, anatta nature), i.e., realize that they have adverse consequences; see, "How Perceived Pleasures (Assāda) lead to Dukkha." and "Assāda, Ādinnava, Nissarana - Introduction."
- Getting to the Sotāpanna stage means one has understood the dangers of kāma assāda. As long as one has cravings for them, one would still have them. However, a Sotāpanna will never do an immoral act to gain those sense pleasures.
- For a Sotāpanna to be free from such kāma assāda, he/she needs to contemplate the dangers (ādīnava) of kāma assāda as we discussed in the above two posts. That is the "asubha bhāvanā." [asubha means unfruitful, detrimental]

## What Is Asubha Bhāvanā?

17. Many people misinterpret the asubha bhāvanā as to contemplate on disgusting things like rotting dead bodies. That is entirely wrong; such meditations only lead to patigha or "friction of the mind."

- Instead, one needs to contemplate on the fact that the cause of future suffering is getting attached to those pleasing sensual things. One needs to see the unfruitful (asubha) nature of those things with kāma guna. Real asubha (detrimental) things are those eye-pleasing, ear-pleasing, ...body-pleasing things in this kāma loka. See, "How Perceived Pleasures (Assāda) lead to Dukkha."
- Therefore, it is not even possible to do the asubha bhāvanā correctly until one gets to the Sotāpanna stage. It is only then one begins to see the dangers in craving for sense pleasures.
- However, it is always good to cut down on sense pleasures, even while striving for the Sotāpanna stage. It makes one's mind calm and susceptible to grasp more profound concepts.
- Extreme sense pleasures are a burden to the mind. It is possible to avoid those right now; see, "Satipatthāna Sutta - Relevance to Suffering in This Life." Doing everything in moderation naturally leads to a simpler, healthier, and peaceful life.

### 7.4.10. Vedanā (Feelings) Arise in Two Ways

Revised September 4, 2016; Revised February 9, 2017; October 17, 2017; November 5, 2018;May 5, 2020 (Same at Vedanā (Feelings) Arise in Two Ways @ The Five Aggregates (Pañcakkhandha))

## Introduction

 "become aware." When an ārammaṇa comes to the mind (via any of the six senses,) we become aware of it.

## Vedanā can arise in two ways:

1. One type of vedanā is a consequence of a previous kamma or previous defiled action, i.e., a kamma vipāka. That kamma could have been done many lives ago.
2. For example, when one gets a "pleasant feeling" while eating a piece of cake offered by the friend, that is a vipāka vedana $\bar{a}$. Then, if we start thinking about how to eat that cake in the future, with such thinking, we generate "pleasant feelings" about such future experiences. Those are "mind-made" or samphassa-j $\bar{a}$-vedana $\bar{a}$ associated with greedy thoughts.

Further details on the two types of vedanā can be found at, "Vipāka Vedanā and "Samphassa-jā-Vedanā" in a Sensory Event." But let us discuss them briefly below.

## Vedanā Arising from Kamma Vipāka

2. Vedanā (feelings) due to kamma vipāka are three kinds : Sukha vedana (pleasant or joyful feeling), dukha vedanā (unpleasant or painful feeling), and adhukkhamasukha (without being painful or joyful, just neutral. The word adukkhamasukha is a combination of adukkhama and asukha.)

- Those three types of vedanā are felt only by the body (kāya). All vedanā initially coming through other five sense faculties are neutral.
- Kamma vipāka leading to sukha vedanā and dukha vedanā happen to everyone, including Arahants. While everyone can live mindfully (taking necessary precautions) to avoid some of such dukha vedan $\bar{a}$, others are too strong to be able to avoid.
- For example, the Buddha himself had physical ailments later in his life as kamma vipāka. Moggallana Thero was beaten to death because of a bad kamma that he did many lives before.

3. However, kamma vipāka are not certain to happen. Some can be reduced in power (see, "Kamma, Debt, and Meditation.') Many vipāka can be reduced in strength with time if one starts acting with mindfulness.

- Many can be avoided by preventing conditions for them to arise. That means acting with yoniso manasikāra or just common sense. For example, going out at night in a bad neighborhood is providing fertile ground for past bad kamma vipāka to appear. Many kamma vipāka CANNOT take place unless the conditions are right. See, "Anantara and Samanantara Paccayā."
- We all have done innumerable kamma (both good and bad) in past lives. If we act with common sense, we can suppress bad kamma vipāka and make conditions for good vipāka to arise.
- Also see the discussion on kamma bīja in, "Sañkhāra, Kamma, Kamma Bīja, Kamma Vipāka."
- Now let us look at the second type of vedana $\overline{\text {. }}$

## Vedanā Arising from sañkhāra ("Samphassa-j $\bar{a}$-vedan $\bar{a} ")$

4. These are the vedan $\bar{a}$ (feelings) that we generate on our own. These are the vedan $\bar{a}$ that do not arise in an Arahant.

- Based on vipāka vedanā, we may generate more types of "mind-made" vedanā called somanassa and domanassa vedanā as we discuss below.
- In \#2 above, we saw that vipāka vedanā are felt only by the body (kāya.)
- Some of the vedana coming through the other senses feel as "pleasant" or "unpleasant" NOT because of kamma vipāka, but due to another reason. Those are associated with each realm and are "kāma guna." See, "Kāma Guna - Origin of Attachment (Tanhā)." For example, all humans taste sugar to be sweet. But some people get addicted to eating sweets full of sugar. That second category is "mindmade."
- We may generate "samphassa-j $\bar{a}$-vedan $\bar{a}$ " starting with initial vedana due to both mentioned above. But most samphassa-j $\bar{a}$-vedana $\bar{a}$ have kāma guṇa as the cause.

## Some Examples of Samphassa-ja-Vedanā

5. These samphassa-j $\bar{a}$-vedana $\bar{a}$ arise due to attachment via greed or hate, at that moment (i.e., due to one's gati); see, "Tanhā - How We Attach Via Greed, Hate, and Ignorance."

These are the vedana (feelings) that Arahants do not feel. Since they do not have any "bad gati," they do not commit any (abhi)sañkhāra, an Arahant avoids any kind of feeling arising from sañkhāra. The easiest way to explain this kind of vedan $\bar{a}$ is to give some examples:

- Three people are walking down the street. One has an ultra-right political bias (A), the second has an ultra-left preference (B), and the third is an Arahant who does not have special feelings for anyone (C). They all see a famous politician hated by the political right coming their way. It is a given that the sight of the politician causes A to have displeasure and B to have a pleasurable feeling. On the other hand, sight does not cause the Arahant to generate any pleasure or displeasure. Even though all three see and identify the person, they produce different types of feelings. It is essential to realize that the feelings were created in $A$ and $B$ by themselves.
- Two friends go looking for treasure and find a gem. Both are overjoyed. It seems quite valuable and one person kills the other so that he can get all the money. Yet when he tries to sell the "gem," he finds out that it was not that valuable. His joy turns to sorrow in an instant. Nothing had changed in the object. It was the same piece of colored rock. What has changed was the perception of it.
- What could happen if an Arahant found the same gem lying on the road? (He would not have gone looking for one.) He might think of donating it to a worthy cause.

## Another Example of Samphassa-jā-Vedanā

6. A loving couple had lived for many years without any problems and were happy to be together. However, the husband slaps his wife during an argument (this is a kamma vipäka). The physical pain from the slap itself did not last more than a few minutes. But for how long the wife would suffer mentally? Those feelings arise due to sañkhāra, i.e., sadness and hate. Even the husband, who did not feel any physical pain, would suffer for days if he really loved his wife. In both cases, the real mental pain was associated with the attachment to each other. The wife could have dropped something on her foot and would have suffered about the same amount of physical pain. But she would not have had any lingering mental pain associated with that.

- In all the above cases, the initial sense contact was due to a kamma vipāka. No kamma energy was generated at that instant. However, based on that initial contact, we tend to pursue it with our mind and thus may start generating kamma automatically. See, "Avyākata Patticca Samuppāda for Vipāka Viññāna."

## Samphassa-jā-Vedanā Arise Due to Taṇh $\bar{a}$

7. Thus it is clear that in all the above examples, the "extra" happiness or suffering (other than due to kamma $v i p a ̄ k a$ ) arose from within one's own mind. And $\tanh \bar{a}$ (attachment via greed or hate) was the cause of it. See, "Tanhā - How We Attach Via Greed, Hate, and Ignorance."

- When we generate such "mind-made vedanā," we also do kamma (via abhisañkhāra) that will bring more suffering in the future.
- The Buddha pointed out that when he described dukkha in the Dhammacakka Pavattana Sutta. See, "Essence of Buddhism - In the First Sutta."

8. Thus all these feelings arise due to $\boldsymbol{t a n h} \overline{\boldsymbol{a}}$, some form of attachment: greed (craving, liking) or hate (dislike); all these are due to mano/vaci/kāya sañkhāra. The feelings (or rather, the perceptions that give rise to feelings) reside INSIDE oneself. It does not come from outside. We use external things to CAUSE happiness or suffering by our own volition.

- There is no inherent suffering or happiness in ANYTHING external; the sense contact with an external thing CAUSES pain or happiness depending on our gati and $\bar{a} s a v \bar{a}$. An Arahant, who has removed all $\bar{a} s a v \bar{a}$, will be free of such emotional responses.

## Connection to Paṭicca Samuppāda

9. It is also clear how the accumulation of sañkhāra via Paticca Samuppāda leads to such varied feelings: If we attach to something with a "like" or a "dislike," we generate a mindset accordingly. That is Paticca Samuppāda (pati +icca leading to sama + uppāda; see, "Paticca Samuppāda - Introduction").

- If we attached to something with "greed", we act with that "greedy mindset." We will be happy if we get what we wanted. If we got "attached" to something with anger, we would have an "angry mindset" and would be happy if we remove whatever caused that anger.
- In either case, the strength of the feeling is also proportional to the strength of the "like" or "dislike": Sama uppāda or Samuppāda means both in quality and quantity; the higher the strength of "pati + ichcha", the higher the strength in "sama + uppāda."
- This is how we form habits ("gati") too. A teenager drinking alcohol with a bunch of friends gets attached to that setting and looks forward to having the same experience again. The more he repeats that activity, the more he gets "bonded", and thus forms a drinking habit. See, "Habits and Goals" and "Samsāric Habits and Āsavā."

The sequel to this post is at, "Feelings: Sukha, Dukha, Somanassa, and Domanassa."
A deeper discussion on vedanā at: "Does Bodily Pain Arise Only Due to Kamma Vipāka?," "How Are Paticca Samuppāda Cycles Initiated?," and "Avyākata Paticca Samuppāda for Vipāka Viññāna."

### 7.4.10. Feelings: Sukha, Dukha, Somanassa, and Domanassa

## December 11, 2015; Revised November 19, 2018

In this post, we will discuss an important classification of vedana $\bar{a}$ based on whether they arise due to kamma vipāka or our defiled thoughts (sañkhāra).

1. This is a sequel to the previous post, "Vedanā (Feelings) Arise in Two Ways," where we discussed how feelings arise due to kamma vipāka and also due to mano sañkhāra.

- As discussed in several posts, we can avoid certain kamma vipāka from actually taking place by not making suitable conditions for them to appear, but some strong ones are hard to avoid; see, "What is Kamma? - Is Everything Determined by Kamma?."
- However, feelings (both good and bad) that arise due to sañkhāra are totally avoidable, and Arahants are completely free of them. We discussed this in the previous post.
- Now let us discuss in detail what types of feelings arise due to those two causes.

2. First, let us discuss the feelings that we feel in our physical bodies.

- They include sukha vedana such as bodily comforts one feels sleeping in a luxurious bed, eating tasty food, smelling nice odors, seeing something attractive, etc. They arise via the five physical senses.
- Then there are dukha vedanā that are again brought in via the five physical senses: injuries to the body, headaches, eating something untasteful, smelling a bad odor, hearing to an ear-piercing sound, etc.
- Both those types of vedanā are due to kamma vipāka, and Arahants feel them too. Sukha vedanā arise due to kusala kamma vipāka (past good deeds) and dukha vedanā arise due to akusala kamma vipāka (past bad deeds).
- These sukha and dukha vedanā mainly exist in the kāma loka, where the dense bodies of the beings are sufficiently dense to impart them. In fact, it is mainly in the lower five realms (including the human realm, that dukha vedanā exists as kamma vipāka. However, the worst types of dukha vedanā are in the lowest four realms (apāy $\bar{a})$, and that is why a Sotāpanna is said to have overcome the worst of the suffering forever.
- In the deva lokas, it is mainly the sukha vedanā that results due to good kamma vipāka. That is why a Sakadāgāmī is never born at or below the human realm, and is said to become "healthy forever."
- In the rūpa loka and arūpa loka, beings mainly have jhānic pleasures. Thus an $A n \bar{a} g \bar{a} m \bar{r}$, who will never be reborn in the kāma loka, is said to become "peaceful forever."

3. Some vipāka vedanā felt by the body are neutral. Furthermore, all vipāka vedana coming through the other four physical senses are also neutral: adhukkhama asukha (without being painful or joyful, just neutral) vedanā, which are commonly called upekkha vedanā.

- It is important to note that these adhukkhama asukha or upekkha vedanā are the true reality of experience. Vedanā comes from ("ve" + "danā") which means "veema danaveema" (రెఅ टृळలోఅ) in Sinhala. Basically, when we sense something via our six senses, we become aware that something happened, i.e., seeing a picture, hearing a sound, etc.; that is vedan $\bar{a}$.
- For example, seeing a person X only leads to an upekkha vedanā for ANYONE initially.

4. However, within a fraction of a second of that seeing event, it COULD LEAD TO pleasant (somanassa) or unpleasant (domanassa) feelings DEPENDING ON WHO IS SEEING X. Person X's wife or child will generate somanassa vedana upon seeing X. However, an enemy of X will generate domanassa vedan $\bar{a}$ upon seeing X .

- On the other hand, a total stranger (or an Arahant) will not generate either somanassa or domanassa vedana $u$ upon seeing X , and that is the true reality, as mentioned in \#3 above.
- Thus both somanassa and domanassa vedanā are MIND MADE, and arise due to mano sañkhāra. And those sañkhāra are generated based on one's own gathi and āsavas.
- In another example, if two people who are strong supporters of two opposing political parties see the leader of one political party, one will generate somanassa vedana and the other will generate domanassa vedanā upon seeing that politician. Thus, those feelings could not have resided with the politician, but arose entirely due to the gathi of those two people.
- An Arahant will not generate either kind, because there is no attachment (or repulsion) to anything or anyone for an Arahant.
- This is a very important point that one could do insight meditation on.

5. We also know that both sukha and dukha vedanā can LEAD TO somanassa and domanassa vedana $\bar{a}$ too. For example, When one gets a headache due to a kamma vipāka, one could be agonizing over how long that will last, whether that will prevent one from going to a party next day, etc. Those are domanassa vedanā due to that initial dukha vedana from the headache.

- On the other side, when one eats a tasty piece of cake (good vipāka vedanā), one could be start thinking about buying more of that cake and enjoying it later; that gives rise to somanassa vedana
- Both the domanassa vedanā and the somanassa vedanā in the above two examples are totally mindmade, i.e., due to sañkhāra.

6. Therefore, based on the three types of vedan $\bar{a}$ (sukha vedanā, dukha vedan $\bar{a}$, and upekkha vedana $\bar{a}$ ) that arise due to kamma vipāka, ADDITIONAL two types of vedanā (somanassa and domanassa $v e d a n \bar{a})$ COULD arise depending on the $\bar{s} a v a$ and gathi of the person experiencing them.

- Those feelings that we feel IN THIS LIFE due to sañkhāra are MOSTLY two kinds: somanassa vedanā and domanassa vedanā. Those sañkhāra also make bhava (via thoughts, speech and actions) and those give rise to kamma vipāka mostly in future lives but also in this life itself as we discuss below in \#11.
- Thus rebirths are also generated via (abhi)sañkhāra and that is how the cycle of rebirths is maintained. That is why it is called samisāra ("san" + "sāra," where "sāra" means "good"), i.e., one perceives that it is good to keep doing sañkhāra ("san" + "kāra", where "kāra" or "kriya" is action).

7. This is why Dukkha Sacca (First Noble Truth) does not mean that we can ELIMINATE the dukha vedanā arising in our present physical body; those are due to kamma vipāka (the causes were already done).

- However, by gradually reducing sañkhāra (with increased understanding of Buddha Dhamma), we can stop making new sañkhāra and thus eliminate FUTURE suffering. This is the key to dukkha sacca. These sañkhāra are also called assāda (āsvāda in Sinhala); see, "Assāda, Ādīnava, Nissarana."

8. Still, we can reduce bad consequences from past kamma vipāka using what are called "strategies" ("upakrama") in Buddha Dhamma.

- One is to be mindful and not to let conditions for past kamma vipāka to take place. This is discussed in, "What Is Kamma? - Is Everything Determined by Kamma?" and "Anantara and Samanantara Paccaya."
- If the kamma vipāka has already started imparting its effects (say, someone finds out that one has cancer), then one can work to alleviate that condition by using another related "strategy": One can get medical help and adopt a lifestyle that is opposes the spreading of the cancer. Even here what we are doing is to overcome this bad condition by making suitable environment for "opposing good kamma vipāka" to bear fruit. Thus, if one does not make an effort, the bad kamma vipāka will run its course and one may die in short time.

9. Each living being's body is designed to impart appropriate good and bad kamma vipāka suitable for the kamma seed that gave rise to that particular life.

- For example, an animal cannot implement "strategies" ("upakrama") to overcome most of its kamma vipāka. For example, it is unable to do anything about a wound (other than licking it) or to think about dragging its cot to a sunny spot (our dog likes to be in the sun but we have to move her cot!).
- Some animals have built-in defenses for their survival, but they cannot make them any better. For example, some birds instinctively know how to build a nest, but that "nest design" has not been improved by them over millions of years. And baby turtles "know" the way to the ocean and start trotting in the right direction minutes after their hatching; see, "How Character (Gati) Leads to Bhava and Jāti."
- Animals also are unable to do strong good or bad kamma. Even though most animals kill other animals, that is not done with greed or hate, but just for survival. It is just like the instinct for the birds to build nests or the baby turtles to head in the right direction to the sea. In Abhidhamma language, they generate mostly, "upekkha sahagata citta" and those have much less javana power.
- Thus, animals cannot accumulate much good or bad kamma. Otherwise, they will never be able to escape that "bhava," since most survive by killing other animals. In the same way, whenever they get a "good life" (say as a human)- which is very rare - that is due to a good kamma vipāka done in a previous "good life."
- But not all animals are the same. Those "higher up" animals like monkeys can accumulate kamma than "lower ones" such as worms, and cats and dogs are somewhere in between.

10. The potency of human sañkhāra comes from the ability of humans to generate both "somanassa sahagata citta" (thoughts with joy) for kusala kamma and akusala kamma. The javana power of those citta are very high.

- Thus when one is doing a good deed with joy, that brings much more merits compared to someone who is doing it just because others are doing it, i.e., with an "upekkhā sahagata citta"; see, ""A Simple Way to Enhance Merits (Kusala) and Decrease Demerits (Akusala)."
- Even more strong javana arise when a good deed is done with knowledge that it will lead to good results and why, ie., one knows right from wrong.
- But the most potent javana arise when a good deed is done with understanding of the anicca nature, i.e., when one does it with "somanassa sahagata ñāna sampayutta citta." Thus, paññā (or ñāṇa) comes from an understanding that is deeper than just knowing right from wrong.
- It works the other way around for bad deeds: the most potent javana (with high kammic power that can lead to rebirth in the apa$y \bar{a}$ ) are generated with "somanassa sahagata ditthi sampayutta citta," i.e, thoughts with joy and wrong vision. A good example is someone who commits murder and enjoys and it is done with the dittthi that such an action cannot bring bad consequences.
- But when one commits murder due to anger that is done with aversion and displeasure: "domanassa sahagata patigha sampyutta citta"; see, "Akusala Citta and Akusala Vipāka Citta."

11. Now let us consider the consequences of sañkhāra in this life, that we mentioned in \#6 above. Suppose a teenager starts associating with bad friends and start drinking alcohol. Initially, he does not even like the taste of it, i.e., he may be generating a domanassa vedanā due to the taste of alcohol. But with the insistence of those friends he continues drinking.

- Then he makes a habit (gathi) of it, begins to perceive the taste as a somanassa vedana , and starts making sañkhāra about drinking. Even while in the middle of some other task, he starts thinking about the next party where he can drink, and what types of drinks there will be and so on.
- Now "sañkhāra paccayā viññāna" step in the pațicca samuppāda leads to making a "new viññ̄ạna for drinking." The more he thinks about such parties and generate those somanassa vedana , the more viññāna, nāma rūpa, etc that he makes for such "drinking events."
- And the stronger that "viññāna for drinking" gets, the more he will be thinking about it (making more sañkhāra). Then the habit is strengthened; see, "How Habits are Formed and Broken - A Scientific View."

12. Mind phenomena are complex. But with the background that we have accumulated, we can figure out some of the causes and possible effects. There is no need to memorize all these different terms; they will be carved into the memory as one contemplates and sorts out one's own experiences.

To summarize: Sukha and dukha vedanā arise due to kamma vipāka. Somanassa and domanassa vedanā arise due to sañkhāra, which in turn arise due to our gati and $\bar{a} s a v a s$. The more sañkhāra we do, the stronger a given gathi (habit) becomes, which in turn become āsavas (cravings) and fuel the sansāric journey (rebirth process). This vicious cycle can be broken only through comprehending the anicca nature of this world.

### 7.4.10. Kāma Assāda Start with Phassa Paccayā Vedanā or Samphassa Jā 6 Vedana

## Revised April 29, 2021

In posts with advanced concepts, I have to use too many Pāli words. There are no short phrases in English to give the same meanings for phrases like "samphassa j $\bar{a} v e d a n \bar{a}$." Thus it will be beneficial to learn the meanings of these Pāli words and phrases and be able to pronounce them if that seems to be helpful. I have
included some audio files in the post, "Pāli Glossary (A-K) and Pāli Glossary (L-Z)." Here is how to pronounce the Pāli words in the title of this post:

WebLink: Listen to pronunciation of : kāma-āsvāda-phassa-paccaya-vedanā-samphassa-ja-vedanā

1. In the previous post, "What is Kāma? It is not Just Sex," we saw that $k \bar{a} m a$ is not sex or even attractive sense objects, ear-pleasing sound, tasty food, nice smell, or a sensual body touch as many believe. Käma is basically vacī sañkhāra about sense-pleasing objects (constantly thinking about those pleasures), whether it is an eye-catching object, ear-pleasing sound, tasty food, nice smell, or a body touch.
 about such sense objects and giving priority to them. We also saw that such kāma assāda (or asvāda in Sinhala) are vacī sañkhāra that arise when certain sensory inputs trigger our deep-seated $\bar{a} s a v a / a n u s a y a$ (which are related to our habits or "gati").

- Thus we can see that kāma assāda, sankalpita rāga, mano sañkhāra mean basically the same thing.
- To re-emphasize: $k \bar{a} m a$ assāda are beyond actually experiencing those sense inputs that come our way due to good kamma vipāka (even though one would need to stay away from high-pleasure activities, because one could get used to them and make corresponding habits). Kāma assāda are craving and thinking and planning about such sense inputs.
- Some extreme $k \bar{a} m a$ assāda (or at least actions and speech initiated by them) can be suppressed by understanding the bad consequences (ādiñava) of them.
- Without a Buddha appearing in the world, we would not even realize that even milder kāma assāda have bad consequences (ādinava). Yet, they do have bad consequences as we saw in the previous post.

2. The critical point that we need to discuss now is how to prevent milder but still harmful kāma assāda from arising in our minds. We basically have to use the same tactic discussed in the previous post and also in the introduction to this series, "Assāda, Ādīnava, Nissarana - Introduction."

- When a mind comprehends that certain actions are harmful, it avoids such actions. As we discussed in that introductory post, the best way to quit smoking is to understand the bad consequences of that habit fully. Another is to cultivate a good habit (say, listening/reading Dhamma) instead.
- In the previous post, we discussed how we avoid immoral actions via speech and bodily actions by comprehending the bad consequences of such actions.
- In other words, the primary way to effectively remove bad habits (nissarana) is to comprehend the bad consequences ( $\bar{d} d \bar{i} n a v a$ ) of such $k \bar{a} m a ~ a s s a ̄ d a ~ f r o m ~ a r i s i n g ~ i n ~ o u r ~ m i n d s . ~$

3. This is where another important aspect of Buddha's "previously unheard Dhamma" comes into play. This unique message is that in addition to being harmful, kāma assāda are unfruitful in the long run. Even though we normally value them, when analyzed with the way the Buddha taught, we can see that they are just mindmade due to our ignorance of the true nature of this world.
4. It is important to understand the big difference between vipāka vedana and kāma assāda. We cannot stop vipāka vedanā from arising, but we can stop kāma assāda by cleansing our minds.

A vipāka vedanā normally triggered kāma assāda. Also, kāma assāda are totally made up in our minds. Let us take a simple example to gain more insight.

- Husband and wife are walking down the street, and the wife stops and looks at a beautiful painting on display in a store window. The husband looks at it, shrugs his shoulders and wants to move on. It is somewhat expensive, so she is thinking about whether they can afford it right now, but she would really like to buy it. Husband has no interest in it and thinks that it is a waste of money to buy it.
- They both saw the same painting as a vipāka vedanā. That was just the "seeing event," and as we will discuss in Abhidhamma, most vipāka vedanā are neutral, like seeing or hearing. The exceptions are
bodily contacts, which can be either bodily dukha vedanā (like a cut or a headache) or sukha vedan $\bar{a}$ (like getting a massage or being in an air-conditioned room on a hot day) depending on whether it is bad or a good vipāka.
- Now, any "happy feeling" generated in the wife's mind would have been due to $k \bar{a} m a$ assāda. The mind of the husband did not generate such a "happy feeling." This is an important point. The "happy feeling" in the wife's mind could not have been a property of the painting; if so, it should have given the same "happy feeling" to the husband!

5. Thus in the above particular case, only the wife enjoyed kāma assāda due to seeing the painting. In other words, a pavutti akusala-mūla Pațicca Samuppāda cycle operated only for the wife. Her deep-seated craving (āsava/anusaya) for such an object led to acting with avijjā.

- We could also state the same process by saying that "cakkhuñca pațicca rūpe ca uppajjati cakkhuviññānaà̀" was followed by "tinṇaì sañgati phasso" and "phassa paccayā vedanā"; see, "Tanhā - How We Attach Via Greed, Hate, and Ignorance."
- Now she is attached and deliberately looks at the picture, "avijj ā paccayā sañkhāra" step started and then went through the step, "(san)phassa paccay $\bar{a}$ vedana$"$ " in a fraction of second; see, "Idappaccayatā Paticca Samuppāda."
- However, for the husband, who saw the same painting, there was no āsava/anusaya for such an object to "attach to it" and to act with avijj $\bar{a}$ and to initiate those processes; also see, "'Self" and "no-self": A Simple Analysis - Do We Always Act with Avijijā?."
- For some, this may be crystal clear but those who are not very familiar with the concepts may want to review those relevant posts.

6. Now that she is "attached" to the painting, the wife keeps looking at it for a while, which will lead to numerous such pavutti akusala-mūla Pațicca Samuppāda cycles. Not only that, she will be enjoying "kāma assāda" about that picture even after they left that place by thinking back about it. Now she has made a "viññanna" and a "bhava" for it.

- That "kāma assāda" can resurface with Paticca Samuppāda cycles that involve only the mind when she is at home: It starts with "manañca paṭicca dhamme ca uppajjati manoviññānam̈," i.e., she just remembers the painting while washing dishes. How does she start thinking about the painting when she was busy with some other task?
- One way to explain that is to say that "she had 'cultivated' a viñ̃n̄ana" for that painting and now it can sometimes resurface even without a prompt. This is sometimes known as the "subconscious"; see, "ㄹ. Viñ̃̃āna, Thoughts, and the Subconscious."
- Another way to explain it by saying that she had made a "bhava" for liking that painting and it is a dhamma that can enter the mind when the conditions are right: "manañca paṭicca dhamme ca uppajjati manoviññānam.." However, that particular dhamma or concept or thought would never make contact with the mind successfully if she was listening to a discourse or thinking about a key concept like anicca since she was doing a task that did not motivate her much (washing dishes) that is an opportunity for such "subconscious viññāna" to come to the surface.

7. Of course, now that "manañca pațicca dhamme ca uppajjati manoviññānam̀" step will be followed by, "tinṇaì sañgati phasso" and "(san)phassa paccayā vedanā"; see, "Difference between Phassa and Samphassa." Her "gati" for liking such pictures will make her mind "samphassa," which in turn will lead to "samphassa paccayā vedanā" or "samphassa jā vedanā."

- This is a vedanā that her husband will not get. He did not make a "viññāna" or a "bhava" for that painting and thus it will not come to his mind.

8. Now, suppose that a week later they are walking by the same store. The wife remembers the painting, but finds that it is no longer there; someone had bought it. Now, think about what happens to the two of them.

- The wife will be distraught: "I should have bought it; now I may not be able to find such a nice painting." But the husband will not have any bad feelings, except may be some bad feelings about his wife not been able to get what she wanted.
- This is the suffering that we can stop from arising even in this life. It is not a vipāka vedanā but a "samphassa jā vedanā." The wife got distraught only because she got attached to that painting, but the husband did not.

9. I just gave a straightforward example from real life. Of course it is a relatively insignificant "tanh $\vec{a}$ " without drastic consequences. I just wanted to use it, because most people can understand it. Of course, the consequences can be much harsher if one gets attached to something of more significant, keep thinking about it and make that "viññāna grow," and eventually does something bad to acquire it.

- a) For example, X who "falls in love" with Y , may be thinking about it all day and make a "very strong greedy viññāna" about X . So, X makes all kinds of plans in his/her mind about Y , and the more he/she does it, the more strong that viññāna gets.
- b) The more strong that viñ̃̄āna is, it is more likely to "come to his/her mind" because it is a dhamma that is constantly hovering around his/her mind (or in the subconscious). It is easy to start more PS process with "manañca paṭicca dhamme ca uppajjati manoviññānam்."

10. Note the difference between a) and b) above. In a), the process starts with "avijjā paccayā sañkhāra" when X first thinks about Y and starts thinking about Y with avijj $\bar{a}$ and gets "bonded to Y " in his/her mind. At this point, a "baby viññ̄na" is formed about Y.

- Now, since it is at an early stage, this "baby viññāna for Y" may not trigger "manañca paticca dhamme ca uppajjati manoviñ̃̄ānam" (process b) often. And that viññāna may start dying out if X does not get to think about Y for a while.
- But if X sees Y again in a few days, then that "baby viñāāna for Y " gets fed again. The sight of Y makes X go through many PS cycles and strengthen that "viññạ̄na for Y."
- If X gets to see Y often and may be even to "hang out with Y ," that "viññāna for Y " will grow because now X is giving it a lot of food (āhāra).
- Now with a "strong viññāna for Y ," X 's mind will constantly be bothered with "dhamma about Y ," and it is more likely that "manañca paṭicca dhamme ca uppajjati manoviññānaị" will be triggered even while X is doing something else.

11. Then, one day, X hears that Y has got engaged to another person. What will happen to X ? $\mathrm{He} /$ she will be highly distraught, and depending on the level of attraction (and X's gati), X may do something bad.

- For example, if the attraction (level of $\operatorname{tanhh} \bar{a}$ ) was firm, AND if X has "violent character" (i.e., "violent gati ${ }^{\prime}$ ), then X may hurt Y or the person that Y got engaged to. Then not only will X be suffering due to "loss of Y," but would also have made causes for FUTURE SUFFERING by committing a bad kamma.

12. Now we can see how both taṇhā and gati are two critical issues. One can lessened both by contemplating on the bad consequences (ādīnava) of acting foolishly.

- Comprehending anicca, dukkha, anatta is the best way. Then one's gati will change permanently to the "moral gati" of a Sotāpanna, and one will never do anything that will lead to the birth in the apāy $\bar{a}$. Even though a Sotāpanna may still generate "samphassa-j $\bar{a}$-vedana $\bar{a}$," due to some sense inputs, those will be milder, and thus any suffering incurred would be mild.
- I hope that it is clear from this discussion that it is impossible to suppress kāma assāda or thoughts about sense objects forcibly. The only way is via purifying the mind by learning Dhamma (especially the anicca nature of this world) and thinking about the bad consequences of such thoughts (ädinava). This is what
the Buddha realized as the $\bar{a} s a v a k k h a y a ~ n ̃ a ̄ n ̣ a, ~ t h e ~ w a y ~ t o ~ g e t ~ r i d ~ o f ~ a ̄ s a v a ~(a n d ~ a n u s a y a) ~ v i a ~ g e t t i n g ~ r i d ~$ of bad habits (gati) and cultivating good habits (gati).
- And this is discussed in the meditation (Bhāvanā) section under, " 9 . Key to Ānāpānasati - How to Change Habits and Character (Gati)."

### 7.4.11 <br> Sakkāya Ditṭhi is Personality (Me) View?

March 10, 2017; revised January 20, 2018; June 1, 2019; October 3, 2019; July 24, 2020
In this post, we will discuss why interpretations of two key concepts - sakkāya diṭthi and samyojana in many current English publications (including supposedly Theravāda texts) are incorrect.

## Difference Between Wrong Views and Wrong Perceptions

1. Most texts describe sakkāya ditṭhi as "self-illusion" or "personality belief," i.e., "belief that a self or I exist" (you can Google "sakkāya ditthi" and see). Here it is essential to understand that there is a difference between "wrong view" and "wrong perception." A Sotāpanna would have removed the wrong view (dittthi), but not the false perception (sañ̃̃̄̄.)

- But this perception (saññ̄$)$ of a "self" (or a "soul" which is also called "ātma") is NOT sakk $\bar{a} y a$ ditthth per Tipitaka as we discuss below. That is a sañña (perception) that we have carried from life-to-life. For a discussion on saññā, see, "What is Saññā (Perception)?."
- The deeply-embedded idea of a "self" or an innate sense of "me" is rooted in the mana cetasika.
- If one gets offended if treated with disrespect, that means one still has māna left. Even an Anāgāmī could be somewhat perturbed if he/she perceives to be treated badly. A component of manna - called asmi māna - is still left at the Anāgāmī stage. Māna is removed not at the Sotāpanna stage, but the Arahant stage.

## A Sotāpanna Removes Only Wrong Views About an "Unchanging Self"

2. What is removed at the Sotāpanna stage is the wrong view (ditṭhi) that there is something unchanging and permanent like a "soul" is associated with oneself. That goes with the belief that lasting happiness can be achieved by just living a moral life (even though that is essential.)

- When one can see that there is no "real essence" (like a "soul" or a "ātma") associated with a living being, this wrong view of sakkāya ditṭhi goes away. A lifestream evolves, according to Paṭicca Samuppāda; see, "Anattā in Anattalakkhana Sutta - No Soul or a Ātma."
- Therefore, it is incorrect to believe that the perception of a "self" will go away at the Sotāpanna stage. It is also dangerous, because one is trying to do something that is not possible to do at that stage. It is like a child in the primary school trying to get a Ph.D.

## Sotāpanna Stage - Four Conditions

3. In the post, "Four Conditions for Attaining Sotāpanna Magga/Phala," we discussed the four conditions that need to satisfied to attain the Sotāpanna stage of Nibbāna.

- With fulfilling those conditions, one will break through three samyojana (mental bonds) and be permanently released from rebirths in the apāyā (four lowest realms). The Pāli word samyojana (or sanyojana or sanyoga) is usually translated as "fetters." See, for example, the Wikipedia article: "WebLink: WIKIPEDIA: Fetter (Buddhism)."
- But as in many English publications (books, internet posts), the above Wikipedia article misdescribes samyyojana.

4. We are bound to the 31 realms in this world by ten "mental tethers" or samyojana. It can be visualized as someone attached to a post by a rope, except that there is no one else that forcibly bind us to the 31 realms.

- Sanyojana or sanyoga ("san" + "yoga" where "yoga" means to bind) means bound via "san"; see, "What is "San"? Meaning of Sansāra (or Samsāra)."
- We voluntarily bind ourselves to this world with our minds, because we believe that somewhere in these 31 realms we can find permanent happiness.
- Most people think they can find happiness in this life itself! They don't even pause to contemplate what happens when one gets old and helpless. If one takes time to observe, there are many examples around: famous, wealthy, and powerful, became disabled at old age, and died a miserable death.

## Three Samyojana Removed

5. A Sotāpanna breaks through 3 of those ten samyojana - or "bonds" or "tethers" - and gets permanently released from the four lowest realms (ap $\bar{a} y \bar{a}$ ). He/she does this by comprehending the true nature of this world, i.e., attaining samma dittthi.

The keyword "samma" comes from "san" + "mā," which means "to become free of san." For example:

- "Mā hoti jāti, jāti," means "may I be free of repeated birth."
- "Mā me bāla samāgamo" means "may I be free of association with those who are ignorant of Dhamma."
- Thus samma ditthi is to be free of wrong views. One gets some level of samma diṭthi at the Sotāpanna stage and completes it at the Arahant stage.

## Importance of Comprehending the Unfruitful/Dangerous Nature of This World (Tilakkhana)

6. One has to break those bonds in one's mind. One gains sammā ditthi - right view to become free of 'san' - by comprehending the true nature of this world of 31 realms.

Anicca - that nothing in this world can bring permanent happiness in the long run.
Dukkha - despite our struggles, we will be subjected to much more suffering than pleasures if we remain in the rebirth process.

Anatta - therefore, one is truly helpless in this struggle to attain "something of the essence in this world." That is just an illusion.

- See, "Anicca, Dukkha, Anatta - Wrong Interpretations."

## Two Eightfold Paths

7. It is essential to realize that there are two Eightfold Paths with two types of sammā ditthi. See, "Buddha Dhamma - In a Chart" and "Mahā Cattārīsaka Sutta (Discourse on the Great Forty)."

- One first needs to reach a "moral mindset" by staying away from immoral acts embedded in the five precepts. That is attaining "mundane sammā ditthi."
- Then one's mind is cleansed enough to comprehend the Three Characteristics of this world: anicca, dukkha, anatta.
- When one gains this "lokuttara sammā ditthi" to some extent, one will indeed start on the Noble Eightfold Path; see, "How to Cultivate the Noble Eightfold Path starting with Anicca, Dukkha, Anatta."
- This distinction is hard to perceive for many people. I encourage them to read the first few subsections of the "Living Dhamma" section.

8. Now let us discuss how gaining lokuttara samma ditthi leads to the removal of three of the ten mental tethers (or fetters) that bind us to the rebirth process. In particular, to be released from the worst types of suffering in the $a p \bar{a} y \bar{a}$.

- Those three saminojana are sakkāya diṭthi (also called sathkāya dittthi), vicikicchā, and silabbata parāmāsa.

## Two Prevailing Major Wrong Views

9. The Buddha discussed 62 types of ditt thi that were present during that time in the Brahmajāla Sutta. We don't need to address all of them today, because there are only two of those wrong views that are prevalent today.

- Religious people (Creator-based religions), believe that there is a "permanent soul," and one will be born in heaven or hell forever after this life. This idea of a "āthma" or a "self" was the sassata ditṭhi.
- Science today believes that our thoughts arise in our brains, i.e., our mental body is the same as the physical body ("I am my body"). So, when we die, that is the end of the story because the physical body becomes dust; so they say, "enjoy life while it lasts." That was the "uccheda dittthi" (pronounced "uchcheda") that the Buddha also rejected: "Life terminating with the death of the physical body."
- Thus the Buddha rejected both wrong views that "a self exists" and "a self does not exist." Things can exist due to causes, and if those causes do not exist, they cease to exist. That is the principle of cause and effect explained in Paticca Samuppāda. Beings exist due to avijjā and taṇhā, and they cease to exist when those cease to exist and reach permanent happiness (i.e., attain Nibbāna).

10. Even those religious people may subconsciously have that part of the uccheda ditt thi of "I am my physical body."

- Our increasingly materialistic societies always feed this narrative - that it is so important to look beautiful and robust because my body is what I am - via television and movies.
- In other words, sakkāya dittthi in the present day is rooted in the view of "I am my physical body." That leads to the perception, "I can achieve happiness by providing a lot of pleasurable sense inputs to my body."

## Meaning of Sakkāya or Sathkāya

11. "Sath" means "good" or "fruitful."

- And kāya can mean either one's actions or one's body, as we discussed in Kāyānupassanā, see, "Kāyānupassanā - Section on Postures (Iriyapathapabba)."
- Sakkāya ditthi encompasses mainly two views: (i) "I am my body," and I need to keep it beautiful above all. (ii) I can achieve happiness by diligently pursuing (good) things in this world.
- This view is of course related to the perception of nicca. That it is possible to maintain things to our liking or icca (or icch $\bar{a}$.) See, "Sakkāya Ditthi - "Me and Mine" View"

## Getting Rid of Sakkāya Ditṭhi

12. Therefore, getting rid of sakkāya diṭthi in the present day requires one to realize that this physical body is "just a shell" that we have possession of only for about 100 years.

- That is why it is essential to realize the role played by our mental body, gandhabba, which could live for thousands of years. But that also will cease to exist when we grasp a new existence (bhava) at the cutipatisandhi moment when the gandhabba itself dies.
- Our next existence depends not on how well we keep our physical bodies (they need to be healthy), but how well we "improve" our mental body. Learning Dhamma and living according to that Dhamma helps with the latter.
- I have given a more straightforward explanation of gandhabba at the "Living Dhamma" section: "Mental Body - Gandhabba," and there is a separate section in the Abhidhamma section that goes into more detail.

13. The second view associated with sakkāya dittthi in $\# 10$ above. That one can achieve happiness by diligently pursuing things in this world. Sakkāya diṭthi can only be removed by comprehending the "anicca nature."

- See, "Anicca, Dukkha, Anatta."
- When one comprehends anicca, one realizes that no matter what we do, staying in the rebirth process leads to net suffering. Even though there are bouts of happiness to be had, those will be insignificant to suffering in the long run, especially when one is (inevitably) born in the apa$y \bar{a}$.

## Cülavedalla Sutta (MN 44)

14. It should be noted that a full explanation of sakkāya ditthi is given in the Cūlavedalla Sutta (Majjhima Nikāya 44) where Ven. Dhammadinna explains it to her former husband Visakha:
"..Kathaì panāyye, sakkāyaditṭhi hotī"ti? "Idhāvuso visākha, assutavā puthujjano, ariyānam adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaì adassāvī sappurisadhammassa akovido sappurisadhamme avinīto, rūpaì attato samanupassati, rūpavantaì vē attānaì, attani vā rūpaì, rūpasmimim vā attānaì. Vedanai் ... pe ... saññai் ... sañkhāre ...
 attānam். Evaì kho, āvuso visākha, sakkāyadiṭthi hotī'ti.

- First, it is essential to realize that "atta" in the above verse used in the conventional sense, to denote "I."
- What we have discussed regarding "I am my body" is stated in the bold text above that can be translated as: "I am my body, my body is me, my body is in me, I am in my body"; see, "Anattā in Anattalakkahana Sutta - No Soul or an Ātma." Thus one may see one's rūpakkhandha as one's "att $\vec{a}$ " in four ways.
- In the same way, some people could take one's vedanā, sañ̃̄̄̄, sañkhāra, and viñ̃̄āna to be oneself in four ways as above. All these mental components give rise to the idea that "I remember this and that happened to me a long time ago; so there must be a continuation of me until the body dies." Therefore, this wrong view encompasses 20 types of ("visativatthuka") sakkāya dittthi."
- The French Philosopher Rene Descartes famously said, "I think; therefore I am"; he proposed that those thoughts arise in the pineal gland in the brain. That is a part of uccheda dittthi.

## Two Meanings of Atta

15. When one attains the Sotāpanna stage, one "sees with wisdom" (becomes "dassanena sampanno") that it does not make sense to take the stand "I am my body," etc. as above.

- However, "just seeing" that it makes sense, and verifying and experiencing that to be accurate, are two different things. One finally confirms that to be accurate and thereby gets rid of the perception of "me" (called "asmi māna") only at the Arahant stage.
- There was a lengthy discussion on this issue at the discussion forum. I recommend reading it since it is not possible to put it in a short post like this; see, "WebLink: Wrong English translations of Aniccha, Anatta, Sakkāya ditthi."

16. The confusion in conventional translations of sakkāya dittthi seems to arise when they try to connect "atta" in the above verse ("rūpain attāto") as the opposite of "anatta" in Tilakkhaṇa. Atta has two meanings: one meaning is "I" or "myself" as in "Atta Hi Attano Nātho" ("only I can be of salvation to myself'), and that is the meaning implied in the above verse.

- The other meaning of "atta" is "in control" or "has an essence", and the opposite of that is the anatta in Tilakkhana: "one is helpless in this rebirth process."
- Those two meanings are explained in "Attā Hi Attano Nātho" and in detail in, "Pāli Dictionaries - Are They Reliable?."
- That is why one needs to be cautious when using Pāli dictionaries. One cannot define and fix the meaning of a Pāli word. One HAS TO KNOW the context; see, "Pāli Dictionaries - Are They Reliable?."

## What is Vicikicch $\bar{a}$ ?

17. The second samyojana removed at the Sotāpanna stage is vicikicchā. Does it means doubts about the Buddha, Dhamma, and Sañgha as explained in many translations? It is informative to see how such doubts are related to the Tilakkhaṇa.

- Vicikicchā comes from vi+chi+ki+icchā. Our distorted views (diṭthi) that worldly things can lead to happiness lead to our liking ("icc $\vec{a}$ ") for them. We then take actions ("ki" or "kriya") are based on our craving. And, "Cha" means citta or the way we think, here based on such ditthi. In this case, "vi"
 wrong view that it is possible to maintain things to our liking is vicikiccha$\overline{\text {. See, \#11 above. }}$
- Therefore, vicikicchā goes away simultaneously with the loss of sakkāya diṭthi.
- One dissociates from such wrong views by comprehending "anicca nature." When one becomes a Sotāpanna, one automatically sees the "fruitlessness" in many immoral or inappropriate actions. One truly knows deep down that most of our efforts in pursuing sense pleasures are in vain. However, until one becomes an Anāgām $\bar{l}$, one is still attached to sense desires.
- For example, a Sotāpanna may still engage in sex, but will not engage in immoral sexual activities outside marriage. While the first can still lead to one's rebirth in the human and deva realms, the latter can lead to births in the apāy $\bar{a}$. A Sotāpanna is released only from the apa $\bar{y} \bar{a}$.
- In other words, if one has vicikicchā, one MAY do immoral apāyagāmī actions under tempting conditions. But a Sotāpanna is INCAPABLE of doing such actions under ANY circumstance. A Sotāpanna will not have any doubts about which activities are really immoral.

## What is Silabbata Parāmāsa?

18. The third samiyojana, silabbata parāmāsa, is the wrong view that Nibbāna can be attained by following specific precepts/rituals. They include five or eight precepts (or just by doing good things).

- Attaining Nibbāna REQUIRES lokuttara sammā ditṭhi. To achieve lokuttara sammā diṭthi, one needs to grasp the Tilakkhaṇa (anicca, dukkha, anatta). See, "Anicca, Dukkha, Anatta."
- When one comprehends anicca, one stays away from immoral actions. That happens not because one is firmly adhering to a set of precepts or rituals. Now one knows deep inside that such activities are fruitless and dangerous in the long run.
- However, following precepts (i.e., staying away from immoral deeds) is necessary to get to mundane sammā ditṭhi. That enables one's mind cleansed enough to be able to comprehend Tilakkhaṇa.

## Kāma Rāga NOT Removed at Sotāpanna Stage

19. Finally, a Sotāpanna needs to break two more samyojana or bonds - kāma rāga and patigha - to become free of the $k \bar{a} m a$ loka. Only an Anāgāmī is free of rebirth anywhere in the kāma loka, which includes human and six deva realms.

- The last five samyojana (including the perception of a "self" or māna) will be removed only at the Arahant stage; see, "The Cooling Down Process (Nibbāna) - How Root Causes are Removed."

July 24, 2020: A detailed discussion at "The Five Aggregates (Pañcakkhandha)" and "Origin of Life."

### 7.4.12 Akusala Citta - How a Sotāpanna Avoids Apāyagāmi Citta

1. First I need to clarify the title. Of course, citta (pronounced "chittha") are thoughts. All kamma start as mano sañkhāra, i.e., one starts thinking about something and it escalates into speech and bodily action by the "wheeling" or "riya" process; see, "Nibbāna - Stopping of the Sansāric Vehicle."

- The complete cessation of doing sañkhāra happens only when one becomes an Arahant. But after attaining the Sotāpanna stage, this "wheeling process" stops for certain types of initial thoughts or citta.

2. We have seen that apāya is a common word for the lowest four realms of existence, see, "The Grand Unified Theory of Dhamma." Apāyagāmī ("apāya" + "gāmi" means directed towards) citta are those that lead to potent kamma responsible for rebirth in the lowest four realms.
3. So, what citt $\bar{a}$ or thoughts get one started on the "wheeling process" or a "thought process" that leads to speech or bodily action of very bad consequences, i.e., birth in the apāyā? These are thoughts that arise because one does not have a full understanding of the "nature of this world", i.e., the Tilakkhana, or anicca, dukkha, anatta.

Out of the 89 possible citta (see, "The 89 Types of Citta") 12 are immoral citta.

- 8 with the lobha (greed) root; moha root is there too.
- 2 with the dosa (hate, ill will) root; moha root is there too.
- 2 with just the moha (ignorance) root.

ALL TEN immoral acts (dasa akusala; see, "Ten Immoral Actions (Dasa Akusala)") are done with these 12 types of citta.
4. We generate greedy thoughts because we "want to get possession of things that seem to provide happiness." When we do not get what we want, we generate hate or ill will towards whoever Is in the way.

- And we do both types of actions because we do not realize that it is not possible to achieve lasting happiness with anything in "this world." Not only that, but we also do not realize that by doing those bad actions we accumulate bad kamma (i.e., accumulate kammic energy) that are going to have bad consequences in the future, either in this very life or in future lives.
- Thus ignorance of the true nature of 'this world" is the cause of all bad actions done with greed and hate; this is why the moha root is in all of them. We also do certain bad actions just based on ignorance too, like comparing how one is "better" than another, etc.
A. The two ignorance-rooted citta are:
- One associated with vicikicchā (vichi+ki+ichcha = liking based on the distorted view, i.e, ditṭhi). Commonly vicikicch $\bar{a}$ is described as "doubt", which could be taken as "doubt about the true world view." Just like a fish biting on a bait due to not "seeing" the hook, we just grab things without "seeing"
the consequences, i.e., possible harm to others and the consequences of such harmful actions for ourselves.
- One associated with uddhacca (restlessness or agitation of the mind). This is the opposite of samādhi or the ability to concentrate and be able to think through the consequences of actions. One could have uddhacca even if one knows the "true nature" of this world; it is sort of a cumulative result of all defilements accumulated through beginning-less samisāra. This is completely removed only at the Arahant stage.

All 12 types of citta have ignorance as a root (primary as in the above two types) or as secondary in the other ten citta. These ten citta can be divided into two categories in another way, i.e., based on whether such citt $\bar{a}$ arise mainly due to vicikicch $\bar{a}$ (i.e., due to not knowing the true nature of this world) or uddhacca (i.e., the agitation of the mind due to all accumulated defilements).
B. Out of the eight greed-rooted citta, four arise with wrong view (ditthi), i.e., due to lack of understanding of the "true nature of this world", and that "this world" is much more complex than we perceive with our senses, and that our life does not end here, but what we do will have consequences for very long times into the future. The other four are done anyway, even with the right view, because of the agitation of the mind due to all "gunk" accumulated over the long sansāric journey. Thus the eight greed-based citta can be divided into two broad categories:

- Four done with wrong views (diṭthi) are removed at the Sotāpanna stage.
- Four dissociated from wrong view (i.e., it does not matter whether one has right view if defilements still cloud the mind; for example even one who has attained the Sotāpanna stage may do these four)
C. The two hate-rooted citta are also done regardless of whether one has the right view (at the Sotāpanna stage) or not:
- These two hate-rooted citt $\bar{a}$ are dissociated with wrong views but are due to the agitated mind (uddhacca). Thus they persist after the Sotāpanna stage, up to th Anāgāmī stage.

## Now we can see the broad view:

5. Five citt $\bar{a}$ (vicikicch $\bar{a}$ and the four greed-rooted citta associated with wrong view) arise because one does not know the true nature of the world, Tilakkhana, i.e, anicca, dukkha, anatta. They contribute to one of the four types of āsava called the ditthi āsava or ditṭhāsava.

These are the same citta that could lead to apāyagāmī kamma. Thus when one attains the Sotāpanna stage, these five citta cease to arise forever, and one WILL NOT BE ABLE to do any such grave kamma. Thus, the Sotāpanna stage is a very important stage of Nibbāna where āsavakkhaya happens to a significant level due to the removal of diṭthāsava:

- A Sotāpanna attains that stage just by getting rid of ditṭhi or wrong views: sathkāya (or sakkāya) diṭthi is the view that lasting happiness can be attained via pursuing things in this world. Vicikicch $\bar{a}$ is leads to tendencies and actions associated with wrong worldviews, and sīlabbata parāmāsa is the view that Nibbāna can be attained by following specific precepts/rituals without cleansing the mind.
- The other seven citta are the ones that are harder to remove. They arise due to an agitated mind which is a result of other defilements (āsavas) that we have accumulated over the long saimsāra; see. "The Way to Nibbāna - Removal of āsavas."
- Out of these, the two hate-rooted citta are lessened in strength at the Sakadāgāmī stage and are removed at the $A n a \bar{a} g a \bar{\imath} \bar{\imath}$ stage.
- The remaining four greed-rooted citta (those dissociated from wrong views) contribute to kamaraga (greed for things in the kamaloka). Kamaraga is lessened at the Sakadāgāmī stage and completely removed at the Anāgāmi stage. Thus an Anāgāmi is unable to generate hateful thoughts or lustful
thoughts and is free from rebirth anywhere in the kamaloka. An Anāgāmī has removed kamasava, another part of the $\bar{a} s a v a$.
- Finally, it is only at the Arahant stage that those remaining four greed-rooted citta (which still contribute to bhavasava) and the uddhacca citta (which still contribute to avijjasava) are completely removed. This is when all the defilements or āsavas are completely removed from one's mind.

6. It is clear that all five akusala citta that are removed at the Sotāpanna stage arise due to micchā ditṭhi, i.e., not comprehending the Three Characteristics of existence: anicca, dukkha, anatta. Also see, "Ditṭhi (Wrong Views), Sammā Diṭ̣hi (Good/Correct Views)."
7. This realization of correct views CANNOT be attained by following rituals, such as just obeying precepts. It comes naturally when one COMPREHENDS the true nature of this world of 31 realms: anicca, dukkha, anatta; see, "Anicca, Dukkha, Anatta." That it is unfruitful to involve in any kind of activities to gain mundane pleasures by hurting other beings. Such an understanding makes irrevocable changes in one's manomaya $k \bar{a} y a$, and thus prevents one from doing such activities even in the future lives.
8. Now it is important to realize that a Sotāpanna can be a parent taking care of a family. $\mathrm{He} /$ she will be doing a job, driving kids to school, and doing all other daily tasks. But one does all this with the clear understanding that one should NOT do certain things. One could live a moral life suitable for a Sotāpanna without giving up ANY responsibilities as a regular "householder." Actually one could even attain the Anāgāmī stage without becoming a bhikkhu. And there were many "householders" that had attained Sotāpanna, Sakadāgāmī, Anāgāmī stages at the Buddha's time; there are some even today.

## What is the only Akusala Removed by a Sotāpanna?

## Revised May 10, 2017;December 1, 2017; July 7, 2018; August 16, 2019; August 14, 2022

## Micchā Diṭthi - Only Dasa Akusala Completely Removed by a Sotāpanna

1. Upon attaining the Sotāpanna stage, micchā dittthi (the ten types of micchā ditṭhi together with wrong views of nicca, sukha, and atta) is COMPLETELY removed. That is one akusala out of dasa akusala. But that accounts for more than $99 \%$ of akusala (defilements) from one's mind since the "apāyagāmi strength" of the other nine akusala kamma are also removed.

- That illustrates the importance of removing micchā ditthi and why I have so many posts on that. Also, see the first discourse in "Three Marks of Existence - English Discourses."
- Some people think a Sotāpanna is incapable of breaking the five precepts based on an incorrect translation of the WebLink: suttacentral: Gihi Sutta (AN 5.179). The relevant verse is: "..ariyasāvako pānāātipātā paṭivirato hoti, adinnādānā paṭivirato hoti, kāmesumicchācārā paṭivirato hoti, musāvādā paṭivirato hoti, surāmerayamajjapamādaṭthānā paṭivirato hoti."
- However, "pativirato hoti" does not mean "abstains from" as translated at many online sites; it means "does not do with liking." Thus, a Sotāpanna may - under some conditions - break the five precepts. It is only an Arahant that will not break five precepts or engage in dasa akusala.
- The five precepts have deeper meanings, too: "The Five Precepts - What the Buddha Meant by Them."

2. With the removal of micchā ditthi, a Sotāpanna will be incapable of doing the following six deeds (per "WebLink: suttacentral: Bahudhātuka Sutta (MN 115)".)
(i.) Killing one's mother.
(ii.) Killing one's father.
(iii) Killing an Arahant.
(iv.) Injuring a Buddha.
(v.) Causing sañgha bheda (spreading wrong Dhamma is included here).
(vi.) Taking refuge in anyone other than a Buddha (i.e., believing in other ways of "salvation").

- Furthermore, a Sotāpanna will avoid an unimaginable amount of future suffering.

## Future Suffering Removed by a Sotāpanna

3. WebLink: suttacentral: Nakhasikha Sutta (SN 13.1) describes the vast amount of defilement removed by a Sotāpanna.

- One time the Buddha picked up a little bit of dust with the tip of his fingernail and asked the bhikkhus, "What do you think bhikkhus? Which is greater: the little bit of dust I have picked up with the tip of my fingernail, or the soil in this great Earth?."
- Of course, the bhikkhus answered that the amount of soil on this Earth is vastly more massive than the bit of dust on a fingernail.
- Then the Buddha told the bhikkhus that the amount of suffering that a Sotāpanna has removed could be compared to the soil on the whole Earth. The amount that he/she has left to stop can be compared to the bit of dust on his fingernail.
- Therefore, the amount of suffering a Sotāpanna has left in future rebirths is insignificant compared to that of an average human.

4. More analogies are given in a series of suttas starting with "WebLink: suttacentral: Pathamasinerupabbatarāja Sutta (SN 56.49)." "The amount of suffering a Sotāpanna has to endure can be compared to seven grains of sand on top of mount Sineru. The amount of suffering a normal human has left to endure can be compared to sand in the whole mountain."

- That is logical since the suffering encountered in the niraya never ceases. One birth in the niraya (hell) would lead to much more suffering than thousands of births in the human or higher realms.
- A Sotāpanna will NEVER be reborn in the four lowest realms due to the complete removal of ONE dasa akusala, that of micchā dittthi. Furthermore, he/she will have only seven future bhava left and those in the human realm or the realms above it.

## Removal of Micchā Ditṭhi Is Enough to Become a Sotāpanna

5. That may be why most people tend to think that attaining the Sotāpanna stage requires attaining jhānā, all sorts of abhiññ̄ powers, etc. None of that is a requirement for achieving the Sotāpanna stage.

- One may think that a Sotāpanna would have removed at least half of the ten evils (dasa akusala.) It turns out that a Sotāpanna completely removes only one of the dasa akusala, that of niyata micch $\bar{a}$ dițthi. Of course, in achieving that, a Sotāpanna would have reduced the "apāyagāmī strength" of most of the other dasa akusala. That is the key to understanding. In particular, abhijj $\bar{a}$ [abhijjh $\bar{a}$ ] or lobha reduced to rāga level and vyāpāda or dosa is reduced to pattigha level; see, "Lobha, Dosa, Moha versus Raga, Patigha, Avijijā."
- For a discussion on dasa akusala, see, "Ten Immoral Actions (Dasa Akusala)." As discussed in that post, Niyata Micchā Dittthi (established wrong views) is an akusala done with the mind.
- A Sotāpanna is said to have achieved "dassanena pahatabba" or removal of defilements via correct vision. He/she has removed an unimaginably vast amount of evils ("keles" or "kilesa" or "klesha") with the removal of micch $\bar{a}$ ditt thi, or attaining the first stage of Samm $\bar{a}$ Ditt thi : the true nature of this world of 31 realms.
- How a Sotāpanna reduces dasa akusala via getting rid of micchā dittthi 'to overcome apāyagām̄ citta" is discussed in "Akusala Citta - How a Sotāpanna Avoids Apayagami Citta." Here is it described
how five out of the 12 akusala citta do not arise after the Sotāpanna stage; those are the five that lead to birth in the apayy $\bar{a}$.

6. That is a critical point to understand. Removal of micchā ditṭhi leads to the stopping of highly immoral actions. Most people worry excessively about the defilements done with the body and speech. They are afraid of even accidentally killing an insect or telling a "white lie." Of course, those must be avoided, too, because moral behavior (speech and actions) are a prerequisite for cleansing the mind.

- But having niyata micch $\bar{a}$ ditthi is million-fold more weighty. These and other types of Niyata Micch $\bar{a}$ Ditṭhi (established wrong views) are discussed in "Ten Immoral Actions (Dasa Akusala)" and "Mahā Cattārīsaka Sutta (Discourse on the Great Forty)."
- It would be beneficial to understand the weights of different types of kamma; see "How to Evaluate Weights of Different Kammas."
- If one has a vessel that is leaking water, there is no point in trying to plug the smaller holes first. One should seal the largest hole first, which in this case is getting rid of micchā ditt hi or false views (about this world).
- That may still not convince some. If so, see whether this conclusion contradicts anything in the Tipiṭaka. One should carefully examine all the "requirements" that must be fulfilled to attain the Sotāpanna stage. It should become clear that this is all one needs to do.
- And that comes only via learning Dhamma, the correct version, the version discovered by the Buddha and passed down through generations of Noble Persons or Ariy $\bar{a}$. We discussed in detail in the post, "Four Conditions for Attaining Sotāpanna Magga/Phala."
- Of course, one needs to have removed micchā ditṭhi even to become a Sotāpanna Anugāmi: "Micchā Ditthi, Gandhabba, and Sotāpanna Stage."

## The Next Step

7. A Sotāpanna has removed the "wrong views" about the nature of this world. But the tendency to "feel" that there are mind-pleasing things in this world is still there.

- That is why we need to comprehend the term sañ̃̃ā, commonly translated into English as "perception."
- Of course, Saññā is one of 52 cetasika and one component of pañcakkhandha. It is one of the seven universal cetasika that arise with every citta.

8. Sañ̃̄̄ works very closely with another universal cetasika called manasikāra. Manasikāra is the cetasika that brings old memories and future hopes into a citta. When cetana "puts together the citta," the citta recognizes the subject (sañ̃ $\bar{a}$ ) and automatically produces vedana (feelings) about it. Thus we can see the significant roles of those four cetasika right away.

- But sañ̃̄ $\bar{a}$ is not limited to "recognizing objects." Sañ̃ $\bar{a}$ is the "inner understanding" of any concept.
- For example, when we hear "fire," we immediately recognize that. Even a picture of a fire may flash in our minds. But a baby (or someone who does not understand English) does not have a "sañña" for that word; it means nothing to them. But the baby (or that person) can understand what "fire" means if we teach it to them.
- Growing up, we acquire innumerable "sañ̃̃̄" mostly by becoming familiar with them. We first recognize who "mother" and "father" are, know different colors, different objects, etc. For details, see "Saññā What It Really Means."

9. Even though we acquire "sañña" for most objects and people, some strong saññ̄ $\bar{a}$ may be "passed down" from previous lives. That can take many forms.

- When visiting a place that one had never previously visited in this life, some people may already "know" about that place in great detail. Children who remember past lives have been reported to lead
investigators to various locations in faraway cities where they had lived in previous lives. Many adults have said they can walk a city with complete confidence that they are visiting for the first time.
- Then there is the "ability" to play the piano, recite sutta, or just be able to comprehend complex mathematics as a child, etc. Some of these cases discussed in "Evidence for Rebirth."

10. We "acquire" most sañ̃ña through our families first, then through friends, schools, workplaces, etc.

- Thus most of our "world views" or dittthis are acquired through our families. Our first impressions of moral issues, politics, and religions come from our families.
- Those saññās are hard to change, depending on how forcefully and frequently they have been used.
- However, the human mind is unique. When given enough substantial evidence, one's sañ̃̄̄̄about something or some concept can PERMANENTLY change. For example, when one learns how to do algebra (addition and subtraction, etc.) correctly, one will never forget that. And even if an authority figure (a teacher) insists that one plus two is four, even a child will not accept that. He/she can count fingers and show the teacher that the correct answer IS three.

11. As we grow up, we acquire saññā for more specialized tasks. One could "learn" to become a carpenter, a doctor, an engineer, etc.

- This "learning" is acquiring "saññ̄" for a particular task. It is not just memorizing how to do things. When a physician finishes his/her learning, he/she can "troubleshoot" a brand new patient and figure out what is wrong. When an engineer builds a new structure, it could be something that has not been made before. One acquires "skills."
- Once one learns a "skill," one will never forget that; at least it is easy to "get back to it." One who had learned to ride a bicycle as a child may never touch a bike for 30-40 years. But even at old age, he can ride a bike with minimal effort.

## Removal of "Micchā Sañn̄̄" or "Saññ̄a Vipallāsa" Needed for Higher Magga Phala

12. A Sotāpanna acquires a basic level of understanding about "this world" and that "knowledge" or "comprehension" does not go away even in future lives.

- Once someone sees a "glimpse" of the Buddha's core message, in the long run, there is no permanent happiness to be had by wishing for anything in this world
- That kind of a "vision change" does not happen quickly unless one has "sañña" about that from previous lives; that is why it is easier for some people to grasp these concepts.
- And this "sañ̃̄̄̄" cannot be acquired via memorizing suttā, how to recite the Paṭicca Samuppāda cycle, etc. Instead, one needs to COMPREHEND the concepts.
- The KEY concept to grasp is the "anicca sañ̃̃̄̄."

13. The only way to "build up" the correct sañ̃ $\bar{a}$ is to make an effort to understand the key message of the Buddha. Humans usually have wrong perceptions or "vipareetha sañña" that one can find happiness in this life by working hard. Most people do not even think beyond this life, even if they believe in rebirth. That is also called the "nicca sañ̃̄ $\bar{a} " ~(p r o n o u n c e d ~ " n i c h c h a ~ s a \tilde{n} \tilde{n} \tilde{a} "$ ), i.e., by working hard or by sheer luck, one can achieve and maintain things in this world to one's satisfaction.

- The fundamental teaching of the Buddha is about the "anicca sañ̃̄̄a," i.e., it is NOT POSSIBLE to maintain ANYTHING to one's satisfaction in the long run. The Sotāpanna stage of Nibbāna is attained when the anicca sañ̃̄ā is cultivated to some significant extent.
- When one has developed the anicca saññā to this level, one's mind automatically blocks "apāyagāmi citta."
- As we discussed in the Abhidhamma section, citta flow very fast, and we do not have control over those initial citt $\bar{a}$. In extreme cases like sudden rages or sheer greed, we will be unable to "control ourselves" without permanently removing "apāyagāmi gati" by getting rid of micchā ditṭhi.
- It is this anicca saññā that grows as one attains higher stages of Nibbāna (Sakadāgāmī and Anāgāmī) and peaks at the Arahant stage. At the Arahant stage, one can see the "anicca nature" of ALL sañkhāra, not only abhisañkhāra. That is what is expressed by "Sabbe sañkhāra anicca," and in the Girimānanda sutta, the Buddha told Ven. Ānanda, "Ayaì vuccati Ānanda, sabba sañkhāresu anicca sañ̃̄$\vec{a} " ;$ see, "Anicca, Dukkha, Anatta - According to Some Key Suttā."
- Therefore, before worrying about anicca saññā, one must remove the wrong diṭthi by becoming a Sotāpanna. See, "Vipallāsa (Ditthi, Sañ̃̃ā, Citta) Affect Sañkhāra."

14. When one develops the anicca sañ̃̃̄̄ via learning Dhamma (listening and reading), the tendency to act immorally, even under extreme pressure, will slowly diminish.

- One would be able to see the corresponding "cooling down" (reduced stress level) when one thinks back after several months (it could be sooner for some people). One will gradually feel the nirāmisa sukha and be drawn to Dhamma. One would automatically start spending more time learning Dhamma.
- One does not need to force anything except to make an initial determination to verify the truth of what I have discussed above by reading (and listening) and developing the "Dhamma vicaya" sabbojjanga. Make a habit of critically evaluating relevant posts at this site and from other sources. That is the best and most direct meditation technique for attaining the Sotāpanna stage. Buddha Dhamma is about learning the true nature of this world, which WILL automatically lead to the purification of the mind; see "The Importance of Purifying the Mind."
- The more one purifies one's mind, the easier it will become to grasp the key Dhamma concepts and cultivate the "anicca sañña." And developing anicca sañ̃̃̄ $\bar{a}$ itself leads to the purification of the mind. That is why learning becomes exponentially fast once getting some traction.

More on the anicca sañ̃̃̄̄ (for those who may be Sotāpannas) at: How to Cultivate the Anicca Saññā

### 7.4.14 Udayavaya Ñāṇa

- Udayavaya (Udayabbaya) Ñāna - Introduction
- Nibbatti Lakkhana in Udayavaya Ñāna
- Āhāra (Food) in Udayavaya Nāāna
- Udayavaya Ñāna - Importance of the Cittaja Kaya

These posts can be better understood if one has a good understanding of the gandhabba or manomaya kāya: "Manomaya Kāya."

### 7.4.14. Udayavaya (Udayabbaya) Nāạa - Introduction

February 12, 2016; revised October 23, 2018; re-written November 23, 2020; re-written September 25, 2022

Udayabbaya or udayavaya ñana is the knowledge of the mechanism responsible for the arising of rebirth (i.e., suffering) and the way to stop such arising (i.e., end of suffering.)

The udayavaya ñāna (ñāna pronounced "ngāna"; see the pronunciation guide in "Pāli Glossary - (L-Z)") is also referred to as the udayabbaya ñāna.

- The actual Pāli word is udayabbaya (I had inadvertently used the Sinhala word udayavaya). A description of the udayabbaya ñāna is in the Patisambhidāmagga Pakaraṇa: "WebLink: suttacentral;
1.1.6 Udavabbavañānaniddesa (KN Patisambhidāmagga 1.1 Ñānakathā)." [pakaraṇa : [nt.] an occasion; a literary work or exposition.]
- However, it is about the arising (udaya) and destruction (vaya) of a sañkhata. This is another example of two Pāli words combining to sound differently: udayabbaya.

## Pronunciation of udayavaya ñaña:

WebLink: Listen to Pronunciation: Udayavaya ñāna
This series of posts needs to be rewritten. It may take some time since I am busy these days with other things.

- However, it is not urgent to study udayabbaya ñāna in detail. As I explain below, if one understands "Paticca Samuppāda," one would have the udayabbaya ñāṇa.

## What is Udaya (Arising)?

1. Things in this world do not arise without causes. Births in the 31 realms occur due to six causes, which reduces to three root causes lobha, dosa, and moha. That is because the mundane versions of alobha, adosa, and amoha that give rise to births in the "good realms" above the four lowest realms are milder versions of lobha, dosa, and moha. See "Six Root Causes - Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna)."

- The "milder versions" of lobha, dosa, and moha can be removed only by comprehending the teachings of the Buddha embedded in "Paticca Samuppāda, Tilakkhana, Four Noble Truths."
- The mechanism of the arising of any sañkhata in this world is systematically described by "Paticca Samuppāda." Upon his Enlightenment, this was the first part of ultimate knowledge gained by our Bodhisatta to become a Buddha: "WebLink: suttacentral: Pathama Bodhi Sutta (KN Ud 1.1)."
- This forward (or anuloma) Paṭicca Samuppāda describes the "udaya" part of the udayabbaya ñāna.

## One Meaning of "Vaya" - Destruction

2. Anything that comes into existence in this world WILL be destroyed, without exception. That is one meaning of "vaya."

- For example, any sañkhata that comes into existence will exist for a certain duration (during which it will undergo unexpected changes) and then cease to exist. See, for example, "WebLink: suttacentral: Ananda Sutta (SN 22.37)."
- That is one meaning of "vaya." But that is not the meaning implied in the udayabbaya ñāna.

## Second Meaning of "Vaya" - "Stopping of Arising" or Permanent Destruction

3. The second meaning of "permanent destruction" achieved via eliminating all root causes is implied in the udayabbaya ñāna.

- A human being dies within about 100 years. That "death of a person" is the previous meaning of vaya for a human.
- However, that "lifestream" does not end at the death of the physical body. If that human gandhabba has more lifetime left, it will get into a suitable womb and give rise to another human body.
- Even when that human gandhabba dies, that lifestream will just "switch over" to another existence, such as Deva or animal.

4. A lifestream will come to an end ONLY at the Parinibbāna of an Arahant, i.e., when the rebirth process comes to an end. That is the meaning of vaya (complete and permanent stopping) in udayabbaya ñāna.

- That is achieved by eliminating avijjā (ignorance of the Four Noble Truths), i.e., "avijja nirodh $\bar{a}$ sañkhāra nirodho" leads to "sañkhāra nirodhā viññāṇa nirodho," etc. ending in "bhava nirodhā jāti nirodho" and, thus, to the end of suffering: "Evametassa kevalassa dukkhakkhandhassa nirodho hotī'ti."
- That is the reverse of the Pațicca Samuppāda or the pațiloma Pațicca Samuppāda, the second part of the udayabbaya ñāna gleaned by the Buddha: "WebLink: suttacentral: Dutiva Bodhi Sutta (KN Ud 1.2)."

## Udayabbaya Nāṇa - Fifty Types

5. The Pațisambhidāmagga Pakaraṇa analyzes the udayabbaya ñāna by describing 25 factors that lead to "udaya" of the five aggregates and 25 factors leading to their "vaya": "WebLink: suttacentral: 1.1.6 Udayabbayañānaniddesa (KN Patisambhidāmagga 1.1 Nānakathā)."

- Each of the five aggregates arises via avijjā, tanhhā, kamma, āhāra, and nibbatti lakkhaṇa. The last refers to the arising of a physical body (for rūpa) according to kammic energy.
- Each of the five aggregates ceases to arise with the cessation of $a v i j j \bar{a}, \tanh \bar{a}$, kamma, $\bar{a} h \bar{a} r a$, and viparināma lakkhana. The last is the natural death of a physical body in the case of rūpa. That happens at Parinibbāna of an Arahant.
- That is the basic idea of the udayavaya or udayabbaya ñāna.

### 7.4.14. Nibbatti Lakkhana in Udayavaya Nāṇa

## February 26, 2016

1. In the previous post, we discussed the first 25 factors that encompass what is involved in the "udaya" stage of udayavaya: "Udayavaya Ñāna - Introduction." Each of the five aggregates has five factors associated with it basically leading to its formation; thus there are 25 factors that give rise to each person's world.

- The five aggregates or the pañcakkhandha is much more complex than most realize. Please read the posts on pañcakkhandha to familiarize with it if you really want to grasp the udayavaya ñāna: "The Five Aggregates (Pañcakkhandha)."
- Also note that a given sañkhata (sankata in Sinhala) is a tiny fraction of pañcakkhandha. We have discussed the five stages of a sañkhata (sankata in Sinhala), and it is related to udayavaya ñāna. Buddha Dhamma is so deep, all these different descriptions are well-connected at some level.
- Do not worry if all this seems to be overwhelming (of course some people will be able to see the connections). It will make sense with time. Just keep reading posts that you have already read. They will make more sense each time you go back and read, especially after reading other relevant posts.

2. It is important to grasp the fact that anything that we experience, we experience only for a fraction of a second. Then it is gone to the "past pile" (atita; pronounced "atheetha") of the five aggregates or piles.

- Anything that we are only imagining or hoping to experience has not yet materialized; those are in the "future pile" (anāgata; pronounced "anāgatha") of the five aggregates.
- Only a negligibly small fraction is being experienced at a given moment: the "present pile" (paccuppanna; pronounced "pachchuppanna"); see, "Five Aggregates - Introduction."

3. All these things arise as a sañkhata (sankata in Sinhala), whether it is material (rūpa) or mental (vedanā, saññā, sañkhāra, viññāna). A given sañkhata (sankata in Sinhala) itself (not the experience) may exist for
brief moment, or some may last a long time (especially those belonging to rūpa aggregate). But even then parts of it are continually being "passed on" to the past.

- Think about a human being X . He/she starts with a single cell and grows by the day, becomes a baby, a child, a young person, an old person, and then is perished. So, when another person Y , is watching X grow, the "rūpa khandha" of Y continuously grew, all the while making the "past rūpa khandha" bigger each moment. When X is observing himself, that experience goes to his "rūpa khandha."
- At a given time, we can see only a momentary "snapshot" of a rūpa khandha. When X dies, all those stages -moment by moment - had gone to the past, and thus now belong to the "past rūpa khandha" of X and Y . Note that they are different: each one's experience of X is different.
- Now we can see why each person's pañcakkhandha is unique to that person.

4. Now we will analyze why all five aggregates have their origin in $a v i j j \bar{a}, \tanh \bar{a}$, and kamma: Because we have the wrong perception (nicca sañ̃ $\bar{a}$ ) that we can eventually reach happiness by craving for things in this world (avijjă), we get attached to somethings or hate other things (tanh $\bar{a}$ ), and then act accordingly (kamma).

- After one attains parinibbana (i.e., when an Arahant dies), there is no world to experience. No more pañcakkhandha.

5. The other two factors of $\bar{a} h \bar{a} r a$ and nibbatti lakkhana describe the "progression" of a pañcakkhandha that have the origins in avijja $\bar{a}, \tanh h \bar{a}$, and kamma.

- If it is a material thing (rūpa) it needs $\bar{a} h \bar{a} r a$ (food) to grow; they can be food that living beings eat or nutrients that plants need.
- If it is a mental thing (vedanā, saññā, sañkhāra, viññāṇa), it needs "mental food": phassa (contact), mano sañcetanā, and viññāna āhāra. We will discuss these later.

6. Any one of those five aggregates needs a "blueprint" or a set mechanism to arise, grow, mature, decay, and eventually cease to exist. This is what the fifth factor, nibbatti lakkhana, is about.

- This "blueprint" is made according to those three causes: it is a complex plan which takes into account many aspects that are formed by the level of avijjā (ignorance), kind of $\tanh \bar{a}$ (greed, hate), and kamma (kind of acts that were done with body, speech, and mind).
- Those complex factors give rise to nibbatti lakkhana, "blueprint" for any one of the five aggregates to rise. It can be called "production characteristics" of that particular sañkhata (sankata in Sinhala) belonging to one of the five aggregates.
- As we learn more, we will see that all five factors actually become causes, and are inter-related.

7. This is easier to see this with a human (or an animal). When a living being gets a human bhava, then based on a specific kamma vipāka that came to focus at the time of death in the previous bhava, a blueprint for the human bhava is automatically generated by kammic energy.

- That blueprint is the manomaya kāya or the gandhabba that we have discussed many times; see, the posts under the section "Manomaya Kāya."
- The arising of that human starting from a single cell in mother's womb happens according to the "blueprint" in that manomaya kāya: eventual height, eye color, skin color, etc were determined when a suitable womb was automatically selected according to the "gathi" of that being. That "selection process" - which happens automatically and not decided by any superior being - had chosen the matching parents for the gandhabba.
- That was the role played by the nibbatti lakkhana in this particular case.

8. Thus the particular bhava is determined by the particular action (kamma) : if that action was suitable for a dog bhava, then one would get a "dog bhava."

- But other characteristics of that dog are determined by the overall "gathi" of that being that it had acquired through uncountable previous births.
- Thus nibbatti lakkhana is a complex entity that takes into account numerous things, but two are prominent: the specific kamma and overall gathi.

9. For example two different beings could get the same "dog bhava." But no two dogs will look and behave alike. Some are vicious and some are loving. Some are big and some are small. The possible varieties are basically infinite. Even two "twin dogs" that look exactly the same will have at least some behaviour differences when they grow. Same thing applies to two humans.

- Thus nibbatti lakkhana is a complex mold of multiple factors. But only a Buddha can see why certain features are in a given being. Even a spot on dog is said to be due to some reason.
- Even though the "bhava" is determined by a specific strong kamma (called a janaka kamma), the actual body will reflect numerous kamma vipāka from numerous lives in the past.
- But as we have discussed elsewhere, what kinds of kamma vipāka can bring fruits will depend to a large extent on having suitable conditions available. If one acts foolishly that will allow some bad kamma vipäka from the past to bear fruit. In the same way, by acting with mindfulness one can avoid such bad outcomes and even bring about good outcomes due to past good kamma vipāka.
- There are several posts that discuss the above important fact. For example, "What is Kamma? - Is Everything Determined by Kamma?" and "Anantara and Samanantara Paccayā."

10. Therefore, it is important to realize that it is manomaya kāya does not determine one's future rigidly; some of the "production characteristics" can change. It is not like making a robot in a factory according to a set blueprint.

- It is easy to see that one's body structure can change according to one's lifestyle. If one becomes careless and start eating indiscriminately, one will become obese. Even one's character can change by one's motivation and due to external influences.
- Thus nibbatti lakkhana are not deterministically set. The overall gathi can change and the manomaya $k \bar{a} y a$ and the physical body in turn can change.

11. The main reason for this flexibility is that the manomaya kāya has three "components": kammaja kāya, cittaja kāya, and utuja kāya; see previous posts on manomaya kāya.

- The kammaja kāya is the one that is really pre-set. It had taken into account the reasons (kamma vipäka) that led to the particular bhava.
- The critical component that is under OUR CONTROL is the cittaja kāya. This is basically how we think (that leads to our speech and bodily actions). And how we think depends on our level of ignorance (avijjā).
- The third component is the utuja k $\bar{a} y a$, which is basically the fine body of the gandhabba. It is being created and changed CONTINUOUSLY due to both the kammaja kāya and cittaja kāya. The fine matter based on suddhaṭthaka are being created due to kammaja kāya and cittaja kāya; see, "The Origin of Matter - Suddhatthaka."

12. Thus the evolvement of a human being is a complex process. But one could get a good basic understanding by comprehending the above basic structure. We will go into more details in the future, but let us discuss a few more important aspects.
" Now we can see that the physical body is just a "shell." There is gandhabba inside that physical body and controlling it; see, "Ghost in the Machine - Synonym for the Manomaya Kāya?."
13. Thus, these physical bodies that we value so much are really lifeless shells. The essence - gandhabba - is hidden inside that physical body.

- The utuja k $\bar{a} y a$ of the gandhabba is the one that is spread over the whole physical body gives it a "life." It is a fine grid that overlaps our nervous system, and that is how we feel body sensations.
- Under some extreme stresses, the gandhabba can get out of the physical body. This is what is known as the out-of-body experience (OBE); see, "Manomaya Kāya and Out-of-Body Experience (OBE)." When that happens the physical body is lifeless, and doctors have declared many heart patients undergoing operations to be dead for several minutes only to find out later that the patient is alive (gandhabba had returned to the body).

14. The critical point for our present discussion is the fact that once born with a human body, the human gandhabba can determine its own nibbatti lakkhana to some extent by wisely using the cittaja kaya.

- It is this cittaja kaya that ultimately makes it possible for a human to attain Nibbāna.
- One can change one's gathi (habits/character) by comprehending first moral versus immoral, and then comprehending the anicca nature of this world.
- Most people do not realize the importance of the cittaja kaya. This is in essence why a Buddha is needed to reveal the true nature of this world, and to teach how to use the cittaja kaya (i.e., the way one thinks, and therefore speaks and acts): First to stay away from immoral behavior to cleanse the mind to some extent, and then to comprehend the anicca nature.

15. The nibbatti lakkhana for any sankkhata (sankata in Sinhala) associated with any of the five aggregates work similarly. Let us consider a certain viññāna that we experience when seeing a person X.

- That viñ̃̃āṇa depends on who is looking at X . If it a loving parent for Y , then Y will generate a "loving viññāna" upon seeing X. That viññāna will arise, stay there for a certain time, and fade away as the mind is directed to something else. But when that viññāna arises, it arises with some nibbatti lakkhana associated with one's own past experiences with X. An enemy of X (say, Z) could generate a "hateful viñ̃āṇa."

16. It is easy to see that other three aggregates in the above example will also arise accordingly.

- Y will generate happy feelings (vedanā), will recognize (sañña $\bar{a}$ ) X as a parent, and may generate some kind of action or speech via sañkhāra. On the other hand, Z will generate an entirely different set.
- Thus the four mental aggregates are related to each other.

17. In Buddha Dhamma everything that we learn about is connected to each other at some level. It is the whole fabric of nature. Each and every piece of information is part of a complex puzzle. When one begins to see how it all fits together, one's mind becomes joyful, and provides incentive and desire to learn more about the true nature of this complex world.

## Next in the series, "Āhāra (Food) in Udayavaya Ñāna."

### 7.4.14. Āhāra (Food) in Udayavaya Ñāṇa

## March 19, 2016

1. First part of the Udayavaya Ñāna involves the causes for the arising of sañkhata (sankata in Sinhala) (and hence arising of pañcakkhandha). Out of the five main factors (avijja, taṇhā, kamma, āhāra, and nibbatti lakkhana), we discussed the nibbatti lakkhana in the previous post of the series.

- Many posts at the site discuss the first three factors, so will now discuss the remaining factor, $\bar{a} h \bar{a} r a$ (food), that is both a cause and a condition for the arising of pañcakkhandha.

2. When we think of $\bar{a} h \bar{a} r a$ (which means food in both Pāli and Sinhala), we automatically think about food that we consume to stay alive. However, it is clear from the previous two posts that a physical body is just a
shell that is "controlled" by a gandhabba. There are many other posts on gandhabba in the "Manomaya Kāya" section. Here is a summary of some concepts discussed there:

- In effect, we have four kinds of bodies (kāya): the physical body (karaja kāya) is the one people normally associate with the perception of a "me." But we have three "mental bodies" that are collectively "manomaya kāya" or "gandhabba." Those three are kammaja kaya, cittaja kaya, and utuja kaya.
- In a way, the physical body is just a shell that we use for about 100 years or so and discard at death; the gandhabba leaves that dead body and waits for a suitable womb to make another physical body, if there is kammic energy left in the human bhava.
 are consumed by the gandhabba.
- The gandhabba consumes three kinds of mental food: phassa āhāra, mano sañcetanā āhāra, and viñ̃̄āṇa āhāra.

3. A given Kammaja kāya was created at the cuti-patisandhi moment by a powerful previous kamma, and its energy just gets depleted with time. For example, if a particular human bhava came into existence with enough kammic energy to support a human life for 1000 years, then that energy will be slowly spent over 1000 years. In other words, kammaja kāya does not need any additional energy, i.e., āhāra.

- In a way, all three types of mental foods are consumed by the cittaja kāya. And some of the energy from the kammaja and cittaja kaya are converted to suddhatthaka (matter), and that is what makes the fine body (utuja kaya) of the gandhabba, which is too fine for us to see.
- As I mentioned in the previous post is this section, "Nibbatti Lakkhana in Udayavaya Ñāna," the critical component that is under OUR CONTROL is the cittaja kāya. We can overcome our "loosely preset destiny" embedded in the kammaja kāya by cultivating our cittaja kāya, or basically our thoughts and thereby our behavior (gathi). This is what makes it possible to attain Nibbāna!

4. Let us first discuss the kabalinkkāra āhāra. There are two relevant meanings for this name. The first meaning is associated with what this type of āhāra does: to energize the physical body. Here "kabalink $\bar{a} r a "$ comes from "kayata bala dena" in Pāli or Sinhala where "kāya" is body, "bala" is energy or power, and "dena" means provide.

- Therefore, kabalink āra āhāra here means the food we eat to make our bodies grow and keep energized. Without food, a physical body that starts in the womb of the mother cannot grow to a baby and then once comes out cannot grow to be an adult. Without kabalink $\bar{a} r a$ āhāra that particular sañkhata (sankata in Sinhala) cannot survive, and thus is an essential factor contributing to part of the pañcakkhandha.
- This kind of kabalink āra āhāra is essential for the survival for humans and animals (and also devas). Devas consume just one kind of kabalink āra āhāra called "amurtha"; it is a drink that they consume, which leaves no residuals. Thus, they don't need to worry about sweating, urinating, or defecating.
- Thus kabalinkkāra āhāra are needed only in kāma loka. As we will see below, when one loses craving for kabalink $\bar{a} r a ~ a ̄ h a ̄ r a, ~ o n e ~ w i l l ~ n e v e r ~ b e ~ b o r n ~ a g a i n ~ i n ~ t h e ~ k a ̄ m a ~ l o k a, ~ i . e ., ~ o n e ~ b e c o m e s ~ a n ~ A n a ̄ g a ̄ m \bar{l} . ~$
- There are no solid bodies (karaja kāya) in either rūpa loka or arūpa loka. In rūpa loka there is only the "thrija kāya" or the three mental bodies of kammaja kāya, cittaja kāya, and utuja kāya. Thus in the rūpa loka beings are essentially gandhabbas but that term is normally reserved for humans and animals when they are in the para loka waiting for a womb; see, "Hidden World of the Gandhabba: Netherworld (Paraloka)."
- In the arūpa loka, there is no utuja kāya either. Except for the hadaya vatthu, there is no rūpa associated with an arūpa brahma.
- It is not essential to know all these details, but these details are needed to complete the "big picture", especially for those who are interested in finer details.

 $k a \overline{m a}$ loka to enjoy them; see, "How Perceived Pleasures (Assāda) lead to Dukkha."
- Thus, the stronger the craving is, harder it is to "escape from the kāma lokas."
- This is a good example of how (abhi)sañkhāra or strong cravings/hopes/desires lead to corresponding bhava and thus corresponding births ( $j \bar{a} t i)$.
- In pațicca samuppāda, "avijjā paccayā sañkhāra" is followed by "sañkhāra paccayā viññāna," and leads to "upādāna paccayā bhava" and "bhava paccayā jāti." Thus generating (abhi)sañkhāra for kabalink $\bar{a} r a ~ a ̄ h a ̄ r a ~ l e a d s ~ t o ~ r e b i r t h s ~ i n ~ t h e ~ k a ̄ m a ~ l o k a, ~ b u t ~ m o s t ~ t i m e s ~ i n ~ u n e x p e c t e d ~ w a y, ~ a s ~ w e ~ d i s c u s s ~$ below.

6. One NEEDS to consume kabalinkāra āhāra to provide one's body with the nutrients it needs to live a healthy life. However, if one craves for tasty foods in excess, kabalink āra āhāra can become a CAUSE to for the arising (udaya) of future births in the kāma loka.

- This is why it is NOT actual consumption of tasty foods that contributes to making "kāma bhava." It is the excess greed for tasty foods (kāma assāda); see the section on, "Assāda, Ādīnava, Nissarana."
- This second type of "pada nirukthi" or the "origin of the phrase" kabalinkkāra āhāra comes from "kāya bali karana" which means "leading to distorted body." Here the word "bali" or "distort" applies because the body that one acquires in a future life is due to such greedy sañkhāra could be much different than expected. This is the deeper meaning of kabalink $\bar{a} r a ~ \bar{a} h a \bar{r} a$ in the udayavaya ñāna.

7. Such excessive greed for food matches the "gathi" of pretha beings. Thus when one cultivates such greedy (abhi)sañkhāra, it leads to corresponding "pretha bhava" and thus "pretha jathi" in the future.

- When encountering delicious food, some people lose any sense of decency. The greediness shows, and when eating such a meal some display "animal like" behavior, spilling food and getting the food all over their face. That is a display of "greedy animal like" sañkhāra. When they cultivate such sañkhāra, the corresponding birth could be that of a pig.
- And then there are some who do not like to share such food and like to keep others away from enjoying such meals. That could cultivate sañkhāra of a "vicious dog." We see such dogs all the time; they growl when another dog comes even close to their food.

8. Once one gets the basic idea, it is easy to see various kinds of pretha and animal sañkhāra can be cultivated even without realizing it, and can lead to future births corresponding to such "gathi."

- And the cultivation of such extreme gathi is a consequence of not knowing or not comprehending Buddha Dhamma, specifically pațicca samuppāda ("pati ichcha" leading to "sama uppada"); see, "Paticca Samuppāda - "Pati+ichcha"+"Sama+uppāda."
- And such sañkhāra CANNOT be suppressed by sheer will power alone. One needs to learn Dhamma and realize that they DO LEAD to bad consequences. Again, see the section on "Assāda, Ādīnava, Nissarana."

9. There are "good births" in the kāma loka too: the human realms and the deva realm. Bhava (and birth) in those realms also are according to one's (abhi)sañkhāra, which of course are generated according to one's dominant gathi.

- Those who cultivate human and deva sañkhāra like to enjoy sense pleasures, but they are not excessively greedy. They don't have mentality of "may all good things come to me, AND not to others." They are content with what they get and willingly share the excess with others.
- One is not released from the kāma loka until one's cravings for sense pleasures completely goes away when one comprehends not only the futility of such sense pleasures but also the possible dangers.

10. At even a deeper level, the tendency to generate such extreme greed goes away AUTOMATICALLY when one starts comprehending the "anicca nature." That it is not possible to achieve and maintain pleasurable worldly things (including food or beautiful bodies that result from eating such foods) as one desires.

- And this change in the mindset and the change in corresponding personal behavior may not reverse in a short time. But as one learns Dhamma, one will be able to see the change over time: Sometimes in a few weeks or even several months.
- The Buddha compared this "gradual transition" to the growth of a tree or a plant. One cannot see the change in the growth of a plant day by day; there is no point in checking it every day to see whether can see the growth. But if one takes care of the plant by providing it with nutrients and keeps the weeds away, one will be able to see the growth over a few weeks or months. And then one day, can reap the benefits of all that work when the plant blossoms and provides the flowers/fruits.

11. Therefore, the key is to LEARN Dhamma and also to comprehend it by contemplating on it, which is MEDITATION. But it is critical to learn the correct Dhamma.

- A good example of the wrong way to meditate is what many people are doing with the pațikūla manasikāra bhāvanā. Many translate "patikūla" as "pilikul' in Sinhala, which means 'to be rejected because it is repulsive." They meditate on contemplating the repulsiveness of the body (sweat, urine, and feces generated by the body) and also the fact that once one chews on even the most delicious food, it becomes "vomit."
- But the Buddha did not advice that. Just as we should not desire extreme sense pleasures, we also should not be repulsed by the things that we mentioned in the above paragraph. They both generate taṇha , in the first instant by attachment (craving) and in the second by aversion (patigha). The neutral mindset (upekkhā) comes from understanding the true nature of things.

12. Now we can see that the connection of kabalinkkāra āhāra in the udayavaya ñāña has two facets:

- One plays a role in taking care of the physical body that we have inherited due to past causes. If we are not mindful of what we eat, it can lead to bad consequences via the body that we already have. If we are mindful, we can make that body to work optimally for achieving our goals, both mundane and transcendental. And of course, if the physical body does not get enough kabalinkāra āhāra, it will die.
 future births via generating (abhi)sañkhāra related to pleasurable foods.
- It is said that one can become an $A n \bar{a} g \bar{a} m \bar{l}($ i.e., stop rebirths in the $k \bar{a} m a$ loka) by comprehending the true nature of kabalink $\bar{a} r a ~ a ̄ h a ̄ r a$. Then one loses the craving for any sense pleasures in the kāma loka. But such a mindset is unfathomable for a normal human who only sees the immediate sense satisfaction. Furthermore, such a mindset CANNOT be achieved by sheer will power; it has to be through understanding the anicca nature of kāma loka.

Next in the series, "Udayavaya Ñāna - Importance of the Cittaja Kāya."

July 22, 2016; December 1, 2017; December 14, 2019

## Three Components of Mental Body (Manomaya Kāya)

1. In previous posts in this series, we discussed kabalinkāara āhāra for the physical body and three types of āhāra for the "mental body" (or manomaya kāya or gandhabba): phassa āhāra, mano sañcetanā āhāra, and viññāna āhāra.

- The manomaya k $\bar{a} y a$ or the gandhabba consists of three components: kammaja kāya, citta kāya, and utuja kāya. The kammaja kāya gets its energy at the beginning of that bhava, and does not require any external $\bar{a} h \bar{a} r a$. The utuja kāya is sustained continuously via fine rūpa produced by kammaja kāya and cittaja kāya.
- Therefore, the three types of $\bar{a} h \bar{a} r a$ for the manomaya kāya are all consumed by the cittaja $\boldsymbol{k} \overline{\boldsymbol{a}} \boldsymbol{y}$. This cittaja kāya is nothing else but the stream of thoughts that we generate.
- An aside: Sometimes the gandhabba can inhale "aroma" or gandha (kabaliñkāra āhāra) and have a fine (misty) physical body too; thus the name gandhabba, where "abbha" means "inhale" or in this case "absorb." Such "more solidified" are the ones that people can sometimes see, and even be captured by a camera.

## The Big Picture

2. Now we can take a step back and look at the big picture, and it gives a very illuminating view. This "big picture" could be very helpful in comprehending the anicca nature. Of course, this is not the only way to grasp anicca nature.

- The physical body that we value so much and think about as "me" is just a temporary shell. Just like anything material in this world, it grows and peaks and then starts the downhill march ending in decay and eventual death. At the death of physical body, the gandhabba that comes out and has to wait for a suitable womb to start building a new body, if the human bhava still has more kammic energy leff; see, for example, "Bhava and Jāti - States of Existence and Births Therein" and "Gandhabba - Only in Human and Animal Realms."
- This is a key factor that contributed to the concept of a "self" ("āthma") in Hinduism. Hindu yogis who cultivated abhiññ̄ $\bar{a}$ powers could look back at a finite number of previous lives and could see a gandhabba giving rise to repeated rebirths in human form (they likely practiced jhāna in those recent previous lives, which made it easier for them to attain abhiññ̄a powers in this life).
- However, they could not see far back enough to see that one could be born an animal or even worse too.

## An Analogy

3. For humans and animals, we can compare the physical body controlled by the gandhabba to a car (or any other vehicle) being driven by a person. The body of the vehicle is like our physical body, and the driver is analogous to the gandhabba. Without the gandhabba, the physical body cannot do anything; it would be a lifeless, i.e., a dead body. It is the gandhabba that "operates" the human body; see, "Ghost in the Machine - Synonym for the Manomaya Kāya?."

- The birth of a gandhabba, in turn, is due to the kammic energy that was created in a previous life. The kammaja kāya represents that energy (which will be slowly depleting with time.) The term kammaja $k \bar{a} y a$ comes from "kamma" and " $j a$ " and "kāya." Here " $j a$ " means "birth" or "origin" and "kāya" is the body. Thus kammaja kāya means the "body that was created due to kamma."
- Similarly, cittaja kāya arises due to citta (loosely translated as thoughts).
- "Utu" means "change" and the utuja kāya is that part of the gandhabba body which arises by conversion of kammic energy and the energy from citta (javana).

## We Have Control Over Cittaja Kāya

4. Now, we can see the critical importance of citta. Kammaja kāya itself arises due to previous kamma, i.e., by citta in a previous life. More specifically, javana in such citta provided the energy for a new bhava which lead to the kammaja kāya; see, "Javana of a Citta - The Root of Mental Power."

- Kammaja kāya is just a result, and it will slowly lose its energy over the human existence. We cannot do anything about (but if one does an anatariya kamma it will be shortened). Thus it is only the cittaja $k \bar{a} y a$ that we have control over. This is critically important. We have finally converged to the essence of a human being.
- This is why the Buddha said "Mano pubbangama Dhamma....." The origin of anything in this world can be traced back to the mind (thoughts).
- Here we see the truth of the above statement for living beings. In the future, it will become clear that ANYTHING in this world has origins in the mind. That is the story in the Aggañ̃a sutta. But we have to proceed step-by-step. An introduction at, "Buddhism and Evolution - Aggañña Sutta (DN 27)."

5. We have the control over our own destiny via our thoughts or cittaja kāala. I cannot emphasize enough the critical importance of the cittaja kāya.

- Therefore, we have to pay attention to what kind of āhāra (conventionally translated as food, but you can see that is not a good translation) that we provide for our thought stream. But we have control over only those thoughts that we initiate.

## Two Types of Citta (Viññ̄āna) and Associated Feelings (Vedanā)

6. There are two types of thoughts. Some citta arise due to kamma vipāka. For example, we may get to taste a delicious meal due to a good kamma vipāka and while eating it we feel "jivh $\bar{a}$ viññāna," i.e., those come through our sense of taste. These do not have abhisañkhāra. Also see, "Moha/Avijijā and Vipāka Viññāna/Kamma Viññān̄a" and "Vedanā (Feelings) Arise in Two Ways."

- There is another set of citta that we initiate. For example, based on that tasty meal, we start thinking about coming back to the same restaurant in the future, how to make it at home, etc. These generate abhisañkhāra. The worst kind is apuññäbhisañkhāra, where we think about ways to get that meal in an immoral way, say, by stealing.
- But if it is just some food that quenches the hunger, we do not generate that type of citta subsequent to the vipāka citta.
- In another example, we see millions of things in a day (via vipāka citta), but generate abhisañkhāra only in a few.

## The Unending Cycle of Kamma/Vipāka

7. The Buddha said, "kammā vipāk $\bar{a}$ vaddanthi, vipākā kamma sambhavo, thasmā punabbhavo hothi, evan loko pavaththathi."

- What that means is: "Because of kamma vipāka we experience sense inputs; based on those we initiate new kamma (abhisañkhāra), and those, in turn, will bring vipāka in the future; that is how the world evolves (rebirth process continues)."
- Thus the critical part is where we generate abhisañkhāra. This is done with javana citta. We will discuss this using citta vithi in the future, but let us try to get some basic understanding of how these javana citta can be controlled. There are many posts in the "Mind and Consciousness" and "Citta and Cetasika" sections on citta and citta vīthi.

## The Key Is to Change Our Gati

8. In fact, javana citta run too fast to control at that time. Billions of citta run in a second. How can we control them? We cannot control them in situ, as they initially arise.

- Javana citta arise due to our gati! This is the key.
- For example, an Arahant is not be tempted by any attractive sense input. He has removed all āsavas (cravings) and there is no anusaya to bubble up. He/she has "Noble gati of an Arahant."
- On the other hand, a Sotāpanna may be tempted by that attractive sense input. He has not removed all $\bar{a} s a v a s$ (cravings); but he/she has removed gati suitable for the apāyā, so javana citta corresponding to highly immoral acts will not arise .
- The $\bar{a} s a v a$ (or gati) are analogous to the dirt in the bottom of a well. If the well water is perturbed, some dirt can come to the surface (anusaya). (i.e., if a sense input matching our gati comes into play, bad thoughts automatically come into the mind). This is discussed in the post, " 3 . The Second Level - Key to Purify the Mind" in the Meditation section.
- When one attains the Sotāpanna stage, the worst types of "gunk" will be removed. The rest will be removed in three more stages (Sakadāgāmī, Anāgāmī, Arahant).

## $\bar{A} n \bar{a} p \bar{a} n a s a t i / S a t i p a t t h \bar{a} n a$ - Only Way to Change Gati

9. In a normal human, whether or not immoral javana citta will be triggered, will depend on his/her set of $\bar{a} s a v a s ~(o r ~ g a t i)$ ). If that particular sensory input is attractive (i.e., matches his/her $\bar{a} s a v a s$ ), then he/she may automatically initiate a highly immoral act to pursue that sense input.

- But the key here is the following. Even if such immoral javana citta arise, one can still suppress them before the actual act is done, if one has learned Satipaṭthāna (or Ānāpāna.) For extremely immoral acts, like killing another human, most people will be able to control such thoughts even without knowing about Satipattthāna. But the more one learns Dhamma, and the more one understands the consequences, one will be able to have firm control even over minor offenses.
- Furthermore, the more one controls one's actions this way, the more one's gati will change for the better. This is another key! This has been discussed in detail in, " 9 . Key to Ānāpānasati - How to Change Habits and Character (Gati)." There are several posts under that topic.

## Irreversible Change of Gati with Understanding of Tilakkhaṇa

10. A large chunk of immoral gati goes away just via comprehending anicca, dukkha, anatta at the Sotāpanna stage. In fact, those gati that are suitable to be born in the ap $\bar{a} y \bar{a}$ will be removed. This is called "dassanena pahāthabbā," i.e., "removal via correct vision."

- Thus highly immoral javana citta do not arise in a Sotāpanna. A well that has been cleaned of the visible dirt at the bottom can not be muddied by perturbing the water in that well. Just like that, highly immoral thoughts do not arise in a Sotāpanna because it is free of "worst gunk."
- However, to be able to grasp anicca, dukkha, anatta, one's mind needs to be cleansed to some extent. One needs to gradual changing of one's gati or āsava. The way to get there is to practice the correct Ānāpāna bhāvanā (or Satipaṭthāna bhāvanā.) See, "Is Ānāpānasati Breath Meditation?."

## Udayavaya Nāṇa - How Suffering Arises and How It Can Be Stopped

11. Thus the key to Nibbāna is in the uadayavaya $\tilde{n} \bar{a} n a$ : future rebirths arise (uadaya) due to abhisañkhāra (or cetanā) in our javana citta. By controlling immoral thoughts via reducing our āsava (bad gati), we can eventually stop them from arising.

- This is done by always being vigilant about the moral or immoral thoughts that come to our minds; this is Satipaṭthāna; see, "Mahā Satipatthāna Sutta." Then if the thought is moral, we cultivate it (āna); if it is immoral, we stop it (pāna) before it leads to bad speech or actions; this is $\bar{A} n \bar{a} p \bar{a} n a ;$ see, " 7 . What is Ānāpāna?."
- The other key point is that the more cleans one's mind, the more one will be able to comprehend. In particular, comprehending anicca, dukkha, anatta, REQUIRES a mind cleansed to some extent.
- I hope you can see that this is a feedback loop: each time one goes through the loop (being vigilant or satipatṭhana to cleansing the mind or ānāpāna to more cleansed mind to grasping deeper Dhamma and back to being vigilant), one makes progress.

## Importance of Tilakkhana

12. This effect is greatly amplified when one finally grasps Tilakkhana: One comprehends the futility of staying in this rebirth process (anatta.) Anything that we acquire through much effort cannot be kept to our satisfaction in the long run (anicca) and eventually lead to nothing but suffering (dukha.) When one can "see" that, one will realize the urgency to reduce and remove one's āsava (bad gati). This leads to the Sotāpanna stage.

- A huge chunk of āsava (bad gati) simply disappear just via this understanding of the anicca nature at the Sotāpanna stage. Highly potent immoral javana citta do not arise in the mind of a Sotāpanna. Then no more rebirth in the ap $\bar{a} y \bar{a}$ or the four lowest realms.
- Thus with udayavaya nāana, one can really clarify the path to the Sotāpanna stage.
- Then the remaining āsava disappear (āsavakkhaya) via three more stages (Sakadāgāmī, Anāgāmū, Arahant) by continuing this process (Ānāpāna and Satipatṭhāna), and one attains Nibbāna, permanent happiness or the removal of all future suffering.
- But one also needs to do Ānāpāna and Satipattthāna before the Sotāpanna stage in order to cleanse the mind to a level that is capable of grasping anicca, dukkha, anatta.

## Closing the 'Gaps"

13. Finally, I would like to close the loop by pointing to the connection to the concepts we have discussed in the early posts. The gandhabba consumes three kinds of mental food: phassa āhāra, mano sañcetan $\bar{a}$ $\bar{a} h a ̄ r a$, and viññ̄ṇa āhāra.

- As we saw in the previous post in this series, "Āhāra (Food) in Udayavaya Ñāna," all three types of mental foods are consumed by the cittaja kāya. And this confirmed by the above discussion: Our initial sense inputs that COULD trigger javana citta come via phassa, sense contacts. They are JUST contacts. But based on those, we COULD accumulate new kamma vipāka (abhisañkhāra) by making samphassa; also see, "Vedanā (Feelings) Arise in Two Ways."
- Mano sañcetanā āhāra (which are abhisañkhāra) come into play during those samphassa; this simply means we start "making plans", and also keep going back to that sensory input. With repeated triggers for a given sense input (samphassa) provides āhāra for that viññanna; for example, see, "2. Viññāna (Consciousness) can be of Many Different Types and Forms," and other relevant posts.

By reading the links given (and also using the "Search box" at top right) one should be able to clarify key issues. Please don't hesitate to comment if you need help in clarifying a given concept.
14. Also, please make sure to enter your email address correctly when making a comment. Recently, one person entered incorrect address, and sent me the same question twice. Unfortunately, I have no way of letting him know that I replied each time.

## VIII Tables and Summaries

○ "Pāli Glossary - (A-K)"

- "Pāli Glossary - (L-Z)"
o "List of"San" Words and Other Pāli Roots"
o "The 89 Cittas"

- " 37 Factors of Enlightenment"
- "Conditions for the Four Stages of Nibbāna"
- "Ultimate Realities - Table"
- " 31 Realms of Existence"

### 8.1 Pāli Glossary

1/2/16: It seems that the audio files are not loading, so just removed the audio files.
We now have a Popup Päli Glossary with Pronunciation.

## Possible Confusion in Pronunciation

It seems that the following conventions were adopted in order to make the text shorter.

## In many cases:

1. "c" needs to be pronounced "ch" as in "charm" or "chicago."
2. "t" needs to be pronounced "th" as in "thud" or "throw."

- For example, citta pronounced "chiththa", cakkhu is pronounced "chakkhu", anicca as "anichcha", anatta as "anaththa", $j \bar{a} t i$ as "jathi", taṇhā as "thanha", tilakkhana as "thilakkhana."

3. "d" needs to be pronounced "th" as in "this" or "that." Note the difference in pronouncing "th" between 2 and 3 .

- For example, vedanā or dāna (as in giving) is pronounced this way.

## Pronunciation Key

á rhymes like pat $\hat{\mathrm{a}} \rightarrow$ care $\tilde{\mathrm{a}} \rightarrow$ pay $\overline{\mathrm{a}} \rightarrow$ father $\hat{\mathrm{e}} \rightarrow$ pet $\ddot{\mathrm{e}} \rightarrow$ bee th $\rightarrow$ thin dh $\rightarrow$ this $\ddot{\mathrm{o}} \rightarrow$ toe $\mathrm{u} \rightarrow$ moon ch $\rightarrow$ chin ng $\rightarrow$ thing

## Common Pāli Words

I will keep adding more words to the glossary. If you would like me to add any missing words to the glossary, please send a comment.

10/6/15: I have added audio files. Please note the volume control below each audio.

| Pāli Word | Audio | Pronounciation | Meaning |
| :--- | :---: | :--- | :--- |
| akusala | Q | akusala | immoral, unwholesome |
| adosa | - | adhosa | non-hatred |
| alobha | alobha | non-greed |  |
| amoha | amoha | non-delusion |  |
| Anāgāmī | Anāgāmī | Non-Returner (to the human world) |  |
| Anariya | Anāriyā | One who is not yet a Noble One or <br> Ariya |  |
| anatta | anaththā | not in-control, helpless |  |
| anicca | anichchā | inability to maintain to one's <br> satisfaction |  |
| anantara |  | being in storage until retrieval <br> (kamma vipāka) |  |

| Pāli Word | Audio | Pronounciation | Meaning |
| :---: | :---: | :---: | :---: |
| anupassana | 6 | anupassanā | contemplate with anicca, dukkha, anatta |
| anusaya | 3 |  | defilements arising from latent cravings (āsava) |
| apāya | 9 | apāya | common term for four lowest realms |
| abhijjā [abhijjhā] | 0 | abhijjā | strong greed |
| Arahant | 6 |  | Never to be born in any of the 31 realms |
| Ariya | 9 | āriyā | noble one (Sotāpanna or above) |
| arūpa | 9 | arūpa | without rūpa (not really correct) |
| avijjā | 9 | avijjā | ignorance |
| ahirika | 6 | ahirikā | shamelessness |
| ahetuka | $\bigcirc$ | ahãthuka | without good roots |
| akasa | 6 | ākāsa | space (the void in between rūpa) |
| aloka | 9 | āloka | light, dissociating from "this world" |
| āpo | 9 | āpo | cohesive element |
| ārammaṇa | 3 | ārammana | object of thought |
| āsava (asaya) | 6 | asāva | deep-seated craving |
| asevana | 0 | āa ${ }^{\text {anvanā }}$ | repeated practice |
| bahiddha | 4 | bahidhdhā | external |
| bala |  |  | power |
| bhanga | 9 | bhangā | dissolution |
| bhava | 9 |  | existence level |
| Bhauddhayā (Buddhist) | 6 | Bhaudhdhayā | One striving to stop the rebirth process |
| bhāvanā | 9 | bhāvanā | meditation, constant contemplation \& use |
| Buddha | 6 | Budhdha (not "Budhdhā") | Buddha Gotama |
| bhavañga | 9 | bhavangā | life continuum |
| bhaya | 6 |  | fear |
| citta | 9 | chiththa | early stage of a thought (pure thought) |

| Pāli Word | Audio | Pronounciation | Meaning |
| :---: | :---: | :---: | :---: |
| dana | 6 | dāna | giving |
| dasaka | $\theta$ |  | decad |
| deva | 9 | dãva | a being in 6th- 11 th realms |
| dhamma | $\theta$ | dhammā | Buddha's teachings, phenomenon, mental object |
| dhammavicaya | 6 | dhammavichaya | investigation of concepts like anicca |
| dhātu | 0 | dhāthu | element |
| diṭthi | 6 |  | view, wrong view unless specified |
| domanassa | 0 | dhomanassa | displeasure |
| dosa | 9 | dhosa | hatred |
| dukha | 9 | dhukha | suffering |
| dukkha | 9 | dhukhkha | suffering \& it can be overcome |
| dvara | 0 | dhvāra | door (to the outside world) |
| ekaggata | - | ekaggathā | one-pointedness (of the mind) |
| gandha | $\theta$ |  | smell |
| gati | 9 | gathi | character |
| hadayavatthu | 3 | hadayavaththu | seat of mind |
| hetu | 6 | hãthu | root cause |
| hiri | 0 |  | shame |
| iddhipada | 9 | iddhipāda | means to accomplishment |
| kāmacchanda | 0 | kāmachanda | greed for things in kamaloka |
| kamaloka | 9 | kāmalõka | first 11 realms with five physical senses |
| kamavacara | 0 | kāmavachara | belonging to kamaloka |
| kamma | 9 | kammā | action, deed |
| kasiṇa | $0$ | kasina | meditation device (usu. a colored disk) |
| kāya | 6 | kāya | sensing (seeing, hearing, etc) |
| kaya | $\theta$ | kaya | body |
| khaya | 9 |  | cutting off |

| Pāli Word | Audio | Pronounciation | Meaning |
| :---: | :---: | :---: | :---: |
| khana | 0 |  | moment, sub-moment |
| khandha | 9 |  | aggregate, collection, heap |
| kilesa (keles) | 0 | kilãsa | defilement |
| kukkucca | 9 | kukkuchcha | tendency to do lowly things |
| kusala | $\theta$ |  | removal of defilements |
| lahuta | 6 | lahüta | lightness |
| lakkhana | 0 | lakhkhana | characteristc |
| lobha | 9 | lobha | greed |
| loka | 0 | loka | world |
| lokuttara | 9 | lokoththara | beyond this world, transcendental |
| maccariya | 0 | machchariya | extreme greed, hiding wealth |
| magga | 6 | magga | path |
| mana | 3 | māna | conceit |
| manasikara | $\theta$ | manasikāra | memory |
| mano | $\theta$ | mano | mind |
| manodhatu | 6 | manodhāthu | mind element |
| manodvara | 0 | manodvāra | mind door |
| manussa | 6 |  | human being |
| marana | 0 |  | death |
| metta | 8 | meththā | loving kindness |
| micchā diṭ̣hi | 0 | michcha diththi | wrong views |
| middha | 6 | midhdhha | lethargic mind |
| moha | $\theta$ | moha | delusion |
| mudita | 6 | mudhithā | appreciative joy |
| muduta | $\theta$ | mudhuthā | malleability |
| mūla | 9 | mūla or mūla | root |
| nama | 9 | nāma | name, mental |
| nāmarūpa | $\bigcirc$ | nāmarüpa | name and form |

| Pāli Word | Audio | Pronounciation | Meaning |
| :---: | :---: | :---: | :---: |
| ñāna | $\theta$ | ngāna | knowledge |
| nimitta | 9 | nimiththa | sign |
| nivarana | 9 | neevarana | hindrance |
| niraya | 9 |  | hell |
| niyama | 9 | niyama (not niyāma) | law of nature |
| oja | 6 | ojā | nutritive essence |
| paccaya | $\bigcirc$ | pachchayā | condition |
| pahāna | 6 | pahāna | abandoning |
| pancadvara | $\theta$ | panchadvāra | five sense doors |
| pañcakkhandha | 6 | pancakkhandhā | five aggregates |
| pancaupadanakkhandha | 0 | pancaupādānakkhandhā | grasping/craving of five aggregates |
| pañ̃ā | 6 | pangngā | wisdom |
| piti | 9 | peethi (preethi) | joy |
| pannindriya | 6 |  | wisdom faculty |
| paramatta | 0 | paramaththā | ultimate reality |
| pasāda rūpa | 9 | pasāda rūpa | sensitive matter (internal rūpa) |
| passaddhi | $\theta$ | passadhdhi | tranquility |
| pathavi | 6 |  | element of hardness |
| paṭicca | 9 | patichcha | bind to something willingly |
| paṭigha | 6 |  | aversion, dislike |
| pavutthi | 0 | pavuththi | during this life, current |
| peta (preta) | 6 | petā (pretha) | hungry ghost |
| phala | 0 |  | fruit, fruition |
| phassa | 9 |  | contact |
| puggala | 0 |  | individual |
| purisa | 6 |  | masculine |
| rāga | 9 | rāga | attachment to samsāra |
| rasa | 6 |  | taste |

| Pāli Word | Audio | Pronounciation | Meaning |
| :--- | :---: | :--- | :--- |
| rūpa | - | rūpa | matter (and energy) |
| rūpa kalapa | rūpa kalāpa | material group unit |  |
| rupavacara | rüpavāchara | belonging to rūpa loka |  |
| sadda | sadhdha | sound |  |
| sadharana | sādhārana | sadhdhā | universal, common |
| saddhā | faith (through knowledge and |  |  |
| understanding) |  |  |  |

| Pāli Word | Audio | Pronounciation | Meaning |
| :---: | :---: | :---: | :---: |
| sota | 9 | sotha | ear |
| Sotāpanna |  | Sothapanna | Stream Enterer (first stage of Nibbāna) |
| tanhā | $6$ | thanhā | attachment (bondage) due to greed, hate, or delusion |
| tejo | 6 | thãjo | heat element |
| thina | 0 | theena | sloth |
| uddhacca | 6 | udhdhachchā | tendency to be high-minded (restlessness) |
| upādāna | 0 | upādhāna | clinging, like to hold onto |
| upekkha | 6 |  | equanimity, neutrality |
| uppatthi | 0 | uppaththi | birth |
| vacī | $\theta$ | vachi | speech |
| vaṇṇa (varna) | 3 |  | color |
| vayama | $\theta$ | vayāma | effort |
| vāyo | 0 | vayo | fluidity |
| vedanā | 6 | vãdana | feeling |
| vicara | 0 | vichāra | sustained concentration on an object |
| vicikicchā | 6 | vichikichchā | acting without sati |
| vīmamisā | 0 | vīmamsā | investigation |
| vinnati | 8 | vingngāthi | intimation |
| viñ̃̄āṇa | 0 | vingngana | (defiled) consciousness |
| vipāka | 6 | vipāka | result |
| vipassana | 0 | vipassanā | insight (via analysis of parts) |
| virati | 9 | virathi | abstinence from indulgence |
| viriya | 0 |  | effort |
| visuddhi | 6 | visudhdhi | purification |
| vitakka | 0 | vithakka | initial application of the mind on an object |
| vithi | 9 | veethi | process (sequential) |

| Pāli Word | Audio | Pronounciation | Meaning |
| :--- | :---: | :--- | :--- |
| votthapana | $\ddots$ | voththapana | determining |
| vyāpāda | ® | vyāpāda | ill will, stronger than patịgha |

## $8.2 \quad$ Pāli Glossary - (A-K)

August 12, 2016; Revised May 27, 2017; February 19, 2020; May 29, 2022 (\#4 added)

## "Tipitaka English" Convention

1. I have revised the Pāli words to align with the convention used by most English texts. This convention was apparently adapted by the early European scholars (Rhys Davis and others) in order to keep the length of the word short. I will use this convention in new posts and try to update old posts gradually. See the following two posts for details:

- "Tipitaka English" Convention Adopted by Early European Scholars - Part 1
- "Tipitaka English" Convention Adopted by Early European Scholars - Part 2

## Additional Pronunciation Keys:

"a" is pronounced like " $\mathbf{u}$ " in cut; "a" is pronounced like " $\mathbf{a}$ " in father

- " i " is pronounced like " i " in sit; ' T " is pronounced like "ee" in bee
- " u " is pronounced like " u " in "put"; " $\overline{\mathrm{u}}$ " is pronounced like "oo" in cool
- "o" is pronounced like "oe" in "Moe"; "e" is pronounced like "a" in pay
- "c" needs to be pronounced like "ch" as in "charm" or "chicago"
- "ñ" needs to be pronounced like "gn" in "signor"

2. This glossary is in two posts, because there are a total of over 400 Pāli words included now. This is the first part of the glossary; second part at, "Pāli Glossary - (L-Z)."

- I have been able to get the audio files incorporated, and also have provided links to key posts whenever possible/needed.
- We also have a Popup Pāli Glossary with Pronunciation, thanks to Mr. Seng Kiat Ng. If that GoldenDict dictionary is installed on your computer, you will be able to access this glossary from each post directly. Furthermore, it could provide translations from other online dictionaries as well.

3. Relevant posts on any of the words can be found by using the "Search" box on the top right.

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| abhaya | "a" +'bhaya"; doing something to stop someone's fear | 3 |
| abhaya dāna | saving the life of a living being | 9 |
| abhijjhā | strong greed | 9 |
| abhiñ̃̃̄ | supermundane powers | 6 |
| abhisañkhāra | strong sankkhāra that lead to rebirths and strong vipāka | 3 |
| ādīnava | bad outcome: Assāda, Ādinava, Nissarana - Introduction | 8 |
| adhimokkha | arising to the top; reaching a high value | 0 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| adhivāsana | things one gets used to based on sansāric habits; part of gathi | 6 |
| adinnādāna | stealing; taking something without permission | 0 |
| adosa | without hatred | 6 |
| ajjhatta | internal | 3 |
| ākāsa | space (the void in between rūpa) | 9 |
| ākāsānañcāyatana | frrst arūpa brahma realm | 0 |
| ākiñcaññāyatana | third arūpa brahma realm | 6 |
| akusala | immoral act | - |
| āhāra | nutrients (for body or mind) | 6 |
| ahetuka | without good roots | 0 |
| ahirika | shamelessness | 6 |
| akālika | remove defilements or timeless (no birth or death, i.e., Nibbāna) | 3 |
| alobha | without greed | 6 |
| āloka | light, dissociating from "this world" | 3 |
| āmisa | mundane (belonging to 31 realms) | 6 |
| amoha | without delusion; moral mindset | 3 |
| amurta | fine food (drink) of devas | 6 |
| Anāgāmī | Non-Returner (to the human world) | 0 |
| anāgata | future | 6 |
| ānāpāna | 7. What is Änapāna? | 3 |
| ānāpānasati | 6. Ānāpānasati Bhāvanā (Introduction) | 6 |
| anāriya | not Noble | 0 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| anatoppa | fear of doing immoral deeds | $\bigcirc$ |
| anatta | not in-control, helpless | 0 |
| ānenjābhi saṅkhāra | Sañkhāra, Kamma, Kamma Bīja, Kamma Vipāka | 6 |
| anicca | inability to maintain to one's satisfaction | 0 |
| Aniccatā | tendency to change unexpectedly; characteristic of a rūpa: Rūpa (Material Form) - Table | 6 |
| anidassana | Cannot be seen; can also mean pure as in anidassana viññāna | 0 |
| animisa | without pausing for even a moment: Animisa Locana Bodhi Poojā - A Prelude to Acts of Gratitude | 5 |
| añ̃amañña | depend on each other | $\theta$ |
| anantara | being in storage until retrieval (kamma vipāka) | 6 |
| anumodanā | accept pattidana (transfer of merits or sharing of merits) with joy | 5 |
| anupassanā | discard kileasa by contemplating with anicca, dukkha, anatta: see \#6 of 4. What do all these Different Meditation Techniques Mean? | 6 |
| anusaya | defilements arising from latent cravings (āsava) and kilesa | , |
| apacāyana | paying respects to those with higher virtues: Puñ̃na Kamma - Dāna, Silla, Bhāvanā | 6 |
| aparāpariya vedaniya | kamma vipāka that can materialize at any time in future | 0 |
| apāya | common term for four lowest realms | 6 |
| āpo | cohesive element | - |
| Appanā samādhi | almost at jhāna: What is Samādhi? - Three Kinds of Mindfulness | 6 |
| appaṇita | not to liking; dislikes | 0 |
| appatigha | cannot be grasped or touched | 6 |
| apuñ̃a | immoral | 9 |
| apuñ̃abhi sañkhāra | highly immoral saṅkhāra | 6 |
| Arahant | never to be born in any of the 31 realms | 0 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| ārammaṇa | object of thought | 8 |
| Ariya | Noble person (Sotāpanna or above) | 0 |
| arūpa | without rūpa | 8 |
| asañ̃a | without perception; without sañ̃̄̄ | 0 |
| āsava =āsaya | deep-seated craving | $\bigcirc$ |
| āsavakkhaya ñāṇa | Knowledge of removing āsava: The Way to Nibbāna - Removal of Āsavas | 0 |
| āsevana | repeated practice; associate | 4 |
| asobhana | ugly or defiled (used mainly for cetasika) | 3 |
| asura | one of the four apāyā; beings there have large bodies and are inactive | 6 |
| assāda | enjoyment | 3 |
| atita | past | 8 |
| atta | opposite of anatta or eight | 3 |
| attha | opposite of anatta; perception that one has total control | 8 |
| avici | one of the niraya (hell) | 0 |
| avihimsā | non-aggressive | $\bigcirc$ |
| avinibbhoga | consituents not separable, as in a avinibbhoga rūpa kalapa | 3 |
| avyāpāda $=$ abyāpāda | not angry, kind | 6 |
| āyatana | an indriya becomes as āyatana: Sorting out Some Key Pāli Terms - Tanhā Lobha Dosa Moha etc | 0 |
| āyu | lifetime | 6 |
| avijjā | Ignorance of Tilakkhana | 3 |
| bahiddhā | external | 6 |
| bahijja | external | + |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| bala | power | $\bigcirc$ |
| bali | distort | 8 |
| bīa | seed | 8 |
| bhanga | dissolution; destruction | - |
| bhava | realm of existence | 0 |
| Bhaudhdhayā (Buddhist) | One striving to stop the rebirth process | $\bigcirc$ |
| bhāvanā | meditation, constant contemplation \& use | 6 |
| bhavañga | life continuum | 3 |
| bhaya | fear | 6 |
| Bhikkhu | Buddhist monk | $\theta$ |
| bodhicitta | a Mahāyāna term denoting "enlightenment-mind" | 8 |
| bojjhañga | bodhi anga or facilitating factor for Nibbāna | 0 |
| brahma | a being in rūpa or arūpa brahma realms | 8 |
| Buddha | Buddha Gotama |  |
| cakkhu | eye or seeing | 6 |
| cakkavāla | planetary system like our Solar system |  |
| cetanā | intention; but deeper: "Details of Kamma - Intention, Who Is Affected, Kamma Patha." | 8 |
| cetasika | mental factor | 9 |
| chanda | liking | 9 |
| citta | thought (pure thought) | 0 |
| cittānupassanā | doing anupassana via contemplating on thoughts | 8 |
| citta vithi | citta come in packets of a discrete number, a single citta does not arise | 0 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| cutūpapāta ñāṇa | ability to see all previous births | 8 |
| cuti | death | 0 |
| cuti citta | moment of death | 8 |
| dāna | giving | $\cdots$ |
| dasa | ten | , |
| dasaka | decad; group of 10 |  |
| dassana | vision; but normally used for "comprehending" | 6 |
| dassanena pahātabba | removing (kilesa) via comprehension of Dhamma | 0 |
| desanā | verbal discourse | 6 |
| deva | a being in 6th-11 th realms |  |
| Dhamma | Buddha's teachings, phenomenon, mental object | 6 |
| dhammavicaya (sambojjhañga) | investigation of concepts like anicca | 0 |
| dhammānudhamm a patipadā | condition for attaining Sotāpanna stage: Four Conditions for Attaining Sotāpanna Magga/Phala | 6 |
| dhammānupassan $\bar{a}$ | doing anupassana via contemplating on Dhamma | 3 |
| dhātu | element | 6 |
| dhyāna (same as jhāna) | meditative state with rūpa loka or arūpa loka consciousness | 3 |
| ditta | observation | 6 |
| ditthi | view, wrong view unless specified | 0 |
| ditthhijukamma | "ditṭhi"+"uju"+"kamma" or getting rid of wrong views on kamma:Puñña Kamma - Dāna, Sīla, Bhāvanā | 6 |
| domanassa | mental agony, displeasure; not bodily suffering | 3 |
| dosa | hatred | 6 |
| dosakkhaya | dosa + khaya or removal of hate | C |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| dugathi | "du" + "gathi" or habits that can lead to bad rebirths | 6 |
| dukha | suffering | 0 |
| dukkha | suffering \& it can be stopped from arising | 6 |
| dvāra | door (to the external world) | 0 |
| ehipassiko | a quality of Dhamma, removing defilements in real time: Supreme Qualities of Buddha, Dhamma, Sañgha | 6 |
| ekaggatā | one-pointedness (of the mind) | $\theta$ |
| gandha | smell, odor | 8 |
| gandhabba | Gandhabba (Manomaya Kāya) | $\theta$ |
| gati | character, habits | 6 |
| ghāna | nose or smelling | 3 |
| gotrabhu | change of lineage ("gotra") when getting close to a jhāna | 6 |
| hadaya vatthu | seat of mind (in the gandhabbayā) | 0 |
| hetu | root cause | 6 |
| hiri | shamefulness for doing akusala kamma | 0 |
| iddhi | special powers or knowledges | 6 |
| iddhipāda | means to special (mental) accomplishment | 3 |
| indriya | one of the six sense faculties when used without lobha, dosa, moha | 6 |
| issa (irisiyā in Sinhala) | jealousy | $\bigcirc$ |
| Itthi (sthree in Sinhala) | feminine | 6 |
| jarā | getting old or weak | $\theta$ |
| Jaratā | one of 28 rūpa: Rūpa (Material Form) | 6 |
| jāti | birth of a living being OR birth of anything | 0 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| javana | those citta with which saṅkhāra committed or kamma vipāka generated: Javana of a Citta - The Root of Mental Power | 6 |
| jhāna (same as dhyana) | meditative state with rūpa loka or arūpa loka consciousness | 0 |
| jivhā | tongue (more accurately jivha indriya) OR taste | 9 |
| jīvita | life: jivita indriya maintains life | 0 |
| Jivitindriya | one of the 7 universal cetasika: Cetasika (Mental Factors) OR one of the 28 rūpa: Rūpa (Material Form) | 6 |
| kabaḷ̂kāra | one of the 4 āhāra: Āhāra (Food) in Udayavaya Nāñ | 0 |
| kappa (kalpa in Sinhala) | time duration of an entity: kappa of a human is about 100 years; mahā kappa is lifetime of the universe | 6 |
| kalyāṇa mittā (or mitrā in Sinhala) | Noble friend: Four Conditions for Attaining Sotāpanna Magga/Phala | $\bigcirc$ |
| kāmacchanda | greed for things in kamaloka | 9 |
| kāma loka | first 11 realms with five physical senses | 0 |
| kāma rāga | attachment to sense pleasures in kamaloka | 9 |
| kāmāvacara | belonging to kamaloka | $\theta$ |
| kāmesumicchācār $\bar{a}$ | immoral ways of enjoying sense pleasures: The Five Precepts - What the Buddha Meant by Them | 6 |
| kamma | action, deed | $\theta$ |
| kammanta | actions as in sammā kammanta | $\cdots$ |
| kammatthaña | meditation verses or procedures | 0 |
| kandha | heap, pile, or aggregate | 6 |
| karunā | compassion in the suffering of others | 3 |
| kasiṇa | meditation object in anāriya jhāna (eg. a colored disk) | 6 |
| kāya | pertaining to the body or action | 0 |
| kaya | physical or mental body | 9 |
| kāyānupassanā | doing anupassana via contemplating on the bodily actions | $\cdots$ |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| khaṇika samādhi | What is Samādhi? - Three Kinds of Mindfuiness | 9 |
| khaya | cutting off or gradually reduce | C |
| khaṇa | moment, sub-moment | 9 |
| kriyā | action, deed |  |

### 8.3 Pāli Glossary - (L-Z)

August 12, 2016; Revised May 27, 2017; February 19, 2020; May 29, 2022 (\#4 added)

## "Tipitaka English" Convention

1. I have revised the Pāli words to align with the convention used by most English texts. This convention was apparently adapted by the early European scholars (Rhys Davis and others) in order to keep the length of the word short. I will use this convention in new posts and try to update old posts gradually. See the following two posts for details:

- "Tipitaka English" Convention Adopted by Early European Scholars - Part 1
- "Tipitaka English" Convention Adopted by Early European Scholars - Part 2

## Additional Pronunciation Keys:

"a" is pronounced like " $\mathbf{u}$ " in cut; "a" is pronounced like " a " in father

- " i ' is pronounced like " i ' in sit; ' T " is pronounced like "ee" in bee
- "u" is pronounced like " u " in "put"; " $\overline{\mathrm{u}}$ " is pronounced like "oo" in cool
- " o " is pronounced like "oe" in "Moe"; "e" is pronounced like " a " in pay
- "c" needs to be pronounced like "ch" as in "charm" or "chicago"
- "ñ" needs to be pronounced like "gn" in "signor"

2. This glossary is in two posts, because there are a total of over 400 Pāli words included now. This is the first part of the glossary; second part at, "Pāli Glossary - (A-K)."

- I have been able to get the audio files incorporated, and also have provided links to key posts whenever possible/needed.
- We also have a Popup Pāli Glossary with Pronunciation, thanks to Mr. Seng Kiat Ng. If that GoldenDict dictionary is installed on your computer, you will be able to access this glossary from each post directly. Furthermore, it could provide translations from other online dictionaries as well.

3. Relevant posts on any of the words can be found by using the "Search" box on the top right.

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| lobha | excess greed: Lobha, Rāga and Kāmaccanda, Kāmarāga | 0 |
| lahutā | lightness (e.g., kāya lahutā is lightness in body) | 6 |
| lakkhaṇa | characteristc of | 0 |
| loka | realm or world depending on the context | 9 |
| lokiya | belonging to this world of 31 realms | 0 |
| lokuttara | beyond this world of 31 realms, transcendental | 8 |
| macchariya | hiding wealth due to extreme greed | 9 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| magga | path; procedure | 6 |
| mahā | large or important | 0 |
| māna | arrogance, self-admiration | 6 |
| manasikāra | memory. Details at: Citta and Cetasika - How Viññāna (Consciousness) Arises | 0 |
| mano | mind | 6 |
| mano sañcetanā | vedana $\bar{a}$, sañ̃̄ $\bar{a}$ that arise due to one's gati | $\theta$ |
| manodhatu | mind element | 6 |
| manodvāra | mind door to nāmaloka; see, Our Two Worlds: Material and Immaterial | 0 |
| manodvāravajjana | a citta coming to the mind door as in manodvāravajjana citta | 9 |
| manussa | human being | 9 |
| marana | death (death of a physical body is not necessarily the end of human bhava; see, "Antarābhava and Gandhabba" | 6 |
| mettā | kindness. Has two meanings: "Ariya Mettā Bhāvanā" | 9 |
| micchā ditṭhi | wrong views; see. "Wrong Views (Micchā Ditthi) - A Simpler Analysis" | 6 |
| middha | lethargic mind | 2 |
| moha | delusion; mind totally covered; see, "Lobha, Dosa, Moha versus Rāga, Patigha, Avijijā" | 6 |
| mohakkhaya | moha + khaya, removing delusion | , |
| muditā | joy in the success of others | 6 |
| mudutā | malleability; e.g., kāya midutā | 9 |
| mūla | root (usually in root cause) | 6 |
| musāvāda | lies, trying to deceive: The Five Precepts - What the Buddha Meant by Them | $\theta$ |
| muta | combined word for smelling, tasting, and touching | 6 |
| nāma | name, mental | 0 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| nāmarūpa | name and form OR mental image of a nāma and rūpa | 6 |
| namaskāraya (Sinhala) | Namaskāraya - Homage to the Buddha | 6 |
| ñāṇa | knowledge | 6 |
| nātha | with refuge, opposite of anātha | 3 |
| nekkhamma | relinquish sense pleasures: Difference Between Giving Up Valuables and Losing Interest in Worthless | 6 |
| neva saññā nā saññāyatana | fourth arūpa brahma realm | 0 |
| Nibbāna | stopping the rebirth process: Nibbāna | 6 |
| nibbatti lakkhaṇa | Nibbatti Lakkhana in Udayavaya Ñāna | 3 |
| nicca | having total control, that ability | 6 |
| niddesa | short description: Sutta Interpretation - Uddesa, Niddesa, Patiniddesa | 0 |
| nimitta | sign; something resembling | 6 |
| nirāmisa | neutral thoughts without sense cravings | $\theta$ |
| nirodha | nir + udā or stop from arising | 6 |
| nissarana | willingly give up assāda: Assāda, Ādīnava, Nissaraña - Introduction | 0 |
| Nivana (Sinhala) |  | 6 |
| nīvaraṇa | hindrance; covered mind | $\theta$ |
| niraya | hell | 8 |
| niyama (or niyāma) | law of nature | $\theta$ |
| niyata | permanent, fixed | 6 |
| ojā | nutritive essence | 3 |
| oḷārika | rough, condensed | 6 |
| opapātika | instantaneous and fully-formed birth as in deva and brahma realms | 0 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| pabhassara | devoid of greed, hate, and ignorance; e.g., pabhassara citta | 9 |
| paccayā | condition | $\bigcirc$ |
| paccuppanna | conditional arising; present moment arising due to conditions | $\theta$ |
| pahāna | abandon; remove | 3 |
| pahātabba | removal | 8 |
| pakiṇ̣aka | particulars or occasionals as in pakiṇ̣aka cetasika: Cetasika - Connection to Gati | $\bigcirc$ |
| pān̄ātipātā | killing a living being: The Five Precepts - What the Buddha Meant by Them | 6 |
| panca | five | $\theta$ |
| pañcadvāra | five sense doors | - |
| pañcadvāra <br> vajjana cittā | Citta Vithi - Processing of Sense Inputs | 0 |
| pañcakkhandha | five aggregates | 6 |
| pañcanīvaraṇa | five hindrances that cover the mind |  |
| pañcaupādānakkh andha | grasping/craving of the five aggregates: Pañcaupādānakkhandha - It is All Mental | 6 |
| paṇita | likable or good |  |
| paññā | wisdom; comprehension of Tilakkhaṇ | 6 |
| pāpa kammā | immoral actions |  |
| para loka (paralowa in sinhala) | a human or animal gandhabba lives in para loka until a womb becomes available: Hidden World of the Gandhabba: Netherworld (Paraloka) | 6 |
| pāramitā | strive through many rebirths: Paramita and Niyata Vivarana - Myths or Realities? | 0 |
| paribramana | rotating around another body | 8 |
| perideva | lamentation, especially upon remembering a past mishap | c |
| parivajjana | staying clear of bad influences: The Sotāpanna Stage | C |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| piti | joy | 6 |
| paññindriya | wisdom faculty | 6 |
| parāmatta | ultimate reality | $\theta$ |
| pharusāvācā | harsh speech: Ten Immoral Actions (Dasa Akusala) | 6 |
| pasāda rūpā | sensitive matter (five internal senses; not physical senses): Brain - Interface between Mind and Body | 0 |
| passaddhi | tranquility | 6 |
| pathavi | element of hardness | 0 |
| pațicca | get bonded to something willingly | 9 |
| patigha | aversion, dislike | 0 |
| patikūla <br> manasikāra <br> bhāvanā | 4. What do all these Different Meditation Techniques Mean? | 6 |
| paṭipadā | a procedure; way of living, like in majjima patipāda | 3 |
| paṭiniddesa | detailed description: Sutta Interpretation - Uddesa, Niddesa, Patiniddesa | 6 |
| paṭisandhi | Grasping a new existence (bhava) | $\theta$ |
| patisevana | good associations as in pațisevana pahātabba: The Sotāpanna Stage | 6 |
| pattānumodanā | Transfer of Merits (Pattidāna) - How Does it Happen? | 0 |
| pattidāna | transfer of merits: Transfer of Merits (Pattidāna) - How Does it Happen? | 6 |
| pavutthi | during this life, current | $\theta$ |
| pịlama (peleema in Sinhala) | incessant stress, agitation: Anicca - The Incessant Distress ("Pilana") | 6 |
| peta (pretha) | hungry ghost; one of the four apāyā | $\theta$ |
| phala (pala in Sinhala) | fruit, fruition | 6 |
| phassa | sense contact; most times it is defiled or samphassa: Difference between Phassa and Samphassa | 0 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| pisuñāvācā | slandering: Ten Immoral Actions (Dasa Akusala) | 6 |
| photṭhabba | "poththa" + "abba", where "poththa" is skin: sense of touch | $\bigcirc$ |
| pubbe | previous | 6 |
| pubbenivāsānussa <br> ti ñāṇa | see \#12 of Antarābhava and Gandhabba | $\bigcirc$ |
| puggala | individual | 6 |
| puñña kriyā | deed that makes one's heart joyful | 0 |
| purisa | masculine | 9 |
| rāga | attachment to the 31 realms: Lobha, Rāga and Kāmaccanda, Kāmarāga | 0 |
| rāgakkhaya | rāga + khaya: removal of attachment to the 31 realms | 6 |
| rasa | taste | 0 |
| rūpa | matter AND energy | 8 |
| rūpa kalāpa | elementary material group unit: Rūpa Kalāpa (Grouping of Matter) | $\theta$ |
| rupavacara | belonging to rūpa loka | 6 |
| sabba | all | $\theta$ |
| sacca | truth, as in a Noble Truth | 6 |
| sadda | sound | - |
| saddhā | faith (through knowledge and understanding) | 6 |
| sahajāta | born together | 3 |
| sahetuka | with good roots as in dvihetuka and tihetuka; if no good roots it is an ahetuka birth | 6 |
| Sakadāgāmī | Once-Returner (one more rebirth in kāma loka) | 0 |
| salāyatana | six sense bases for a normal human | 9 |
| samādhi | concentration on a good or bad mindset: What is Samādhi? - Three Kinds of Mindfulness | $\bigcirc$ |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| samanantara | matching with anantara: Anantara and Samanantara Paccayā | 6 |
| samāpatti | different from jhāna, see: Citta Vithi - Processing of Sense Inputs | 0 |
| sammā | quench (defilements): What is "San"? Meaning of Sansāra (or Samsāra) | 6 |
| sammappadhāna | four main efforts to stop "san" from arising: Two Versions of 37 Factors of Enlightenment | 6 |
| samatha | calming the mind | 6 |
| sāmisa | citta with kilesa or akusala cetasika | 0 |
| sampajāna | sorting defiled thoughts: Satipatthāna Sutta - Structure | 9 |
| sampappalāpa | frivolous talk: Ten Immoral Actions (Dasa Akusala) | $\theta$ |
| samphassa | "san" + "phassa": Difference between Phassa and Samphassa | 6 |
| sampaticcana | where "gati" are incorporated into a citta vithi: Citta Vithi - Processing of Sense Inputs | 9 |
| sampayutta | together and inseparable, like a dye dissolved in water | 6 |
| samudaya | arising due to "san": "san" + "udaya" | 0 |
| samuppāda | birth of a similar kind: sama + uppada | 6 |
| samivega or sanvega | "san" + "vega": javana power in a citta due to "san": see \#9 of Javana of a Citta - The Root of Mental Power | 0 |
| san | San | 6 |
| sandit!thiko | "san" + "diṭthi" or enable seeing "san": Supreme Qualities of Buddha, Dhamma, Sañgha | 0 |
| sañkappa | thoughts, ideas | 6 |
| sañkhāra | actions leading to defilements, habits | 0 |
| sañkhata <br> (sankata <br> Sinhala) | arisen by conditions | 6 |
| saññã | perception, identification | 9 |
| samısāra or sansāra | beginningless rebirth process: $\qquad$ Samsāra) | 6 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| samsāric | related to the rebirth process | 0 |
| santati | one of the 28 types of rūpa: Rūpa (Material Form) | 9 |
| samivara | "san" + "vara" or stop "san" by moral behavior: What is "San"? Meaning of Sansāra (or Samisāra) | $\bigcirc$ |
| samivarena | via sanvara as in sanvarena pahatabba: The Sotāpanna Stage | 9 |
| samivega | "san" + "vega": enhanced javana of a citta due to "san", i.e., highly emotional | 9 |
| sapta or saptha | seven | 6 |
| sāsana | Buddha sāsana is Ministry of the Buddha | C |
| sasankhārika | immoral citta arising due to shrunken mind (thīna middha) | 6 |
| sāsava | with craving | 0 |
| satara (in Sinhala) | four | 6 |
| sakkāya diṭ̣hi (or sathkāya diṭ̣hi) | perception that things in this world are worth striving for: How do we Decide which View is Wrong View (Ditthi)? | 9 |
| sati | in the mindset of anicca, dukkha, anatta: Satipatthāna - Introduction | 6 |
| satipatṭhāna | maintain sati: Mahā Satipatthāna Sutta | 3 |
| santiraṇa | where a decision is made in a citta vithi: Citta Vithi - Processing of Sense Inputs | 6 |
| sanyojana or samyojana | bind to defilements or "san" | 0 |
| sila | virtue, moral conduct | 6 |
| silabbata paramasa | perception that Nibbāna can be attained via just obeying set precepts or procedures | 6 |
| sekha | trainee (the three stages below the Arahant stage) | 8 |
| sobhana | good, likable, moral | $\theta$ |
| soka | sorrow due to personal loss | 6 |
| somanassa | with joy | $\theta$ |
| sota | Two possible meanings: ear and Noble Eightfold Path | 9 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| Sotāpanna | Stream Enterer (first stage of Nibbāna) | $\bigcirc$ |
| Suddhatṭhaka | smallest material element: The Origin of Matter - Suddhatthaka | 6 |
| suddhāvāsa | Brahma realms reserved for the Anāgāmīs | $\theta$ |
| sugati | "su" + "gathi" or moral habits/behavior; also good realms: Sansāric Habits, Character (Gati), and Cravings (Āsava) | 6 |
| sukha | bodily pleasure, like with a massage; somannasa is mental | . |
| sukuma | fine; not coarse | 6 |
| suññatā | emptiness: What is Sunyata or Sunnata (Emptiness)? | 0 |
| suta | sound | 6 |
| sutta | discourse in the Tipitaka | 0 |
| suva | as in Nivan suva: | - |
| taṇhā | attachment (bondage) due to greed, hate, or delusion | 3 |
| tatramajjhattatā | neutrality of mind; not upekkhā: Cetasika - Connection to Gati | 6 |
| tejo | heat element | 3 |
| Thero | One who has attained Nibbāna; nowadays it is used for non-Arahants bhikkhus too | 6 |
| thīna | shrinking of the mind, not alert | 3 |
| tuccha | lowly (behavior) | 6 |
| tiparivatṭa | Three rounds of bondage to this world. |  |
| tihetuka | patisandhi with three good roots | 6 |
| tilakkhana | Three characteristics of the 31 realms: Anicca, Dukkha, Anatta | 3 |
| Tipitaka | three pitaka: sutta, vinaya, abhidhamma: Preservation of the Dhamma | 6 |
| tisarana | refuge in Buddha, Dhamma, Sanghha: Tisarana Vandana and Its Effects on One's Gati | 0 |
| tivijjā | Three special knowledges of the Buddha: The Way to Nibbāna - Removal of Āsavā | 6 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| uccheda ditṭhi | wrong view that death of the physical body is the end of a living being, i.e., disbelief in rebirth process | 0 |
| udayavaya | arising and destruction of a sankhata (sankata in Sinhala): Udayavaya Nāna | 6 |
| udayavaya or udayabbaya ñāṇa | Udayavaya Ñāna | 0 |
| uddhacca | tendency to be high-minded (restlessness) | 6 |
| uddesa | very short description: Sutta Interpretation - Uddesa, Niddesa, Patimiddesa | 3 |
| upacāra | close to | 6 |
| upacāra samādhi | samādhi close to jhānic state | 0 |
| upādāna | clinging, like to hold onto | 6 |
| upekkha | equanimity, neutrality | $\theta$ |
| uppatti | birth | 6 |
| utu | natural change kammaja and cittaja energies to rūpa | 0 |
| utuja rūpa | rūpa produced via the transformation of kammaja and cittaja rūpa | 6 |
| vacī | speech | 0 |
| vaṇna (varna in sinhala) | color | 6 |
| vaya | destruction or deviating to immorality | 0 |
| vāyāma | effort | 6 |
| vāyo | element of movement, motion | 3 |
| vedanā | feeling or more precisely "sensing of an event": Vedanā (Feelings) | 9 |
| vedanānupassanā | anupassanā on feelings: Satipatthāna - Introduction | 0 |
| veyyāvacca | paying homage to and taking care of Holy places: Puñ̃̃a Kamma - Dāna, Sila, Bhāvanā | 6 |
| vibhava | disbelief in rebirth: Kāma Tanhā, Bhava Tanhā, Vibhava Tanhā | 0 |
| vicāra | sustained concentration on a thought object | 9 |

| Pāli Word | Meaning | Audio |
| :---: | :---: | :---: |
| vicikicchā | acting without sati; uncertainty of what to do; doing inappropriate things | C |
| vipassanā | insight meditation with and for clear vision: $\qquad$ Meditation Techniques Mean? | 8 |
| vimāna | residence, normally of a deva | 0 |
| vimansā | contemplation, investigation | 6 |
| vimutti | release (from the rebirth process) | C |
| vinaya | rules of discipline for bhikkhus: Kamma, Debt, and Meditation | 6 |
| viññānañcāyatana | second arūpi brahma realm: 31 Realms of Existence | 0 |
| viññata | comprehension via viñ̃āṇa | 8 |
| viñ̃̃ati | intimation. For example, kāya viññati is express intention via body movement. | 0 |
| viññāṇa | defiled consciousness | - |
| viññānañcāyatana | second arūpa brahma realm: 31 Realms of Existence | $\theta$ |
| vinodanā | in vinodanaā pahatabba: The Sotāpanna Stage | 8 |
| vipāka | result (of a kamma) | 0 |
| viparināma | unexpected change | - |
| vipassanā | removing defilements via insight of Tilakkhaṇa | - |
| vippayutta | appear together, but separable; like a current in a wire | 6 |
| virati | lose craving for indulgence | 3 |
| viriya | effort | 6 |
| visuddhi | purification | $\bigcirc$ |
| vitakka | initial application of the mind on an object | 6 |
| vithi | street; but in a citta vithi means a "packet of thoughts" with a certain number of citta | 0 |
| votthapana | determining (citta) | 6 |

| Pāli Word | Meaning | Audio |
| :--- | :--- | :---: |
| vyāpāāa or <br> byāpāda | ill will, stronger than paṭigha | 0 |
| yojanā | distance of about 7 miles | C |
| yoniso <br> manasikāra | ability to see consequences of one's actions for future rebirths: Four <br> Conditions for Attaining Sotāpanna Magga/Phala | 0 |

### 8.4 List of "San" Words and Other Pāli Roots

June 29, 2017; revised November 9, 2018

1. Pāli is a phonetic language. It does not have its own alphabet. Tipitaka was originally written down in Pāli with the Sinhala alphabet.

- Pāli verses are composed for ease of oral transmission. Tipiṭaka was orally transmitted faithfully for several hundred years.
- So, in many cases, root words are hidden in combined words in verses that were composed to rhyme better for easy oral transmission.

2. Rather than trying to find roots in Sanskrit, that is the way to find the roots. As I explained with evidence from the Tipitaka, the Buddha prohibited the use of Sanskrit words, or even to translate the Tipiṭaka to Sanskrit; see, "Preservation of the Buddha Dhamma."

- That is because despite some similarities, Sanskrit many words were composed to sound more "impressive", without paying attention to embedded meanings.
- For example, Pratītyasamutpāda is the Sanskrit term for Pațicca Samuppāda. Pratītyasamutpāda sounds impressive but the meaning is not clear at all.
- On the other hand, it is clear in pati + icca leading to sama + uppāda; see, "Paticca Samuppāda "Pati+ichcha"+"Sama+uppāda."

3. Pali words are combined in ways to rhyme better. By finding key root-words embedded in such "combined words", one can easily figure out the meaning.

- "yadaniccam tam dukkham, yam dukkham tadanatt $\vec{a} "$ verse appears in many sutt $\bar{a}$.
- In order to understand it, we need to "expand it" or "unfold it": "yad aniccam tam dukkham, yam dukkham tad anattā."
- Now the meaning becomes clear: "anicca nature leads to dukkha, dukkha nature leads to anatta nature"; see, "Anicca, Dukkha, Anatta - Wrong Interpretations."

4. The following are some examples of combination of words to make a verse rhyme better for oral transmission.

Naidham = na idham or "not the case."
Ayamantimā $j \bar{a} t i=$ ayam + antima $+j \bar{a} t i$ or "my last birth."
Nūppajjati $=n a+$ uppajjati: "will not arise."
Cittappasāda $=$ citta + pasāda; note the two p 's in the combined word that allow it to rhyme better.
Similarly in: Rūpakkhandha = rūpa khandha: "rūpa aggregate."
Aveccappasāda $=$ ava icca pasāda or "faith that leads to overcoming taṇhā (attachment)."
Buddha $=$ bhava $+u d d h a$ : one who figured out how to stop existences (bhava) from arising.
Bhavañga $=$ bhava + ang $a$; intrinsic aspect of bhava .
Sakkāya $=$ sath $+k \bar{a} y a:$ good collections usually referring to the five aggregates. Sakkāya dittthi is the view that the five aggregates should be embraced.

Anāpāna $=\bar{a} n a+\bar{a} p \bar{a} n a:$ : 'taking in" and "putting out."
Note the pronunciation of the following words sort of backwards to rhyme better:

- Anāgāmi = na āgāmi: not coming back (in reference to not to come back to kāma loka for a person who has attained the Anāgāmi stage of Nibbāna.
- Anatimāna $=n a+$ atimāna: atimāna is "high-mindedness" and anatimāna is opposite or "humble."

5. Just by knowing what is meant by the root "san," many Päli words can be understood easily; see, "What is "San"? Meaning of Sansara (or Samsara)."

- Note that some words are written and pronounced with emphasis on " m " rather than " n ", because it rhymes better that way; a good example is sainsāra (saysära) which can be written and pronounced either way.
- On the other hand, samm $\bar{a}$ comes from "san" + " $m \bar{a}$, " but always pronounced as "samm $\bar{a}$," because it rhymes easier that way; eg., sammā ditṭhi, sammā sañkappa, etc.
- It must be kept in mind that "san" has various levels. First one needs to remove 'san' that lead to immoral activities that can lead to births in the ap $\bar{a} y \bar{a}$; after one becomes a Sot $\bar{a} p a n n a$, one should strive to eliminate "san" involving sense pleasures; after becoming an Anāgāmi, the goal is to remove "san" associated with rūpa and arūpa jhāna. I only stated "sense pleasures" in the Table.

6. I plan to add another table for Pāli words with a few more key "roots."

## Pāli Words with "San" Root

| No | Pāli Word | Roots | Meaning of added word | Meaning of whole word |
| :---: | :---: | :---: | :---: | :---: |
| 1 | Sammā | san + mā | mā means to "remove" | associated with removing "san" |
| 2 | sammāpaṭipatti | san + mā +patipatti | patipatti is a process | method or effort to remove "san" |
| 3 | sammāvimutti | $\operatorname{san}+m \bar{a}+$ <br> vimutti | vimutti is complete release | Arahant phala; Nibbāna |
| 4 | Sammanti | san + mā | like gaccā to gaccanti | attaining peacefulness by removing "san" |
| 5 | samantano | san + anta; rhymes like samananta | anta is end | a process that gets rid of "san" |
| 6 | Sammā ditṭhi | Sammā + <br> diṭ̣hi | ditthhi is vision (here to see Tilakkhaṇa) | clear vision to see danger of (and how to remove) "san" |
| 7 | Sammā sañkappa | Sammā + sañkappa | sañkappa are conscious/unconscious thoughts | thoughts to removing "san" |
| 8 | Sammā vācā | Sammā + vācā | vācā is conscious thoughts/speech | speech to remove "san" |
| 9 | Sammā <br> kammanta | Sammā + <br> kammanta | kammanta is actions | bodily actions to remove "san" |
| 10 | Sammā ajīva | Sammā + ajīva | ajīva is way one lives | living style to remove "san" |
| 11 | Sammā vāyāma | Sammā + <br> vāyāma | vāyāma is effort | effort to remove "san" |
| 12 | Sammā sati | Sammā + sati | sati is mindfulness (about Tilakkhaṇa) | mindfulness to remove "san" |
| 13 | Sammā samādhi | Sammā + samādhi | samādhi is the state of equanimity (sama + adhi) | state of samādhi resulting from removing "san" |

| No | Pāli Word | Roots | Meaning of added word | Meaning of whole word |
| :---: | :---: | :---: | :---: | :---: |
| 14 | Sambhava | san + bhava | bhava is existence | existence due to "san" |
| 15 | Sambuddha | $\begin{aligned} & \text { san + bhava }+ \\ & \text { uddha } \end{aligned}$ | uddha is rooting out | one who rooted out existence in 31 realms |
| 16 | Sambodhi |  |  | state attained by a sambuddha; Nibbāna |
| 17 | Sambhūta | san + bhūta | bhūta refers to satara mahā bhūta | creation of bhüta via "san" in the mind; The Origin of Matter Suddhatthaka |
| 18 | Sammapañña | sammā + pañña | pañ̃a is wisdom | wisdom to see the way to remove "san" |
| 19 | Sammā- <br> Sambodhi <br> (Sammā- <br> Sambuddha) |  | Emphasizing the achievement of sambodhi on one's own | reserved for the Buddhas |
| 20 | Sammatta | san+mā+atta | atta means the "truths leading to sammā" | Sammatta niyama is a knowledge of a Sotāpanna. |
| 21 | Sambojjanga | san <br> +bodhi+añga; rhymes as sambojjanga | "anga" means factors | Factors that lead to Sambodhi |
| 22 | Sampajāna (Sampajanna) | san + pajāna | pajāna is to comprehend | to figure out defilements (san) |
| 23 | sammappadhā na | $\operatorname{san}+m \bar{a}+$ <br> padhāna | mā is to remove; padhāna means "first" | first to do to remove "san" |
| 24 | Sambandha | san + bandha | bandha is to bind, associate with | bind with someone/something with "san" |
| 25 | sambhāvitā | san + bhāvitā | bhāvitā is to use | engage in "san" or sense pleasures |
| 26 | Sambheda | san + bheda | bheda means to quarrel | fighting over pleasurable things or "san" |
| 27 | Sambhita | san + bhita | bhita means to terrify | "san" leading to terror (in mind or in future births) |
| 28 | Sambhoga | san + bhoga | bhoga means pleasurable things, especially food | sense pleasures |
| 29 | Sambhunjati | san + bhunja | bhunja means to eat or consume | engage in sense pleasures |
| 30 | sammoha | san + moha | moha is delusion | extreme delusion |
| 31 | sampādesi/ sampādeta | san + pādesi | pādesi is to sort out and see | to clarify what is "san", as in "vaya dhammā sañkhāra, appamādena sampādeta". |
| 32 | sampahanseti | san +pahāna | pahāna is to remove | to remove "san" |
| 33 | sampañño | san + pañño | pañño means with wisdom, possessive of paññā | attained wisdom to see 'san' |
| 34 | Sampajāna | san + pajāna | pajāna is to clarify | sort out or to clarify "san" |

| No | Pāli Word | Roots | Meaning of added word | Meaning of whole word |
| :---: | :---: | :---: | :---: | :---: |
| 35 | sampayoga | san + payoga | payoga is a clever plan to get something done | plan to access a pleasurable thing |
| 36 | Samphassa | san + phassa | contact with san (in the mind) | Vedanā (Feelings) Arise in Two Ways |
| 37 | Sampassati | san + passati | passati means to comprehend | comprehend "san' |
| 38 | sankilittha or samikilitṭha | san + kilittha | kilitha is to defile | making mind defiled by adding "san" |
| 39 | sankilesa or samkilesa | san + kilesa | kilesa are defilements | things that defile the mind |
| 40 | Samsāra (Samisāra) | san + sāra | sāra means "good" | perception that san (things in this world) are good. |
| 41 | Sanseva <br> (Samseva) | san + seva | seva means to "associate" | to indulge in worldly pleasures |
| 42 | Samucceda (as in samucceda pahāna) | san + ucceda | ucceda means to "remove from the roots"; pahāna is remove | samucceda pahāna means to "get rid of permanently" |
| 43 | samyoga or sanyoga | san + yoga | yoga is to bind | bound with "san" (to this world) |
| 44 | samyojanā or sanyojanā | san + yo +ja | "yo' is to bind; "ja" is to produce | factors that leads to bonds to rebirth process |
| 45 | samudaya | san + udaya | udaya is to arise | arising due to "san" |
| 46 | Samutthāna | san + utthāna | utthāna means "where it arises" | Samutthāna citta is same as cittaja; where "san" originates (mind) |
| 47 | samvāsa or sanvāsa | san + vāsa | vāsa live with | live together; sexual intercourse |
| 48 | Samvara (Sanvara) | san + vara | vara means to stop, avoid | moral behavior |
| 49 | Samvaddha | san + vaddha | vaddha is to "grow" | to add "san", i.e., defilements |
| 50 | Samvannanā | san + vannanā | vannanā is to praise | to praise immoral acts |
| 51 | Samvattana <br> (Samvattati) | san + vattana | vattana is to "drop" | aiding in removing "san" |
| 52 | samvedanā or sanvedanā | san + vedanā | vedanā is to feel | feelings due to "san": samphassa jā vedanā |
| 53 | samividhāna or sanvidhāna | san + vidhāna | vidhāna means ordering | giving orders, organize (normally used mundanely) |
| 54 | samisaraṇa or sansaraṇa | san + sarana | sarana means move around, travel | wandering in samsāra |
| 55 | Samyutta (as in Samyutta Nikāya) | san + yutta | yutta means "contains" | Suttā in the Samyutta Nikāya explain "san" terms |
| 56 | Sancetanā | san + cetanā | cetanā is intention (in a thought) | defiled thoughts |

| No | Pāli Word | Roots | Meaning of added word | Meaning of whole word |
| :---: | :---: | :---: | :---: | :---: |
| 57 | sanditthika | san + ditṭhi | ditṭhi is seeing, vision | seeing "san" with Buddha Dhamma |
| 58 | Sangāyanā | san + gāyanā | gāyanā is to recite | Buddhist Council where suttā describing "san" are recited. |
| 59 | Sanga | san + ga | ga is to attach, | attach to "san" |
| 60 | Sangati | san + gati | gati is character, habit | bad character/habits |
| 61 | Sañgha | san + gha | gha is to remove | Those who have removed "san" belong to Sanhga; Nobles or Ariyā, but usu. include bhikkhus |
| 62 | Sāṅghika | possessive of Sañgha |  | offered to Sañgha |
| 63 | Sangita (Sangeetha) | san + gita | gita is a poem, song | music that bend mind towards sense pleasures |
| 64 | sankalpana or sañkappa | san + kalpana | kalpnana means conscious thoughts | defiled thoughts |
| 65 | sankhitta | san + kitta | kitta is action (kriya) | anything done with 'san' (defilements) in mind |
| 66 | Sansun | san + sûn (û <br> rhymes like <br> put) | sûn means to destroy | calming the mind via removing "san" |
| 67 | Sanvara | san + vara | vara is to stay away from | discipline via staying away from "san", i.e., moral behavior |
| 68 | sanvega or samvega | san + vega | vega is speed or rapidity | enhanced javana of a citta due to "san", i.e., highly emotional |
| 69 | saṅkhāra (should really be sankāra) | san + kāra | kāra is action (all actions are initiated via thoughts) | Sañkhāra - What It Really Means |
| 70 | Sankata | san + kata | kata is a result | produced via sañkhāra; anything in this world |
| 71 | Sansāra <br> (Samisāra) | San + Sāra | Sāra is good, beneficial | What is "San"? Meaning of Sansāra (or Samisāra) |
| 72 | Santāpa | san + tāpa | tāpa is heat | heating of the mind due to "san" |
| 73 | Santutti (or <br> Santhutti) | san + thutti | thutti is to remove: Arogya Parama Labha.. | ease of mind when "san" removed; but commonly used to indicate happiness |

## The 89 (121) Types of Citta

Revised: October 29, 2015; August 31, 2017; June 3, 2018; July 31, 2018; August 28, 2022

## Citta for Kāma loka (in the $\mathbf{1 1}$ sense realms) - $\mathbf{5 4}$ in all

There are three main types of citta here: The differentiation is based on whether they have immoral roots (lobha, dosa, moha), kammically moral roots (alobha, adosa, amoha), or are kammically neutral, i.e., no roots.

- 12 immoral citta: 8 with lobha roots; 2 with dosa roots; 2 with moha roots. All ten immoral acts (dasa akusala) are done with these 12 types of citt $\bar{a}$. Because of the 12 immoral cittā, seven rootless (ahetuka) vipāka citttā can arise in the future. Thus, altogether there are 19 cittā in this category.
- Eight moral cittā: four with all three moral roots and 4 with two moral roots (lacking in wisdom). They can give rise to two types of vipāka citta: eight vipāka cittā with no roots and eight vipāka citta with moral roots (four of them have all three moral roots, and the other four are lacking in wisdom). Thus 24 types of citta are mentioned here, of which 16 have moral roots, and eight are rootless (ahetuka).
- When these same eight moral citta arise in Arahants, they are called kiriya citta or functional citta. They have the same moral roots as the eight moral citta mentioned above but do not have any kammic potential or kammic consequences.
- All those citta with moral roots (8 kiriya cittā for Arahants and 16 for others) are called sobhana (beautiful) citta.
- Finally, three types of kiriya citta arise in citta vithi: they are neither kamma nor kamma vipāka. These are the htree kiriya citta without any roots, and thus are rootless (ahetuka) citta. Two of these perform functions of (i) five-sense-door adverting consciousness (pañcadvārāvajjana citta) and the votthapana citta, and (ii) mind-door-adverting consciousness (manodvārāvajjana citta). (iii) The third one arises in only Arahants (when they smile about sense-sphere phenomena).
- Note that none of the seven akusala vipāka citta has roots. Also, eight kusala vipāka citta associated with pavutti vipāka (i.e, not giving rise to rebirth) also do not have any roots. Those 15 citta together with the three ahetuka kiriya citta are involved in the vipāka phase of a given citta vīthi. They do not have any sobhana or asobhana cetasika other than the 7 universal cetasika and the 6 pakinnaka (particualrs) cetasika; see, "Cetasika - Connection to Gati" for various types of cetasika. Those 18 cittā are listed on p. 112 of Ref. 1 under the second group below the group of akusala citta.

2, The 54 kāmaloka cittā can be categorized in different ways.

| Asobhana (Unbeautiful) |  | Sobhana (Beautiful) |
| :---: | :---: | :---: |
| Immoral- 12 | Rootless - 18 | Moral -24 |
| Lobha (8) | Immoral Vipāka (7) | Moral (8) |
| Dosa $(2)$ | Moral Vipāka $(8)$ | Moral Vipāka $(8)$ |
| Moha $(2)$ | Kiriya $(3)$ | Kiriya $(8)$ |

## Citta for Rūpaloka (in the $16 \boldsymbol{R} \bar{u} p a$ realms) - $\mathbf{1 5}$ in all

3. There are only 15 citta that are predominantly present in the Rūpaloka. Five are jhānic moral citta, and five are vipāka cittā due to those.
4. The five $j h \bar{a} n i c$ moral citta can be experienced by humans when they develop samādhi and attain these (first through fifth) $j h \bar{a} n \bar{a}$. However, they can only experience the corresponding five vipāka cittā when they are born in Rūpalokas.
5. The five $j h a ̄ n i c$ states are characterized by five $j h a \bar{n} a$ factors or mental concomitants: vitakka (initial application), vicāra (sustained application), pīti (zest), sukha (happiness), and ekaggatā (one-pointedness). All five factors are present in the first $j h \bar{a} n a$, and as one moves to higher $j h \bar{a} n \bar{a}$, these factors are lost one by one, and in the fifth $j h \bar{a} n a$, only ekaggat $\bar{a}$ is left.
$P \bar{l} t i$ (zest) is the happiness in the mind, and sukha (happiness) is the tranquility of the body.
6. There are five more jhānic kiriya cittta experienced by Arahants when they attain these $j h \bar{a} n \bar{a}$.

Thus there are 15 citt $\bar{a}$ in all that predominantly belong to the R $\bar{u} p a l o k a$.

## Citta for Arūpaloka (in the 4 Ar $\bar{u} p a$ realms)- 12 in all

7. There are only 12 citt $\bar{a}$ that are predominantly present in the Arūpaloka. Four are jhānic moral citta and four are vipāka citta due to those.
8. The four jhānic moral cittā can be experienced by humans when they develop samādhi and attain these (fifth through eighth) jhānā. However, they can experience the corresponding four vipāka citta only when they are born in Arūpaloka.
9. The first of the four Arūpaloka jhānā is the attainment of the base of infinite space ( $\bar{A} k \bar{a} s \bar{a} n a n c \bar{a} y a t a n a)$. A human must master the fourth jhāna (Rūpaloka) to attain this jhāna.

The second is the base of infinite consciousness (Viññānañcāyatana). The third is the base of nothingness ( $\bar{A} k i n ̃ c a n ̃ \tilde{n} a \overline{a y a t a n a}$ ), and the fourth is the base of neither-perception-nor-non-perception (Nevasañ̃̄̄̄̄āsañ̃̄̄̄yatana). In this last type of consciousness, the perception factor (sañ̃̃̄̄) is so subtle that it can no longer perform the function of perception, i.e., one is unaware of the "world." Yet perception is not altogether absent. This is another reason why the ancient yogis erroneously assumed this eighth jhāna to be Nibbāna.
10. There are four more Arūpaloka jhānic kiriya citttā experienced by Arahants when they attain these jhānā.

Thus there are 12 cittā in all that predominantly belong to the $A r \bar{u} p a$ loka.

## Lokuttara (Supermundane) Citta - 8 in all

11. These pertain to the four stages of Nibbānic attainment: Sotāpanna, Sakadāgāmī, Anāgāmī, and Arahant.
12. Each stage involves two types of citta: path consciousness (magga citta), and fruition consciousness (phala citta).The magga citta has the function of eradicating or permanently attenuating defilements. The phala citta has the function of experiencing the degree of liberation made possible by the magga citta.
13. Each magga citta arises only once and endures for one thought-moment. It is never repeated. The corresponding phala citta (which corresponds to a vipāka citta but is not called a vipāka citta) arises immediately after the magga citta. This is in contrast to mundane vipāka citt $\bar{a}$ where they can occur even many lifetimes after the corresponding kusala or akusala citta.
14. The phala citta can be repeated after one attains it. With practice, it can be sustained for long times, up to 7 days for an Arahant.

Thus, there are $54+15+12+8=89$ cittt $\bar{a}$ in all.

## How 121 Types of Citta are Possible

15. It is possible to further analyze the types of citta by refining the above method by considering that each magga phala can be reached from the vicinity of each anāriya jhānic state.

- One can attain Nibbānic states via the vicinity of each of the five rūpa loka jhānic states (here, the Abhidhamma method of $5 \boldsymbol{j} h \bar{a} n \bar{a}$ is used, instead of the four mentioned in the sutt $\bar{a}$, where the first two jhāna in Abhidhamma categorization are taken to be one jhāna; in the Abhidhamma analysis vitakka and vicāra are removed in two steps, whereas in the sutta analysis it is assumed that they are removed in one step).
- Therefore, the five jhānic states can lead to the four magga cittā and four phala cittā.
- Thus here, there are 40 ways to attain lokuttara citta $\bar{a}$. Therefore, in this case, the total number of citt $\bar{a}$ in this case would be $121(=54+15+12+40)$ instead of 89 .

16. Therefore, magga phala (including the Arahant stage) can be reached via going through any of the $\boldsymbol{j} h a \bar{n} n i c$ states or without going through any jhānic state.

- Of course, the eight lokuttara cittā (i.e., the four stages of Nibbāna) arrived are the same, regardless of whether they arrived via $j h a \overline{n a}$ or not.
- To attain the first Ariya jhāna, one must be at least an Anāgāmi. See \#6 of "Samādhi, Jhāna, Magga Phala - Introduction."

## Important Conclusion Regarding Jhāna and Magga Phala

17. From the above it is clear that magga phala can be attained without jhāna ( 89 cittā analysis applicable). Magga phala can also be attained via each of the five jhānic states (in the Abhidhamma method), which correspond to the four jhāna discussed in the sutta ; here the 121 citt $\bar{a}$ analysis is applicable.

- Furthermore, these jhānic states can be reached via either anāriya jhāna or Ariya jhāna. The experience seems to be the same.
- The only difference is that while kāma rāga is suppressed (vikkhambhana pahāna) in anāriya jhāna, it is REMOVED (samuccheda pahāna) in Ariya jhāna.
- For details, see, "Samādhi, Jhāna (Dhyāna), Magga Phala."

## 8.6 <br> Cetasika (Mental Factors)

Revised January 24, 2020; May 15, 2020; June 8, 2020; August 23, 2022
Cetasika (mental factors; pronounced "chethasikā") appear concomitantly with citta (thoughts; pronounced "chiththā"), and they cease together with citta. They define the character (good or bad or neutral) of the citta.

- The way to "Lead a Moral Life," or to "Seek Good Rebirths," or to "Seek Nibbāna," is to get rid of the bad (non-beautiful) cetasika and cultivate good (beautiful) cetasika. This is done by changing one's habits via learning Dhamma and practicing it: see, "Habits and Goals," "Sansāric Habits and āsavas," and "The Way to Nibbāna - Removal of Āsavā," in that order.

1. Seven cetasika are in every citta. These are called universals (sabba citta sādhāraña):

- Phassa (contact); vedanā (feeling); sañ̃̃̄ā (perception); cetanā (volition); ekaggatā (One-pointedness) can become Sammā Samādhi; jīvitindriya (life faculty) manasikāra (memory).

2. Since they are universals, the above cetasika appears in both kusala and akusala citta. All are important mental factors:

- Saññā and vedanā are in pañcakkhandha.
- Cetana determines kamma; it is the cetasika that "puts together a citta" by automatically incorporating other relevant cetasika according to one's "gati."
- Ekaggatā is the salient factor in samādhi.
- Consciousness cannot arise without phassa. Note that samphassa differs from phassa; see, "Difference between Phassa and Samphassa."
- Jīvitindriya maintains life.
- Manasikāra can be either yoniso manasikāra (important in attaining the Sotāpanna stage), and ayoniso manasikāra can lead to the accumulation of akusala kamma.

3. There are six cetasika that CAN appear in both types of cittā: kusala and akusala. However, they are found in only particular types of cittā. They are called particulars or pakiṇnaka: [pakinnaka :(adj.) [pa+kiṇna (pp. of kirati)+ka] scattered about; fig. miscellaneous, particular, opp. to sādhāraṇa. ]

- Vitakka (focused application) can become Sammā Sañkappa; vicāra (sustained application); adhimokkha (dominate). Adhimokkha is the cetasika that makes another cetasika to dominate a given citta; for example, to get uddhacca, vicikicch $\bar{a}$, or patiigha to strengthen.
- Viriya (effort) can become Sammā Vāyāma ; pīti (joy); chanda (desire, not greed).
- These are important cetasika and play key roles in morality/immorality since they can appear in both kusala and akusala citta. For example, when one's mind is covered with deep ignorance (moha), one may enjoy immoral deeds (pīti), makes a liking for them (chanda), and strive more (viriya) to do such acts.

4. Just like universals, these particulars can appear in either type of cittā, kusala or akusala. Vitakka, vicāra, and pīti are $j h \bar{a} n a$ factors as well.

- Viriya and chanda are two factors in the four bases of mental power, see, "The Four Bases of Mental Power (Cattāro Iddhipāda)."
- Adhimokka is important in decision making by making another cetasika dominant. All these factors can go in an immoral direction too.

5. There are 14 asobhana cetasika (non-beautiful mental factors) that appear only in akusala citta. Out of these, four universals appear in ALL akusala citta:

- Moha (delusion); Ahirika (shamelessness); Anottapa (fearlessness in the wrong); uddhacca (restlessness or agitation).
- Both shamelessness and fearlessness of wrong encourage doing immoral acts. Restlessness causes unwise decision making.

The other ten are "occasionals" that appear in only particular types of akusala citta:

- Lobha (greed); ditthi (wrong view); māna (conceit); dosa (hatred); issā (envy); macchariya (extreme greed, also pretending one does not have wealth); kukkucca (worry, also feeling low); thina (sloth, sluggishness); middha (torpor); vicikicch $\bar{a}$ (doubt arising from temptations).
- Lobha and dosa are two of the three immoral roots. Sloth and torpor normally rise together and are opposite of viriya; they are listed as one factor in Five Hindrances; see, "Key to Calming the Mind."

6. Twenty-five sobhana cetasika (beautiful mental factors) appear only in kusala citta. Out of those, 19 of them appear in every kusala citta and thus are called beautiful universals:

- Saddhā (faith); sati (moral mindfulness) can become Sammā Sati; hiri (shame of wrong); ottappa (fear of wrong); alobha (absence of greed); adosa (absence of hate/anger, of which mettā or "lovingkindness" is a part); tatramajjhattat $\bar{a}$ (neutrality of mind, of which upekkhā is a part); kāyapassaddhi (tranquility of mental body); cittapassaddhi (tranquility of consciousness); k $\bar{a} y a l a h u t \bar{a}$ (lightness of mental body); cittalahut $\bar{a}$ (lightness of consciousness); k $\bar{a} y a m u d u t \bar{a}$ (malleability of the mental body); cittamudut $\bar{a}$ (malleability of consciousness); kāyakammañ̃̃atā (wieldliness of mental body); cittakammaññatā (wieldliness of consciousness); kāyapāguññatā (proficiency of mental body); cittapāguññatā (proficiency of consciousness); k $\bar{a} y u j j u k a t \bar{a}$ (rectitude of mental body); cittujjukat $\bar{a}$ (rectitude of consciousness).

The other six are occasionals that appear in only particular types of kusala citta:

- There are three abstinences: $\operatorname{Samma} \operatorname{Va} \bar{c} c \bar{a}$ (right speech); Sammā Kammanta (right action); Sammā $\bar{A} j \bar{i} v a$ (right livelihood).
- Two Illimitables (limit-less): karuṇā (compassion); muditā (appreciative joy; joy at other's moral success).
- Paññā or pañ̃nindriya (wisdom or wisdom faculty). Sammā Diṭthi leads to paññ̄a.

7. Mental factors in the Noble Eightfold Path are highlighted in green.
8. Immoral roots are highlighted in red. Moral roots are highlighted in purple.
9. As a rule, sobhana and asobhana cetasika CANNOT appear together in a given citta.

### 8.7 Rūpa (Material Form) - Table

## Revised April 22, 2020; August 16, 2020; September 5, 2022

We discuss the 28 types of $r \bar{u} p a$ (material form) in Buddha Dhamma. For discussions on $r \bar{u} p a$, see, "What are Rūpa? (Relation to Nibbāna)" and "Rūpa (Material Form)."

| Concretely Produced (Nipphanna) | Abstract (Anipphanna) Rūpa |
| :---: | :---: |
| I. Great Elements (Mahā Bhūta) | VII. Limiting Phenomenon |
| 1. Pathavi (Extension/Hardness) | 19. Ākasa dhātu (space element) |
| 2. $\bar{A} p o$ (Cohesion/Fluidity) | IX. Communicating (Viñnati) Rūpa |
| 3. Tejo (Heat/Hotness) | 20. Kāya Viññati |
| 4. Vāyo (Motion/Pushing \& Supporting) | 21. Vacī Viñnati |
| II. Internal (Pasāda) Rūpa | X. Mutable (Vikāra) Rūpa |
| 5. Cakkhu (eye element) | 22. Lahutā (lightness) |
| 6. Sota (ear element) | 23. Mudutā (Elasticity) |
| 7. Ghana (nose element) | 24. Kammaññatā (weildiness) |
| 8. Jivhā (tongue element) | XI. Material Qualities (Lakkhaṇa Rūpa) |
| 9. Kāya (body element) | 25. Upacaya (production) |
| III. Gocara (Objective) Rūpa | 26. Santati (continuity) |
| 10. Vanṇa (visible) | 27. Jaratā (Decay) |
| 11. Sadda (Sound) | 28. Aniccatā (Dissolving) |
| 12. Gandha (Smell) |  |
| 13. Rasa (Taste) |  |
| * Photthabba (Tangibility, warmth, and movement) comes from 3 mahā bhūta of pathavi, tejo, vāyo |  |
| IV. Bhāva (Faculties of sex) Rūpa |  |
| 14. Itthi (Feminine) |  |
| 15. Purisa (Masculine) |  |
| V. Hadaya (Mind Base) |  |
| 16. Hadaya Vatthu (seat of the mind) |  |
| VI. Life |  |
| 17. Jīvitindriya (Life faculty) |  |
| VII. Nutritional |  |

```
18. Oja (Nutriment)
```

## Types of $\boldsymbol{R u p} \overline{\boldsymbol{a}}$

- The four great elements (\#1 through \#4), three gocara rūpa (\#10, \#12, \#13), and nutriment (\#18), ALWAYS appear together. They can NEVER be detected by themselves. They come together as suddhatthaka (meaning the smallest collection of those eight types of $r \bar{u} p a$.) See "The Origin of Matter - Suddhatthaka."
- There are nine rūpā created ONLY by kammic energy at the paṭisandhi moment. Those are the five pasāda rūpa (\#5 through \#9), and four other rūpa (\#14 through \#17), including the seat of the mind (hadaya vatthu).
- The 16 rūpa that are highlighted in blue are fine (sukuma) rūpa. The other 12 are coarse (olārika) rūpa.
- Nipphanna rūpa are caused by kamma, citta, utu (tejo), and āhāra (oja). The other 10 (anipphanna rūpa) are not caused or conditioned by kamma, citta, utu (tejo), and āhāra (oja).
- The ten types of anipphanna rūpa (on the right side of the Table) are abstract $r \bar{u} p a$.

## Types of $R \bar{u} p \bar{a}$ Present in Different Realms

- All 28 rūpā arise in the $k \bar{a} m a$-realms. Eight $r \bar{u} p \bar{a}$ comprising sadda, five viñnatti/vikāra-rūpā, jarat $\bar{a}-$ $r \bar{u} p a$, and aniccatā-rūpa, do not arise at the moment of birth (patisandhi.) During life time, they can arise.
- In the 15 rūpa realms, except for Asañña-realm, 23 rūpā arise (ghāna-pasāda, jivhā-pasāda, kāyapasāda, itthi-bhava and purisa-bhava being excluded).
- Only 17 rūpā arise in the Asañña realm. They are the eight avinibbhoga (four mahā bhūta and vaṇna, gandha, rasa, oja), jivita rūpa, ākāsa dhātu, three lahutadi, and four lakkhana- rūp $\bar{a}$;
- No rūpa above the suddhatthaka level arises (except for hadaya vatthu) in the arūpa-realms. Thus, only that trace of "matter" is present anywhere in the 31 realms. Ancient yogis, who attained all eight anāriya jhānā, could not see any rūpa in the arūpa loka and deduced that was Nibbāna. Only a Buddha can see a hadaya vatthu, i.e., a suddhatthaka. Thus, linkage to mater has not been severed in arūpa loka.

## Definitions from Dhammasañgaṇī

The following are quoted from the "WebLink: suttacentral: Rūpavibhatti DS 2.2.3" section of Dhammasañgan̄ī of the Tipitaka.

- Katamaì tai் rūpaì itthindriyà்? Yaí itthiyā itthilingaì itthinimittaì itthikuttaì itthākappo itthattaì itthibhāvo-idà் taì rūpaì itthindriyam.
 purisākappo purisattaì purisabhāvo-idaì tà̇ rūpaì purisindriyam.
 iriyanā vattanā pālanā jı̄vitaì jīvitindriyaì-idaì tam̀ rūpaì jīvitindriyam.
- Katamaì taì rūpam kāyaviñnatti? Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā abhikkamantassa vā patikkamantassa vā ālokentassa va vilokentassa va samiñjentassa v $\bar{a}$ pasārentassa v $\bar{a}$ kāyassa thambhanā santhambhanā santhambhitattaì viñnatti viññāpana viññāpitattaí-idaì tà் rūpaì kāyaviññatti.
- Katamaì taì rūpaì vacīviñnatti? Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā vācā girā byappatho udīranaim ghoso ghosakammaì vācā vacībhedo-ayaì vuccati vācā. Yā tāya vācāya viññatti viññāpanā viññāpitattaím—idaín taì rūpaì vacīviñnatti.
 asamphuṭ़thaì catūhi mahābhūtehi-idamं taì rūpaì ākāsadhātu.
- Katamai் taì rūpaì rūpassa lahutā? Yā rūpassa lahutā lahuparin̄āmatā adandhanatā avitthanatā-idaì taì rūpaì rūpassa lahutā.
- Katamaì taì rūpaì rūpassa mudutā? Yā rūpassa mudutā maddavatā akakkhalatā akathinatā -idà̀ tà̇ rūpaì rūpassa mudutā.
- Katamai் tai் rūpaì rūpassa kammaññatā? Yā rūpassa kammaññatā kammaññattaì kammaññabhāvo-idaì tà̀ rūpà̀ rūpassa kammaññatā.
- Katamaì taì rūpaì rūpassa upacayo? Yo āyatanānaì ācayo, so rūpassa upacayo-idaì taì rūpaì rūpassa upacayo.
- Katamaì taì rūpaì rūpassa santati? Yo rūpassa upacayo, sā rūpassa santati- idai் taì rūpaì rūpassa santati.
- Katamaì taí rūpaì rūpassa jaratā? Yā rūpassa jarā jīraṇatā khaṇ̦iccam pāliccain valittacatā āyuno sam̀hāni indriyānaì paripāko-idam̀ taì rūpam் rūpassa jaratā.
- Katamaim taì rūpaì rūpassa aniccatā? Yo rūpassa khayo vayo bhedo paribhedo aniccatā antaradhānaìi-idaì taì rūpaì rūpassa aniccatā.
- Katamaì taì rūpaì kabaḹ̄kāro āhāro? Odano kummāso sattu maccho maìsaì khīraì dadhi sappi navanītaì telaì madhu phānitaì, yaì vā panaññampi atthi rūpaì yamhi yamhi janapade tesamं tesamं sattānam் mukhāsiyà் dantavikhādanamं galajjhoharan̄̄yam் kucchivitthambhanam், yāya ojāya sattā yāpenti-idaì taì rūpaì kabalīkāro āhāro.

### 8.8 Rūpa - Generation Mechanisms

1. Rūpa (or matter) can be generated by four causes: kamma, citta, utu, and $\bar{A} h \bar{a} r a$ (food). I will discuss these in detail later.

- Kamma here refers to volition (cetana $\overline{)}$ ). The 25 kinds of kamma that produce $r \bar{u} p \bar{a}$ are the volitions of the 12 akusala cittā, 8 great kusala cittā, and the five rūpa loka kusala citt $\bar{a}$. These $r \bar{u} p a$ are created with a time lag, when kamma vipāka bear fruits, like at the pațisandhi to a new life. The three rūpa dasaka of vatthu, kāya, and bhava are created at patisandhi by kamma vipāka.
- The rūpa produced by the citt $\bar{a}$ arise at the same time as the citta themselves, and only at the rising part of the citta . Out of the 89 possible citt $\bar{a}, 75$ citt $\bar{a}$ can produce rūpa (4 arūpa loka vipāka citt $\bar{a}$ and the two sets of fivefold sense consciousness cannot produce $r \bar{u} p a$ ).
- Thus both kammaja and cittaja rūpa have mind as the direct cause. Both of these decay rapidly and are converted to utuja rūpa. What we normally see are the utuja rūpa and āhārajā rūpa, which have their origins also in the great elements of tejo and oja.
- The great element tejo is responsible for producing utu samutthana rūpa: Beginning from the moment of rebirth-linking, the internal tejo element found in the rūpa kaläpas born of kamma combines with the external tejo and starts producing organic material phenomena originating from tejo. Thereafter the tejo element in the rūpa kalāpas born of all four causes produces organic material phenomena born of tejo element throughout the life. Externally, tejo element also produces inorganic material phenomena, such as climatic and geological transformations.
- The nutritive essence, oja, is present in all rūpa-kalāpas both inside the body (internal) and outside the body (external). The external food, which is eaten, is digested in the stomach and dispersed through blood to all parts of the body. So the internal oja and the external oja meet in every part of the body. The combination of internal and external oja produce āhāraja a rūpas.

2. The 8 avinibbhoga rūp $\bar{a}$ of pathavi, $\bar{a} p o$, tejo, vāyo, vaṇna, gandha, rasa, and oja are ALWAYS found together. That unit or kalāpa is the smallest rūpa unit and is called the pure octad (suddhatthaka). Those 8 avinibbhoga rūpa and the $\bar{a} k \bar{a} s a d h a \bar{t} t u$ are produced by all four causes.
3. The four lakkhana rūpā of upacaya, santati, jaratā, and aniccat $\bar{a}$ are not produced by any cause. They represent the nature of $r \bar{u} p \bar{a}$.
4. The remaining 15 rūpa are produced by different combination of the four possible causes as shown in the table below:

|  | Kamma Born | Citta Born | Utu Born | Āhāra Born |
| :---: | :---: | :---: | :---: | :---: |
| Cakkhu (eye) | Yes |  |  |  |
| Sota (ear) | Yes |  |  |  |
| Ghana (nose) | Yes |  |  |  |
| Jivhā (tongue) | Yes |  |  |  |
| Kāya (body) | Yes |  | Yes |  |
| Sadda (sound) |  | Yes |  |  |
| Itthi Bhva <br> (femininity) | Yes |  |  |  |

| Purisa (masculine) | Yes |  |  |  |
| :---: | :---: | :---: | :--- | :--- |
| Hadaya vatthu <br> (heart base) | Yes |  |  |  |
| Jivitindriya <br> (life faculty) | Yes |  |  |  |
| Kāya viññatti <br> (bodily intimation) |  | Yes |  | Yes |
| Vacī Viññtti <br> (vocal intimation) |  | Yes |  | Yes |
| Lahuta (lightness) |  | Yes | Yes | Yes |
| Muduta <br> (malleability) |  | Yes | Yes | Yes |
| Kammaññata <br> (wieldiness) |  |  |  |  |

## 8.9 <br> Rūpa Kalāpa (Grouping of Matter)

Revised September 15, 2020; September 6, 2022; October 17, 2022 (\#7)

1. There are 28 rūpa types discussed in Abhidhamma: "Rūpa (Material Form) - Table." They are not found separately in nature. The four causes produce them through tiny material groups called rūpa kalāpa or "elementary groups of matter."

- All $r \bar{u} p \bar{a}$ have origins in the four great elements of pathavi $\bar{l}, \bar{a} p o, t e j o$, and $v \bar{a} y o$. However, they all arise together in the smallest unit of matter, a suddhatthaka. See "The Origin of Matter - Suddhatthaka." Four more ru$p \bar{a}$ (vaṇna, gandha, rasa, oja) derived from the great elements are in a suddhaṭthaka making it an octad (composed of eight or an atttaka.)
- There are 15 other elementary units (rūpa kalāpā) that derive from suddhațthaka. All 16 types of rūpa kalāpā are not further divisible. They are avinibbhoga rūpa.
- Let us briefly discuss them.

2. There are three rūpa kalāpa that have nine units: A suddhatthaka "energized" by kammic energy becomes a j $\bar{\imath} v i t a$ navaka (vital nonad) of nime units. That added unit is an "energy unit" called a j $\bar{\imath} v i t a r \bar{u} p a$. That $j \bar{v} v i t a r u \bar{u} p a$ keeps a physical body alive. Another element of nine units, a sadda navaka (sound nonad) is responsible for the sound created by utu, i.e., it is an utuja rūpa. Another is kāyaviñnatti navaka created by cittā responsible for bodily intimation.

- Eight types of rūpa kalāpā have ten units (dasaka or decade) created by kammic energy: Here a suddhatthaka combines with a jīvita rūpa and another unit created by kammic energy to become a dasaka. Those eight types of dasaka are vital parts of a living being. For example, a cakkhu pasāda rūpa (together with the other nine units) creates a cakkhu dasaka responsible for seeing. In the same way sota dasaka, ghana dasaka, jivhā dasaka, kāya dasaka arise. itthibhāva rūpa and purisabhāva rūpa give rise to itthibhāva dasaka and purisabhāva dasaka. The seat of the mind, vatthu dasaka arises with the hadaya vatthu.
- The following are created only by citta (thoughts): One is vacīviññatti-sadda-dasaka (vocal intimation decad) responsible for speech. Kāyaviññatti-lahutādi-dvadasaka (dodecad of bodily intimation) of 12 units with kāyaviññatti and three lahutādi rūpa. Another is vaciviññatti-sadda-lahutādi-terāsaka (tricad of sound) of 13 units with vaciviññatti, three lahutādi rūpa, and sadda.
- Then there is lahutādi-ekadasaka (suddhaṭthaka + lahuta + muduta + kammaññata) with 11 units created by citta. There is also sadda-lahutādi-dvadasaka (suddhaṭthaka + lahuta + muduta + kammañnata $+s a d d a$ ) with 12 units created by $u t u$.

3. All rūpa kalāpā have the following characteristics.
4. All the $r \bar{u} p \bar{a}$ in a ru$p a$ kalāpa arise together, i.e., they have a common genesis.
5. They also cease or dissolve together, i.e. they have a common cessation.
6. They all depend on the four great essentials present in the kalāpa for their arising, i.e. they have a common dependence.
7. They are so thoroughly mixed that they cannot be distinguished, i.e. they co-exist.
8. It should be noted that kalāp $\bar{a}$ are so small that they are indistinguishable from pure energy. The origin of rupa is a javana citta, which is formless and mass-less. Science has shown that the smallest "particle" detected, the Higgs boson, is indistinguishable from energy. See, "The Origin of Matter - Suddhatthaka."
9. There are 17 types of kalāpā produced in 21 ways:

9 kammaja kalāpā 6 cittaja kalāpā 4 utuja kalāpā 2 āhāraja kalāpā as shown below:

|  | Kamma Born | Citta Born | Utu Born | Āhāra Born |
| :---: | :---: | :---: | :---: | :---: |
| Cakkhu dasaka (eye decad) | Yes |  |  |  |
| Sota dasaka (ear decad) | Yes |  |  |  |
| Ghana dasaka (nose decad) | Yes |  |  |  |
| Jivha dasaka (tongue decad) | Yes |  |  |  |
| Kāya dasaka (body decad) | Yes |  |  |  |
| Itthi dasaka (female decad) | Yes |  |  |  |
| Purisa dasaka (male decad) | Yes |  |  |  |
| Vatthu dasaka (base decad) | Yes |  |  |  |
| Jivita navaka (vital nonad) | Yes |  |  |  |
| Suddhattaka (pure octad) |  | Yes | Yes | Yes |
| Kayavinnati navaka (body intimation nonad |  | Yes |  |  |
| Vacī viññati sadda dasaka (vocal intimation decad) |  | Yes |  |  |
| Lahutādi eka dasaka (undecad of mutability) |  | Yes | Yes | Yes |
| Kayaviññati Lahutādi dva dasaka (undecad of mutability) |  | Yes | Yes |  |
| Vaciviññati Sadda <br> Lahutādi terasaka (tridecad of mutability) |  | Yes |  |  |
| Sadda navaka (sound decad) |  |  | Yes |  |

## 6. Internal and External Kalāpā

All the 21 rūpa kalāpā mentioned above occur internally in living beings. Itthibhāva-dasaka does not occur in males. Similarly, pumbhava-dasaka (or purisabhāva-dasaka) does not occur in females. For those who are born blind or deaf, cakkhu-dasaka or sota-dasaka are not present.

- In the external (bahiddha) world, only the two utuja-kalāpāare found. All inanimate things, such as trees, stones, earth, water, fire, corpses, etc., are made up of utuja-suddhatthaka kalāp $\bar{a}$. The sounds produced by beating two sticks together, rubbing branches in the wind, or by instruments such as violin, piano, radio, cassettes, etc., are utuja-sadda-navaka kalāpā.
- From the internal rūpas, kāya-pasāda, bhava-rūpa (femininity and masculinity), cittaja-rūpa, utujarūpa and $\bar{a} h a \bar{a} a j a-r \bar{u} p a$ spread all over the body. So they will be present in the eye, the ear, the nose, the tongue and in every part of the body.

## 7. Rūpa in Kamaloka

If circumstances permit, all 28 material qualities occur undiminished in an individual during a lifetime in kāmaloka (sense-sphere).

- In womb-born creatures, only three kammaja-kalāpā comprising body-decad, sex-decad and heart decad are manifested at the moment of conception (at patisandhi).

Here again, the sex-decad may not be manifested in some particular individuals. After conception, during life, the eye-decad and the rest are manifested slowly in due order. Of the groups of material qualities produced in four ways, kammaja-rūpa starts to form at the moment of conception and forms incessantly at every minor instant. Cittaja-rūpa begins to form from the second moment of consciousness, i.e., from the arising instant of the first bhavañga, which follows the rebirth-consciousness. Cittaja-rūpa continues to be formed for a lifetime.

- Utuja-rūpa starts to form from the existing instant of rebirth consciousness. The reason is that the tejodhātu (utu) present in the first kammaja-kalāpā comes to the static stage (thiti) at that instant. From that time onward, the tejo-dhātu produces utuja-rūpa at every moment. Since tejo-dhātu is present in every kalapa, every kalapa, from the time it reaches the static stage, produces new utuja-kalāpā at every minor instant. And the new utuja-kalāp $\bar{a}$, from the time they reach the static stage, again produce new utuja-kalāpa $a$ at every minor instant. So this process goes on forever.

Every kalapa also contains the nutritive essence, oja. But āhāraja-rūpa forms when internal oja meets external oja at the time of diffusion of nutritive essence and the combination of internal and external oja comes to the static stage. From that instant, āhāraja-rūpa is also formed at every minor instant. As new groups of material qualities are incessantly produced, old groups dissolve and disappear. Thus, the material phenomena go on uninterruptedly in the sense-sphere till the end of life like the flame of a lamp, or river stream.

Material Phenomena at Death: At the time of death, psychic life and physical life must cease together. This means that all kammaja rūpa that contains physical life must cease at the time of death. So at the beginning of the seventeenth citta, reckoned backward from the death-consciousness (cuti citta), the last kammaja rūpa is formed. This last kammaja rūpa will cease at the dissolving instant of the deathconsciousness. Cittaja rūpa is formed till the arising instant of the cuti citta. This last cittaja rūpa will have lasted for a conscious-moment at the dissolution of cuti citta and thus will perish in another sixteen
 cuti citta because the support required for the formation of $\bar{a} h \bar{a} r a j a ~ r \bar{u} p a$ can be furnished by citta up to that time. So at death, that last-formed $\bar{a} h a \bar{a} r a j a ~ r u \bar{u} a$ lasted only one minor instant. However in another fifty minor instants (rūpa lifespan - 51 minor instants or 17 conscious-moments), that $\bar{a} h \bar{a} r a j a ~ r u \bar{u} p a ~ a l s o ~ c e a s e s . ~$ Thus at the time of death, kammaja rūpa, cittaja rūpa and $\bar{a} h a ̄ r a j a ~ r u ̄ p a ~ c e a s e ~ a l m o s t ~ i n s t a n t l y . ~$

- But utuja-rūpa goes on forming and dissolving till the corpse is converted into dust. A corpse consists of only utuja-rūpa.
- So when a person dies and is reborn in another life, material phenomena similarly arise from the instant of conception and go on arising till the time of death.

Arising of Material Phenomena in Rūpa-planes In the rūpa-plane, nose-decad, tongue-decad, bodydecad, sex decade and $\bar{a} h \overline{a r a j a-k a l a ̄ p} \bar{a}$ do not arise. At the time of opapātika rebirth, four kammajakalāp $\bar{a}$ arise: eye decad, ear decad, heart decade and vital nonad. During life, however, cittaja kalāp $\bar{a}$ and utuja kalāpā also arise. For the Asañ̃na Brahmā, hadaya vatthu is there, but it is shielded by the "physical body," which has no mana indriya. Thus, it cannot interact with dhamma (or viññāna dhātu,) and citt $\bar{a}$ cannot arise. Therefore, cittaja kalāpā do not arise.

- Thus in kāma loka and rūpa loka, the process of the arising of material phenomena should be understood in two ways, that is (1) at rebirth and (2) during life.

### 8.10 Akusala Citta and Akusala Vipaka Citta

Revised November 4, 2017; October 22, 2021; October 27, 2021

## Twelve Types of Akusala Citta

All ten akusala kamma are done with these 12 akusala citta. There are 8 greed-rooted, 2 hatred-rooted, and 2 delusion-rooted citta. Of course, citta (pronounced "chiththā") are thoughts; any speech or bodily action starts with a thought.

- See, "Conditions for the Four Stages of Nibbāna" for a list of 12 akusala citta.

Both greed-rooted and hatred-rooted also have delusion as a root.

|  | Root | Assoc. with | Dissoc. with | Feeling | Sasankhārika? |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Greed | Wrong view | - | Pleasure | No |
| 2 | Greed | Wrong view | - | Pleasure | Yes |
| 3 | Greed | - | Wrong view | Pleasure | No |
| 4 | Greed | - | Wrong view | Pleasure | Yes |
| 5 | Greed | Wrong view | - | Equanimity | No |
| 6 | Greed | Wrong view | - | Equanimity | Yes |
| 7 | Greed | - | Wrong view | Equanimity | No |
| 8 | Greed | - | Wrong view | Equanimity | Yes |
| 9 | Dislike | Aversion | - | Displeasure | No |
| 10 | Dislike | Aversion | - | Displeasure | Yes |
| 11 | Delusion | Vicikicchā | - | Equanimity | - |
| 12 | Delusion | Uddacca | - | Equanimity | - |

1. The first citta is described as, "a thought rooted in greed (and delusion), associated with wrong views, accompanied by pleasure." The others can be stated the same way.

- Those citt $\bar{a}$ that are associated with wrong views are the worst, even though wrong views are listed as \#10 on the ten immoral actions, see, "Ten Immoral Actions (Dasa Akusala)."
- Citta generated with pleasure means one is enthusiastic about it because of one's habits (gati) or one starts liking it. For example, one who likes to go fishing has a bad habit; he gets pleasure by just thinking about it; thus it is stronger than one done with equanimity.
- A hateful citta is always arises with displeasure, but that displeasure can arise with ignorance. For example, someone who has wrong views may generate displeasure towards a moral person merely because of one's wrong views. I have encountered some people who got upset with me when I pointed out that rebirth has evidence for it.
- Sasañkhārika means with less javana power.
- See, the notes at the end of the post "Conditions for the Four Stages of Nibbāna" for details.

2. Since vicikicch $\bar{a}$ is also due to wrong views, those five citt $\bar{a}$ marked in red are the strongest akusala citta done with "wrong views" or "ditt!hi." Those five cittā stop arising in the mind of a Sotāpanna.

They can condition one's mind to a "gati" suitable for birth in the apāy $\bar{a}$; see, "What is in a Thought? Why Gati are so Important?."

- The $v y \bar{a} p \bar{a} d a$ or the strong hate - that makes one eligible for birth in the $a p \bar{a} y \bar{a}$-actually arises from the first four types of lobha citta. It is also called "dvesa" or "dvesha" which means "second manifestation" or ("dvi +"vesa") of lobha. When one is burdened with extreme greed, it can turn to the second manifestation of extreme hate for anyone in the way.
- Upon attaining the Sotāpanna stage, such habits or "gati" are removed, and thus no adverse kamma vipāka comes to mind at the dying moment, as we point out below. The "pati+ichcha sama+uppada" or what is born is similar to what is grasped, is at play at the dying moment. One automatically grasps things one has a habit of liking; they automatically come to the forefront of the mind at the dying moment.

3. The other 7 akusala citta are stopped from arising in stages as a Sotāpanna cultivates the Path further.

- The two dislike (patigha)-rooted cittā (together with some potency of the remaining 4 greed-based citta, i.e., kāma rāga) are reduced at the Sakadāgāmī stage.
- Those two dislike-rooted citt $\bar{a}$ are stopped from arising at the $A n \bar{a} g \bar{a} m \bar{\imath}$ stage. Also, the potency of the remaining 4 greed-based citta, i.e., $\boldsymbol{k} \bar{a} m a \boldsymbol{r a g} a$ is reduced to just $\boldsymbol{k} \overline{\boldsymbol{a}} \boldsymbol{m a}$ level.
- Finally, the remaining 4 greed-based citta and the uddhacca citta are removed at the Arahant stage. Thus an Arahant will never experience an akusala citta.

## Seven Types of Akusala Vipāka Citta

4. These 12 types of citta lead to 7 types of vipāka (resultant) citta.

- None of the vipäka citta has any unwholesome roots (greed, hate, delusion); of course, they also do not have the wholesome roots. Thus they are called rootless (ahetuka) citta.

5. Five of these akusala vipāka cittā are the ones that lead to (undesirable) sense events through the five physical senses. Thus they are responsible for eye consciousness (cakkhu viññanna), ear consciousness (sota viññāṇa), nose consciousness (ghāṇa viññāṇa), taste consciousness (jivhā viñ̃nāṇa), and body consciousness (kāya viññāna).

- Except for the body consciousness which is accompanied by pain, the other four are accompanied by equanimity; see,"Avyākata Paticca Samuppāda for Vipāka Viññāna" and "How Are Paticca Samuppāda Cycles Initiated?"
- Thus any feelings of displeasure etc due to what is seen, heard, smelled, or tasted, are in the thoughts that follow this "event" experienced through one of the physical senses. We will discuss this in detail in the Abhidhamma section.

6. The sixth akusala vipāka citta is called receiving consciousness accompanied by equanimity (upekkhāsahagata sampaticchana citta). This is a citta that accepts the sense impression to the mind (we will discuss it in the Abhidhamma section).
7. The seventh akusala vipāka citta is called the investigating consciousness accompanied by equanimity (upekkhā-sahagata santīraṇa citta). This is the citta that is responsible for the birth in the apāyā (lowest four realms), i.e, it acts as the patisandhi citta for the birth in the apāy $\bar{a}$.
8. One may wonder how a Sotāpanna avoids the apa $\bar{a} \bar{a}$, because he/she is still capable of generating the 7 cittā that are not associated with ditthi (see the Table above), and thus it is possible to generate this apāyagāmī-patisandhi citta.

- The point is that after becoming a Sotāpanna, such vipāka thoughts do not come to the mind at the last thought processes; only the good kamma vipāka come to the forefront of the mind close to the dying moment because he/she no longer has the "gati" suitable for a birth in the apāy $\bar{a}$.

9. It is hard to give up one's bad habits ("gati"), mainly because one does not fully comprehend the true nature of the world, i.e., anicca, dukkha, anatta, and thus has wrong views about this world with 31
realms. One needs to comprehend that one's actions have consequences not only in this life, but (mainly) in the future lives; also, whatever one gains by such harmful actions is just temporary, AND do not leave one with a peaceful mind.

### 8.11 37 Factors of Enlightenment

## Revised January 20, 2016; May 13, 2019; March 11, 2020; August 20, 2022 (added references)

1. The 37 factors of Enlightenment (Bodhipakkhiya Dhamma) are the combined number of individual factors in:

- Four Factors of Mindfulness (Cattāro Satipatṭhāna); see "Mahā Satipatthāna Sutta,"
- Four Supreme Efforts (Cattāro Sammappadhāna); see, for example, "WebLink: suttacentral: Padhāna Sutta (AN 4.13)."
- Four Bases of Mental Power (Cattāro Iddhipāda); see a series of suttas starting with the "WebLink: suttacentral: Apāra Sutta (SN 51.1)."
- Five Faculties (Pañca Indriya); see a series of suttas starting with the "WebLink: suttacentral: Suddhika Sutta (SN 48.1)."
- Five Powers (Pañca Bala); see, for example, "WebLink: suttacentral: Punakūta Sutta (AN 5.16)."
- Seven Factors of Enlightenment (Satta Bojjhañga); see the series of suttas starting with "WebLink: suttacentral: Himavanta Sutta (SN 46.1)." and
- Factors of the Noble Eightfold Path (Ariya Ațthañgika Magga); see the series of suttas starting with "WebLink: suttacentral: Kalyānamitta Sutta (SN 45.49)."

2. These factors focus on various mental factors (cetasika) and citta that incorporate those cetasika. They are labeled with different names under each category in the Table below to highlight their application.

- For example, the paññā cetasika is labeled as vīmainsā in Four Bases of Mental Power, as dhammavicaya in Satta Bojjhañga, and as Sammā Dittthi in the Noble Eightfold Path.
- Under each category, I have listed the term used for that cetasika in that category. For example, in the Noble Eightfold Path, Sammā Vāyāma is the viriya cetasika.
- Thus even though there are 37 factors of Enlightenment, there are only $\mathbf{1 4}$ cetasika that will be cultivated while cultivating all seven above categories.
- Those seven categories are all interrelated. Thus all 37 factors may be cultivated by focusing only on Cattāro Satipatṭhāna, Satta Bojjhañga, or the Noble Eightfold Path.

3. In the "WebLink: suttacentral: Bhāvanā Sutta (AN 7.71)," the Buddha explained that one needs to cultivate those 37 factors to reach Nibbāna.

- However, there is no need to go through all of them individually. Cultivation of one set in full WILL fulfill the others.
- For example, in the "WebLink: suttacentral: Mahāsatipatthāna Sutta (DN 22)" Buddha explained that the cultivation of Satipatthāna is a guaranteed way to Nibbāna.
- Similarly, "WebLink: suttacentral: Ānāpānassati Sutta (MN 118)" explains that the cultivation of $\bar{A} n a \bar{p} \bar{n} n a s a t i$ will fulfill Satipaṭthāna.
- Therefore, there can be many different ways to get to Nibbāna (Arahanthood.) The key step is to get to the Sotāpanna Anugāmi stage by comprehending the Four Noble Truths/Paticca Samuppāda/Tilakkhaṇa. See "Mahā Cattārisaka Sutta (Discourse on the Great Forty)."

4. It is also important to realize that cetasika is related to one's character (gati): "Cetasika - Connection to Gati"
5. The Four Supreme Efforts (Cattāro Sammappadhāna) are the efforts to purify the mind: (i) remove defilements (akusala) that have arisen, (ii) prevent new defilement (akusala) from arising, (iii) enhance
wholesome states (kusala) that have arisen, (iv) initiate new wholesome states (kusala). WebLink: suttacentral: AN 4.14 Samivarasutta (Restraint).

- Not to let an unwholesome thought arise which has not yet arisen. $\rightarrow$ restraint (00)
- Not to let an unwholesome thought continue which has already arisen. $\rightarrow$ abandonment (01)
- To make a wholesome thought arise which has not yet arisen. $\rightarrow$ development (10)
- To make a wholesome thought continue which has already arisen. $\rightarrow$ protection (maintaining) (11)

6. All 37 factors of enlightenment are fulfilled at the Arahant stage.

| $\begin{array}{\|c} \text { Ite } \\ \mathrm{m} \end{array}$ | Parameter Involved | Four Suprem | Iddhipad <br> a | Five Faculties | Five Powers | Four <br> Factors of Mindfulne ss | 7 Factors of Enlightenme nt | Path <br> Factors | Coun t |

7. Also, see "Two Versions of 37 Factors of Enlightenment."

### 8.12 Conditions for the Four Stages of Nibbāna

## Revised August 3, 2016; Revised November 19, 2018; August 21, 2022

The following Table shows the conditions to be fulfilled (i.e., factors to be eliminated) to attain each stage of Nibbāna. For example, to attain the Sotāpanna stage, three of the ten samyojana (or the ten fetters) are removed, akusala citta $\# 1,2,5,6$, and 11 are removed; also, the apāyagām $\bar{\imath}$ strength in the other citt $\bar{a}$ also removed, etc.

| Ariya Stage | Samyojana | Akusala Citta | Anusaya | $\overline{\text { Asava (Asaya) }}$ | Kilesa <br> (Akusala <br> Cetasika) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Sotāpanna | sakkāya diṭthi, vicikicchā, silabbata parāmāsa | 1,2,5,6,11 <br> Also removes apāyagāmi strength in the rest | ditṭhi, vicikicchā | diṭthāsava | Removed: ditt thi, vicikicchā, thina, middha, issa, maccariya, kukkucca <br> Reduced: lobha, dosa, moha to rāga, paṭigha, avijjā |
| Sakadāgāmī | kāma rāga <br> (reduced) <br> patigha <br> (reduced) | weakens 9, 10 also weakens kāma rāga in 3,4,7,8 | kāma rāga <br> (reduced) <br> patigha <br> (reduced) | kāmāsava (reduced) | Reduced: <br> kāma rāga and patigha |
| Anāgāmī | kāma rāga, patigha | $9,10$ <br> also removes kāma rāga in 3,4,7,8 | kāma rāga, patigha | kāmāsava | Removed: <br> kāma rāga and paṭigha |
| Arahant | rūpa rāga, arūpa rāga, māna, uddhacca, avijj $\bar{a}$ | 3,4,7,8,12 <br> (see below for a list of akusala citta) | bhava rāga, māna, avijj $\bar{a}$ | bhavāsava, avijjāsava | Removed: avijjā, ahirika, anatoppa, uddhacca, māna |

The ability to commit akusala kamma also is removed in stages as one progresses and is completely removed only at the Arahant stage. It is important to note that a Sotäpanna completely removes only one akusala kamma, that of having wrong views (micchā ditthi): "What is the only Akusala Removed by a Sotāpanna?." But this leads to removing many kilesa (mental impurities); see the Table.
$\bar{A} s a v a$ and anusaya are discussed in the post, "Āsava, Anusaya, and Gati (Gathi)." Kilesa is discussed in "Ditthi (Wrong Views), Sammā Ditthi (Good/Correct Views)." For a discussion on Dasa Samiyojana, see "Dasa Samyojana - Bonds in Rebirth Process."

The 12 types of akusala citta are listed in, "Akusala Citta and Akusala Vipāka Citta." But I thought it would be more explanatory to list them. The numbers below correspond to the numbers in the Table.

Lobha (Greedy) Citta (Also has the moha root)

1. Citta connected with a wrong view, accompanied by pleasure, and done with habit.
2. Citta connected with a wrong view, accompanied by pleasure, and done reluctantly.
3. Citta NOT connected with a wrong view, accompanied by pleasure, and done with habit.
4. Citta NOT connected with a wrong view, accompanied by pleasure, and done reluctantly.
5. Citta connected with a wrong view, accompanied by a neutral mind, and done with habit.
6. Citta connected with a wrong view, accompanied by a neutral mind, and done reluctantly.
7. Citta NOT connected with a wrong view, accompanied by a neutral mind, and done with habit.
8. Citta NOT connected with a wrong view, accompanied by a neutral mind, and done reluctantly.

Dosa (Hateful) Citta (Also has the moha root)
9. Citta associated with hate, accompanied by displeasure, done with habit.
10. Citta associated with hate, accompanied by displeasure, done reluctantly.

Moha Citta (only with the moha root)
11. Citta accompanied by a neutral mind, associated with vicikicch $\bar{a}$ (not aware of bad consequences)
12. Citta accompanied by a neutral mind, associated with uddhacca (unfocused).

## Notes:

1. Even though recent Abhidhamma literature categorize lobha and dosa citta as asañkhārika (unprompted) and sasañkhārika (prompted), in original Abhidhamma, they were not categorized as such.
2. For example, the two dosa-mūla cittā are:
i. Domanassa sahagata patigha-sampayutta citta.
ii. Domanassa sahagata sasankhārika patigha-sampayutta citta.

- The first citta arises due to sansāric habits and thus is more potent. For example, someone who tends to easily get angry, normally generates such potent citta.
- On the other hand, another person without such a habit, may not generate such a citta unless "forced hard"; it is done with reluctance, "when pushed to the limit", or if the perceived "sense pleasures" are enticing. Then he/she is actually "incorporating new "san" or initiating a new habit; thus, the name "sasañkhārika."

### 8.13 Ultimate Realities - Table

1. This Table lists the three kinds of ultimate realities (paramattha dhamma) in this world of 31 realms; they are conditioned, i.e., they arise due to causes and perish subsequently on their own; nothing in this world is permanent. They do not arise if there are no causes, and when that happens Nibbāna is the result.

- Nibbāna is the unconditioned reality. It is attained when the six causes (lobha, dosa, moha, alobha, adosa, amoha) are not there. Then the mind cannot get a "foothold" anywhere in the material world.
- Cultivating the three causes of alobha, adosa, amoha (together with removing lobha, dosa, moha) is needed in following the Noble Eightfold Path, and when wisdom grows, all causes will be rejected by the mind automatically at the end.

2. Ultimate realities can be compared to the fundamental particles in physics. Even though it was believed in the early stages that atoms were the fundamental particles, now there are about 32 of such particles; but now the "particle nature" is dissolving into "energy packets" in elementary particle physics. In Buddha Dhamma, the 28 types of rūpa are very fine, and cannot be "seen" even with abhiññā powers; they are "energy packets."
3. The table also shows how "this world of 31 realms" can be described via the five aggregates, the twelve sense bases, or 6 dhatus and how they incorporate the ultimate realities. There are other ways too. They are all compatible and consistent with each other.

- For example, 89 citta and 52 cetasika are included in the four "mental" aggregates, or in the mind base and mind objects, or just in the viññāna dhātu.
- Also note that the correct word is khandha and NOT skandha for the five "aggregates." The Pāli (and Sinhala) word khandha means a "pile" (as in a pile of sand) and is still used to denote a hill in Sinhala. I just look up the meaning of "skandha" in Sanskrit and it says "Hindu god of war." This is how the true meanings of the original words have been lost due to incorporation of "sophisticated sounding" Sanskrit words with no relevance.

Table: Analysis of the "world" and Nibbāna in terms of ultimate realities.

| Lokaya (World of 31 Realms) |  |  |  | Nibbāna |
| :---: | :---: | :---: | :---: | :---: |
| Ultimate Realities (4 types) | Citta (89) | Cetasika (52) | Rūpa (28) | Nibbāna |
| Aggregates (5) |  | Vedanā khandha Saññā khandha Sañkhāra khandha Viññāna khandha | Rūpa khandha |  |
| Sense Bases (12) | Mind base | Mind Objects (also includes fine matter or sukuma rūpa) | 5 internal (pasāda) rūpa 5 external rūpa (vaṇna, sadda, gandha, rasa, phoṭ̣habba) |  |
| Dhātu (6) |  | Viññāṇa | pathavi, āpo, tejo, vāyo, ākāsa |  |
|  | sañkhata (sankata in Sinhala) include everything in this world (sentient beings have all six $d h a \bar{t} t u$; everything else in the world, like inert objects and plants, do not have viññāna) |  |  | asañkha ta |
| Notes: <br> 1. Number of citta can be 121 in the alternate scheme; see, The 89 (121) Types of Citta |  |  |  |  |

2. Vedanā, saññā are two cetasika; sañkhāra has the rest of 50 cetasika; for a list of cetasika, see Cetasika (Mental Factors)
3. For fine (sukuma) rūpa, see Rūpa (Material Form) - Table.

### 8.14 <br> 31 Realms of Existence

May 20, 2016; revised May 30, 2018; December 16, 2019; June 11, 2020; August 24, 2020 (revised \#5 and many lifetimes, added \#6); September 6, 2022 (\#2, \#3)

| Realm | Description | Cause of Birth in Realm <br> (Note 1) | Lifetime |
| :---: | :---: | :---: | :---: |
| The Apāyā (Undesired Realms) |  |  |  |
| 1. Niraya (Hell) | Unimaginable suffering. | Anantariya papa kamma, Ten akusala kamma with established wrong views. | Variable |
| 2. Tiracchāna (Animal; Tirisan in Sinhala) | Microscopic to large animals. | Ten akusala kamma with established wrong views. | Variable |
| 3. Peta (Hungry Ghosts; Preta in Sinhala) | Some live in our world unseen to us. | Ten akusala kamma with established wrong views. | Variable |
| 4. Vinipāta Asuras (Asuras) | Some live in our world unseen to us. | Ten akusala kamma with established wrong views. | Variable |
| Sugati (Desired Kāma Loka Realms) |  |  |  |
| 5. Manussa (Human) | Most valued birth of all realms. | Puñña abhisañkhāra (thihethuka, dvihethuka, and ahethuka) | Variable (Note 2) |
| 6. Cātummahārājika Deva | Fine bodies from this realm; no diseases. | Puñ̃a abhisañkhāra. | $\begin{aligned} & 500 \mathrm{CY} \\ & 9 \mathrm{M} \text { HY (Note 3) } \end{aligned}$ |
| 7. Tāvatimsā deva | Sakka lives in this realm. | Puñ̃a abhisañkhāra. | $\begin{aligned} & 1000 \mathrm{CY} \\ & 36 \mathrm{HY} \end{aligned}$ |
| 8. Yama deva |  | Puñ̃a abhisañkhāra. | $\begin{aligned} & 2000 \mathrm{CY} \\ & 144 \mathrm{M} \mathrm{HY} \end{aligned}$ |
| 9. Tusitā deva |  | Puñ̃̃a abhisañkhāra. | $\begin{aligned} & 4000 \mathrm{CY} \\ & 576 \mathrm{M} \mathrm{HY} \end{aligned}$ |
| 10. Nimmānaratī deva |  | Puñ̃a abhisañkhāra. | $\begin{aligned} & 8000 \mathrm{CY} \\ & 2304 \mathrm{M} \text { HY } \end{aligned}$ |
| 11. Paranimmita Vasavattī deva |  | Puñ̃̃a abhisañkhāra. | $\begin{aligned} & 16000 \mathrm{CY} \\ & 9216 \mathrm{M} \mathrm{HY} \end{aligned}$ |
| Rūpa Loka (Fine Material Realms) |  |  |  |
| 12. Brahma Parisajja deva | Jhānic bliss in this and higher realms. | First jhāna (minor) | 1/3 kappa (Note 5) |

| Realm | Description | Cause of Birth in Realm (Note 1) | Lifetime |
| :---: | :---: | :---: | :---: |
| 13. Brahma Purohita deva |  | First jhāna (medium) | 1/2 kappa |
| 14. Brahmakayika (Maha Brahma) |  | First jhāna (highest) | 1 kappa |
| 15. Parittaba deva |  | Second jhāna (minor) | 2 kappa |
| 16. Appamanabha deva |  | Second jhāna (medium) | 4 kappa |
| 17. Abhassara deva |  | Second jhāna (highest) | 8 kappa |
| 18. Parittha Subha deva |  | Third jhāna (minor) | 16 kappa |
| 19. Appamana Subha deva |  | Third jhāna (medium) | 32 kappa |
| 20. Subha Kinhaka deva |  | Third jhāna (highest) | 64 kappa |
| 21. Vehappala deva |  | Fourth jhāna various levels from here and above | 500 kappa |
| 22. Asañña satta | Body only; no mind |  | 500 kappa |
| 23. Aviha deva | Only Anāgāmīs |  | 1000 kappa |
| 24. Atappa deva | Only Anāgāmīs |  | 2000 kappa |
| 25. Sudassa deva | Only Anāgāmīs |  | 4000 kappa |
| 26. Sudassi deva | Only Anāgāmīs |  | 8000 kappa |
| 27. Akanittakha deva | Only Anāgāmīs |  | 16000 kappa |
| Arūpa Loka (Immaterial Realms); see Note 4 |  |  |  |
| 28. Ākāsānancāyatana deva |  | Fifth jhāna | 20,000 kappa |
| 29. Viññānañ̃cāyatana deva |  | Sixth jhāna | 40,000 kappa |
| 30. Ākiñcaññāyatana deva |  | Seventh jhāna | 60,000 kappa |
| 31. Nevasaññānāsaññā deva |  | Eighth jhāna | 84,000 kappa |

## Notes:

1. See, "Kamma, Sañkhāra, and Abhisañkhāra - What Is "Intention"?." Akusala kamma are the same as apuññābhisañkhāra (apuñña abhisañkhāra.)
2. The realms and the lifetimes are extracted from various suttā: see, for example, "Dhammacakkappavattana Sutta Interpretation - Uddesa, Niddesa, Patiniddesa", WebLink: suttacentral: Sañkhārupapatti Sutta (MN 120), and "Pathama Mettā Sutta (AN 4.125)."

- In particullar, WebLink: suttacentral: Sāleyvaka Sutta (MN 41) discusses how different types of kamma lead to rebirth among the 31 realms.
- The "WebLink: suttacentral: Visākhā Sutta (AN 8.43)" gives lifetimes of various deva realms.

3. Tihetuka means kusala kamma done with alobha, amoha, and amoha.

- Dvihetuka means kusala kamma done with alobha/amoha or adosa/amoha. They have not removed all ten types of micchā ditthi but may have removed many. They grasp the new bhava without fully understanding, i.e., javana citta at the cuti-patisandhi moment will have "weak javana power."
- In contrast, one with tihetuka birth grasps the new existence with a full understanding of the laws of kamma. Therefore, amoha means removal of the ten types of micchā ditthi.
- Ahetuka births occur purely as a vipāka of a good kamma but without generating any javana citta. They have not removed most of the ten types of micchā ditthi. Thus, "ahetuka" does not mean "without hetu" there. It just means an "unfortunate birth."
- See, "Patisandhi Citta - How the Next Life is Determined According to Gathi" for details.

4. $\mathrm{CE}=$ Celestial Years; M HY $=$ Millions of Human Years.
5. A Mahā Kappa is the time for the Solar system to go through a complete cycle. A quarter of this (or an Asañkheyya Kappa or 20 kappa) is the life of the Earth or the Solar system. The solar system is born, destroyed, and reborn like living beings. See, "Buddhism and Evolution - Aggañña Sutta (DN 27)." The Buddha describes the length of one kappa in the "WebLink: suttacentral: Pabbata Sutta (SN 15.5)." The lifetimes of many realms given in Ref. 9; in the English translation, the lifetimes can be found in section WebLink: suttacentral: 18.6.2. Age Limit.
6. The connection between various jhānic states and the corresponding Brahma realms in, "WebLink: accesstoinsight.org: The Thirty-one Planes of Existence."
7. The names of the four arūpa realms are descriptive of their characteristics.

- Akāsānancāyatana comes from "ākāsa" + "ananta" or infinite + "āyatana," or the realm where the infinite space is the focus of the mind (ārammana).
- Vinnānancāyatana comes from "viñ̃āạa" + "ananta" or infinite + "āyatana," or the realm where the infinite viñ̃āna is the focus of the mind (ārammana).
- Ākincannayatana comes from "ākin" + "ca" or mind + "āyatana," or the realm where the focus of the mind ( $\overline{\text { arammana }}$ ) is only the mind.
- Neva saññ̄ n̄̄ $\operatorname{sañña} \bar{a}$ comes from "na" or not + "asaññ"" or without perception + " $\bar{a}$," or not + "saññ"" or perception, i.e., the realm where one cannot say whether there is either "no perception" or "there is perception." One could go on for a short time without perception (just like in the asañña realm), but it comes back since the "bhava" is still there.

8. The following video gives a good general description of the 31 realms:

WebLink: youtube: Bhante Anandajoti: The Planes of Exist
9. All the realms and their characteristics detailed at "WebLink: suttacentral: Dhammahadayavibhanga"

- English translation at "WebLink: suttacentral: 18. Analysis OfThe Heart OfThe Teaching."

January 24, 2019: Relevant post: "Buddhism and Evolution - Aggañña Sutta (DN 27)."

### 9.1 Paṭicca Samuppāda - "Pati+ichcha" + "Sama+uppāda"

## Revised November 3, 2018; July 29, 2019; re-written March 15, 2022

> "Yo paticcasamuppādaím passati,
> so Dhammaì passati.
> Yo Dhammaì passati, so paticcasamuppādam passati."
"One who sees paticcasamuppāda sees the (Buddha) Dhamma.
One who sees the (Buddha) Dhamma sees paticcasamuppāda."

## (WebLink: suttacentral: Mahāhatthipadopama Sutta (MN 28); at the end)

- Pațicca Samuppāda explains how we accumulate kammic energy to "power up" future births. That sustains the rebirth process and will bring rebirths mostly in the apāyās. Thus, Paṭicca Samuppāda explains how future suffering arises.
- Whenever we get attached to sensory inputs (ārammana) and think, speak, act with lobha, dosa, moha, we will accumulate such kammic energy. We will discuss that in upcoming posts.
- Therefore, it is critical to understand Patticca Samuppāda, see the next post for details: "Paticca Samuppāda - Overview."
- Here is the pronunciation of Paticca Samuppāda:

## WebLink: Pronunciation of Paticca Samuppāda

Paṭicca samuppāda, translated into English as "Dependent Origination," does not convey the phrase's accurate, complete meaning. It is better to keep the same name and understand what it means.

## - The closest English translation is "Willful attachment leading to the existence of similar kind."

1. Paticca = patti+icca; here "patil" is bonding, and "icca" (pronounced "ichcha"; see \#12 below) is liking.

- Thus, Patticca is "bonding to something willingly" or "getting attached to something through a liking for it."
- This bonding depends on one's gati (habits and likings), which in turn are due to deep-seated $\bar{a} s a v a s$ (cravings).
" There are many posts on the website on this key Pāli term: "gati." One can get a list of relevant posts by typing "gati" in the "Search" box at the top right. Note that "gati" is pronounced as "gathi."

2. Samuppāda = "sama" (same or similar) + "uppāda" (generation), i.e., an existence (bhava) of similar quality or kind.

- Thus samuppāda means leading to existence or experience corresponding to defilements that made one attach to the situation (ārammana) in the first place.
- Everything in this world arises due to six root causes: lobha, dosa, moha and alobha, adosa, amoha; see, "Six Root Causes - Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna)."
- Different types of pațicca samuppāda cycles operate based on which kind of causes are involved; see, "Paticca Samuppāda Cycles."

## Connection to Gati - Simple Example

3. For example, when we generate potent hatefil thoughts about a person, we could be in the mindset of an animal. At that moment, we may even behave like an animal, hitting and clawing at that person if things get out of hand. Even if we may not act physically, we will have that "animal-like" mindset.

- At that moment, we generate a gati (character) corresponding to "bhava," or existence similar to an animal. That, in turn, leads to grasping a corresponding "bhava." Then "bhava paccaya $j \bar{a} t i "$ leads to a similar "jāti" or birth, i.e., to act like an animal.
- We generated a corresponding "bhava" in our mind because we got "bonded" to that situation via hateful thoughtful thoughts; we developed a corresponding "bhava" in our minds. Results (effects) correspond to causes: cause and effect. If we keep creating the same kind of "bhava," that leads to forming "gati" or habits. They are all interconnected.
- Strong feelings under such conditions create subtle energies called "kammic energy." That energy can build up to create a subtle "manomaya kāya" (gandhabba kāya) corresponding to a new existence (bhava.)

4. Now, if we keep getting into fights with that person (or with others) similarly, we will be building up that "bhava," and this could lead to the formation of a very potent kamma seed; see, "Sañkhāra, Kamma, Kamma Bīja, Kamma Vipāka."

- Furthermore, it becomes a "gati" as well (see, "Samsāāic Habits and Asavas"). Then it is easier to get into such situations, and a vicious cycle starts leading to that gati taking hold.
- Here, it is critical to understand that "uppāda" or "birth" is according to the "bonding with liking" (paṭi icca) for CAUSES, not the birth itself. For example, no one wants to be born a dog. But one cannot avoid being born a dog if one willingly does "lowly things" appropriate for dogs and thus cultivates "gati suitable for a dog."

5. Now we combine the two terms: "Paṭicca Samuppāda" means "attachment to something leading to the generation of the corresponding "bhava" (and thus jāti).

- The establishment of a bhava, in turn, leads to a corresponding jāti or birth: "when one gets attached, it sets up the likelihood of a new birth of similar characteristics."
- For example, when someone acts with greed out of habit, they are prone to behave that way during a lifetime. Furthermore, it could be manifested more powerfully in a future birth by being born a Peta (hungry ghost).

## Two Types of Paticca Samuppāda

6. Therefore, the establishment of an "existence" (bhava) could be two ways:

- Even during the current lifetime, a similar situation can arise. For example, "gati" formed via above mentioned "fights" with other people will tend to draw oneself to a similar outcome even with the slightest provocation. That is a "pavutti bhava" (and jāti) that lasts for a short time during current life; see, "Idappaccayatā Paticca Samuppāda - Bhava and Jāti Within a Lifetime." and "Idappaccayātā Paticca Samuppāda."
- If this hateful "gati" becomes profoundly ingrained and becomes a potent kamma seed, that could come to the mind at the dying moment. That could lead to a hateful "uppatti bhava" in the next existence, as an animal or even in the niraya (hell); see, "Akusala-Mūla Uppatti Paticca Samuppāda" and "Bhava Kammic Energy That Can Power an Existence." [uppatti : [f.] rebirth; coming forth; origin. upapatti : [f.] birth; rebirth; approach.]

## A Uppatti Bhava Can Lead to Many Births (Jāti)
